Yet with all this uncalled-for misery and trouble laid squarely to the stupid blundering of Chester Bowles and the O. P. A., they have not put forth one remedy. As a matter of fact it seems to have increased their arrogance and ego.

Tossing out three or more Congressmen from an important O. P. A. meeting when these Congressmen were endeavoring to aid their oppressed constituents is just a little simple gesture on the part of the O. P. A. to show the country that the O. P. A. is not only arbitrary and arrogant but that it is all-powerful and can teach Himmler a few tricks, too.

Many Senators have come out publicly and said, "There is something crooked about the O. P. A." In the large cities, in Washington and elsewhere, you hear these ugly rumors, "To get along with the O. P. A. all you have to do is to pay off the right fellow; boys, it is just like the old bootleg days."

And yet Chester Bowles—who refuses not only to see Congressmen but Senators as well about official business—goes serenely on with all the overbearing tactics of a Gestapo chief, apparently answerable to no one for putting thousands of businesses out of business without logic, rhyme, reason, or necessity.

Just remember what a "little bird" said he heard via the grapevine, "Chester Bowles"—he is reported to have already feathered his nest—"and the others in O. P. A. do not have to answer for their crimes and sins, but who will?" The answer is simple: The Congressmen and Senators, and that is why some new faces will show up in 1946, unfortunately, in Congress.

Eliminate Need of Administering Estates of Deceased Veterans

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. DOYLE. Mr. Speaker, when yesterday I introduced bill H. R. 2941, it was referred to the Committee on Military Affairs. I respectfully and specifically call your attention to the fact that this bill is to authorize the payment of the entire amount found due in the settlement of accounts of deceased members of the armed forces without the appointment of a legal representative of the estate.

Having been president of the bar association in Long Beach, also having been a member of the board of conference of bar delegates of the State of California, as well as having been admitted to practice before the Supreme Court of the United States of America, and having specialized in probate law in my own private law practice, I think I am aware that the lawyers of America are not interested in making legal fees from administering the estates of deceased members of the Army, Navy, Marines, Coast Guards, or officers of the Public Health Service, or any other unit of the armed forces. They gain no professional pride or satisfaction in having it necessary for the deceased veterans' widows or children to pay them fees out of the few hundred, or very few thousand dollars which is received by them from the United States of America. The lawyers of America know that these widows and children will need every cent of the money they receive, as a result of the death of their supporter. Therefore, I offer this bill confident the bar of America will be pleased to see its enactment.

I am aware that thousands of lawyers have already acted as legal counsel in administration of such estates without charging any fee. I compliment them on so doing.

This bill, of course, does not cover life-insurance proceeds—that is covered by the policy itself and goes direct to the

beneficiary named therein. This bill only pertains to the cash which has accrued in favor of the veteran by way of accrued salary, wages, compensation, bonuses, remittances unpaid, or any other unsettled accounts of deceased officers or enlisted men. I am informed that for many years $500 would be paid to a deceased veteran's widow, children, or legal heirs, without it being necessary to have legal representative appointed. I am informed that, presently, up to $1,000 is being thus paid. Is there any Member of this House who can give me one sound reason why all amounts thus accruing and due the widow or children should not be paid by Uncle Sam, at a minimum of cost and delay? Do you know of any reason, sound in public policy, as to why the fundamentals of my proposal are unsound or contrary to the best interest of either the National Government or the legal survivors of these distinguished veterans who have given their lives in our protection, and who, therefore, are removed from the possibility of being the honorable legal support of their families? I know of no reason. If you do, I invite you again to state it to me.

Not only will hundreds of thousands of dollars be saved in law fees to the widows and children under my bill but hundreds of thousands of dollars in court costs will also be saved. For instance, in California, it costs $10.50 to file such an estate with the county clerk; it costs $10 per thousand for surety bond; it costs a dollar here and a dollar there until the court costs alone average about $50. I am told the costs run about the same in other States. Whereas the amount involved coming from Uncle Sam to these suddenly made widows and half-orphaned children runs from about $500 to never over $5,000. This bill, of course, does not apply to doing away with the requirement of administration of other items of property, real or personal. It only applies to the cash which is due the veteran at the time of his decease, by the United States of America.

I say again, it does not include life insurance, which is specifically due and payable to the beneficiaries named in the policies.

If you ask me why I have not provided a limit as to amount upon which estate administration shall not be required, then, Mr. Speaker, I reply there is no legal or practical reason for stipulating a limit. If anyone can think of one, please state it to me. It being admittedly sound, sensible, and right public policy that widows and children of deceased veterans shall be paid up to $1,000, as is presently, generally, done, on account of such accruals being in the hands of this great Government—then, why is it not equally sound, sensible, fair, and right that Uncle Sam now make unnecessary the spending of any money whatsoever by these widows and children for law or court fees? The law fees in such estates would run from $25 to $250 and the court costs from $15 to $50. I know of no reason why these widows and children need to be longer required to waste these sums in an act unnecessary, either to protect creditors—for there are none—or to establish heirship—the Government has complete lists of the heirs. So neither of these sound reasons for administration of ordinary civilian estates exists in the case of estates of deceased veterans.

I say again there is no need for a limit in such cases. The practical situation dictates that this position by me is sound. To illustrate, if a veteran dies and has a sum due him from Uncle Sam, which sum amounts to $1,500, under the present procedure the widow and children would have to pay law and court fees to administer the $500, even if Uncle Sam pays them $1,000 of the total sum. If, of course, the sum over $1,000 happens to be $200 or $300, then the widow and children could well be expected to forfeit that amount on account of the fees, and so forth, involved. For, not frequently, administration fees of such small estates might well consume $150 or more. I know it is true at present seldom do such accruals of cash due veterans at the time of their death amount to as much as $3,000. But, the exceptional case when it does, is just as essentially worthy of the effective result of the enactment of this legislation as is a lesser cash estate. In fact it might be the widow and children of the veteran leaving an estate in cash from Uncle Sam of over $2,000 or $3,000 who might need these fees saved by this bill, for their very maintenance and the children's education more than some widow and children would where the estate in such case happens to be considerably less. There might be other estate or other source of income or wealth for the education of the children and the maintenance of the family.

I say again, as a civil lawyer who has handled in the probate courts of California many hundreds of estates in my private practice, I know of no sound reason or argument against the practical and beneficial application and results which will accrue to the widows and children and everyone concerned, including the Government, if this bill is enacted as a national policy and law.

Paper Salvage

REMARKS

OF

HON. J. GLENN BEALL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. BEALL. Mr. Speaker, the gentleman from California [Mr. VOORHIS] has suggested that we turn in the old ballots to the waste-paper campaign. I am very happy to tell the gentleman from California that in my home county of Allegany the board of election supervisors have already turned their used ballots over to this campaign.

I include the following news item from the Cumberland (Md.) Daily News:

BALLOTS WILL BE ASSIGNED TO LOCAL WASTE-PAPER DRIVE—RYAN AND KENNY CITE NEED FOR SCRAP PAPER IN WAR EFFORT

Ballots cast in the 75 Allegany County precincts during the primary and general elections of 1944 will be turned over to the waste-paper drive and sent to the West Virginia Pulp & Paper Co. mill at Luke, Md., instead of being destroyed by burning as heretofore, it was announced yesterday by Edward J. Ryan, attorney to the Allegany County Board of Supervisors of Elections.

Ryan discussed the matter with James E. Kenny, of Westernport, chairman of the election board, and it was agreed that since other counties in the State are turning over their ballots to waste-paper collection drives they could see no reason why Allegany County should burn the ballots during an emergency when scrap paper is in such great demand for the war effort, due to the critical paper shortage which faces the Nation.

MUST BE HELD 4 MONTHS

The board attorney pointed out that election laws of Maryland specify that ballots shall be kept for the space of 4 months from the date of such delivery at the courthouse, after which the board shall destroy, or cause to be destroyed. The law fails to state that ballots must be burned, but that has been the procedure of destroying them in the past.

Attorney General William C. Walsh stated that inasmuch as a paper shortage exists he could see no sense in burning the ballots if such paper could be used to further the war effort.

Thomas Stephens, of Mount Savage, messenger to the election board, who has charge of destroying the ballots at the expiration of 4 months after they were locked up in the basement of the courthouse, said he will gladly cooperate in seeing that the ballots are turned over to the waste-paper collector as soon as he is officially notified by the attorney to the board. He suggested that the collector provide boxes or containers in which to place the ballots as they are moved from the courthouse to trucks. Stephens said that arrangements may be made to dispose of the ballots the latter part of this week.

Baltimore County has turned over all of its ballots to the waste-paper drive, baling the paper at the courthouse in Towson before it is turned over to the collector.

COLLECTION SET NEXT WEEK

Emmett A. Dougherty, waste-paper collector, is anxious to pick up the ballots this week as the monthly collection for Cumberland and vicinity is scheduled for next week starting on Monday at which time his trucks will pick up paper in LaVale, Corriganville, Bowman's Addition, Baltimore Pike, outside the city limits as far as Miller's service station and Bedford Road from Nave's Crossroads to the Pennsylvania State line.

D'Alesandro Asks Roosevelt Medal

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following news item from the Baltimore Sun:

D'ALESANDRO ASKS ROOSEVELT MEDAL

WASHINGTON, April 18.—Representative D'ALESANDRO, member of the Appropriations Committee, today introduced a bill authorizing President Truman to award, posthumously, a Congressional Medal of Honor to President Roosevelt.

The bill cites that President Roosevelt "gallantly and unselfishly gave his life in

the service of the Nation as Commander in Chief of its armed forces and devoted leader in the cause of world peace."

Representative MCCORMACK, majority leader of the House, commended Representative D'ALESANDRO and referred to him as "one of the most loyal supporters of President Roosevelt." He also recalled that President Roosevelt at one time referred to Mr. D'ALESANDRO as his most loyal supporter.

Ernie Pyle

REMARKS

OF

HON. FOREST A. HARNESS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. HARNESS of Indiana. Mr. Speaker, America mourns the death of Ernest Taylor Pyle—plain Ernie to America's fighting forces and the millions of people at home to whom he has brought G. I. Joe's story.

Far too old and frail by any military standards to endure the rigors and hardships of war, hating and fearing every minute of it, Ernie nevertheless slogged and suffered his way through it from the opening Allied offensive in north Africa in 1942 to the present action in the far western Ryukyu Islands, which cost him his life.

Ernie Pyle was a plain, simple, humble man who understood people and loved them. He was born at the turn of the century in the little farming community of Dana, Ind. He grew up in that wholesome Midwest atmosphere, attended Indiana public schools and Indiana University. His start in the newspaper field he made at La Porte, Ind. Ernie was in every sense a true Hoosier gentleman. This Hoosier vagabond traveled up and down the country back in the days of peace just making friends with the folks he met, and writing homely, intensely human stories about them. Like that other great American, Will Rogers, Ernie Pyle might well have said, "I never met a man I didn't like," for in all the Pyle dispatches I have ever read, I do not recall an occasion when he ever spoke unkindly of an individual. Ernie was born with the simple touch and an abiding interest in human values.

It was natural, then, that Ernie Pyle should emerge as the G. I.'s reporter, the one man qualified to write the epic of the men and women who are fighting this war. Ernie made no pretense as an expert in military strategy, or global politics. He was received as cordially by world ranking military and political officials as he was by the men in the fox holes, but he measured them by the same human yardstick he wielded in all his appraisals; and his stories from high sources were about people rather than policies and programs. Perhaps as well as any individual could, he knew the terrible immensity of this war, and the magnitude of the force we have thrown into it. But this knowledge never once obscured the individual fighting man who, he knew so well, is the heart and muscle of our military machine.

Ernie Pyle knew and understood G. I. Joe. He felt his pain and suffering. He shared his hopes and aspirations. He realized his nobility and courage. Ernie told Joe's story the way Joe wished it told. And Ernie conveyed that story to Joe's family and friends at home in a way which has earned him a peculiar and lasting place in the history of war correspondents. Ernie Pyle is dead. But Ernie Pyle will live forever in the hearts of our fighting men and the millions of Americans to whom he has told our warriors' story.

Ernie Pyle—G. I.'s Pal

REMARKS

OF

HON. SAMUEL A. WEISS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. WEISS. Mr. Speaker, Ernie Pyle is dead. This sad news yesterday, following so closely the death of our beloved President and Commander in Chief, Franklin Delano Roosevelt, has shocked Capitol Hill.

LOVED SLUGGING FOOT SOLDIER

Ernie Pyle was unquestionably the most famous war correspondent of World War No. 2. He enjoyed writing about and living with the infantryman, the slugging foot soldier. Following the infantryman for almost 2 years in north Africa, Sicily, and Italy, he suggested that the Congress recognize these boys by enacting a "fight-pay" bill allowing combat soldiers a 50-percent increase in pay equivalent to the flight pay granted to men in the Air Corps, paratroopers, and the 50-percent increase allowed servicemen on submarine duty. The hazards of the infantrymen are undoubtedly greater.

In a personal letter to me from England, dated May 21, 1944, Ernie wrote:

Our original motive was to give recognition to that poor old —— —— —— —— who lies up there in the mud and cold and rain for weeks at a time, never dry, never warm, eating cold food out of cans, dirty and unshaven and sleepless, and constantly under mortar, artillery, or rifle fire. Usually he is an infantryman, although others do sometimes come into such sustained combat, such as Rangers, paratroopers, and SS troops.

Ernie Pyle lived with our doughboys. He knew their temper. He spoke their language and he wrote it more eloquently than any other correspondent in this or any other war. When he could no longer stand the smell of death Ernie Pyle returned to the States from the European theater for a rest. But he didn't stay long. He didn't exactly want to go to the Pacific theater, but then he knew that neither did G. I. Joe, so he went. There he continued his brilliant writing and praise of the "slugging foot soldier" in the hell holes of the Pacific.

Yesterday on the island of Ie Shima, a tiny island off Okinawa, Ernie Pyle was killed in action. His death is mourned by all, particularly by the servicemen, and more so by the foot soldiers, who reverently loved and admired him. And here at home the millions of Americans to whom Ernie Pyle endeared himself by his frank reporting of the sacrifices and heroism of their gallant fighting sons are saddened by his death.

FIGHT PAY FOR FIGHTING MEN

As a result of Ernie Pyle's suggestion I introduced a bill in the Seventy-eighth Congress and reintroduced this same measure in the Seventy-ninth Congress—H. R. 775—to grant fight pay to fighting men.

GALLUP POLL FAVORED BILL

Dr. Gallup's Nation-wide poll conducted April 20, 1944, reported that 70 percent of the American people favored combat pay for front-line soldiers.

As Ernie Pyle wrote me:

When I was at the front the last time several Infantry officers brought up the same suggestion. They say "combat pay" would mean a lot to the fighting man. It would put him in a proud category and make him feel that somebody appreciates what he endures.

TRIBUTE TO ERNIE PYLE

The greatest tribute and memorial we could pay to Ernie Pyle would be for the Congress to enact into law the Ernie Pyle bill—"fight pay for fighting men"—and make this act retroactive to November 7, 1942, the day of the invasion of north Africa. It would reward our gallant and courageous slugging foot soldier now in the outskirts of Berlin and Tokyo and at the same time it would honor the efforts and sacrifices of the Nation's most famous war correspondent, Ernie Pyle, the G. I.'s pal.

O. P. A. Says, "Don't Blame Them"—Not One of the Poor 60,164 Overworked Employees of O. P. A. Could Find Time or Talent To Testify Before Senate Investigating Committee Last Wednesday—It Couldn't Happen Here, But It Did

EXTENSION OF REMARKS

OF

HON. JAMES H. MORRISON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. MORRISON. Mr. Speaker, when the Senate food investigators Wednesday asked O. P. A. to send someone up to answer the questions regarding the meat crisis and shortage, they were informed that the O. P. A. had no one competent to answer questions, since Mr. Chester Bowles and Mr. James Brownlee were busy. Mr. Bowles was reported camping on the White House steps—evidently he was hoping against hope to hold on to his job as Administrator. Of course, after all, what is a measly little senatorial investigating committee in the lives of an arrogant, dictatorial, whitewashed champion like Mr. Bowles?

Mr. Brownlee was reported busy working on the meat situation, while daily thousands of butcher shops and meat packers all over the United States are closing as a result of foolish, stupid, arrogant, unreasonable, and arbitrary rulings of the O. P. A.

Typical of Mr. Bowles, though, to run to the White House after he has made the worst mess out of the O. P. A. as its maladministrator in the entire history of Washington bureaucracy.

With 60,164 employees and yet the O. P. A. could not find one employee competent, able, intelligent, or with sufficient time to send to testify before an important Senate hearing.

Of course, to Bowles, O. P. A. and company, a little thing like a Senate committee means little, if anything, to them. They are bigger and more important—in their own estimation, judging by their arbitrary acts—than both the Senate and the House and the entire country as well.

Of course, bear this in mind, that the testimony of the O. P. A.'s representative, Mr. Emerson, before the Senate committee was the most ridiculous testimony ever heard on Capitol Hill.

Looks like the rumors of a new O. P. A. Administrator being appointed are about to come true—the sooner the better.

Retention by America of Key Bases in Pacific—House Concurrent Resolution 41

REMARKS

OF

HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. MAHON. Mr. Speaker, on April 9 I introduced House Concurrent Resolution 41, which would express the will of Congress that America should retain key bases in the Pacific. It is encouraging to observe the almost universal support which this resolution appears to have. This is emphasized by the debate in the House yesterday.

In view of the favorable sentiment expressed in the House yesterday by the gentleman from New York [Mr. WADSWORTH] and others, I wish to repeat that the House should immediately adopt this resolution in the interest of American security and in clarification of American foreign policy.

Mr. Speaker, it was on April 3 that Admiral King warned that America should not give up key bases in the Pacific which are now being won by American arms. On the following day in a speech in the House, I commended Admiral King and made public portions of letters which I had addressed to the President and to the Secretaries of State, War, and Navy, urging that these key bases not be surrendered at the end of the war, and that no commitments be made now which would preclude our retention of these bases.

The resolution is as follows:

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the United States shall retain possession and control over all islands in the Pacific Ocean which are liberated by American arms and which the Chief of Staff of the Army or the Chief of Naval Operations designate as necessary for the maintenance of world peace or the defense of the United States, its Territories and possessions: *Provided, however*, That if any such island was formerly owned, mandated, or otherwise occupied by one of the United Nations, the United States shall retain possession and control of such island only until such United Nation is in a position to reoccupy and provide a comparable armed force for the maintenance of the peace and the security of the world, or until the United Nations make suitable arrangements for the joint occupation and control of such island.

The Home Guard

EXTENSION OF REMARKS

OF

HON. ELBERT D. THOMAS

OF UTAH

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. THOMAS of Utah. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address which was prepared by Vice President Truman and was to have been delivered last Friday at the graduating exercises of the National Police Academy, Federal Bureau of Investigation. The exercises were canceled because of the death of President Roosevelt. The subject of the address is The Home Guard.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

It is a special privilege to be present at the graduation of you guardians of the home front. It would be more than tragic if while fighting a world-wide war to preserve our democratic ideals we would neglect the constant battle against evil forces at home.

Fortunately, the specialized training provided here at the National Police Academy, under the supervision of the Federal Bureau of Investigation, assures America that we will continue to have well-equipped specialists to maintain peace and order within our borders.

Please permit me to pay special tribute to the man who, in addition to founding the National Police Academy, has played such an important part in improving law enforcement throughout the United States. I refer to your distinguished leader, the moving spirit behind the Federal Bureau of Investigation, my good friend the Honorable J. Edgar Hoover.

You men have been especially fortunate in being selected for intensive training at the greatest crime clinic in the world. Here you have learned the wonders of modern scientific methods. You have acquired skill in using the latest weapons available. Even more important, here you have been taught the all-essential need of quick cooperation with all law-enforcement agencies, local, county, State, and Federal. If we hope to make sound progress for the benefit of all society, we must carry on a well-coordinated, all-out attack on crime.

You officers have had the opportunity to study the most modern methods of crime prevention and crime detection. Your intense training here at this most efficient center should pay you and society great dividends in the years to come. You learned not merely the use of scientific methods in combating the enemies of society but also the urgent need of effective cooperation with all the other useful agencies. Only by a Nation-wide, coordinated campaign by all law-enforcement agents can we achieve the highest degree of efficiency, which in itself will be one of the most effective means of preventing antisocial acts. Certainty of criminal apprehension is the most powerful check on crime.

Tremendous progress has been made in criminology during the last century. In the past the criminal was punished in a spirit of revenge, without proper consideration of the many factors which gave rise to this problem of social maladjustment. Criminals are not born such. They are usually the unfortunate product of their environment, experience, and social background.

In view of the many economic and health factors, which frequently give rise to criminal tendencies, there remains a tremendous job for society to accomplish. Our statesmen must eliminate most of the outstanding inequities in our social structure, providing greater individual security, improved health, and a better economic opportunity for all our people. Then a most important step will be taken in removing some of the main reasons for crime.

The war has greatly complicated the problems of law-enforcement agencies. In the first place, there remains the constant danger of saboteurs, spies, and enemy agents, all anxious to undermine our military power and the public morale. Furtunately, the splendid work of the Federal Bureau of Investigation, under the able direction of Mr. Hoover, has made these enemy efforts of little value. However, constant vigilance is still necessary for the preservation of life and property at home.

Another factor, which hit agencies charged with the maintenance of law and order, has been the call to arms of many of our most active officers. Yet despite all handicaps, utilization of modern scientific methods have made possible the record achieved. As in all matters mortal, there still remains room for improvement.

The most distressing aspect of the current criminal record in America is the alarming increase in juvenile delinquency. Youngsters, still in their teen age, constitute one of the major groups of our criminal offenders. For the average layman, it is difficult to realize that the most frequent arrests in any male age group is 17, 18, and 19 years, respectively.

In a review of the 1944 figures, it is especially shocking to learn that, in a democracy where the voting privilege is denied until the age of 21, our youth under 21 years committed 35 percent of all robberies, 52 percent of burglary, 35 percent of larceny, and 63 percent of auto thefts. Of 110,000 crimes committed against property, fully 40 percent of the offenders were less than 21 years old. What a sad commentary upon the training of the youth of America.

As officers charged with the duty to protect society from crime, you have a most serious responsibility. You will require the active cooperation of all law-abiding citizens. For the most effective discharge of your duty, you need the help of every social agency created to improve living conditions in your community.

It is far better and cheaper to prevent crime than to pursue the criminal, and, after detention, try to rehabilitate him. For example, to direct the excess energy of youth to the gymnasium of a boys' club may prevent his joining a juvenile gang.

The future of America depends upon the character and quality of our youth. The primary problem is one of home training, general education, and character building. However, as leaders in the cause of a progressive order, you should actively promote and help coordinate all welfare and social agencies which can be utilized to ease your burden.

Present social conditions naturally reflect the great dislocations caused by the war. Mothers with patriotic purposes work in war plants, while their neglected children become social problems. The strong guidance of fathers in service is missing in many homes. Children, who should be in school, are working long hours and, though helping the war effort, sometimes associate with the wrong kind of people. Many spend their salaries seeking release from wartime emotions.

Americans dare not wait until juvenile delinquency becomes more critical before combating the causes. We must act now to protect the welfare and future of our youth.

The total number of selected law enforcement officers from every State of the Union, as well as leading foreign police agencies, who have graduated from the National Police Academy, now total 1,049 men. These officials all know the methods taught here. They are all disciples of modern crime detection. These officers can and will be of great assistance in the fight for a decent social order.

Real peace and order cannot be obtained by vast armies of policemen merely trying to use force and arms to crush crime by old-fashioned methods. Today, more than ever before, we need quality, not just quantity, in our law-enforcing agencies. Small, but efficient groups, operating carefully and intelligently, can accomplish far more than a large untrained force. You are being sent forth to assist your community by applying the latest scientific methods placed at your disposal by this specialized training. You will guide others to appreciate the great benefits of modern techniques and efficient Nation-wide cooperation in combating crime.

Today millions of our young men are fighting throughout the world for the preservation of democratic decency. It would be tragic indeed if they came back to find that the home front had fallen down on the job. Our veterans have the right to expect us to safeguard their homes and their relatives, despite all wartime difficulties.

In this sacred trust, the home guard will not fail.

At home here we still have a tremendous task ahead of us. The dislocation of families by war work in distant plants, the growing threat of juvenile delinquency, and the psychological reactions of individuals exposed to the emotional hardships of war, all present problems of the first magnitude. If we intend to insure the proper social climate which will permit orderly progress in keeping with our ideals, all of us must face these new problems frankly and act effectively.

The modern law-enforcement official needs far more than a night stick and a gun to maintain peace and order. The efficient officer must know the nature and extent of local social problems. He must use scientific tests, as well as psychology. As a progressive leader he should effectively mobilize all available agencies in his locality, and throughout the country, for the prevention, as well as the detection of crime. This is a large order but the times call for men of large stature.

As bigger social problems are presented, America needs better trained men to solve them. You are indeed fortunate in having the opportunity of association with the best and receiving the finest training available in your specialized profession. By your conduct and character you can make your profession one of the most progressive and useful in our national life

In a few months the National Police Academy will celebrate its tenth anniversary. During this decade tremendous things have been accomplished by its graduates. If we had time it could be shown how much money society was saved by the special training of these graduates. We could list also the arrests made, convictions obtained, and pardons recommended by these officers.

No set of statistics, however, can adequately convey the heartache averted, nor the deep-felt gratitude for crimes prevented, for lives saved, for missing people recovered, and for the countless worthy services rendered. Even the most comprehensive reporting system cannot reveal these things. For all such essential services, society is indeed grateful to the law enforcement officers, especially to the graduates of this splendid academy.

Our fighting men on all fronts are today going through a most strenuous ordeal. They are bravely offering their lives so that we may live our democratic way. The heroes on the battle front surely deserve all praise and credit for their noble fight.

The general public, unfortunately, does not fully appreciate the fact that right here at home other heroes are waging a relentless war against another deadly foe—the modern criminal. This public enemy is resourceful, crafty, and efficient. His attacks are frequently powerful and against the weak. Your bitter conflict against crime is endless.

To check the constant ravages of crime requires character of the highest order. As well expressed in the motto of the National Police Academy, to win your war you need "Knowledge, Courage, Integrity." The omission of any one part of this trinity of virtues makes the other two practically useless. Like the three-legged stool, it simply cannot stand on two.

The world would be a much better place if more people possessed these great virtues—knowledge, courage, and integrity. I am confident that, after your practical experience and intensive training, you will continue to be the strong champions of law and order. With your essential character and tested ability, you will render a lasting service to your community and to your country.

Universal Military Training

EXTENSION OF REMARKS

OF

HON. CHAN GURNEY

OF SOUTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. GURNEY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address on the subject of universal military training, delivered by Edward N. Scheiberling, national commander of the American Legion, at the Carlton Hotel, Washington, D. C., on April 18, 1945. I hope that all Members of the Congress will take time to read it.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

We meet tonight at a time when the hearts of all America, of all humanity, are filled with the hope that a just and enduring peace may be within our reach at last.

In every community of our land, in every corner of the world, freedom loving men and women, weary to desperation of war and death, are turning toward San Francisco with new inspiration and new courage.

In the hands of the delegates of the free nations, as they assemble there next week for their historic conference, lies an opportunity such as has never been given to men before in the history of this globe—the opportunity to free their fellow men from the dread fear and fact of war.

With them into their Conference go the prayers of all the world, the prayers of the common people who fight and die in wars, the prayers of the men who have fought, and are now fighting, on the battlefields of the world. It is men who know the grim agonies of war who best know and cherish peace.

If the seats at San Francisco were to be filled with men who have seen their comrades die on Tarawa, on Okinawa, and Iwo Jima, in Italy and Germany; the gallant fighting men of America, of England, France, Poland, Russia and all the rest of our allies, war would speedily be condemned forever: as it must be!

We of the American Legion—we, whose ranks include men from both World Wars, have confidence in the work that will be done at San Francisco. We have confidence in the leadership of President Harry S. Truman, in his ability to carry out the peace plans launched by his great leader, Franklin Delano Roosevelt. As the largest organization of veterans of World War No. 1 and World War No. 2 alike, we pledge him all of our support, all of our strength, in carrying the San Francisco Conference to a successful conclusion.

The American Legion is dedicated to the principle of an association of free nations, armed with the force needed to keep the peace, cloaked wth the authority to use that force. Again and again at our national conventions the Legion has spoken. At Chicago last fall the Legion said:

"When peace has been restored to the world, we must be ever vigilant to protect it. Bitter experience of the past proves that peace cannot be preserved unless aggressor nations are promptly and sternly suppressed at the very beginning of any movement inimical to general peace and welfare.

"The cost of maintenance of peace is insignificant compared to the cost of war. Every thinking person now realizes that neither the United States of America nor any other single nation, however great and strong, can maintain peace by its own independent efforts."

In Chicago last fall, as at the 1943 convention, we adhered to the principles stated at our 1942 convention, when we said:

"No peace, however welcome, however promising, can long endure unless it be made secure by the nations which have won it; nations which must ever be prepared in every sense to fight for the rights of free men and freedom-loving peoples.

"We cannot escape, we will not evade, our own responsibility for the maintenance of that peace. We must not forget our stake in it. Every consideration of national interest dictates that we prevent recurrence of the conditions which led to this war."

In 1943 the Legion said:

"Our own national interests must ever be our first concern, and we believe our Nation can best serve and protect its national interests, commensurate with its power and responsibilities, by participation in the establishment and maintenance of an association of free and sovereign nations, implemented with whatever force may be necessary to maintain world peace and prevent recurrence of war."

We cannot, the Legion has said, forget our stake in peace.

Our stake in the peace. You will find it tonight in every city, every town, every village crossroads in America, where mothers, wives, and sweethearts await fearfully for word of loved ones marching against enemy

guns across the seas. You will find our stake in the hospitals, where the wounded men of this war are fighting their way back to health. You will find it wherever soldiers live and fight and die.

In the months that have passed, I have traveled the length of our land. I have talked to countless men and women—in every walk, in every position of life. I have talked with civilians, with veterans of the last war, and of this.

And I find them united in this determination: That now we must find the way to prevent such another world holacaust as this.

They believe in peace—as we of the Legion do. They believe it is possible to attain it.

They must not be disappointed.

But I have found that, with the clarity of vision which comes to men and women in times of great trial, they believe another thing:

That this time America must be prepared to accept her responsibilities; that America must be ready to preserve and maintain the peace. This time, they tell me, America must be strong, able to meet any challenge that the future may bring.

Wherever I have gone, they have asked me about universal military training. America believes in universal military training today—accepts it as a sure, firm bulwark against whatever the future may bring.

Wherever I have gone, men and women, civilians and veterans alike, have asked me when universal military training was to be enacted into law. I have found the overwhelming sentiment in favor of immediate enactment of such a program.

So great is the demand for action that I have asked the Legion's national defense committee, and the national legislative committee, to gather here in Washington. They have been in session together all day. The members of these committees, too, have been in contact with men and women throughout our Nation in recent months. And their experience has been identical with mine; their judgment coincides with mine: that now—now, before the San Francisco Conference begins, is the time for the Congress to begin consideration of this vital legislation.

They have decided to call upon the Congress for immediate consideration of universal military training and they will do so with all the urgency at their command; with all the strength the Legion possesses.

Behind them, in this decision, lies the full power of the 2,000,000 men and women of the American Legion; in the Legion's 20,000 posts and auxiliary units. Behind them, I know, lies the eager backing of every soldier—and every veteran—of this war. And behind them, too, lies the support of our people.

We have marked time enough. Last winter, active support for universal military training reached a high peak, but factors beyond the control of the American Legion prevented immediate action on this legislation at that time. Interest throughout the country is again high—we must not now disappoint those who have placed their confidence in us. This time we must do all that we can to see that a program of universal military training is enacted into law.

It is the belief of the Legion's national defense and national legislative committees—a belief which I heartily endorse—that immediate consideration of universal military training will strengthen the work of the San Francisco Conference.

America is the hope of the world today. It is in our vast strength, our fresh leadership, our unselfish devotion to the cause of freedom, that the structure of world peace must be built. We must say to the world, as its representatives gather on the coast, that America is prepared to assume the responsibilities of peace; that America is ready to do her share.

We know that peace cannot be won by appeasement; it cannot be won by idle wishing. This time we shall achieve a militant peace, a peace based on justice and on strength. Inherent in the plans for world peace machinery is the armed power needed to put an instant stop to any aggression. We do not contemplate today that never again shall an aggressor power arise. We do believe that in the future we shall be well enough organized, well enough prepared to prevent another Hitler from precipitating us into another world holocaust.

We believe that a strong America is the first step toward success in any plan for peace. And we know that America cannot be strong, cannot be ready to fulfill her role of world leadership for peace, unless her sons are ready and trained to fight.

There will be no time in the future for long preparation. The nature of war has changed. It is possible today for an aggressor nation to strike with the speed of lightning; literally faster than the speed of sound. The next war may see bombs, flying thousands of miles, which can destroy whole cities. That is not a dream; it is almost within the realm of possibility. If, as we confidently believe, the machinery for peace is organized at San Francisco, it must be organized on a basis of reality; ready to meet the conditions of today.

We speak of a world organization prepared to put an immediate stop to aggression. What does that imply?

We know what the aggressor's weapons will be—flying bombs and similar terrors. There is only one answer to the weapons of the future. It is difficult—almost impossible—to turn them back in the air, as England found. Those fantastic weapons of destruction can be defeated only by capturing the sites from which they are discharged. Not until the continent of Europe was seized was England released from their deadly attacks.

Putting an instant stop to aggression in the future means swift mobilization of the aggressor forces of the free world, swift invasion of the aggressor nation, immediate occupation of the aggressor's land. Only in that way in the future can we hope to win a war. For it may well be, in any future attack, that if we must wait to draft, and train, and organize an army, our cities, our factories, the whole productive power on which we depend for victory will be wiped out before we can begin to fight.

That is what is in the minds of the people of America tonight. That is the horror they are determined to prevent.

And it is for that reason that the American Legion urgently asks immediate consideration for universal military training—not as a weapon of war, but as a weapon of peace; as a vital, irreplaceable adjunct to the San Francisco Conference.

War is no longer a soldier's war alone. The people of France, of Poland, Belgium, Holland, will tell you that. It is a war of all the people. Preparing for peace is a civilian task. And universal military training is a civilian program—administered, of course, by the Army and the Navy.

The legislation proposed is a civilian legislation, and I say that with full deference to the members of the Army and Navy sitting with us tonight. We need their support, their united efforts, if this legislation is to succeed. I know that we have it and will continue to have it.

But I say to you tonight, with all the urgency at my command, that universal military training must be given immediate consideration in the Congress.

We must give evidence now before the San Francisco Conference of our intention. We must show that we are ready to work for, and fight for, peace.

A veteran of the European campaign said recently:

"We've got to have military training.

"Next time we've got to start even with the other enemy. The enemy always gets ready a long time before the war starts. He knows there's going to be a war, and he knows when it's going to start.

"We don't. We've never been ready. We always started out behind the enemy, and a lot of our fellows died because of that.

"Just give us an even start next time—and the war won't be so tough. That's all an American asks in a fight—just an even break."

And, by the grace of God, we of the American Legion will do all that we can to see that, in whatever lies ahead, American boys shall have an even break, in training and in the tools of war.

The Legion will not delay, it will not temporize or hesitate, in this campaign.

We must have peace. We must be prepared to maintain the peace. And in that belief the Legion will forge steadily ahead.

Tribute to Ernie Pyle

EXTENSION OF REMARKS

OF

HON. CARL A. HATCH

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. HATCH. Mr. President, yesterday here in the Senate, and throughout the Nation, tributes were paid to Ernie Pyle. He was employed by and wrote for the Scripps-Howard papers. In the Washington Daily News of today appears an editorial entitled "Ernie." I think it would be appropriate if the editorial from his old associates should be printed in the Appendix of the RECORD, and I therefore ask unanimous consent that that be done.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ERNIE

"Any man's death diminishes me, because I am involved in mankind. And therefore never send to know for whom the bell tolls. It tolls for thee."

Ernie Pyle's death diminishes mankind as do few deaths in a world of tragedies. We think you understand why that is so.

He literally was a member of millions of families. Into homes where no one had ever met him he was the well-loved guest.

Rare, but explainable, we think. For few men are truly humble. Few can walk with kings and keep the common touch. Fame, even in its mildest manifestations, inflates the ego.

Ernie went into war as one newspaper correspondent among many. He came back a great figure, as great in his way as Eisenhower or MacArthur or Nimitz. His fellow newspapermen acclaimed him as the top correspondent of this war. Crowds met his plane when he returned to America, gathered when he appeared on city streets.

Yet Ernie went quietly on his way, back to the old home in Indiana, then to New Mexico and his little picket-fenced place at Albuquerque, to sit in the sun and take what rest he could before he went on to another war—in the Pacific.

And never a swelling of the head. Always the frank admission that he hated to go. He felt that his number was up—that he would never return alive. He had no wish to be a hero, or to die a hero's death. He hated war with all his gentle soul. But, believing that it was his job to go on with the story of the

brave men who are fighting this war, he went with a bravery of his own.

So the bell tolls for one of the greatest and most modest souls.

In perhaps the most unforgettable of his war stories, Ernie told of watching as the bodies of many Americans were brought by muleback down a moonlit road from a hill-top battlefield in Italy. Among the dead men was a well-loved captain. In Ernie's words:

"'This one is Captain Waskow,' one of them said quietly.

"Two men unlashed his body from the mule and lifted it off and laid it in the shadow beside the low stone wall. Other men took the other bodies off. Finally there were five, lying end to end in a long row alongside the road. You don't cover up dead men in the combat zone. They just lie there. * * *

"The unburdened mules moved off to their olive orchard. The men in the road seemed reluctant to leave. They stood around, and gradually one by one I could sense them moving close to Captain Waskow's body. Not so much to look, I think, as to say something in finality to him, and to themselves.

"One soldier came and looked down, and he said out loud, 'Goddamit.' That's all he said, and then be walked away. Another one came. He said, 'Goddamit to hell anyway.' He looked down for a few last minutes, and then he turned and left.

"Another man came; I think he was an officer. It was hard to tell officers from men in the half light, for all were bearded and grimy dirty. The man looked down into the dead captain's face, and then he spoke directly to him, as though he were alive. He said, 'I'm sorry, old man.'

"Then a soldier came and stood beside the officer, and bent over, and he, too, spoke to his dead captain, not in a whisper but awfully tenderly, and he said, 'I sure am sorry, sir.'

"Then the first man squatted down, and he reached down and took the dead hand and he sat there for 5 full minutes, holding the dead hand in his own and looking intently into the dead face and he never uttered a word all the time he sat there.

"And then finally he put the hand down, and then reached up and gently straightened the points of the captain's shirt collar, and then he sort of rearranged the tattered edges of his uniform around the wound. And then he got up and walked away down the road in the moonlight all alone."

We on the News who for many cherished years were Ernie's comrades in newspaper work feel about him—though we can't write it that well—as Captain Waskow's comrades felt.

Here in the office, where he used to work, we remember the times he dropped in to call. We were all his friends—the editor, the printers, the newest office boy. We loved him for that shy, unassuming, kindly manner of his, because he understood us, because he was Ernie—a thoroughly nice guy.

And he was like that, wherever he went. In the filling stations and little homes he visited in the years when he went about the country, they remember Ernie. In the fox holes on the fighting fronts, in the camps and stations and the ships at sea, they remember Ernie. He was the man who came to them, and shared the mud and the cold and the danger; he was the man who told their story and expressed their deepest thoughts and feelings, he was the man who wrote for G. I. Joe, simply, movingly, and without heroics. Yes, we all remember Ernie—those of us who worked with him, those to whom he wrote and those he wrote about, the millions of little people of the world.

Though he knew in some hidden depths of his subconscious that his luck had run out, he went out to meet death because he could do no less than those millions of others who were willing to give their lives for something precious.

Address by Father Flanagan, of Boys Town, Nebr., at Banquet in Tribute to Henry Monsky

EXTENSION OF REMARKS

OF

HON. KENNETH S. WHERRY

OF NEBRASKA

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. WHERRY. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered by Father Flanagan, of Boys Town, in my State, in tribute to Mr. Henry Monsky, of Omaha, Nebr., who is one of our most distinguished citizens. The address was delivered on the night of February 26, 1945, at a banquet tendered to him by the B'nai B'rith, in honor of Mr. Monsky, at the Commodore Hotel, New York City.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Tonight we have come here to honor a great man—a man with a brilliant mind and a loving heart—a man whose outstanding virtue is his love for his fellowman founded on the higher precept of his love divine.

Mr. Monsky is a great American, for he possesses those cardinal virtues that make for greatness of the individual, and a nation's greatness is made up of such individuals.

Tonight America is honoring this great man. Most of you distinguished guests know him as the international president of the magnificent organization of B'nai B'rith. I would like to tell you why Mr. Monsky is a great man—for he was great when he came to you. Unlike most of you here, I have known him as a boy; a student at the university; a young lawyer entering upon a professional career—a fellow worker with whom it was my privilege to engage in charitable and welfare fields. He is a member of the board of Father Flanagan's Boys Home, the legal council for Boys Town, and my own attorney. He is my personal friend.

I know that some of the things that I have to say here tonight may be personally embarrassing to our honored guest. I would be greatly disappointed in him if they weren't. They are not said for that purpose, however, but rather to acquaint the members of this distinguished audience with certain things you would not know nor could you be expected to know, for our honored guests is a very humble man.

Mr. Monsky comes from a very honorable and religious family. His boyhood years were closely associated with his school, his home and the synagogue. Unlike most young boys of teen age of his day, young Harry Monsky was a very serious boy, a most exemplary son of a deeply religious parentage; with an ideal home life where Orthodox Jewry was strictly adhered to in his home.

Endowed with a brilliant mind, but unlike most of this type, he was a student too. He worked hard; reading much serious literature, and giving much profound thought to the great problems of life; not only the problems of his current day, but the age old problems that have confronted all the peoples of all times. He had an analytical mind, and could see through problems that have confused and confounded the minds of people, and wondered why these same problems could not have been solved in an easier manner. Young Henry Monsky knew what the world of strife and confusion lacked, and that was love.

His whole life from early childhood was nurtured by that most necessary vitamin. His parents, according to the tenets of their belief, learned to know God, love Him and serve Him. They loved their home and guarded and protected their cherished little ones; establishing for them a sanctuary that was peaceful and attractive; a home full of the ancient traditions of Orthodox Jewry which produced such magnificent and constructive citizens, not only in this country but throughout all the nations of the world.

His school life was not marked by any special outstanding event except that Henry stood at the head of his class in all his subjects. This was not to be wondered at since he possessed a brilliant mind, and applied that mind to serious study under the benign and intelligent supervision of his loving parents. He was not a proud boy. He was not a boastful boy. He seemed to feel that the outstanding success he had in school was only natural, and any credit went to God, his loving parents, and his conscientious teachers.

When he finished his legal education at Creighton University, where he was an A honor student during his whole course, he felt prepared to render legal service to humanity. But Mr. Monsky realized that his life was to be lived in a richer way than just rendering legal service to clients. His home training and total character development fitted him for something greater and more all-absorbing. His mission was to serve humanity. Just like the great Spiritual Doctor and the great Medical Doctor who administered to the spiritual and physical ills of humanity, so did Mr. Monsky, with his brilliant and analytical mind, start out to extricate enslaved minds and hearts from the entanglements of petty quarrels and strife that have become the cancer and poison of hearts and minds of small, puny, and sinful little people. I say little people advisably, for it takes strength and nobility of character, much perseverance, and much prayer to Almighty God for hearts and minds to rise above the sordid, monotonous, sinful, and ugly everyday environment; and through that spiritual strength they become noble and generous, and appreciative of the proper recognition that all good things come from God, and every defect comes from our own depraved and selfishly sinful nature.

I have known and worked with Mr. Monsky in his public life in the city of Omaha for over 30 years. As an attorney he has given his service to the poor, and has participated in the social, charitable, and welfare problems of his community. That service has been given most generously. Were he to give of his legal talents to his clients alone, Mr. Monsky would have become a very wealthy man. He has chosen, however, to give a large percentage of his time to the service of humanity that he might carry out the earnest purpose of his life; namely, to help humanity love instead of hate.

This great purpose of Mr. Monsky's prophetic mission was and is to assist people to live in peace and unity as founded on the great second commandment of love which says "Love thy neighbor as thyself for the love of God." He wished to teach the whole world by his life which has been a noble example of that commandment, that if man learns to love his fellowman as a son of God and a brother member of the vast family of the human race, he cannot fail to make the effort to love his fellowman at any cost. This brings us to the serious problem that confronts our beloved Nation.

Today America is engaged in a great war. It is a war that will, in many respects, set back civilization for at least 100 years, and needless to say, much evidence of culture will be destroyed, never to be restored.

America is fighting a sacred war. It is a combat between the forces that possess and uphold the justice and rights of individuals as against forces that would destroy those

rights and make for world slavery. When our Nation entered this world conflict, it did so in protest to the totalitarian philosophies of fascism, nazism, and Tojoism. These false philosophies were founded on hate, brought about by nationalism, sectarianism, racial and religious prejudice, segregation and discrimination.

The forces for evil had grown to such proportion that they eclipsed and overpowered among those totalitarian nations all the agencies striving to uphold the dual commandment of the love of God and the love of fellowman. These forces for evil become so many-sided that they stifled every public vestige of religious thought and religious action; set up a machine of propaganda for hate and established a program of elimination by persecution unheard of within the annals of history. Today our American young manhood—the noble flower of our youth—is fighting and bleeding and dying on the battlefields and oceans of the world that the rights of free man—God-given inalienable rights—be preserved for man throughout the whole world. These young men of America, joined with the forces of our allies, are being called upon to uphold with their lives the principles of democracy which emblazon the noble escutcheon of our American Constitution and Bill of Rights. These young men of our Nation are proud of the privilege of upholding those rights, and it is to them and their ultimate victory over the enemies to our Democracy that America must look with gratitude and appreciation.

Among those heroes, living and dead, there existed no distinction as to class or creed or nationality. Side by side in the foxholes of Europe, Asia, Africa, Italy, and the South Pacific, were the Jew and the Christian. They were buddies. They were partners in this magnificent program of heroic self-sacrifice that you and I here at home, the fathers and mothers and children of America, and the whole world, might be able to carry on unhampered by the fear of totalitarian slavery.

We, here at home, have a tremendously important mission to perform. We owe a debt to our patriotic American soldiers that we, in our lifetime, can never pay. It will take the sacrificial devotion of suceeding generations by their recognition of those men of World War No. 1 and 2 to pay that debt, but we must start paying that debt now. What do we owe them? We owe them gratitude for saving the Constitution which guarantees our life, liberty and pursuit of happiness, just as we owe our gratitude to the fathers of the Republic who wrote, and fought and died for it.

How are we going to show this gratitude? There is nothing which our American heroes want from us of mercenary nature. We could not pay for such gratitude with material exchange. They want appreciation of our hearts and minds. They want to see us uphold the great blessings of liberty as exemplified in our daily lives. They want us to learn to live in peace and harmony with our fellow citizens in this great republic. They want us to respect the rights of all our fellow citizens whether black, brown, or yellow; whether Jew or gentile; whether Catholic or Protestant. They want us to realize that no particular race, no particular class, no particular creed is responsible for the building of this great Nation under God, but its wealth, power, influence, and culture have been brought about by all of these working together harmoniously; each respecting the other's viewpoints, his traditions—religious and racial. They want us to live in peace and harmony and prosperity; helping one another; respecting one another; loving one another as we love our Heavenly Father through whom we live, move, and have our being. When we have learned this great lesson of love and good will and unity, then we have started to pay back the debt of gratitude we owe Almighty God, the fathers of the Republic, our Constitution, Bill of Rights, and the noble and patriotic men and women who have defended with their lives these sacred and inalienable rights ever since.

My friends, America is far from acknowledging this debt of gratitude. Many are oblivious of owing any debt to anyone, even God; and the men and women suffering from such lack of faith, selfishness, stupidity, and blindness are groping along life's pathways full of hate, poison, and selfishness; getting what they can out of life from whatever victim who becomes enmeshed in their plans; robbing and stealing his money and destroying his good name. These are the people who have no divine faith, who recognize no God, and who laugh at you and me when we strive to observe in our lives, God's code of moral precepts. These are the little people who, when they grow to such proportion and become a sufficiently important national force, pick for themselves a Tojo, a Hitler, a Mussolini, or a Quisling who will sell the interests of his country to dictators. These are the people from whose so-called homes generate the germs which poison the babe in the cradle; germs which grow and multiply and destroy all that is fine, beautiful, holy, and innocent in those innocent little gifts from God. These are the people who are responsible for what people improperly call juvenile delinquency—a monster that is destroying all that is sacred and holy in our society and costing our Nation $20,000,000,000 a year. These are the people who traffic in vice, and that so-called commercialized entertainment partially cloaked with respectability by working around the scum edge of protection by law. These are the people who are encouraging fathers and mothers and adults to come in and taste of the bitter fruits of gambling, drinking, social vice of every kind as they pass along the ugly and sinful pathways of life. These are the people who make our citizenry less capable of being proper teachers by example and precept of the youth of our land. Gentlemen, from such people spring the poison of segregation, and from such sources are born hatred and prejudice of race and creed.

How can this cancer be eliminated? My friends, it is not so easy. This cancer is very deep-seated. It cannot be eliminated by calling names or finding fault with this class or that group, this religion or that race. The men and women so depraved from the vices I have mentioned have become so because they have cast off all that was noble and good from their particular class or creed or race. This defect made it possible for them to become fomentors of race and religious bigotry. We must attack this cancer at the source. We must use every means at our disposal to rebuild the family home into the sanctuary which God intended, that it may become again a fit and holy, sacred, and attractive sanctuary for our beautiful and innocent children. We must encourage those parents to get back to their family prayers, upholding the sanctity of family life and resting it in the bosom of the God of Love—our Creator. We must get back to our churches and our synagogues and become a living, vital part of those sacred edifices of God's worship. We must make these churches houses of prayer and worship, and not places of social entertainments or meeting places for political platforms. We must release our children from our public schools every day at a certain stated time for religious instruction by the various and respective ministers, priests, and rabbis, and their coteachers, that these children be given an opportunity of knowing and learning about God and His commandments.

Let us attend to first things first—our God-given duties. Parenthood is the most sacred office, endowed with the highest responsible duties ever given to man and woman. There are very few parents so depraved who would want to destroy and poison in the cradle the complete future of their little offsprings by failing to give them those necessary spiritual vitamins that will insure strength and beauty and sanctity for their adult lives. Any adult treatment rendered by the conference of Christians and Jews help much, but it is not sufficient. Much effort of this fine organization is wasted on adult men and women who are not sufficiently interested in problems of race and religious persecution. While they, themselves, may not be affected with such poison, they may consider themselves unfit to become apostles and missionaries for the cause. We have always such types who are indifferent to the important and basic principles of democracy. They wish to enjoy all the good things of life for themselves—freedom, equality, rights and privileges, but they let the others do the fighting and worrying and working, and sacrificing. It just reminds me of the so-called conscientious objector in times when the very heart of American democracy is bleeding to death, and with it our noble sons and daughters. It is very convenient indeed for some to say "I cannot bear arms. I cannot kill my fellowman." Those very same people would hardly put up an argument if they were face to face with an enemy who threatened to kill or rob or destroy the sanctity of their individual homes or their loved ones in that home. They would fight to the death to protect them. However, it is quite convenient for them to put forth this argument of the conscientious objector so long as they know there are enough Bill Joneses and John Smiths down the block who willingly answer the call of our country to protect the sacred sanctuaries of the homeland, and safeguard the future of America from slavery.

I believe you will find at the bottom of much of this bigotry, racial and religious prejudice, and indifferent attitude on the part of many people enjoying the blessings of citizenship. To their way of thinking it does not concern them. Let others more active, more interested, get into the fight. Such people remind me of the blindness and lack of foresight of those who live up on top of the hill and see their fellowman down in the valley floundering beneath the raging and onrushing floods that claim life and property and destruction of every vestage of man's handiwork. "It's not my property. It's not my concern," they will tell you. As long as we have a cancer affecting the heart of America, and have people indifferent to the existence of it, ignoring it by not striving to eliminate it by their personal assistance, we shall have serious difficulty in rooting it out and destroying it.

I consider racial and religious prejudice one of the greatest and most insidious of all ills that attack our social life today. It is dangerous because it works from within, within the very minds and hearts of human beings whose actions against their fellowman are a direct result of such inner thoughts. These thoughts are dangerous because of the moral transgression of the fundamental law of God's love which should rule the hearts and minds and be the motivation of man's actions. These indifferent classes of people do not realize that by their laissez-faire attitude they are inviting a condition which can easily become one of great concern to themselves some day. If we remain indifferent to the expressions of hate being vomited in our presence against someone or some class, such indifference gives encouragement to those messengers of hate who will grow bolder and become more and more aggressive in their satanic program enlisting others to their cause. I remember such a case. It happened within my own personal experience. A soap-box orator of the fire-brand type, with a political ax to grind, considered it beneficial to his particular cause to denounce a certain minority

group of foreign-born citizens living in and around a large industrial center. They were poor people trying to make an honest living, learning the ways of democracy and striving in every manner possible to obey the laws of God and man as best they knew them. This politician was defeated for some office and was bitter against this small minority group because he felt they did not vote for him. He succeeded in arousing enmity against these poor people by inciting a number of young hoodlums who stealthily during the night, broke windows in their homes and humble places of business, beating them when they came forth to protect those homes and loved ones. While no lives were lost, many had to be hospitalized and many thousands of dollars of damage to property ensued.

The matter passed on; nothing was done about it, and most of these poor people had lost their life earnings—all because of one selfish man inciting a mob of hoodlums who liked excitement and a fight.

This grand and noble organization over which our honored guest is the international president is to be commended for its far-reaching influence toward bringing to public attention, the duties and responsibilities of Americans, and the urgent need for greater unity and amity among the various nationalities and creeds which make up this family of American democracy. The B'nai B'rith has for over 100 years been developing a constructive program that is aggressive and patriotic. It has a twofold purpose—that of elevating the minds and hearts of the Jewish people toward a higher and more spiritual level of patriotic citizenship, and teaching by example and precept their fellow citizens of other races and creeds the necessity for brotherly unity and a cooperative program that will solve our great national and local problems.

This is the mission that Mr. Monsky set out to do as a young man over 30 years ago. This was and is his unselfish program. It is a part of him. How well he has done this, you and I know. We are here tonight to offer him our humble appreciation. Anything we could say to him will not make him any more important, will not cause him to become proud. We cannot add to his social and mental stature. He is beyond being spoiled by praise. But we want you to know, Mr. Monsky, that we do appreciate the fine patriotic work you have done and are doing for America, and our hearts are grateful to God for the unselfish sacrifice you have made of your time and your God-given talent to make your fellow man a better citizen, and America greater because of you.

God bless you, Mr. Henry Monsky.

Rehabilitation of India

EXTENSION OF REMARKS

OF

HON. CLAUDE PEPPER

OF FLORIDA

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. PEPPER. Mr. President, in the February 11 issue of the Miami Daily News appears a very informative article by Hon. W. D. Pawley, of Miami, Fla., on the subject of the future of India and India's contribution to the well-being of the world provided the countries interested in India's future properly cooperate. I ask unanimous consent that this very illuminating article, which comes out of a vast experience and a wide background, be printed in the Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD as follows:

INDIA: ITS FUTURE BRIGHT FOR POST-WAR JOBS—PAWLEY SEES VAST TRADE IF BRITAIN, UNITED STATES COOPERATE

(By William B. Pawley)

The rehabilitation of India constitutes one of the great post-war problems of the world, in my opinion.

Here lies the opportunity for American and British collaboration in the industrialization and agricultural development of a state which I find to be eager for such assistance as technologists and industrialists with the know how can give to it.

Here lies the opportunity for jobs for millions of men and women now engaged in war work—American men and women and British men and women.

Can some understanding be reached by the United States and Great Britain where the best interests of both nations will be served and India placed on a self-sustaining basis? I merely pose the question. The answer must come from those who formulate national policies.

PLANS LAID FOR FERTILIZER PLANT

On September 15, 1943, while in Delhi arranging for the United States Army Air Forces to take over Hindustan Aircraft, the Secretary of Supply for India requested me to call on him for a discussion of a matter important to India's war effort. Accompanied by L. C. McCarty, our chief engineer, I called at the Secretary's office, where several hours were given to a discussion of the possibility of the Intercontinent Corporation undertaking the construction of a 50,000-ton ammonium sulphate (fertilizer) plant.

The secretary of supply told me that it would be a great contribution to the war effort if I would undertake to do this job; that seven plants were required, but he thought we were fully qualified to undertake the construction of one. He asked me to look into the matter, to make a study of the subject, and let him know if we would undertake it.

Immediately I cabled my company's New York office to proceed with a complete investigation of ammonium-sulfate manufacture. McCarty returned to Bangalore where our engineers were instructed to obtain all available information on the subject. Sir Jnan Chandra Gosh, president of one of India's leading technical institutes and one of the world's great scientists, assisted materially. He and his staff had been making a study of this subject for some time and placed at our disposal much data. It was Dr. Gosh who telegraphed the prime minister of Travancore suggesting that our company be requested to undertake the construction of a fertilizer plant for that state.

VAST RESOURCES ARE REVEALED

The maharaja and prime minister of the state of Travancore extended to Mrs. Pawley and me an invitation to visit their state. They placed at our disposal facilities to travel extensively throughout the entire state to inspect the various industrial projects already in operation or under construction, such as the aluminum plant, the hydroelectric power facilities, and the reclamation of vast areas of submerged lands.

This latter project was a tremendous undertaking. Water in many cases was 6 and 7 feet deep. Dams had to be constructed, large electrically operated pumps had to be installed for pumping the water out when the dams were completed. Irrigation systems had to be installed because water must flow slowly over rice paddies during the early stages of rice growth. We visited schools and colleges.

Everywhere we went we were received with a kindness and consideration that causes one to feel so friendly to India. We found it to be a most progressive state. Everyone connected with the government of the state of Travancore appeared to be keen, intelligent, educated, and ambitious for the development of his state and his country. There was much curiosity on the part of students in schools and universities we visited regarding many of the new ideas being developed in the United States.

After touring the state we returned to Trivandrum for conferences with the prime minister. I was invited to undertake the building of their ammonium-sulfate plant. The recommendation of Dr. Gosh had been sufficient. I signed a contract to build this factory.

JOURNEY TO DELPHI

The prime minister, several officials of a Travancore industrial organization who were assisting the government in the financing and development of the state of Travancore's first large chemical plant, and I journeyed to Delhi to obtain the blessing of the Indian Government, and to secure the United States dollar exchange, which the Indian Government must, in all cases, get permission from the London-United States Dollar Control Board to authorize. The United States exchange was necessary for the purchase of machinery and plant in the United States.

Some months previous to my original discussion of this matter with the secretary of supply for the Government of India, a board had been formed consisting of a number of leading Indian and British experts and scientists to study fertilizer requirements and the best way to cope with a permanent eradication of India's famine problem. This board had recommended the construction of seven 50,000-ton ammonium-sulfate plants to be built in various parts of India, in the centers of the largest agricultural regions.

When McCarty and I visited the secretary of supply, he permitted us to read some statistics that had been gathered by this board on the production of rice and other products per acre for many parts of the world, and the quantity of fertilizer per acre consumed by these countries. India was at the bottom of the list in the use of fertilizer and also on production per acre. This document stated that by the use of 100 pounds of ammonium sulphate per acre in India, rice production coud be increased from 750 to 1,800 pounds per acre.

RICE IMPORTS

India had been importing large quantities of rice from Burma and Thailand, but this supply had been cut off because of the war. This, coupled with other natural causes, had produced tremendous suffering for India's vast population. The peak of the crisis was in late 1943, but famine continued to exist in Bengal, Bihar, Orissa, Malabar, and Travancore. It was estimated that direct deaths from starvation in 1943 exceeded 1,000,000 and famine orphans were far in excess of 100,000. Tens of thousands of widows and children were rendered destitute.

There exists today tens of millions who continue to survive starvation, but who are weak and undernourished. This great population is constantly subject to and is easy prey to diseases that are so prevalent in that part of the world—such as dysentery, cholera, malaria, and pneumonia.

There have been great epidemics of malaria raging in Bengal. The people of Travancore were also greatly undernourished, although this is one of the most progressive states in India. They did not have sufficient rice paddy land for cultivation. They produced only 45 percent of their requirements.

SUBSTITUTE FOODS

These people for centuries had depended mainly on rice as their staple food. It would

not be easy to teach them the use of a substitute, although the Maharajah and the Prime Minister were active in efforts to have substitutes grown. Thousands of acres of tapicca were planted under government supervision and direction.

I was told by the Prime Minister that this was a temporary substitute; that it did not have sufficient nourishment to carry his population through for many years; that the rice production of their State must be increased because there was apparently no immediate hope of obtaining shipments from abroad. Thailand and Burma were cut off because of the war; shipping facilities were not available and even if stocks were available, it would have to be distributed throughout India to care for 300,000,000 people, whereas his state of Travancore had only a population of 6,000,000.

DIFFICULTIES FACED

When the prime minister, Mr. Menon, chief engineer of Travancore, Mr. Sesasayee, president of the Chemical Fertilizers, the company undertaking to help the state in the development of this plant, and I had arrived in Delhi, we were hopeful that in a few days the entire matter would be approved and the United States dollars made available. This was not the case. We ran into difficulties. We found it was not easy for the Government of India to okay the construction of a plant for the state of Travancore to be built by an American firm and to be financed with United States dollars allocated by the London Control Board. Travancore had ample funds in sterling and in rupees, but she is not a free agent in the use of United States dollars, even though that state may have received millions of United States dollars for its products sold to the United States.

India needed 350,000 tons of ammonium sulphate. It was hard for the Government of India to decide just where the seven plants were to be located. To approve a plant for one state would raise the problem of possibly other states immediately making similar demands. Three and a half million dollars were necessary for the purchase of that portion of the plant which had to be bought in the United States. The equivalent of another three and a half million would be spent in rupees or sterling for that portion of the plant which had to be constructed in India.

REACTIONARIES BALK

There are always a few reactionaries in every government. In Delhi there were officials who were not sympathetic to permitting Americans to "get their foot in the door." We argued for days in an effort to convince the Government of India of the necessity for this project; that it was essential that this plant and other similar ones be constructed without delay. We argued that it would contribute to British-American relations because we did not believe it was healthy for American periodicals and magazines to show pictures of people starving on the streets of Calcutta and writing stories of this great famine problem which so many people were willing to lay at the door of the British Government.

Having lived in India three and a half years, I did not agree that this great famine could be attributed to British Government neglect. The 1943–44 famine was, to a great extent, a man-made catastrophe, although contributing to it were factors such as floods, cyclone and an extremely poor crop year.

BLAMED ON WAR

The main cause had been the war, which tied up all rail transportation on high priority for military traffic. You could not get permits or priorities for adequate food and medical supplies to be moved by rail. Water transportation had been badly crippled by requisition and by great destruction of small boats. Large numbers of India's ablest personnel were either in the Army or engaged in war work, and, unfortunately, many were political prisoners.

I sincerely believed if either London or the officials in Delhi procrastinated or deliberately prevented the construction of Travancore's ammonium sulfate plant and other projects of this nature purely on the basis of an American firm doing it, or for the industrialization of India, which many Indians think England does not wish to occur, I would then know that future famine difficulties could be attributed directly to London.

Obviously the people of India had to be fed; the millions of dollars being collected in the United States from benevolent sources for famine relief for India would not even temporarily alleviate the trouble. This was a well-known fact. Permanent measures must be taken.

EFFORT LIMITED

Charles Taft of the State Department was in charge of handling the benevolent dollars collected in this country and with this money medical supplies, and so forth, were purchased and shipped to India. On arrival at Calcutta, relief supplies were handled by the Friends, the Quaker organization, who in turn were using the facilities of other charitable organizations in Bengal. Yet I was frequently told by these people that while the effort seemed large, it was not touching the surface of their demand. It was for this reason that I felt permanent measures, such as the building of fertilizer plants to increase the quantity of food produced by the Indians themselves, was the only sound basis. I tried to point out that I was not coming into this project as an outsider. I had been invited to do this job by the secretary of supply—an Englishman. Three months had intervened and vested interests had appeared. Some opposition from London apparently also had developed.

It was at this time that I read in a Delhi newspaper that $1,200,000 in United States benevolent funds, of the United States British War Relief Fund, collected by Americans, had been allocated to Indian famine relief. I could not reconcile the failure of an American firm to obtain permission to do a very necessary work with the public's willing contribution of millions of dollars to this same famine condition which we were trying to relieve on a more permanent basis.

APPEAL TO WASHINGTON

I could not remain in India any longer as pressing matters required my return to America. In Washington, I placed before members of the American Government the details of our project. Everywhere it met with sympathetic understanding. Many officials in various departments of the Government were glad to help. I am told that London was approached on the subject, and approximately 1 year from the day the matter was first mentioned, approval was obtained; the dollar exchange was authorized.

I had been invited to do this job by a high official of the Government of India—an Englishman. I traveled extensively in India and saw the results of a terrific famine. My company had undertaken this job as a contribution to the war effort, without profit. I know how difficult it would be for England to spare the machinery and equipment at this time to do the job. I understand thoroughly England's post-war problem and her necessity to hold on to the major portion of her export trade. I am not anti-British. I believe that all who are familiar with the facts would agree. Yet I am willing to fight, if necessary, in order that a job of this kind be done where the benefits were so great and the need so urgent.

FIRST PLANE FACTORY

My original visit to India was at the request of the Indian Government. I had been invited to Delhi to discuss the construction of India's first aircraft factory. This job we did at Bangalore, India. We operated it for 3 years, and in September 1943 it was taken over by the United States Army Air Forces. We had obviously been invited to build and operate this aircraft factory because of the experience gained by our organization in building and operating three factories in China for the Chinese Government.

The Intercontinent Corporation was the first group ever to undertake aircraft manufacturing, either in China, Burma, or India. The Japanese destoyed the plants in China, but the one in India employs 14,500 Indian technicians and is contributing materially to the war effort in India.

This plant has been converted to a maintenance and overhaul base for all American aircraft operating in the China-Burma-India theater.

During my 3½ years in India, I had an opportunity to meet many of India's leading industrialists, scientists, educators, and statesmen. I found a real sympathy for American methods, American production, American speed, and American "know how."

We had done a good job at Bangalore.

Throughout Indian this plant was well known and I found splendid collaboration between our American technicians and our Indian staff. They worked together in complete harmony and understanding. Hundreds of times I have been told by leading Indian industrialists that they greatly appreciate the American approach to the Indian situation. I had agreed to do the Travancore fertilizer plant on a no-profit basis because I felt it was essential that it be done, and much opposition could develop if it could be demonstrated that our only objective was a selfish one of profits. I did feel, however, that there is and must be great opportunity, post-war, in India and other similar parts of the world, where American ingenuity and American technicians could assist in post-war world industrialization and rehabilitation.

I have been repeatedly told by important industrialists and statesmen that America would be welcome in India's post-war rehabilitation and development. This is essential to the United States in that millions of people now engaged in the war effort must return to civilian occupation. There is not sufficient opportunity and jobs unless we participate in world development and post-war rehabilitation.

Again I must say that I am not unmindful of England's great contribution to the war effort or how badly hit, financially, she has become as a result of the war. I also realize that she needs and must have a large share in the export trade of the post-war world. I am sincerely in favor of America and England reaching an understanding which will enable the peoples of both countries to operate post-war without the animosities and hatreds and problems that will develop unless some such understanding can be had.

Importance of Air-Power Problems

EXTENSION OF REMARKS

OF

HON. EDWIN C. JOHNSON

OF COLORADO

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. JOHNSON of Colorado. Mr. President, the country is tremendously interested in subjects relating to the importance of American air power. Therefore I ask unanimous consent that editorials entitled "Preserving Our Air

Power," "The Role of Air Power," and "Surplus Planes," which recently appeared in the New York Times, be printed in the Appendix of the RECORD, where they may be studied by the Congress and the country.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times of April 16, 1945]

PRESERVING OUR AIR POWER

The importance and the complexity of the problems involved in maintaining the preeminence which the United States has achieved in the air and discussed in the spring issue of the Harvard Business Review. The article, Preserving American Air Power, is the work of Prof. Lynn L. Bollinger and Prof. Tom Lilley, authors of the widely discussed Harvard studies on the Disposal of Surplus Aircraft and the Financial Position of the Aircraft Industry, and Albert E. Lombard, Jr. Taking the position that our continued leadership in air power is threatened by the absence of either an adequate, up-to-date, national air policy or a consistent plan of action, the authors pose the following significant questions:

What size peacetime air forces will meet our military needs and still be economically feasible?

What Government policies should be adopted to stimulate a healthy rate of technical progress?

How can a properly balanced and rapidly expansible nucleus of productive capacity be maintained in peacetime?

To what extent should plans for any future wartime expansion rely upon the peacetime aircraft companies, and to what extent should such an expansion involve conversion of automobile and other nonaircraft industries?

What role should civil aviation and exports play in supporting our peacetime military aircraft industry?

What plans for transition from the present war to peace should be made in advance to assure the preservation of an industry adequate for tomorrow's tasks?

How should the air forces and Government civil agencies concerned with aviation be most effectively organized?

The authors believe that in any future war the immediate need for air-transport equipment and skills is likely to be far greater than it was early in this war. They believe, however, that the development of certain military aircraft engines and components closely parallels the development of civil transport equipment, and they also maintain that it will be necessary, if our air-power policies are to be carried out effectively in the future, to de fine clearly just where the functions of the Government cease and where those of private organizations begin, especially in view of the fact that more than 80 percent of all aircraft manufacturing facilities erected during the war now are Government-owned.

The study reveals that various plans are being discussed to meet the obvious need of coordination among the closely interrelated problems. These include the setting up of a committee composed of top representatives from each executive department concerned with aviation; the use of an existing or a new congressional committee to make recommendations on basic issues, after hearing testimony of executive agencies and private groups, or the appointment of a Presidential board similar in general character to the Morrow Board.

A final point is that unless some means of arriving at consistent policies for air power now is adopted, the economic costs and military risks of "muddling through" can be disastrous.

[From the New York Times of April 12, 1945]

THE ROLE OF AIR POWER

The war in Europe is roaring toward its close in swift and furious campaigns unprecedented in history. Over superhighways or across the open countryside, through towns bedecked with white flags or surrendering in advance by telephone, the mighty columns of Allied tanks and motorized infantry and artillery are racing ahead from 20 to 50 miles a day, overrunning all opposition, surrounding and bypassing stubborn centers of resistance for later liquidation, chasing the remnants of a once-proud German Army before them in a fantastic pursuit, while behind them service troops organize communication lines, build bridges, and bring up supplies in record time.

It is a field day for the ground troops who, of necessity, must still finish any war, occupy enemy territory, and force capitulation upon even the most fanatical foe. It still means blood and sweat and tears, but the ground troops are the first to rejoice that, for the most part at least, they have left the misery of the trenches and the fox holes behind them, and that each additional mile they cover brings them that much nearer to victory.

The main credit for this spectacular performance goes, of course, to the courage, the skill, and the zeal of the ground troops themselves and their commanders. But it is likewise true that the basis for their success was laid long ago, and is still being laid every day, anew, by that other mighty Allied arm, the Air Force, which first turned the tide of Hitler's success, which smashed his arsenals and crushed his own air arm, which literally blazed the trail for the Allied armies from Normandy to Berlin, and which is now protecting them from enemy interference behind their advancing spearheads. As General Kuter, Acting Chief of Staff of the Army Air Forces, emphasizes, "strategic bombing has paid off in Germany, and Eisenhower's men on the ground are receiving the dividends today." Just how the Air Force work paid off, and how great the dividends are, are being revealed only now as the Allied armies proceed with the occupation of Germany.

Wherever the Allied armies go, they find Germany's major cities in ruins, their armament factories crumbled into dust, their transportation systems destroyed, their workers living under conditions which greatly decreased their efficiency and productivity, their populations so terrified that they hail the Allied troops, not as the conquerors they come, but as the liberators, which they are—liberators from the incessant rain of destruction from the skies that ceases with their arrival. By driving their people to the limit of human endurance, by hiding their remaining factories in forests or below the ground, or moving them to less exposed areas, the Nazis have been able to maintain sufficient armament production to keep large armies in the field, and as a weapon which was to win the war alone the air arm fell short of exaggerated expectations. But in the end the destruction of matériel and morale began to tell. And if today the Allied armies are nearing Berlin, if their losses are running at only one-twelfth of the enemy's, and if the war has been really brought home to the German populace, the Air Force can claim a good part of the credit.

It can claim further credit for the incalculable boon that while every enemy movement is immediately subject to air bombardment, and has been ever since Normandy, the wide-open movements of the Allied armies and their sometimes tenuous communication lines are wholly safe. For the German Air Force, which was virtually driven from the skies in more than 2 years of aerial warfare, but which tried to stage a comeback during the Battle of the Bulge and scored its last success in the destruction of the Remagen railroad bridge, has now been knocked out definitely. No fewer than 1,800 German planes have been destroyed in 1 week, and the remaining members of the once wholly Nazified Luftwaffe have so little stomach left to tackle the Allied air armadas that they are beginning to flee to neutral countries, and according to some reports, actually staging a revolt.

More persuasively than ever before, the final phase of the war has demonstrated that while air power alone cannot win a war, the loss of airpower entails inevitable defeat. That lesson, already written in the skies over Germany, is now being written in the skies over Japan. And that lesson may be also assumed to fix the final role of air power in a modern war.

[From the New York Times of April 19, 1945]

SURPLUS PLANES

The airplane technical committee of the Aeronautical Chamber of Commerce is studying ways to make good use of surplus aircraft no longer needed by the armed services. Tentative plans call for scientifically controlled crash testing of as many as 10,000 fighters, bombers, and transports for the purpose of uncovering new secrets in design and performance and accelerating the development of greater safety and efficiency for civil as well as military aircraft. The aircraft industry has recommended that the program be handled by a Government-sponsored board with representation from the Army, Navy, Civil Aeronautics Administration, National Advisory Committee for Aeronautics, airplane operators, and aircraft manufacturers.

A survey made by these agencies has already shown that more than 50 separate types of structural and performance tests, impossible without quantities of cheap and flyable airplanes, could be conducted under such a program. They would include flight tests under conditions exceeding normal requirements to fix performance limits. It is believed that such tests, in which the pilot might have to abandon the plane in flight, could well provide answers to present riddles of stability and control, as well as flutter and vibration characteristics. Investigations of engine life at extreme high powers could be carried on with a sufficient number of aircraft to provide statistically acceptable results. The scientific crashing of radio-controlled or pilot-abandoned aircraft in the view of high-speed cameras would doubtless provide additional information on structural failures under crash conditions. This procedure might well result in developments of safer techniques in forced landings.

Aircraft declared surplus by the armed forces, including both combat and transport types, have served their country well. Under the research testing program now proposed many of them might write a final chapter of usefulness which would lead to further marked advancement in the efficiency and safety of flight.

Tax Abatement for Injured Veterans

REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, last week a young fighter pilot from Nanticoke City in my district came into my office for some advice as to his income tax. He had lost one leg in action and part of his left arm. He owed $165 back income tax. I never felt such a shock in my life. No one in the revenue office could do anything for him. They all felt as badly as I did. This boy was not seeking a favor, he was not protesting, he merely wanted information as to who to pay and how and when. I am doing the protesting unknown to him—for him and his fellow servicemen.

Mr. Speaker, I am introducing legislation today to amend the Internal Revenue Code having to do with increasing tax abatements for men injured and disabled in the armed services by disease, wounds, or other injury when approved as a total disability by the Administrator of Veterans' Affairs and I ask as well for other tax abatements for men and women in the armed forces, including cancelation of income tax during certain periods, repayments for certain payments made and other increases of exemptions, added abatements, and repayments as set forth in my bill which I now present.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Publicity of Proceedings at the San Francisco Conference

EXTENSION OF REMARKS

OF

HON. HOMER E. CAPEHART

OF INDIANA

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Commendable Action," from the Fort Wayne News-Sentinel of April 4, 1945, which urges that the proceedings at the San Francisco Conference be made public.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

COMMENDABLE ACTION

The Allen County Republican Club is deserving of commendation for its pioneering a double-headed drive, which could develop into a national movement, for halting the Government's continuing practice of making secret agreements.

Two resolutions recently forwarded to Congressman GEORGE W. GILLIE, of the Fourth District, as well as the two Indiana Senators, are particularly pertinent at this time, with the San Francisco Conference less than a month away.

The first resolution commits the club to leadership of a movement "in this and other communities" to demand that all sessions of the San Francisco meeting be open to the public through the press and radio; and that in the event an international governing body is set up at the conference, a day-to-day record of its proceedings be kept and published, as are the proceedings of our own Congress.

The second resolution deals more specifically with the practice of Mr. Roosevelt and Administration spokesmen in making secret agreements, whereby the Nation is committed to things of which its people know nothing.

The resolution calls directly for steps leading toward the presentation to the people of a Constitutional Amendment, "giving all agreements and understandings between this Nation and any other nation, the status of international treaties;" and that a "completely detailed report of every agreement, understanding or treaty by the President or other person in authority be immediately made to the Senate."

The result of such an amendment would be, of course, to give the Senate a chance to approve or disapprove, under the two-thirds rule, any agreement made by Mr. Roosevelt or any of his representatives.

Such an amendment has long been needed, but lack of it has done the Nation more harm since the advent of the Roosevelt regime than ever before. Secret agreements between officials of this country and others have been executed now and again for many years.

Mr. Wilson, of recent history, and his personal representative, Col. Edward House, performed their share of such acts at the time of World War No. 1.

But the fact remains that Mr. Roosevelt has probably made more extensive use of this pernicious instrument than any of his predecessors, and it is a foregone conclusion that he will continue to make use of it until he is forcibly restrained by constitutional provision.

The President has discovered that within broad limitations he can make virtually all-inclusive "executive agreements," and thereby completely bypass the constitutional provision, which simply says that treaties must be ratified by a two-thirds vote of the Senate.

The logical way to stop it is to put all agreements in the same class with what the Constitution refers to as treaties.

It is to be hoped that the movement started here by the Allen County Republican Club gains wide attention and subsequent action.

A Labor Leader Pleads for New Enterprises

EXTENSION OF REMARKS

OF

HON. C. JASPER BELL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. BELL. Mr. Speaker, a reprint of an article which appeared in the Reader's Digest for December 1944 which carried the message of one of America's outstanding labor leaders, Mr. Matthew Woll, seems so timely to me and of such great general interest to the Congress and the people of the United States that I wish to insert that article in the RECORD at this point.

Mr. Woll's article first appeared in the magazine Future, the magazine for young men, and created such an interest among its readers that it was condensed for republication in the Reader's Digest.

For many years he has been a vice president of the American Federation of Labor and a member of its executive council. By trade he is a photoengraver. For 25 years he was president of the International Photo-Engravers Union. During all of that time he has been regarded as one of the outstanding men in organized labor.

Because the incentive principle for the establishment of new businesses is of such great and underlying importance to the creation of new enterprises, I feel quite certain that those who read this article will recognize that the interests of labor will be served best by recognition of the fact that no man or group of men will hazard their money in starting new ventures if there is not a reasonable chance of regaining the investment with a profit.

As Members of Congress we cannot ignore that fundamental fact. We must provide the means for unshackling business so that it can proceed under its own natural momentum.

Mr. Woll's article is as follows:

A LABOR LEADER PLEADS FOR NEW ENTERPRISES

(By Matthew Woll)

One of the most important things this country must do is to foster a healthy birth rate of new businesses, if we are to be ready for the great change-over from war work to peaceful production. There is always a high death rate; recorded business failures range between 12,000 and 15,000 a year in normal times, and many more thousands of enterprises quietly fold up without going through a formal legal process. Every death of a business throws people out of work, reduces by a few or by thousands the number of available jobs.

In the past we could count on a business birth rate which, like our human birth rate, would more than offset the deaths. After the war I do not think we can count on this, unless we wipe out some of the restrictions which add up to throttling birth control.

This is the way businesses are born: An ingenious and industrious mechanic devises a new and better way of doing an old task, or he invents a new product. With his own savings, and perhaps the savings of some friends, he sets up a little shop of his own. He employs a few men, eventually hundreds of men; and not infrequently his little enterprise becomes a great industry giving work to thousands.

We have always thought of this as a typical American story—this system of opportunity for individual enterprise—despite its admitted imperfections. It has worked, in the main; it has, over the years, provided an ever-improving standard of living for an ever-increasing number of workers.

But now our Federal tax system, which has grown up haphazardly, and besides has been distorted by war necessities, strongly discourages anyone from bringing a new business into the economic world.

For example, if the mechanic I mentioned wants to start his own shop now the tax outlook is enough to deter him.

New business ventures do not commonly make money from the outset. The little shop probably will lose money for 3 or 4 years. Then, its early mistakes corrected, its reputation established, its clientele built up, the shop begins to earn profits. Thereupon the tax collector steps in. Taking no reasonable account of the losses incurred in the struggle to get established, he taxes the earnings heavily. "Heads, I win; tails, you lose," says the tax law.

Suppose the new shop does somehow keep out of the red from the start, manages to break even, or a little better, and at the end

of the inevitable lean period of the early years begins to earn a reasonable return on the capital invested. The tax laws do not call such earnings reasonable at all; they call the increase over the meager returns of the early years excess profits and soak them hard.

In spite of this, our ambitious mechanic perseveres, puts earnings back into the business, buying new and better machines, hiring more and more people. Eventually, because he is old and wants to retire, or maybe because he wants to start another business, he sells out. Then he is taxed on "capital gains." He originally put in perhaps $10,000; he sold out for $100,000; most of this represents income he denied himself over the years, sacrifices he made to build up his business. But the tax laws treat him just the same as if he had won $90,000 in a lucky fling on the stock exchange.

Suppose he doesn't sell out. His corporation pays an income tax on its earnings. The stockholders get their dividends—and pay more income taxes on the dividends. This may not mean much to the man who has bought 10 shares of some big corporation as a place for some of his savings, but it is particularly discouraging to the smaller business owned by the men who operate it. They and their business both have to pay taxes on the same earnings.

The giants of industry are not all of America by any means. They count for less, in the long run, than the little firms employing 15 or 30 people, managed by ambitious, imaginative employers, dreaming of growth. These are enterprises started by men who saved and borrowed capital while they were at the bench. Such enterprises are the backbone of a free United States. Furthermore, this is the way most new things get their start. and without new processes and new products we are lost in the post-war world, on both the home and international fronts.

Lockheed Aircraft Corporation began to build planes in 1933. It had only a few thousand dollars, lots of borrowed money, liabilities far in excess of its assets. It fought its way ahead with venturesome courage. Now, as we all know, it employs thousands of workers and is an important part of our national strength. Harvard University's School of Business recently analyzed the history of the company, year by year, and showed that under present tax laws it could never have grown—or even survived. Yet, as Harvard remarks, "unless risk-taking of the type illustrated by Lockheed is multiplied many times over in the post-war economy, the Nation's hopes for peace-time prosperity, and high employment by private enterprise, will be tragically shattered."

But risk taking won't be multiplied unless there is an incentive. It's human and entirely American to start a new business in the hope of profit. It's not human nature to risk money and effort with small chance of profit. To recognize this in our tax legislation is simple logic.

There are many steps which may be taken for expanding production and employment after the war without relying at all on Government help. All that Congress need say to business is, "If you take a chance with your money and go into a new line or broaden your present activities, you are doing your country a service. You're employing more people and giving your fellow citizens a new or improved product. So, as a reward for taking this risk, we'll give you some consideration in your tax bill."

New enterprises might be given freedom from all taxes for, say 3 to 5 years. Or these businesses might be taxed more lightly than old, less daring concerns for a certain time. However, such special consideration should not be allowed a company that denies its employees equal consideration—that is, the right to promote their economic welfare.

Special provision might be made for the averaging of losses by new firms over a 5-year rather than a 12-month calendar. There is no lack of possible methods. Once our tax policy recognizes that we must encourage the birth rate of new business, the details can be worked out.

We shall win the bitterest war this Nation ever has known through the magnificent efforts of our fighting men and of the men and women who are producing the implements of victory. We shall win largely because of the qualities our way of life has developed in us—resourcefulness, ingenuity, individual initiative. These are the qualities which regimentation thwarts.

When this war is won, the millions of men now in uniform, the millions of war workers will need peacetime jobs. These energetic, intelligent, ambitious workers—the best in the world—will not tolerate a protracted period of idleness and frustration. They will demand and they will get jobs—somehow, from someone. The question is, how and from whom?

If business should fail in this greatest test, I fear the result would be that the people would demand that the Government provide work. I, for one, do not want to see individual opportunity and freedom smothered by such state capitalism.

Payments on our wartime obligations, in addition to other services which will be the duty of our Federal Government, will increase our annual budget to somewhere around $20,000,000,000. We shall be able to meet that budget with normal taxation if we have a high national income, which can come only from a high level of production and a high degree of employment. The graduated income tax should be our main dependence—with every person making a contribution, though for some people it might be only nominal. At the same time should come relief from the hidden burden of indirect taxation.

There is no time to lose. Overnight, the problem of employing millions may be upon us, and when it arrives enterprising men and capital must not be in hiding awaiting a favorable tax climate. The duty of Congress to act in time, before the end of the war and before the job problem arises, is inescapable.

Bretton Woods

EXTENSION OF REMARKS

OF

HON. FRANCIS J. MYERS

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Thursday, April 19 (legislative day of Monday, April 16), 1945

Mr. MYERS. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article on Bretton Woods, published in a recent issue of the Chicago Daily News.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BRETTON WOODS

(By Edwin A. Lahey)

WASHINGTON.—With both feet firmly planted in thin air, let's start today's column in the stratosphere and work our way down to the Bretton Woods monetary agreement.

The moral life is indivisible. What I mean is this: A man or woman in search of moral perfection cannot pick or choose among the virtues. He or she can't elect to retain the pleasant vices and eradicate only those weaknesses that have no particular appeal. It's eggs or shells. It's all or nothing. It's strictly a do or don't proposition.

So what has all this high-flown discourse got to do with the Bretton Woods monetary agreement, and what's Bretton Woods, anyway?

Bretton Woods is an agreement among 44 nations based on the following premises:

1. The expansion of world trade and of international investment is eminently desirable in the post-war world.

2. We cannot have the above without stability, order, and freedom in exchange transactions.

3. We cannot have stability, etc., without international economic cooperation and an effective mechanism for attaining that cooperation.

The Bretton Woods agreement was worked out last summer, after 2 years of exploratory conversations by the best economic brains of this and 43 other countries. It is their idea of the closest approach to an effective mechanism for attaining the cooperation referred to above. The House Banking and Currency Committee is presently engaged in hearings on a bill to put the United States into the Bretton Woods pact. It is difficult to overestimate the importance of the business.

If Bretton Woods is torpedoed, or even heavily weighted down with reservations by Congress, the whole theory of collective action for peace is washed up. We cannot pick and choose our virtues. Either we have a collective action at every level or we don't have collectitve action. We can't say "no" to economic collaboration and then send delegates to San Francisco in April to talk about political and military collaboration. The failure of the Bretton Woods legislation almost inevitably would mean a return to the law of the jungle in our international economic life. It would mean that individual nations could again use foreign exchange as a weapon of aggression. It would mean economic isolationism.

Remember this: The technical details of a monetary agreement are such that few of us laymen can hope to understand them fully. But we can understand the principles underlying the agreement. We can understand the difference between prosperity and depression, between expanding trade and shriveling trade, and that's what's involved in Bretton Woods.

There are some critics of the monetary agreement, and in my own uncertainty about tchnical details, I hesitate to impugn their motives or to assume that they are speaking for the international banking fraternity on Wall Street, whose control of the destinies of nations would be seriously crippled by Bretton Woods.

I will say this, however, even at the risk of being repetitious—if your Congressman is opposed to Bretton Woods, you are entitled to have from him his alternative to Bretton Woods, an alternative in plain words, without breast-beating and cliches. Make him tell you how he will protect us against the economic anarchy of the past quarter century. It's your future that's involved, and you're entitled to a good answer.

America's Communities in the Changing War

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I wish to include a very excellent speech delivered

by the Honorable Paul V. McNutt, Chairman of the War Manpower Commission, while at Chattanooga, Tenn., on April 5, 1945:

Today the thoughts of America's communities, their hopes and their prayers, are with our fighting men who are invading Germany.

Here at home in a typical American community like Chattanooga we are far away from the massive march of history.

We seem left behind in another world, the world of the home front.

The simple clarity that exists on the war fronts is something we read about and perhaps envy.

Here at home many of us are confused by the hundred-and-one opinions that characterize an American sifting and weighing its domestic issues.

Reconversion, the post-war, taxes, surplus war goods, price control, manpower—all these issues are whirling in front of the eyes of the average American like the three rings in a circus.

I would like to point out that there is still plenty of truth in the old American saying that warns us to keep our eyes on the ball. True, the German war machine is about to have the third strike called on it—but until Germany is declared out, until the Japanese war machine is declared out—we home-front Americans must keep on pitching.

The current debate on domestic issues, the endless newspaper columns, the editorials, the radio commentators, the talk in the pool rooms and barber shops, on train smokers, and at bridge parties, must not distort our focus to see first things first.

Every American war worker, every American foreman, superintendent, or manager in a war plant—here in Chattanooga and in every American community—has helped our magnificent armies to smash across the Rhine.

Modern war is a war of machines and modern war is based on the sweat and muscle and know-how of America's Chattanoogas.

The men and the women working in our plane factories, in our shipyards, in the munitions plants, in the textile mills, in the secret projects whose full story cannot be revealed until after victory, have created the home-front bridgeheads without which there would be no Rhine crossings and no final victory.

America's Chattanoogas and Knoxvilles, America's communities, large and small, have enlisted for the duration like their millions of sons. This very minute, war goods made in Tennessee are being used in the climactic battles in which Tennesseans are fighting and dying.

This basic unity of American community and American fighting men is the heart meaning of this total war.

Our Constitution speaks of "the common defense" and joins the idea of "the common defense" to the ideas of promoting the general welfare of the Nation and securing the blessings of liberty for ourselves and those who will come after us.

Today, our common defense against the Axis has become the common offense. The coordinated power of our total industrial force, wielded by our armies and navies, is destroying the totalitarians. In this sense Chattanooga and Knoxville and every smaller community of the old Volunteer State have also crossed the Rhine.

Tennessee's workers in iron and steel and aluminum,, in ordnance and in textile, and in other important projects, have all crossed the Rhine.

We in the War Manpower Commission salute the war workers of Tennessee. And we say to all of you: "Until your sons and brothers and husbands return, you know what you have to do. You do not need advice or slogans. You know what you have to do."

We in Washington are happy to know that Chattanooga is adequately handling its local problems although its requirements have increased.

That the employment of women is continuing at a high level.

That absenteeism, by and large, is being reduced.

In Knoxville, absenteeism has also decreased during the last 3 months. And employment in its war industries has risen from 29.8 percent in May 1944 to 33 percent in January 1945.

How did this come about? The answer is the community. Community campaigns.

Community reliance on management-labor committees. Community initiative. Community patriotism.

The War Manpower Commission was based on America's communities, and designed for local autonomy. Of the Commission's 26,000 employees, only a 1,000-odd workers are employed in Washington. Through the management-labor committees and decentralized organization of the regional, State, and area and local offices, the Commission's policies have been and are today community policies.

The War Manpower Commission has its core not on Pennsylvania Avenue in Washington, but on the main streets of America's cities and towns.

The 1,500 full-time and 2,300 part-time local offices of the United States Employment Service are run by local men and women bound up in the affairs of the community.

Knowing its problems, the special problems that distinguish one community from another.

Knowing its potentialities. Since July 1, 1944, placements by this net work of employment offices have jumped to 1,100,000 workers a month.

This achievement is the result of cooperation between American management, American labor, and America's communities.

When an individual worker or an employer felt that he had been discriminated against by any decision of the War Manpower Commission, the appropriate management-labor committee sat as a board of appeals in the case.

As I recite these facts, known to all of you, I can see a question forming in your minds: "What about New Bedford? Will he mention New Bedford?"

Gentlemen, I most certainly will mention New Bedford. As you know, the New Bedford problem concerned the staffing of the tire cord plants situated there. The one urgent fact was the need for tire cord.

The one urgent fact was that military tire production could not be impaired.

Last summer the manpower problem in New Bedford started to become acute. With the community we tried to work out a program which would man the tire cord plants through voluntary efforts.

It seemed necessary to us that the ceiling program which is successfully manning urgent war plants in other cities with full community support be installed in New Bedford.

Meetings were held between the New Bedford area management-labor committee and the National Management-Labor Policy Committees, but no plan agreed to by all the participants was submitted.

The only solution seemed to be a forced-release program.

But this is not binding—if the officials of the C. I. O. and the A. F. L. and New Bedford management will agree to and submit an alternative plan, signed by all parties, which will do the job of staffing the tire plants, the War Manpower Commission will be willing to lift its forced-release program.

The disagreement at New Bedford is exceptional.

Its highlights, however, the complexities of the manpower problem.

Manpower cannot be stockpiled or blueprinted or cut to pattern.

The manpower problem was and is today the problem of gearing and regearing war production and war workers to the needs of America's fighting men.

First things first.

From the beginning, millions of American workers, human beings, had to be synchronized to the demands of the military.

Our generals and admirals, Eisenhower, Marshall, Patton, Patch, Nimitz, Halsey, King, were not crystal-ball gazers who could predict to the last decimal point every military need for months ahead.

They were students of the science of war.

Only battle experience could truly determine what was needed, how much was needed, and where it was needed.

For example, in November 1943, there was no concern over the steel supply. December 1943 brought military reverses and and requests for ships, airplanes, landing mats—for steel and more steel.

Manpower had to be found, allocated, trained, transported into the steel fabricating plants and mills. In December 1944, 1 year later, it was estimated that 130 workers would be needed for small-arms ammunition plants. But 2 months later, the War Department sharply revised peak manpower requirements so that the ultimate goal was increased to 161,500 workers.

But you know these facts here in Chattanooga.

Chattanooga has supplied a good deal of the manpower for the Clinton Works, in Knoxville.

There isn't a community in America that hasn't been confronted with the sudden need to expand war production or else to help man "must" war production in other communities.

Battle experience will continue to affect war production here at home.

The production needs of the Pacific war are different from those of the European war.

As our armed forces advance from Iwo Jima up the Japanese island stepping stones toward Tokyo—as we plan possible beachheads on the Chinese coast where the bulk of the Japanese Army awaits our challenge—there will be further shifts, fluctuations, changes, and cut-backs on the home production front.

The Chattanoogas of America are awaiting the signals of our military leaders.

The Chattanoogas of America know that home-town boys will be in the fleets cutting into Japan's home waters, in the armadas, in the air-borne armies, in the infantry.

Not only has home-front manpower been synchronized to the changing war—manpower also had to be synchronized to the industrial geography of this Nation of ours.

Many industries could not be shifted to loose labor markets because of physical barriers.

Many of our great plants are expansions of already existing industries.

The Detroits, the Philadelphias, the Chicagos, the New Bedfords have all multiplied their plant facilities with the war. Other industries were located near their sources of supply. New industrial facilities had to be built in relatively nonindustrial areas.

There were mistakes, conflicting opinions. Of course.

But the main job is being done.

We Americans are not a perfect people like the so-called supermen. But with our allies we are defeating and destroying the Germans and Japanese who had divided the world between them according to their perfect plan.

War has always tested the ability of a people to meet and overcome obstacles—both physical obstacles and the more subtle moral obstacles that arise in the minds of men facing a crisis.

War not only tests the ships, the planes, and the guns we make.

War also tests our beliefs and our principles.

War for the United States of America has been a test of our democracy and our institutions.

American management and American labor have been tested in the course of this war and will be tested in the complex days ahead.

Today, when the Germans seem to be on the edge of total defeat, some of us will have a tendency to relax.

This is only natural.

A winning ball team, with three games won out of five and ahead in the fourth game will tend to ease off.

But war is not baseball.

War in a democratic nation is measured by the lives of our fighting men.

We Americans do not look upon our soldiers as robots as do the Germans and the Japanese.

Our soldiers are our sons, our fathers, our brothers, human beings, whose lives were disrupted by the Fascist aggressors, peace-loving Americans now in uniform.

War in a democratic nation is sparked by the resolve to get our fighting men back to America as soon as possible with the minimum in deaths and casualties.

This is the goal of all Americans, of American management and American labor.

Their responsibilities to the American people will not end with victory in Europe.

Management's and labor's responsibilities to the American people will be intensified after the defeat of Germany.

Management and labor will have the responsibility of manning the war plants and meeting war schedules.

Management and labor and government will have the responsibility of planning for and helping achieve full employment for all Americans in the transitional period between the fall of Berlin and the fall of Toyko.

The responsibility of full employment in the post-war is on the horizon.

Management will have the responsibility of maintaining and expanding wartime's industrial democracy when peace comes. The women, the overage workers, the handicapped workers, the minority workers who all will have had a share in helping defeat Germany and Japan by their war work in all the Chattanoogas of America must surely have a share in the peace.

American management and American labor have joined together to create the greatest industrial team in history.

Management-labor committees in all the Chattanoogas and Knoxvilles of America have sat down at the same table to work out the common problems of war production.

Labor in the interest of the war effort has accepted controls which in peacetime would have been unbearable.

Labor has recognized that in time of war, teamwork between such "normal" opposites as labor and management had to be achieved.

Nobody in America, no group, no individual could escape initial responsibility to the common American people and to the representatives of the people on all the global war fronts—the common soldier.

Responsibility to the soldier must continue when he returns home, a veteran in an army of veterans.

The communities of America will not forget their veterans or their war workers.

Teamed together in war, teamed together in the coming victory, America's armies of fighting men and America's production armies of war workers will together, in every community, forge the beginnings of a new America in which all who will want jobs will have jobs.

A new America built on the new and expanded industries created by war in all the Chattanoogas of this Nation of ours.

Pay of Postal Employees

EXTENSION OF REMARKS

OF

HON. B. W. (PAT) KEARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. KEARNEY. Mr. Speaker, under leave to extend my remarks, I include the following resolution which was sent to me by the clerk of the Assembly of the State of New York, with reference to a revision and reclassification of the wage system of the United States Postal Service:

Whereas over the entry to every post office in the United States is written these immortal words, "Neither snow nor rain nor heat nor gloom of night stays these couriers from the swift completion of their appointed rounds"; and

Whereas there is one group of workers in wartime America that has received comparatively little attention—the workers of the Nation's Postal Service; and

Whereas ever since the outbreak of this global war the workers who comprise the Postal Service have been shouldering a work load far in excess of normal and under the most exacting conditions, and the vast Postal Service being vital to the war effort, our Government called upon the letter carriers and the entire postal personnel for the fullest measure of cooperation; and

Whereas the call did not fall upon deaf ears; and

Whereas time was when the butcher, the baker, and the candlestick maker could set their clocks by the arrival of the morning mail, and since Pearl Harbor, however, things are somewhat changed. The postman's deliveries have become less frequent and not quite so punctual; and

Whereas that is because more than 15,000 experienced letter carriers have joined the armed forces, and all told there are now more than 50,000 postal workers in the United States military service; and

Whereas except for a few highly trained inspectors there have been no deferments for postal personnel, vital though postal work is to the war; and

Whereas letter carriers are more than mere deliverymen for the United States Government. They are the direct and daily contact between the public and its Government, and their peacetime activities have fittingly qualified them to meet any emergency that might arise in a country at war; and

Whereas, despite manpower shortages and all other obstacles strewn in their pathway, the postal employees have performed yeoman-like service throughout the entire year; and

Whereas a glance at the postal revenues shows an increase of $15,000,000 for the month of September 1944; and

Whereas Christmas 1944 found this loyal group of postal workers ready and eager to take on the additional burden, although it will require 12, 14, or more hours per day for each week; and

Whereas the ever-faithful postal employee does not receive time and a half for overtime; and

Whereas the top-grade letter carrier or postal clerk receives straight time for all work in excess of 8 hours per day, which amounts to approximately 86 cents per hour; and

Whereas the man in the blue-gray uniform has not had an upward revision in basic pay rates in almost 20 years; and

Whereas Congress establishes wage standards, hours of work, and nearly all other working conditions applicable to postal employees: Now, therefore, be it

Resolved (*if the senate concur*), That the people of the State of New York, acting through the legislature, hereby respectfully requests the Congress of the United States to give immediate and favorable consideration to a revision and reclassification of the wage system of the United States Postal Service; and be it further

Resolved (*if the senate concur*), That a copy of this resolution be forwarded to the President of the United States, to the Vice President of the United States, to the Speaker of the House of Representatives, and to each Member of Congress when elected from the State of New York, to the end that appropriate action be taken at once to correct the present inadequate and unequal pay now in effect throughout the Postal Service.

By order of the assembly:

ANSLEY B. BORKOWSKI, *Clerk*.

In senate, March 24, 1945. Concurred in, without amendment.

By order of the senate:

WILLIAM S. KING, *Clerk*.

Let Peace Be His Monument

EXTENSION OF REMARKS

OF

HON. RALPH A. GAMBLE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. GAMBLE. Mr. Speaker, under leave to extend my remarks in the RECORD, I insert an editorial entitled "Let Peace Be His Monument," which appeared in the Daily Times, of Mamaroneck, N. Y., on Friday, April 13, 1945:

LET PEACE BE HIS MONUMENT

The last thoughts of Franklin D. Roosevelt must have been concerned with the forthcoming peace conference at San Francisco over the details of which he had worked on his last day upon this earth.

Already there had come to him the definite knowledge that victory was to come to our arms, although it is tragically ironical that upon the eve of this victory the man who had led as Commander in Chief should himself become a casualty.

Yet, with this foreknowledge of certain victory upon the field of battle, his thoughts must have been chiefly upon his program for permanent peace. It is, then, incumbent upon all who would honor his memory that we carry forward that program. We must pick up the torch. We shall keep it aflame.

Gratifying must be the conviction in these trying circumstances that ours is a republic of destiny, so firmly founded that even the loss of him who will rank in history as one of our great Presidents cannot stop its march. The Nation has stumbled for a moment; there is a sharp, painful catch of the breath—and then under a new commander we press forward to complete victory and toward permanent peace.

There were differences of opinion in the minds of millions as to the domestic policies of the New Deal. This is not the time to dwell upon that phase of President Roosevelt's administration. But what is important is to stress that from his first formulation of foreign policy in his Chicago attack upon aggressor nations he would quarantine, all the way through the Atlantic Conference, Tehran, Dumbarton Oaks, and now the San Francisco Conference, he was right.

As, then, we emerge from the terrible crucible of war, let the fruition of his dreams for a world in which peace would forever triumph, in which reason would overcome brute strength, in which right made might—let

this be our monument to Franklin D. Roosevelt.

In our mourning let there be also the strength of determination that he, like those who perished in combat, shall not have died in vain. Let us consecrate ourselves anew to the pledge that the scourge of war shall forever pass from the face of the globe and a just and lasting peace be the inheritance of those who come after.

That is the most magnificent monument which can be manufactured to the memory of this man.

Our Late Beloved President

EXTENSION OF REMARKS

OF

HON. ADOLPH J. SABATH

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. SABATH. Mr. Speaker, under the leave given me I am inserting in the RECORD several editorials and articles that came to my attention concerning not only the greatest American but the world's outstanding personage—our departed President—Franklin Delano Roosevelt, who, more than any other man, will be remembered for his courageous and humane activities in the interest of the common people of our country and the world over. When history will be written he will be properly credited with the defeat of the Hitler-Nazi murder bund and the treacherous Jap beasts. He led us successfully out of the greatest depression and brought us back to prosperity. He has done more for humanity than any other man and for his activities in that direction has been most shamefully assailed and abused by the Fascist and Nazi ideologists. In that connection, I insert an editorial appearing in the C. I. O. News and an editorial and an article appearing in the A. F. of L. Weekly News Service. These articles evaluate the great services and accomplishments of the late President and more fittingly pay tribute to his work than I could possibly express. The editorial and articles are as follows:

[From the C. I. O. News of April 16, 1945]

THE CHAMPION PASSES, BUT HIS WORK GOES ON

No other American has meant so much to so many as President Franklin Delano Roosevelt.

It was his greatness to sense the innermost feelings of ordinary folks, to share their hatred of oppression and misery, and to become the living, fighting expression of their hopes and aspirations.

So he won the personal devotion of millions of Americans who never knew him personally.

He was "The Champ" to them, not only because of his election victories, but more because he was the people's champion.

To the working people, in particular, Roosevelt was "their man," just as he was "that man" to the selfish and reactionary who sought to bar the path of social progress.

The record of his New Deal has been written in greater health, happiness, security, and opportunity for the less privileged majority.

It gave the labor movement its chance to grow to its present strength, and included countless measures to advance the economic welfare and democratic rights of the common people.

But Roosevelt became the people's champion in an even broader sense, when the dark clouds of Fascist aggression appeared on the horizon. His was among the first voices to warn of their danger to America. He became the builder of national unity for winning the war—the champion of the whole American people.

Roosevelt's greatness also went beyond national limits. Just as he built national unity, he also built the unity of the United Nations.

Along with Churchill and Stalin, he was the outstanding leader of the great coalition of all the freedom-loving peoples. With them he devised its victorious strategy.

As a world leader, Roosevelt looked far ahead. He had the vision and statesmanship to work for the continuing unity of the United Nations after the war, to bring lasting peace and growing prosperity to the world.

He died on the eve of the most far-reaching triumph of his triumphant career, the San Francisco Conference to establish a united world organization.

So Roosevelt's death is felt as a deep personal tragedy not only by the working and common people whose cause he championed, but by all Americans, and not only by all Americans, but also by countless millions of people in all countries.

But it seems wrong to speak of Roosevelt in the past tense. For while the man has died, as all men must, his name will live through the ages, and what his name stands for is as alive and growing as it ever was.

In fact, Roosevelt's great work has just begun. It will be carried on by President Harry S. Truman and his administration, by the Congress and armed forces of the United States, by our representatives at San Francisco, and by the United Nations.

But most of all, Roosevelt's work must and will be carried on by the people of the United States, by ourselves and our neighbors, and by folks like us in every country of the world.

The C. I. O., proud of its long and active support of Roosevelt's ideals and policies, will be in the forefront of those who honor this great champion by carrying on his work.

[From the American Federation of Labor Weekly News Service]

F. D. R.

So proudly we hailed this man who can never be forgotten—because he remembered the forgotten man.

Through the perilous night his vision was sure, his course certain, his heart unafraid.

So gallantly, so courageously, he faced the trials of our Nation.

While we watched from the ramparts, he lifted America out of the worst depression in its history.

"The only thing we have to fear is fear itself," he said, and those challenging words inspired all America with new hope and courage.

Long before the rocket's red glare was visible to us, he saw the world conflagration coming and resolutely prepared us for it.

When the bombs burst over Pearl Harbor, America mobilized under his direction into the mightiest armed force the world has ever seen.

Yes; there were doubters, there were chiselers, moaners, and critics—but now, with victory almost within our grasp, the Star-Spangled Banner still waves o'er the land of the free and the home of the brave.

At the twilight's last gleaming, the hostile voices are stilled and all the world bows in reverence.

And in the dawn's early light labor arises in sorrow, but with reinforced determination to finish the job that must be done according to his blueprint for tomorrow.

[From the American Federation of Labor Weekly News Service]

Franklin Delano Roosevelt may go down in history as the architect of world peace or as an outstanding military strategist, but to the men and women of labor in this country he will always stand as the great champion of the cause of the underprivileged.

To them the true test of his greatness was that he never lost touch with the common man.

It is far too early to attempt to evaluate in terms of lasting importance the vital economic and social reforms instituted by President Roosevelt to strengthen and amplify the American way of life. The list is tremendous. But to the workers of the Nation these measures appear outstanding.

1. The National Recovery Act, which sparked the stalled economic machinery of the Nation back into motion and served a highly useful purpose even though it was later invalidated by the Supreme Court.

2. The National Labor Relations Act, regarded as labor's Magna Carta, which gave official blessing to collective bargaining and and guaranteed the right of workers to organize and join unions of their own choosing.

3. The Social Security Act, which, though still imperfect, helped to banish the fear of poverty in old age and in temporary unemployment.

4. The Fair Labor Standards Act, which set a floor for wages and a ceiling for working hours and helped millions of workers in oppressed industries to escape from starvation conditions.

5. The Federal Deposit Insurance Act, which insured and protected the hard-earned savings of the masses.

These were the big reforms of the Roosevelt administration. But above and beyond these, was the spirit which initiated them and which was ever ready to give prompt and sympathetic attention to the troubles of labor.

Franklin D. Roosevelt made mistakes, too. But they were the mistakes of a warm heart. He could be stern as well as kindly. He could reprimand as well as praise. But labor always found him just and responsive.

Labor's loss in his death cannot be expressed in words. He will be mourned—mourned by men and women who never saw him in the flesh, who never spoke to him, but for whom he will always remain a symbol of kindliness and decency.

The Chief

EXTENSION OF REMARKS

OF

HON. ROBERT SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. SIKES. Mr. Speaker, no words can tell better than his own the greatness and the humaneness of Franklin D. Roosevelt. Already, like the man, they take their place among the great works of all time. And it is proper that the Nation for love of which he died in line of duty, should treasure his words, from which I quote:

First inaugural address, March 4, 1933: "This is preeminently the time to speak the truth, the whole truth, frankly and boldly * * * This great Nation will endure as it has endured, will revive and will prosper. So, first of all, let me assert my firm belief that the only thing we have to fear is fear

itself—nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance."

At his second inaugural in 1937: "The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have little."

His "moral order" statement on January 6, 1941, before Congress: "We look forward to a world founded upon four essential human freedoms:

"Freedom of speech and expression—everywhere in the world.

"Freedom of every person to worship God in his own way.

"Freedom from want—economic understanding securing every nation a healthy peacetime life for its inhabitants.

"Freedom from fear—world-wide reduction of armaments so thorough that no nation would be able to commit an act of aggression against any neighbor.

"This is no vision or distant millennium. It is a definite basis for a kind of world attainable in our own time and generation."

War message before Congress, December 8, 1941: "Yesterday, December 7, 1941—a date which will live in infamy—the United States of America was suddenly and deliberately attacked by naval and air forces of the Empire of Japan. * * * No matter how long it may take us to overcome this premeditated invasion, the American people in their righteous might will win through to absolute victory. I believe I interpret the will of the Congress and of the people when I assert that we will not only defend ourselves to the uttermost, but will make it very certain that this form of treachery shall never again endanger us."

Message to Congress, March 26, 1945: "The point in history at which we stand is full of promise and of danger. The world will eithe move forward toward unity and widely shared prosperity or it will move apart into necessarily competing blocs. We have a chance, we citizens of the United States, to use our influence in favor of a more united and cooperative world. Whether we do so will determine, as far as it is in our power, the kind of lives our grandchildren can live."

There are many among us who grieve that our great departed Commander in Chief could not have been spared to witness the triumph of our arms, the workings of the peace organization. But his great triumph is the triumph of his life's work. His is the triumph of immortality, for he led the Nation out of the depths. He helped the Nation to find itself and then to go on to those heights which have made it invincible in war and the inspiration of freedom-loving peoples everywhere.

We must and we shall realize that his passing left each of us with a greater responsibility and a greater task. And with full confidence in the right, we shall rally behind the man who has been given to us to carry on the work of our beloved Franklin D. Roosevelt. We shall stand with and support President Truman in the final task of defeating the transgressor nations, and as certain victory comes nearer we shall plan also for those greater tasks which must come with peace. We shall accept without fear or compromise the task of properly readjusting into a useful and happy private life the 15,000,000 men and women who will have been sent to fight this Nation's battles and to win its greatest war. We shall attack without hesitancy the terrific responsibility of providing gainful jobs in private industry for the millions who are now engaged in war production, knowing that in gainful jobs lie the surest basis for prosperity. We shall not allow this Nation to sink again into the misery of depression.

I beg to quote again the prayer given to us by President Truman in his first message to Congress and to the Nation. You will recall that it is from the words of Solomon:

Give therefore thy servant an understanding heart to judge Thy people that I may discern between good and bad; for who is able to judge this Thy so great a people? I ask only to be a good and faithful servant of my Lord and my people.

Surely with this as a guidon, we shall not fear the future.

Back Up Our President

EXTENSION OF REMARKS

OF

HON. ALBERT THOMAS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. THOMAS of Texas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial:

BACK UP OUR PRESIDENT

President Truman's speech to Congress Monday brought rays of hope and promise to the Nation in a dark hour of sorrow.

Humble but determined, he convincingly pledged that he would carry on the program of winning the war and winning the peace. His vigorous spirit was reassuring to an allied world which had looked to America for enlightened leadership and may have wondered whether this Nation would falter after its war leader had fallen.

Encouraging, too, was his stout declaration that "we shall never cease our struggle to preserve and maintain our American way of life."

The new President's address made clear his realization of the tremendous task that confronts him, and left no doubt of the courage and sincerity with which he approaches it. In simple, eloquent words he envisaged, too, the immensity of the opportunity that beckons—the opportunity to bring the war to a triumphant culmination, to establish a coalition of the United Nations for lasting peace, and, finally, to guide the Nation successfully through the reconversion and reconstruction periods.

How successfully this opportunity will be grasped will depend largely upon the support and cooperation of the American people. Mr. Truman has the ability, the experience, and the temperament for the job. And there is every reason for the people and their representatives in government to uphold his hand; no reason for them not to.

His sudden accession to the Presidency is a ringing challenge to every good American to get behind him—Democrats and Republicans, New Dealers and anti-New Dealers, liberals and conservatives. No class or group has it in for him; Republicans and Democrats in Congress like and have confidence in their former colleague; every indication points to their cooperation, which he frankly told them is essential to the completion of "one of the greatest tasks ever assigned a public servant."

President Truman asked for divine guidance and called upon all Americans to help him keep the Nation united. Thus he made his titanic job the job of all of us. His administration offers a magnificent opportunity for complete American harmony and consequent achievement. It is our obligation to back him up, cooperate with him, the sooner to win the war, bring the boys back home, and get the wheels of peacetime industry humming again.

Nazi-Jap Atrocities

EXTENSION OF REMARKS

OF

HON. ADOLPH J. SABATH

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. SABATH. Mr. Speaker, within the last few days the American people have been horrified by the revolting news pictures and reports of the atrocities committed by the Japanese soldiery in the Philippines and the torture and starvation suffered at the hands of the Nazi—not only of our and United Nations prisoners of war but of the civilian populations of German-occupied countries. I am inserting several articles which appeared in the Washington Star describing some of these atrocities, and I do so in order that certain groups within our country may not forget the barbarous and inhuman acts which the Nazi and Japs committed against the prisoner-soldiery of the United Nations and the civilian populations of the overrun countries. It is my hope that the reading of these articles will serve to deter any "soft" groups in any effort to extend leniency to the barbarians who have been responsible and guilty of inflicting the most fiendish tortures upon millions of prisoners of war and civilians and who have murdered hundreds of thousands of men, women, and children in cold blood. The beastly acts of these oppressors cannot be condoned, and neither time nor circumstance shall temper the scales of justice in meting out the deserved punishment to these arch criminals. The articles are as follows:

[From the Washington Star of April 18, 1945]

THOUSANDS OF DEAD AND DYING FOUND IN NAZI HORROR CAMP—29,000 STILL ALIVE AMID PILES OF BODIES; DISEASE IS RAMPANT

(By William Frye)

BRITISH SECOND ARMY HEADQUARTERS, GERMANY, April 18.—Prisoners in the Belsen concentration camp, a filthy horror, were freed Sunday by Gen. Sir Miles C. Dempsey's men.

The camp contained 29,000 persons still alive and uncounted dead.

It contained typhus, typhoid, tuberculosis, nakedness, starvation, dumps of unburied corpses in vast heaps, mounds covering great burial heaps, one cavernous pit half filled with blackened bodies.

There were children—500 of them—in the midst of this.

Babies were born there daily.

These were the findings of a senior medical officer of the British Second Army who has been at the camp 3 days and says, "Anything you have seen doesn't even begin the story."

The living are being moved to the relative luxury of a nearby Army barracks. Soon none will be left here except those with communicable diseases too ill to move.

Eventually, says this officer, the only conceivable disposition of this Nazi monument will be destruction by fire.

There were 2,000 women in three compounds in this camp and nearly 12,000 men in two other compounds. In adjacent barracks in one corner of the vast Nazi camp are 15,000 more prisoners who are fairly recent arrivals.

"Horror camp" is what the medical officers call it.

After his arrival at the camp SS guards under the direction of their commander were still shooting prisoners who were trying to steal potatoes. The SS had failed to abide by the surrender terms to turn in their arms because they feared the vengeance of the emaciated victims of their inhumanity.

The SS men were promptly disarmed when discovered and are now assigned to cleaning up the camp as a slight measure of retribution.

How many died here there is no way of knowing. Indefinite reports say 30,000 died in the last few months.

In the middle of the camp there is a mound 80 yards by 30 yards of the naked bodies of women piled table-high.

While the medical officer was inspecting the camp he saw four girls carry another corpse from the hut and add it to this fearful stack of death, which was in plain view of the children's compound. A woman laid the body of her own child on the heap.

Most of the dead were victims not of disease, but starvation. The rations were three daily issues of watery soup made of meal and a few vegetables. Once or twice a week a few bits of meat were thrown into the cooking cauldrons. But the issue was by huts, not individuals. Each hut leader sent four persons with large metal containers to bring the rations, but in practical effect the distribution was not supervised and those too weak to fight for their own food got none.

MANY DIE IN HUTS

They would lie on the floors of the huts until the last thin trace of life had disappeared and no one noticed.

The insufficient bunks were occupied by wasted remnants of two to three persons. One double-decked bunk might contain six diseases, six stages of advanced starvation.

People still are dying. The medical officer said that even with the best possible care and most careful diets thousands cannot be saved. Doctors among the prisoners told the British they were treating 1,714 women with acute cases—there are bunks for 474.

Of the men there are 2,242 acute cases occupying 1,900 bunks.

The improvised hospitals arranged by the prisoners received 125 women and 60 men daily. All the doctors have had typhus but recovered.

PARCELS WITHHELD

The officer said large consignments of Red Cross parcels sent by Jews reached the camp but never were distributed and were not used by the Germans, withheld apparently out of sheer malevolence. There is yet no indication what proportion of these civilian prisoners is Jews, but the assumption is that it is high.

Some inadequate medical stores were found in the camp. The officer said that two bright spots were that the kitchens were clean and well kept and that the children were in comparatively good condition. The women had used their wasting strength to keep the children clean and to get them as much food as possible.

The SS masters occasionally gave the children small bits of candy the prisoners said.

CRUELTIES OF GERMANS WILL BE DISCUSSED IN COMMONS TOMORROW

LONDON, April 18.—Published accounts of German concentration camps which have been stirring Britons for several days will be brought up formally in Commons tomorrow when Prime Minister Churchill will be asked if the infamous Buchenwald camp will be preserved to remind future generations of Nazi cruelties.

The matter of the guilt of Nazi leaders in the mounting list of war crimes was the subject of exchanges in the House today. The shaping of new questions stems from British convictions that Germany and the world must not be allowed to forget the pain the Germans have inflicted and that those responsible must be punished.

"Six thousand famished men and women," or "One thousand burned by the Germans" are samples of London newspaper headlines. Three separate stories on the front page of today's News-Chronicle were under the single editorial note: The lid is being lifted from the cauldron of horrors that was Nazi Germany.

"Let German doctors and nurses be compelled to tend the survivors of Nazi brutality", suggested the Star. "Let German forced labor, recruited from all classes, demolish these plague spots. By every means ram it home that Germans must atone for these deeds."

SOLDIER, REACHING FOR CANDY, KILLED BY 9-YEAR-OLD GERMAN

DULUTH, MINN., April 18.—The slaying of an American soldier by a 9-year-old German boy was related by Second Lt. William Barnes, of Duluth, in a letter from Germany received this week by his parents, Mr. and Mrs. Arthur Barnes, Duluth.

"We had stopped to re-form when a small boy, 9 or 10 years old, asked a soldier for some chocolate," he writes. "He was a cute-looking youngster, and from force of habit the soldier put his hands in his pockets to see if he had any.

"Then the cute little boy drew a pistol from his clothes and shot the man through the abdomen. He couldn't miss, he was so close."

The soldier died of his wounds, Lieutenant Barnes wrote.

"Would you feel like giving a toy to a child after that?"

(Lieutenant Barnes' parents said they had inclosed some small toys for refugee children in their Christmas boxes to their son.)

"And now do you suppose I take my eyes off a civilian for a minute? I've already had to kill one in self-defense. No, Mom; I'm not giving toys to German children."

Lieutenant Barnes, now 20, was commissioned on his eighteenth birthday. Wounded March 1 in Germany, he is now in an English hospital.

He is a nephew of Julius Barnes, former president of the United States Chamber of Commerce.

The Forgotten Fighters

EXTENSION OF REMARKS

OF

HON. ALBERT M. COLE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. COLE of Kansas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial:

THE FORGOTTEN FIGHTERS

"They need everything except courage. They had plenty of that to begin with and 7 years of suffering has not diminished their supply." So Martha Gellhorn writes of the remnants of the Spanish Republicans in southwestern France—the men, women, and children who fought the first great fight to stem the Nazi-Fascist rebellion against our civilization, who escaped across the Pyrenees after the first great defeat, who were thereafter shunted through one concentration camp and another, who fought with the Maquis in the liberation of France and who now, in the first great dawn of victory for their cause, find themselves still persons without a country, find the Franco despotism recognized by all their Allies and find that they cannot even look for relief to the United Nations Relief and Rehabilitation Administration because "Spain is a neutral."

Something like half a million of them are supposed to have crossed the frontier after the murder of the Spanish Republic. Most have been absorbed, in one way or another, into the strange and bloody times which that great crime initiated. They were deported by the Nazis. They went into bondage to French collaborators. They died. Many joined the Maquis; but with the end of the guerrilla fighting they are again men without homes or work, even though, as Miss Gellhorn dryly observes, "everybody appreciates very much what they did." In all there are about 80,000 still in dire need in the Toulouse area—composed mainly of those crippled in the civil war or with the Maquis, and the families of men who were deported or have died in the guerrilla fighting. If they are inclined to look now with a certain Spanish cynicism on words of praise and applause for their heroic fight, one can hardly blame them. But it is possible to send more than words. The Spanish Refugee Appeal of the Joint Anti-Fascist Refugee Committee, 192 Lexington Avenue, New York, is sending every dollar which it raises to the Unitarian Service Committeefor distribution to these forgotten fighters for our common freedom.

Tribute to Vision of Hon. Scott W. Lucas, of Illinois

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following article from the East St. Louis (Ill.) Journal of Tuesday, April 17, 1945:

BUILDING AMERICA

Illinois can be proud of the social vision shown by Senator SCOTT LUCAS in his sponsorship of a bill that would increase the resources of the Rural Electrification Administration by half a billion dollars. If passed and approved, as it probably will be, the Lucas bill will permit an immense and rapid extension of electric service among the farms of the country.

Few public improvements have equal social importance, for the reason that electricity on a farm is the key to better living in every possible way. Electricity frees the farm wife from slavery to the pump. It is the agency that brings water into the house, eliminating an age-old drudgery. It brings light, for better reading and study; cleanliness; refrigeration for a better diet. A thousand tasks that wore out human bodies and dulled minds are easily performed by electricity. Better citizenship follows the high lines.

It is within our power to gain so much, from an amount of money that would be consumed in a few days of war, it would be stupid not to grasp the opportunity. And even the

half billion will not be a permanent debt upon taxpayers; it will be advanced in self-liquidating loans to be repaid over a term of years.

Eleanor Roosevelt

EXTENSION OF REMARKS
OF
HON. ADOLPH J. SABATH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. SABATH. Mr. Speaker, as soon as opportunity will present itself and I will have the privilege to see the President, I shall urge that he endeavor to obtain the consent of the greatest woman of our Nation—Mrs. Eleanor Roosevelt—wife of our late beloved President, Franklin Delano Roosevelt, who has so splendidly cooperated and aided him during his tenure of office in carrying on his tremendous activities and duties, to accept some post with the Government. Regardless of how high the assignment may be, I know her great ability will enable her to fill it to the entire satisfaction of the American people. Her keen interest in the welfare of the people and her proven desire to aid humanity in every way makes her a citizen of the first value who should not be lost upon our Government. Aside from her life as the wife of a great President she is entitled on her own right to have a place of major importance in our Government—either in its domestic aspects or in our relationships with the rest of the world. She is truly a great person. The President could make no finer—yes and wiser—move than to offer her any assignment that comes within the scope of his office. In this connection, I insert an article by Josephine Ripley, appearing in the Christian Science Monitor, entitled "Eleanor Roosevelt, Private Citizen," as follows:

ELEANOR ROOSEVELT, PRIVATE CITIZEN
(By Josephine Ripley)

WASHINGTON.—After 12 years as wife of the President of the United States, Eleanor Roosevelt closes the door of the White House behind her this week to become a private citizen.

No President's wife in the history of the country has traveled as widely or been as active in public affairs as Mrs. Roosevelt.

While the change which has come upon her so suddenly will lead her into different paths, few believe it will mean her retirement from public life.

Eleanor Roosevelt has always been an active woman, keenly interested in people and in affairs. Since coming to the White House, her viewpoint has broadened. She is a person who thinks today in the terms of nations—the United Nations in which her husband had such hope.

She is not one of the great women thinkers of the day, but she is, nevertheless, a person of many talents and wide experience in various fields.

In her many speeches over the radio she has acquired an admirable technique, a field in which the feminine voice meets its severest test.

She is equally at home on the lecture platform. She is the author of a number of books, including "The Moral Basis of Democracy," "When You Grow Up to Vote," "It's Up to the Women," "This Is My Story," and "My Day."

Mrs. Roosevelt has written numerous magazine articles and contributed the now-famous My Day newspaper column.

Before coming to the White House she edited a magazine called "Babies, Just Babies." She was vice principal of a school for girls. She founded and directed a furniture shop and was actively interested in public housing as a member of the Housing Association of New York City.

She served at one time as State Democratic committeewoman and has had a lifelong interest in social welfare. At the beginning of the war Mrs. Roosevelt was made Assistant Director of the Office of Civilian Defense. Her administration of the job was severely criticized, however, and she resigned later.

Numerous avenues of activity which were closed to the wife of the President will undoubtedly open up to Eleanor Roosevelt, private citizen. There is no question but what the demand for her services will be many when she is ready to reenter public life.

She would be the last to shirk what she feels to be her responsibility, and she has often stressed the responsibility of all citizens to do their part in helping to win the war and maintain the peace.

Last November, after the election, she told reporters that she thought the next 4 years would be "probably the most difficult the world has ever known, for we have to win a war, make a peace, and rebuild a world. I can't think of anything more difficult," she said.

After the Dumbarton Oaks Conference, she expressed the belief that "there should be a woman on every working committee." Not that women should take a dominant part in the peace-keeping, she explained, but that it is desirable for men and women to work together in that cause.

While the Nation, almost as stunned as Mrs. Roosevelt with the sudden change in her affairs, wonders what her role will be in the future, she herself is wholly occupied in moving out of the White House.

Upon her shoulders rests the responsibility of disposing of the 12-year accumulation of family belongings and the personal possessions of President Roosevelt, including his stamp collection, his marine prints, his ship models and books.

But even with the burden of this task, she did not forget that the new White House mistress would need help, and she spent more than an hour on Monday showing Mrs. Truman over the White House and explaining the duties which would be hers as the First Lady of the land.

Although some have criticized Mrs. Roosevelt in the past for taking the prominent part that she has in public affairs, there is nothing but deep admiration today for the remarkable fortitude with which she has met this great crisis in her life.

And the good wishes of millions all over the world follow her as she prepares to take up her new life as Eleanor Roosevelt, citizen.

Recognition of Italy as an Ally

EXTENSION OF REMARKS
OF
HON. WALTER G. ANDREWS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. ANDREWS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter from the Secretary of State:

DEPARTMENT OF STATE,
Washington, April 17, 1945.

The Honorable W. G. ANDREWS,
House of Representatives.

MY DEAR MR. ANDREWS: I have received your letter of April 6, 1945, enclosing a resolution recently adopted by the Federation of Italian-American Societies, of Buffalo, N. Y., together with several expressions signed by your constituents urging that Italy be recognized as an ally.

Your constituents urge that this Government recognize Italy as a political as well as a military partner and that she be accorded the status of full ally. In this connection, it may be pointed out that while references to our "allies" are now in common usage, we have no formal treaty of alliance with any power. The admittance of Italy as a member of the United Nations would be the equivalent of recognizing Italy as a political partner, to the extent that the other nations are recognized. However, it must be understood that such a step is not for consideration and decision by this Government alone, but would require the concurrence of other United Nations.

You may assure your constituents that the United States Government gives constant and sympathetic attention to its relations with Italy, which have developed considerably toward a friendly and normal basis since the Italian surrender in September 1943. Formal diplomatic relations between the two countries have now been resumed. The Italian Ambassador presented his letters of credence to the President on March 8, 1945, and this Government is likewise represented in Italy by a fully accredited Ambassador.

The enclosure to your letter are returned to you herewith.

Sincerely yours,
EDWARD R. STETTINIUS, Jr.

Military Training

EXTENSION OF REMARKS
OF
HON. WALTER G. ANDREWS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. ANDREWS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement by the Citizens Committee for Military Training of Young Men:

CITIZENS COMMITTEE FOR MILITARY TRAINING OF YOUNG MEN, INC.,
New York, N. Y., April 4, 1945.

The Citizens Committee for Military Training of Young Men, Inc., just formed and chartered as a nonprofit organization in the State of New York, is the outgrowth of a small group which played a leading part in organizing the Plattsburg Camps of 1915 and 1916, the War Camps of 1917, and the adoption of the Selective Service System in 1940.

It is now directly interested in the subject of a military training program, both Army and Navy, for young men at about 18 years of age, to begin after this war is over and the Nation comes face to face with the realities of the future in maintaining peace and avoiding war.

Such a military training program has become an issue of the day, as you well know, and much is being said and written pro and con on whether this program should be enacted into law.

This committee realizes that a law of this kind will affect the life of every male citizen in the United States and that it marks a

complete change in our military policy of the past 150 years.

Therefore we feel, most deeply, that the subject should be fully and openly debated throughout the country in every city, town, and hamlet, without prejudice. Above all, we feel that public opinion should be clearly crystallized on just what is meant by military training and its advantage to the Nation.

When the committee uses the term military training for young men, we mean just this and nothing more.

We are convinced that 1 year of continuous progressive military training divided as follows: 9 weeks basic training, 9 weeks specialist training, 13 weeks small unit, 13 weeks large unit, and 8 weeks maneuvers (Navy to have corresponding program) would not make a nation of militarists nor would it interfere with or change in any way the American tradition of public and private education.

Our World War No. 1 Army and Navy did not make a military caste, nor is there any sign that our Army and Navy of World War No. 2 will make a military caste. Certainly it is hard to conceive that 1 year's military training will give any young fellow anything except better health, a keener mind, a fundamental knowledge of military science, and a primary equipment for the pursuit of personal advancement.

Bluntly speaking, this committee would stoutly oppose any imposition of political indoctrination and propaganda by the present or future administration in Washington. But our chief concern now is to get the whole subject before all Americans—irrespective of race, color, and creed—for open debate.

To accomplish this we are forming a Nation-wide group in order to provide the opportunity for such debate, so that the Congress will know what the people are thinking.

We are a volunteer organization and represent no special interests of any kind.

Our funds will be publicly subscribed by individuals. We shall not accept corporate moneys. Our books will be audited by a nationally known firm of auditors and they are open for public inspection by any responsible source.

Our purpose in writing you personally is to identify this committee, its objective, its beliefs, and its plan of activities.

In stating our views we would welcome an expression of opinion from you.

Sincerely yours,

JAY COOKE, *President.*

Resolution of Durham Hosiery Mills

EXTENSION OF REMARKS

OF

HON. CARL T. DURHAM

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. DURHAM. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Durham Morning Herald, Durham, N. C., of April 17, 1945:

HOSIERY MILL UNION APPROVES RESOLUTION

In a formal statement textile workers at the Durham Hosiery Mills, No. 6, expressed deep regret yesterday concerning the death of President Roosevelt. The statement follows:

"We, the members of T. W. U. A., Local 602, wish to express our deepest and sincerest sorrow in the death of one of the most beloved Presidents in history. Never before has there been such a Presdent who had at heart, as he did, the working people and their conditions and took steps to better their conditions, making them feel freer and believe that they were actually Americans free to take part in organizations to help their fellow-workers. Through him the textile workers, the miners, farmers, and laboring people of every trade could build a freer and better America in which to live, winning better working conditions, better pay, and fairer policies not only for themselves but for their employers. Thank God for such a President.

"May God grant our beloved and faithful President more relief from his labor than he had on earth. May God grant all of this Nation a thankful heart, and courage to keep fighting for the cause our President worked for.

"May God bless our new President, Harry S. Truman, as he carries on the work as he believes Roosevelt would want it done."

The statement is signed by Paul R. Williams, secretary-treasurer of the union.

Astounding War Production of the Chrysler Corporation

EXTENSION OF REMARKS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. RABAUT. Mr. Speaker, from time to time it has been my custom during the progress of the war to announce to the House the astounding production of various manufacturers of the Michigan area.

Our State can rightfully be called the major producer of the tools of war and has been referred to in these trying times as the Hub of the Arsenal of Democracy.

Today in speaking of the production of the Chrysler Corporation, I spoke from that hub extends to their Dodge Chicago plant from which was recently shipped its ten thousandth Wright B–29 engine, which production, I am informed, was ahead of schedule. Here it might be well to refer to the miracle of construction of the very plant wherein this production took place. For only a little over 2½ years ago the Dodge Chicago plant was a set of blueprints.

Today—

As Mr. K. T. Keller stated—

it is one of America's largest war operations, and is another example of how industry has met the challenge of war production.

My colleagues will be pleased to learn that the Chrysler Corporation has shipped more than 34,000,000 spare parts for B–29 engines, 5,000 B–29 assemblies consisting of nose sections, leading wing edges, and cowling sets, 23,000 tanks, 12,000 tank engines, 170,000 rockets, 50,000 Bofors guns, three thousand million rounds of ammunition, 2,000 Radar units, 400,000 Dodge Army trucks, 100 miles of submarine nets, 5,500 Sperry gyro-compasses, 7,800 marine tugs and tractors, 26,000 marine engines, 9,000 Navy pontoons, 4,500 Curtiss Helldiver wing sections, 8,000 Vought Sikorsky Corsair landing gears, 10,000,000 duraluminum forgings, 370,000 bomb shackles, and 60,000 Army field ranges—all products of a great corporation, resulting from the unity of the brawn and brain of man.

Just as the name of Chrysler is known and feared by our enemies in time of war, so it is known and cherished for its production of comfort goods in the days of peace. May God speed those days.

Let There Be No Fear

EXTENSION OF REMARKS

OF

HON. RALPH A. GAMBLE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. GAMBLE. Mr. Speaker, under leave to extend my remarks, I include in the CONGRESSIONAL RECORD an editorial which appeared in the Argus, published at Mount Vernon, N. Y., on April 14, 1945, and was titled "Let There Be No Fear":

LET THERE BE NO FEAR

As the simple but saintly solemn rites of his church are being read in the White House this afternoon over the body of Franklin Roosevelt it is both proper and pertinent that the people over whom he ruled for 12 years dedicate themselves to carry on in this hour of national peril. Not even for the obsequies of a Commander in Chief can the armies of this Nation relax a moment, and that same obligation should bind those of us who are not upon the combat fronts.

There were faint-hearted folk who last year questioned the advisability of conducting a Presidential election in the midst of a deadly war. They were proved wrong, and by virtue of our ability to follow the Constitution even in the days of the most extreme emergency the pillars of this Republic were strengthened. So, today, as we gird ourselves to renewed battle at the gates of Berlin, as we push home in the Pacific the righteous blow which is to give freedom to that part of the world, let us put away fear from our minds.

It was President Roosevelt himself who at his first inaugural said:

"This great Nation will endure as it has endured, will revive, and will prosper. So, first of all, let me assert my firm belief that the only thing we have to fear is fear itself—nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance."

Berlin and Tokyo need expect no relaxation upon the part of those in command of our armies and our fleets. Marshall and King, Eisenhower and Nimitz and MacArthur, will remain in control of our strategy. President Truman has promptly given assurance to that effect. The Cabinet at Washington will, for the time at least, remain intact. There will not be the slightest interruption in the fighting at the front and there must not be any let-down in the production here at home of the weapons of war and their shipment to the fields of combat.

So, too, there is grave responsibility upon all of us upon the home front that we carry on without lapse, that we shoulder our burdens and press forward as do brave soldiers under new command, that, above all, we do not relinquish in even momentary panic one single item in the master plan designed to force the unconditional surrender of our enemies.

Instead, as Franklin D. Roosevelt is being borne tonight to his last resting place above

Westchester upon the Hudson, let the wreath which we place upon his bier read:

"Our hearts, our hopes, our prayers, our tears,
Our faith triumphant o'er our fears,
Are all with thee."

The American Legion Versus Communism

EXTENSION OF REMARKS
OF
HON. JOHN E. RANKIN
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. RANKIN. Mr. Speaker, under permission granted me to extend my remarks in the RECORD, I am inserting a letter written to me by C. J. Western, commander, and J. L. Workman, adjutant, Columbia Post, No. 34, American Legion, Washington, D. C., together with a resolution adopted by Columbia Post concerning the commissioning of members of the Communist Party in the United States Army.

The letter and resolution follow:

COLUMBIA POST, NO. 34,
AMERICAN LEGION,
Washington, D. C., April 17, 1945.

Hon. JOHN E. RANKIN,
House of Representatives,
Washington, D. C.

MY DEAR MR. RANKIN: The members of Columbia Post, No. 34, American Legion, at a regular meeting held April 4, 1945, went on record to commend you in your open attack on communism in making known to the public facts and accomplishments undertaken by that organization. Your effort is a worth-while step forward to defeat these un-American ideas so rapidly gaining headway in the United States.

The members of Columbia Post know you as a worthy friend of the veterans, and are familiar with your untiring efforts to accomplish anything that might be a benefit to all veterans.

Many times you have battled in favor of the veterans' cause, sometimes against heavy odds, but always with courage. We are confident that you will carry on to a successful finish the task that you have begun in defeating communism.

The enclosed resolution passed by the post against communism is a clear understanding of how the members feel about communism and should there be anything in any way in which they might aid you they will be ever willing and cooperative.

Very truly yours,

J. L. WORKMAN.

Whereas it has become the avowed policy of the Department of War to permit members of the Communist Party or persons with communistic leanings to receive commissions in the armed forces of the United States; and

Whereas the members of Columbia Post, No. 34, District of Columbia, American Legion, as well as all legionnaires, having previously dedicated themselves to a 100-percent Americanism; and

Whereas having served in World War No. 1 and World War No. 2 to uphold Americanism; and

Whereas the members of Columbia Post, No. 34, District of Columbia, American Legion are of the opinion that this policy of the Department of War is dangerous and inimical to the safety and welfare of the country: Now, therefore, be it

Resolved, That Columbia Post, No. 34, go on record as opposing this policy of the Department of War, and protest the granting of commissions in the armed forces to persons advocating and believing in communistic principles or other subversive action; and be it further

Resolved, That the members of Columbia Post No. 34 reaffirm and rededicate themselves to the principles of the United States of America, and oppose the principles of all subversive actions that are dangerous to the welfare and liberty of our country; and be it further

Resolved, That this resolution, if it meets the approbation of the department convention of the District of Columbia, be brought to the attention of the next national convention for approval.

War Department Warns Against Fascism

EXTENSION OF REMARKS
OF
HON. ADOLPH J. SABATH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. SABATH. Mr. Speaker, my attention has just been called to a warning issued to the armed forces overseas against foreign and domestic fascism. I want to congratulate the War Department on the issuance of this warning as many of our soldiery have been misled by the false Fascist propaganda. While the warning will be beneficial to the members of our armed forces, I feel it will also be helpful to American civilians in bringing to their minds the need of being alert and guarding against subversive propaganda. I insert the War Department warning on fascism:

WAR DEPARTMENT,
Washington, D. C., March 24, 1945.

FASCISM

Note for this week's discussion: Fascism is not the easiest thing to identify and analyze; nor, once in power, is it easy to destroy. It is important for our future and that of the world that as many of us as possible understand the causes and practices of fascism, in order to combat it. Points to stress are: (1) Fascism is more apt to come to power at a time of economic crisis; (2) fascism inevitably leads to war; (3) it can come to any country; (4) we can best combat it by making our democracy work.

You are away from home, separated from your families, no longer at a civilian job or at school and many of you are risking your very lives because of a thing called fascism. * * *

We Americans have been fighting Fascists for more than 3 years. When Cecil Brown, one of the leading war correspondents, came back from the battle fronts he went on a trip that took him into big cities and small towns all over America. He talked and listened to all kinds of people. He found that most Americans are vague about just what fascism really means. He found few Americans who were confident they would recognize a Fascist if they saw one.

And are we in uniform any more certain what fascism is—where it came from—what made it strong? Do we know how fascism leads men to do the things done to people at Maidanek? Do we know how it leads them to attack helpless nations? Are Maidaneks and war inevitable results of fascism? Do all Fascists speak only German, Italian, or Japanese—or do some of them speak our language? Will military victory in this war automatically kill fascism? Or could fascism rise in the United States after it has been crushed abroad? What can we do to prevent it?

Perhaps we ought to get to know the answers. If we don't understand fascism and recognize fascism when we see it, it might crop up again—under another label—and cause another war.

FASCISM AND BUSINESS

Fascism is a way to run a country—it's the way Italy was run, and the way Germany and Japan are run. Fascism is the precise opposite of democracy. The people run democratic governments, but Fascist governments run the people.

Fascism is government by the few and for the few. The objective is seizure and control of the economic, political, social, and cultural life of the state. Why? The democratic way of life interferes with their methods and desire for: (1) conducting business; (2) living with their fellow men; (3) having the final say in matters concerning others, as well as themselves. The basic principles of democracy stand in the way of their desires; hence—democracy must go! Anyone who is not a member of their inner gang has to do what he's told. They permit no civil liberties, no equality before the law. * * * They maintain themselves in power by use of force combined with propaganda based on primitive ideas of "blood" and "race," by skillful manipulation of fear and hate, and by false promise of security. The propaganda glorifies war and insists it is smart and "realistic" to be pitiless and violent.

Question. How does fascism get in power? How can a violent program that enslaves the people win any support?

FINANCIAL INTERESTS BEHIND FASCISM

Fascism came to power in Germany, Italy, and Japan at a time of social and economic unrest. A small group of men, supported in secret by powerful financial and military interests, convinced enough insecure people that fascism would give them the things they wanted * * *.

At the very time that the Fascists proclaimed that their party was the party of the average citizen, they were in the pay of certain big industrialists and financiers who wanted to run the people with an iron hand.

The Fascists promised everything to everyone. They would make the poor rich and the rich richer. To the farmers, the Fascists promised land through elimination of large estates. To the workers they promised elimination of unemployment—jobs for all at high wages. To the small businessmen they promised more customers and profits through the elimination of large business enterprises. To big businessmen and the industrialist they secretly promised greater security and profits through the elimination of small business competitors and trade unions and the crushing of Socialists and Communists. To the whole nation they promised glory and wealth by conquest. They asserted it was their right, as a "superior people," to rule the world.

As soon as these methods had won them enough of a following to form their storm troops, the Fascists began using force to stifle and wipe out any opposition. Those who saw through the false front of fascism and opposed them were beaten, tortured, and killed.

The Fascists knew that all believers in democracy were their enemies. They knew that the fundamental principle of democracy—faith in the common sense of the common people—was the direct opposite of the Fascist principle of rule by the elite few. So they fought democracy in all its phases. * * * They played the political, religious, social, and economic groups against each other and seized power while these groups struggled against each other.

LITTLE BUSINESS BETRAYED

Question. How could the Fascists keep their contradictory promises, once they got in power? How did their program actually work out?

It was easy enough for the Fascists to promise all things to all people before they were in power. Once they were actually in power, they could not, of course, keep their contradictory promises. They had intended in advance to break some, and they did break those they had made to the middle classes, the workers, and the farmers.

As soon as the Fascists were in control of the government, the torturings and killings were no longer the unlawful acts of a political party and its hoodlum gangs. They became official government policy. Among the first victims of this official policy were those farmers, workers, and small businessmen who had believed the promises that had been made to them and who complained that they had been "sucked in." Some simply vanished. Often they came home to their families by return mail in little jars of ashes. * * *

The Fascists "solved" unemployment by converting their nations into giant war machines. The unemployed were either conscripted into the army or organized in labor battalions and put to work in war plants.

WHY FASCISTS ARE ANTI-UNION

Deprived of their unions, the working people could be driven to work longer and harder for less and less money, so that those who subsidized and ran fascism could grow richer. By wiping out all internal competition—especially the small medium-sized business firms—profits were increased still higher for the handful on top. In some cases, the fascists then gobbled control of the top corporations. The living standards of the masses of the people declined, of course. As they earned less and less, they were able to buy less and less of the goods they produced. * * *

Once the Fascists were in control of the government, not even the gang on top was safe from its own members. There would be more loot and power per Fascist leader if some Fascist leaders were eliminated. Some of the party "big shots," and some of those who had helped them take over were therefore purged. Many would-be partners in the dictatorship, including some industrialists, wound up in jail, in exile, or dead.

CAN IT HAPPEN HERE?

Some Americans would give an emphatic "no" to the question "Can fascism come to America after it has been defeated abroad?" They would say that Americans are too smart, that they are sold on the democratic way of life, that they wouldn't permit any group to put fascism over in America. Fascism, some might say, is something peculiar that you find only among people who like swastikas, who like to listen to speeche from balconies in Rome, or who like to think that their emperor is God. Their reaction might be that it is something foreign that Americans would recognize in a minute, like the goose-step. They might feel that we'd laugh it out of existence in a hurry.

UNITED STATES HAS 100 PERCENT AMERICAN FASCISTS

Question. Do all Fascists come from Germany, Japan, or Italy?

In a good many European nations, the people felt the same way some of us do: that fascism was foreign to them and could never become a power in their land. They found, however, that fascist-minded people within their borders, especially with aid from the outside, could seize power. The Germans, of course, made efficient use of fascist-minded traitors whom we have come to know generally as "the fifth column."

In France, which was considered a leading democracy of Europe, the betrayal was spearheaded by a powerful clique of native 100-percent "French" Fascists. Norway had its Quisling who was as "pure-blooded" a Norwegian as Laval was a "pure-blooded" Frenchman. The Netherlands' Musserts were "100-percent Dutch," Belgium's Degrelles "100-percent Belgian," and Britain's Mosleys "100-percent British." The United States also has its native Fascists who say that they are "100-percent Americans." There were native Fascists in the Philippines, in Thailand (Siam), in China, in Burma, in many other countries—all waiting to become willing puppets of the Axis. Not one of these Fascists is a foreigner who had to be imported from Germany, or Japan, or Italy.

Question. Have any groups in America used Fascist tactics and appeals?

Most of the people in America like to be good neighbors. But, at various times and places in our history, we have had sorry instances of mob sadism, lynchings, vigilantism, terror, and suppression of civil liberties. We have had our hooded gangs, Black Legions, Silver Shirts, and racial and religious bigots. All of them, in the name of Americanism, have used undemocratic methods and doctrines which experience has shown can be properly identified as Fascist.

CRACKPOTS AND ALLEGED SEDITIONISTS

Can we afford to brush them off as mere crackpots? We once laughed Hitler off as a harmless little clown with a funny mustache.

In January 1944, 30 Americans, many of them native-born, were indicted by a Federal grand jury on charges of conspiring with "the Nazi party to accomplish the objectives of said Nazi party in the United States." These objectives, according to the indictment, included undermining and impairing "the loyalty and morale of the military and naval forces of the United States." The case ended in a mistrial caused by the death of the presiding judge. The question of reindictment is still under consideration.

Whenever free governments anywhere fail to solve their basic economic and social problems, there is always the danger that a native brand of fascism will arise to exploit the situation and the people.

CAN WE SPOT IT?

Question. How can we identify native American Fascists at work?

An American Fascist seeking power would not proclaim that he is a Fascist. Fascism always camouflages its plans and purposes. Hitler made demagogic appeals to all groups and swore: "Neither I nor anybody in the National Socialist Party advocates proceeding by anything but constitutional methods."

Any Fascist attempt to gain power in America would not use the exact Hitler pattern. It would work under the guise of "super-patriotism" and "super-Americanism." Fascist leaders are neither stupid nor naive. They know that they must hand out a line that sells. Huey Long is said to have remarked that if fascism came to America it would be on a program of Americanism.

THREE WAYS TO SPOT UNITED STATES FASCISTS

Fascists in America may differ slightly from Fascists in other countries, but there are a number of attitudes and practices that they have in common. Following are three. Every person who has one of them is not necessarily a Fascist. But he is in a mental state that lends itself to the acceptance of Fascist aims.

1. Pitting of religious, racial, and economic groups against one another in order to break down national unity is a device of the "divide and conquer" technique used by Hitler to gain power in Germany and in other countries. With slight variations, to suit local conditions, Fascists everywhere have used this Hitler method. In many countries, anti-Semitism (hatred of Jews) is a dominant device of fascism. In the United States, native Fascists have often been anti-Catholic, anti-Jew, anti-Negro, antilabor, anti-foreign born. In South America, the native Fascists use the same scapegoats except that they substitute anti-Protestantism for anti-Catholicism.

Interwoven with the "master race" theory of fascism is a well-planned "hate campaign" against minority races, religions, and other groups. To suit their particular needs and aim, Fascists will use any one or a combination of such groups as a convenient scapegoat.

2. Fascism cannot tolerate such religious and ethical concepts as the "brotherhood of man." Fascists deny the need for international cooperation. These ideas contradict the Fascist theory of the "master race." The brotherhood of man implies that all people—regardless of color, race, creed, or nationality—have rights. International cooperation, as expressed in the Dumbarton Oaks proposals, runs counter to the Fascist program of war and world dominion. * * * Right now our native Fascists are spreading anti-British, anti-Soviet, anti-French, and anti-United Nations propaganda. * * *

3. It is accurate to call a member of a Communist Party a "Communist." For short, he is often called a "Red." Indiscriminate pinning of the label "Red" on people and proposals which one opposes is a common political device. It is a favorite trick of native as well as foreign Fascists.

Many Fascists make the spurious claim that the world has but two choices—either fascism or communism, and they label as "Communist" everyone who refuses to support them. By attacking our free enterprise, capitalist democracy, and by denying the effectiveness of our way of life they hope to trap many people.

HITLER'S RED BOGEY

Hitler insisted that only fascism could save Europe and the world from the "Communist menace." There were many people inside and outside Germany and Italy who welcomed and supported Hitler and Mussolini because they believed fascism was the only safeguard against communism. The "Red bogey" was a convincing enough argument to help Hitler take and maintain power. The Rome-Berlin-Tokyo Axis, whose aggressions plunged the world into global war, was called the "Anti-Comintern Axis." It was proclaimed by Hitler, Mussolini, and Hirohito as a "bulwark against communism."

Learning to identify native Fascists and to detect their techniques is not easy. They plan it that way. But it is vitally important to learn to spot them, even though they adopt names and slogans with popular appeal, drape themselves with the American flag, and attempt to carry out their program in the name of the democracy they are trying to destroy.

HOW TO STOP IT

Question. How can we prevent fascism from developing in the United States?

The only way to prevent fascism from getting a hold in America is by making our democracy work and by actively cooperating to preserve world peace and security.

Lots of things can happen inside of people when they are unemployed or hungry. They become frightened, angry, desperate, confused. Many, in their misery, seek to find somebody to blame. They look for a scapegoat as a way out. Fascism is always ready to provide one. In its bid for power, it is ready to drive wedges that will disunite the people and weaken the nation. It supplies the scapegoat—Catholics, Jews, Negroes, labor unions, big business—any group upon which the insecure and unemployed can be brought to pin the blame for their misfortune.

We all know that many serious problems will face us when the war is over. If there is a period of economic stress it will create tensions among our people, including us as returning veterans. The resentment may be directed against minorities—especially if undemocratic organizations with power and

money can direct our emotions and thinking along these lines.

CITIZEN'S JOB TO FIGHT FASCISM

The Fascist doctrine of hate fulfills a triple mission. By creating disunity, it weakens democracy. By getting men to hate rather than to think, it prevents men from seeking the real cause and a democratic solution of the problem. By fake promises of jobs and security, fascism then tries to lure men to its program as the way out of insecurity. Only by democratically solving the economic problems of our day can there be any certainty that fascism won't happen here. That is our job as citizens.

Citizenship in a democracy is more than a ballot dropped in a box on election day. It's a 365-days-a-year job requiring the active participation and best judgment of every citizen in the affairs of his community, his Nation, and his country's relations with the world.

Fascism thrives on indifference and ignorance. It makes headway when people are apathetic or cynical about their government; when they think of it as something far removed from them and beyond their personal concern. The erection of a traffic light on your block is important to your safety and the safety of your children. The erection of a world organization to safeguard peace and world security is just as important to our personal security. Both must be the concern of every citizen.

Freedom, like peace and security, cannot be maintained in isolation. It involves being alert and on guard against the infringement not only of our own freedom but the freedom of every American. If we permit discrimination, prejudice, or hate to rob anyone of his democratic rights, our own freedom, and all democracy is threatened.

What is true of America is true of the world. The germ of fascism cannot be quarantined in a Munich brown house or a balcony in Rome. If we want to make certain that fascism does not come to America, we must make certain that it does not thrive anywhere in the world.

Mr. Speaker, I only regret that the rules and regulations of the War Department precluded the naming of outstanding American Fascists, such as the Duponts, the Pews, the Girdlers, the Weirs, Van Horn Moseley, H. W. Prentis, Jr., Merwin K. Hart, and others, including the 30 Fascists charged with conspiracy and seditious activities and tried, but due to the untimely death of the trial judge, they are still at large.

Addresses of Gen. Carlos P. Romulo

EXTENSION OF REMARKS

OF

HON. C. JASPER BELL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. BELL. Mr. Speaker, I take pleasure in inserting into the RECORD, in order that Members of Congress and others may have the opportunity to read them, two speeches delivered by that silver-tongued Filipino voice of freedom, Gen. Carlos P. Romulo.

The first of these speeches was delivered by General Romulo on the occasion of the reestablishment of the Philippine Commonwealth in Manila, Malacanan Palace, February 27, 1945.

The other speech was delivered on March 2, 1945, by General Romulo over the Voice of Freedom on the occasion of his return to Corregidor.

These speeches follow:

DAY OF FULFILLMENT

(Broadcast delivered by Brig. Gen. Carlos P. Romulo, Resident Commissioner of the Philippines to the United States, on the occasion of the reestablishment of the Philippine Commonwealth in Manila, Malacanan Palace, February 27, 1945)

Today is for us a day of fulfillment.

Today the Philippine Commonwealth, founded in trust and loyalty, is reestablished on its unshakable foundations, in this, the capital city of the Filipino people.

This morning, President Sergio Osmeña, standing in historic Malacanan Palace, seat of Filipino sovereignty, received in the name of the Filipino people, from the hand which grasped the sword of liberation—the hand of Gen. Douglas MacArthur, the civil government of the Philippines.

After 3 long years of untold suffering, the Filipino people again know the heart-lifting feeling of freedom. After 3 long years of subjection, of stifling humiliation, they breathe again the air of liberty. The gratitude of a people, unlike that of an individual can never be adequately expressed. It is such a gratitude, beyond description, that they feel toward their deliveries, the American forces of liberation.

We enter our capital, the city of Manila, and we find a pyre of ruins and ashes—evidence of Japanese savagery at a new low. Cornered and at bay, the smashed remnants of Yamashita's defeated army, vented their spleen in an orgy of murder and destruction; leaving this our Pearl of the Orient a mound of wreckage for a hecatomb of helpless civilians.

But not even this dastardly crime of a Japanese soldiery committed in compliance with orders from Tokyo can daunt the people of the Philippines. After the fall of Bataan, this people, without food; its commerce ruined; its normal ccurse of living disrupted; its deepest spiritual sanctions violated—this people resisted the blandishments of Japanese duplicity, remained undaunted. As the weary months and years of subjection dragged on, this people, without arms, without ammunition, sometimes even without hope, still found the inner strength to resist Japanese brutality and terrorism, still remain undaunted.

Today, the wanton destruction of Manila before their eyes sharpens the determination which was inevitably born during those black years of subjection: The determination to carry the fight forward—across the northern seas—to the shores of the Japanese islands—to the heart of Tokyo itself.

With this in view I know I echo the ardent desires of my people when I ask, in their name, for the privilege—nay, for the right—of the Filipino soldier to share in the invasion of Japan.

The American people have given their dearest possession—the beloved youth of their land—as a sacrifice to liberate us from Japanese tyranny and oppression. We feel that gratitude for our liberation imposes on us, as men, the duty and obligation to march, arms in hand, beside America; to share in the burden which she has undertaken; to destroy forever, by a direct assault on that stronghold of tyranny, the standing menace to freedom that is the Japan of today. We feel; and we believe that the world should know, that Filipino gratitude is expressed not in words, but in deeds. We feel that it is our right to share in this task; and we ask for the privilege of fighting beside America.

To the people of America I say, this is for you, too, a day of fulfillment. The pledge, sealed in blood in the hills and along the shores washed by Manila Bay, has been redeemed. Bataan and Corregidor have been avenged. American honor has been vindicated.

To my people I say that the long, dreary night of our captivity has ended. A new day begins. There is work to be done—a man's work, on the battlefield and in the field of toil. Tyranny is to be destroyed, and the dwelling place of freedom, wantonly ravaged by the tyranny which hates freedom, is to be rebuilt. A people that through 3 hopeless years of darkness held fast to its loyalty to the heritage of freedom, will not fail to respond as loyally to the call to work—work with the armament of war in the necessary task of destroying tyranny, and work with the tools of peace to rebuild the House of Freedom. Filipinos all, let us to work!

RETURN TO CORREGIDOR

(Broadcast delivered by Brig Gen. CARLOS P. ROMULO, Philippines Resident Commissioner over the Voice of Freedom, March 2, 1945, on the occasion of his return to Corregidor with General of the Army, Douglas MacArthur)

Bataan is heroism, Corregidor is martyrdom.

Old names, but today they have new meanings. For we will never again hear the word "Bataan" but we will recall the unsurpassable heroism of our men who fought there. And we will never hear the word "Corregidor," but we will pause in reverence to the memory of our men who, with hope gone, everything gone but life and honor, did not hesitate to give up life.

I have seen Corregidor again.

With General MacArthur and those of his staff who were with him in those tragic days early in 1942, we returned yesterday to that rock where we had seen, and had been part of, the beginning of that drama of martyrdom. As our PT boat swept on, and as the stark outlines of the island and its brood of outpost rocks took shape before my eyes, a rush of memories flooded my thoughts; and I was again back in those grim days—amid the acrid fumes of cordite—the incessant reverberation of bomb bursts—the crash of falling masonry. I could feel that terrifying sense of entrapment that had come to us with the knowledge that the swaggering hordes of Japan were all about us—a yellow tide, irresistible, crawling slowly but inexorably closer.

We went ashore. I stood once more at the entrance to a familiar tunnel. In the semidarkness I saw the point within where once stood the radio broadcasting unit. From this unit there used to come the inevitably fading Voice of Freedom. The time was to come when that voice was to grow in volume and to resound again over East Asia. We knew this, then; but we did not know when it would come, or whether we should hear it. I saw again the place where once stood the dock from which we departed; the place which was really the beginning of the long, hard but glorious journey back to redemption and freedom.

Upon bomb-shattered topside I saw again the flagstaff, its frame bent, but still erect, still waiting for the flag that belonged on it; and I heard General MacArthur tell the commander of the men who had brought the flag back: "I see the flagpole still stands. Have your troops hoist the colors to its peak, and let no enemy ever haul them down."

These were words of joy and triumph, words that brought a throb to every heart on that sun-blistered plateau. But to me they also brought the memory of a great man, whom fate forced to drink the bitterest cup of all. It was the memory of the soldier who stayed to breast that crawling yellow tide. The heaviest burden was hit, but also the greatest honor—the honor of the rearguard that holds, and dies, that the greatest cause might

triumph. Lt. Gen. Jonathan Wainwright was the man who carried that burden. He bore the cross of defeat; he saw his flag come down. But because he did this we now see the sun of victory, we have seen the flag rise again, never to come down again.

And, as this memory of Jonathan Wainwright came to me, I sensed, amid that throng of the living about me, the near presence of my old comrades who had fallen there on the rock. They were beside me and around me, with their unshaven, mud-streaked faces, many with their bloody bandages, and all with that inextinguishable light of courage in their eyes. And I spoke to them; and I spoke the words I knew America and a liberated Philippines wanted me to speak. I said to them: "You who have fallen here that we the living might come back—you have never died. You shall never die. You live today under that flag that because of your martyrdom again waves over you. You live in the green buds that are now springing from this shell-blistered earth. You live in the thunder of those planes that at this moment, and within sight of your resting place, are avenging you. You live, and you shall forever live, in the bond that your sacred blood, your martyrdom of Corregidor, have sealed two free peoples."

The Polish Question

EXTENSION OF REMARKS

OF

HON. CHARLES R. CLASON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. CLASON. Mr. Speaker, under leave to extend my remarks, I include the following resolution of the Western Massachusetts Branch of the Polish American Congress adopted on April 8, 1945, at the Polish National Home in Chicopee, Mass.

This resolution indicates the great interest being displayed by American citizens of my district in the momentous Polish question. In order that the Members of Congress may know of the sentiments of this group, I am having it inserted in the RECORD so that all may see it:

Resolution of the western Massachusetts branch of the Polish American Congress adopted on April 8, 1945, at meeting of delegates at Polish National Home, Chicopee, Mass.

Whereas the decisions made at Yalta Conference destroy the independence of a faithful ally, Poland, by giving away half of its territory outright to Russia and by placing the remaining part under the domination of Russian puppet government, so-called Lublin regime;

Whereas the decisions made at the Yalta Conference violate the principles of the Atlantic Charter and four freedoms for the sake of power politics and political expediency;

Whereas the decisions at Yalta Conference violate the fundamental principles of democracy in international relations;

Whereas the decisions made at Yalta Conference are contrary to the American traditional respect for law and order since in matters pertaining to Poland they were made without knowledge and without consent of the legal, constitutional Polish Government in exile and without hearing the will of the Polish nation;

Whereas since the Yalta Conference the Soviet puppet regime in Poland has, with expert assistance of the Soviet political police, set up a reign of terror and has been liquidating by deportations or executions members of the Polish Underground Army who for 5 years have been fighting heroically the Nazis and rendered Allied Nations priceless military aid;

Whereas Poland who was the first to take up arms against the mighty Nazi aggressor, has fought against the common enemy on land, on sea, and in the air, from Narvik to Tobruk, from Cassino to Aachen and has borne sacrifices which exceed those of any other nation;

Whereas the world's peace based on fundamental justice and self-respect will be to the honor of Allied Nations, while peace based on appeasement, expediency and might well sow seeds of other, even more disastrous wars: Now, therefore, be it

Resolved, That we strongly condemn the partition and subjugation of Poland and we protest and bitterly resent the imposition of Soviet's agents, the Lublin regime, while legal, constitutional Polish Government, represents Poland and her people;

Resolved, That we petition the United States Senate to disaffirm that part of Yalta decisions which pertains to Poland since they violate the inalienable rights of man to life and liberty.

Resolved, That a copy thereof be sent to the Vice President, the Secretary of State, our Senators and Representatives and to the United States delegation to the San Francisco Conference.

RT. REV. BOLESLAW A. BOJANOWSKI,
Dr. KAROL SMOLCZYNSKI,
Atty. PAUL P. FLAK,
WACLAW J. SZEWCZYNSKI,
Committee on Resolutions.

Veterans' Legislation

EXTENSION OF REMARKS

OF

HON. C. JASPER BELL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. BELL. Mr. Speaker, letters come to my office daily making inquiry about veterans' legislation and the rights and privileges of servicemen generally. In an effort to be helpful to servicemen, their friends and families, I wish to insert in the RECORD a brief summary of some of the more important laws passed by the Congress pertaining to veterans' affairs. During 1943 and 1944 this Congress passed more than 50 bills relating to people in the service and their dependents. It was my privilege to support all of this legislation, realizing that much of it was imperfect, and that we would need to pass a great deal of perfecting legislation during the present Congress.

We realize, of course, that there is no way to compensate men disabled in the military service. There is no way to repay their families for anguish and suffering. A grateful country should never cease to help disabled veterans, their families and others who suffered other losses because of military service.

Recently there has been great interest and many inquiries as to the provisions of the so-called G. I. bill of rights. In order that there may be general knowledge of the provisions of this bill, as well as other legislation of benefit to veterans and their dependents, I am summarizing briefly some of the provisions of these laws.

Promptly upon his discharge there are a few things a veteran should do: First, report to his selective-service board in person or by letter within 5 days of his discharge. Second, apply for his old job within 90 days of his discharge. Third, pay the premium of his national-service life insurance in order to keep it in force. Fourth, put his records in order for the future. These records include his service serial number, discharge papers, disability claim number, insurance policies, social-security card, birth certificates of himself and his dependents, marriage certificate, any divorce decrees, last will and testament, selective-service registration card. I cannot lay too much stress on the importance of such records. Many a veteran's claim for compensation has been delayed because records were not in order.

MUSTERING-OUT PAY

A veteran, except one who falls within one of certain excluded groups, discharged under honcrable conditions, is entitled to receive mustering-out pay ranging from $100 to $300, depending on his length and place of service. A veteran discharged before the law was passed may obtain payment by applying to his own branch of the service, if his application is filed within 2 years from date of the Mustering-Out Payment Act of 1944, approved February 3, 1944.

SECURING A JOB

The United States Employment Service has offices throughout the country, and maintains a special representative in each office whose duty it is to assist veterans in finding suitable positions.

Those who were civil-service employees, other than temporary, at time of entry into the armed forces should apply to the agency where last employed within 90 days of discharge or to the Civil Service Commission in event difficulty is experienced in getting reinstated.

Those veterans who did not have civil-service positions but wish to enter the Government service will be given special preference in civil-service examinations. This preference is also extended to wives or widows of veterans under certain circumstances.

Virtually all the 30,207 apprentice-training programs in the United States extend opportunities to returning veterans. Veterans may be employed as apprentices and be paid as they learn, getting not only a steady job but training which will prepare them for skilled jobs. Information may be obtained from the United States Employment Service, War Manpower Commission, or the nearest facility of the Veterans' Administration, which for our section is the Veterans' Administration, 1009 Wyandotte Street, Kansas City 6, Mo.

VOCATIONAL TRAINING

A veteran who has a service-connected disability resulting in an occupational handicap can probably be taught a new type of work which will not be hindered by the disability. The Veterans' Administration is in charge of this training. If the disability is not service connected or occurs after discharge, vocational

training may be secured through the State board of vocational education, which is a Federal-State program, or the veteran may be entitled to education or training as hereinafter mentioned.

EDUCATION

Veterans who served on or after September 16, 1940, and prior to determination of the present war and who were discharged under conditions other than dishonorable after 90 days or more service exclusive of any period assigned for a course of education or training under the Army Specialized Training Program or the Navy college training program which course was a continuation of their civilian course and was pursued to completion, or the time assigned as a cadet or midshipman at one of the service academies, or who having served less than 90 days was discharged or released from active service by reason of an actual service-incurred injury or disability, are entitled to receive education or training if they were not over 25 at time of entrance into service, or, if over 25, can show that their education or training was interfered with by service, may be furnished a refresher or retraining course. Such education or training, or refresher or retraining course, must commence not later than 2 years after discharge or the end of the war, whichever is later.

The length of training consists of 1 year or its equivalent in continuous part-time study or for such lesser time as may be required for the course of instruction chosen by the veteran. If the veteran completes the course, except the refresher or retraining course, in a satisfactory manner, he will be entitled to additional education or training not to exceed the time he spent in active service—exclusive of the time assigned to the A. S. T. P. or Navy college program or the period he was a cadet or midshipman, as stated above. No course of training shall exceed a total period of 4 years.

For an ordinary school year the Veterans' Administration will pay up to $500 in tuition, fees, and certain other expenses for the education and training of a veteran. In addition, a subsistence allowance of $50 a month is paid the veteran with no dependent, and $75 a month to those with dependents.

UNEMPLOYMENT INSURANCE

Weekly allowances, not to exceed 52 in number, of unemployment compensation, known as readjustment allowances, are provided for eligible veterans of World War II who are unemployed, the number of weekly allowances being dependent upon the time spent in active service. If the veteran is entitled for the same period to an allowance or benefit under any Federal or State unemployment or disability compensation law, money received or accrued from such source is subtracted from the Federal allowance. Under the Federal plan, 8 weeks of allowance is payable for each month of the qualifying 90 days' service and 4 weeks' allowance is made for each subsequent calendar month of active service after September 16, 1940, up to a total limit of 52 weeks. Self-employed veterans are entitled to receive the difference between their net earnings for the month and $100.

LOANS TO VETERANS

The Veterans Administration will guarantee loans bearing interest not to exceed 4 percent obtained by veterans of World War No. 2 up to 50 percent of any such loan, provided the amount guaranteed may not exceed $2,000, and will pay the interest on the amount guaranteed for the first year. The applicant must show that the borrowed money will be used in purchasing a farm or farm equipment or business property, or for purchasing or repairing a home. Special provisions are made where a principal loan is approved by a Federal agency and the veteran is in need of a second loan to cover the remainder of the purchase price or cost, subject to the $2,000 limitation. Veterans eligible for loan guaranty benefits under the G. I. bill are eligible for loans under the Bankhead-Jones Farm Tenant Act under certain circumstances.

MEDICAL AND HOSPITAL CARE

Medical service, dental care, and hospitalization, including out-patient service, are provided if the veterans' condition was caused or aggravated by his service in the armed forces. Hospital treatment is also made available, within the limits of Veterans' Administration facilities, to all war veterans and certain peacetime veterans unable to pay the cost of treatment for disasbilities not shown to be due to service. Domiciliary care is also available under certain conditions in Veterans' Administration facilities.

DISABILITY COMPENSATION OR PENSION

Veterans discharged from the armed forces under conditions other than dishonorable and who have a disability due to service may be entitled to compensation or pension. The amount payable, based upon wartime service, ranges from $10 a month for 10-percent disability to $100 a month for 100-percent disability. Beginning June 1, 1944, these sums were increased by 15 percent. There are special rates and allowances ranging as high as $265 for specific injuries and more serious disabilities. The peacetime rates are approximately 75 percent of the foregoing rates.

NON-SERVICE-CONNECTED DISABILITIES

As distinguished from compensation or pension paid to veterans suffering from service-connected disabilities, pensions are payable to war veterans for non-service-connected disability. Such pension is payable to veterans of the Spanish-American War, Philippine Insurrection, Boxer Rebellion, World War Nos. 1 and 2 when the disability is held to be permanent and total, and provided the annual income of the veteran, if single, does not exceed $1,000, or, if married or with minor children, does not exceed $2,500. Service pensions, based upon permanent disabilities or age are also payable to veterans of the Indian Wars, Civil War, and Spanish-American War, including the Philippine Insurrection or Boxer Rebellion under various service pension laws.

SOLDIERS' HOMES

A veteran who is so disabled as to be unable to earn a living, and is without adequate means of support, may apply for admission to a national or State soldiers' home for disabled, of which there are many located throughout the country, where former members of the armed forces may live and receive care. Some of the State soldiers' homes admit the wives, widows, and children of veterans.

CIVIL RELIEF

The Soldiers' and Sailors' Civil Relief Act protects service men and women up to 6 months after their discharge by making it possible for the courts to suspend enforcement of certain civil liabilities during that time, such as law suits for collection of debts, contracts, repossession of property, collection of certain taxes, sale of property for taxes, eviction of dependents for nonpayment of rent, insurance premiums, and rights in public lands. Under this act the Veterans' Administration is authorized to guarantee premiums on commercial insurance policies carried by men in the armed forces up to a maximum amount of $10,000 insurance.

BURIAL

A sum not exceeding $100 may be allowed on the burial, funeral, and transportation expenses of a veteran of any war, discharged under conditions other than dishonorable, a veteran of any war in receipt of pension or compensation, a veteran discharged for disability incurred in line of duty, or a veteran receiving pension for service-connected disability. Men and women who die in line of duty while in the armed forces, and veterans whose last discharge was honorable are eligible for burial in a national cemetery. Under certain circumstances arrangements may be made for the burial beside him of his widow, and in some of these cemeteries for the burial of minor children and unmarried adult daughters. In most cases an American flag for draping the casket of a veteran may be obtained from the Veterans' Administration or any county seat postmaster.

Headstones are supplied for veterans, without charge, upon application to the Quartermaster General, United States Army, Washington 25, D. C.

DEPENDENTS' ALLOWANCES

Most people are familiar with the Servicemen's Dependents Allowance Act whereby the Government contributes to the support of dependents of enlisted men in the armed forces, and with the provisions of the law extending maternity care to the wife of any enlisted man in the service who is in the four lowest pay grades. Free medical and nursing care is provided for the wife and infant, and the baby is entitled to free medical care during the first year of life. The maternity-care program is administered by the various States.

PRISONERS AND MISSING IN ACTION

As long as a service man or woman is a prisoner of war or interned in a neutral country, or is listed as "missing" or "missing in action," and presumption of death has not been determined, dependents continue to receive family allow-

ances as previously, and any allotments that are for their support and have been so designated.

GRATUITY AND BACK PAY

When a man dies while in the armed forces a gratuity payment in an amount equal to 6 months' pay is made to the widow or children of the veteran or to a designated dependent relative, or other dependent relatives, subject to certain regulatory provisions of the service department concerned. The balance of any pay account remaining due a person who dies while in service is paid to the next of kin. Unpaid portions of mustering-out pay may be claimed by a surviving wife; if none, by surviving children; or if no surviving children, by a parent or parents.

INSURANCE

A serviceman may take out national service life-insurance policies in amounts not less than $1,000 in multiples of $500, up to $10,000. Upon the death of a person who carried Government insurance, the Veterans' Administration should be notified and will furnish the necessary blanks to the beneficiary named by the insured, or otherwise provided by law. Payments of this insurance are not made in a lump sum but in equal monthly installments, under one of two optional settlements, depending on the age of the beneficiary.

This insurance is originally issued on what is called the 5-year level-premium term plan. Any time after it has been in force a year, and before the 5 years are up, it may be converted into ordinary life, 20-payment life, or 30-payment life. The original policy must be converted before the expiration of the 5-year period in order to keep it effective. The new policy will have regular cash value after the first year from which a veteran can borrow if necessary. All veterans are urged to keep their insurance in force.

DEPENDENTS' PENSIONS

When a member of the armed forces dies in action or in line of duty, or a former serviceman dies as a result of service-connected disability, his dependents are entitled to compensation or pension benefits. The rates of these pensions, for wartime service-connected death, which are the same for dependents of veterans of all wars including World Wars Nos. 1 and 2, are as follows:

Widow, no child	$50
Widow, 1 child (with $13 for each additional child, the total not to exceed $100)	65
No widow, but 1 child	25
No widow, but 2 children (with $10 for each additional child, the total not to exceed $100)	38
Dependent father and mother:	
Each	25
Or 1 only	45

The rates payable to the widow, child or children, and dependent parent or parents of any veteran whose death resulted from service-connected disability based upon peacetime service are as follows:

Widow, no child	$38
Widow, 1 child (with $10 for each additional child, the total not to exceed $75)	49
No widow, but 1 child	19
No widow, but 2 children (with $8 for each additional child, the total not to exceed $75)	$28
Dependent mother and father:	
Each	20
Or 1 only	30

The widow and minor children of any deceased veteran of World War No. 1 or World War No. 2 who was released from active service under conditions other than dishonorable after serving 90 days or more, or for disability incurred in the service in line of duty, and whose death was not due to service, are also entitled to pensions. In World War No. 2 cases, there is a requirement that the veteran must have had a service-connected disability at time of death. Rates of these pensions are as follows:

Widow, but no child	$35
Widow, with 1 child (with $5 for each additional child)	45
No widow, but 1 child	18
No widow, but 2 children (with $4 for each additional child, the total amount to be equally divided)	27
No widow, but 3 children (with $4 for each additional child, the total amount to be equally divided)	36

Payments are limited to an aggregate of $74 in any one case.

Under Public Law 312, Seventy-eighth Congress, approved May 27, 1944, the monthly rates of compensation payable to widows and children of veterans of World War No. 1 for non-service-connected death, under Public Law 484, Seventy-third Congress, June 28, 1934, as amended, were increased, and the benefits of that law were extended to widows and children of veterans of World War No. 2. Public Law 484, Seventy-third Congress, as amended, provided compensation for non-service-connected death for the widows and children of deceased World War No. 1 veterans but required that the veteran must have had a service-connected disability at time of death.

Public Law 483, Seventy-eighth Congress, approved December 14, 1944, removed this requirement in World War No. 1 cases but continued this requirement as a condition prerequisite to payment of pension for non-service-connected death in World War No. 2 cases.

Another important change in existing legislation accomplished by enactment of Public Law 483, Seventy-eighth Congress, was the change in the delimiting marriage date as applied to widows of veterans of World War No. 1. Prior to this act the widow of a veteran of World War No. 1 was defined as a woman who married the veteran prior to May 14, 1938. This term is now defined to mean a woman who was married prior to December 14, 1944, for 10 or more years to the person who served. As a result of this liberalization of the delimiting marriage date, many widows of veterans of World War No. 1 who were married subsequent to May 14, 1938, will be eligible for pension for non-service-connected death if otherwise eligible.

Widows and children of veterans of the Indian Wars, Civil War, Spanish-American War, including the Philippine Insurrection and Boxer Rebellion, are also entitled to pension for non-service-connected death under the various service pension laws. The monthly rate for a widow is $30, increased to $40 at age 70—or at age 65 in Spanish-American War cases, including the Philippine Insurrection and Boxer Rebellion—and $50 if the widow was the wife of the veteran during the period of his war service, with $6 monthly for each child. The monthly rate for one child, if there is no widow, is $36 with $6 per month for each additional child. In Spanish-American War cases, the rates for children beyond age 16 to 18 years, or to age 21 if pursuing a course of instruction in an approved educational institution, are those set forth above for World War No. 1, non-service-connected death.

I count it a privilege to be of all possible assistance to all veterans or their dependents. Please write me about your problems, or address your inquiries to the Veterans' Administration, 1009 Wyandotte Street, Kansas City, 6, Mo., whose duty it is to furnish veterans with full information about their rights and privileges.

President Truman's Approval of Lend-Lease

EXTENSION OF REMARKS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, one of the first major pieces of legislation signed by our new President was the extension of the Lend-Lease Act recently passed by Congress.

This bill, H. R. 2013, was signed by the President on April 17, and at the time of his doing so he issued a statement which is significant, and under leave granted, same is submitted herewith:

STATEMENT BY THE PRESIDENT ON SIGNING THE THIRD LEND-LEASE ACT

This is the third time that the Lend-Lease Act has been extended by the Congress—each time by overwhelming majorities.

This mighty instrument for victory is one of the growing monuments to the boldness, imagination, and effective statesmanship of Franklin Roosevelt.

At a critical time in the history of this country, he saw the vital need for aiding those who were fighting against Axis aggression and oppression all over the world.

The wisdom and effectiveness of that vision are being shown every day on the battlefronts all over the world.

On the western European front—the British, the French, the Dutch, the Belgians and other Allied forces have been equipped in part with lend-lease guns and other munitions; and, shoulder to shoulder with our men, are fighting their way into the heart of Nazi Germany.

In Italy—American, British, Polish, Brazilian and other Allied armed forces are joined in a common effort to speed final victory.

On the eastern front—the Soviet forces, aided by lend-lease supplies, are striking blows which are breaking the back of Nazi military power.

In the Far East—the Chinese, the British, the Australians, the New Zealanders, the Dutch and other fighting allies, have joined with us in a combined attack which is now beating at the doors of Tokyo.

Lend-lease has been an effective instrument to help assure a complete United Nations victory with the least cost in American and Allied lives.

Lend-lease will be carried on until the unconditional surrender or complete defeat of Germany and Japan.

Franklin Delano Roosevelt—A Memorial Address by Gov. Robert S. Kerr, of Oklahoma

EXTENSION OF REMARKS

OF

HON. A. S. MIKE MONRONEY

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. MONRONEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to call the attention of the Congress to the memorial address delivered by Hon. Robert S. Kerr, Governor of the State of Oklahoma, before a joint session of the Oklahoma Legislature, April 13, 1945. The joint session was to hold memorial services for our late President, Franklin Delano Roosevelt.

Governor Kerr's address follows:

Mr. President of the Senate, Mr. Speaker of the House, ladies and gentlemen of the joint session, and my fellow Oklahomans, President Franklin Delano Roosevelt is dead.

The words reverberate like thunder rolling amid mighty mountains.

Their impact is felt around the world.

The ranks of the Big Three are broken.

There is sorrow in the Kremlin where Joseph Stalin, directing Russia's mighty war effort realizes that Roosevelt is dead.

There is sorrow in Whitehall and at No. 10 Downing Street where Winston Churchill contemplates the onrushing sweep of democracy's fighting forces on the western front and knows that his most stalwart comrade is gone.

There is sorrow in Chungking as the Generalissimo and Mme. Chiang Kai-shek feel the shock of a loss not only to themselves but also to their people.

There is grief in the hearts of the leaders of every nation on this earth who are striving and fighting for freedom.

There is lamentation from where the shadows of Chapultepec fall across the palace of President Avilla Comancho, all along the Isthmus, and from Panama to where the southern peaks of the Andes rear their snow-capped heads above the waters of Cape Horn.

There is deep sorrow in far-off Australia, in New Guinea, in the lands which still writhe under the heel of the loathed Jap invader; in the Philippines, whose coral strands reflect the rays of sunlight which had been in eclipse but which have returned.

The symbol of their liberation is dead.

There is sorrow in the hearts of our military commanders, as the greatest generals and admirals of America's proud history weep unashamed at the bier of their fallen Commander in Chief.

Roosevelt is dead!

The hearts of the people of America are heavy as they bid farewell to their beloved President.

A shadow has fallen across the hearth of every American home, of the rich and of the poor.

American workers will make a greater effort today in tribute to the sacrifice of the life of the best friend they ever had.

The farmers of America will raise their sights and increase production goals in loving recognition of the supreme sacrifice made by the champion who advanced their welfare more than any other.

The rank and file of American citizens wherever they are will work a little harder and dedicate themselves anew in honor of the heroic death of the great leader they loved so well.

The aged stand with heads bowed and bared as they mourn the passing of one who implemented his affection for them by bringing to them an economic security they had never known and which, without him, they would not have.

The fighting men and women of America around the world, on the sea, on the land, and in the air, will surge forward with greater resolve and greater power, inspired by the heroic death of their matchless Commander. They will rededicate themselves, that they may insure winning the objectives which were so dear to him and which they had expected to win with him.

His most fitting monument is in the hearts of the people who loved him, as he loved them, and who will cherish and treasure his memory until time ripens into eternity.

But, my fellow Americans, in the darkness of our sorrow the light of gratitude and determination breaks upon us.

We are grateful that Franklin Delano Roosevelt has lived.

We are thankful that his genius led us out of the Nation's greatest depression.

We are happy in the knowledge that his transcendent courage and brilliance have led us through the danger and the carnage of the most terrible war in history, until today, we, with our brave allies, have achieved victory over Germany, and know that we and they are likewise winning certain victory over Japan.

We are grateful that his spirit will lead us patiently, but surely, in achieving an abiding peace. We can never be thankful enough that he was willing and able to give all that he had in the service of his country and that the security and welfare of his people were more precious to him than his life.

We will meet the crisis brought about by his death in the light of the examples he gave us while he lived.

Do you remember the fateful morning of March 4, 1933?

Let the words of courage which he spoke then challenge us anew:

"Nor need we shrink from honestly facing conditions in our country today. This great Nation will endure as it has endured, will revive and will prosper.

"So first of all let me assert my firm belief that the only thing we have to fear is fear itself.

"In every dark hour of our national life a leadership of frankness and vigor has met with that understanding and support of the people themselves which is essential to victory. I am convinced that you will again give that support to leadership in these critical days."

Do you remember his courage, his superb confidence, and his infinite faith as he stood before the joint session of the National Congress after Pearl Harbor and called America to arms to meet the challenge of Japanese aggression, in these words:

"No matter how long it may take us to overcome this premeditated invasion, the American people, in their righteous might, will win through to absolute victory.

"With confidence in our armed forces, with the unbounding determination of our people, we will gain the inevitable triumph, so help us God."

We face our future today in the light and inspiration of his words spoken to the Congress and to the Nation on January 7, 1943:

"Therefore, let us, all of us, have confidence, let us redouble our efforts.

"A tremendous, costly, long-enduring task in peace as well as in war is still ahead of us.

"But, as we face that continuing task, we may know that the state of this Nation is good, the heart of this Nation is sound, the spirit of this Nation is strong, the faith of this Nation is eternal."

We are richer far than we have ever been in every phase of our national life by reason of his life and service, and of the giving of his life to his country's cause.

We will honor him by giving our confidence and full support to and by holding up the hands of his successor, Harry S. Truman, of Missouri, who is today President of the United States.

We will follow the example of Franklin Delano Roosevelt by rededicating all that we have and all that we are to completing the unfinished task that is ahead.

With an even greater unity among us because of his sacrifice, with steadfastness of purpose worthy of the ideals for which he lived, America moves majestically and irresistibly forward and upward to her greatest destiny.

United States Merchant Shipping

EXTENSION OF REMARKS

OF

HON. RICHARD J. WELCH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. WELCH. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include an article which recently appeared in the Army and Navy Journal. This article speaks for itself and every Member of Congress interested in the maintenance of an adequate American merchant marine should read it:

Lewis Douglas, who was Deputy Administrator of War Shipping in 1942 and 1943, publishes in the April issue of the Atlantic Monthly an article proposing that the United States sell or lease to friendly maritime nations all of our war-built fleet at "nominal prices" or "nominal rentals," and that the American merchant fleet be reduced to the 10,000,000 dead weight tons it totaled before this war.

The arguments and conclusions with which he supported this startling proposal are challenged by Government officials and shipping men familiar with the facts. For example, he set up as his thesis the statement that "it is urged by some that the United States in the future maintain a huge merchant marine." As a matter of fact, although the United States will have by the end of this year a war-built tonnage of 40,000,000 gross or 60,000,000 deadweight tons, as against about 10,000,000 deadweight tons before the war, no serious official or shipping man has proposed that anything like the total tonnage should be maintained in active operation. Admiral Land has suggested from fifteen to twenty million deadweight tons, mostly of the fast-cargo ships and tankers, with appropriate passenger types. Yet, Mr. Douglas repeatedly referred to the "huge" merchant marine and finally made the unsupported statement that a fleet of 20,000,000 tons would cost from two hundred to three hundred million dollars a year in operating subsidy alone, an estimate which authorities at the Maritime Commission declare a fantastic overestimate, since a substantial part of whatever merchant marine the United States maintains will be in coastwise trade and therefore not eligible

to operating subsidy. Another substantial part will consist of tankers not eligible to subsidy and a part of the fleet operating in foreign trade will probably not require subsidy. For a total of 16,000,000 tons the subsidized portion would, in the opinion of competent shipping men, require not more than $40,000,000 a year in operating subsidy. It is impossible at this time to estimate the precise amount by which American operating cost will exceed that of foreign vessels, which is the measure of operating subsidy.

The national defense need of a substantially larger merchant fleet than we had before the war is only slightly acknowledged by Mr. Douglas who proposed to meet it, not by maintaining a substantial active American merchant fleet with trained personnel from the 200,000 officers and men now serving our merchant fleet with an efficiency which our Army and Navy leaders have enthusiastically acclaimed. Mr. Douglas proposes that when we sell or lease our ships to other nations, we will arrange that they be given back to us if we are threatened by war.

The article is replete with errors, such as listing the Liberty ships as of 10-knot speed, when their performance ranges upward of 11 knots. Also a grave error is his declaration that the British merchant marine has suffered losses reducing it by one-half, whereas Britain has nearly regained her pre-war tonnage and the total shipping of the British Empire exceeds pre-war figures.

Although the pre-war American merchant fleet was requisitioned 100 percent, ships, personnel, and management, by the Government and the privately owned American shipping companies have been the actual operators, under Government direction, of the ever-growing merchant fleet, Mr. Douglas utters no word of commendation for the service rendered by the merchant marine. In fact, he deprecates the possibility that the United States has been in modern times, or can be in the future, a competent maritime nation, although it is a fact that the American merchant fleet of 10,000,000 dead-weight tons was second in size only to that of Britain.

Mr. Douglas pictures shipping as a source of difficulties between nations if it is subsidized, ignoring the fact that, in the form of preferences and otherwise, the British and other governments have always provided certain advantages for their own shipping, even if they did not take the form of money payments. He repeats the exploded theory that other nations derive a large part of their national income and of their purchasing power for imported merchandise from shipping earnings, whereas the Department of Commerce has officially published the fact that pre-war shipping earnings provided only 1.3 percent of the British national income; with other maritime nations only slightly higher, Norway was the only nation deriving a substantial part of its national income from shipping earnings, namely, 11 percent. (These facts are set forth in an article by John S. Smith of the Department of Commerce, entitled "World Income From Shipping," an official publication.)

Mr. Douglas enthusiastically supports the contention that if a larger American merchant marine should reduce the earnings of foreign shipping derived from carrying our trade, our own economy would be pretty well wrecked. However, factual analysis demonstrates that in the 20 years, 1913–33, the net balance derived by foreign countries from shipping services to the United States amounts to only approximately 1 percent of the value of our exports during that time.

All of the foregoing is by way of background for a notable and statesmanlike utterance from Fleet Admiral Ernest J. King, warning the country that it must not dissipate its seapower, including merchant shipping. It was significant that Admiral King chose to make this statement in specific terms at a dinner of the Academy of Political and Social Science in New York City on April 4, at which Mr. Douglas presided as president of the academy.

It was a sharp contradiction of Mr. Douglas' proposal. Briefly, Admiral King declared that "lack of ships was one of our pre-war weaknesses"; that lack of ships had retarded the impact of our armed services overseas and on the sea; and that only when this was corrected by the magnificent shipbuilding effort which the United States belatedly put forward were our military objectives attained and eventually brought near. Admiral King's address brings down to date the basic exposition of the lessons of seapower which Rear Admiral Alfred T. Mahan, United States Navy, made in the nineties. Admiral King, in no less powerful terms, has brought into the seapower equation the submarine and the aircraft which did not exist in Mahan's day. Mahan declared that merchant shipping and personnel was an indispensable element in seapower.

Fleet Admiral King's declaration was a challenge to Mr. Douglas' proposal that we go back to the pre-war merchant shipping status which Admiral King declares and demonstrated was inadequate for either defense or commerce and which he prayed his fellow citizens to avoid in the future.

Briefly, Mr. Douglas decries the operating subsidy necessary to offset the higher cost of operating American ships. He says they will create frictions with other nations. Yet, he proposes to subsidize foreign merchant fleets against us by selling or leasing them ships at nominal price. He proposes to thus force the American merchant fleet back to the 10,000,000-ton size which proved inadequate for both commerce and defense before this war and which Admiral King warns his countrymen must not happen again.

Longevity in South Dakota

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. MUNDT. Mr. Speaker, under leave granted me by the House, I call attention herewith to a recent editorial appearing in the Daily Argus Leader of Sioux Falls, S. Dak., pointing out that the most recent health statistics of this country show that South Dakota has the lowest mortality rate and the highest longevity rate of any State in the Union. Thus is disproved for once and for all the old fable that only the good die young.

The good people of South Dakota, Mr. Speaker, live long and stay well because residence in the Sunshine State of South Dakota gives them much to live for and an abundance to live with.

A year ago, South Dakota was second in the list of most healthful States in the Union. It was exceeded only by its sister State of North Dakota. I used to believe that North Dakotans lived longer than South Dakotans only because they held on to life's tender strings more vigorously with the hope that if they lived long enough they might some day be fortunate enough to move down to South Dakota. Apparently that hope has either been achieved or else it has been dissipated because South Dakota now outranks North Dakota in healthfulness although our sister State retains its place on the honor roll among the first five.

Returning war veterans, workers leaving war industries, young people fresh out of college and old people seeking peace and prosperity for their declining years would do well to look to South Dakota as a possible home for after the war. Here is a State with no income tax laws, with no State tax on real estate, with vast opportunities and a friendly, healthful climate. Here is a State kissed by Nature and nourished by Providence where good health abounds and whose people manifest a hospitality exceeded only by their optimism.

When Horace Greeley said, "Go west, young man," it seems increasingly evident that South Dakota was the destination which he had in mind:

LONGEVITY

A current bulletin from the Metropolitan Life Insurance Co. presents statistics to show that South Dakota has the lowest mortality rate in the Nation with 7.9 deaths in each 1,000 of population annually.

Other States below 9 per 1,000 but above the South Dakota figure are Minnesota, Iowa, North Dakota, Nebraska, Kansas and Oklahoma.

This group constitutes States that are in the mid-central part of the United States.

South Dakota, of course, is proud to head the list and naturally interprets the statistics as a tribute to its excellent climate, its variable seasons and its constructive way of life.

Hog-Pork Situation

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement issued by the St. Louis Live Stock Exchange, National Stock Yards, Ill.:

HOG-PORK SITUATION

The hog-pork situation in the United States has reached a critical stage. Due to various causes, both natural and artificial, the Nation's hog supply has been reduced so drastically that constructive steps should be taken immediately to repair damage done and start production of hogs on the upgrade. This is a very vital matter affecting the farmers who raise and feed the hogs, the civilian population dependent upon an adequate supply of pork and lard, the armed forces abroad who must have sufficient supplies, and the growing hosts of refugees, etc. We have two specific suggestions to offer and will greatly appreciate your help in endeavoring to interest and influence the O. P. A. and W. F. A. in carrying these out. These are the two Government bureaus whose conflicting rules and orders have been partially responsible for the acute hog and pork shortage and they are the bureaus that have the authority and the power to remedy the situation along the lines we suggest. Our proposals are:

I

That the War Food Administration immediately increase the price guaranty or

"floor" for barrows and gilts, 180 pounds up, to $13.75 Chicago basis, same as a year ago, this to be continued in effect until at least March 31, 1946. Our firm belief is that this will greatly stimulate hog production. If a hog surplus is created next winter or spring, the Government could well afford to make good the support price, as the monetary loss would be inconsiderable in comparison with packer subsidies, etc., now being paid.

II

Our second suggestion is that the O. P. A. immediately take steps to stop the diversion of hogs away from regular terminal market channels by establishing larger ceiling differentials for the markets. This will send a larger volume of hogs to the open public markets, giving the Federal inspected packing houses an opportunity to buy more hogs than they now obtain. At the public terminal markets, the Government has every necessary facility and personnel already established to regulate the flow of livestock through the markets and make it available to the slaughterers that operate under Federal supervision.

To substantiate our statement that the diversion of hogs away from terminal market centers is of great volume, we call your attention to the fact that Government figures show that a total of approximately 8,566,000 hogs were slaughtered under Federal inspection in the United States for the 2 months of January and February 1945 combined, this representing a 44 percent shrinkage from the same period in 1944. Hog receipts at the 12 principal markets of the United States for the first 2 months of 1945 totaled approximately 2,491,000 head, representing a drop from their combined receipts, same 2 months in 1944, of 58 percent.

If the situation is to be relieved, action must be taken immediately by the W. F. A. and O. P. A.

ST. LOUIS LIVESTOCK EXCHANGE.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. WILLIAM J. GREEN, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. GREEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

Whereas in His infinite wisdom Almighty God has seen fit to take from this world its outstanding citizen the President of these United States, Franklin Delano Roosevelt; and

Whereas the untimely death of our peerless leader is mourned by all the peace-loving peoples of the entire world; and

Whereas we the members of the Thirty-fifth Ward Democratic Club of the City of Philadelphia particularly mourn his loss because the entire history of our organization is entwined with the years during which he was at the helm of our Ship of State, and throughout that period we supported him whole-heartedly as we appreciated his greatness during his lifetime rather than await future historians to measure his greatness: Now, therefore, be it

Resolved, That the Thirty-fifth Ward Democratic Club of the City of Philadelphia join the peace-loving peoples of the world in mourning the loss of one who so ably fought and died for the oppression of aggression and the establishment of a just and lasting peace; and further be it

Resolved, That this Resolution be spread upon the minutes of this meeting and made a permanent record of this organization; and further be it

Resolved, That a copy of this resolution be forwarded our Representative in Congress with the request that it be published in the CONGRESSIONAL RECORD.

President Truman

EXTENSION OF REMARKS

OF

HON. C. JASPER BELL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. BELL. Mr. Speaker, last Sunday the New York Times and other newspapers throughout the country carried a story from the pen of my fellow Kansas Citian, Mr. Roy Roberts, managing editor of the Kansas City Star, about the great Missourian, President Harry S. Truman.

For many years Mr. Roberts was one of the outstanding Washington correspondents and served as preseident of the Gridiron Club here. From that wealth of experience in national affairs and from his personal knowledge of President Truman from the days when he was an official of Jackson County, United States Senator, and Vice President, Mr. Roberts has painted one of the best pictures of the abilities of our new President.

While the shock of the death of President Roosevelt was a stunning blow to the Missourians I met while at home recently, they unanimously expressed confidence in the abilities of President Truman to carry on successfully for the best interests of all Americans. Those appraisals came from men who knew Harry Truman, the man, and his public career.

Because Mr. Roberts' article summarizes so capably the feeling of the people of Missouri I wish to insert it into the RECORD at this point. The article reads as follows:

TRUMAN TO SHELVE PERSONAL RULE; SENATE WILL BE HIS ADVISER—WILL DIFFER SHARPLY FROM ROOSEVELT SET-UP, FELLOW MISSOURIAN SAYS—MANY NEW FACES DUE TO APPEAR IN CAPITAL

(By Roy Roberts)

WASHINGTON, April 14.—What may the Nation expect from its new President? For the time being, simply carrying on.

The Nation may take confidence on that score. Harry Truman, the new President, is no man to rock the boat. He's not as cautious as Calvin Coolidge, who took office under somewhat similar circumstances more than two decades ago. But he has the innate, instinctive conservatism in action of the Missouri-bred countrymen. They want to know where they are going before they leap. And they are not fond of leaping just for the pleasure of headlines.

It may be forecast with considerable certainty—not from what the new President has said but because of knowledge of the man—that after the address to Congress Monday and the speech to the servicemen overseas Tuesday night, there will be silence from the White House for many days and lots of silence. The country will have opportunity to settle down, accept the change, and find that it can, and still is, functioning without a Roosevelt in the White House.

The new President is taking over a going concern. Each department or bureau head will be expected to go ahead and run his show. If they make good, fine. If they come a cropper—well, Truman is not the sort who will hang to them long. There won't be any setting up of new bureaus or commissions to supplant the old to save face. There will be many new faces in Washington. As a result, Cabinet and department heads are more on their own right today than any time since the gradual but steady concentration of all power and all final action in the White House made the Government practically a one-man or personal government.

SHARP SHIFT IS FORECAST

It's been written so often already in the past 48 hours it has become almost bromidic. But the real significance will be the shift from personal government back to what is called, for lack of any better term, constitutional government, or government by consultation.

What does all this mean to the Nation?

Primarily, the biggest thing is that the seat of power shifts from the Hudson River to the Missouri River. That's an easy way of describing it and it carries many implications. Through the years of F. D. R. the Cabinet and most of the controlling department heads gradually became New Yorkers or closely allied to New York or the East.

There were exceptions, of course, but most of those who sat in the seats of the mighty were Roosevelt intimates, men or women he knew how to deal and work with. It was natural. The late President probably didn't recognize, himself, how narrow the circle had become in recent years, with the stress and worry of global war.

But slowly the West and South were out of the picture and not only the so-called palace guard but nearly all those in seats of power were eastern—in viewpoint, at least. PM, a left-wing newspaper in New York with small circulation; The Nation; the New Republic were the gospels of the New Deal. And few over the country at large read them or had heard of them—that is the public, at large. They were bibles in Washington, D. C.

WILL BE SLOW TO MOVE

The new President will be slow to move. But when he does move it will mean new geographical faces—at least in the Nation's Capital. Harry Truman is not unsocial in his political objectives by any means. But he is an entirely different type from the late President. He doesn't know nor did he circulate in the same circles F. D. R. did. His closest friends are two types, the home folks from back in Missouri; the national friends he made are confined almost exclusively to Capitol Hill. That's why, when changes come in the Cabinet and places of power, President Truman will turn to the Senate or House for them or for recommendations. They are the people he knows best and depends upon.

What are vital differences between Roosevelt and Truman in breeding and make-up?

Roosevelt was essentially the brilliant patrician. The conservatives said he turned on his class, which was bunk. Roosevelt had great gifts as a political leader. Few could sense what the man in the street thought as he did, in spite of his Groton tie and exclusive bringing up. But, always, he was the patrician, which was why he could understand and get on with Churchill, the brilliant Britisher, so well. They were blood brothers, one working the liberal side of the street, the other clinging to conservatism.

Harry Truman is as far apart from both Roosevelt and Churchill as Hyde Park is from Independence, Mo. The new President is the average man. He has plowed corn—

and his mother bragged he plowed a straight row; he sold haberdashery, and failed at it. He worked in a mailing room. He fought bravely in his country's war. Then he started climbing the ladder in politics, with a political machine, his sponsor, as the worst handicap to overcome in any possible climb to the Presidency.

REAL STORY OF DEMOCRACY

What a story in democracy, that a man approaching 40 and still looking at the rear of a horse as he plowed the corn rows, apparently not a success in life, just a little less than 20 years ago, should find himself today President of the greatest and most powerful nation on earth. The average man who became President in one of the great crises of the world. What a test of democracy if it works. And the sheer fact he is this average man, understands the average man and his quality, is probably Truman's greatest asset as he undertakes these new overpowering responsibilities.

There won't be the color, the drama nor the personal leadership that Roosevelt gave. But President Truman, shy but not afraid, believes that our system of democracy means drawing strong men together, applying common-sense decisions and that the country can and will carry on successfully. He will go up or down these next few years upon his ability, not to make correct decisions but his ability to resist the sinister pressure groups that always descend upon every occupant of the big White House on Pennsylvania Avenue.

What sort of a man really is Truman?

Humility probably would be his first characterization. Then loyalty, perhaps excessive loyalties that sometimes get high officials in trouble; common sense; deep patriotism; and above all an abiding faith in his country and its democratic system. Harry Truman couldn't go in for personal government under any circumstances. He doesn't believe in it or wouldn't know how to operate.

DEEP FAITH OF COUNTRY MAN

Scratch under the hide of the new President and you will find not a politician, a statesman, nor a man with overweening ambition, but a country man with deep faiths. The country thinks of Truman as a Kansas Citian. He isn't. He's a rural Jackson Countyite—down where they really fought the Civil War.

The offspring of a Confederate veteran, he is really more southern in viewpoint than midwestern. A Baptist, once Grand Master of his Masonic Lodge of Missouri, he will think as the average man does, at least outside the big cities. If he develops a weakness, it will be in not always understanding the newly aroused mass consciousness of industrial labor.

In the Senate Truman's closest friendships were with the Old South. Back home, his closest friendships were with the old Battery B of the One Hundred and Twenty-ninth Field Artillery, the men with whom he fought in France. It is entirely possible that this feel of the average man may make him a mighty leader for his Nation in the years just ahead.

The city's official tribute was complete change in tempo. It will get it in Truman. Harry Truman hasn't got a really deep-seated enmity in Washington. This capacity for making friends made him the common denominator at Chicago in a bad situation politically for the administration. It put him in the White House. It may bring about a smoother working combination in Government.

What Cabinet changes will Truman make?

None for the present unless forced to, by resignations insisted upon. Most of the old palace guard Roosevelt relied upon will go in time. Then on Capitol Hill will be the new President's closest advisers. There will be a return of an era of good-will between the lawmakers and the Executive side of Government. Francis Biddle, as Attorney General, Morgenthau, as Secretary of Treasury, Mrs. Perkins, as Secretary of Labor, are those most apt to go first.

The new President, aside from calling Jimmy Byrnes back to his side, has not even given thought to changes. If he had a new Treasury head to pick he likely would take a man of the type of Senator WALTER GEORGE, of Georgia. John W. Snyder, executive vice president of the First National Bank, in St. Louis, is mentioned by some as having the call for the post of handling the R. F. C. billions. Byrnes, whom the President regards as the ablest man in public life, will be the figure around whom any new administration will build.

MUST HAVE OWN PROGRAM

It's all well and good to say as Truman did that he wants to carry on the Roosevelt program. He does. But short of 82 days, the new President will occupy the White House a full term. He can't just carry on. He must and will develop a Truman administration and a Truman program. All political bets as to '48 are off with the change. If he wants reelection, the party will have to take him or repudiate not just a short carry-on but a full administration.

Loyalty is one of his outstanding characteristics. On war and on peace he will attempt to carry to a successful conclusion what his predecessor began and bequeathed him. Truman saw eye to eye with Roosevelt on both war and peace. On post-war plans for the country any Roosevelt plans will be tempered by the innate conservatism of the Missourian.

On labor, the new President will be sympathetic and understanding. He has always had labor's support. But again, his program is apt to be tempered by his Midwest agrarian upbringing. He will be a party man, but he will work closely even with the Republican leaders on Capitol Hill. Senator ARTHUR VANDENBERG, of Michigan; Representative JOE MARTIN, House Republican leader; and Representative JAMES W. WADSWORTH are close friends. Power and decision will divide between Capitol Hill and the White House.

THE PARLEY ON WEST COAST

What about the San Francisco Conference which opens April 19?

That's the worst hurdle Truman faces and he realizes it. Roosevelt had all the strings in his own hand and expected to run the American policy and make his influence felt among the other nations of the world.

Suddenly, everything has been dumped in the new President's lap without facts, information, and the little side agreements that may exist. Truman intends to give the American delegation to San Francisco, headed by Secretary Stettinius, full and complete authority to handle. If they come to an impasse where a decision is needed, he will make it and will have Byrnes, who accompanied Mr. Roosevelt to Yalta, at his side for counsel. It is unfortunate the new President did not have more time to prepare, but the bold decision was made to go ahead, that the world might not think the tragic death of Roosevelt had changed our policy.

How is the country reacting to the new President?

Except for the San Francisco Conference, President Truman might anticipate a honeymoon of at least 6 months before real troubles begin. The country has reacted in splendid fashion with a spirit of giving him every chance. Even the hostile Hearst-McCormick-Patterson press have pledged support and assistance to the new President in the crisis. These United States of ours always unite and form solid lines in real emergencies. They have done so behind Truman. He has his chance.

Moving Day

EXTENSION OF REMARKS

OF

HON. ANDREW J. MAY

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. MAY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following press release by a former Member of the House, Hon. Samuel B. Pettengill:

MOVING DAY

Soon troops will be leaving Berlin, via the Suez and Panama Canals for Tokyo, 12,000 miles away. General Marshall and Admiral King will direct the biggest moving job ever attempted by human beings. It will strain our shipping and our nerves to the utmost. Nothing in the world's history ever approached it.

We read of the hordes of Genghis Khan and Tamerlane, the Mongol conquerors of centuries ago. But it is doubtful if the vast armies of either ever exceeded 700,000. Alexander the Great, who conquered Babylon when 25 and died master of the world at 33—weeping that it was the only world he had to conquer—never had more than 40,000 foot and 7,000 mounted soldiers, although the defeated Persians under Darius are said to have numbered 1,000,000.

But no army of the past ever equalled in size, had so much gear, or traveled such distances, by land and sea, as the military migration from Europe to Asia which we are to undertake. Instead of supplying an army 3,000 miles across the Atlantic, supplies will have to move 7,000 miles across the Pacific. Add, too, the width of the American continent from the industrial East, where the bulk of our gear is produced, where there are a dozen good ports, to the west coast, where ports are few. Once moved to the Philippines as the Asiatic jump-off, they have only one good port and are still 600 miles from the Asiatic mainland, as aganst the machine shops and ports of Britain, only 50 miles from France.

The war is not over. In many ways the going gets tougher. More critical days are to come.

As General Marshall says, our people "must understand the urgent requirements of the situation. They must be persuaded to support us in a last great effort to hasten the end of the war."

We have not yet been in contact with the major units of the Japanese armies. Enemies are softened up by air and sea power, but only land armies win wars. And, due to their birth rate, there are more Japs living today than there were at the time of Pearl Harbor.

The problems confronting our military leaders are not those of logistics alone—the service of supply over immense distances. There are problems of morale—of the spirit of men and women at the front and at home. A vast complex of warm human emotions, natural, understandable, patriotic, even in normal times, will soon be at work—the hunger for home, "his native home deep imaged in his soul," as Homer wrote in his Odyssey of warriors long ago.

I quote General Marshall again: "The moment hostilities cease in Europe there will be an overwhelming urge in every man to rejoin his wife or his family or to see his girl, to leave the scenes of destruction and desolation in which he has fought and labored at such great risk to life and limb. Yet at that very moment it is imperative that we

start the movement for the acceleration of the campaign in the Pacific. Any delay, any loss of momentum in that campaign means the unnecessary loss or mutilation of more young Americans."

Fathers, mothers, wives, and the girls behind the men may feel that the fighters in Europe will have done their stint and that others should finish off the Japs. They may feel like saying so in letters to the front. Don't do it. The Pacific war will be won more quickly and with less loss by veteran troops than by green men.

With our shipping strained to the limit in moving our armies to fronts twice as far as Europe, the problem of getting food to the starving populations of Italy, France, Holland, and Greece will increase. It could easily happen that hunger may make the populations in the liberated areas come to hate us worse than the Germans. If so, the war will be lost—after it has been won. The only fortunate thing in the situation is that Hitler's grip is being released at the beginning of the crop season rather than at the start of another winter.

It is a grim business we are in. We must stand behind Marshall and King and postpone the bell ringing. It is the last act that commends the play.

SAMUEL B. PETTENGILL.

Pattern for Peace

EXTENSION OF REMARKS

OF

HON. JOSEPH F. RYTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. RYTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

Whereas in October 1943, representatives of the Protestant, Catholic, and Jewish faiths enunciated the following pattern for peace, a seven-point program for a lasting peace and a just world order:

1. The moral law must govern world order;
2. The rights of the individual must be assured;
3. The rights of oppressed, weak, or colonial peoples must be protected;
4. The rights of minorities must be secured;
5. International institutions to maintain peace with justice must be organized;
6. International economic cooperation must be developed;
7. A just social order within each state must be achieved; and

Whereas at Dumbarton Oaks, the United States, Great Britain, the Soviet Union, and China proposed to give international sanction to human rights; and

Whereas House Concurrent Resolution 21 proposes that the Congress of the United States resolve that the said seven-point pattern for peace shall be adhered to as the basis for the establishment of peace and a just world order, and that the implementation of these principles shall be the objective of this Nation; and

Whereas representatives of the United Nations will convene in San Francisco on April 25, 1945, for the purpose of planning an association of nations which will achieve peace through justice; and

Whereas the subscribers to this resolution have been duly designated, as representatives of the members of the Catholic, Protestant, and Jewish faiths in the Bridgeport area, to transmit to our Senators and Representatives in Congress our deep concern with the vital necessity for a translation into action of the pattern for peace that its realization will promote respect for human rights and fundamental freedoms: Now, therefore, reaffirming these principles of the moral law: Be it

Resolved, That our Senators and Representatives in Congress are urged to exert their every effort to obtain the immediate adoption of House Concurrent Resolution 21, and that they exercise their good offices to the end that those representing the United States at the San Francisco Security Conference provide for the adoption of a program which will assure the carrying out of the terms of said resolution.

JOHN F. MCGOWAN,
Chairman, Federation of Catholic Organizations.
BERNARD H. TRAGER,
President, Jewish Community Council.
MRS. J. L. KENNELLY,
President, Bridgeport Council of Catholic Women.
THEODORE J. GALLARNO,
Protestant Delegate at Large.
REV. WILLIAM H. ALDERSON, D. D.,
President, Bridgeport Pastors' Association.
RABBI ALBERT L. MARTIN,
Congregation B'nai Israel.
REV. THOMAS F. HENAHAN,
Chaplain, Bridgeport Council of Catholic Women.

Poland

EXTENSION OF REMARKS

OF

HON. THAD F. WASIELEWSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. WASIELEWSKI. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by me at a meeting held at the South Side Armory Hall, Milwaukee, Wis., Sunday, April 15, 1945:

Mr. Chairman, my fellow Americans, this afternoon's meeting was originally called for the purpose of protesting the disposition made of Poland and the small nations of Europe at Yalta. Had we known earlier what we know today, the motive and tone of this gathering might have been changed, for it hardly seems proper that a meeting of protest should be held on the day that the remains of our Commander in Chief are being laid into their final resting place. It would be far more fitting for us to spend this time in prayer and meditation in tribute to our President, who is as much a casualty of this war as any American who dies in battle in this global war.

At this very hour, in a peaceful corner of the Roosevelt garden at Hyde Park, the tired body of our Chief is laid to rest. No other man in modern times has labored so tirelessly in behalf of the oppressed peoples at home and abroad. No other man has espoused their cause more ably. Like President Wilson, however, Franklin Delano Roosevelt died a disappointed and disillusioned man. The fact that he had to compromise his high ideals and principles regarding the rights and privileges of small nations, as embraced in the "four freedoms" and in the Atlantic Charter, contributed more than anything to his speedy departure. His inability to fulfill his mission, his disappointment, sapped his strength and hastened his end. Anyone listening to his report on the Yalta Conference to the Congress and the Nation must have been impressed with his sincere sorrow and regret that a compromise of principles in the treatment of Poland was found necessary.

But even at that moment he gave no evidence of considering the matter closed. Franklin D. Roosevelt was not a quitter. He had not ceased his fight in behalf of Poland and the small nations of Europe. I am confident that it was his intention to exercise the full weight of his influence and power to have the Yalta Agreement amended in order that Poland, the Baltic, and the Balkan countries might be accorded treatment in keeping with the American ideals of justice and fair play.

In the death of Franklin D. Roosevelt, Poland lost a great friend. I recall quite vividly the early days of the war, when that gallant Polish leader, General Sikorski, was at the helm of the Polish Government. President Roosevelt would frequently call that great Polish Premier from London, to confer with him at the White House. After the untimely death of General Sikorski, Stanislaw Mikolajczyk took over. He, too, was quick to gain the confidence and respect of Franklin D. Roosevelt and was frequently called to Washington for consultation and advice with our Commander in Chief and his staff.

It is most unfortunate that have having led our country to the very shadows of victory, Franklin D. Roosevelt could not remain with us to the fruition of his plans for military victory and the establishment of world order and lasting peace thereafter. However, our Maker has seen fit to take him away from us. Death visits men in high and low places alike.

President Harry S. Truman, who has succeeded Franklin D. Roosevelt to the office of President and Commander in Chief, is not well known to most of us. However, the prompt manner in which he has assumed command and pledged his support of the policies so often pronounced by our late President has inspired confidence in the hearts of the American people. With our cooperation and aid, the new Commander in Chief will bring about the realization and fulfillment of the promises made by our country to the little peoples and large nations of the world alike.

The course of our military and naval war was placed in able hands by our late Commander in Chief. The end of the war is in sight. The valor and resourcefulness of our fighting men and their leaders surpass our highest hopes. We all feel confident that President Truman will retain the same commanders in the field until victory. As a Member of the United States Senate, and during the approximately 3 months he has served as Vice President of the United States, our new Commander in Chief has had an opportunity to become fully acquainted with the aims and purposes of our Nation in this war. Undoubtedly, because our late President Roosevelt had confidence in the ability of Harry S. Truman to carry out our American aims in this war, he favored his nomination for the Vice Presidency. In the course of the last political campaign and during his tenure in office as Vice President, Harry S. Truman has undoubtedly had frequent occasions to discuss with the President the problems ahead. There is no question in my mind but that among the many matters discussed, those most difficult and unfinished have been studied most thoroughly. Since Franklin D. Roosevelt considered the Polish situation open and unsolved, his successor certainly will consider it encumbent upon him to bring about its just and moral settlement.

I have every confidence in the integrity and ability of our new Commander in Chief, Harry S. Truman. His success or failure in the fulfillment of his duties will be determined in a large measure by the support he receives from us in the task that lies ahead. If Franklin D. Roosevelt could speak to us now, I am confident that he would say: "My friends, help Harry finish the job." The humility of our new President and his un-

hesitating assumption of leadership struck a responsive chord in the people of America and the world. His request that the people of the Nation remember him in their prayers gives us reassurance that here, as in Franklin D. Roosevelt, we have a man with the common touch.

Let us, therefore, in our prayers this evening, remember not only Franklin D. Roosevelt, but also his successor, Harry S. Truman, ask God to give him strength and vision to guide him in the fulfillment and realization of our fondest hopes. Let us pray also that we may not falter in our duty and obligation to support him to that end by giving him our wholehearted support and cooperation in order that early victory and lasting peace, based on justice and morality, may be established throughout the world—a world in which Poland, as well as other nations, may fulfill its destiny.

Resolution of Toledo Division, Polish-American Congress

EXTENSION OF REMARKS

OF

HON. HOMER A. RAMEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. RAMEY. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following resolution of the Toledo division, Polish-American Congress, adopted April 15, 1945, at mass meeting held at Central Catholic High School, Toledo, Ohio:

Whereas Poland stands as a symbol of liberty and justice for all other law-abiding nations, especially the smaller nations; and

Whereas the Crimea Conference decisions regarding Poland are contrary to the aims of the Atlantic Charter, since they accede to might and not law and justice, alienating two-fifths of Poland to Russia without agreement or consultation, without the knowledge and without the consent of the legal Polish Government, and also without hearing the will of those most concerned, namely the people themselves; and

Whereas the Yalta Conference decisions deprived Poland of equal rights by deciding her boundaries without her knowledge and agreement, at the same time accepting the principle of interference in the internal affairs of Poland as a privilege of the Big Three, a privilege which in actuality serves solely the interests of the Soviet Russian Government; and

Whereas through signing such resolutions the United States Government burdened itself and the American people with joint responsibility for the legalization at the Yalta Conference of Russian aggressive acts in regards to the Baltic states and especially in regard to our heroic ally, Poland; and

Whereas all decisions of this type strike at the good name and honor of the United States, depriving it of the friendship of the free nations of Europe, depriving it of influence and respect, and lead to an isolation that is a menace to our future; and

Whereas Poland was the first nation bravely to resist aggression upon the boundaries which had been solemnly guaranteed by Great Britain and freely recognized in treaties by Soviet Russia and whereas even in defeat Polish citizens continued an heroic resistance both through underground forces and in open combat as a faithful ally of the United Nations: Therefore

The Toledo Division of the Polish American Congress hereby resolves, Respectfully to ask that the United States delegates to the San Francisco Conference refuse to confirm the decisions made at the Yalta Conference in the above premises since they represent the acceptance of might over right, and legalization of aggression, a denial of democratic principles and equality in international relations; and, in the belief that the Yalta decisions are not final, to appeal to the President, the Government of the United States, the United States Senate, and to the whole world, that the unjust decisions of the Yalta Conference, concerning Poland, be revised in a spirit of equity and good conscience.

Resolutions Committee: Anthony Lewandowski, Thaddeus A. Rutkowski, Steven L. Markowski, L. W. Matecki, Stanley J. Thorzynski, Veronica Kocinski, Frank Adamski.

The Miner Gets No E Award

EXTENSION OF REMARKS

OF

HON. SAMUEL A. WEISS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. WEISS. Mr. Speaker, the men in the mills are doing a superhuman job in outproducing the world in ships, planes, tanks, guns, and shells, and accordingly they are receiving proper recognition for their efforts. But the forgotten man is the man in the pits—the coal miner. Yet without coal this record-breaking production schedule would not be possible. Let us take time to pat the miner on the back and give him a boost occasionally. He deserves credit, and after being kicked around from pillar to post by a number of our press and raido commentators, a little praise and recognition will aid the coal miner's morale.

As part of my remarks I am happy to include an editorial which appeared in the March 26, 1945, issue of the Honolulu Advertiser entitled "The Miner Gets No E Award":

THE MINER GETS NO E AWARD

There is a psychology in this country that inclines the mind toward blaming the striker first followed by a disinclination to find out the cause of the workingman's decision not to work. It is a lamentable fact that the American mind, ordinarily given to fair play calls a halt on neutral thinking when labor and capital engage in one of their periodic differences.

The coal miner, for example, has been the butt of much severe criticism, directed at him from both the battle and home fronts. At present, there is a conflict of views between soft coal operators and the United Mine Workers. The miner is asking for more money.

A white-collar worker behind a clean desk in a well-lighted and well-ventilated office may have difficulty in appreciating the position of a coal miner—at his best a molelike worker who burrows miles beneath the earth in dank shafts, bad air, his mouth, perhaps his lungs, caked with coal dust. Ever present is the danger of cave-ins and the sudden appearance of the deadly, strangling gas.

Wartime finds the miner working steady, eating just as steady. But in peace, it's a different story. He works when there is a demand for coal—which by no means is a year-around matter. His dollar or so an hour is forced to stretch a long way.

In war, however, he is expected to forget the hardships of the past, the rough and tumble struggles of former years to win for himself a decent living. The miner, in the public mind, is expected to go on without a grumble, without so much as an Army and Navy E coming his way, yet all the war effort starts with coal.

Bretton Woods Agreement

EXTENSION OF REMARKS

OF

HON. GEORGE E. OUTLAND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. OUTLAND. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following personal statement by Bishop G. Bromley Oxnam, Bishop of the Methodist Church, New York City, relative to the Bretton Woods agreement:

PERSONAL STATEMENT OF BISHOP G. BROMLEY OXNAM

The Bretton Woods agreement should be adopted. It is an indispensable part of the total pattern of peace. Peace cannot be guaranteed by the Dumbarton Oaks proposals, the Bretton Woods agreement, the understandings reached at Hot Springs concerning food and agriculture and at Atlantic City in the matter of relief and rehabilitation; but within these proposals lie the possibility of peace. Without them, we face the certainty of another war.

When the military phase of the last war ended, fighting less violent but none the less deadly continued in the economic sphere. Unless certain fundamental economic problems are solved, similar conflicts will follow the present war. Peace calls for a general international organization. Such an organization must be established at San Francisco, and the United States must become a member But much more is required and there are issues that must be faced now. Among them are the questions of stable currency and the flow of capital to undeveloped or war-devastated areas. These are among the most important. They were faced at Bretton Woods by the representatives for 44 nations. The agreement there reached represents the judgment of the ablest experts the nations could assemble. It seeks to end the manipulation of currency by national governments such as occurred following the last war and which proved to be a weapon whose use was in effect the continuance of war. The flow of capital must be constant and at reasonable rates, and must cease to be a tool used by great interests or great powers in such fashion as to bankrupt or control the economies of other peoples.

Bretton Woods is called a highly technical matter. From one point of view, that is true. It takes economic competence of a high order to draft the concrete proposals essential to reaching the desired objective. Nevertheless, the objectives are clear. We desire a post-war America free from depression. This means full employment and full use of plant and these ends are dependent upon international trade. The barriers that stand between us and an unimpeded world market must be removed.

If a nation can manipulate its currency so as to weaken or bankrupt another nation trade becomes war. An American who sells automobiles abroad expects to be paid in

currency that is worth the value held at the time of contract. One of the great assets of the United States is that barriers do not exist among the States, that currency is stable, and the flow of commerce unimpeded. Bretton Woods takes two important steps, each necessary and each really dependent upon the other, toward a similar end in world affairs. If the economies of war-devastated areas are to be restored, vast undeveloped areas are to become productive, if our own economy is to be maintained, the Bretton Woods agreement should be adopted, and, in the light of experience, improved in the years ahead. Economic matters of this kind really become moral issues.

BISHOPS OF METHODIST CHURCH SPEAK ON BRETTON WOODS

NEW YORK, April 11.—Convinced that the lack of organization in the economic and monetary field has been a major factor leading to war, the council of bishops of the Methodist Church today released through its secretary, Bishop G. Bromley Oxnam, of New York, the following statement on the Bretton Woods proposals:

"In the crusade for a new world order, wherein the fundamental necessity of international collaboration was a basic consideration, it was stated that the proclamation of principles was not enough. Such collaboration becomes effective only when the practical means to give expression to the ethical ideal are discovered and utilized.

"Hence we must deal with concrete situations and problems. We must not refuse to do this. The new world order is not to be shaped in a vacuum. Recent expressions of principle in the fields of relief and rehabilitation, and food and agriculture have been approved by the representatives of the people in Congress and have won wide support among the people generally.

"The United Nations monetary and financial conference reached agreement on the stabilization of currency and the provision of capital loans for economic development. In such highly technical fields we are dependent upon expert knowledge. We ourselves do not profess this knowledge. But common consent concerning economic measures must be achieved if war is to be avoided. We must find a way. Delegates from 44 nations assembled at Bretton Woods, N. H., reached a common decision. The proposals were adopted unanimously. The United States delegation was bipartisan.

"We consider the economic and monetary issue one of the most momentous in modern history. Here is an initial venture in international economic cooperation. We must make a beginning if the economic chaos that has repeatedly followed war is to be prevented. Heretofore the lack of organization in this field has been a major factor leading to war.

"All of us are concerned. In our churches and communities we should carry forward our discussion, and in accordance with the practice in the Crusade make our opinion known at the place decision is made before it is made to the end that an ordered and peaceful world may emerge."

H. R. 1872

EXTENSION OF REMARKS

OF

HON. HOMER A. RAMEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. RAMEY. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following letter from the service officer of the Disabled American Veterans, Victory Chapter, No. 33, El Dorado Spring, Mo.:

DISABLED AMERICAN VETERANS,
VICTORY CHAPTER No. 33,
El Dorado Springs, Mo., April 16, 1945.

Hon. HOMER A. RAMEY,
Congressman, Ohio,
Washington, D. C.

Re H. R. 1872.

DEAR MR. RAMEY: You may easily recall the plight of veterans in Ohio when pensions and compensation ratings were lowered by the infamous Economy Act and subsequent poverty when disabled veterans were refused relief and W. P. A. work because they got a Government check. Some of those families tried to exist on $8 per month. I know, because I was there. We were forced to steal food wherever there was opportunity to feed our starving families. We had no medicine when our children were sick and the results of insufficient food and improper food is today evident in the Army records of our sons. And those records are used against our boys every day when disabled veterans of this war apply for pensions and are told they had disability before they were drafted.

Here in Missouri I have several scholarships for daughters of disabled veterans, but the girls also show results of malnutrition and sickness and very few of the cases considered for free scholarships can be considered because of personal defects.

Such conditions among disabled veterans is a strange contrast when we consider that fathers of these children passed very high physical tests for the Army of 1918. Surely we must not remain silent and see another generation of disabled war veterans subjected to the same sort of treatment.

H. R. 1872 would provide some small allowance for the veteran's family and we urge that this bill be released from the Veterans' Committee and sent to the House for a vote. Our understanding is that the Veterans' Administration blocked this bill several years and that is the only force opposed to enactment of the bill. The recent publications are merely a symptom of public resentment against such policies, and the Veterans' Committee should follow the trend of public opinion. Living costs have climbed steadily and pensions are still based on a standard of living which cannot meet the needs of disabled veterans' families.

Yours truly,

C. RALPH SMITH, Ph. D.

A Veteran Comments on Latin-American Problems

EXTENSION OF REMARKS

OF

HON. JOHN M. COFFEE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. COFFEE. Mr. Speaker, on March 15, 1945, I delivered a speech in the House of Representatives entitled "Hemisphere Ties, Labor and the State Department."

The speech evoked considerable comment in many widely scattered quarters. Among the letters received was an interesting epistle sent me by the commander of the Los Angeles Post, No. 904, of the Veterans of Foreign Wars of the United States, Mr. Frank P. O'Brien.

Because Mr. O'Brien reveals a remarkable grasp of Latin-American problems, I am requesting that the letter be inserted in the CONGRESSIONAL RECORD as a part of my remarks.

The letter is as follows:

LOS ANGELES POST, NO. 904,
VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Los Angeles, Calif., March 21, 1945.

Hon. JOHN M. COFFEE,
House Office Building,
Washington, D. C.

MY DEAR MR. COFFEE: Your speech, Hemisphere Ties, Labor and the State Department, appearing the CONGRESSIONAL RECORD, March 15 issue, is, to my mind, one of the finest I have read on that subject in years.

Every statement is true and the deductions made, as well as the predictions as to what should be done, and the prospective results that could be achieved, show profound knowledge of the many factors involved.

Our entire approach to the Latin-American problem should approximate the outline you have presented. I say this, not because you delivered the address in question, but because it discloses objectivity based on the historical, economic, social, cultural, and spiritual forces entwined.

Some 12 years ago, when the Republic of Chile was prostrate and when conditions in our own country were bleak, too, I submitted the enclosed study to President Aliessandri and to others in that country.

Much of interest could be unfolded regarding the reactions that followed.

Perhaps you would care to read it. If you do so, keep in mind it was written 12 years ago.

To dream of a better mode of existence is not difficult, but, to reach up and capture such and, subsequently reduce it to a blueprint for further leasurely study, addition, refinement and, with no other thought than to substitute happiness for despair, peace for chaos, progress and enlightenment for ignorance and superstition—that, you will agree, is something else again.

Looking forward personifies a certain eagerness for advancement—a newer and broader conception of life.

On March 1, 1945, I had occasion to write to a friend in Washington, D. C., in which I took occasion to say, among other things:

"If the knowledge of the sciences that is available, plus the yearnings of all decent people for peace, is channelized into a series of activities dedicated for the advancement of all, according to their immediate capacities and future possibilities, why then you and I and others could actually be pioneers in a new type of development.

"Today in Mexico City is an assembly of Latin-American statesmen and others. Much rhetoric will develop. But, the basic problem confronting them is poverty.

"The solution of such a problem not only in Latin America but in the United States, also, can come only with a reversal of activities heretofore cultivated and maintained deliberately and for centuries.

"When I say departure—I do not mean immediately, nor without thought, nor according to plan. Rather do I mean the encouragement of scientific attitudes with economic security and human happiness as the goal.

"If the future of our country is to be secure, we must begin to advance more intelligently, sympathetically, and naturally those things which will make for the contentment of our own people and, coincidentally, just slightly behind, for others.

"We cannot live alone. And we cannot continue to live at the expense of others.

"We need the raw materials; mental and physical resources and consuming capacities of other people—all over the world. The development of such calls for the participation of many minds and capacities. Such cooperation can materialize quickly and easily if projects mutually advantageous to the people of the countries involved are set

up and really organized to succeed. Not for a year. But for decades—possibly longer.

"Take Mexico, for example. At our door. Fabulous resources. Abysmal poverty. A few fine, talented people. A great mass needing education and stimulation along many lines.

"Aiding in the advancement of Mexico, satisfactorily, could lead to one of the most stupendous developments in history. Such an activity, integrated with a program for the further broadening and use of the resources of the United States for our own people could, reciprocally, bring balanced, sustained and highly desirable progress to both countries.

"And similarly to the other Latin-American countries.

"A dream?

"Maybe so. But infinitely better than our present nightmare.

"Something like that suggested will come, eventually. Why not within the lifetime of our sons?

"The development and progress of our people is primary, of course, but that hinges on the future peace of the world. Events now shaping themselves, if not forestalled, could lead to a grave situation in and throughout Latin-America during the next two decades or less.

"If those countries are left to fend for themselves, if they are to continue poverty stricken, then we will pay a terrible price for contributing to or sustaining such a stupid policy. On the other hand, if, as is apparent, a new philosophy and a new appreciation of the benefits of cooperative action are advanced, then, the borebodings dwelt upon can be avoided.

"Making work for a man's hands, or, for his mind; creating and maintaining buying power; putting bread in a man's stomach; clothes on his back; constructive thoughts in his mind; knowledge at his command; happiness in his heart, to me, seems much more important than making him envious, frustrated, or maniacal.

"When I say man—I mean men and women—of the United States of America—of the world."

As I read your message, Mr. COFFEE, the thought occurred you might want to know there are those who respect your great ability, and are grateful for the fact you can see serious matters through the eyes of a scientist, that you are a man capable of evaluating and harnessing economic and social forces for the enrichment and ennoblement of man, rather than to permit them to run amok and destroy civilization.

Sometime, when it is convenient, I shall be pleased to learn of your reactions to the 12-year-old report enclosed.

Respectfully yours,

FRANK P. O'BRIEN.

Salvage From the Disaster

EXTENSION OF REMARKS

OF

HON. MICHAEL J. KIRWAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. KIRWAN. Mr. Speaker, under unanimous consent to extend my remarks, I wish to include an editorial from the Youngstown Vindicator of Sunday, April 15, Salvage from the Disaster.

SALVAGE FROM THE DISASTER

Wise commentators are saying that while President Roosevelt's death is a severe blow, it need not be fatal, because the great decisions have been made at home and abroad and cannot now be undone. That is a sound reassurance, and there is also another hope for salvage in the prospect of a stronger sense of responsibility among the public men whom Mr. Roosevelt had to consider and through whom President Truman will have to work.

The Presidency is a man-killing job, as Thursday's tragedy reminded us. Shakespeare makes Henry V cry out against his heavy responsibility:

"Upon the King! Let us our lives, our souls,
Our debts, our careful wives,
Our children, and our sins, lay on the King!"

Concentration of responsibility is even greater in the American Republic than in the early English monarchy. Always the Presidency is a double task: the President must be the Executive of the Nation and the leader of his political party. In wartime he must also be Commander in Chief. Everything is laid on his shoulders, from Pearl Harbor to the price of meat.

This is not less true, but more, when the President is a strong man. His very strength encourages lesser men to shift still more of their own responsibilities to him. It works in another way also: hostile partisans will oppose a necessary measure, knowing that they can do no harm in the end because the President can carry it through, and meanwhile they may gain some advantage by embarrassing him.

In Mr. Roosevelt's case, there was still another factor. Many Americans sincerely opposed some of his policies. Their very sincerity misled them into fighting good policies merely because "that man" had proposed them.

All this sort of thing may be expected to diminish under President Truman. Admittedly he is not so strong a personality as Mr. Roosevelt. That is a real and serious loss in times when strong, sure leadership is still needed, even though the main decisions have been made. But there is at least the consolation that other public men may feel that they must now themselves assume some responsibility for the country, instead of putting everything "upon the king." They may hesitate to oppose necessary measures for partisan purposes, since the risk that they will succeed is greater. There is a chance for better national unity in the disappearance of the anti-Roosevelt prejudice. And those who know Mr. Truman best say that he is a stronger man than the public suspects.

As the Nation strikes out on uncharted and dangerous courses, both at home and abroad; the removal of Mr. Roosevelt's farsighted leadership is a grave misfortune. But it need not plunge the country into despair, or make it think that as one on the street said in the shock of the first news, "everything will go to pieces." The loss requires every American to quit laying his responsibilities "upon the king," and to do his own duty better than before. With that determination Americans can follow the path on which Franklin Roosevelt set their feet, and attain the goal he saw ahead.

Wanted: A Polish Poland, Not a Soviet-Lublinized Poland

EXTENSION OF REMARKS

OF

HON. JOHN LESINSKI

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. LESINSKI. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following very interesting and able article written by Rev. Edward Wilowski, Wilno, Ontario, and which appeared in the Evening Citizen of Ottawa, Canada, on Wednesday, April 4, 1945:

WANTED: A POLISH POLAND, NOT A SOVIET-LUBLINIZED POLAND

The world placed great hopes on perhaps the greatest conference ever held, the Crimea Conference, in which took part the greatest American four-term President, Franklin D. Roosevelt, the head of the greatest democracy; the greatest British Prime Minister, Winston Churchill, heading the Government of the greatest empire; and the greatest Russian ruler, Marshal Joseph V. Stalin, dictator of the greatest armed force in history. The result, however, of this conference may prove to be the greatest tragedy by which the world was ever shocked. The Allies went to war to save Poland from Hitler and are ending the war by handing Poland to Stalin. The world appreciates Russia's efforts in this war and everyone desires the indispensible unity and nonfriction but not at the humiliation of seeing all the small nations gobbled up by Soviet imperialism and beaten into Siberian slavery. One would imagine Pearl Harbor, Stalingrad, destruction of so many Russian cities, Battle of Britain, Warsaw, Cassino, and Tobruch would sufficiently create unity and nonfriction policy among the Allies for the successful prosecution to end this war against Germany, without dismemberment and virtual annihilation of an ally, the Polish Nation, condemning it to the Siberian concentration camps, because the Soviets will it. The whole world helped Stalingrad and now the Allies are expected to pay Russia for every move toward Berlin and Tokyo—with lend-lease, with sacrifice of Poland, and with other small nations plus a $6,000,000,000 diplomatically called loan to Russia. Is that America's price for overadmiring the Soviets? Perhaps the poet had the Crimean Conference in mind when he wrote, "Into the valley of death rode the six hundred."

WHAT ACTUALLY HAPPENED AT CRIMEA

At the Crimean Conference the Treaty of Riga was scrapped; the Anglo-Polish pact was violated; international law was thereby trampled, earmarking all pacts and treaties as worthless; the Atlantic Charter was drowned in the Black Sea; the "four freedoms" were shamefully abandoned; Russian aggression on Poland was sugar-coated for Soviets; Warsaw was forgotten; dismemberment and Lublinizing of Poland approved; Russian occupation of Estonia, Lithuania, Yugoslavia and other countries permitted; the fate of the millions of Poles herded into Siberia never thought of; the Moscow-made governments for other countries applauded; reducing diplomatic recognition to a farce in legal diplomacy, thus shamefully degrading world diplomacy. Poland along with all small nations were betrayed at Teheran and Moscow; were condemned and executed at Crimea. Thus the Moscow dream of Soviet Eurasia is becoming a realization and her interest in foreign real estate is explaining her so-called realism. One newspaper called this the "crime" conference, supposedly by typographical error. Here were imposed by force, terms proposed at Moscow last October, to which the Poles refused to put their signature, while Mr. Churchill so persistently insisted.

THE MAIN FEATURE OF THIS WAR

"The big feature of this war," says S. Sagar in the Weekly Review, "is that there is a new diplomacy abroad in the world—or perhaps it is only a crude modern development of a feature in the old diplomacy. The Nazi and Communists have developed a technique in diplomacy of which the essence is the abandonment of all morals and manners. Its exponents do not seek to attain their ends by treating with the responsible

government of a neighboring state, but by fostering a faction within that state, exaggerating the extent of this faction, broadcasting lies about the way the responsible government is acting, insinuating that it is a minority government out of sympathy with the people, and without democratic credentials, or any other thing that happens to be fashionable at the time. The object is to prepare the way for revolution and the establishment of a government favorable to themselves. We must keep our eyes on the big feature, the new diplomacy. For the new diplomacy means the ends of all pretense of morals or manners in relations between states, which in the long run means the end of all pretense of morals and manners in relations between individuals. It means the negation of all for which Christendom and the colonies of Christendom are fighting. It means that there is nothing on which any world order can be built. Any world order built on another partition of Poland will be one more ramshackle structure built on another historical crime." How true of Crimea where even such great men like President Roosevelt and Prime Minister Churchill were lulled by this Soviet diplomacy.

SOVIET DUPLICITY

President Lincoln said, "We all declare for liberty; but in using the same word we do not all mean the same thing." True in his day, how much more true today. The Soviet English or diction differs from American English or diction. The Russians sugar-coat their brutal policy of force with the euphony of our American democratic language. They use in the Soviet sense such terms as liberated countries, freedom, free elections, agrarian laws, democracy, cooperation, friendly governments, peace, nonaggression, and similar expressions which mean one thing for us but to the Rusisans are meaningless. By such terms are veiled, force, terror by Ogpu, arrests, concentration camps, tortures, starvation, deportation to Siberia, death by firing squad, Moscow-made governments for all countries, etc. It is impossible for a Russian mind even to imagine freedom or free elections as there never was a free election in Russia, since there is no freedom of speech, of press, of travel, of religion, or any kind of freedom, neither in Russia nor in the liberated countries. One cannot just go in and out of Russia as one pleases, not even Russians, nor can you go here or there as you like. not even resident Russians. Mr. White assures us of that. They have perpetual selective service and no private initiative is allowed. True, that is their business. But how can such people speak and mean of freedom in liberated countries as we understand? That is why it is so important that American English and not Soviet diction be used at conferences and in agreements, or else world diplomacy will pale into white sepulchre, hypocritical diplomacy, and ostrichlike politics, heralded by famous empty declarations but eventually ending in appeasement to dictators. Allies, beware of this Soviet duplicity. Beware the Ides of March.

REMEMBER WARSAW

"The blame for the fate of Warsaw can without scruple," says J. S. Mix, "be placed squarely on the shoulders of Moscow and the Lublin Committee of Liberation. Unimpeachable evidence shows that they are responsible for what happened to Warsaw and to a large extent for what is still happening to Poland. In 1944 the so-called Committee of Liberation or Lublin Commitee had called upon Warsaw Poles to rise in rebellion, only to leave them to slaughter, while the Russians looked on from across the Vistula as Nero once looked on burning Rome. The Russians did not intend to help. As their commanders later spouted with mendacious anger, the uprising was premature, not authorized by Moscow. That is just what the Russians had ordered. By lying and murder they have managed to get their German enemies to liquidate the Poles for them. Moscow had everything to gain by helping the Polish underground army oust the Germans; and the Committee of Liberation, if it is composed of Poles, as the Russians claim it is, should have come to the aid of their brethren." If the "Lubliners" are Poles, why do they deport Poles to the Russian Siberia? Duplicity is treacherous, maybe prophetic are the words of the Polish Prime Minister Arciszewski as recorded in the press, "Great Britain and the United States may be disillusioned by Russia in the near future." He understands Russia as most of us do not.

BY WHAT AUTHORITY DISMEMBERMENT

Poland is a constitutional state, constituted under international law with boundaries defined, free, sovereign, and independent nation, a very ancient state over 1,500 years old, with a distinct language and strong, powerful racial sense. Belonging to the western civilization, possessing a great degree of culture, having produced many learned scientists, musicians, poets, writers, painters, and sculptors, to mention only a few as Copernicus, Chopin, Paderewski, Conrad, Mickiewicz, and Madame Curie. Poland was the first country in Europe to have a democratic constitution and government, that is why Russia and Germany in the eighteenth century partitioned Poland. Poland was the first country in Europe to have a ministry of education. The University of Krakow is the third oldest university in Europe. Poland had the most democratic form of government of any country in the world at one time, as all the decisions of the Polish Parliament had to be unanimous by virtue of the Liberum veto, which gave to any member of Parliament the right to overrule Parliament if he did not like the measure in question. It is true it eventually brought ruin on Poland but it shows unmistakably the Polish love of freedom and freedom of government, but not the Crimean kind. That is why Poland will never consent to Soviet servitude, Churchill or no Churchill. Now, how can anybody and by what authority just take parts away or give away parts of Poland contrary to the wishes of the legal government of Poland? Due to wartime conditions, Poland like Belgium, Holland, and other countries has her legal government in London, which government is based on the principle of legal continuity and is the successor to the government of General Sikorski, whom Mr. Churchill clasped so warmly by the hand vowing friendship in life and death, saying, "We shall conquer together or we shall die together." Thus spoke Mr. Churchill in 1940. Well, now Poland is dying, does it mean the British Empire is beginning to crumble? The Polish Government in London is recognized by the Polish Nation; an army of nearly 200,000 men is sworn to this Government; the Polish underground is likewise sworn to this Government; President Raczkiewicz the head of this Government holds the reins of authority in his hands; this Government is recognized by all the countries in the world as the legal government of Poland, even Russia recognized this as the legal government of Poland until for sinister reasons she thought she better make a Moscow-made-OGPU-ruled committee of Soviet citizens backed by Russian bayonets the so-called Lublin Committee of Liberation.

LUBLIN RESHUFFLED

It is a known fact that the leader of the "Lubliners," Mr. Bierut, is a high official in the Soviet Ogpu, the Russian gestapo, while the majority of the others are professed Communists and most of them are not citizens of Poland. Now the only authority this body enjoys is Russian force. And believe it or not, the Big Three are going to recognize it as the legal government of Poland, of course, in a reorganized form—but even regrouped or reorganized or additioned there unto, it still will be only a Lublin gang, without any legal authority, only another puppet government imposed by "foreign force." And how can civilized countries like Great Britain and the United States stoop so low as to turn away from the real legal government and recognize an ill-smelling imitation. The reorganization is to be executed by Messrs. Molotov, Harriman, and the British Ambassador. Do you not remember it was Molotov and Ribbentrop that decided how Germany and Russia were to divide Poland, and got Hitler and Stalin to meet and sign the arrangement? And after Russia accomplished her atrocious act of aggression, even though she had a nonaggression pact with Poland, it was Molotov that proclaimed loudly to the world, "Poland is dead. Poland ceased to exist as a state." And now this same man is entrusted with the task of making a new government for Poland. Is it hard to imagine what kind of government he is going to form for Poland? It is funny that President Roosevelt and Mr. Churchill did not realize this before they condescended to betray Poland's fate into such hands. If the Big Three did as they did, to be sure Molotov will run the small three. And this is one of the tragic results of Yalta.

Will the promised free elections be really free as we understand it? Will they be held under auspices of American agents trained in handling an election? Will the 2,000,000 deported Poles into Siberia return to vote or are they lost to Poland forever? Will the Polish forces which so valiantly defended Britain share in the voting? Will the Polish refugees scattered by the fates of war get a vote? Or will the Polish Nation vote with a Russian bayonet facing it as in 1939 a most farcical plebiscite? In all countries occupied by Russia there is no freedom of the press, of speech, of assembly—what prospects of freedom and free elections, another Churchillian red herring. Since liberation the Russian political police, the Ogpu, and the Russian secret police, the N. K. W. D., are combing Poland from end to end; terrorizing, arresting, deporting to Siberia, and as one example on January 1, 1945, mass arrests took place in Bialystok and Grodno in which 15,000 Poles were arrested. Seizure of Polish underground officers and soldiers was often accomplished with brutality, in some cases beaten with barbed wire, pin pricking, and breaking of ribs had taken place. Lubliners closely corroborate with Ogpu and the N. K. W. D. not only in the political sphere but in the economical sphere of activity. Beyond the Curzon line mass arrests are still going on, we are assured, and despair has overwhelmed the Bialo Russian peasants living on the eastern Polish territory as they definitely want to belong to Poland. Mr. Shapiro gives his own impression in his personal visit to the Polish forces in the Canadian First Army saying, "The Polish soldiers remain bound by voluntary loyalty and solemn oath to the Polish Government in London. Mr. Bowman, of Ottawa Evening Citizen, tells us that the Lublin government denounced Polish General Anders and his soldiers who fought at Cassino as "Fascist-Nazi sympathizers and traitors," which also applies to the heroes of the Battle of Britain and of Arnhem. Thus also all the Allied forces fall under the same sweeping slander, because they also are fighting the Germans. How long are we going to tolerate such Soviet-made dirt to be flung at the Allied forces, Polish, British, or American? A spokesman for Lubliners condemned as traitors President Raczkiewicz, Mikolajczyk (according to Churchill the best-liked Pole in world diplomacy today), and even the great hero General Bor; what, therefore, are the prospects of a free election and free Poland under such Lubliners?

MR. CHURCHILL ON CRIMEA

Mr. Churchill's speech proved to be despairing in tone; unworthy of a British statesman;

humiliating to British prestige from the moral point of view disgraceful; politically unwise; in sentiment contradictory to international law; disastrous to allied war effort and purpose; negating all prospects of lasting world peace; built on weak arguments; disappointing to public opinion and hopes; simply revengeful, having absolutely surrendered Poland to Russia, condemning it to the brutal heel of the Ogpu the Russian gestapo, thus betraying the British pledge made to Poland. The Anglo-Polish pact says, "that Great Britain obligates herself to support Poland not only against armed aggression, but against any attempt to undermine Polish independence, by processes of economic penetration or in any other way." President Roosevelt once called Poland, "the conscience of the world." Mr. Churchill by his speech closed the mouth of the Polish Nation with the Ogpu seal, so the conscience could not speak to the world. That is why Poles outside of Poland have to speak on her behalf to public opinion. Hillaire Belloc said, "The test is Poland; watch Poland; see what they do with Poland." Capt. Allan Graham said, "Poland is the test case for European civilization. If Great Britain deserts Poland, Europe will desert Britain; and that will be Great Britain's ruin." Congressman O'KONSKI so bravely defended Poland in Congress as did many members in the British Parliament. A parliamentary vote of confidence is no proof of the confidence of the world and public opinion, the Edinburgh and Glasgow demonstrations against Churchill show that, and above all the demonstrations in all juistice-loving hearts the world over.

MR. CHURCHILL'S ARGUMENTS

Mr. Churchill said, "In 1940 we were alone." Let us quote Mr. Thomas who said in the House of Commons, "If it had not been for the Polish airmen who fought in the Battle of Britain we might have gone under in 1940, for the margin was very narrow." Another argument used, "no frontiers were guaranteed Poland." We will let the words of the British Parliamentarian Mr. Pickthorn answer this, "I beg especially the Members of the Government Front Bench, not to use the argument against us that this country have never guaranteed any specific frontier. If anybody ever guaranteed the British Isles or the British State, it would be taken to guarantee its boundaries at the time of the guaranty." The Prime Minister claimed that the Crimean Russo-Polish boundary was some 300 miles east of the Tsar regime boundary—the Tsar regime boundary was a result of aggression so was the Crimean-declared-boundary. He said, that if the Polish Government had listened to him, "there would not have been a Lublin committee." Mr. Churchill cannot prove that. The fact is, had the Polish Government in London signed off half their country, there would have been a Lublin committee anyway and the signing would have been used to discredit the legal Polish Government. Why, the Russians had a Moscow-made-committee-of-liberation for Poland already in 1919 only they could not get anyone to help them park it in Poland. Churchill did a magnificent job for the Soviets. As Russia never alone partitioned Poland, but always with the help of Germany and now with Churchill, or considering the vote of confidence it can be said "with Britain." Is it not peculiar that the Polish forces are good enough to fight on all the Allied fronts but it takes the Red Army to police Poland according to Mr. Churchill. We heard about the great "concession" Marshal Stalin made when he allowed Molotov to reorganize the Lublin committee.

CHURCHILL DISBELIEVES HIMSELF

Mr. Churchill while claiming Russian demand just; while decrying the Polish Government in London for not signing voluntarily the partition of Poland at Moscow; promises a free and independent Poland and free elections—and immediately knowing deep in his heart it will not be a free Poland but a Soviet mess—he offers the Polish forces the British citizenship; which though a priceless privilege in itself; that is not what the Polish soldier died for on the Allied battle fronts. That is not why the 9,000 Polish airmen died in the Battle of Britain, while another 4,000 at Arnhem and that many at Cassino and many are still fighting on the fronts and why? They want a free Poland for Poles not for Soviet citizens, a Poland that would ever be grateful to the Allies for their help. What did the world's best organized Polish underground and the Polish nation fight Hitler for, for 5 years, just to be doomed by British diplomacy to the heel of the Soviet O. G. P. U.? The Soviet terrorism going on in Poland since "liberation" and even at this moment proves this and Mr. Churchill sensed this state of affairs in opening the British Empire to the Polish soldiers who could only return to Poland to be liquidated, like the Polish underground army. Mr. Churchill revealed his finger was caught in the Moscow trap set for the Polish legal government, and thus the disgrace and humiliation of the dismemberment of a most loyal ally, Poland, falls on Mr. Churchill's broad shoulders.

MR. ROOSEVELT'S SPEECH

President Roosevelt's speech, though a little more sincere, lacked the dynamic force of the Roosevelt that said "that all men are born free and no nation has the right to be master over others"—Russia excepted—or the Roosevelt that proclaimed the "four freedoms" for all—but Poland. The freedom of religion is not even mentioned at Crimea and we heard all along that this was a war in defense of Christianity; maybe it was, but it is not any more for. indeed, we must not be less brave to be Christian, nor less Christian to be brave. It was also supposed to be in defense of democracy and we are making secure the world's greatest absolute dictatorship of Kremlin. The declaration of the "four freedoms" and the Atlantic Charter will go down in history as the shrewdest pieces of deception ever foisted upon peace-loving and peace-desiring nations. Frail, indeed, were the arguments of the President in defense of his complacent approval of the Soviet aggression and occupation of Poland—weaker even than the reasons Mr. Stalin had for grabbing and gobbling up Poland, and he had none. Poland has two governments, we are told—no distinction is made between a legal government of Poland in London and the usurping bogus Soviet stalk horse the Lublin committee empowered by foreign force; also, we hear that Poland is supposed to be a "potential source of trouble," from without, however, not from within. The way we heard it, it was Hitler and Stalin pounced on Poland and not that Poland attacked Germany and Russia—at least, that used to be the history before Crimea. We are assured that there will be no balance of power in Europe. How could there be if Stalin has it all? Russian aggression accounted for the fact that there was no Polish government before the last and perhaps after this war. One argument of the President, however, deserves attention because he is either well-informed or ill-informed when he says that the majority of the people east of the Curzon are "definitely not Polish."

According to statistics, before the war the greatest single group in eastern Polish territory was definitely Polish; all the others together were in majority but they are definitely not Russian because there is as much difference between Ukrainians and the Moscow Russians as there is between Ukrainians and Poles. This is well to remember. However, if the President was assured by Mr. Stalin at Crimea of the present reality, then Marshal Stalin confirms the pro-Soviet press boast "that there would not be a Pole left east of the Curzon line by January 15, 1945," and thus that is real news and consequently the President was well informed. Because the Russians were only 1 percent of this population before the war. The Ukrainians and White Russians belong to the western civilization while the Moscovites belong to the Asiatic sphere of culture. The President's personal disappointment of Yalta leaves room for hope.

PRO-SOVIET ARGUMENTS UNMASKED "IN THE SOVIET SENSE"

One is amusingly reminded of the proverbial absent-minded professor by the assertion made in Brantford lately, "Poland need have no fear of Russia because there are no political, diplomatic, or economic facts to dispute Russia's friendship to Poland." Russian aggression on Poland in 1939 must have been out of kindness; Poland plundered, and over 2,000,000 Poles deported into Siberia, probably could be classed as friendship; 10,000 Polish officers killed in a concentration camp near Smolensk was undoubtedly out of kindness, German or Russian; dictators are known for no other sort of kindness; Moscow-made bogus government for Poland might also be out of friendship, of course, in the Soviet sense, and this is what the professor forgot to mention. It seems that a Negro even born in Warsaw would still like watermelon.

"CURZON MORE RUSSIAN THAN STALIN"

Some argue: Curzon line is right because the western nationalities proposed it and Stalin cannot be less Russian than Curzon. The fact is the Curzon was never meant to be permanent, nor a dividing line between Polish and Russian peoples, and the Soviet statesmen and Lenin never recognized the Curzon line as just, as it was too far west and thus settled at Riga. Lenin certainly was not afraid of being less Russian than Curzon. Lenin would have laughed at such a comparison as Curzon is well known for his anti-Soviet attitude.

"Russia was twice attacked by Germany." Firstly, in 1914 and 1941 the Russian frontier was farther west, how can the Curzon line be expected to protect Russia in the future? Secondly, why reproach Poland as Poland at those times did not exist on account of Russian and German treachery. History shows that when Russia with Germany destroyed Poland it was to the detriment and peril of Russia. If Poland were independent then and corroborated with Germany, then the charge would hold, otherwise it is false and pro-Soviet propaganda. So even the Russo-British partition of Poland at Crimea may prove detrimental both to Russia and England.

"POLISH GOVERNMENT FLED TO ENGLAND

"The Polish Government fled to England while Lublin stayed in Poland and fought in the underground." The truth is: There was no Lublin Committee till after the tragic death of General Sikorski which is an unpleasant coincidence. Arciszewski for 5 years fought in the Polish underground and demonstrates the backing of the Polish underground for the London Polish Government since he heads it now. Most of the Lubliners for years before the war were outside of Poland, in Russia.

"SOVIETS LIBERATED POLAND

"The Soviet Army liberated Poland. Poland is behind the Soviet fighting lines." A double argument used to discredit the western allies in the eyes of the Polish Nation. While the British, American, and Polish forces and others having liberated Africa, Italy, Belgium, Holland, and France, will Great Britain and United States of America seize half of those countries or place puppet governments in those countries as Russia does? Russia's claim is not founded on any argument but on sheer power.

"POLAND ACCUSED OF DICTATORSHIP

"Poland is accused of dictatorship government. The fact is: Poland is condemned for something that is glorified in Russia. What is happening in Italy, Belgium, Greece, and

other places where Communists are disrupting authority? It is the Communist creed to keep obstructing peaceful government and refuse cooperation till they themselves are in power and then do as they please. Can any one doubt that to control government where Communists, with their trickery, always cause trouble, may be the only way is, by dictatorship? And with dictators in most countries why should Poland be condemned for having had a dictator, is it because she so effectively kept communism out of Poland?

"POLAND IMPOSED ON RUSSIA AT RIGA"

Strong Poland imposed its will on weak Russia. What an absurd argument. Poland in 1919 had just finished serving her term of 150 years of servitude in Russian and German bondage after being partitioned in 1772. Who is so dumb as to claim that Poland was then strong? Furthermore at Riga Lenin moved the Polish offer farther east than Poland desired. And Lenin and his statesmen were Russians and they took less than Poland was offering them. Is that imposing one's will?

"Poland should be thumbed to the penalty box." If Poland was playing hockey she would be thumbed to the penalty box for disobeying the three referees at Yalta. What a poor sportsman that editor be, who claims that. If a referee or umpire ran a game contrary to all the rules of the game, and with spite and injustice to a team not only the players would protest but the fans would use the umpire in no uncertain manner and police escort would be necessary for his safety, in fact he wouldn't be an umpire very long. Poland was cruelly and unjustly treated at Yalta as an Allied ally, in fact she is used worse than an enemy state, like Italy and even Germany whose independence and sovereignty is assured by Crimea. Why is Poland condemned to Russia occupation? Why was she dismembered if not for appeasement? The world is due for a great awakening.

Other writers when they can't prove or state something in favor of Russia they cast doubt on the other side. "It is not certain who is to be blamed for Warsaw," they say, or "it is doubtful who killed the 10,000 Polish officers"—surely the Poles did not. Russia could have shown up German cruelty, but instead pointed a guilty finger to herself when she broke off relations. Some arguments are pure simple power politics; just because Russia is occupying Poland with her army, does not give her the legal title to it no more than the Allied armies possess Belgium and Holland. We are supposed to be allies and not individual grabbers, or are we?

NOT YET THROUGH

The war is not yet through. While no one is finding fault with the United States of America in not fighting for a European frontier, we are all fighting in self-defense and in self-preservation and in defense of one another. But England has a special pledge and agreement or pact with Poland which Poland honored and sealed with her blood while Britain repays with dismemberment and Ogpu occupation. Where is British fairplay? The silence of Ottawa is oppressive and ominous. How everyone was up in arms when Poland was attacked, how the world was aroused when little Pearl Harbor was attacked, and now, when Poland is half gobbled up and the rest under occupation of Red forces, when her life is at stake, when she is doomed to extinction as a nation, the allies betray her and, adding insult to injury, they repudiate her legal government. And while pro-Axis governments like Argentina will be at San Francisco, the Polish legal government is made an outcast. A government with 200,000 soldiers, a government that did more for England and Russia than most nations. If Hitler could have thrown those extra divisions that the Polish underground forced him to keep in Poland, if he could have put them into Stalingrad, what a different history it would be today, and Russia repays her gratitude with aggression and occupation; if Hitler could have thrown those extra divisions at England there would have been no Churchill at Crimea carving up Poland. And still Poland is not invited to San Francisco. Maybe it will be Poland's luck to be spared the humilitation that awaits the others? For with Stalin having developed a habit he will dominate, there as at Teheran, Moscow, and Crimea. And what about the peace conference, ditto. If less talking was done and more justice distributed the world might be the better for it. These observations are not made in a spirit of criticism but in a spirit of apprehension for Poland, for all small nations, for the allies and the western civilization. I will conclude with the words of the Honorable Mr. RAMEY, of Ohio, "My resentment is based on the sound concept of justice and common decency and respect of freedom."

Rev. EDWARD WILOWSKI.

WILNO, ONTARIO, CANADA, *March 15, 1945.*

The American Legion on Immigration

EXTENSION OF REMARKS

OF

HON. A. LEONARD ALLEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. ALLEN of Louisiana. Mr. Speaker, the American Legion has always taken an active part in immigration matters. The Legion makes a study of immigration problems and what it has had to say on the subject of immigration from time to time is worthy of the consideration of patriotic men and women everywhere. At this time when some might desire to weaken our immigration laws, it is well to give thought to what this great patriotic organization has said. It is anticipated that there will be an effort upon the part of a great many people to come to this country after the war, just as was done after the First World War, and I think it is timely to insert in the CONGRESSIONAL RECORD a résumé of various resolutions on the subject which have been passed by the American Legion at the last Chicago and previous national conventions. For the benefit of all interested persons, I include the following résumé of their resolutions:

Resolution 268, Chicago national convention, September 1944, asks that the immigration laws be amended and treaties be concluded accordingly to provide for the immediate deportation of all naturalized citizens whose citizenship has been or may be revoked due to subversive activities.

Resolution from the November meeting of national executive committee, 1942, asks that alien enemies of this Government not be permitted to become American citizens or hold Government jobs for the duration of the war.

Resolution 375, Chicago national convention, September 1944, puts the Legion on record as favoring and taking the necessary steps to have enacted into law by the Congress an act prohibiting an alien from speaking over or using the radio facilities on behalf of or under the auspices of any political party, or for or against any candidate for public office.

Resolution 287, Kansas City national convention, September 1942, recommends that the navigation laws of the United States be amended to prohibit any alien from owning or operating any vessel in the coasting or fishing trade of the United States and the same penalty be provided for the violation of this amendment as those applying to the violation of other acts governing the documentation of vessels of the United States.

Resolution 66, Kansas City national convention, September 1942, asks that legislation be enacted to detain for deportation from the United States and its territories aliens who have positively refused to fight and forever forbid their reentry or residence under our flag.

Resolution 427, Omaha convention, September 1943, condemns the activities of all groups and organizations which advocate refusal to bear arms for the United States or show proper respect for the flag, and call upon all loyal American citizens to eradicate these un-American activities and influences, through education and by all other legal means.

Resolution 442, Boston national convention, September 1940, asks that the Congress of the United States be requested to amend the naturalization laws to provide that aliens who have resided in the United States for a period of more than 5 years without filing an intention to apply for citizenship, or who having filed do not complete same within the time required by law, shall not thereafter be entitled to make such application.

Resolution from the May meeting of the national executive committee, 1944, favors legislation to strengthen and standardize the educational requirements for naturalization, however, without relaxation or suspension of any literacy requirements now in force.

Resolution 379, Chicago national convention, September 1944, states that the American Legion will oppose and condemn all individuals and groups who parade and emphasize their origin or descent as a means of securing personal aggrandizement, or group superiority.

Bay Area and Power

EXTENSION OF REMARKS

OF

HON. JOHN H. TOLAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. TOLAN. Mr. Speaker, as part of my remarks I wish to include the following editorial from the Sacramento Bee, Sacramento, Calif.:

BAY AREA AND POWER

Officials of San Francisco and other bay area cities would do well to take to heart the remarks of Congressman GEORGE MILLER, of Alameda, in a statement made in Washington this week.

MILLER described the San Francisco region, so far as future industrial development is concerned, as caught in a nutcracker between Los Angeles and the Pacific Northwest, both of which have limitless sources of public power.

The Congressman further stated:

"Either Portland, Seattle, or Los Angeles can undersell us by about one-third. When the Aluminum Co. of America was looking for a site for a coast factory they passed up all our advantages, including a supply of bauxite, for the power the Northwest could offer."

The San Francisco Bay area also has a potential source of low-priced electric power in the Central Valley project, but has done little in the past to avail herself of it.

San Francisco, Oakland, and other bay cities, above all others, should be put out in

front fighting for a power transmission line from the Shasta Dam. They are the ones which would derive many of the major benefits from C. V. P.

Until these cities are provided with a large source of low-priced power they can expect to see the new industries—post-war as well as war-time—established in southern California and the Pacific Northwest.

Shall War Production Facilities Be Retained?

EXTENSION OF REMARKS

OF

HON. ALBERT J. ENGEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. ENGEL of Michigan. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution unanimously adopted by both the executive committee and the board of directors of the Greater Muskegon (Mich.) Chamber of Commerce. It urges that a specific program, as part of our future over-all national defense policy, be adopted for the preservation and maintenance of production facilities, recognizing that adequate, properly distributed production capacity is necessarily of first importance in any national defense program worthy of the name. I am sure the resolution, which follows, represents the business sentiment of its own community and many another as well:

MUSKEGON, MICH., *March 27, 1945.*

The experience of the past 25 years has made it abundantly clear that treaties between nations and a world security organization are not in themselves sufficient to maintain a lasting peace. Aggressor nations do not become aggressor nations overnight; there is a long period of quiet preparation in which vast armaments are built in the expectation that a sudden onslaught will find the other nations defenseless and unable to withstand the terror. Mobility in war has been tremendously increased by the introduction of the airplane. The airplane carrier and mechanized armies demonstrate that the width of oceans and vas continental distances are no longer the security they once were.

The only assurance, therefore, of permanent peace is that this country be vigilant and fully prepared at all times to meet any threat against its security. This does not necessarily imply the continuance of a large body of men under arms. It does imply that we have in instant readiness an industrial plant capable of supplying, on short notice, the vast quantities of material which modern warfare requires. In World War No. 2, as in World War No. 1, the courage and stamina of our allies gave us the time to build such plants. However, it was not until 1944, 3 years after we were attacked and 5 years after the inception of World War No. 2, that this country was in a position to apply sufficient pressure on the aggressor nations to force them to surrender their conquests.

World War No. 2, therefore, teaches us that the great principles enunciated by one of our early forebears, "Put your trust in God and keep your powder dry" still applies if we are to remain an independent Nation. We are of the opinion, therefore, that our war plant, built up in the United States at such a prodigious cost, should not be scrapped for a mere pittance but should be preserved intact. Those facilities that fit in with civilian production should be disposed of to private enterprise, preferably the operators, under guaranty that they will be properly maintained, reasonable wear and tear excepted, so as to be useful in another emergency. Those facilities, useful for war purposes only, particularly machinery and equipment, should be stored and kept in a proper state of repair so as to be immediately useful in the event of another conflict. Purely temporary facilities, built for the duration only, such as war housing, camps, and cantonments, etc., should be scrapped. Surplus commodities should be disposed of in an orderly manner, the emphasis being on preservation of facilities as distinguished from more-or-less perishable products.

A suitable board, composed in part of civilian and part military representatives, should be established to effectuate this program.

Experience, both after World War No. 1 and World War No. 2, have abundantly demonstrated that maintenance of war plants is far more economical than the creation of new facilities in the event of a national emergency. Moreover, World War No. 2 has taught us that in all probability this country will lack sufficient manpower to do the triple job of creating necessary facilities, producing war products with those facilities, and supplying the Army and Navy with the men they need in a conflict of global proportions.

The United States, as the richest and most powerful Nation, can only become the guarantor of peace and world stability if it maintains the facilities and forces necessary to insure such a peace. For this country to return to the state of unpreparedness that existed in 1939 is unthinkable.

Resolved, therefore, That Board of Directors of Greater Muskegon Chamber of Commerce recommends to Chamber of Commerce of the United States and to the representatives of this State in Congress that they employ their best efforts to develop a program for the preservation and maintenance of our war plant in accordance with the principles set forth in this resolution.

Mr. and Mrs. Albert Endres, Coshocton, Ohio

EXTENSION OF REMARKS

OF

HON. J. HARRY McGREGOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. McGREGOR. Mr. Speaker, it is with a great deal of pride that I call to your attention the family of six sons, now serving in our military units, of Mr. and Mrs. Albert Endres, of Coshocton, Ohio, my home county, which I have the privilege to represent. This fine American couple has a service flag hanging in their home which is almost solid with stars, representing their sons who left this home to serve their country.

The first son, Sgt. Jerry Endres, left for camp in March 1941; has been serving somewhere in India with the One Hundred and Eighty-first General Hospital, but is now on his way home for a furlough. Pvt. (1st cl.) Joseph P. Endres served in the South Pacific with an Infantry unit, and has recently been returned to the States, and is now assigned for duty at Camp Gordon, Ga. Sgt. Carl R. Endres is now serving in Italy with the Quartermaster Corps. Cpl. Albert J. Endres is with an engineering battalion in Germany. Cpl. William J. Endres is with an engineering battalion in Belgium; and Pvt. (1st cl.) Maurice E. Endres is in the Army Air Forces and stationed at Wright Field, Dayton, Ohio.

I fully realize that all parents, regardless of the number of sons and daughters they have serving in the armed services, are sacrificing and contributing to the war effort, but I feel that special recognition should be given to those parents who have six of their family group serving in the uniform of our country, and carrying the banner for victory.

Therefore, Mr. Speaker, I salute and pay respect to Mr. and Mrs. Albert Endres, of Coshocton, Ohio.

America and the World Lose a Leader

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I wish to include an editorial written by Mr. Alfred D. Mynders which appeared in the Chattanooga Times, April 13, 1945, immediately following the passing of our great leader and President, the Honorable Franklin Delano Roosevelt. This editorial, I feel, expresses what is in the hearts and minds of the people all over the world today.

AMERICA AND THE WORLD LOSE A LEADER

"Now he belongs to the ages."

Franklin Delano Roosevelt is dead on the field of honor, and Edwin M. Stanton's remark concerning the dead Lincoln applies to Mr. Roosevelt beyond the power of anyone to cancel half a line in a record illustrious in world history.

He belongs to the ages, for in the greatest crisis in the Nation's history, he guided his country to certain victory against the mightiest forces of evil ever marshaled against the free peoples.

President Roosevelt died at Warm Springs yesterday of a cerebral hemorrhage. This fateful month of April, so filled with memories of national sorrow, was also the month of Mr. Lincoln's death, 3 days later in the month than Mr. Roosevelt's death. And President Roosevelt died on the eighty-fourth anniversary of the beginning of the War between the States, April 12, 1861.

Mr. Roosevelt was a war casualty. He gave his life for his country as tens of thousands of our youths have done. His death is the most terrific shock this country could sustain, for his labors were unfinished. Having guided us to eventual victory, he was to guide the world to organized peace.

His idolaters, of whom there are countless thousands, will be inconsolable in their sorrow. For them, broken indeed is the golden bowl, loosed the silver cord. But from the ranks of the opposition party will come tributes to his war leadership. Out of the unity which these two opposing forces must now reach for their country's good, may come a march to the peace with honor, the peace with enduring links of steel, which was the passionate desire of the dead President.

In 12 years 1 month and 8 days as President of this country, Mr. Roosevelt's administration of that office was epochal not only in length, but in the variety of the crises which confronted him. It was a burden which would have long since broken a man of less resolution and zeal.

Mr. Harry S. Truman has taken the oath as President. Mr. Truman's heavy task must also recall the period of Lincoln when Andrew Johnson came upon similar burdens. But Mr. Truman comes to the White House in an hour of world stress. The Civil War had just been ended when Lincoln died, but this war is not ended. Mr. Truman can call upon the best leadership of this country, and no man can deny him his support.

In a period of supreme shock like this, Americans rally together. We must uphold President Truman as we have rallied to every need of this country since Pearl Harbor.

Franklin D. Roosevelt, born in Hyde Park, January 30, 1882, came into the Presidency in the midst of a great depression. This is no time to weigh the New Deal issues, though the country weathered the storm of unemployment, a financial panic, closed banks.

It was in 1940 that Mr. Roosevelt showed a prophetic power in originating the great lend-lease system, a year before America was drawn into the war. Through this far-seeing system, over $35,000,000,000 has been advanced to the war cause of the United Nations. Without that lend-lease and without America's stupendous war production, Premier Stalin himself said at the Teheran Conference the United Nations could not have won the victory.

Although his critics have pictured Mr. Roosevelt as obstinate, history will recall that in his domestic policies he was a compromiser. Most of the major legislative proposals of the executive branch of the Government since March 4, 1933, have failed to get complete acceptance in Congress, but Mr. Roosevelt was willing to accept the compromise. These compromises eventually gave the administration much of what it had originally demanded. Not Henry Clay but Franklin D. Roosevelt may be known in future American histories as the great compromiser.

America was unprepared when the Axis storm swept over the world. But we began laying the groundwork for our defenses. We adopted peacetime conscription of our armies. We began to change an unwise Neutrality Act in order to prevent the utter defeat of our great ally, England.

In all of these many facets of the war problem, Mr. Roosevelt was the leader. He was given a fourth term in the Presidency because his record as a war statesman was like a shield on the arm of this great country.

The combined strategy exercised by Mr. Roosevelt, Mr. Churchill, and Mr. Stalin cannot be credited solely to any one of them. But it has been a miracle of wise conduct of a war. As Mr. Walter Lippmann said in an article only this week, these three "have succeeded in dividing our enemies and in driving them to fight separate wars while they gathered and advanced their own forces, with well-nigh perfect timing, for a unified conclusion of the whole war."

In all of the meetings of these three titans, America has known that her cause was in good hands. The conferences started even before we entered the war, with that great Atlantic meeting between Mr. Roosevelt and Mr. Churchill when they propounded the Atlantic Charter in August 1941. Casablanca, Quebec, Cairo, Teheran, and Yalta were mileposts in our steady emergence from defeat into the light of victory. And Mr. Lippmann's comment, written, of course, before the President's sudden death yesterday, is worth quoting in the cold light of reasoning rather than shock and grief which all Americans must feel at the passing of one of our greatest men.

Mr. Lippmann said that it was necessary "to explode the myth that the President and his responsible lieutenants have been amiable weaklings, suckers, and Santa Clauses, in the hands of the stern, shrewd realists, Churchill and Stalin, about what matters most. The President has been quite the equal of the other two."

In cool judgment, in willingness to compromise rather than to risk a tragic break in the grand alliance, Mr. Roosevelt may be ranked as the greatest of the three.

The death of Franklin Delano Roosevelt is a loss to all peoples, a world shock of the first magnitude. But he dies at the height of his power. He never knew that eclipse which comes to most great men. He is spared the unhappiness which comes to fallen idols.

Consider that remarkable career, one to place beside that of any statesman in the annals of time. A rather light-hearted Assistant Secretary of Navy in his early political life, Mr. Roosevelt was stricken almost unto death, and was left a hopeless cripple.

Out of that helplessness, he arose to be twice Governor of the great State of New York, four times President of the United States, one of the acknowledged leaders of the free world in a crisis which threatened to turn back civilization to the Middle Ages.

Unsuccessful candidate for Vice President in 1920, Mr. Roosevelt was undaunted, his ideal of service to his country was undimmed, and since 1932, he has been the most powerful figure in the public life of this country.

What he has started, cannot be undone. America will rally stronger than ever behind Mr. Roosevelt's ideals of complete victory and organized peace. Like Woodrow Wilson, he has fallen in the struggle, his life a sacrifice to his country's cause. Unlike Woodrow Wilson, Mr. Roosevelt had every reason to feel that his country would follow him in the difficult path of peace, even as it has so valiantly followed him down the hard road of war.

The power of his leadership will sustain his successor; America will prove her greatness in the future difficult months as she has proved it in the past 3½ years in war. For even in the untimely passing he has given us momentum to carry us on. In Markham's words:

"And when he fell in whirlwind, he went down,
As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky."

National Cemeteries

EXTENSION OF REMARKS

OF

HON. CHESTER E. MERROW

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. MERROW. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the text of H. R. 2800 and explanatory notes thereon.

On March 27, 1945, I introduced House Resolution 2800, a bill "to provide for one national cemetery in every State and Territory and such other national cemeteries in the States, Territories, and possessions as may be needed for the burial of members of the armed forces of the United States dying in the service or former members whose last discharge therefrom was honorable and certain other persons as provided for in United States Code, title 24, section 281, as amended." The bill with explanatory notes is as follows:

SECTION 1. That the Secretary of War is authorized and directed to acquire, by donation, purchase, condemnation, or otherwise, in each State and Territory of the United States in which there is not situated on the date of enactment of this act a national cemetery, a suitable site for the establishment thereon of such a national cemetery.

Section 1 authorizes and directs the Secretary of War to acquire by donation, purchase, condemnation, or otherwise a suitable site for the establishment thereof of a national cemetery in each State and Territory of the United States in which there is no such cemetery.

Note: The above section increases the authority of the Secretary of War, as per United States Code, title 24, sections 271, 272, and 273, to accept land by donation.

SEC. 2. The Secretary of War is authorized to acquire, by donation, purchase, condemnation, or otherwise, in States (including the District of Columbia) having a population of 500,000 or more, and in the Territories and possessions of the United States, (1) suitable sites for the establishment thereon of such additional cemeteries, and (2) land adjoining existing national cemeteries for the extension of such national cemeteries, as the Secretary of War may determine to be needed for the burial of members of the armed forces of the United States dying in the service or former members whose last dischage therefrom was honorable and certain other persons as provided for in United States Code, title 24, section 281, as amended.

Section 2 authorizes the Secretary of War to acquire land for the establishment of national cemeteries in States—including the District of Columbia—having a population of 500,000 or more and in territories and possessions of the United States—first, for establishment of additional national cemeteries; second, land adjoining existing national cemeteries for extension of same as he may determine to be necessary.

Note: This section repeats authority the Secretary now has for establishment of national cemeteries. However, such authority was given in Act of 1867 and this proviso renews this authority. In view of length of time old law was enacted there has been some question as to whether it is still in existence.

SEC. 3. Upon the acquisition of such land by the United States, the Secretary of War is authorized and directed to establish and construct thereon national cemeteries, and to provide for the future care and maintenance of such national cemeteries.

Section 3 authorized and directs Secretary of War to establish and construct national cemeteries on land so acquired and to provide for their future care and maintenance.

Note: This section does not change present law—United States Code, title 24, section 278—as the establishment of cemeteries necessarily includes construction. However, there has been some question as to whether establishment meant construction and this section clarifies the situation.

SEC. 4. The Secretary of War is authorized to do all things necessary to accomplish the

purpose of this act, by contract or otherwise, with or without advertising, under such conditions as he may prescribe, including the engagement, by contract, of services of such architects, sculptors, artists, or firms or partnerships thereof, and other technical and professional personnel as he may deem necessary without regard to civil-service requirements and restrictions of law governing the employment and compensation of employees of the United States.

The Secretary of War is further authorized to spend in accordance with the provisions of this act such sum of money as may be placed in his hands as a contribution additional to the funds appropriated by Congress.

Section 4 authorizes Secretary of War to do all things necessary to accomplish purpose of act by contract or otherwise, with or without advertising, under such conditions as he may prescribe, including engagement, by contract, of services of such architects sculptors, artists, or firms or partnerships thereof and other technical and professional personnel as he may deem necessary without regard to civil-service requirements and restrictions of law governing employment and compensation of employees of the United States.

This section also authorizes the Secretary of War to accept contributions of money in addition to that appropriated by Congress.

Note: The above provision would allow the Secretary of War to do all work necessary in the establishment of a cemetery in the most expeditious manner with or without contract, in order to have them available for burial upon repatriation of the American dead from overseas at cessation of hostilities; to secure the advice of the best talent in the architecture of these national shrines, calling upon such architects, sculptors, and artists for consultation without awaiting the authority of Civil Service. Furthermore, the names of the most prominent personnel of this caliber are not on the civil service rolls and can only be obtained without reference thereto. Such other technical and professional personnel such as architectural engineers, landscape gardeners, civil engineers, and so forth, may be secured in the same manner. These cemeteries are nonmilitary activities and the architecture of each is individual and nonrepetitive.

Paragraph 2 of this section provides that such funds as may be contributed by individuals, patriotic societies, and organizations may be used for additional embellishments such as stained glass windows, ornamental doors, bronze plaques, and so forth, in general keeping with the general design and spirit of the buildings.

SEC. 5. Before any plan or design is accepted for use as a national cemetery, the Secretary of War shall obtain with respect thereto the advice of the Commission of Fine Arts.

Section 5 provides that the Fine Arts Commission render advice on any plan or design that may be considered for use as a national cemetery.

Note: This section needs no explanation.

SEC. 6. The establishment, construction, care, maintenance, administration, and operation of the national cemeteries herein and hereafter provided for and all existing national cemeteries shall be a function of the Quartermaster General directly under the Secretary of War.

Section 6 provides that the establishment, construction, care, maintenance, administration, and operation of the national cemeteries herein and hereafter provided for, and all existing national cemeteries, shall be a function of the Quartermaster General directly under the Secretary of War.

Note: This section is designed to place the whole subject of national cemeteries (which have no connection with the Military Establishment whatsoever) directly and solely with the Quartermaster General under the direct control of the Secretary of War, eliminating any military intermediary supervision by the General Staff or the Army Service Forces. Under General Orders 68, 1879, the Secretary of War placed the responsibility for the establishment, which included construction, care, and maintenance of national cemeteries under the immediate jurisdiction of the Quartermaster General and they remained under his direct control until 1942 when the Army Service Forces was created and these functions were absorbed by the Army Service Forces, a military organization established solely for military purposes and only for the duration of the war and 6 months thereafter.

National cemeteries are nonmilitary activities established, constructed and maintained by nonmilitary funds procured under the Civil Functions Appropriations Act of the War Department, the same as rivers-and-harbors activities are procured under the Chief of Engineers. They have no relation whatsoever to the military; furthermore, the intimate individual nature of each of these monumental expressions of our National and State gratitude to these honored dead prohibits standardization of architecture as evidenced by military construction.

SEC. 7. The provisions of United States Code, page 24, section 275 (sec. 4874, Rev. Stat.), are amended to read as follows: "The superintendents and assistant superintendents of the national cemeteries shall be appointed under schedule A, Civil Service Rules and Regulations, and shall be selected from meritorious and trustworthy soldiers, sailors, and marines, either commissioned officers or enlisted men who have been honorably discharged from the service of the United States, and who must have been disabled for active field service in the line of duty."

Section 7 provides for the appointment of superintendents and assistant superintendents of national cemeteries under schedule A, Civil Service Rules and Regulations, and extends the privilege to ex-servicemen of all arms of the service.

Note: The present law restricts such appointments to military personnel only. There is at the present time no law for the appointment of assistant superintendents. This class of personnel are all ex-servicemen and this is one position which the ex-serviceman can obtain and be assured proper quarters and living. The superintendents and assistant superintendents must have some disability incurred in line of duty and as long as this disability does not interfere with their ability to perform light manual labor they can be selected. Furthermore, in order to be eligible for retirement at 70 years of age, an appointee must be under 55 years of age at the time of appointment.

In view of the technical nature of a superintendent's duties, it is thought advantageous to the Government that examinations be held by the Quartermaster General's office to determine the qualifications for the job. This method was used until 1940, when the Civil Service insisted that superintendents had been inducted into civil service under Executive Order 7916, June 24, 1938, effective February 1, 1939. Prior to that date the Quartermaster General held examinations, maintained an eligible list, made appointments, classified, and had authority to dispense with the services of any superintendent who was not satisfactorily performing his duties without reference to civil service. This procedure was to the interest of the service, but since the Civil Service has had control the interest of the service has not been the dominating factor—extent of physical disability, age, and suitability for the job have not been considered as factors by the Civil Service.

In order to have these cemeteries properly maintained as national shrines to our heroes, it is essential that proper personnel be obtained and it is considered that this can best be done by putting this class of personnel under schedule A of the Civil Service Rules and Regulations and making the Secretary of War, upon the recommendation of the Quartermaster General, responsible for securing the proper qualified superintendents and assistant superintendents for these important shrines.

SEC. 8. The act entitled "An act to provide for a national cemetery in every State," approved June 29, 1938 (U. S. C., 1940 ed., title 24, sec. 271a), and "An act to authorize an appropriation for the purpose of establishing a national cemetery at Honolulu, T. H." (Public Law 298, 77th Cong.) (ch. 477, 1st sess. (H. R. 588)), are hereby repealed.

SEC. 9. In order to carry out the provisions of this act there is hereby authorized to be appropriated $122,938,331, out of any money in the Treasury not otherwise appropriated, $63,312,173 of which shall be made immediately available for civil functions administered by the War Department, "Cemeterial expenses—War Department," to be expended under the direction of the Secretary of War and the supervision of the Quartermaster General and to remain available until expended: *Provided*, That the services of such additional technical and clerical personnel as the Secretary of War may deem necessary may be employed only in the Office of the Quartermaster General.

The Boxcar Shortage

EXTENSION OF REMARKS

OF

HON. BOURKE B. HICKENLOOPER

OF IOWA

IN THE SENATE OF THE UNITED STATES

Friday, April 20 (legislative day of Monday, April 16), 1945

Mr. HICKENLOOPER. Mr. President, in connection with the boxcar shortage

in the Middle West, as the result of which the entire Middle West, and more particularly the grain producers, are in most acute difficulty in the effort to move grain, not so much locally as to move the grain into other markets where it is vitally needed, I ask unanimous consent to have printed in the Appendix of the RECORD some notes on the grain car situation in Iowa just published by the Farmers Grain Dealers Association of Iowa, located at Fort Dodge.

There being no objection, the notes were ordered to be printed in the RECORD, as follows:

NOTES ON GRAIN-CAR SITUATION IN IOWA

The Farmers Grain Dealers Association, through its grain department, deals almost daily with some two hundred of the more than three hundred of its farmer-owned and farmer-controlled members. This gives those making these daily contacts a very comprehensive picture of the transportation problem that has faced the country elevators and their farmer patrons.

Last December we clearly foresaw the difficulties that we thought were ahead for those of us who have some responsibility for marketing the Iowa farmers' production at a maximum return to the farmer producer. There was every indication that the shortage of grain cars was going to be serious and that it might grow progressively worse. We had become more or less reconciled to this point of view and we were formulating plans for a campaign that would persuade the farmer that unless he made provision for saving his corn on his own farm that serious losses of grain needed in the war effort, as well as the money value of much of the grain then on farms, were inevitable.

Early in January the writer happened to be in Chicago and stopped in the office of the Regional Director of O. D. T. I had expected to discuss the car situation and had anticipated the Director would confirm our opinion that too few cars would be available to the Iowa farmer to avoid outrageous losses, unless the farmer took such action as might forestall these losses. However, instead of having these fears confirmed, we were assured, without the slightest equivocation, that cars were not only going to be made plentiful for the movement of wet corn but at that very instant trainloads of empty grain cars, or what they termed "block trains," were being rushed from eastern territory through the Chicago gateway, and that more were to follow—and that we could go home and tell this to our membership. We did so and on the strength of it bought considerable corn, some of which is still on our books unshipped as we write these notes.

Repeatedly after that date we had every assurance that cars were going to be available within a few days or, at the most, within a few weeks. We had every right to believe that these promises were sincere and that the responsible officers of the responsible agencies were taking the necessary steps to see that cars were made available.

The mouse that the mountainous promises finally brought forth, in Iowa at least, was some six or seven hundred cars that were brought in from the east and delivered to the C. & N. W. Otherwise I would say that 95 percent, perhaps 98 percent, of the cars that have left Iowa in the past 3 or 4 months loaded with grain came into Iowa loaded with merchandise. And at one time the carriers were actually taking these merchandise cars away from Iowa points when they were emptied and were sending them to Dakota in order to load wheat that had been in storage there for months, and so far as spoilage was concerned, could have remained in storage for many more months.

In the writer's opinion, the reason that all these promises failed to materialize is extremely simple. The natural flow of traffic under wartime conditions is toward the seaboard. When these cars were emptied there, the eastern lines had insistent demands from their shippers for every available empty. Being human, they probably took care of their own patrons and when the orders were issued that were to return these cars to the western carriers, the people operating the eastern lines found the language in these orders that permitted them to circumvent the plain intention of the orders. (You and I would probably have done the same thing if we had been operating an eastern rail line.)

The committee that is to investigate the grain-car situation should, in the writer's opinion, give careful consideration to a review of I. C. C. Order 244. We regard this order as most unfair; in fact, we think it confiscated a considerable percentage of the volume of business of many of our member companies. This order goes to the very heart of the question of car distribution, and, as we have seen it in operation, it deprives the member of a cooperative of the right to market his grain through his cooperative. In the case of corn, with which we are most familiar, it will result in a reduction of from 2 or 3 percent of his gross income on corn sold, and will run a considerably higher percentage of loss when translated into a reduction of the net income of corn sold. And, of course, the loss of volume to his cooperative tends to destroy his local cooperative and cooperatives in general.

We would especially urge that the committee making this investigation give cooperatives the opportunity to be heard on this issue.

Another matter that the investigating committee should consider is the carriers' responsibility for expediting the movement of grain that, due to its condition, is subject to spoilage. In order to earn the maximum revenue for their own line, initial carriers often route grain over a circuitous rather than the most direct route. Carriers are beyond the reach of claim if they move a car at the rate of 50 miles a day. This is just about the speed at which our armies have moved across Germany. This horse-and-buggy-50-mile-a-day provision is unfair to the shipper. The carrier should be required to assume responsibility for moving grain that is likely to go out of condition at least at the rate of 75 miles a day, and should be made responsible for giving distressed grain the most direct routing.

We can cite instances where cars have moved just within the 50-mile-a-day-limitation that could have been moved in half the consumed time, and losses of as much as $1,000 a car to the shipper could have been avoided.

As an illustration of how vicious these losses are we might point out that a few days ago we had 4 cars of corn in the Chicago market that had been kiln dried and on arrival in Chicago these cars graded No. 3 or better and were all sold at the Chicago ceiling prices. On the very same day we had 4 cars of corn that were originally of as good or better quality than the 4 cars that had been kiln dried, but because they were out of condition sold at 39 cents, a difference in value on each of the 4 cars of 77 cents a bushel. Assuming that it costs 17 cents a bushel to dry this corn, which is a liberal estimate, this left 60 cents a bushel difference in the net proceeds, or an average of more than $1,000 a car.

Now if this corn could have been moved last winter when farmers wanted to move it and begged for the transportation that was necessary in order to move it, these four cars alone would have netted the producers $4,000 more than they actually received.

There have been hundreds of such cars going to market and all of it has been on the waiting list of some elevator for weeks and in many cases for months, and often has been listed with several elevators for that length of time.

We would want further to state our opinion that had the matter of transportation for wet corn from Iowa been given adequate attention, practically all the difficulties that have been encountered could have been avoided without affecting the transportation necessary to our military effort. The additional transportation required was relatively insignificant. Had Iowa had 130 percent of the cars that were furnished and had the distribution of these cars been better, our difficulties would have been overcome.

The association wouldn't want to be identified with any group that is unreasonably critical of those responsible for the Nation's wartime transportation. This would be true of Government officials, O. D. T., and other agencies whose efforts have been directed toward expediting the movement of grain, as well as the operating officials of the railroads. On the whole a wonderful job has been done and at no time have we seen any evidence that these people haven't every intention of doing the right thing, and always we found them ready to meet anyone half way who had anything constructive to suggest.

An investigation by a committee of the United States Senate is unquestionably the surest way for all concerned to get a fair hearing and to provide a background for a policy that will fully utilize all the grain-box equipment available and give those cars a more uniform distribution.

The Nation Goes On

EXTENSION OF REMARKS

OF

HON. WILLIAM LEMKE

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. LEMKE. Mr. Speaker, it has truly been said that life and death are equal kings. Death is no respecter of persons, no respecter of positions; in the republic of the grave, all are equal kings. So in the midst of our million casualties—amidst the tears of the mothers, fathers, wives, daughters, and sons mourning their loss on foreign battlefields—our President was suddenly stricken in a moment when he and the world least expected it.

The Nation is recovering from the shock of the President's sudden death. This is the third similar shock that many of us have experienced. We have witnessed the death of the third President in office. The first was the assassination of President McKinley, then the sudden death of President Harding, and now President Roosevelt. These three Presidents had one thing in common. All three had personal charm. No one could meet any one of these three without feeling perfectly at home. There was no formality, no stiffness, but friendliness.

The Nation was all the more shocked because the death of the President was unexpected. It was shocked because European victory is at hand. It was doubly shocked because of the uncertainty of our future—of civilization's future. It was stunned because of the closeness of the San Francisco Conference—a confer-

ence which must write and win a just and lasting peace or else our victories on the fields of battle will have been lost. Our million casualties will have been in vain.

Many people expect that the San Francisco Conference will produce a just and lasting peace. We all hope that justice will triumph over greed and aggression at that conference. The late President seemed worried over the Polish, the Finnish, the Romanian, and the Lithuanian situations. He must have been dissatisfied with the results at Yalta. Disappointment was plainly visible when he addressed Congress upon his return.

Now that he is gone, time alone will pass upon the merits or demerits of his foreign and domestic policies. What this verdict will be no one can foretell. There will be many side issues, side lights, and facts discovered before time renders its final verdict.

All who met him liked President Roosevelt personally. Some, because of his personal charm, agreed with everything he did. Others admired him personally but disagreed with many of his domestic and foreign policies. There is one thing that we can all agree on, and that is that the President made this Nation, perhaps the world, conscious of the fact that there was an underprivileged class. Let America arouse itself and demand that the San Francisco Conference bring about a just and lasting peace for all nations as the final monument to our departed President.

Nothing in this world is permanent but change. On Easter Sunday, April 1, Mrs. Lemke and myself met Vice President and Mrs. Truman at an afternoon tea given in their honor at the home of close personal friends, Mr. and Mrs. Stanley James O'Connor. Little did we think that we were shaking the hands of the man and lady who within 12 days would become the President of the United States and the First Lady of the land. Not only has Mr. Truman become President, but he became the most powerful single individual in the world.

In his address to Congress, the new President made it plain to the world that he was not the master of our people, but their servant. He did not threaten the smaller nations with the might of the three great military powers. He said that the great powers must not dominate, but serve, the smaller nations. We hope that some of our allies, who are just now attempting to grab everything in sight; to grab everything above and beneath the waves—heard and understood that language.

Under these conditions, President Truman will have a trying time. He will have to make decisions that will affect not only our own future, but the future of the world. If successful, he will have to meet these issues courageously and without bias. If he does this, he will have the full cooperation of the Congress and the American people. He has our best wishes in the work that lies before him.

Universal peace has been the desire of mankind throughout the ages. It is our desire. No sane person wants another world war or any war. Universal understanding and brotherhood is the teaching of Christ. But the solution of how to end all wars has not yet been discovered. It cannot be brought about by selling America down the river. In our desire for universal peace, let us be on guard lest we follow false prophets and plunge civilization into World War No. 3.

We cannot get permanent peace by putting our stamp of approval upon the liquidation of 1,800,000 Poles. We cannot get it by sanctioning the grabbing of part of the territory of Poland and Finland, and all of the Balkan states. We cannot get universal peace by force. We cannot get it by subjugation of the smaller nations.

Alexander the Great wanted one world and universal peace by force. Caesar wanted the same thing. Charlemagne and Napoleon attempted it. Mussolini and Hitler's dream of world domination by force has collapsed.

The attempted betrayal of the smaller nations by two of these great powers is repugnant to our very sense of justice. The suggestions that are coming out of Yalta are repugnant to the civilization in which we live. These suggestions will not prevent future wars. If followed, the inevitable result will be wars. There can be no permanent peace unless it has for its foundation universal justice and decency.

Let us stop following false gods and prophets. We all want permanent peace. Such a peace cannot be built upon liquidation, hatred, and aggression. It cannot be secured by surrendering our sovereignty. It cannot be acquired by lowering our standard of living for international trade—American Steel.

The curb for the overambitious—for the lust of power—for personal aggrandizement—intrigue and conspiracy among the rulers of nations—has not yet been found. We hope that President Truman, by insisting upon justice for all nations, will find it at San Francisco. If he will call the bluff of the overzealous nations who wish to grab that which is not theirs, then permanent peace may be in the cards. If he does this he will have the backing not only of a united Congress and a united people at home, but of the thinking, intelligent, and peace-loving people of the world.

Does History Repeat?

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I include an excellent article by Eric Underwood, If History Does Not Repeat, It Very Nearly Does:

At the time of the Presidential election last fall I had occasion to draw attention to a remarkable modern parallel with an occurrence in Roman history over 2,000 years ago.

In the year 507 B. C. Publius Valerius completed his third term as consul. A third term as consul was in itself an unusual event, but not satisfied with his achievement Publius decided to run a fourth time. The people of Rome found no impediment and coined what afterwards became a Latin proverb: "Qua ter quater" (What has been done three times can be done a fourth). Publius, too, had a nickname suggestive of American popular drinks of today: "Poplicola" (cultivator of the people, i. e., Democrat).

It was during the second term of Publius that Horatius Cocles, famous in Macaulay's Lays of Ancient Rome, held the bridge singlehanded against the hosts of Lars Porsena.

Also in 1944 there occurred an equally remarkable coincidence in connection with the Anglo-American invasion of France.

The people of England at the present time are considering the making of a second Bayeux tapestry to commemorate pictorially the chief events in that invasion. The original Bayeux tapestry, it will be remembered, consists of several hundred feet of needlework made by the ladies of the court of William the Conqueror, the first Norman King of England. On it are embroidered scenes depicting his conquest of England in 1066, the first colored comic strip, for much of it is deliberately comic, and what was not designedly so is humorous to modern eyes by reason of the archaic uniforms and stereotyped gestures.

The first event leading up to that conquest occurred at the little seaside village of Bosham in Sussex. From there Harold the Saxon set sail on his ill-fated voyage to Normandy to meet William. Harold's visit terminated in the decision of William to invade England. The first scene on the Bayeux tapestry shows Harold in the Church of Bosham—"Ecclesia Bosham," says the Latin legend—near by the shore where Canute ordered the waves to retire.

In the same quiet waterways of Bosham in the spring of 1944 were assembled the prefabricated harbors which made possible the invasion of Normandy by British and American troops, and there, too, took place the rehearsals of the tactical exercises which were to drive the Germans out of France. In choosing this locale, it is possible that romantically inclined English generals—if such there be—remembered poetic justice. But it is highly improbable that Mr. Roosevelt and Mr. Churchill, in selecting the leaders for the American and British armies for the expedition were influenced by the choice of his generals which William the Conqueror made 900 years before. William chose Taillefer to lead the attack and Robert de Montgomerie as his second in command. Now, "Taillefer" is French for "hewer of iron," and the Germanic for this is "Eisenhower."

So an Eisenhower and a Montgomery commanded the Norman invaders of Anglo-Saxon England in 1066, and an Eisenhower and a Montgomery commanded the Anglo-Saxon invaders of Normandy in 1944, and the prologue to both dramas was played at Bosham.

Some say that history repeats, some that it never does, but it certainly plays curious tricks.

Will He Do It?

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 17, 1945

Mr. HOFFMAN. Mr. Speaker, other than the news from the battlefronts, uppermost in the minds of most Americans

is the question as to the course which President Truman will follow.

Senators and Representatives who know him are convinced that he believes in and, if left to his own inclination will, as President, follow a course which will restore constitutional government to the people.

President Truman is not, in the ordinary meaning of the term, a great man, for which many are thankful. Alexander, Nero, Napoleon—many others—were great men, but millions of people died because of their ambitions and none, so far as we know, added to either the welfare or happiness of his people. Washington and Lincoln were truly great men but they had an understanding of the needs and desires of the common man in addition to their other virtues. They were exceptions to the rule that so-called great men bring little of good to their country.

The President's parents were average Americans. Born on a farm, growing to manhood in a small community, without a university education, with the experiences which come to the average farmer and small-town dweller, he is just an ordinary man with the background of a Lincoln. That is why so many of his associates have faith in him. That is why so many believe he may prove to be in some respects another Calvin Coolidge.

President Truman is a Democrat, a loyal party man. In the Senate he gave ample evidence that he was honest, efficient and had first in his mind the welfare of our people. He has never shown any indication of being a New Dealer; of harboring ideas looking toward the remaking of America, the destruction of constitutional government. His whole life, private, business and political, indicates that he believes the laws should be made in Congress, interpreted by the courts, and enforced by the executive department; that the people, through their chosen Representatives, should determine the Nation's policy, its future course.

Though the Pendergast machine in St. Louis and Missouri gave him material aid; though, after Pendergast served a term in the penitentiary, Harry S. Truman attended his funeral, there is nothing in his record to indicate that he ever believed in, or will support, corrupt city machine policies.

The only question which, in the mind of his former associates, throws any doubt upon the course which he will follow is the realization of the great pressure to which he will be subjected as President.

There is in Washington a powerful, well-financed group of individuals, a number of organizations, intent upon substituting for government by law through constitutional process, government by men, headed by a dictator. These individuals and groups were all-powerful in the late administration; in many things dictated its policy. They are still in Washington, firmly entrenched in policy-making positions. They can make life miserable, almost unbearable, for anyone who opposes them.

When they take Harry S. Truman to the top of the mountain and tempt him by painting a pleasing, alluring picture of the false goals which they seek; describe the disagreeable situation which may arise if he opposes their wishes, will his good sense, his courage, and his determination, be sufficient to foresee and spurn their aid? In short, will he fulfill the promise made by a former President to drive the money-changers out of Washington?

It will require all of President Truman's courage, determination, and ability to either circumvent or overcome their plans, defeat the accomplishment of their purpose.

Republicans, as well as a majority of the Democratic representation in Congress, will stand squarely behind and give every possible aid to the President in any and all efforts to restore our Government to the people.

The Islands of the Pacific

REMARKS

OF

HON. EDITH NOURSE ROGERS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mrs. ROGERS of Massachusetts. Mr. Speaker, we have heard a great deal, including very fine statements from Admiral Ernest J. King, regarding the post-war ownership of the islands of the Pacific. It is not necessary to ask our men who are fighting and dying in the Pacific how they feel regarding the post-war ownership of the islands. Senator THOMAS C. HART, in his able radio speech yesterday pointed out how important a part public opinion will play in connection with the post-war ownership of the islands. He says it is not only helpful to the United States from a military point of view, but an excellent thing for the people in the islands to have our guidance. Certainly the United States has done well in its friendly and helpful directing and governing of the Philippines. It has been satisfactory to the people of the Philippines. Their loyalty to the United States and their contribution in this war proves that.

Before Senator THOMAS C. HART became Senator, he was an admiral in the United States Navy on active duty. He served his country in the United States Navy for 52 consecutive years which is the longest period of service ever given by anyone in the history of the Navy. As he saw much service in the Pacific, he is a fine authority concerning it. I hope that every Member of Congress will read his speech and that it will be given wide circulation throughout the United States.

This speech by Senator HART was delivered over station WRC, April 22, 1945, and is as follows:

During the last few days some officials have made statements concerning the post-war status of the Marshall, Caroline, and Marianas Islands. Several articles have been written about the future ownership of those numerous groups of islands, which stretch across the entire western half of the central Pacific. A resolution has been introduced into Congress urging that the United States retain permanent possession and control of all islands taken by us during the war which were in the possession of Japan before December 1941.

The arguments advanced in favor of such a project are principally concerned with the strategic-power position of the United States in the large area of the Pacific over which those islands are spread. It has been represented that we must hold a string of air and naval bases throughout those islands for two reasons:

The first is based on the belief that, under some form of a United Nations agreement, developing from Dumbarton Oaks, we will accept a large share of the responsibility for keeping the peace and maintaining law and order over the vast expanses of the Pacific Ocean. That includes, of course, a large part of the duty of insuring that Japan does not again disrupt that side of this world. In order to meet such commitments, our naval authorities insist that a system of bases, over which our power can be projected to the western side of the Pacific, is absolutely essential.

The second reason is narrower in scope but it is quite similar. Whether an international organization for world security evolves or not, many hold the opinion that we are morally committed to underwrite the security of the Philippines, at least for some years.

Our pre-war position in the Philippines, with Japan's power established throughout the Marshall, Caroline, and Marianas Islands, was very weak. We saw the results in the tragic history of the early days of the war. Our original military mistake lay in flying our flag in the Philippines and at the same time allowing all those islands on the road there to pass from Spain to other foreign hands. We permitted them to go to Germany in 1899 and then to Japan 20 years later. Consequently, we have been fighting a difficult and costly war across the central Pacific in order to restore the situation. Never again, say the military; if charged with the security of the Philippines they must have those same bases.

So much for the strategic-power aspect of the subject, except to say that the case of the naval authorities is good and their arguments are unanswerable if their premise is accepted. But the situation—and the problem of the Pacific islands—does contain factors other than those which directly concern the Army and the Navy.

It is not surprising that Americans generally knew so little about the islands of the Pacific before the war. In intrinsic value, a whole dozen of them may amount to very little. Many of us began to learn a few of their names, and a little about them, only when we read that our forces had assaulted this island or that. Some received the tragic word that their husbands, sons, or brothers had been killed while pushing the Japanese off some far-distant island, the name of which they had never even heard before.

As you contemplate those almost countless islands scattered over the central Pacific, you are, first of all, struck by the fact that the geography is both large and small. It is large in that the total areas of the seas dominated by those islands is enormous. You might be helped in visualizing things by remembering that the Pacific Ocean is larger than are all the five other oceans combined. However, the islands themselves are very small. A great many of them are scarcely more than sand spits. There are no large land masses among them, except for the Fiji Islands and some others still farther to the southwest which, comparatively speaking, are near Australia.

The Pacific islands are also small and unimportant from the standpoint of economics. With scant exceptions, there is no mineral wealth. The area for agriculture is so small and the soil is so poor that many of the islands could not feed their own inhabitants. Therefore, the islands are—and probably always will be—economic liabilities to any nation which carries responsibility for them. The only economic value will lie in facilitating sea and air communications across the Pacific.

In demography—the science of peoples—there is another marked incongruity. The social structure of the Pacific islands as a whole is both simple and complex. The number of inhabitants on most of the various clusters of islands is only a few hundred; and the sum total of the inhabitants of all the islands in the Pacific is not great. The inhabitants are a primitive and a simple people. Many of them are of good stock and few of them are poor stuff. They are a deserving people and—once again—a simple people.

In political organization and institutions, however, the situation is extremely complex. Several nations hold sovereignty or its equivalent in responsibility. In fact, no less than four governments besides our own are involved; and their holdings do not fit the geography. There is the United Kingdom, nearly on the opposite side of the earth, but holding full sovereignty over many islands spread over a large area of the Pacific. France, also acting from the other side of the earth, holds sovereignty over many far-flung islands in the south-central Pacific. In the case of the French islands, the political situation is particularly difficult, and with the seat of administration so remote, the affairs of the widely scattered people cannot at best be well handled. Australia and New Zealand are also in the picture but, from the standpoint of geography, their situation is favorable. Thus, a casual glance at the map shows a mingling of United Kingdom, of British Dominion, and of French sovereignty distributed over a vast area, with very little realistic integration for the welfare of the inhabitants.

As an example, take the New Hebrides, governed through a French and British condominion, that is, a combination of coequal officials from far-away Europe which handles the affairs of several islands. Not only does this governmental device result in complexity within, but those islands are surrounded by some which are under various other sovereignties.

Then there are the Samoan Islands, which furnish an illustration closer home to ourselves. The Samoans are one of the best of the island races and their tribal affinity is great. However, part of the small group is under our flag and part is governed by New Zealand under a mandate. Obviously, the Samoans would be better off under a single good administration. We of the United States have a particular interest in the welfare of the Samoans because we have been associated with them for a long time.

In general, the Pacific islands constitute what we now call a "region" and the lot of its peoples has never been good. The disruptions of the war years have made their lives much worse. Under wise and sympathetic administration, conditions for those peoples can be much improved. Being a region, such improvements can be facilitated if the problems come to be handled on a regional basis much more than has been the case in the past. It is to be sincerely hoped that the post-war years will bring some simplicity of political organization into the Central Pacific. If the full advantage of regional organization is to be attained, in the interests of the inhabitants, some political changes are essential.

Now to narrow this down to the Marshall, Caroline, and Marianas Islands. I don't think their future is necessarily something which should be settled at San Francisco, say, next month. That future will be a proper subject for the action of the international organization which is to come out of the conference which begins this week. Quite possibly the problem will not be solved until the peace conference that will be held after Japan is crushed. However, it is time to be thinking it over.

Japan, of course, must be evicted from those and some other Pacific islands where for years they have broken faith with the world, and exploited the natives. Their departure will leave a vacuum which someone must fill for the welfare of what will remain of the poor natives—if for no other reason.

Much advantage can accrue if all the islands of those three groups are under one government. As a region, there is, for one thing, considerable possibility in economic integration. For instance, one island can supply one product and another, not too far away, can produce something else to good advantage. All of them are in the typhoon belt and instances of complete devastation from such cause are too frequent. Such ravages are best remedied under a regional organization. And, in general, those islands can come closest to self-maintenance in the world of the future if they can deal and act as a unit.

The march of history, our record and standing before the world in treatment of the people of the Philippines, Guam, etc., and our prospective responsibilities for security of the Pacific, all point to the United States as the Nation to take over those islands from which our forces will have evicted the Japanese.

Based on assumptions that we are to do so, considerable discussion is ranging around the word "sovereignty"—which still happens to be a word of definite meaning. Then too, the word "mandate" gets into the picture. That word has come to have indefinite meanings and perhaps the whole international situation will become clearer if "mandate" goes out of the dictionary. Another word in the discussion of the day is "trusteeship". Whatever it may mean need not concern us because our record in the Philippines clearly proves that we have been a true and proper trustee over dependent people of other races—in the best and most inclusive meaning of the word.

There is another word which is being used in some circles, though not extensively. That word is "accountability." It is a sort of doctrine under which any nation holding authority over colonies or other alien territory accepts some measure of accountability to an international organization. The doctrine is still nebulous; and just what the world will do about it can't be seen today. But we need not fear or worry over anything which may develop under such a doctrine. Being the kind of people we are, we need have little concern about being held to any kind of accounting for the welfare of those islanders by anyone with a conscience that is more strict than is our own.

The foregoing is, in brief outline, the situation which the country is discussing. After years of thought and study of the Pacific Islands region, I venture the opinion that sovereignty of the United States will best meet the situation of those islands, from which our splendid forces are evicting the Japanese.

In the final analysis, American public opinion will play an important part in deciding this problem. And so, ladies and gentlemen of the N. B. C. audience, I urge that you think over and discuss the question of our taking charge of the Marshall, Caroline, and Marianas Islands for the welfare of their inhabitants and for the insurance of future peace in the Pacific.

Inefficiency and Food Shortage

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. PITTENGER. Mr. Speaker, Congress is investigating the food problem, food shortage, and other things that have to do with the producers and consumers and everybody else who handles food. It is rather sad to note that Congress has to make an investigation. However, such drastic procedure has become necessary because meat and some other foodstuffs have gone off the market. Naturally, somebody is responsible for this situation. In this country, which has always been able to produce surplus, there is no occasion for a food shortage if some sensible consideration is given to that old economic standby, the law of supply and demand.

Having in mind the problem of inflation, and the problem of price control, Congress passed legislation in keeping with world war developments, so that there might be price ceilings and controls which would prevent speculation, excessive costs of food, and so forth. The Office of Price Administration was created to meet that situation. Its policy-making officials apparently have fallen short of their purpose. They must have developed some wrong policies in connection with the production of food, and certainly they have made a failure in connection with supplying the American people with food. I think it fair to suggest that the Office of Price Administration is allergic to food. It may be that they can manufacture a good alibi. Alibi means blame the situation on somebody else. Anyhow, the food situation does create a serious problem. It is a serious problem for the person who runs a restaurant, hotel, or eating house. Just recently numerous complaints were made to me because the men who operate restaurants were unable to get points in sufficient amount to enable them to buy meat so as to stay in business. Then those who could get some points, found out there was no meat to be had. It seems to me that it is about time to abolish some of these Government agencies which have failed miserably in accomplishing the objects for which they were created. While their excuses for a bad situation are all earnest and plausible, these excuses do not take the place of food.

Congress ought to establish its own set-up, in an effort to give the American people relief. Congress could certainly do no worse than those in charge of present agencies. I could quote many items from the daily press, but the following item from the Times-Herald, Sunday, April 22, 1945, illustrates the situation:

VAIN HUNT MADE FOR MEAT, FOWL—LIMITED SUPPLIES QUICKLY SOLD OUT

(By James W. Booth)

Harried Washington housewives sought mostly in vain yesterday for meat or poultry to grace their Sunday dinner tables.

What few dealers had limited supplies on hand were speedily sold out, while others restricted sales to favored customers.

A citizen reported chicken-hungry residents descended early yesterday upon the market, Fifth Street and Florida Avenue NE, by the hundreds to pay as high as $9 for one fowl. At the same time similar throngs pushed and shoved in an effort to buy chickens at Tenth Street and Maine Avenue SW. The supply did not last long at either place.

All semblance of an effort to hold prices at O. P. A. ceiling levels was abandoned at the farmers' market it was reported. Some farmers simply sold their product to the highest bidder, and sales at $5 and $6 were common, another citizen reported.

This quotation, Mr. Speaker, illustrates the very serious situation which confronts the housewife in this day and age of our history. Now, someone is to blame. As I have indicated, we started out with this O. P. A. program, and naturally its first objective should have been the production of food. Every fourth-grade school student knew that the United States would be called on to feed not only our people but the rest of the world. Regardless of the man or men responsible for the present mess, policies and regulations were adopted by the executives of the O. P. A., which had the effect of reducing food production, and particularly livestock. It is high time that a bunch of these Government agencies which serve no proper purpose be abolished and some agency created by and responsible to Congress do something to relieve conditions. In the interest of straight thinking, just remember that Congress gave the administration all the power it needed to handle this food problem, and the administration has failed. Do not blame Congress for what somebody else has done.

Irrigation Projects in Wyoming

EXTENSION OF REMARKS

OF

HON. FRANK A. BARRETT

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. BARRETT of Wyoming. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include therein certain figures in connection with proposed irrigation projects in my State.

Mr. Speaker, on April 12, Secretary of the Interior Ickes and Commissioner of Reclamation Harry W. Bashore appeared before the House Committee on Irrigation and Reclamation in support of H. R. 520, a bill to facilitate the settlement of returning servicemen on Federal reclamation projects in the West. This measure introduced by the distinguished chairman of our committee, Hon. JOHN R. MURDOCK, of Arizona, is designed to give veterans of World War No. 2 90-day preference in securing homesteads on public lands which may be irrigated by the Bureau of Reclamation or on lands which the bill authorizes the Secretary of the Interior to purchase for the purpose of establishing irrigated farms for veterans. The committee is continuing hearings on this bill and from the interest shown I believe a measure will be reported which will receive the support of the House as a constructive program to give returning servicemen an opportunity to settle on irrigated land in the West, become self-sustaining, and contribute to the permanent development of the West and the country at large.

Commissioner Bashore presented to the committee an inventory of irrigation and multiple-purpose projects which could be included in a post-war public-works construction program by the Bureau of Reclamation. This inventory included more than 400 projects in the 17 Western States. Of these projects, more than 100 have already been authorized under the reclamation law or other legislation, and I hope to see the Bureau of Reclamation provided with funds for preconstruction purposes so that actual work may be provided for returning servicemen who will be looking for jobs in the West when they are demobilized.

My State of Wyoming is intensely interested in the current and prospective programs of the Bureau of Reclamation, which has already contributed materially to the agricultural and other development of the State through irrigation and facilities already in operation on the Shoshone, Riverton, and the North Platte projects. These projects, together with the Kendrick project, also develop power distributed through an interconnected system. The use of the irrigation facilities on the Kendrick project await water supplies. I hope that will be soon.

In the inventory, Wyoming has more than 60 projects or units which would require an investment of more than $239,000,000 to complete. Of these listed projects, 24 have been authorized. Most of these authorized projects are units of the Missouri Basin project, authorized by the Flood Control Act of 1944. Others authorized include the completion of the Shoshone-Heart Mountain, Riverton, and Kendrick irrigation projects, on which work was stopped because of the war. Heart Mountain and Riverton developments include large acreages of public lands which could be made available for settlement as soon as the irrigation facilities are completed. Work on the Eden project was stopped by the War Production Board, but it will be resumed as soon as conditions permit.

The completion of all the projects in the inventory would provide about 12,000 additional irrigated farms in Wyoming which could be made available for settlement. The construction of the power facilities would add about 150,000 kilowatts of power capacity for the mineral and industrial development of the State.

Most of the sixty-odd projects are included in the Missouri Basin plan of the Bureau of Reclamation outlined in Senate Document 191. More than 20 of them were authorized by the Flood Control Act. Another 20 were included in the approved Missouri Basin plan yet to be authorized, and about 20 others are under study by the Bureau of Reclamation in the Missouri and Green River Basins.

The Wyoming projects in the inventory are listed in the several categories as follows:

Projects in operation consist of the following:

Project	Irrigable area	Power installation
	Acres	*Kilowatts*
Kendrick		32,400
North Platte	55,292	6,209
Riverton	42,500	1,600
Shoshone	73,412	5,600

Construction of Eden project was approximately 16 percent complete when stopped by order of the War Production Board on December 12, 1942. Eden project will supply water for a total of 20,000 acres of land and will cost approximately $1,817,000 to complete.

Uncompleted portions of the following projects remain:

Project	Irrigable area	Cost
	Acres	
Kendrick	35,000	$1,584,000
Shoshone (Heart Mountain Division)	41,000	1,900,000
Riverton [1]		

[1] Included in Missouri River Basin authorization.

Projects authorized under the Missouri River Basin plan, H. R. 4485

Project	Acreage		Power installation	Cost
	New	Supplemental		
			Kilowatts	
Big Horn pumping unit (14 units)	20,000			$1,955,000
Big Horn project (Boysen Dam)			10,000	8,202,000
Glendo Reservoir		200,000		4,000,000
Kortes			30,000	5,545,000
Owl Creek		14,400		1,138,000
Paintrock	2,700	6,000		476,000
Riverton extension	57,500			3,000,000
Shoshone extension	76,100	5,200		10,678,000
Total	156,300	225,600	40,000	34,594,000

PROJECTS APPROVED UNDER THE MISSOURI RIVER BASIN PLAN

Hunter Mountain Reservoir (power)			8,000	8,300,000
Thief Creek Reservoir (power)			4,000	14,177,000
Sunlight Reservoir (power)			13,000	3,433,000
Bald Ridge (power plant)			19,000	7,419,000
Fremont	56,000			7,823,000
Little Wind River		34,000		527,000
Popo Agie		14,700		1,498,000
Hudson Bench	5,700			1,039,000
Shoshoni	16,600			1,192,000
Bad Water	1,100	2,700		618,000
Shell Creek		10,200		2,116,000
Kane Reservoir (flood, silt, and power)			46,000	12,035,000
Sheridan Canal		38,000		3,183,000
Tongue River (pumping)	26,100		9,000	2,790,000
Piney		9,600		847,000
Buffalo		10,400		3,181,000
Crazy Woman	9,400	6,900		2,845,000
French Creek		3,850		394,000
Kaycee	10,400	6,400		3,238,000
Arvada	17,700			1,602,000
Ucross	6,860	5,050		833,000
Keyhole Reservoir	(1)	(1)		750,000
Edgemont Reservoir	(1)	(1)		1,560,000
Total	149,860	141,800	99,000	81,400,000

[1] Lands in South Dakota.

Other projects in the investigation stage in Wyoming include the following, most of which are in the Green River—Colorado River System—Basin:

Project	Acreage		Power installation, kilowatts	Cost
	New	Supplemental		
Lyman	3,100	20,910	-------	$2,363,000
Little Snake River	-------	15,700	-------	310,000
Stump Creek	-------	20,000	-------	560,000
Powder River	84,100	46,200	-------	18,858,000
Seedskadie	40,830	-------	-------	4,600,000
La Barge, Fontenelle, Shell Creek, miscellaneous	12,000	20,000	-------	2,500,000
Evanston	(1)	25,600	-------	2,000,000
West Side	29,050	37,000	-------	27,500,000
Daniel	5,160	-------	-------	
Elkhorn	134,030	-------	1,000	
Paradise	4,490	-------	-------	400,000
Lower Big Sandy	11,850	-------	-------	900,000
Opal	16,020	5,400	-------	3,600,000
Henry's Fork	9,190	21,090	-------	2,500,000
South Pass Diversion	-------	-------	-------	1,200,000
Hams Fork Diversion	-------	-------	-------	5,600,000
Green-Bear Diversion	-------	-------	5,000	38,000,000
Total	349,820	211,300	6,000	110,881,000

[1] Amount of new lands undetermined.

Transmission lines authorized and under study amount to $7,000,000.

Pvt. (1st cl.) Gerald H. Poland

REMARKS

OF

HON. ROBERT HALE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. HALE. Mr. Speaker, I have asked for this time for the purpose of asking the unanimous consent of the House to the insertion in the RECORD of a poem written by Mrs. Helen Poland, of Woodstock, Maine, the mother of Pvt. (1st cl.) Gerald H. Poland, of the Seventeenth Airborne Division, killed in action in Belgium on January 6, together with an article concerning him. Two of Gerald Poland's brothers are in the armed forces. Mrs. Poland makes the suggestion that after the war our flag should be carried at half mast for a substantial period as a tribute to those who gave their lives for our victory.

The SPEAKER. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. HALE. Mr. Speaker, the poem and the article to which I have referred are as follows:

WHEN THE BLUE STARS TURN TO GOLD

Give us time for our sorrow,
The heart must master the dread,
For us there seems our tomorrow
Has gone with our valiant dead.

Hope in the heart is arrested,
And from our arms has been torn
That which once they cradled,
No bier over which to mourn.

Every path must be traveled,
Where their young feet have fled,
For them no glad tomorrow,
Our own beloved dead.

—*Helen Poland.*

PVT. (1ST CL.) GERALD H. POLAND

Pvt. (1st cl.) Gerald H. Poland, of the Seventeenth Airborne Division, who was reported missing in action in Belgium January 6, is now reported as killed January 6, according to a telegram from the War Department received by his mother, Helen K. Poland, of Woodstock.

He entered the service August 1943 and trained at Fort Benning, Ga., and later at Fort Bragg, N. C., and Camp MacKall, N. C., and Camp Forrest, Tenn.; going overseas August 1944, and trained in England for several months. The last letter he wrote was to his mother, December 27, 1944, from France. He belonged to the Seventeenth Airborne Division, Company G, Five Hundred and Thirteenth Paratroop Infantry.

Besides his father and mother, Leon and Helen Poland, of Woodstock, he leaves a grandfather and grandmother, Mr. and Mrs. Abner Benson, of West Paris; three brothers: Leon A. Poland, fireman first class, in the South Pacific; Corp. Vernon Poland, Italy; and Phelps Poland; three sisters: Dorothy, Evelyn, and Andrea Poland; four uncles: Wesley Poland, of Woodstock; Kenneth Benson, Woodstock; Gerald Benson, Norway; and Maurice Benson of West Paris; two nephews: Leon A. Poland, Jr., Kenneth Eugene Poland; and one niece: Beverly Poland; one aunt: Mrs. Evelyn Appleby, of Woodstock, and one great aunt, Mrs. Arvilla Silver of Woodstock; three great uncles: Eli Benson, of Saco, and Samuel Benson of North Conway, N. H., also, Charles Keith, of Bryant Pond; besides several cousins. Before entering the service he was a student of Woodstock High School and of the class of 1944.

Devastating Tornadoes

REMARKS

OF

HON. ROSS RIZLEY

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. RIZLEY. Mr. Speaker, on Thursday April 12 tornado twisters swept across the State of Oklahoma spreading destruction and death in a dozen cities and rural communities. Collectively, the tornado toll was the worst since the destructive twister of 1942, and the latest figures, though not final, lists 106 dead, 584 injured, 628 homes destroyed, 583 homes damaged, 416 buildings destroyed, and 1,420 people directly affected.

HOME TOWN OF CONGRESSMAN STEWART HARDEST HIT

Antlers, Okla., home town of Congressman PAUL STEWART was the most seriously hit community in the State. The tornado sweeping through this city of 3,000 like a lawn mower cut a path half a mile wide and 1¼ miles long and left 50 percent of the community in ruins. The latest figures show a fearful toll of 83 dead, 250 injured, 379 homes destroyed, 307 homes damaged, 254 buildings destroyed, 431 buildings damaged, and 600 people affected.

Congressman STEWART who was at his home in Antlers for the Easter recess of Congress escaped injury as well as his family although the path of the tornado came within 100 yards of his house. The Congressman had made arrangements to return to Washington on Friday the 13th but after the storm struck he canceled his trip and has remained in the stricken town to aid in the relief and rehabilitation work. From all reports the Congressman has done a heroic job for his people and his home town in their tragic hour of need.

Oklahoma citizens continue to pay tribute to the part played in rescue operations by the American Red Cross and a contingent of soldiers dispatched to the scene from Camp Maxie immediately after the devastating storm had laid waste to the town of Antlers. Col. Robert O. Annin, camp commander, upon receiving a call to Camp Maxie, for aid, dispatched soldiers to the scene, and within less than 2 hours, scores of doctors and first-aid men from regional hospitals and other personnel from the Army base arrived. Two first-aid stations were set up, headquarters were established in the Methodist Church, and hundreds of persons were taken and given temporary aid, and then swiftly taken to the regional hospital or other nearby hospitals in ambulances. American Red Cross, under the direction of H. C. Suydam, area director from the Red Cross headquarters in St. Louis, was on the job forthworth directing relief operations. In addition to furnishing immediate relief, the director began a survey of what will be needed to replace the homes and personal belongings which were destroyed and scattered over a wide area, doing everything humanly possible to aid, assist, and comfort the needy and the homeless.

Texas A. & M.'s Part in the War

REMARKS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, day before yesterday, April 21, was what is known in Texas as San Jacinto Day, it being the anniversary of the decisive battle of that name in the Texas revolution, when Texas won its independence and thereafter became a republic.

Texans always celebrate this historic event, but the House not being in session Saturday, I was unable to make remarks in the House commemorating this event.

There is one institution in Texas that consistently and almost religiously observes San Jacinto Day, and that is the Agricultural and Mechanical College of Texas, known as Texas A. & M. On April 21, former A. & M. students, wherever they may be, hold annual muster meetings in which they renew allegiance to Texas and also their alma mater, and commemorate A. & M. students who have passed away since their last muster meeting.

On April 21, 1942, just before the fall of Corregidor, there were a large number of officers and men in the Army stationed there who were former A. & M.

students, and they held their annual muster meeting, which proves that conditions never become too grave for Texas Aggies to remember their muster-meeting celebrations. Texas A. & M. men, following a tradition started in 1903, this year met together at their annual April 21 musters all over the world. For the first time in the tradition's history, this year found more musters held overseas than in the States, and Aggies, as former Texas A. & M. students are affectionately known, joined hands all around the world.

Saturday night, here in Washington, the National Capital Texas A. & M. Club held their annual muster meeting at the American Legion Club, which was attended by a large number of former A. & M. men stationed in Washington, 170 being present at this dinner, and the club had as its guest speaker the Honorable E. J. Kyle, beloved and known in Texas as Dean Kyle, who only recently retired as dean of agriculture at Texas A. & M. College, after having been connected with that college for 43 years, but who has recently been appointed Ambassador of the Government of the United States to the Republic of Guatemala, and who will within a few days leave for his new assignment.

About 2 years ago I made a brief speech in the House in which I recounted the active part which Texas A. & M. and its students played in the winning of World War No. 1 and are playing in the winning of World War No. 2, and I shall not at this time reiterate what I said then. However, I would like to point out a few significant facts with reference to Texas A. & M.'s part in World War No. 2.

Over 16,000 former students of Texas A. & M. are in the armed services today. During the years between 1918 and Pearl Harbor, Texas A. & M. was the largest military school in the United States, During the "soft" years, Texas A. & M. remembered its duty to train men both for peace and to defend their country. One highly important result was that when war came nearly 7,000 graduates of the college held active Reserve commissions and were immediately called to duty.

Twenty-seven former students of Texas A. & M. now hold the general's rank. Three former students have received, since Pearl Harbor, their Nation's highest military honor, the Congressional Medal of Honor. Five hundred former students of Texas A. & M. have already given their lives in the present war, and that roll is not complete.

Since the student body at Texas A. & M. is confined exclusively to men, attendance has been reduced during the war, since the fighting forces have taken most of the young men eligible for attendance there.

The size and accomplishments of Texas A. & M. are best told in reciting that this college produced more officers in time of war than West Point, and that its student body, before our participation in World War No. 2 was more than eight thousand.

Texas and the Nation is proud of this great school and the magnificent part it has played and is playing in the winning of this global war.

McGregor Introduces Bill To Assist Veterans in Post-war Program

REMARKS

OF

HON. J. HARRY McGREGOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McGREGOR. Mr. Speaker, I have today introduced a bill which I firmly believe merits the consideration and prompt action of this body. The bill reads as follows:

A bill to furnish enlisted personnel with transportation to their homes and with 30-day leave immediately prior to their honorable discharge from the armed forces

Be it enacted, etc., That each enlisted member of the land or naval forces of the United States shall, when it is determined that he is eligible to be honorably discharged from such service, be furnished the cost of transportation to his place of residence by common carrier and by the best available route, and shall be granted a leave of absence or furlough with full service pay for such time as he may require to return to his place of residence and for 30 additional days. Upon the termination of such leave of absence or furlough if he so desires he shall be immediately discharged from such service at his place of residence. For the purpose of this act, any such person may designate as his place of residence either his actual place of residence, the place of residence of his wife, or the place of residence of one or both of his parents.

SEC. 2. The Secretary of War and the Secretary of the Navy, respectively, shall prescribe such regulations as may be necessary to carry out the provisions of this act.

This is a bill to assist the economic stabilization of the post-war period. This legislation gives to those in military units an opportunity to return home, analyze fully what it means to return to civilian life and then allows the veterans to determine whether or not they want to be discharged at that time, or remain a part of the military services.

Rumors tell us, Mr. Speaker, that the War Department contemplates basing the program of discharge upon combat activities, terms of service overseas, dependency, and age. I cannot help but feel that when some of our veterans return to their homes and find conditions different from when they entered the service, they will not be anxious to immediately return to civilian life. I believe, Mr. Speaker, that the veterans who are designated to be eligible for discharge should be given the opportunity to decide whether or not they shall be discharged or remain in the service. Thinking that possibly a number of those who would be eligible for discharge in the first group would desire to remain in the military units, I believe the bill I have introduced will give them that opportunity, and if they do not desire discharges their places in the discharge quotas may be taken by some who possibly have or have not seen actual combat service, some who have dependents and some who have positions waiting for them upon their return to civilian life. I believe this legislation will open the way to those who desire to remain in the services, as well as give those who desire to return home the opportunity to accept positions in civilian life which they have recently vacated. It is my firm opinion, Mr. Speaker, this will be a major contribution to the rehabilitation program which we hope will be realized in the near future.

The San Francisco Conference

REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. GAVIN. Mr. Speaker, the San Francisco Conference to shape world affairs is one that will be keenly observed by the American people, and I might say if there is to be equality of voting rights in world affairs, let there be equality of sacrifice of those who are our allies in this war.

How are matters shaping up? At the San Francisco Conference, I understand, good old Uncle Sam gets one vote, Uncle Joe Stalin gets one vote, and John Bull gets six votes. Not a bad set-up for the British Empire and its Dominions.

However, I feel that if the British Dominions and our allies have equal voting rights in world affairs they should amend their national service acts so they have equal fighting rights.

Certainly we in America all pay tribute to the British Empire, its dominions, colonies, mandates, and protectorates. In fact, all parts of the United Kingdom, for the magnificent effort, the courage, the fortitude, and brilliant performance of those men and women who have carried on whether in Britain during the blitz, Dunkerque, Dieppe, north Africa, Italy, France, Germany, on all fighting fronts, a performance that has won for them the undying gratitude of the people of the world. Their losses have been terrific, as have ours, and I have been advised their losses are in line with ours but it must be remembered they have been in the war longer than we have. Today, however, the South Pacific area is costing the lives of thousands of American boys and I am of the opinion that the final result will be that Burma, Singapore, and Hong Kong will be returned to the British, French Indochina returned to France, the Dutch East Indies will be given back to the Netherlands, Manchuria, Formosa, and China, which the Japs now hold, will be returned to China, and those parts of Russia that were taken in the past will be returned to Russia and we are paying a great price in American youth to bring these conditions about. It is already suggested that we merely act as trustees for those islands

that our boys fought and died for. If we ever let loose of those islands I would say we are fit subjects for some mental institution.

Let me ask, is it not fair that our allies get into the South Pacific area with all the manpower they can muster to give us the necessary help for final victory?

However, I recently heard a Canadian broadcast which stated that no conscriptees who are now or who have been fighting overseas would be transferred to the South Pacific unless they volunteered for South Pacific service. It was recently announced by our War Department that our fighting troops in Europe would go direct to the South Pacific area. So, it looks as though the American boys will be called upon to do most of the fighting in the South Pacific when the European warfare ends.

Upon inquiry I find that in Canada the draft for military duty covers men from 18½ to 42 years of age, inclusive. Until December 1944 drafted men were not sent overseas unless they volunteered, in spite of a law that had been amended to provide they could be sent out for active overseas duty.

How extensively Canadian fighting forces are going to participate with us in the South Pacific no one is able to say.

Now in reference to Australia in the South Pacific where most of the fighting is now going on. I might say the Australian boys who have done the fighting and dying have turned in records that will live forevermore; their courage and performance have been outstanding. However, it must also be remembered that a couple of years ago Australia's back was up against the wall and they appealed to us for men, supplies, and equipment to repel the Jap invasion. Now Australia had a law on the books which read that members of the defense forces who are members of the military forces shall not be required, unless they voluntarily agree to do so, to serve beyond the limits of the Commonwealth or any territory under the authority of the Commonwealth. This act was changed in 1943 to take in a little additional territory known as the Southwest Pacific zone, which about covers New Guinea, parts of Borneo, and Netherland East Indies, or the approach to Australia from the north.

The Defense Act No. 2 of 1943, article 3, states,

> In this act "the southwestern Pacific zone" means the area bounded on the west by the one hundred and tenth meridian of east longitude, on the north by the Equator, and on the east by the one hundred and fifty-ninth meridian of east longitude.

Or, in other words, as I understand it, unless a conscriptee volunteers he would not be compelled to do any fighting except within the territorial limits outlined in the act.

Certainly, we are all in this war together, and if the Dominions have equal voting privileges, they should have equal fighting opportunities. No reservations should be made on conscriptees or any other fighting forces as to when or where they shall be sent to fight.

We take our boys here at home, give them 15 to 17 weeks of basic training and land them in France, Germany, or the South Pacific, or wherever we want to send them. It is not a matter of volunteering here as it is in the Dominions for overseas service. They are just shipped anywhere the War Department needs manpower. No reservations are made. Away they go.

Certainly Uncle Sam has responded nobly with our manpower and equipment in the European theater of war and in the Southwest Pacific. Prime Minister Churchill states our losses have been 60 to 1 on western front. The record speaks for itself and our boys have turned in a brilliant performance on every fighting front throughout the world.

Therefore, I believe the service acts of the Dominions of the British Empire should be changed so all conscriptees are on an equal basis with no reservations made. If we had the same kind of laws on our books it might be a question of how many mothers in this country might want their boys at the age of 18 to volunteer for overseas service. Let there be no special privileges, if we conscript our boys at 18 our allies should do likewise.

I want this understood to be an appeal to interest the Dominions to put up their manpower on the same basis as we are, as it is only fair to the Canadian, Australian, and American boys who have done the fighting and dying and who have turned in records throughout the world that will live forevermore.

Now some of our men have been overseas in the European theater for 2 or 3 years and would like a chance to come home for a period of readjustment. Heaven knows a great many of them need it and they all deserve it. Now we are out to win this war and just as quickly as possible, so for military expediency I presume our men will go direct from the European fighting area into the south Pacific. We all want to bring this war to a rapid and early conclusion to save the lives of our thousands of boys, get this job done, and crush forever the totalitarian powers of Europe and Asia.

I feel the National Service Acts of our Allies should be on the same footing as ours and no reservations or restrictions made in any of the Allied countries. Certainly we make no reservations. There should be no reservations. All of these boys from the Allied countries, and I mean the Dominions, fighting this war ought to be given the same consideration. It is just as unfair to their own boys as it is to ours. And our fighting troops in the South Pacific should be given the support necessary to bring this war to an early close.

So, if equal voting rights are granted to the British Dominions in world affairs, their National Service Acts should be amended to give us the unquestioned support necessary to fight with us in any part of the world to destroy our treacherous, fanatical enemies.

I am of the opinion it would have pleased and bolstered the morale of our American people if some Canadian, Australian, British, and South African troops had been with us at Saipan, Iwo Jima, and Okinawa, particularly from countries which are nearer to these islands than we are.

I do not like to feel this South Pacific war is our war alone because outside of the Philippines we have little or no possessions to battle over and our allies will benefit to a greater extent in the South Pacific than will the United States.

When the European war ends all the manpower of the Allies and total resources and equipment should go into the South Pacific for a speedy and total victory.

The Attitude of American Youth Toward Compulsory Military Training

EXTENSION OF REMARKS

OF

HON. J. HARRY McGREGOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McGREGOR. Mr. Speaker, under leave to extend my remarks, I am including an essay written by one of my constituents, Miss Therese Zuccaro, a student of St. Vincent De Paul School, Mount Vernon, Ohio, who is one of the winners of the essay contest sponsored by the American Legion of Ohio. This contest was entered by approximately 150,000 of our State.

I congratulate Miss Zuccaro on being one of the 11 winners and upon her achievement, and respectfully urge the membership of the House of Representatives to read her splendid essay.

I also compliment the American Legion of Ohio for sponsoring such a worthwhile program; and they have today brought these 11 winners as their guests to the greatest capital of the world.

The essay follows:

In my opinion compulsory military training is the best means of insuring ourselves against war. We must be ready when our country calls upon us. It is the only real security of our Nation against other nations who become jealous and wish supreme power over all the world.

In January 1790, in a message to Congress, the most war-weary and peace-minded of our Presidents said, "To be prepared for war is one of the most effectual ways of preserving peace—a free people ought not only to be armed but disciplined." These words were said by George Washington, the Father of our Country. The two basic arguments for military training in time of peace are summarized in these two sentences. Washington was prefacing an administration bill, that, as a common obligation of citizenship, provided for the universal military training of young men. The defeat of that bill has cost the United States millions of lives and billions of dollars from that time down to today. If the effective and democratic system which Washington so earnestly advocated had been in force two and possibly three of our great wars would probably never have been fought.

Our repeated failure to maintain military power has drawn us into wars, wars which could have been prevented if we had held it. The best and cheapest way of repairing our historical mistake is military training. Furthermore, it is an excellent way of defending ourselves against and forbidding other nations to wage war.

Physically, we are a vast country. We have hardened into social and economic

classes. We need new leveling forces, and effective ways of renewing our democracy.

I sometimes hear it argued that the possession of military power makes nations militaristic and must lead them into war. The truth is quite otherwise, as Washington told Congress. Lack of power, indeed, may make war inevitable. Lack of it led us into war with the Barbary states and with Great Britain in the early years of the nineteenth century. Our lack of it enabled Germany to defy us in the First World War and to disregard us when preparing for this one. But possession of power does not necessarily lead to war. For more than 60 years the French Republic had a powerful army based on 2 years (and part of the time, 3 years) of universal military training, and never once committed aggression against her neighbors. For nearly 20 years Russia was developing the mighty armies which saved us from defeat by securing time to organize the forces we ought to have had to begin with and never once had to make an aggressive move against anyone.

Military training will make our young men stronger, healthier, more disciplined, and more self-reliant It will mature them emotionally, help them to be courageous, teach them understanding, and give them a knowledge of their country.

Clearly it is the most important instrument that democracy can bring to the job of safeguarding its future.

Government Life Insurance Policies

REMARKS

OF

HON. ROBERT SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. SIKES. Mr. Speaker, I am offering a bill to embody in national service life insurance the advantages which are contained in United States Government life insurance. The enactment of my measure will provide that all national service life insurance policies which are now in effect or which later may be issued to the members of the armed forces shall include those additional benefits that are contained in the United States Government life insurance policies. National service policies are issued to persons having active service in World War No. 2, but United States Government policies are limited to persons who served in World War No. 1.

The advantages of United States Government life-insurance are positive ones. Consequently, my measure affects directly the welfare of each of the 15,000,000 American men and women who have or who will have seen service in the armed forces by the end of World War No. 2. This is borne out by no less an authority than The Adjutant General of the United States, Maj. Gen. J. A. Ulio, who stated on December 31, 1942, in a general memorandum on life insurance to the armed forces that United States Government life insurance has the following advantages over national service life insurance:

(a) They contain a permanent and total disability benefits clause.

(b) There are no restrictions as to the individuals who may be named beneficiaries, including estates.

(c) Death benefits may be paid in a lump sum, or in stated amounts for a limited period or for life.

(d) Premium rates are lower.

My studies of this important question lead me to believe that there are still further advantages, some of them material ones, in United States Government life insurance, and I have had prepared a table which shows in outline form the principal differences between the two types of insurance:

Principal differences, national service life insurance versus U. S. Government life insurance

Difference	National service life insurance	U. S. Government life insurance
1. Reserve basis	3 percent	3½ percent.
2. Disability income	None	$5.75 per $1,000 monthly.
3. Additional disability income	do	Do.
4. Automatic death benefit	Beneficiary under age 30, $5.51 per $1,000 monthly for 240 months. Beneficiary age 30 and over, life income, 10 years certain.	$5.75 per $1,000 monthly for 240 months.
5. Settlement options	Two: (1) "Automatic" settlement; (2) refund life income, regardless of beneficiary's age.	Four: (1) Cash; (2) monthly income, 3 to 20 years; (3) life income, 20 years certain; (4) life income, 10 years certain.
6. Eligibility	Active duty World War No. 2	World War No. 1 service.
7. Effective date	Any day of month	1st day of month only.
8. Medical examination required	After first 120 days	At all times.
9. Number of permanent plans	3	6.
10. Beneficiary eligibility	Restricted	Unrestricted.
11. Proceeds payable to estate	Only excess of reserve (on converted policy) over payments made to qualified beneficiary.	Permitted for entire death benefit.
12. Proceeds payable in 1 sum	Not permitted	Permitted.
13. Reinstatement	Comparative health statement, VA-353, while in service or within 6 months after discharge, or within 3 months of lapse thereafter.	Medical examination required after 3 months of lapse.
14. Provision for payment of first premium by advance of Government pay.	Yes	No.

Mr. Speaker, the question of placing national service life insurance on a more equitable basis with United States Government life insurance is one which cannot in justice be postponed. Many thousands of claims are being paid out each year. World War No. 2 veterans and their families are being differentiated against unduly each day the present differences remain in effect. I trust that we may speedily obtain action on this matter. It is a $100,000,000,000 problem, which directly affects every serviceman and a majority of the families of this Nation.

Observations on Price Control

EXTENSION OF REMARKS

OF

HON. WALTER H. JUDD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 12, 1945

Mr. JUDD. Mr. Speaker, under leave to extend my remarks, I include a thought-provoking article on the dangers to our whole price-stabilization program arising from the enormous and steadily increasing amount of money in circulation today:

Recent more or less official opinion of the need to suppress speculation to prevent rising prices of capital assets is a typical example of the universal tendency to blame bad results on effect rather than on cause. This is particularly true when it would have been unpopular or difficult to deal with the cause.

Basic human reactions to fundamental conditions change but little from one generation to the next. We were particularly struck with this thought as we read "War and Inflation in Spain 1780–1800," by Earl J. Hamilton. This article appears in the November issue of the Quarterly Journal of Economics. Mr. Hamilton writes, "Throughout the ages, inflation-minded ministers have attributed currency depreciation to speculation," and he quotes from a decree of the Spanish crown issued in 1799 as follows: "Men who having abandoned callings useful to society and not being restrained by honor or virtue are the instruments that speculators employ for the nefarious, cunning, and perfidious maneuvers through which, to satisfy their greed, they degrade the paper money of the state, nothwithstanding the religious punctuality with which the interest is paid, a part of the capital is amortized, and other promises are fulfilled."

When prices begin to rise due to continued deficit financing building up an excessive supply of money in the hands of individuals, the tendency to attempt to control the effect (rising prices) rather than the cause (surplus money) results in part on a failure to understand the rather peculiar effect which an overabundant supply of money has upon price levels. The effect on prices of an overabundant supply of money is less familiar to us than the more well-known price factors such as supply and demand, wage costs, etc. This is understandable because it is only rarely that the supply of money is not more or less in balance with business needs.

Obviously, our cost of living or over-all price structure is the total of the cost of a vast number of individual and often wholly unrelated articles. We are accustomed to dealing with these individual prices and the factors affecting them. We can see that, if one of these articles is in over-abundant supply, the price will decline, or conversely, when demand exceeds supply, we must pay a higher price. Changing manufacturing costs such as wages, manufacturing efficiency, etc., are likewise familiar and easily understood. We usually deal with these various price questions, however, in an economy where the supply of money fluctuates more or less with the requirements of business from year to

year and hence, money supply can be disregarded as a price factor.

The total amount of money and the total ways in which this money can be spent constitutes the framework within which these individual price factors function. This can be expressed in simplified form as money in use equals general prices plus trade.

Trade is the entire economy of the country and is all inclusive, even to real estate and other capital transfers, service and business payments, etc. When the equilibrium between money in use and trade is broken, we either inflate or deflate.

When money in use increases at a greater rate than the requirements of trade, the resulting increase in price is inflation. In our opinion, the word "inflation" should be reserved for such an increase in price resulting from monetary causes and not be applied to rising prices resulting from changes in cost or supply and demand factors affecting particular prices.

It is evident that when the amount of money in use increases at a greater rate than the requirements of trade, the general price level must rise. This does not mean of course that the price of every particular article making up this general price level must rise. The supply and demand for each particular article as well as actual manufacturing costs will continue to operate within the monetary framework, and particular prices will fluctuate accordingly. It is the over-all effect that is confusing where an increase in money in use establishes the framework of general prices within which each particular price moves.

There is no argument about the increased monetary purchasing power in the form of deposits and currency created in the United States during the war. The extent of this increase, however, is not always appreciated. As a matter of fact, even without allowing for the vast potential purchasing power which is held in the form of savings deposits and Government bonds, demand deposits and currency in circulation alone have increased both absolutely and percentage-wise at a greater rate than at any time since the disastrous inflation of the Revolutionary War. We have made the following estimates:

Change in per capita cash purchasing power

	War years		To post-war peak	
	Absolute	Percent increase	Absolute	Percent increase
1812	$8	71	$10	90
Civil War	21	96	22	100
World War I	38	27	92	67
World War II	480	180	(?)	(?)

There is no reason to believe that we have as yet reached the end of this expansion of deposits and currency. In fact, there is every likelihood that the increase will continue, certainly until the end of the war and possibly for a number of years thereafter. There appears to be no evidence of a change in philosophy on the part of policy-making officials in Washington and "spending for recovery," which has been a basic tenet of the New Deal, seems as strong as ever. Anyone who thinks otherwise should read the speech titled "Post-war Problems and Policies" made by Dr. Goldenwiser, who served for many years as Director of the Division of Research and Statistics of the Federal Reserve Board, and is now economic adviser to the Board. Dr. Goldenwiser's speech is reprinted in the February 1945 issue of the Federal Reserve Bulletin.

There is every indication that plans are being formulated for another deluge of public spending if the post-war reconversion period leads to what is considered to be excessive unemployment and cuts in wage payments.

As we have increased the supply of money, its use has tended to decline. There are a number of reasons for this, among which we think the following are the most important: (1) There are many things we would like to buy which are actually not being made today. (2) There is the uncertainty of the continuation of war jobs and the desire to set aside part of earnings against a possible period of unemployment. (3) There is a sincere unwillingness to spend freely during the war and a willingness to abide by price control and rationing as an aid to the war effort. When the war is over and the patriotic motive no longer prevails, we are extremely skeptical as to the willingness of people to continue to buy with restraint. We think they will spend more freely for something, although we would not venture to guess what it might be.

Where and when the increased use of the superabundant supply of money would be felt cannot in our opinion be forecast. As far as we have been able to learn, there has never been in the world's history a period following a continued and rapid increase in money supply when people have not eventually spent freely, and we believe they will again with the consequent inflationary effect upon the general price level.

If it should be found that this excess money was beginning to be used to purchase capital assets with corresponding rising prices and some such measures were adopted as were recently recommended by Marriner S. Eccles, we doubt their effectiveness in controlling the inflationary problem. Assuming they were successful in preventing expenditures on capital assets, we believe that once having created the desire to exchange money for goods or property, the money would merely be spent elsewhere. It might even be driven underground to black markets which we think would be far more harmful, particularly if this spending happened to break out in commodities and foodstuffs which, through rising basic living costs, would affect everyone and the poor more than the rich.

We question Mr. Eccles' argument that as the tax measures would be applied only to purchases made after a certain date during the war, they would tend to dry up buying rather than selling. It is our belief that when the cause of rising prices rests in a disequilibrium of the monetary framework—inflation—people buy not as a speculation on short-run prices but because they fear a decline in the purchasing power of their money and are interested in acquiring property which they believe will tend to maintain its value. We discussed this phase of the question at length in our comments of February 12, 1945. If this assumption is correct, the fact that newly acquired capital assets could be sold only at a heavy penalty would not restrain one from buying. The motive would be long-term preservation of purchasing power, not a short-term speculation in price.

Since any funds realized from the sale of old assets not affected by the new taxes would immediately come under the new restrictions when reinvested, we think that such sales would be made only under great provocation. Therefore, it seems to us that rather than having the desired effect on restraining the rise, capital values would be forced higher than ever through a restricted supply, while demand stemming from the increased money supply was unaffected. If our analysis of the reasons for buying capital assets as a protection against rising prices is correct, it seems to us that those who share our beliefs would be benefited rather than harmed by these proposals which Mr. Eccles recognizes deal with effect rather than cause.

Many people are counting on a tremendous volume of production of peacetime goods to keep prices down after the war. Generally speaking, however, production creates the purchasing power with which to buy itself. This, therefore, still leaves us with the excess money supply built up during the war with which to deal. This excess money supply is largely based on Government debt and its reduction depends upon debt retirement or purchases by individuals of bonds now held in the banking system. This seems most unlikely.

Because price controls and supply and demand operate within the monetary framework, they are effective in determining relative prices of particular things once money in use expands at a greater rate than trade requirements. They have never been known to be a solution to the rise of general prices growing out of disequilibrium between money and trade. As long as we attempt to deal with the effect rather than the cause, the unknown is, in our opinion, merely when, where, and how much prices will rise.

ECONOMIC TREND LINE STUDIES.
M. D. MOREHOUSE.

Missouri Legislature Pledges Support to President Truman

EXTENSION OF REMARKS
OF
HON. ORVILLE ZIMMERMAN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. ZIMMERMAN. Mr. Speaker, on April 16, 1945, the Missouri Legislature passed a Senate concurrent resolution in which it pledged to President Harry S. Truman, Missouri's first President, its loyal support in the performance of the arduous duties recently thrust upon him.

Mr. Speaker, this resolution expresses the feeling of the people of Missouri and, I believe, of the entire Nation. We all realize that these are critical and eventful days in our country's history and a time when our Commander in Chief and Chief Executive should have the united, loyal support of every true American. If we give him that support and backing President Truman will give every ounce of his being in bringing to us and to the world a speedy victory over the focs of democracy and a lasting peace.

Under leave granted, I insert at this point the resolution, which is as follows:

Senate Concurrent Resolution 10

Whereas by that inexorable decree of fate from which there lies no appeal, a native-born Missourian, the Honorable Harry S. Truman, has been exalted to the high office of President of the United States of America in, we hope, the last days of the most devastating and extensive war of all history; and

Whereas we take considerable pride in the fact that a native-born Missourian, for the first time in the history of the United States, occupies the office of Chief Executive of the Nation; and

Whereas it is vital to our national interest that we, of whatever political faith and regardless of whatever views we may entertain as to domestic policies, stand solidly together in all things affecting the interest, the power, the prestige, and the perpetuity of our beloved Nation: Therefore be it

Resolved by the Senate of the Sixty-third General Assembly of Missouri (the House of Representatives concurring therein), That we express our implicit faith in His Excellency, the Honorable Harry S. Truman, as Commander in Chief of our armed forces and as our new leader in world affairs; that we pledge to him our undivided loyalty and support in the discharge of the onerous duties that confront him; that we are confident he will, with our allies, continue the prosecution of World War No. 2 to final victory,

and may Divine Providence so guide us in the adjustments that must be made by and between the peace-loving nations of the world that in winning the war we shall also win the peace—peace that shall bless the world for generations to follow and through the ages to come; and be it further

Resolved, That this resolution be printed in the journal and an engrossed copy thereof sent to His Excellency, the Honorable Harry S. Truman, President of the United States of America; to the Honorable FORREST C. DONNELL and the Honorable FRANK P. BRIGGS, Senators in Congress from Missouri; and to each of the members of the Missouri delegation in the House of Representatives.

Address of Prime Minister Eamon de Valera

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include therein a touching tribute to our late beloved President, Franklin Delano Roosevelt, made by Hon. Eamon de Valera, Prime Minister of Ireland, on April 13, 1945, in moving the adjournment that day of Dail Eireann "as a mark of respect and of sympathy with the American people on the death of their President."

I also include herein a copy of the resolution of adjournment, and a copy of Prime Minister de Valera's message to President Truman:

REMARKS OF PRIME MINISTER EAMON DE VALERA IN MOVING THE ADJOURNMENT OF DAIL EIREANN, APRIL 13, 1945

I wish to move the adjournment of the Dail as a mark of respect and of sympathy with the American people on the death of their President. We have very special reasons for sympathizing with the American people, so many of whom are of our own blood, and we should like to let them know from this house how deeply we sympathize with them in the loss of their great leader who has led them successfully through so many trials.

President Roosevelt will go down to history as one of the greatest of a long line of American Presidents, with the unparalleled distinction of having been elected four times as head of the United States. That was the greatest tribute that could be paid to any man. It is also a measure of his loss. Personally, I regard his death as a loss to the world for I believe his whole career had shown that he could ultimately be depended upon when this war had ended to throw his great influence behind and devote his great energy to the establishment of a world organization which would be just and which, being just, could hope to save humanity from recurring calamities like the present war.

We should also like to express our deep sympathy with President Roosevelt's family to which he was so deeply attached.

Guidhim Trocaire De air a anam agus go dtuga De solas da mhuintir.

RESOLUTION PASSED BY DAIL EIREANN ON APRIL 13, 1945

Resolved, That Dail Eireann extends to the people of the United States its deep sympathy on the death of President Roosevelt and as a tribute of respect to his memory that the House do now adjourn.

MESSAGE SENT BY MR. DE VALERA TO PRESIDENT TRUMAN ON APRIL 13, 1945

On behalf of the Government, of Dail Eireann, and of the people of Ireland, I wish to express our deep sorrow on the death of President Roosevelt and our very great sympathy with his family and with the American people in the calamity which has befallen them. America has lost a great man and a noble leader.

May God give solace and strength to his family to bear their great trial.

Valiant Leader

EXTENSION OF REMARKS

OF

HON. CLARENCE CANNON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CANNON of Missouri. Mr. Speaker, fellow Missourians have called my attention to an editorial in the New York Daily Mirror of April 14, a eulogy of Franklin D. Roosevelt. The editorial appears anonymously but I have learned that it is from the gifted pen of Glenn Neville, a native of St. Joseph, Mo., the editor of the Mirror, and as it is one of the most beautiful and eloquent tributes paid to the late President, I have asked that it be inserted in the CONGRESSIONAL RECORD.

The editorial is as follows:

PRAYER

The day is beautiful with spring.

The valiant leader goes home through the land he loved for the long rest and the vast forever.

GALLANT LEADER

Laughing as he fought our battles, parrying our own barbs with twinkling wit, the chin outthrust, upraised, the cigaret at the jaunty tilt, the spectacles catching the light.

BRAVE LEADER

Stirring the chill blood in our hearts, challenging, chiding:

"This great Nation will endure as it has endured, will revive, and will prosper—the only thing we have to fear is fear itself."

Learning patience in pain. Learning the anodyne of pain in work. Learning the leaven of humor:

"I hope you will pardon me for the unusual posture of sitting down. I know you will realize it makes it a lot easier for me in not having to carry about 10 pounds of steel around on the bottom of my legs."

VICTORIOUS LEADER

Demanding the difficult. Assuming the impossible.

Calling upon America for 100,000 planes. ("Impossible!" some said.) Calling for 75,000 tanks. ("Impossible!") Calling for 10,000,000 guns, 10,000 ships. ("Impossible!") The impossible becoming the usual. And the quiet, terrible might of America outstripping every goal.

Our armies shattering the evil idols. Smashing the ridiculous egotists of the East and West. Our flags astream, our victory near, and then—

In the newspaper offices, the radio stations, over the air, into the homes, the bullet-like shock of the words—the President is dead.

The finality and the beginning.

For him who phrased the freedoms, who believed in "the triumph of the ideal," who hated war, who died that men might not senselessly die again, we to whom the grief is close, and humble, millions through the world, beseech the grace of God.

Post-war Planning in Economic Adjustments

EXTENSION OF REMARKS

OF

HON. EMORY H. PRICE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. PRICE of Florida. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address entitled "Post-war Planning in Economic Adjustments," by Cecil Wright Pemberton, executive secretary, Florida Tax Information Association, Inc., before the Riverside Woman's Club, April 4, 1945:

In the very kind invitation given to be guest this morning, every assurance was given that my guess would be as good as anyone's, the subject being Post-war Planning in Economic Adjustments. However much we might wish to write a formula or a blueprint for a post-war world, the vagaries of human nature doom such a process to disappointment. Indeed, despite the effort at world organization, and the grandiose plans for a parley on world problems, the effort has serious obstructions at the outset. Omens of ill will and suspicion precede it.

While total war is conducted by methods which change as to tactics and equipment from day to day, always being perfected, the world statesmen continue with equipment of about the fifteenth century. On the record of history down to the present hour, there has been no improvement in man's relation to man from decade to decade, nor from century to century except to get worse. Behold the present. Witness the past. Then guess the future.

While men fight and die under the most horrible conditions all over the globe, the hope of the world has been focused on the slim possibilities of the slogan, "This must be the last war." Before the firing ceases or the guns grow cold, a framework of international cooperation is suggested in two ways: 1. Dumbarton Oaks; 2. Bretton Woods agreement.

JUST WHAT IS DUMBARTON OAKS?

This is the name given to the Washington estate where statesmen came together in 1944 and made preliminary arrangements for the later meeting to be held in San Francisco, Calif., on April 25, 1945. The tentative understanding was that 44 nations were to participate; that the rights of all nations were to be recognized within the framework; that voting privileges would be equal; and the right to establish governments of their own choosing would be acceptable carte blanche. This was supposed to rest on declarations of the Atlantic Charter, but suddenly it was discovered that the Atlantic Charter did not exist beyond some verbal transmissions, easily entered into and just as easily disregarded. Such is the record of Dumbarton Oaks past. The record of San Francisco is yet to be written.

During 1944 the international aviation conference (Chicago, Ill.) was ignored by Russia, who declined to send delegates. At the Yalta meeting of the Big Three, it now ap-

pears there was appeasement, and voting balance was secret agenda. Russia demands the Lublin committee be seated at the San Francisco conference, which both the United States and Great Britain stoutly reject. On top of that, and as fuel to the flames, Russia sends only her Ambassador to the United States to attend at San Francisco, which Great Britain and the United States again protest in strong terms, for this shows contempt for the whole effort.

PESSIMISM DEVELOPS; GLOOM PERVADES

Despite these obstructions, depressing as they are, the effort should not be abandoned; and they should have the prayers and support of the peoples of the world who yearn for peace after the greatest blood bath of all history; a war which stretches from pole to pole, reaches over every continent of the earth, shattering life and wealth accumulations of the centuries. However much or little that may come out of San Francisco, the lesser known and confused Bretton Woods proposal is history making in portent and objectivity.

JUST WHAT IS BRETTON WOODS?

Located in New Hampshire, it was a convenient meeting place during 1944 for bankers, economists, and internationalists.

WHAT WAS DONE AT BRETTON WOODS?

Two items of the cumbersome agenda seem to sum it up: (1) There was proposed an international loan fund of $9,000,000,000 the United States to contribute $3,000,000,000; (2) There was proposed an International Bank of Reconstruction and Development, which would supposedly dispose of international fiscal policies and financial adjustments. It is noteworthy that this conference was dominated in great degree by the personality of Lord Maynard Keynes (which is pronounced Kanes), whose theoretical schemes have been put to practice more in the United States than the United Kingdom during the past decade.

As to the bank, this has not received any serious objections but the loan fund has become the target for mounting attack and defense. It is well to regard these contentions, pro and con, for it is the loan fund which activates the process of a so-called international accord. The San Francisco Conference is to give over considerable time to an international police force (called security council), but this idea has been frowned on by Russia who flatly declare they (Russia) will not be policed if adjudged wrong. Since the whole conference procedure is like giving a pledge to a lodge, church, or sorority affair—a pledge more often observed in the breach than in the performance—the stability of the double talk coming out of San Francisco must be finally hinged on Bretton Woods economics, and what comes out of that.

Thus we find Bretton Woods is superior to Dumbarton Oaks; and we discover that within the Bretton Woods proposal, the loan fund is superior in importance to the bank of reconstruction.

THE MECHANICS OF THE LOAN FUND

Out of the total of $9,000,000,000 contemplated, the United States is accorded the high honor (??) of putting up three billion. Where money is involved, the United States is always elected, and this is no exception. Our status thereafter is 28 percent of the voting power. It is further provided that we place into the fund actually $600,000,000, which is divided 10-percent gold ($60,000,000 gold), and the balance in dollars of the Nation's currency. Our full liability, of course, is $3,000,000,000, and must be added to the gross debt of this Nation when adopted.

At this point, the advocates and opponents divide into two camps.

Pro-loan fund: The supporters claim with mounting enthusiasm that we are spending at the rate of $260,000,000 daily to prosecute the war, that we have a gross direct net debt of $234,000,000,000: and three billion more or less is of no consequence when it will put the world on its feet. This argument proceeds further to urge that loans will make purchases, purchasing will turn the wheels of industry (whose wheels?) business will boom and the golden era will be upon us. Wars will not happen and just can't happen, assert the advocates. Added to this is a long parade of economic supporters, which just about clinches the argument beyond contention. Any criticism, therefore, is reactionary, unprincipled, and unchristian.

Con-loan fund: On the other hand, we have the kill-joys who come out flatly that it just won't work. They declare, and with considerable force, that loans and gifts will march hand in hand in any such a deal; that the United States will be the sucker. The authorities, they assert, paraded as economists are all socialists of the first water, and actually a nondescript, conglomerate bunch of left wingers with a decided red, at least pink, glow and complexion. Opposition is stubborn, insisting the contrivance not be swallowed full blown in the bottle without removing the cork to see what it smells like.

Both positions are extreme, of course. But the pressure to have this approved without fullest discussion and analysis make it suspicious; it suggests added caution and conservatism in dealing with the question. The loan fund is probably a lend-lease under another name. The bank of reconstruction handles long-term loans, which come due in 1980 in the main. There have been discovered some glaring omissions as to controls in both the bank and the loan fund. While currencies are held to be the focus for stability, this divides into two schools of thought, of approval and disapproval. One group insist the dollar and the pound sterling be held in line, while the opposite group demur to this procedure; they would make all currencies a case study and artificially pump them up. The assumption is therefore made that money will do the whole job, while common sense—and the record dictates—that control be exercised over added factors.

CARTELS, TARIFFS, NEWS, AND PROPAGANDA FACTORIES

Loaning money outside the United States has always been a risky business, not alone because of the political complexities but more because of the way business is conducted in secret fashion. Our whole lending power underwrites this loan fund despite the power to withdraw. While we put up $3,000,000,000, or its equivalent, just what the balance of the nations can or will put up is interesting conjecture. Almost all of them are broke or without resources that are not already pledged. Through August 1944, the British Ministry of Economic Warfare announced the Nazis had looted $24,600,000,000 from the occupied countries. Great Britain is little better off.

A word of caution on Dumbarton Oaks. Dumbarton Oaks is not another Treaty of Versailles. It does not assume nor presume boundaries, fix reparations, nor seek revenge. Dumbarton Oaks is simply a parley intended, among other things, to settle on some kind of international security council, primarily, to contain the peace of the world—if and when we get it.

Since war making has become more of an economic process than either political or military processes, the omissions of Bretton Woods, and its decided lack of clarity on some phases, must be taken—even stressed—as weaknesses. Stability of currencies within nations, individually, is assumed as a prerequisite of peace. Nothing could be further from the truth. Unless cartels are controlled, tariffs are policed, and propaganda outlets curbed, there will be war in less time than 20 years. Let us address ourselves to these problems.

Cartels: A cartel is an arrangement between producers who control prime sources of materials and output for the marketing and distribution of this output in specified areas. It is not a trust. It is not a corporation. It is not an individual; but is an aggregation which, in other circumstances, would be competitive. The cartel smothers competition.

Although the cartel has functioned since ancient times, even in Biblical days, it has been the modern world of the last century to give it Frankenstein appearance. There are, of course, good cartels and bad cartels. It is of capitalistic creation, but the Russians have utilized it and made it at home in a communistic economy.

The financial operations are always shrouded in great secrecy. Its natural inclination for greed has brought it more and more to the attention of governments everywhere. In some instances, the government aids and abets it, as for example the Nazis. Cartels penetrate tariff barriers, batter down trade obstructions, cross frontiers, and continents. They know neither nationality nor confinement. During the interim between World War No. 1 and No. 2, Germany perfected the cartel in not only production and prime materials but in patents as well.

Although some cartels are good, the majority are malign. Thus we have a black market about us all the time wherever they reside. And despite the war, cartel agreements are like arrested TB, ready to break out again and return to power in even stronger and more virile form. Effective world front action must be taken against them. The war makers are not absent from this group.

Tariffs: With respect to tariffs, the proposal makes some references, mostly superficial, and without teeth. Tariffs are the device by which domestic production is protected against outside competition. To build a productive machine without it in a growing economy is quite impossible. But with its completion, tariffs are a clot in the stream when they become extreme. The Republican Party in this Nation has been the traditional party of high tariff, while the Democratic Party has been free trade and for revenue only in the tariff field. Tariffs, which are barriers, created much of the hate and bitterness prior to the 1939 debacle. Our own tariff of 1922, the Hawley-Smoot Act, was a predicted hate maker at the time of enactment.

As we discuss primary hopes and laudable ambitions of the post-war world, we must face up to the facts. Perhaps the first fact is this war is not over when the shooting stops. The struggle of the century will then begin. Mr. Churchill said this at the close of World War No. 1: "The battle of the giants has ended; the quarrels of the pygmies has now begun." This time the battle of the giants will not abate except as to form. In this twilight zone, military operations will subside and then the inexorable law of economics will begin to exact harshest penalties. Even the boldest optomist pales before the pandora's box from which shall spew forth grotesque creations, the like of which we have not yet dreamed or contemplated.

A lapse into nationalism is inevitable: The Continent of Europe, looted and ravaged by the Nazis to the extent of $24,600,000,000, is completely prostrate, all production and agriculture smashed. Materials values have vanished, but more important spiritual values have gone with them. Driven like

animals by the gestapo, the jungle law of survival is the rule and not the exception. Millions have been uprooted from home and families, which they shall never see again. Other millions have been put to death by torture, beating, and cremation in the abbatoirs of Poland. Dante's Inferno is but a feeble and improvised imagination which pales in comparison. This is less than 60 hours from where we stand and sit today. For the survivors of this horror is there any possibility for rational composition of the hate, the revenge, and the sure-fire reckoning which has been planted in their hearts?

News freedom; the propaganda menace: Under this heading, we have the past as a harbinger of the future. Mr. Kent Cooper in his book, The Free Press, submits shocking evidence against the news agencies of the world. Operated almost as private institutions, he calls the roll of Reuters of London, Havas of Paris, Tass of Moscow, the Italian and Japanese news agencies as cesspools of iniquities. There can be no peace, declares Mr. Cooper, so long as these institutions thrive unchallenged and uncontrolled. Always, and at all times, they act for their secret masters to foment unrest, suspicion, and even war among the peace-loving peoples of the world. This is not, he goes on to add, a recent development but has been going on for years. Lie factories must be stopped.

THE DOMESTIC DEBT SITUATION

The Bretton Woods proposal is a world arrangement, say its authors, and discussion must therefore cover the whole water front or range of international discussion, neglecting the local and provincial problems. When the mounting debt of this Nation is even timidly suggested as a talking point, the uproarious advocates of Bretton Woods howl that we owe the money to ourselves, that the issue is trifling, and forget it.

Should we accept the premise that we owe the money to ourselves, then certainly it must be admitted we owe the money to each other. On accepting the second premise, the authors of the first premise find themselves in difficult position. For regardless where we owe the money, we do owe it and it must be paid if we are to be honest about it. In the absence of payment, we rob our own people and disgrace the national position. As of March 30, 1945, the gross net direct debt was $234,858,029,960.86.

The debt limit is set by law and has been changed—upward—from time to time and very often during this war. The latest bill raises the limit to $300,000,000,000, which is expected June 1, 1946. Compare this with $50,000,000,000 in 1938 which very soberly was declared by economists to be the top limit we could carry.

We have a debt situation to which nobody can point with pride and some have been forthright with gestures of alarm. It does precious little good to dismiss it by saying "we must win the war." This is the flight from reality which spells danger. During 1944, the daily spend was $300,000,000, which is now reduced to $260,000,000 daily—more than $10,000,000 an hour.

BASIC PHILOSOPHIES

As we turn again to the Bretton Woods financial arrangement for a world fund, we find two philosophies facing each other. One is the capitalistic world, which has spread successive layers of debt on the structure over the centuries, and is now accumulating debt faster than ever before. On the other side, we have the communistic world where repudiation and debt cancelation is the rule. Moreover, the latter system makes it quite impossible for debts to be created in a communistic world, and it is inconsistent with the principle.

Basically, the revolutions and social upheavals of the centuries past have been an effort to improve living conditions of existence. It was the Russian revolution of 1916 which wiped out the Czars debts and began from scratch. Debt repudiation and hope of better existence, always cruelly hard, was the promise of that upheaval. In all the techniques worked out by the totalitarian governments, including that of the Nazis, the system of debt repudiation has been prime motivation. At what point explosions may or can occur at certain debt levels is unpredictable.

This circumstance has given some concern to the internationalists over the status of the European bonds. Having in mind the smashed economic machine of the Continent, how can the Europeans recover themselves under this load? On the basis of the old European system of conglomerate states and so-called separate economic entities, it just can't be done. This will encourage the Russian influence. The Balkan states and the Baltic states are already well within the orbit, with France and other states about to join.

The best authorities on the subject of European organization view impossible the small state existence, and see its exit in the post-war world. This development of spheres of space and resources foredooms the old scheme of phony frontiers and comic-opera nations with their entertaining pomp and circumstance, all without substance, and completely without economic stability to perform. This shift of political organization along lines of space and resource would therefore seem to make four great divisions: (1) The United States of America, (2) Russia, (3) China, (4) Brazil.

Where is Great Britain in this projection? She just isn't, that's all. The economic machine of Great Britain is topsy-turvy. Although a Conservative, Tory government has held together by coalition (consent) and fought out the war, it—this same government—will not outlast the war. With the rise of the Labor Party, who now clamors for political power and will surely have it, Britain turns left. Beset from within and without, the old order has seen its best days and will of necessity bow out to the coming labor power which now clamors for control—a party which turns toward Russia. Absentee landlordship across miles of ocean and continent has already passed into the memory lane of history. It was Mr. Churchill himself who not so long ago declared the Russian position was a puzzle wrapped inside an enigma.

Post-war economic adjustments are only dimly outlined. Faced by increasing interference and overlordship by government in every department of our lives here at home, and which has been accelerated by war necessity, I humbly submit the Constitution of the United States for the divine guidance of the San Francisco Conference. Instead of "We, the people of the United States," it should declare "We, the peoples of the world."

The original Constitution has caused miracles.

The alternative is too horrible to contemplate.

Total	99,000	100.0	102,000	100.0

[1] To be determined when the Danish Government has declared its readiness to sign.

Voting: Each member has 250 votes plus 1 additional vote for each part of its quota equivalent to $100,000. Except as otherwise provided decisions shall be by a majority of the votes cast.

The percentage of total votes is calculated on the assumption that only those nations represented at the conference will join the fund. As other countries join the fund, each individual country's share of the total votes will decline.

NOTE.—Of the total number of votes, the British Empire controls 25.3 percent; Continental Europe, exclusive of the Union of Soviet Socialist Republics, 16 percent; and Latin America, 9.7 percent.

The monetary fund:

Total	$8,800,000,000
United States share	2,750,000,000

The Bank of Reconstruction and Development:

Total	$9,100,000,000
United States share	3,175,000,000

The San Francisco Conference

EXTENSION OF REMARKS

OF

HON. ARTHUR CAPPER

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. CAPPER. Mr. President, I ask unanimous consent to have printed in

the Appendix of the RECORD an address delivered by the Honorable Alf M. Landon, former Governor of Kansas, at the First Methodist Church, Topeka, Kans., Sunday evening, April 22, dealing with some of the problems presented by the Dumbarton Oaks conversations, and the Chapultepec Pact.

I earnestly recommend a careful reading of Mr. Landon's careful analysis of the basic differences between the two proposals—Dumbarton Oaks and Chapultepec—and his suggestions as to the responsibilities of the American delegation at the San Francisco Conference.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The Conference of the United Nations which convenes in San Francisco next Wednesday is the most momentous event in modern history. We can hardly overstate, overemphasize, or exaggerate what the outcome of that conference means to the future of the world. And I am not sure that all of us are thinking clearly about it.

It is made all the more difficult by fundamental differences in the ideologies of the nations of the world.

Ostensibly, we all believe in democracy. The Russians tell us that Soviet Russia is more democratic than the United States. But we say the Soviet Government is a totalitarian despotism.

The Englishman will tell you that the British Commonwealth is the greatest of all democracies, but when Mr. Churchill says he will not liquidate the British Empire there are those who wonder how imperialism can be reconciled with real democracy.

We, in our proud Republic, glory in our democracy, but the Russians and even the British are not the only ones who say that we are an oligarchy ruled by economic royalists. I have heard 100-percent Americans say the same thing. So perhaps we may be as wrong in our estimate of the essence of the Soviet and of British imperialism as they are wrong in their estimate of us.

I believe there is a greater desire for an international peace organization—a great interest on the part of the average man to strive for it—and a greater willingness to make concessions toward building a workable peace structure than there was in 1919.

Now is the time to move constructively at San Francisco.

At Dumbarton Oaks and Yalta, primary emphasis had to be laid on achieving victory. Everything had to be subordinated to building victory by three men, Franklin Roosevelt, Winston Churchill, and Joseph Stalin.

Each of those men held in his hands the economic, political, and military power of the three great countries he represented and headed.

One was truly an autocrat. The other two—under the stimulous of all-out war—proceeded on the same basis.

The result of their acts was the same. There was little substance of democratic diplomacy in any of their policies. The result is an old-fashioned balance-of-power world organization.

The fundamental interests of the three men, outside of winning the war, were widely different.

The mental make-up and the methods of Stalin and of the people he rules are practically the opposite of those of the other two.

The result of this is the present world political climate. The real world-wide desire for serious experimentation in the development of democracy, which existed at the conclusion of the First World War, is largely missing from the present picture.

The great difference between 1919 and 1945 is that at Paris the all-important victorious powers were desirous of a peace structure—if it fit their individual national interests.

San Francisco will be a horse of a different color. Russia and Britain have in mind a totally different idea for world security—partly perhaps because neither is very sure of us.

The glorification of Dumbarton Oaks beyond reason and facts has contributed to that uncertainty. It is stifling intelligent thinking—not only as to the proposed form of world peace organization but of infinitely greater importance—the kind of peace on which it is based.

Sympathic and constructive suggestions for amendments like the Council of Churches report, the bishops of the Catholic Welfare Conference, Mr. Hoover's, and the Chapultepec pact are immediately weakened by the attitude that we will take whatever we can get.

That way of thinking might have been all right for Dumbarton Oaks—as a start—when primary emphasis had to be laid in achieving victory, but the primary interest has already changed as the result of Allies' victories from building victory to building permanent and lasting peace.

We are the most powerful people in the world today. No nation can afford to stand in the way of right organization unless we ourselves fall down. We cannot fall down if we have the courage to stand up.

We are exactly the same inexperienced people in international politics who have done an incredible job of standing up against the professional, highly trained armies of the world.

We can do the same incredible job of building peace. It is no harder for peace than it is for war.

We don't have to clash with Russia and Britain. It is inevitable that we approach our problems from a different angle. We must not get all sentimental about anybody, any more than we have to hate anyone.

The place and the time to speak is at San Francisco.

In any case, the San Francisco Conference must not be steam-rollered even though many people get sentimental or frightened about touching anything already set up.

What we need right now is cold courage and cold common sense. We have a lot of that whenever we choose to use it.

There is plenty of opportunity to amend the Dumbarton Oaks plan—and it needs to be amended. That's what the San Francisco Conference is for. There are many highly important unanswered questions inherent in the Dumbarton Oaks, Yalta, and other meetings, that as far as I am concerned must be answered before I can decide either for or against. I mean the failure to have a clear meeting of the minds, one way or the other, is fatal to the success of any plan. In light of events since Yalta, that meeting of the minds does not exist now. I mention a few that are more than mere details. The extent and duration of our military and financial undertakings in post-war Europe and Asia, particularly in the government of our part of Germany, on reparations in kind, or the use of slave labor, spheres of influence and boundary questions that involve the mass movements of populations around like cattle. But the biggest and most important of all the questions that must be settled beyond any doubt is, Where will be the power to amend the Dumbarton Oaks Pact?

Some hold the power to block any amendment or to hold any investigation rests in the hands of any two of the Big Five. That must be changed so that the charter can be reviewed and amended in the light of events, changing peace needs, and improved faith in international cooperation. As it stands today, Dumbarton Oaks proposal's great weakness is its failure to develop basic world-wide law, or to provide the means to facilitate its gradual development in the future. The San Francisco Conference must, like our Constitution, contain provisions which will make the development of a body of international law inevitable.

The alternative is not the Dumbarton Oaks plan or international chaos or anarchy. We have positively the alternative of rallying the democratic nations behind the pact of Chapultepec—already adopted by all the great nations of this hemisphere.

That is not an autocratic arrangement as is Dumbarton Oaks. At Chapultepec there was no surrender of fundamental principles that are not only morally desirable but better statesmanship. Therefore, Chapultepec does not leave misgivings as to the stability of the results that Dumbarton Oaks does.

Not the least of the reasons of the great promise of Chapultepec was the way it was done. Senators and Members of the House of Representatives of both political parties took an intimate and responsible part in the conference at Mexico City. Representatives of the labor unions and the press were brought in. It was a great demonstration of the ability of free peoples to unite freely on a set of fundamental principles.

The result of Chapultepec is definitely not the act of a regional bloc of nations such as Russia is insisting on for her protection. It is truly the act of a body of American nations united only on certain definite principles, leaving all other matters to the solution of free men.

Now the State Department's function at Dumbarton Oaks and Chapultepec was to help formulate American needs and aspirations and give them logical shape. But Dumbarton Oaks is based on an entirely different theory than Chapultepec. It is based on the balance-of-power theory, actuated by the Big Three and the ghost of the holy alliance.

The Chapultepec pact contains the following clause "* * * The activities and procedures referred to therein shall be consistent with the purposes and principles of the general international organizations when formed."

The momentous question is, will the Chapultepec pact be amended to fit the ancient balance-of-power theory of Dumbarton Oaks, thus blocking the first positive step toward true cooperation of free and united nations? Or will the preliminary Dumbarton Oaks report be altered to fit the Chapultepec charter?

The President's untimely death, which has plunged civilization into sorrow, undoubtedly gives the American delegation at San Francisco a freer hand to decide America's policies on highly important and still undecided questions. For until the Senate—and there may well be some questions that involve the functions of the National House of Representatives—ratifies the post-war settlements, they are still undecided as far as America is concerned. Undoubtedly the weight, the prestige, and the influence, especially of the delegates that are Members of the Congress, are enhanced.

Chapultepec has demonstrated the pattern. It incorporates all the substance of the Council of the Churches recommendations. It is an American pattern. It is good. It is not based on the interests of three powers dominating the world, but the cooperation of 21 nations working together under a reign of law for peace. At Chapultepec there was created no spheres of influence to curse the world. Chapultepec goes ahead with the efforts of the League of Nations and the Kellogg-Briand Pact—to outlaw war.

The Dumbarton Oaks provisional proposals reverse the 25-year effort to outlaw war and legalizes war in the future unless the Big Three decide otherwise unanimously.

At Chapultepec the use of power is pooled. At Dumbarton it is left competitive. In other words, at Dumbarton, we threw out the window the concept of law. At Chapultepec we restored it. Which is it to be at San Francisco?

The United States must strive long and hard to reconcile the differences between the advocates of democratic procedure for peace and Big Threeism. Mr. Truman is confronted immediately with constructing a foreign policy out of mysteries, secrets, and chaos. The foreign policy he inherits is not routine. It will be his job to bridge the widening gap in our unity on post-war proposals caused by the ever-growing protests, "Why weren't we told about this?"

Almost like an embattled general, he has the heavy strain of making his decisions in the field. Encouraged by the hopes and the prayers of his fellow citizens—inspired by the spirit of his exalted office, he has the opportunity to inspire the same unity of purpose in peace that is behind him in war.

The Lord give him strength and courage and fidelity to bear what he must bear.

Peace and Prosperity—Our Share in Establishing It

EXTENSION OF REMARKS

OF

HON. HAROLD H. BURTON

OF OHIO

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. BURTON. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD excerpts from a statement entitled "Peace and Prosperity—Our Share in Establishing It," delivered by me before the Cleveland Chamber of Commerce, in Cleveland, Ohio, April 17, 1945.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

There is no formula which can guarantee peace and there is no automatic pilot which can steer the world to peace and prosperity. To attain peace and prosperity we must steer our course by a star which has been chosen with the greatest of care to lead us to our ultimate goal, and at the same time we must be alert and capable in handling our ship so that we can ride out the storms and keep clear of the reefs on our left and the rocks on our right as we move ahead. To put this in the terms of international policy we must have a deep faith in a fundamental guiding policy and we must provide and operate whatever political and other mechanisms are required to meet the emergencies of everyday life.

The faith needed is that fundamental faith in God and man and ourselves, which led to the founding of America. It is faith in the right of individuals to be free. Lincoln stated this faith when he defined democracy. He said, "As I would not be a slave, so I would not be a master. This expresses my idea of democracy. Whatever differs from this, to the extent of the difference, is no democracy." This reasoning is the answer to the philosophy of dictatorship by whatever name it may be known. It is the true test of our belief in democracy. It is easy for individuals and nations to meet the first test, for no person wishes to be an individual slave and no nation wishes to be enslaved by another nation. But until we meet this second test, we do not, either as individuals or as a nation, catch the inspiration of true freedom for mankind. Lincoln wished to be free himself and wished his nation to be free, and he also wished all other people and all other nations to be equally free.

America is the natural leader in this crusade to freedom. America is not so much a place within a boundary as it is a people with a common purpose. Millions have come to America, not so much because of their interest in its location or in its physical advantages as because of their devotion to the freedom of spirit which they seek here. While we sing of our love for the rocks and rills and templed hills of America, this is not because they are so different from others, but because of the things that have been done here among them. They have been consecrated to freedom by the brave men and women, living and dead, who have struggled here. They are the symbols of our faith and our freedom.

The world, therefore, naturally looks to the people of America to lead the way to a promised land of peace and prosperity where the Golden Rule is applied to men and to nations.

Woodrow Wilson also emphasized the need for strength of spirit, as well as for perfection of the mechanisms of peace, when he said, "The world can be at peace only if its life is stable; and there can be no stability where there is no tranquillity of spirit and a sense of justice, of freedom, and of right." Having in mind, therefore, the necessity for faith and a deep dedication of ourselves to the cause of freedom, we may appropriately turn to the features of our international mechanism which may help to assure us of the peace and prosperity we seek, and which we failed to attain in the period between World Wars Nos. 1 and 2. At an infinite price, the young men of today have won for the world a second chance to establish and maintain a just and lasting peace on earth. It is for us at home to make sure that we are doing our full share in establishing here the peace and prosperity for which our armed forces fight and which they expect to find here when they return.

After the last war we tried the experiment of doing little or nothing about it, and that course failed.

On November 5, 1943, the United States Senate, by a vote of 85 to 5, decided to adopt this time a constructive course, including the formation of a general international organization which would be flexible enough to meet the issues of the future with an increased chance of disposing of those issues without resort to war. In the field of international political stability the foundation program therefore has been determined upon and the issue now is how best to implement that program. The most important sentence in the declaration of policy by the Senate is that which contains the agreement made at about the same time at Moscow between the United States, Great Britain, Russia, and China. As expressed in the Senate resolution, this is as follows: "The Senate recognizes the necessity of there being established at the earliest practicable date a general international organization, based on the principle of the sovereign equality of all peace-loving States, and open to membership by all such States, large and small, for the maintenance of international peace and security." The Dumbarton Oaks proposals are an attempt to implement the foregoing statement of policy. I believe that they come well within that policy and while the proposals are subject to improvement, I believe they could be accepted as they stand if that were the best basis of agreement which we could obtain from the many other interested nations. I mention four important features of the Dumbarton Oaks proposals which deserve special attention and which are important features of it. These are:

A. The genius of Dumbarton Oaks is not the use of military force but the substitution of justice for force through various mechanisms. These increase the chances for peace in the future while by no means guaranteeing peace.

B. The vote in the security council is an ingenious compromise which has the great merit of bringing all nations, large or small, before the bar of the world when any question threatens the peace of the world and the parties to the dispute are not permitted to vote on the policy to be recommended.

C. Settlements of local disputes through regional arrangements or by regional agencies are encouraged upon a level between that of nations and of the general world-wide organization.

D. An economic and social council is provided to deal with economic and social issues which may hold in them the keys to the peace and security of the future.

In addition to the mechanisms included in the Dumbarton Oaks proposals it will be necessary to meet numerous other issues of an international nature if we are to secure post-war peace and prosperity and to do our full share in making the victory of our armed forces worthy of the price paid for it. These issues are unavoidable. The Congress is considering, or is about to consider, numerous proposals to meet them. In America there exists the extraordinary opportunity for private citizens especially informed on the several issues to contribute their full share toward meeting these issues by presenting their views to Congress and Members of Congress. The proposals already under consideration have constructive merit, but in most cases are subject to modification and improvement, and suggestions to that end will be welcomed by Congress. Solutions will have to be reached and when these are reached it is hoped that they will have the cordial support of the public, and unless the public has suggested better solutions the public will share in the responsibility for any damage that may come from these solutions. The important thing which I wish to impress upon our community now is the existence of these international and domestic problems. Among the international problems immediately before us are the following:

1. Relief and rehabilitation of allied occupied nations, recognizing an important distinction between their wartime and post-war needs. To the extent of our wartime obligations under the lend-lease program and the United Nations Relief and Rehabilitation Administration, I recommend the carrying forward of the program we have authorized, terminating it as originally proposed and then considering our post-war obligations on a separate basis as a part of our post-war economic program in the light of our own needs and of our own domestic and international economic recovery.

2. The stability of credit and foreign exchange. This is a necessary element in post-war recovery. The proposal before Congress provides for an International Bank for Reconstruction and Development, together with an International Monetary Fund. These proposals having grown out of the international conference held at Bretton Woods, N. H., in July 1944. The soundness of the International Bank and the proposal for the establishment of international credit has been generally approved, but there is divided opinion as to the value of the International Monetary Fund program. This latter program is widely misunderstood. It is not a banking program. It is one intended to supplement the establishment of international credit with standards of international trade which will avoid consequences similar to those experienced between World Wars No. 1 and No. 2 through the devaluation of national currencies and a general resort to cut-throat competition among nations. These practices contributed to the world-wide depression. While it is recognized that this feature of the plan requires much further

consideration and clarification, it is important that some better substitute means of stabilizing international exchange be provided if this plan is not to be attempted.

3. Food. The need for increasing efficiency in the production and distribution of foods and the general raising of the level of nutrition available in the world is one of importance to ourselves and to every other part of the world as contributing substantially to its peace and prosperity. The food and agricultural organization developed at Hot Springs, Va., in May 1943 is an attempt to reach this need.

4. The educational systems of the world are fundamental to the peace and stability of the world and their importance increases in proportion to the reliance placed upon the principle of self-government in the world. The major educational problem to be encountered within the Axis nations is of grave concern to the United Nations, but as yet no program has been publicly considered as to it. On the other hand, an important emergency problem exists also in the restoration of the educational systems and cultural institutions of the allied nations which were destroyed by the Axis powers. This involves not merely the securing of ordinary school equipment but also the recourse to America and Great Britain for guidance in scientific and industrial processes, including laboratory equipment, in place of the recourse formerly had to Germany. The important opportunities involved in this need were considered at the conference of Allied Ministers of Education held in London in April 1944, at which the United States was represented by a commission under the chairmanship of William J. Fulbright, now a Member of the United States Senate.

5. International civil aviation presents one of the most important fields of international development. America, due to the war, is the world's leader in aviation today. There will be substantial competition, however, for international civil aviation in the post-war period, not only on the part of Great Britain but on the part of other nations. The peace and prosperity of the world are closely related to the policies to be adopted in this field. Consideration was given to them at the civil aviation conference held at Chicago in 1944. An issue is being drawn now as to the best method by which the United States may regulate the participation by American interests in international aviation. This issue is before the Committee on Commerce of the United States Senate, of which I am a member, but it is not appropriate for me to discuss the issue in advance of the conclusion of the hearings.

6. International communications and their regulation are more vital than ever to the access by America to the rest of the world, and for the conduct of international trade. In past years there has existed the Universal Postal Union and the Communication and Transit Organization in connection with the League of Nations. New issues are now presented in the fields of cable and radio communication. The policy of the United States on this issue is yet to be developed.

7. International Labor Organization: This important activity has survived the general abandonment of other League of Nations activities. The United States of America has been a member of this organization since 1934, and the organization is now being carried on with offices primarily in Canada. The importance of the international labor issue was recognized at the international labor conference held in Philadelphia in 1944. While this field may yield even more critical and important developments domestically than internationally, the international issues are vitally important to the future peace and prosperity of the world.

8. General international trade and travel: The development of international post-war trade is of primary importance, not only to the United States but to all nations. The degree to which we and other nations will find it necessary to protect home industries presents issues of an economic and commercial nature which usually can be better solved in detail by administrative bodies fully informed on the facts, than by legislative bodies, except on issues of general policy. In this field comes the question of the extension of the Reciprocal Trade Agreements Act. This raises, for example, the question as to the extent to which administrative bodies should be permitted to adjust tariffs up or down from tariffs prescribed by legislation. Under the law of the United States, this authority now exists to the extent of a 50 percent variation from the tariffs fixed in 1934. It has been suggested that this discretion be enlarged so that the 50 percent variation shall apply to the tariffs as in effect in 1945. In cases where the tariffs already have been reduced by 50 percent from what they were fixed in 1934, this would mean granting authority to reduce them by a further 50 percent of the present rate, thus making a total reduction of 75 percent. Such an extension amounts to an extraordinary substitution of administrative discretion in place of legislative discretion. The normal procedure would be for the legislative body to adjust the basic tariff rather than to give an administrative body the right to change a legislative determination by more than 50 percent. Apart from international trade in the ordinary sense, there will exist a new opportunity for international travel which carries with it tremendous possibilities for benefits both to the United States and to foreign nations. Tourist travel would transport American credits abroad in exchange for pleasure that would not come seriously in competition with American productive industries. It would improve international relations and help to place funds abroad where they would help to develop a market for American-made goods.

9. The United States merchant marine will present a major international problem. Following the war we shall have by far the largest merchant marine fleet in the world and if we are to maintain a Navy of substantial proportions, we shall need to maintain a large merchant marine as an auxiliary to the Navy. This will present added reasons for a Federal interest in a large merchant marine service.

10. International freedom of expression and of the press. This subject is related to the issue of cable and radio communication but it is broader than that. It has become clear that a vitally important factor in the maintenance of international peace will be access to and publication of the truth in the news of the world. America's interest in this extends not only to the news to be published in America but in the news to be published about America throughout the world. While this is a major question of international policy it has not as yet received the public recognition to which it is entitled.

11. International Court of Justice: It is of the utmost importance that justiciable questions be determined by a court of justice in international as well as national fields of jurisdiction. The Permanent Court of Justice connected with the League of Nations has made important contributions to this end. There should be little difficulty in securing general adherence to a statute providing for an international court of justice in connection with the United Nations program.

12. Trusteeships of dependent places and people: It is essential that the United States obtain clear and complete control of such strategic places as this war has demonstrated are essential to her safety. There must not be a repetition of the uncontested seizure by others of those strategic points which the United States recently has been compelled to recapture at great human cost. In the event of war we should not have to recapture our essential defensive outposts. Also the development toward independence of the dependent people of the world is one of the major trusteeships resting upon the free sovereign nations of the world. The principles of the Atlantic Charter, as incorporated in the Declaration of the United Nations, recognize this fact. Conditions may well vary with each location and with each group of people involved but the general right of all peoples to choose the form of government under which they will live is an important part of the faith of America.

13. Treaty-making processes of the United States: If the United States enters the general international organization and assumes its full share in the international problems of our time, there will be presented to the United States Government an increased need for consideration by it of future treaties bearing on these relations. The Constitution of the United States now provides for the passage of laws affecting the internal affairs of this Nation by a majority vote of the House of Representatives and the Senate, together with the approval of the President. This makes possible constructive and rapid action based upon the will of the majority as reflected through the two Houses of Congress and the President. On the other hand, our Constitution, in the case of treaties, does not provide the same facility for their approval. It requires the consent to them by two-thirds of the Senators present. This places a veto power over treaties in one-third plus one of the Members of the Senate. This results in a negative control of our foreign policy by a minority in that one House of Congress in which States, rather than population, is made the basis of representation. Accordingly, in the event of our entry into the United Nations treaty and its approval by two-thirds of the Senate at that time, that same two-thirds of the Senate, and also two-thirds of the House of Representatives, will owe it to the people of the United States to give them an opportunity to determine whether or not, in view of the increasing foreign interests of the United States, they will not wish to amend their Constitution by putting the approval of treaties under the majority control of the two Houses, in much the same manner as statutes of the United States are now enacted.

DOMESTIC ISSUES

Equally important with international stability is our domestic stability. As international stability is a domestic necessity, so also our domestic stability and prosperity is an international necessity. In this domestic field the problems are more familiar to our public. For that very reason these problems represent an even closer responsibility on the part of individual American citizens than do the international policies. They include such problems as the following:

1. National solvency: This deals with the vital problems of stopping the increase of our national debt, carrying the load of our present debt, and adjusting taxes so that they will be stabilized and also will encourage, rather than discourage, production.

2. Increased production and full employment: This calls for understanding and cooperation between management, labor, agriculture, and government. It calls for a recognition of the need for ever-increasing production as the key to ever-increasing prosperity.

3. Inventions and new products: Many of these offer the promise of infinitely greater returns from human efforts in the future than has rewarded corresponding efforts in the past. Progress in such fields as those of aviation, radio, automotive power, light metals, wood, glass, plastics, electric welding, electronics, sulfa drugs, improved

housing facilities, and in countless other fields, suggests the new values based upon human ingenuity which can become available to a civilization that is appreciative of their value.

4. Improved housing: Looking to the elimination of the still disgraceful slums on blighted areas of our largely populated centers, there is offered in this field an opportunity for private, as well as for public, housing in meeting the need. Legislation along these lines is being considered in Congress and in some States.

5. Improved health conditions, safety programs, and physical standards: These all make direct contributions to productiveness and prosperity. Attention has been called to them by the many physical defects disclosed in connection with the draft of men for military service. There is a need for hospital facilities in many rural and other areas of this Nation. These should be developed through privately owned, as well as publicly owned, agencies.

6. Educational progress for the foundation of democracy. The need for improved education in many parts of the Nation has been emphasized by the lack of education disclosed in the attempt to qualify men for military service. The Nation as a whole suffers from such educational defects in its citizenry, and it is important that means be found to overcome such lack of facilities while at the same time protecting the local control over education of policies against encroachment by Federal policies.

7. Military training: This will present an issue which cannot, at this time, satisfactorily be determined. It will be largely affected by the quota of military forces which it may become the obligation of the United States to maintain, especially in the Navy and the Air Corps, as a part of our obligation under the general international organization proposed by the Dumbarton Oaks conferences. I believe it is premature to pass upon such a subject in advance of a more clear understanding of what our obligation to supply armed forces is to be as a member of the United Nations in the years immediately ahead of us.

8. Fair employment practices: These present an important issue which should be met with thorough consistency with our national purposes and ideals. It is important to consider which practices should be put under local, as contrasted with Federal control. Following the precedent set during this war, such Federal regulations naturally would extend to employment that is supported by taxes which are collected without racial or other discrimination and therefore should be expended without such discrimination. The success of policies affecting such matters will depend primarily upon the general public support of the policy involved.

9. The development of a code of fair industrial and labor relations as the foundation of industrial production upon which our standards of living depend is a matter of primary importance both to labor and to management. If there is to be industrial peace and prosperity it is vitally important that the utmost fairness be applied to all parties concerned in such production whether they be employers or employees, and whether they be members or officials of organized labor or industrial organizations, and whether they be members or non-members of any organization whatever.

10. The importances of combating inflation: This relates not only to the national solvency of this Nation, but also to the voluntary observance of policies designed to safeguard the Nation against inflation. One vitally important policy at this moment is the heavy subscription by individuals to the Seventh War Bond Drive. The conversion of savings bank deposits and especially of hoarded cash into War bonds should be carefully considered by everyone and undertaken to the greatest extent possible.

Prevention of Beach Erosion Essential to Shores of United States

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. DOYLE. Mr. Speaker, I have the honor and responsibility of being a member of the important Rivers and Harbors Committee of this Seventy-ninth Congress. It is said that a larger percentage of the beach shores of the great metropolitan city of Long Beach, Calif., are owned by municipalities, than is the case with any other municipality of North America. The entire coastline of California, the Pacific coast, the Atlantic coast, of the Gulf States, and all of the great river shores of our Nation are all concerned in matters of erosion.

There are two important measures pending in this Congress, looking to the aid and protection against erosion. The first is H. R. 2032, which gives authority to a shoreline investigation, having in mind the prevention of shore erosion by currents, waves, and tides, and to the determining of the best method for the protection, development, restoration, and preservation of the great bathing beaches of our shores. It provides that the cost of these important investigations shall be borne entirely by the Federal Government. This, I believe, is as it should be. The prevention of erosion is not a State matter, it is a national matter and concerns the health, safety, and recreation as well as having a definite bearing on coastwise commerce and river transportation and navigation.

The second measure is H. R. 2033, now pending, which provides that the United States Government shall share in the cost of protecting the shores publicly owned. It declares it to be the Federal policy to aid in the construction, but not the maintenance, of works for the improvement and protection against erosion of the shores, whether ocean, gulf, or river, of the United States, and which shores are owned either by States, municipalities, or other political subdivisions. But, provided, however, that the Federal share of contribution toward the construction of such protective works shall not in any case exceed one-third of the total cost thereof.

Mr. Speaker and Members, while it may be considered that the policy as proposed in H. R. 2033 is the declaration of a policy by the Federal Government not now in effect, I earnestly and respectfully urge to your attention the desirability—yes, the necessity—of such a policy. Increasingly, as distances between our coast lines, and our gulf and river shore lines shrink, by reason of speed and frequency of rapid transportation and for other reasons as well, this proposed national policy aiding and assisting in the construction of publicly owned shores of the United States is not only wise and fundamentally sound—it has become an absolute necessity. Therefore, as a Member of this distinguished House, who lives in one of the coastal congressional districts, to wit, the Eighteenth District of California, and who has served about 15 years as president of the Recreation Commission at Long Beach and, therefore, has intimate knoweldge of the worthwhileness and the coastwise acquaintanceship with its essentiality and wisdom, I ask unanimous support of these two measures, H. R. 2032 and H. R. 2033. The distinguished gentleman from Los Angeles [GORDON MCDONOUGH] is also a member of the Rivers and Harbors Committee, and on the subcommittee thereof on beach erosion.

My great native State of California is well aware of the desirability and need of Federal cooperation, as may be evidenced by the resolution introduced by Assemblyman Middough, on April 19, 1945, at the California Legislature, at Sacramento. Assemblyman Middough, author of this resolution, is one of the three State assemblymen from the Eighteenth District of California. He also served for about 10 years on the Recreation Commission of the city of Long Beach, Calif., and knows whereof he speaks. I incorporate the text of this resolution for your specific attention.

Assembly Joint Resolution 38

Resolution relative to memorializing Congress to adopt H. R. 2032 and H. R. 2033 in furtherance of preventing beach erosion

Whereas there are now pending before the Congress of the United States two measures designed to aid in the protection of beaches along the shores of the United States, which measures will shortly be heard before the House Committee on Rivers and Harbors; and

Whereas the first of these measures, H. R. 2032, authorizes general shore-line investigations, with a view to preventing shore erosion by waves and currents and to determining the most suitable methods for the protection, restoration, and development of bathing beaches, the cost of such investigations to be borne wholly by the United States; and

Whereas the second of these measures, H. R. 2033, authorizes Federal participation in the cost of protecting the shores of publicly owned property, declaring it to be the policy of the United States to assist in the construction, but not the maintenance, of works for the improvement and protection against erosion of the shores of the United States that are owned by States, municipalities or other political subdivisions, provided that the Federal contribution toward the construction of protective works shall not in any case exceed one-third of the total cost; and

Whereas the purposes sought to be accomplished by these measures are of particular interest to the coastal State of California, its political subdivisions, and its people in that thereby damage to public property may be prevented and healthful recreation may be promoted and encouraged: Now, therefore, be it

Resolved by the Assembly and Senate of the State of California, That the Legislature of the State of California hereby respectfully memorializes the Congress of the United States to enact H. R. 2032 and H. R. 2033 of the Seventy-ninth Congress, first session, relating to the investigation and protection of beaches; and be it further

Resolved, That the chief clerk of the assembly is directed to transmit copies of this resolution to the President of the United States, to the President of the Senate and

the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to Mr. J. Spencer Smith, president of the American Shore and Beach Preservation Association, 1060 Broad Street, Newark 2, N. J., and to Mr. George P. Larsen, executive secretary of the Shoreline Planning Association of California, Inc., 1151 South Broadway, Los Angeles 15, Calif.

Justice for Lithuania

EXTENSION OF REMARKS

OF

HON. DAVID I. WALSH

OF MASSACHUSETTS

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. WALSH. Mr. President, Sunday, April 22, was made a day of prayer for Lithuania and peace at the cathedral of the archdiocese of Boston. The Most Reverend Richard J. Cushing, D. D., archbishop of the diocese of Boston, in his address to the large gathering, made a powerful plea for the freedom of Lithuania, and eloquently described her sufferings and present status.

I ask that the address delivered on this occasion be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

We have assembled in this majestic cathedral to offer prayers to Almighty God for your beloved, sorrowing fatherland, Lithuania. In spite of treaties and friendly assurances the whole of Lithuania was occupied in June 1940 by the Russian Army. Then the mass deportation of the people to Siberia started. Tens of thousands of people were uprooted. During one year Lithuania suffered a total manpower loss of 65,000 persons.

On June 22, 1941, Germany attacked Russia and her armies crossed into Lithuania. The Nazis were no better than the Communists. Many Lithuanians were sent to German concentration camps, others were murdered. In July 1944, the German armies were driven from Luthuania and the Soviet Army reentered the country. The result is well known. From all appearances Lithuania has been incorporated into the Soviet Union.

War is a terrible calamity and a harrowing experience, but in the midst of all its horrors there is the hope of a lasting peace. Only when we have gone through the fire of warfare can we fully evaluate the worth of peace. Your fatherland, however, finds itself in a peculiar situation. Even the end of the war will scarcely mean for her an end of her present agony. She is being occupied and subjugated by a power which recognized only the law of might. Recent and bitter experiences have taught Lithuania that the second return of the invader means further destruction, if not total absorption.

What are these bitter experiences?

Lithuania is being sovietized and is suffering from a famine, while thousands of her people have died from starvation. She is undergoing a most terrible process of extermination. More than 200,000 have been deported. The Soviet puppet president boasted over the radio that 83,000 Lithuanians voluntarily left for work in the Soviet Union.

She is being subjected to steady transformation according to Communist standards. The so-called reform is to be concluded by the end of this year. Demands are being made that nonparty officials be removed, for they have been sabotaging this work of absorption.

Lithuania is hungry. Her people are bloated from hunger, dying from hunger. The president of the Lithuanian Writers' Association, while discussing working conditions of writers, admitted that they are often hungry, yet he urged them to write about the Soviet Union, the achievements of the Red Army and other forms of propaganda. The immediate future is dark with foreboding. By an obvious act of aggression, without legal foundation or moral justification, Lithuania has temporarily, at least, lost her independence. It is no exaggeration to add that America is the only hope.

And Lithuania has every reason to look to America, for on July 23, 1940, during the Stalin-Hitler pact our State Department issued the following statement:

"During these past few days the devious processes whereunder the political independence and territorial integrity of the three small Baltic republics—Estonia, Latvia, and Lithuania—were to be deliberately annihilated by one of their more powerful neighbors, have been rapidly drawing to their conclusion.

"From the day when the peoples of these republics first gained their independence and democratic form of government the people of the United States have watched their admirable progress in self-government with deep and sympathetic interest.

"The policy of this Government is universally known. The people of the United States are opposed to predatory activities no matter whether they are carried on by the use of force or by the threat of force. They are likewise opposed to any form of intervention on the part of one state, however powerful, in the domestic concerns of any other sovereign state, however, weak.

"These principles constitute the very foundations upon which the existing relationship between the 21 sovereign republics of the New World rests. The United States will continue to stand by these principles, because of the conviction of the American people that unless the doctrine in which these principles are inherent once again governs the relations between nations, the rule of reason, of justice and of law—in other words, the basis of modern civilization itself—cannot be preserved."

In reading official reports of current peace discussions we are impressed by the great silence of the three great powers on Lithuania, Estonia, and Latvia. Contrary to the protests of our Government 4 years ago, and to the assurances of Soviet authorities even before that time, the indications are that they will be absorbed, without their free and unfettered consent, in an alien system of government. The sympathy of all lovers of freedom goes out to them in their misery. We hope that when the final peace treaty is framed and approved, it will not be recorded that our country condoned the enslavement of these freedom-loving nations. We hope too that our Government will discharge its full responsibility in reestablishing all the liberated nations of Europe under genuine democratic regimes which will accord to all their citizens the full enjoyment of their human rights and open to them an era of prosperity. We entered this war to defend our democracy. It is now our solemn responsibility to use our full influence in safeguarding the freedom of all peoples.

The cause of your beloved fatherland, my dear Lithuanian friends, may appear hopeless. The difficulties may seem insurmountable. But remember that injustice, oppression, evil of any kind can thrive for a while and no longer. Justice and liberty eventually prevail. Probably God alone can save Lithuania. That is the reason why we are here in this Cathedral of the Holy Cross praying to the Almighty to save her from losing her identity among the nations of the world. Almighty God is our greatest hope. Lithuania is 85 percent Catholic. The late Pope Pius XI called it "Terra Mariae", the land of Mary. And the present sovereign pontiff, Pope Pius XII addressing the Lithuanian Minister to the Vatican said: "If, in the midst of present events, Christian nations are particularly entitled to our solicitude and our pastoral vigilance, our sons and daughters of Lithuania can understand how close we are to them. We are united with them also by our unshakable assurance of their fidelity to and confidence in God, whose all-powerful aid can open new roads to progress and prosperity in a pacified Europe, returned to a sense of justice, fraternity and its Christian vocation."

Since the triumph of evil can prevail for a while and no longer we pray today that Almighty God may hasten the time when Lithuania will be free again. Such prayers will not go unanswered. Liberty and justice, with God's will behind them, will eventually prevail.

Citizens' Dedication to a Lasting Peace Plan

EXTENSION OF REMARKS

OF

HON. HAROLD H. BURTON

OF OHIO

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. BURTON. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a statement by me relating to our dedication to a lasting peace plan, made yesterday at a local observance in Washington.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The best memorial to any one of the present generation will be the recognition of his part in establishing a just and lasting peace among ourselves and with all nations. This was the prayer of President Truman in his message to our armed forces last week. This has been the prayer of President Roosevelt for 3 years. This was the prayer of President Lincoln 80 years ago. In such a memorial there is room for all who share in building it.

On November 5, 1943, the Senate of the United States established America's policy when it resolved that—

"The Senate recognizes the necessity of there being established at the earliest practicable date a general international organization, based on the principle of the sovereign equality of all peace-loving states, and open to membership by all such states, large and small, for the maintenance of international peace and security."

Agreement to that policy had been given a few days before by the representatives of Great Britain, Russia, China, and the United States.

This week the United Nations will meet in San Francisco to implement that policy. They will not produce a guaranty of peace, but they will seek to establish an important new mechanism of peace. In the words of Senator VANDENBERG, "The genius of the proposal agreed upon at Dumbarton Oaks and to be considered at San Francisco is the substitution of justice for force. It is the substitution of international law for piracy. It is the substitution of peace for war. Its genius

lies in the organization of these specific mechanisms which shall stop future frictions short of the necessity for force. Its genius lies in the mobilization of the vigilant, moral, and spiritual power of enlightened civilization against the dark and evil forces of recurrent savagery."

To this mechanism the world must supply the infinite power of its faith in the commandments that "thou shalt love thy neighbor as thyself" and that "whatsoever ye would that others should do unto you do ye even so unto them."

Let us join hands with Lincoln, with Roosevelt, with Truman, and build the greatest of all memorials—the road to a just and lasting peace dedicated to the brotherhood of man.

Anniversary of Birth of Thomas A. Edison

EXTENSION OF REMARKS

OF

HON. THEODORE G. BILBO

OF MISSISSIPPI

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. BILBO. Mr. President, on Saturday, February 10, 1945, there was broadcast from Station WOL in Washington over the Mutual network, by my distinguished colleague, the junior Senator from Florida [Mr. PEPPER], a very brilliant and able address on the birthday of that great benefactor to mankind, Thomas A. Edison. I ask unanimous consent that the address be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

My friends and fellow countrymen, we are told in the first chapter of Genesis: "In the beginning God created the heaven and the earth. And the earth was without form and void; and darkness was upon the face of the deep. And the spirit of God moved upon the face of the waters. And God said 'Let there be light' and there was light. And God saw the light, that it was good."

Ever since that first birthday of light God has continued to give light to the world with ever-increasing brilliance and beauty. Thomas A. Edison, whose birthday we honor today, was one of God's great hands in giving this ever-increasing inheritance of light to mankind. For Thomas A. Edison lived with the infinite and the deep force which other men—good men—failed to so or to know. He tapped the deep seams of the earth's mysteries. He was attuned to the secret whisperings of the invisible. To him was committed the mastery of those mighty and magic powers reserved for the dominion of those blessed only with understanding almost divine.

The story of Thomas A. Edison is the story of the progress of civilization in recent decades. We can hardly think of the world without the living monuments of his greatness which are part and parcel of our daily lives. True, we have become so accustomed to them, that wonderful as they are, we give them no more than passing notice and recognition. Yet all around us those great things that Edison dreamed and created, are the things which make up the marvel of our modern life. And many things that we do not know about, begun by Thomas A. Edison, have flowered into creations which are helping us to victory in war and will ever enrich the lives of all people everywhere in peace.

Yet great as are the works of Thomas A. Edison, perpetual monuments to his honor, as they shall ever be Thomas Edison never created an electric light which has shown upon the earth with greater brilliance and beauty than his own noble character.

You will remember that this so-called genius and wizard, himself described genius as 1 percent inspiration and 99 percent perspiration. He taught the greatness of work. The kind of work he exhibited was creative and constructive work—work that did good and made the world better. He gave himself as a sacrifice unto his great aspirations for all of his life he was a man of unceasing work.

Nothing little, nothing petty, nothing selfish, nothing sordid was in the life of Thomas A. Edison. On the contrary his ideal was service. Truly he put service above self.

This year we celebrate 100 years of statehood for Florida. Our history runs back at least four and a quarter centuries. We have had our Ponce de Leon, our Osceola, our Andrew Jackson, our Dr. Corrie, and other great, but if the people, the school children, history, were to select our greatest Floridian, they would name the man who spent 40 of the most creative years of his life, including the last days, when from our foot stool he moved on up to join the greatest Inventor, they would name Thomas A. Edison, of Fort Myers, and all Florida.

Floridian, American, patriot, student, scientist, humanitarian, altruist, inventor, businessman, husband, father, benefactor of mankind—Thomas Alva Edison.

Eulogy of the Late President Roosevelt by D. D. Monroe

EXTENSION OF REMARKS

OF

HON. CARL A. HATCH

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. HATCH. Mr. President, I ask unanimous consent to have included in the Appendix of the RECORD a very eloquent address delivered on April 13 in eulogy of the late President of the United States, Franklin D. Roosevelt, by the Honorable D. D. Monroe, grand sire of the Independent Order of Odd Fellows, who lives in my State, at Clayton, N. Mex.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Prof. RAYMOND HUFF. I present Mayor Douglas Cornwall, who will introduce the speaker of the day.

Mayor CORNWALL. Professor Huff, ladies, and gentlemen, among other organizations President Roosevelt was for many years a member of the Independent Order of Odd Fellows. We have, living in Clayton, the executive head of that great international fraternity and we have asked him to deliver the eulogy on this occasion. I present to you the Honorable D. D. Monroe, grand sire of the Independent Order of Odd Fellows.

Grand Sire MONROE. Mayor Cornwall, officials of Clayton and Union County, officers and members of the American Legion, the Veterans of Foreign Wars, and the other fraternal societies, and churches of Clayton, members of the board of education, faculty, patrons, and students of the Clayton schools, my fellow citizens all, there are times when one feels inadequate to the performance or accomplishment of a particular thing in the manner or extent in which he desires it to be performed or accomplished. This morning I received a wire asking that I issue a statement of 150 words commenting upon our President as a member of the organization I represent. I found it very difficult to find words adequate to express what I wanted to say in that statement, and again now I feel inadequate to the occasion and incapable of finding, as I would like to do, words which will express and interpret the emotions all of us are experiencing.

The ceremonies of this hour reveal the utmost reach of human aspiration. Regardless of the extent of our successes or the greatness of our accomplishments, either as an individual, or as a group, or as a part of a great Nation, no accomplishment of human endeavor will ever rival the hope of immortality which we cherish here today.

I believe it was Carlyle who said that man carries beneath his hat a miniature theater wherein are enacted all of the great dramas of life, beginning and ending in eternity. The more we consider this statement, the more convinced we become of the truth of the theory that life is largely the result of one's own ideas and one's own determinations, and that to achieve immortality, one must, himself, be immortal at heart.

Today we pause to meditate upon the life and character of a great humanitarian, who has completed, only yesterday, that interim between the two great eternities—the great eternity of the past and the great eternity of the future. Just yesterday he was the most powerful executive in the world. Now, in just a few more hours, escorted by his family and a few close friends, his body will complete the journey back to the soil from which it came. Only the memory of Franklin Delano Roosevelt will be left to those he loved and who loved him.

The death of President Roosevelt is a world calamity! However intimate the study of his life, however minute the scrutiny of his conduct and character, and performances, the conclusion is inescapable that he alone of all his contemporaries could have met the various responsibilities that had to be faithfully and capably discharged to guide our Nation through the succession of emergencies which have confronted us during the past decade.

It will be hard to fill his place. When a great tree crashes in the forest it leaves a space which is not filled again for many many years of time. There is little we can say or do here other than to pay our respects to his memory.

Memorial services are sometimes delinquencies in that they offer opportunity for delayed tributes and kind expressions which could have been applied to far greater encouragement if made during the lifetime and activities of the one memorialized. Yet it has been aptly stated that a tree is best measured after it has been cut down, and our purpose here is not so much to pay delayed tribute or to extoll virtues as it is to measure the leadership of our great President, that we may use them as the yardstick and pattern for our own conduct and character as we carry on our part in our own lives.

His life was characterized always by intense patriotism and devotion to duty. Always, until the last few moments of his life, he was to be found discharging efficiently and ably the important duties of his position. The world has been enriched because he has lived. His congenial disposition, his captivating personality, his genuine sincerity, endeared him not only to a grateful and appreciative Nation but indelibly enshrined his memory in the hearts and breasts of countless devoted friends and associates throughout the world. His was a sympa-

thetic and magnanimous nature, revered, respected, and admired by all who were privileged to know him intimately.

Franklin D. Roosevelt now takes his place beside such great Americans as Washington, Lincoln, and Wilson. Volumes will be written by the score, dealing with the life and events of this great President. Every conceivable angle of his career as a soldier, cabinet member, military strategist, diplomat, Chief Executive, and country gentleman will be arduously covered by masters of the pen and brush.

He now becomes more than a man. He becomes a living symbol, loved and venerated by noblemen of all nations. He will grow greater with the passing of the years. So long as nobleness, courage, truth, love of God and love of country are recognized as cardinal virtues, the name of Franklin Roosevelt will remain green in the hearts of many peoples of many lands.

Regardless of differences of opinion. Regardless of how we may have opposed him politically, Roosevelt, the man, commands the highest respect. Roosevelt, the Commander in Chief, commands the most ardent admiration. Roosevelt, the statesman, commands the everlasting gratitude of the people of the United States. It is in all three roles that he stands now in the light of the years, as the one man of his generation who could accomplish the task that was set for him, the task of advancing and maintaining the greatest of all nations.

The utility of President Roosevelt to his people will not terminate with his death. His philosophy will be institutionalized in manners and customs of thought and codes of laws. It is the duty of the heirs of his labors to strive to comprehend his purposes, and to protect and advance them.

Roosevelt never meant to be a great soldier or statesman. He preferred to be a man of peace and devote his capacities to peacetime pursuits. He does not belong to what we ordinarily term the galaxy of genius. He may not have been intellectually dazzling, like Hamilton, nor brilliantly learned, like Jefferson, nor overwhelmingly eloquent like Patrick Henry. Yet he had, in combination, a set of intellectual and moral qualities which lift him, head and shoulders, above any of these men. He lives, and will live, because what he did was for the exaltation of man, the enthronement of conscience, and the establishment of a government which recognizes all the governed. In spite of all adverse circumstances, he takes his place, as a great name, like unto the name of the greatest of men that are on the earth.

Mrs. Roosevelt, speaking for the family of the President, said yesterday: "I am more sorry for the people of the country and the world than I am for us." Thus she expressed a comprehension of the excruciating sorrow which all of us who are here feel deep down within us. President Roosevelt died on the eve of the greatest triumphs of his Nation. These words of mine are, I fully appreciate, inadequate to the occasion. I can only here repeat the words of Lincoln, that it is rather for us, the living, to here rededicate ourselves to the great cause for which he gave his last full measure of devotion. As we remember the glorious history of our Nation and realize the blessings of our citizenship, as we review the splendid record of our departed President, our visions should become clearer, our hearts throb with new life and enthusiasm, our purpose become strengthened and made more determined by our memory of him, of whom it may be said, paraphrasing the words of a poet whose name I do not now recall:

"He was a blend of mirth and sadness, smiles and tears,
A great knight errant of the pioneers.
An international hero, born of star and sod—
A citizen prince—a masterpiece of God!"

Compulsory Military Training in Peacetime

EXTENSION OF REMARKS
OF
HON. DAVID I. WALSH
OF MASSACHUSETTS
IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. WALSH. Mr. President, I ask to have printed in the RECORD a speech delivered by me in opposition to compulsory military service in peacetime, before the Massachusetts Women's Political Club—nonpartisan—in Boston, on Sunday, April 22.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Peacetime conscription—compulsory military training for all the male youth of our country—in my opinion is objectionable whether it be viewed as a military device for promoting national security in the post-war world or be viewed as a social device for promoting racial betterment. It will do neither. It will not make for strength in arms. It will not make a better America. But on the contrary, it will work incalculable injury to the rising generation, while at the same time undermining the political and social structure of our Nation.

I have always favored a policy of preparedness and strong weapons of national defense. The lessons of the present war have strengthened my convictions that America in the future must needs maintain a large navy, a large air force, naval and air bases throughout the world, a large merchant marine, a professional mechanized army, stock piles of strategic materials, and a military establishment far larger than we had in the pre-Pearl Harbor years. But universal compulsory military training in peacetime is not a necessary ingredient. In my judgment, it is not the sound approach to the problem of post-war military manpower requirements. It does violence to the meaning of words to call military conscription the more democratic method of raising armed forces.

The permanent policy of peacetime conscription which Congress is now being pressed to adopt would make it compulsory for all able-bodied young men between the ages of 17 (or 18) to 21 years, to undergo a year of continuous military training under the exclusive control of the Army and Navy. After the year of training, the trainees would be enrolled as reservists in the land or naval forces for a period of 4 or 8 years and take such additional refresher training as may from time to time be prescribed by law.

Let it be clearly understood that this proposal has nothing to do with fighting the present war.

It is not intended to affect the operation of selective service.

It is not envisioned as a means of shortening the period of service of the men now under arms or who may be called to arms under selective service.

It is not designed as a method of providing an army of occupation after the defeat of Germany and Japan.

Our military experts do not claim that 12 months' military training is sufficient to make expert fighting men and officers in this present age of mechanized warfare. The year's training which is envisioned in the present proposal before Congress is, from the standpoint of the military experts, a compromise for reasons of political expediency. They would rather have it 2 years.

On the other hand, some civilian proponents of peacetime conscription are linking it with such matters as improving physical fitness, developing habits of character and discipline, indoctrinating in the democratic way of life, and removing illiteracy. We have in effect a proposal that is in one breath advocated as a military necessity and in the next breath is advocated as a scheme for improving the minds and conduct of youth, when in fact it will accomplish neither of these objectives.

But one thing is certain, namely, that purely military control over 18-year-old boys 24 hours a day for 12 months, with an intensive program of indoctrination would largely fix life outlooks. It does so in other countries, and it would here

Universal conscription of youth has long been the foundation stone of autocratic and militaristic European regimes which gave place in due course to dictatorships. It is alarming to contemplate that having fought a global war to rescue the world from dictators and ruthless military machines we are now asked to take this leaf out of the dictators' book and make compulsory military service a part of America's peacetime way of life. Under no circumstances should this subject be acted upon until the peace treaties are approved and the 10,000,000 or more in the military service return home and their views appraised.

The Jewish Problem and Its Solution

EXTENSION OF REMARKS
OF
HON. EDWIN C. JOHNSON
OF COLORADO
IN THE SENATE OF THE UNITED STATES

Monday, April 23 (legislative day of Monday, April 16), 1945

Mr. JOHNSON of Colorado. Mr. President, on March 18, William B. Ziff, a well-known author, publisher, and military and political strategist, delivered an address at the Hotel Astor, in New York City, at a meeting to commemorate the thirtieth anniversary of the creation of the Jewish Legion in World War No. 1. Since Mr. Ziff's New York address is an important contribution to a troublesome current world problem, I ask unanimous consent that it be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE JEWISH PROBLEM AND ITS SOLUTION

Mr. Chairman, 10 years ago I returned from a visit to Europe, convinced that that continent was in the throes of violent social change which would show itself in chauvinist reaction of the blackest kind.

I wrote at that time that unless the Jews of Europe were taken out of there they would all be slaughtered under conditions unequalled on this earth since the bitter days when the ruffian hordes of the wild Cossack Chmielnicki ravaged eastern Europe.

A HOPELESS SITUATION

It was clear that in the old world at least the Jewish problem was a universal problem. More accurately, perhaps, it was not a Jewish problem at all but an anti-Semite problem. In any case it represented a pathological condition which only could grow hopelessly worse as it went along. This was a potentially desperate situation, which obviously

could not be cured by the use of such mild political poultices as pacts, agreements, or minority clauses, or the assurances embodied in so-called educational measures. The remedies of socialism and education were also to prove valueless. It was in Germany, the most highly socialized and best educated of all the western countries, that the lightening of hatred and cultural cannibalism struck first and hardest.

WHAT IS THE SOLUTION?

It was apparent that the only common-sense solution for this major problem was to allow the Jews to normalize their lives by becoming like other nations, rather than to flit through history as an apparition whose very identity was in question. The persecuted Jews of Europe who wished to live as nationals under a Jewish government could then do so. Those who wished to merge their identities with other peoples, and perhaps disappear as Jews altogether, also would be free to do so, relieved for the first time of those ghostlike conventions by which they were linked, in the popular judgment, with an alien and gypsy past.

JEWS EVERYWHERE AFFECTED

Thus, this became a question affecting not only the Jews who were persecuted, but in a certain sense, Jews everywhere. Its solution patently meant giving the Jewish people a home, a territorial base where Jews were in the majority and Jewish culture dominated. This would bear the same relation to Jews elsewhere as Italy or Ireland bear to their scattered sons and daughters, people whose interest in the motherland is purely a matter of sentimental and perhaps, remote concern.

FIGHTING AGAINST THEIR OWN INTERESTS

This reasoned and common-sense solution to the Jewish problem was naturally to encounter a certain amount of serious opposition, as the self-interest or prejudices of others became effected by it. Perhaps its most conspicuous foes were to be found among a great sector of the Jewish people themselves, many of whom were in mortal fear of having their own lives and attachments confused with the purposes of this movement. It was they, on the basis of one pet theory or another, who cried the loudest against the forthright solutions embodied in the law of the nations under the Palestine Mandate. And it is they, in consequence, who must bear much of the responsibility for the millions who died at Oswiecim, Treblinka and Majdanek. It was behind this powerful cover of influential anti-Zionist Jews that the Imperialistic politicians of Whitehall were able to carry out that great betrayal of the Jewish hope with which we now, unfortunately, must deal.

ZIONIST LEADERSHIP INADEQUATE

Zionist leaders were for the most part unworldly and inexperienced, a group of cloistered intellectuals whose souls had been captured by this great vision of a reborn Israel. Denied that support which should have been their first bulwark against the pressures of hostile British and Arab politicians, they were thrown into ignominious retreat.

Step by step the Jewish position under the mandate deteriorated. Palestine, which was to have been the homeland of the Jews, became the only area outside of Nazi Europe which was governed by a body of anti-Jewish laws. This result took place over a period when the physical position of European Jews was visibly becoming more and more precarious.

PROPHETIC WARNINGS IGNORED

Prophetic voices arose to warn both Jewry and the world as to the nature of the terrible crisis which was impending. One of them was that great and tragic figure, Vladimir Jabotinsky. Among others were the glorious Englishmen, Lord Wedgewood and Lord Strabolgi. Not least among these men was that noble English soldier, and my own dearly beloved friend, who sits with us tonight—Col. John Henry Patterson.

These men were ignored. In some cases they were berated and condemned, their motives impugned, often by whole sections of Jews themselves. Living through those times, I could not help but think: "Forgive them, Lord, they know not what they do."

THE PROBLEM CAN YET BE SOLVED

At this moment the curtain is rising on the last act of this terrible and forbidding drama. The hour of another and perhaps final decision is striking.

We cannot bring back to life the four million who died in the torture chambers of Poland. But this we can do: We can rescue the few who remain. We can solve, once and for all, this entire problem which has become an intolerable festering sore on the body of Europe, and which threatens from there to contaminate the world.

To accomplish that result at this late moment, must mean that at least the Jews themselves abandon all opposition to this program, and take a positive and vigorous interest in its success. Western Jewry can no longer shrug its shoulders and exclaim self-righteously: "Am I my brother's keeper?"

This is not now a fight for Zion alone but for international law and international morality, of which Zion is a symbol.

THE CRUCIAL TEST

If we cannot erect a new world order on the ashes of this suicidal conflict, an order based on the humanities, on large-scale social engineering, and on a settlement of all major problems at their source, then we have fought this war for nothing. We have fought it to enthrone greed and the gangsterism of pure applied power and self-aggrandizement.

For the statesmen who now talk of international charters, pledges, and laws, the test is clear: Let them adhere to the sacred pledges to which they are already bound. As long as they continue to honor these in the breach rather than in the observance, it is difficult to see how any value can be attached to any new commitments they may make. One cannot blow hot and cold on the matter of honor and good faith. They either exist, or they do not exist.

In the future world, every people must have the right to live and be secure. The Jews, too, must have this right. We cannot countenance an act by which they are to be despoiled of their patrimony by the predatory minions of a great power, covetous of their little inheritance.

As long as free men can speak forth boldly, we must make it our business to see that the infamous white paper which now restricts the immigration of Jews to Palestine is withdrawn, and that the present anti-Semitic regime which now disgraces that country, is smashed with it. Palestine must be thrown open to the Jews as a Jewish commonwealth, to which its children can return in accordance with their need or inclination.

MUST BE REPRESENTED AMONG UNITED NATIONS

Jewish Palestine now should be represented as one of the United Nations at the San Francisco conference. It has fought shoulder to shoulder with the other United Nations in what should be a common war for liberation. The little Jewish community of Palestine gave to the Allied Armies 70,000 soldiers, compared to 7,000 for the whole of Arabia, including Arab Palestine.

The Arab states who had previously made no secret of their pro-Axis sympathies, recently met in Cairo. At this last belated moment, they finally declared war on the Axis, for the frank purpose of sitting at the San Francisco Conference to protect their own interests there.

What a diabolic and scurvy trick of fate this is: Pro-Axis Arab kings, men who made no secret of their dislike for the United Nations, are now to sit with us as equals at San Francisco, to dispose perhaps of the affairs of Jewish Palestine, which will not be represented, and which has fought bravely at our side since the beginning.

Here is a situation on which all good men should become vocal, a travesty on the first elements of honor, morality, and common decency. It is a situation in which we who seek a peaceful and decent world order must speak first. It is our indignation which would spark the resistance that will put an end finally to this evil business.

PROMISES SHOULD BE TRANSLATED INTO ACTION

Perhaps as free citizens it is not too much for us to remind the President of the United States that at a moment when he was running for the distinguished office he now occupies, he made certain promises referring to the early establishment of a Jewish state in Palestine. These assurances he acknowledged again a few days ago. They should be placed into effect now.

If there is any validity at all to the whole plan for international organization, our major contribution must be political morality. Its essence is the abandonment of the vicious rule of expediency and power politics, and the erection of a truly human and cooperative world. Such a world cannot exist unless among its autonomous units is one called by its ancient name Eretz Yisrael, the Land of Israel.

If this expectation is to be trampled underfoot; if it is to be buried with the mouldering bones of the countless Jewish dead of Europe—then the hopes of mankind, insofar as they are based on honor, justice, and social sanity, will lie buried with it.

Address of Associate Justice William O. Douglas

EXTENSION OF REMARKS

OF

HON. LYNDON B. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. LYNDON B. JOHNSON. Mr. Speaker, on yesterday one of America's most distinguished citizens, Mr. Justice William O. Douglas, at the Washington Monument Grounds, delivered an address which people everywhere should have an opportunity to read.

It is a touching and reasoned tribute to a great people and their fallen leader. It is a warning to the sleepy and selfish, but a hope and a goal for decent people throughout the world.

It is a statement that I should like to see in every home—an understanding that good people should all possess. It comes from one who had the confidence and affection of Franklin D. Roosevelt and the people he spoke for—had it because he earned and merited it. Under leave to extend my remarks I include the text of the address:

President Roosevelt's death has left the Nation he led shocked and grieving. People loved him. Millions who never had a chance to know him are mourning the loss of a personal friend. All over the country people knew his voice and his face just as well as they knew the members of their own family. His name was on a casualty list which entered every home in the land. It was as if

he belonged to your family and to mine as well.

But President Roosevelt didn't belong just to us. He belonged to all the people all over the world who thought of him as a leader. He belonged to those in the rice fields of China. He belonged to freedom-loving men who had been made slaves in Europe. They did not know him very well—not any better than many Americans knew him back in 1933, when he came into the White House amidst the break-down of our industrial production and our banking system. He said to us then that we had "nothing to fear but fear itself."

We listened—some doubtfully. And others—people who like statistics—said that was hardly a scientific plan for getting the country going again. But after a little while it turned out we were not afraid any more. And the wheels were starting to turn again. President Roosevelt's confidence had sort of reached around and gotten in the hearts of our people until, finally, it got into the machinery of our economy too.

Our system is a machine. But it is a machine that runs on human energy. President Roosevelt believed in the energy of America. He dedicated it to the welfare of the individual.

Look at what we have accomplished. He has won his bet with history because the men and women of America of all ranks, creeds, and races proved worthy of the confidence he placed in them.

All over the world today there are people like us here in America who need a chance to stop being afraid. We know they're like us, because they have sent us their brothers and cousins and sons for a hundred years to be our citizens. I do not believe the people who stayed behind are very different from the people who came over here. I expect that if they had a chance—a chance to talk freely, a chance to go ahead and do their own work without looking over their shoulders to see who was watching them, a chance to worship and to think as they please—I expect those people, led by the veterans of the underground, might make a pretty good thing out of old Europe even yet. They had come to think about President Roosevelt as we did in 1933. He was promising them a chance. The decent folks of other lands who will remake their countries do not want more than that. They don't want charity.

It seems to me that it is up to us to see that they get that chance. Not just for their sakes, but for our own. War in Europe doesn't stay in Europe. War in China doesn't stay in China. It takes our young men and young women. It asks every kind of sacrifice.

In a physical sense this war has not been hard on the ones who stayed at home. One of our bastions—Pearl Harbor—was bombed. The Japanese conquered and occupied the Philippines. And its people, who are our brothers and friends as well as our allies, know from cruel experience what enemy rule is like.

Next time we may all know what it is like. If the world is stupid and selfish and blind enough to let war come once again, it will not spare the United States. It will be our cities here at home that are turned into rubble, and our children who before they can talk learn to cringe at the sound of an airplane. And this great, rich, proud country—America—may then even know what starvation means.

No one man could prevent that. No one man could build a lasting peace. President Roosevelt knew that, probably better than any man living. He wasn't trying to do something for us. He was doing something with us, something that all of us agreed on and knew had to be done. It's a big job, the biggest the world has ever faced.

When Franklin Roosevelt died, we lost an engineer who knew that job intimately, and who had been working at it with all his heart and all his strength for years. But he did not die fearing that the job would not be done because he was gone. He knew it could be done by the rest of us, if we worked at it with as much patience, and conviction, and unselfishness as he used.

I am not going to say that if we fail we shall betray Franklin Roosevelt. I am sure he would say that if we fail, we shall betray ourselves. If we fail, we shall betray not what we admired and loved in President Roosevelt; we shall betray the part of ourselves that loved him—the great progressive strength of America that could produce such a leader and recognize him, and back him up through the hardest years of our national life.

After the last war we betrayed ourselves. As a friend recently told me, an empty room containing the personal belongings of his boy who died at Guadalcanal is a continuous reminder of that betrayal. Franklin Roosevelt had been a part of that war, too. He thought his responsibility did not end when the Germans surrendered and the boys who were still alive came home. Some people did. All of them were not in this country. Men in many nations, who should have known better, felt that the world could afford to go back to the kind of international anarchy that had made the First World War.

Franklin Roosevelt did not feel like that. He campaigned in 1920, with Governor Cox, for the program and ideals of Woodrow Wilson. Governor Cox and Franklin Roosevelt were beaten. I doubt if defeat mattered very much to them personally. What mattered to them, what they knew would soon matter to the rest of us, was that a chance for peace had been lost.

No one would say today that we can afford to go back to international anarchy. We know too well what it can bring. If there are any Americans who are still doubtful, the Army and the Navy and the marine corps can tell them. The Filipinos can tell them. The men who survived Bataan and the death march and the Japanese concentration camps can tell them.

All of us living today are responsible in some part for this part. If there is another war, that responsibility will come home to us in America just as fully as it came home to the English and the French and the Russians and the Chinese—just as fully as it is at last coming home to the Germans and the Japanese. We have one more chance.

If we really take our responsibility, we can make a peace that will last. That peace is essential if we really are to have a world in which we can live the kind of life we want to live right here at home. Our national aims in the end come right down to that.

Peace is not made once. In the last war, the Germans said that a treaty was nothing but a scrap of paper. And in terms of power politics, perhaps they were right. Peace is made not once but again and again, day after day, by work and responsibility and devotion as great as any that is asked of us in war.

One step will be taken next week in San Francisco. What matters is not what is said in the speeches at that Conference, important as they will be. What really matters is the determination of the people who will be watching that Conference from Omaha and Houston, Winnipeg and London, Moscow and Belgrade, Mexico City and Chungking.

A conference can draw up plans, and Prime Ministers and Presidents can sign treaties. What Franklin Roosevelt knew, what he fought for all the days of his life, was a peace that would be stronger than an empty treaty; a peace that would not be a scrap of paper; a peace made out of the tough hearts and the aspiring souls and the devotion of men.

His death has brought home to us with dramatic emphasis the tremendous, united effort we must make today and tomorrow and throughout the years if victory in peace is really won.

Ceiling Prices on Butter

EXTENSION OF REMARKS

OF

HON. CHARLES R. ROBERTSON

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. ROBERTSON of North Dakota. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

House Concurrent Resolution Z

Concurrent resolution memorializing Congress, the President of the United States, and Chester Bowles, Administrator of the Office of Price Administration, to permit the sale of North Dakota butter within ceiling prices on the basis of its true commercial value, and to cease unjust discrimination against butter made in the State of North Dakota

Be it resolved by the House of Representatives of the State of North Dakota (the Senate concurring), That, whereas the creamery industry contributes materially to the aggregate economy of the State of North Dakota and is the only branch of agriculture in which practically all the processing of the products is carried out within the borders of the State; and whereas the Office of Price Administration has adopted a policy in dealing with our North Dakota creameries based on the erroneous conclusion that top-quality butter cannot be produced in North Dakota, and pursuant to said policy has classified North Dakota as a B grade butter State;

And whereas this action is doing irreparable harm to our dairy industry as a whole and particularly to the producer, as any action that compels creameries to market butter on the theory that Government grades are the sole and only basis of its commercial value will automatically reduce the price the creamery can pay to the producer in this State for butterfat; and whereas if damage actions by the Office of Price Administration succeed as against creameries which have bought and paid for butterfat to the producer on the theory that such butterfat could be and was processed into butter that could be lawfully sold for a price actually based on its real commercial value, within ceiling price limitations, and judgments for damages against said creameries are obtained, then and in that event, as to cooperative creameries, the damages will be collected from the pockets of the farmer producer, and as to independent creameries, the judgments will have to be collected out of the working capital, as in truth and in fact the prices that were paid to the farmer were based on the prices the creameries have received for the butter, and in truth and in fact, no damage has accrued to the consumer; and if the present program of the O. P. A. is carried out, no benefit can or will accrue to the consumer. The North Dakota producer will be materially damaged and the ultimate consumer will receive no benefit: Now, therefore, be it

Resolved, That we petition the Congress of the United States to investigate the activities of the O. P. A. in connection with the matters hereinbefore referred to, and to urge Chester Bowles, Administrator of the Office of Price Administration, to issue such regulations as may be required to permit North Dakota creameries to sell North Dakota butter within ceiling prices on the basis of its

true commercial value, and that the present program of the O. P. A., based on alleged upgrading, be forthwith terminated; it is further

Resolved, That a copy of this joint resolution be sent to the President of the United States; to Chester Bowles, Administrator; and to each of the North Dakota Members of Congress.

(NOTE.—The above concurrent resolution was passed by the House of Representatives and the Senate without any opposition by voice vote.)

Meat Shortages

EXTENSION OF REMARKS

OF

HON. JOHN C. BUTLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. BUTLER. Mr. Speaker, the problem of meat shortages must be solved at once. I understand we have in this great country of ours more cattle now than at any other time in the history of our country. Our economic structure has been built upon supply and demand. Why cannot we get some of this meat? Why do we have false shortages? Why do we have the black market? Why do the butchers not have the necessary meat to sell their old-time customers?

Why does not the O. P. A. let this surplus come to legitimate markets? With a large supply of meat on the market the prices will go down and the black market will disappear. Does the O. P. A. want this to happen? Do they want low retail prices? If so, then act and allow the surplus to come to our retail stores throughout the country.

Sometimes, I wonder.

Under permission granted I am including a letter from a constituent.

THE BUFFALO STOCK YARDS,
Buffalo, N. Y., April 19, 1945.

Hon. JOHN C. BUTLER,
Representative, Forty-fourth New York District,
House Office Building,
Washington, D. C.

DEAR SIR: I am attaching hereto a resolution adopted by the American Stock Yards Association, as presented to the War Food Administration and Office of Price Administration.

The resolution is self-explanatory, and any support that you can give to its adoption will be appreciated.

Respectfully yours,

W. L. MUSTARD.

Resolution adopted by the board of directors of the American Stock Yards Association on April 6, 1945

Whereas the Office of Price Administration has repeatedly stated that it had no intention of changing the normal movement of hogs through the usual marketing channels, and the Office of Price Administration has been repeatedly warned since its hog ceiling price set-up was announced that such price relationship would inevitably change the normal market movement of hogs; and

Whereas the present Office of Price Administration hog-price ceiling set-up is resulting in:

(a) Wasteful buying expense by packers;

(b) Increasing abuses in hog-buying operations;

(c) Increasing country slaughter of hogs, resulting in increased black-market operations;

(d) Increased country buying which has increased the cost of hogs to the packers with no increase to livestock producers, which has an inflationary effect: Now, therefore, be it

Resolved, That as a practical and simple means of improving these situations we recommend to the Office of Price Administration that:

1. Fair and reasonable differentials be initiated at markets operating under the Packers and Stockyards Act, 1921, sufficiently high, as compared to unsupervised buying points within the same area, to reestablish the normal market movement of hogs; and

2. That the failure of the Office of Price Administration to provide prompt and effective relief from the present intolerable conditions in hog marketing will result in the ever-increasing flow of livestock to black markets; and be it further

Resolved, That the above representations be aggressively presented to the proper Government officials and committees in Washington.

What the Situation Might Be if All the Proposed Levees Were Already Built

EXTENSION OF REMARKS

OF

HON. FADJO CRAVENS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CRAVENS. Mr. Speaker, under the permission granted to extend my remarks in the RECORD, I am including an article by Mr. C. F. Byrns which appeared in the Fort Smith Times Record, published at Fort Smith, Ark. The article appeared under date of April 18, 1945, and contains some useful evidence of the substantial qualities of river improvements designed and supervised by the Corps of Engineers of the United States Army. The article is as follows:

OFF THE RECORD

(By C. F. Byrns)

WHAT THE SITUATION MIGHT BE IF ALL THE PROPOSED LEVEES WERE ALREADY BUILT

Let's imagine what the flood situation would be in the vicinity of Fort Smith if all the levees approved in the 1944 Flood Control Act had been in service when the flood came.

Many hundreds of families have moved out of the lowlands in Braden, Camp Creek, Moffett, and Crawford County bottoms within 25 miles of Fort Smith. Many hundreds of homes will be flooded, leaving damage which cannot be estimated in advance and can hardly be calculated when the flood is over. Thousands of acres of land will be covered by flood water with varying results, depending upon the length of time the water stays on and other factors which vary somewhat with every flood.

At least a hundred blocks of Fort Smith were vacated. A considerable section of Van Buren was flooded. The furniture factory district of Fort Smith was emptied of virtually everything movable.

The damage will be much less than it was in 1943, because people got out ahead of the flood with no argument and took with them all the valuables they could carry. Yet the damage will be heavy and hard to estimate accurately.

Suppose we had been able to get built all the levees the Corps of Engineers recommended as a result of the 1943 flood, which were authorized by Congress in the 1944 Flood Control Act. What would be the picture?

The levees authorized in that act were designed by the Corps of Engineers to protect against a flood of the 1943 magnitude, assuming Fort Gibson Reservoir on the Grand River to be also in service. That assumption was logical, because Fort Gibson Reservoir had been authorized, the money to build it had been appropriated, and the engineers were ready to let construction contracts when war stopped its construction. It was not intended that the newly recommended levees should be built until the war emergency has passed. Fort Gibson Reservoir will be built as soon as materials and manpower are available. So the design was properly made to handle a flood with the Fort Gibson Reservoir in service.

The engineers say the Fort Gibson Reservoir plus the recommended levees would protect all the lands and the towns behind those levees from a flood as big as 1943, with a foot and a half of levee to spare in the rural areas and 3 feet in Fort Smith and Van Buren.

The present flood is almost as big as that of 1943. But it would give little anxiety if we had those levees and that one reservoir in service, insofar as the lands behind these levees are concerned. But protection for those lands and towns behind the levees is not enough. The levees would not protect all the lands which are damaged by such floods as these. They would protect only the lands whose average annual damage is sufficient to justify the cost of the protection. All the reservoirs recommended upstream will be needed to give us the type of protection we really need.

But, you may be thinking, what good are these levees, when levees go out in every flood? Since the heavy rains began a few weeks ago to push up the water levels in the White, the Black, the Ouachita, and the Red, getting around to the Arkansas in earnest only this past week, the papers have been full of stories about breaking levees. Some people think levees promise protection they do not deliver.

There is one fact about levee breaks that our people ought to understand and probably don't.

The levees that break were not built originally by the Corps of Engineers, but by levee districts. Every levee that has gone out in Arkansas this spring was a levee district project, not a Corps of Engineers project. Some of them had failed in previous floods, but in those instances they were rebuilt only to their original grade—not to the level the Corps of Engineers would have built them if they had been doing the designing.

It was true in 1943, it has been true in 1945. I cannot remember any time when it wasn't true. The levees the Corps of Engineers build stay built. The failures of levees are not the failures of the engineers.

A School for Diplomats

EXTENSION OF REMARKS

OF

HON. JOE W. ERVIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. ERVIN. Mr. Speaker, I thank you and the Members of the House for granting unanimous consent for me to set forth certain information in regard to my proposal to establish a school for diplomats.

On the first day of the present session of Congress, I introduced H. R. 405,

to create and establish a Foreign Service Academy.

Copies of H. R. 408 were mailed by me to certain persons, firms, and corporations engaged in foreign commerce, to certain educators, to a few newspaper editors and to a few other persons, connected with the Government, as well as to other persons in private enterprise, with the request that they give me their opinion upon the proposal.

The response was most enthusiastic. Many of them went into great detail to discuss the necessity of a school for diplomats, in view of our expanding foreign policy, and quite a few of them offered detailed suggestions in regard to H. R. 408 and in regard to the operation of the proposed academy.

As a result of many suggestions which have been made to me, in regard to the proposal, I have decided to make some revision in the original bill and to reintroduce the proposal as revised. Consequently, I have revised the bill and have today introduced the revised bill in the House of Representatives.

The new bill is known as H. R. 2980.

I will greatly appreciate it if those of you who may read this extension of remarks would communicate with me and let me know whether you are in favor of establishing a school for diplomats.

The new bill, H. R. 2980, reads as follows:

A bill to create and establish a Foreign Service Institution

Be it enacted, etc., That this act may be cited as "Foreign Service Institution Act of 1945."

CREATION OF FOREIGN SERVICE INSTITUTION

SEC. 2. There is hereby created and established a Foreign Service Institution of the United States, to be located in the vicinity of Washington, D. C., on a site to be selected by the State Department.

SEC. 3. The State Department shall acquire and provide such grounds and buildings as may be necessary for the purposes of this act. Such grounds may be acquired by purchase or by condemnation proceedings, and such buildings may be acquired by purchase, condemnation proceedings, or by construction. For such purposes, the Department of State is given the right to acquire property under the right of eminent domain and is hereby granted priorities equal to those of the Army and Navy for materials, supplies, space, and facilities.

SEC. 4. Until such permanent grounds, buildings, and facilities are provided, the Department of State is authorized to provide temporary facilities.

SEC. 5. An appropriation sufficient for the purposes herein set forth is hereby authorized to be made.

SEC. 6. The time for the opening of the said institution shall be designated by the State Department, at the earliest time which is feasible and practical, but in any event not later than January 1, 1947.

SUPERVISION AND GOVERNMENT OF INSTITUTION GENERALLY

SEC. 7. The supervision and charge of the institution shall be in the Department of State, under such officer or officers as the Secretary of State may assign to that duty.

SEC. 8. The officer named by the Secretary of State, and in his absence the next in rank shall have the immediate Government and command of the institution.

BOARD OF VISITORS

SEC. 9. The board of visitors to the Foreign Service Institution shall consist of one member of the Foreign Relations Committee of the Senate and one member of the Foreign Affairs Committee of the House of Representatives, to be appointed by the respective chairmen thereof, together with two distinguished members of the academic world and one representative respectively from agriculture, labor, commerce, industry, and the press to be selected by the Secretary of State and one representative from the Departments of Agriculture, Treasury, Commerce, Labor, Interior, and the Tariff Commission, respectively, to be chosen by the heads of these Departments and agencies. The board will annually select its own chairman and secretary.

SEC. 10. It shall be the duty of the board of visitors to inquire into the work of the institution during the previous year and to render a report thereon to the Congress.

SEC. 11. The members of the board of visitors appointed, as herein provided, shall visit the Foreign Service Institution annually as a group at such time as the officer in charge of said institution shall appoint, and the members of said board may visit said institution together or separately as the said board may elect; and the members of the board shall be paid their actual expenses while engaged upon their duties as members of said board, and their actual expenses of travel by the shortest route.

ADVISORY COMMITTEE

SEC. 12. The Secretary of State shall appoint an advisory committee of the Foreign Service Institution, which shall consist of not to exceed five persons of distinction, who shall serve without pay. The members so appointed shall advise with the director of the institution from time to time and visit the institution as a group at least once during the academic year on the call of the officer in charge, for the purpose of discussing the subsequent year's program for the institution and advising the Secretary of State relative thereto. The actual expenses of the members of the advisory committee, while engaged in these duties, including their actual expense of travel, shall be defrayed under governmental travel regulation from any appropriation available for the authorized work of the Foreign Service Institution.

STAFF OF PROFESSORS AND INSTRUCTORS

SEC. 13. The Secretary of State is authorized to employ at the Foreign Service Institution such staff as in his opinion, may be necessary for the administration of the institution and the proper instruction of the students; and individuals so employed shall receive such compensation for their services as may be prescribed by the Secretary of State. The Secretary of State shall report to Congress each year the number of individuals so employed and the amount of compensation prescribed for each.

STUDENTS

SEC. 14. The number of students admitted to said institution, and the time for their admission, shall be determined by the State Department.

SEC. 15. The admission of students shall be determined by the Secretary of State, under rules and regulations to be promulgated by the State Department in accordance with the training requirements of the Foreign Service and the Foreign Service Reserve.

SEC. 16. Students shall be subject at all times to do duty in such places and on such service as the Secretary of State may direct.

PAY AND ALLOWANCES OF STUDENTS

SEC. 17. Each student shall receive quarters and subsistence and such other allowances as may be determined from time to time by the Secretary of State.

COURSE OF INSTRUCTION

SEC. 18. The courses at the Foreign Service Institution shall be for such periods of time as the State Department may determine. The courses shall include such instruction, to be determined by the Secretary of State, as will best fit each student for his duties in the Foreign Service or the Foreign Service Reserve. The Institution may prescribe a special course of study and training at home or abroad for any student.

SEC. 19. Each student at the Institution who shall satisfactorily complete a course of instruction shall receive a certificate of competence.

MISCELLANEOUS PROVISIONS

SEC. 20. The Secretary of State is authorized, in his discretion, and subject to regulations to be established by him, to admit to the Institution, to receive instruction in courses regularly offered at the Institution, a limited number of private citizens of the United States employed or recommended by some person, firm, or corporation engaged in foreign commerce, provided such private citizen, so admitted, shall pay to the Institution such sums as will fully compensate for such privilege, and provided the admission of such special students shall not require any increase in the facilities or staff of the Institution.

SEC. 21. The Foreign Service Training Division of the Department of State is hereby transferred to the Foreign Service Institution, to be integrated into the Institution under rules to be prescribed by the Secretary of State.

SEC. 22. The Secretary of State is hereby authorized and empowered to promulgate rules, not inconsistent with this act, for the supervision, government, and management of the Institution.

Feeding Savoys to the Cows

EXTENSION OF REMARKS

OF

HON. A. L. MILLER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MILLER of Nebraska. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include a clipping from the Daily Herald in England, dated February 26, 1945. The article is entitled "Feeding Savoys to the Cows":

FEEDING SAVOYS TO THE COWS

(By B. A. Steward)

East Anglian farmers, with hundreds of acres of cabbages and savoys, have almost given up all hope of finding a market for them. So some of them are turning their cows into the fields to eat up these unwanted crops.

On one Essex farm a big field of spring cabbages has already been ploughed in and the land prepared for the spring corn.

A grower with 70 acres of savoys on his hands—representing about 500 tons—tells me he is holding on till March, and then, if there is still no trade, folding them off with sheep.

One of the main difficulties is the lack of road transport. And prices of savoys on the farm have reached a record low level.

"They are always a gamble," said one farmer. "Last year I sold mine for £100 an acre; this year I have been glad to get £25 an acre for a 7-ton-an-acre crop."

RUSH TO SELL

One trouble, he added, is that everybody cuts and markets these savoys as soon as there is a rise in price. The market is therefore glutted and prices tumble again.

I have heard of one grower who sent 32½ hundredweight of savoys to Covent Garden a few weeks ago. After all deductions he received £1 3s. 3d.

Meanwhile spring sowing of corn goes on apace. On the lighter lands big acreages of peas and oats have been drilled during the past week.

Farmers on the heavy lands are still waiting for drying winds.

Mr. Speaker, apparently the English farmer is experiencing the same difficulties that the farmers have experienced in some sections of the United States—one of overproduction or bad distribution. Here is a farmer in England who is finding it necessary to turn his cattle and sheep into the cabbage patches because there is no sale of the cabbage.

Historical Documents of the Roosevelt Administration

EXTENSION OF REMARKS

OF

HON. RAY J. MADDEN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MADDEN. Mr. Speaker, I wish to call attention of the Congress to a set of interesting and destined to become some of the most historic documents of the Roosevelt era. They are the original signatures, on three large sheets of parchment, of the majority of the men and women who enacted into law the most far-reaching social legislation ever to be placed on the statute books of this Republic. Never before in the history of the United States has such a collection of signatures been assembled. In the hands of the political and judicial leaders representing the three branches of the Government who signed these documents rested the welfare and the future of the American people during one of the greatest economic and political crises in our history.

Of the membership of the Seventy-third Congress there remains today only 98 Congressmen and 26 Senators of all political parties.

There are three documents in the set.

No. 1 contains the signatures of the Democratic membership of the House of Representatives of the Seventy-third Congress, which was the original Congress of the New Deal administration. There are 250 signatures on this one document. Heading the list is the late Henry T. Rainey, who added, after signing his name, "Speaker of Representatives." Following this appears the signature of the late Joseph W. Byrns, who under his name wrote "Majority Leader." Byrns later succeeded Rainey as Speaker. Down in the center of the large document appears the signature of the late William B. Bankhead, who later became Speaker himself. Above this appears the signature of the present Speaker, SAM RAYBURN, but he was then merely a Member of the House as was JOHN MCCORMACK, now majority leader. Many of the House Members later became United States Senators and some Governors of their States. Edward W. Crump, political leader of Tennessee, who was then a Congressman, signed the document. Many other interesting political figures who were then in the House are among the signers.

No. 2 contains the signatures of 78 Members of the United States Senate. The late Key Pittman, President pro tempore, heads the roster. Among many Senators who have passed on appear the signatures of John Hamilton Lewis, Morris Sheppard, Gibbs McAdoo, Huey P. Long, Joseph T. Robinson, George W. Norris, James Couzens, and Royal S. Copeland.

Hugo Black, now of the Supreme Court, and James Byrnes, who was appointed to the High Tribunal, later resigned to become assistant to the late President Roosevelt, signed the document as Senators.

On the bottom of the Senate sheet is the Roosevelt Cabinet. Jim Farley signed the document with his famous green ink. Henry Wallace, now Secretary of Commerce, formerly Vice President, signed the document as Secretary of Agriculture. On the bottom of the Cabinet roster appears the signature of President Franklin D. Roosevelt. President Harry S. Truman affixed his signature as a Senator.

No. 3. On a third sheet are the signatures of the original Supreme Court at the beginning of the Roosevelt term. This was the famous Court which declared many New Deal laws unconstitutional and created one of the greatest political controversies in the history of the Republic. Chief Justice Hughes was the first to sign the document. Next comes the signatures of Van Deventer, Brandeis, Butler, Roberts, McReynolds, Sutherland, Stone, and Cardozo. At the top of this document is printed: "The Supreme Court of the United States during President Roosevelt's Administration," and so forth.

The collection was started soon after March 1933 and was completed in 1936 when it was signed by President Roosevelt in the White House. These signatures were secured by Joseph Leib, vice commander, Costello Post, No. 15, Washington, D. C., and he will present the parchments to the Roosevelt Historical Library at Hyde Park, N. Y. There have been only a few newspaper stories written about these documents. Here they are:

[From the New York Times of June 24, 1934]

REELECT ROOSEVELT CLUB JOINED BY 275 IN CONGRESS

WASHINGTON, June 23.—Vice President Garner and 48 Democratic Senators, and Speaker Rainey and 225 Members of the House have joined a Reelect Roosevelt Club formed by Joseph Leib, original 1930 Roosevelt leader in Indiana.

All the Democratic Senate and House leaders, Senators GLASS, BYRD, and Copeland, together with Representative Cullen of New York and other Tammany members who opposed Mr. Roosevelt's nomination at Chicago, are among the charter members.

[From the Washington Times (Greatest Show on Earth column) of August 27, 1936]

It is a charter which contains the signatures of 225 Members of the House and 52 Senators. It contains the signatures of the men who voted for and put the New Deal legislation on the statute books. It is also valuable for the fact that it contains the supporting names of Senator HARRY F. BYRD, of Virginia, and Senator Royal S. Copeland, of New York, who changed their minds several times about the New Deal. Despite this, they are down there for Roosevelt.

[From the Washington Post of January 17, 1937]

Picture of the signatures and owner of the documents, on the bottom of the photo it says:

"A Roosevelt man since 1928, Joseph Leib, ardent Democrat, has the signatures of Democratic Senators and Representatives and the Cabinet members. And, finally, on December 31, President Roosevelt signed the document himself. Leib calls it a New Deal round-up. In reality it is a petition calling for President Roosevelt's return to the White House. Leib began work on the 'who's who' back in 1933."

Communism in America: How It's Working

EXTENSION OF REMARKS

OF

HON. LAWRENCE H. SMITH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. SMITH of Wisconsin. Mr. Speaker, Mr. Mathew Woll, vice president of the American Federation of Labor, has long been recognized as a labor statesman. He calls his punches and names people and things. In recent months he has engaged in rendering this Nation an outstanding service by pointing out just how the advocates of totalitarianism operate to control vital organizations in and out of government.

On April 5, 1945, the New York Journal had an interesting editorial on this subject. I incorporate it as part of my remarks:

COMMUNISM IN AMERICA

Mr. Matthew Woll, vice president of the American Federation of Labor, gave the Rotary Club of New York City—and all thoughtful Americans—something to ponder over when he spoke of the growing trend in the United States toward "totalitarianism in small but influential groups."

Not only in labor unions, in which the Communist brand of totalitarianism has conducted its most active and successful campaigns of infiltration, is this trend evident, said Mr. Woll.

"Chuch organizations and cultural bodies have adopted the ever-changing Communist party line," he warned.

"But most disquieting is the Communist penetration of conservative business groups.

"Interests close to some of our largest banking institutions have become fellow travelers, strange as it may sound."

This is something easily confirmed.

Communist cells have covertly and cunningly snuggled themselves, as small but influential minorities, into almost every American field of enterprise—particularly but by no means exclusively into the fields of labor, Government, and education.

They do this with deliberate purpose.

They know perfectly well, as Mr. Woll says, that opposed to them is "the allegiance of

the overwhelming percentage of the American people to the democratic way of life."

They know the American people are inclined to put too much reliance in the fact that the great majority of them do not believe in communism in America.

Too many Americans delude themselves that because acknowledged and avowed Communists are not numerous in the United States they are not dangerous.

Purposely, therefore, the Communist penetration makes no attempt to gain numerical superiority in the United States.

Instead, it is content to take over the key positions in American life—making no effort to win the majority of the members of wholesome and important American organizations to its views, seeking only to control them and speak for them and act in their name.

That is why so much communistic enterprise is carried on in the name of American labor, and of American education, and of American government, and even of American business, industry, and finance—when actually these vital fields of American enterprise are not communistic at all, and the vast majority of the people affiliated with organizations in those fields are not communistic.

The spread of totalitarianism in the United States and the great danger posed by it, as Mr. Woll says, is in "the gullibility with which some respectable sections of the community have accepted the brand of political and economic eyewash sold by the American Communists."

"American communism can thrive best in a totalitarian atmosphere," he said in his New York speech.

"Every move to concentrate greater power in the hands of government meets with a chorus of American Communist approval, and since it is generally agreed that big government is the enemy of economic voluntarism or free enterprise, and since communism in America today is completely behind the growing tendency toward total control over the Nation's industrial enterprise, those in business who soft-pedal communism are, in effect, digging their own graves."

Mr. Woll has effectively and courageously and honestly raised the storm warnings against the Communist disaster that impends in America.

But the American people have never been without honest and adequate warning of this disaster, which accounts for the imminence of the disaster.

It is not enough for America to hear such a voice as Mr. Woll has raised, but it must be heeded and acted upon, unless as he says we are to "find ourselves with military victory on our hands but unwittingly encumbered by the enemy's social philosophy."

More Than Coincidence?

EXTENSION OF REMARKS

OF

HON. CARL T. DURHAM

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. DURHAM. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Greensboro Daily News, Greensboro, N. C., of April 16, 1945.

MORE THAN COINCIDENCE?

"The Lord gave, and the Lord hath taken away."

Can it be more than coincidence that the day on which Franklin D. Roosevelt died missed by only hours the birthday anniversary of Thomas Jefferson?

True, a wide expanse of years separated these two great Americans and world figures whose hearts and minds paramounted the common man and his rights of liberty and equality under the law. But surely the passing of the one almost on the natal day of the other serves to emphasize the divine way. Other great leaders followed Jefferson, Roosevelt one of them; and other great leaders will follow Roosevelt, one of whom may have been born on the very day of his demise.

So long as the world is and mankind needs leaders to fight their battles, these leaders will arise. Their ideals, their influence, their courage, their vision, and their strength of character are part of civilization's accumulation, each making the foundation and the fabric stronger and more enduring.

Jefferson's birthday anniversary brings Roosevelt's necrology. There is a divinity that shapes our ends, rough hew them though tyrants and assailants of the dignity and the rights of the common man, with the spirit which burns within him, may.

"Blessed be the name of the Lord."

St. Lawrence Seaway and Power Project Ancient Argument of the Commerce and Industry Association of New York, Inc.

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. PITTENGER. Mr. Speaker, I was astounded the other day to receive a printed document, the title page of which reads as follows:

The St. Lawrence seaway power project, statement advocating permanent abandonment as economic fallacy by Commerce and Industry Association of New York, Inc., 233 Broadway, April 1945, New York 7, N. Y.

This document was signed by G. E. Mace, manager, transportation bureau, 233 Broadway, New York 7, N. Y. I understand that my colleagues have been furnished with copies of this document, but in the event that it went in the wastebasket I want them to know about it so they can request another copy for perusal. This document is really worth reading. In my opinion no greater bunch of economic fallacy has ever been tied together with binder twine. After reading over the alleged arguments in this document I was reminded of that historic debate in 1941 between Mr. R. V. Fletcher, who was attorney for the Association of American Railroads, and Adolph Berle, who was Assistant Secretary of State. These two distinguished gentlemen took part in a radio discussion about the St. Lawrence seaway and power project. Mr. Fletcher said in substance that the development would be disastrous because it might permit the importation of foreign goods in the Mid-West area served by the Great Lakes. He thought that would be strictly bad. Mr. Berle's caustic reply was, "Oh, oh, wait a minute, do you advocate filling up New York harbor? Has the importation of foreign goods ruined the city of New York?" Of course, this was over the radio, but I think a doctor gave smelling salts and it was not necessary to call an undertaker to take care of the opponent of the St. Lawrence seaway and power project.

On some other occasion I expect to discuss rather fully the alleged arguments advanced by the Commerce and Industry Association of New York, Inc. Needless to say, they have opposed the St. Lawrence project and used the same stale arguments against it over a long period of years. They admit in their own document that they have used these same arguments ever since the year 1919.

My purpose, Mr. Speaker, in commenting at this time is to call attention to hearings on the St. Lawrence project bill before the Committee on Rivers and Harbors in the House of Representatives on July 15, 1941, when a representative of this association appeared before our committee and testified against the project. I refer to Mr. George H. McCaffrey, and in order that we may be 100-percent accurate the following is taken verbatim from the testimony:

Mr. PITTENGER. Your argument is, and your reason for not building this now is, because it will not be available for 8 or 4 years?

Mr. MCCAFFREY. That it will not help defense, but will hinder it.

Mr. PITTENGER. For 3 or 4 years?

Mr. MCCAFFREY. Yes.

Mr. PITTENGER. So that if you came before this committee 4 or 5 years from now you would be opposed to the project, or for it?

Mr. MCCAFFREY. I do not know; I would have to know the conditions.

Mr. PITTENGER. Did you appear before the Senate committee in 1934?

Mr. MCCAFFREY. I did not.

Mr. PITTENGER. Did you take any action on this matter at all?

Mr. MCCAFFREY. I did not; the association did.

* * * * *

Mr. MCCAFFREY. The reason given by Mr. Chandler, who was our representative then, was that it was economically an unsound proposition, particularly from the standpoint of navigation and shipping.

Mr. PITTENGER. And you believe that too, do you not?

Mr. MCCAFFREY. Personally yes.

Mr. PITTENGER. And your association will go on believing it for a long time?

Mr. MCCAFFREY. No; I do not think that for a moment.

Mr. PITTENGER. Did you think you might change your mind 4 or 5 years from now?

Mr. MCCAFFREY. It will depend on what the conditions are at that time. (Pp. 1293–1297, hearings.)

Many of the statements made by Mr. McCaffrey to the Committee were in direct conflict with the testimony of Lt. Gen. William S. Knudsen, Maj. Gen. Thomas N. Robins, Secretary of Commerce Jesse H. Jones and many other witnesses who testified on the need for the St. Lawrence project, both for defense and for peacetime purposes. By a vote of 17 to 8, the Committee on Rivers and Harbors approved the project at the conclusion of extended public hearings and in its favorable report on the bill rejected the arguments advanced by Mr. McCaffrey and other witnesses who had questioned the defense value of the project.

In response to my questions, Mr. McCaffrey said:

Mr. PITTENGER. Then you are willing to let that power go to waste?

Mr. McCAFFREY. Until such time as there is a sound plan for the development of it and for the distribution of it proposed.

Mr. PITTENGER. Can you suggest any better way of distributing this power than the plan which is proposed in this bill, which is a nonprofit plan for the benefit of the consumer?

Mr. McCAFFREY. Yes; I can suggest a better plan than they have there.

Mr. PITTENGER. What is it?

Mr. McCAFFREY. To develop it and sell it to the private utilities under the regulation of a public service commission.

Mr. PITTENGER. You would even go so far as to grant the New York utilities the opportunity to get a license from the legislature and then build a dam for themselves, and then exploit this power to their own profit at the expense of the consumers?

Mr. McCAFFREY. No, sir; develop it publicly and sell it at the bus bar, but do not go into a distribution system. (P. 1298, hearings.)

At the same hearings, before our committee, official representatives of the State of New York, charged by the Legislature with the development of the St. Lawrence River for power and navigation, took direct issue with the testimony of Mr. McCaffrey, who was the representative of this association.

Gov. Herbert H. Lehman, Lt. Gov. Charles Poletti, and the power authority of the State of New York testified that the St. Lawrence project was urgently needed, not only for the national defense and war production, but also for the benefit of the people of that area in time of peace. The substance of the testimony of these official representatives of the State was that the adoption of Mr. McCaffrey's plan would mean placing the St. Lawrence under the control of a single gigantic utility company in New York State, the Niagara Hudson Power Corporation, which could purchase the production of the publicly built plant on its own terms. It would call for the repeal of the Power Authority Act, as sustained by Republican and Democratic governors and legislatures of the State of New York over a period of 14 years. It would also run directly counter to the policy and practice pursued in the case of all the major power projects which have been constructed over that period under State ownership in South Carolina, Texas, Nebraska, and in other States, and under Federal ownership on the Colorado River, on the Columbia River, in the Tennessee Valley, and in other areas. It is fair to say that only a few spokesmen for private utilities have had the hardihood to suggest such a reversal in public policy and a return to the unrestrained private exploitation of natural resources of hydroelectric power in vogue a generation ago.

Thou Shalt Not Kill

EXTENSION OF REMARKS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. RABAUT. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following article from the Washington Post in which reference is made to the protest of the Most Reverend Michael J. Curley, archbishop of Baltimore and Washington, to legislation permitting sterilization.

This practice is a violation of the rights of man; a forerunner of mercy killings, which are nothing but legalized murders. Remember the command of God: "Thou shalt not kill."

The article follows:

ARCHBISHOP FIGHTS STERILIZATION BILL

Citing authorized sterilization of mentally deficient persons as "a clear-cut example of governmental encroachment on the rights of the individual," the Most Reverend Michael J. Curley, archbishop of Baltimore and Washington, today has asked District Commissioners to reject proposed sterilization laws.

Startled to learn of sterilization policies employed at Gallinger Hospital for the past 12 years, during which 16 women have undergone such operations, Archbishop Curley offered a three-point argument against legislation to legalize the activity: (1) It is a basic principle of sound reason as well as a fundamental tenet of Americanism that every human being has certain personal rights of which he may not be lawfully deprived; (2) legislation permitting sterilization of the feeble-minded betokens an approach to totalitarianism; (3) once a person holds that the State may sterilize at the discretion of the civil authorities he logically could hold that persons could be put to death by the State if their mental or physical conditions render them helpless burdens.

Settlement of Accounts of Deceased Members of the Armed Forces

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. DOYLE. Mr. Speaker, I file herewith copy of H. R. 2941, the Doyle bill, introduced April 18, 1945, in this distinguished legislative body, and which bill was referred to the Committee on Military Affairs. Under unanimous consent, I insert the text of this bill in the CONGRESSIONAL RECORD:

H. R. 2941

A bill to authorize the payment of the entire amount found due in the settlement of accounts of deceased members of the armed forces without the appointment of a legal representative of the estate

Be it enacted, etc., That the paragraph of the act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1907, and for other purposes," approved June 30, 1906, as amended by Public Law No. 465, Seventy-eighth Congress, which relates to the settlement of accounts of deceased officers and enlisted men of the Army, is amended to read as follows:

"Hereafter, in the settlement of the accounts of deceased officers or enlisted men of the Army, where no demand is presented within 6 months from the date of the death of any such officer or enlisted man by a duly appointed legal representative of the estate, the accounting officers may allow the amount found due to the decedent's widow or legal heirs in the following order of precedence: First, to the widow; second, if decedent left no widow, or the widow be dead at time of settlement, then to the children or their issue, per stirpes; third, if no widow or descendants, then to the father and mother in equal parts, provided the father has not abandoned the support of his family, in which case to the mother alone; fourth, if either the father or mother be dead, then to the one surviving; fifth, if there be no widow, child, father, or mother at the date of settlement, then to the brothers and sisters and children of deceased brothers and sisters, per stirpes: *Provided*, That this act shall not be so construed as to prevent payment from the amount due the decedent's estate of funeral expenses, provided a claim therefor is presented by the person or persons who actually paid the same before the settlement by the accounting officer."

SEC. 2. The paragraph of the act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1909, and for other purposes," approved May 27, 1908, as amended (U. S. C., 1940 edition, Supp. III, title 34, sec. 941), which relates to the settlement of accounts of deceased officers and enlisted men of the Navy, Marine Corps, and Coast Guard, and of deceased commissioned officers of the Public Health Service, is amended to read as follows:

"In the settlement of the accounts of deceased officers or enlisted men of the Navy, Marine Corps, and Coast Guard, and of deceased commissioned officers of the Public Health Service, where no demand is presented within 6 months from the date of the death of any such officer or enlisted man by a duly appointed legal representative of the estate, the accounting officers may allow the amount found due to the decedent's widow or legal heirs in the following order of precedence: First, to the widow; second, if the decedent left no widow, or widow be dead at time of settlement, then to the children or their issue, per stirpes; third, if no widow or descendants, then to the father and mother in equal parts, provided the father has not abandoned the support of his family, in which case to the mother alone; fourth, if either the father or mother be dead, then to the one surviving; fifth, if there be no widow, child, father, or mother at the date of settlement, then to the brothers and sisters and children of deceased brothers and sisters, per stirpes: *Provided*, That this act shall not be so construed as to prevent payment from the amount due the decedent's estate of funeral expenses, provided a claim therefor is presented by the person or persons who actually paid the same before settlement by the accounting officers."

An Overdue Wage Adjustment

EXTENSION OF REMARKS

OF

HON. WILLIAM H. STEVENSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. STEVENSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the St. Paul Dispatch:

AN OVERDUE WAGE ADJUSTMENT

Postal employees are still paid on the basis of permanent wage scales established many years ago. Some have received momentary benefit through a temporary cost-of-living bonus that expires June 30; aside from that,

their only offset to higher living costs consists of overtime pay, and that in many instances is computed under a paradoxical rule which actually fixes a lower rate for overtime than for regular hours worked.

Some two dozen bills were introduced in the last session of Congress to correct these various inequities. The only one to reach a vote was adopted unanimously in the House only to be defeated in the Senate through a last-minute point of order raised by BAILEY, of North Carolina. The new Burch bill, now ready for a vote in the House, would substitute a basic readjustment of wage scales throughout the department for the present hodgepodge of amendments to the act of 1925.

For years there has been a strong popular sentiment in favor of wage adjustments for postal employees. The Minnesota Legislature, in an action which reflects public opinion here, has memorialized Congress to support the current measure. The Burch bill should pass without delay, together with the companion Senate resolution.

Personal Loss Is Felt by All

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Dave Egan, from the Boston Record:

PERSONAL LOSS IS FELT BY ALL

(By Dave Egan)

It would be futile to attempt a sports column today, for, like millions of plain people the wide world over, I feel that I have lost a good friend.

The baby, though he has not yet arrived at the age of 2, knew this. He was in my arms, looking out the sunporch window and admiring the first tulip that had come along to join the jonquils. The unbelievable news came like the clap of doom from the mouth of the radio. He knew, with the great wisdom of all babies, that something had saddened and maybe even frightened his old man, and he offered the baby comfort of a hug and a kiss and a smile.

I tell this simple and personal anecdote, for this was the greatness of Franklin Roosevelt, that so many millions of persons, exactly like myself, felt a personal loss. They start by saying:

"I was just paying my check in the restaurant, and my wife was waiting for me, when a waitress asked me if I had heard the awful news. My wife broke down."

Yes, you were just paying your check or you were looking out the sunporch window or you were just sticking a fork into the potatoes to see whether or not they were cooked when you heard that the head of a Nation had died, and felt as you felt when your father had died.

FRIEND OF MEN WHO TOIL AND SWEAT

This man, they said, had climbed where only eagles climb. Look. He had climbed where eagles dare not and cannot climb, for this man had soared into the heart of humanity. Yellow men on the continent of Asia, black men in the fastnesses of Africa, men of all colors and all creeds in all lands mourn him today, for he was the friend of men who toil and men who sweat.

He had spoken imperishable words of single syllables on their behalf. He had given hope to submerged millions. He had placed the rights of a human being above the rights of an adding machine. He had set, as a goal, freedom from want and freedom from fear, and such words as those are imperishable. The Franklin Roosevelts of the world do not die. They live forever, in just such words as those.

Coolies in rice fields know what they mean. Colored athletes, in town to seek a tryout with our baseball teams, know what they mean. The son of the immigrant and the man with calluses on his hands know what they mean. Freedom from want, they chorus in many tongues, and all who ever have known the pinch of poverty join the chorus.

They ask for little, these millions. Just the security of a job; that's all. Just the dignity of a human being; that's all. Just a crust of bread and a bowl of milk; that's all. All they ask, in fact, is the right to hope that the world of their children will be a better and a kinder one than the world of their fathers, and it was Franklin Roosevelt who kindled that hope in millions of humble hearts.

PRESIDENT OF THE POOR MAN

That is why all of us who once knew or now know the definition of poverty and the utter hopelessness of it felt frightened. This man was our champion and our advocate, who fought for us and pleaded for us. There were many who could not understand why we voted for him three times and then four times, and would have continued to vote for him as often as he might run. But they would have understood, I think, if they ever had known hunger and ever had felt that the world was a jungle. They would have joined the rest of us, I think, and voted triumphantly for him, for he was the President of the poor man.

Now the staff on whom so many millions leaned has broken under the enormous weight. Our good friend has died, and his death has frightened us, for he was our sword and our shield. So there is nothing much that a man can say, but there is an old, old story that a man can tell.

"Do you," someone asked the Chaplain of the United States Senate, "pray for the Senators?"

"No," replied the chaplain, "I look at the Senators and pray for the country."

I feel now as the chaplain of a century ago did. I feel like praying for the United States of America.

Let Us Invite the New City of Peace to the New World—South Dakota Provides Ideal Location for Capital of World Organization

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MUNDT. Mr. Speaker, on April 7 I addressed identical letters to Senator VANDENBERG and Congressman BLOOM asking them to extend the invitation of South Dakota to the delegates to the San Francisco Conference, inviting them to select the beautiful Black Hills of our State as the permanent peace capital of the world, once a new organization is created for the purpose of maintaining just and peaceful international relations. A copy of my letter was inserted in the CONGRESSIONAL RECORD for April 9.

I have received replies from both of these good colleagues of ours, Mr. Speaker, and the invitation will be carried along to San Francisco. It is submitted in all seriousness and with the earnest hope that it will be accepted. The more one reflects upon the Black Hills of South Dakota as the logical home for a world organization to preserve peace, the more one is impressed by its appeal.

Governor M. Q. Sharpe of South Dakota on April 20 released a press statement putting the force of his office back of this invitation and setting forth some excellent reasons why it merits the acceptance of the determining officials. He has created a committee of prominent South Dakotans to emphasize the availability of South Dakota as the permanent capital of the new world organization.

Mr. Speaker, both the State of South Dakota and the Federal Government have spacious park areas in the mountainous section of our State. I am sure that either or both of these park areas could be made available to the extent necessary, without delay and without cost, for the purpose of developing the campus and buildings for this organization. This new organization will carry with it the hopes and the prayers of all the world and it will be greater and mightier and more important than any city now extant. Governor Sharpe's suggestion that the Capital of the World be a new city developed in its own time, in its own way, and with its own name is sound and sensible. The Black Hills of South Dakota provide an ideal site for the development and permanent growth of such a city of peace in the heart of America—in fact not far from its exact geographical center—where peace has always found such a ready haven and justice such a friendly home.

The statement by the Governor of South Dakota follows:

Our efforts will be conducted as official activities of the State of South Dakota and on the plane of having something useful to offer and wanting to be of service to the cause of permanent world peace, rather than an attempt to secure anything of commercial advantage to us.

Some of our general reasons which will be presented to the San Francisco Conference in support of our invitation to locate the new peace capital in South Dakota are:

1. Our country was the first to declare as a national policy and ever after to carry it out, an idea which was really the first basic step upward an eventual world organization for permanent peace: All men are created free and equal.

2. The history of our country shows without exception that all races, creeds, colors, nationalities are here accorded equality of rights under the law and equality of opportunity in economic and social affairs. So thoroughly have we been influenced by that idea that we have fought various wars to maintain it at home and abroad. Therefore, the United Nations would find here an environment where all believe in and practice an idea that must be one of the basic foundation stones of an organization for permanent world peace.

3. Our country and especially our State of South Dakota has always maintained the policy of complete separation of church and state and complete freedom of religion for all. Therefore, the Christians, the Buddhists,

the Mohammedans, and all other great religious movements of the world would find here an environment in which they can build their churches, temples, mosques, and practice their religion as they desire without interference by the state or objection by the people.

4. South Dakota is located around the geographic center of the North American Continent. It is about equidistant from both the Occident and the Orient. Delegates and visitors from Europe, Asia, and Africa could meet here free from the local influences and past history and with a feeling of freedom from the advantages of location to one or the other. It is the most convenient to all and the most impartial location available for all for a world capital.

5. In the Black Hills of South Dakota exist areas of impressive grandeur, majestic mountain peaks, beautiful rolling hill country covered with stately ponderosa pine and ornamental timber in profusion, interesting geological, flora, and fauna conditions of all kinds, mountain streams and lakes having no superiors anywhere for pure water supply, and an equable, energizing climate with never an extreme of heat or cold, wind or rain, all of them suitable and appropriate for a world capital.

6. In this same Black Hills area are numerous spacious sites for establishment of a world city which will be an international area not blanketed by the proximity of any other large city and where the world may construct from the virgin, primitive conditions existing, its own city in its own time, in its own way, and with its own name. Ample transportation and communication opportunities of all kinds exist.

South Dakota has much of real worth and use to offer in the way of natural facilities for what will be one of the essential requirements of the world organization, a site for its headquarters and capital.

M. Q. SHARPE,
Governor.

Issues of the 1946 Congressional Campaign

EXTENSION OF REMARKS
OF
HON. HAROLD KNUTSON
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. KNUTSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by me before the Republican district convention at Lewistown, Mont., Monday, April 16, 1945:

Fellow Republicans, it is to me both a pleasure and an honor to appear before the delegates assembled here this afternoon to nominate a candidate for Congress to represent the Second District of Montana. What you do today will have a far-reaching influence upon the political trend of America. Indeed, you are firing what may be termed the opening gun of the 1946 congressional campaign, the outcome on which so much depends.

We may safely conclude that the 1946 campaign will be a prelude to a Republican victory in 1948, hence it is of the utmost importance that the Republicans in the Second District nominate a man who can and will win in June. Victory in the Second District will spur Republicans all over the land to greater efforts.

The issues are clear-cut. The New Deal must be uprooted and destroyed as something un-American, which is alien and repugnant to our philosophy of Government. It rests on class hatred, deficit spending, waste, and discrimination. The policy of scarcity which the New Deal has fostered since its inception has brought us to the brink of want and hunger, while their wasteful spending has brought us to the abyss of bankruptcy.

When the New Deal took over in 1933 the national debt was $22,000,000,000. Twelve years of New Deal misrule has increased that load to the staggering figure of almost three hundred billions, which is nearly the total wealth of America.

Not long ago Comptroller General Lindsay Warren told the Congress that the war is costing us 25 percent more than it should because of waste and squandering. When we consider we are spending more than all the other belligerent countries combined, that statement is not surprising, but it should arouse us to the urgent need for a change. We must have a change.

Huge New Deal spendings have necessitated the passage of 14 tax laws in 12 years, despite increased revenues, and each one greatly increased the tax burden of our people. The tax rates on both individuals and corporations are now so high as to discourage business expansion or the creation of the new industries so necessary to provide jobs for our returning veterans, and those engaged in war work. With present tax levels it is impossible for a young man or woman to start in business for themselves unless amply financed, and that road leads to serfdom.

To again open the door of opportunity to the youth of America shall and must be one of our earliest objectives, once the war is over.

On several occasions the late President Roosevelt referred to America as the arsenal of democracy. Indeed, it has been that and more in both World Wars. What made us the arsenal of democracy? It was the industrial plants, big and small, that are scattered over the length and breadth of the land. May I remind you that all these factories were made possible by the wise policy of protection, fostered and promoted by the Republican Party since the days of the immortal Lincoln. So I am not making an overstatement when I say it was the Republican policy of protection that on two historic emergencies saved the world from dictatorship and totalitarianism. More than that, the Republican policy of protection made us the greatest and most prosperous nation on earth. Protection made the full dinner pail a reality instead of a dream.

We recall how, following World War No. 1, imports from abroad, encouraged by the Underwood Free Trade Act, became so great and menacing it was necessary for the Congress to enact the so-called Emergency Tariff Act, which restored the American market to the American producer. History has a way of repeating itself.

Under the New Deal, tariff rates on nearly 1,200 items have been lowered by as much as 50 percent. Now, the administration is asking the Congress for authority to make an additional reduction of 50 percent on rates in effect January 1 last. That would mean a total reduction of 75 percent on many of the items referred to, most of which are agricultural. Do you want that?

To comply would in effect place the country on a free-trade basis, close the workshops of America, and pauperize our agriculture.

You gentlemen live in a great agricultural and mineral State. What would happen to your ranchers and farmers were beef, mutton, wool, and grains from all over the world allowed to take over the great American market, which is the only cash market in all the world? I need not tell you. However, I cannot forego reminding you sheepmen that we now have a 4 years' surplus of wool on hand which must be protected against ruinous competition from abroad if you are to stay in business. The same holds true with the grain raisers, and in a lesser degree with you cattlemen.

New Dealers would have us believe that tariffs breed wars and depressions. Let them tell that to the Hottentots, but not to intelligent Americans. We have learned, to our sorrow, that free trade can be as ruinous as war.

Now we know that the depression of the thirties was not due to the Hawley-Smoot tariff but rather was a direct result of the war the Democrats promised to keep us out of back in 1916. We also know that the depression came first to free-trade England, and later became world wide.

We believe in being good neighbors, but we do not believe in friendships that we have to buy at the expense of our own people. Such friendships are built on shifting sands and endure only so long as they are profitable to the other countries.

We are for world collaboration to maintain future peace. However, such cooperation should not be one-sided. Neither should it obligate us to rehabilitate and police the world once the war is over. As a corollary to collaboration we favor maintaining an Army, Navy, and Air Force that will give us complete security at home and earn for us the respect and consideration of all foreign nations.

When the treaty of peace is written it must not be said that we spent nearly three hundred billions, and sustained one million and more casualties merely to substitute Stalin for Hitler. We are not fighting against individuals so much as we are fighting against alien and repugnant idealogies.

All foreign commitments should be open and aboveboard. There should be no secret agreements secretly arrived at. Such commitments should be aboveboard and be based upon our national needs and security.

The American people, as a whole, condemn and repudiate the secret agreement made at Yalta, which would give to Great Britain six votes, Russia three, and to the United States only one vote in the Council that it is proposed to create for world supervision after the war.

America has contributed more matériel to the fighting of this war than all the other allied countries combined, in addition to arming twelve and one-half million men, and our men are fighting on all fronts. As a sovereign nation of one-hundred-and-thirty-odd million souls that has contributed so vitally to the war effort we are entitled to just as much voice and representation in any councils that may be set up as are any of our cobelligerents, and equal representation should be made a prerequisite to American participation.

In order that we may give to the world maximum help after the war it is necessary that we keep America free, strong, and prosperous. Unfortunately, in late years many of our American people have chosen to ignore the fundamental fact that all wealth comes from creative toil, and that there is no short cut to prosperity.

The system of Federal grants inaugurated by the New Deal has seriously undermined the morale of the American people in that it has encouraged them to look to Washington to do for them the things that they should do for themselves. This great and glorious country was not builded and made great by subsidies and grants, but rather through courage, self-reliance, and a sublime faith in the future of our common country. The builders of the great West did not sit around and wait for things to happen. They went out and created their opportunities.

Away with needless and wasteful bureaus that hamper business, stifle initiative, and rob us of our freedom. The Republican Party is pledged and dedicated to the repeal of all dictatorial laws and the abrogation of all

Presidential decrees and directives. Our aim is to restore fundamental and constitutional Americanism, law, order, full employment, and personal opportunity. We would also make every act of the Federal Government subject to judicial review.

Let me give you a short outline of what the Republican Party stands for:

1. An early peace with complete victory for the Allied Forces.

2. Fullest possible cooperation with our cobelligerents to preserve the future peace of the world, but no surrender of any part of the sovereignty which makes us a free and independent nation.

3. The maintenance of an Army, Navy, and Air Force strong enough to protect us against possible future aggression, and make the Stars and Stripes honored and respected throughout the world.

4. The retention of such Pacific islands as are necessary to our future national security.

5. Providing returned veteans with the same oppotunities that their fathers had.

6. The early revision of Federal taxes downwad, through the elimination of all wasteful and needless spending, and the abolition of all needless bureaus.

7. Encouraging expansion of present industries and creation of new ones to provide work for all at good pay.

8. A protective tariff that will be based on American cost of production. Without such protection the American farmer and laboring man cannot compete with the pauper labor of Europe and Asia for the home market which rightfully belongs to him.

9. Maintaining American standard of living and we pledge ourselves to the enactment of all legislation necessary to that end.

10. Sound money, the value of which will be permanent, and recognized and honored throughout the world.

11. A system of reciprocal trade relations that shall be confined to those crops, commodities, and articles of which we have an exportable surplus; and such crops, commodities, and articles which we need but cannot, or do not, ourselves produce. This has been a cardinal principle of the Republican Party since the days of McKinley and Blaine.

With such a platform the Republicans of America may face the future with confidence and assurance.

We will discard all false isms which seek to destroy those sound and immutable principles which have made America great, strong, and prosperous; there is no substitute for sound and tested principles of Americanism. There can be none.

The Republican Party is not unmindful of the fact that we are but custodians of a precious heritage, handed down from the glorious past, that must in turn be handed on to future generations virile and unchanged. We will continue in the future as in the past, the party of true Americanism, ever dedicated to the best interests of our glorious land and its great people.

McGregor Urges Repeal of Unfair Use Tax on Vehicles

EXTENSION OF REMARKS

OF

HON. J. HARRY McGREGOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McGREGOR. Mr. Speaker, on March 21, 1945, I introduced H. R. 2707, a bill to terminate the use tax on motor vehicles and boats. This bill was referred to the Ways and Means Committee, and I am asking that the membership of the House aid me in carefully analyzing this legislation and assisting me in having this discriminatory tax removed from our statute books.

Following is a letter I have sent to the Honorable ROBERT L. DOUGHTON, chairman of the Ways and Means Committee, under date of April 20:

On March 21 I introduced H. R. 2707, which reads as follows:

"To terminate the use tax on motor vehicles and boats. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that section 3540 of the Internal Revenue Code (relating to the tax on the use of motor vehicles and boats) is amended by inserting at the end thereof a new subsection reading as follows:

"'(k) Termination of tax: The tax imposed by this section shall not apply with respect to any period after June 30, 1945.'"

I would respectfully ask that you advise me the earliest possible date on which this bill can be given consideration by your committee.

Under the present law a $5 Federal use tax is imposed on all motor vehicles. I am of the opinion, Mr. Chairman, that this is unfair and discriminatory. The use tax is not based upon a value of the motor vehicle or the number of miles traveled by that vehicle. For example, Mr. A may own an automobile worth $3,000 which has traveled 30,000 miles per year, and Mr. B may own an automobile worth $100 which travels 1,000 miles per year—yet both are forced to pay the same tax, namely, $5.

The records prove, Mr. Chairman, this law has never been enforced and I think you will find upon careful study that only approximately 65 to 75 percent pay this tax. I am of the opinion if we are going to have the tax, let us see that it is enforced and all pay it, or do away with the tax entirely.

A few days ago there appeared in two of the major newspapers of my District, editorials as follows:

From the Mount Vernon News (Republican), Mount Vernon, Ohio: "Representative J. HARRY MCGREGOR, of the Seventeenth Ohio District, of which Knox County is a part, has introduced in the House of Representatives a bill to repeal the auto use tax. A similar bill has been introduced in the Senate. Action by Congress should be favorable. There never has been any good reason why this tax should be maintained, and there is less now than when it was levied. It is not strictly enforced. Consequently some motorists buy their stamps annually and duly display them on the windshields of their cars, and some do not. Those who do not drive just as freely as those who have paid their tax, apparently without fear of detection and punishment. As far as that is concerned, it is preposterous to require a motorist to pay a use tax for the privilege of driving his car after he has paid the innumerable levies which are necessary before he can run it out of the garage."

From the Mansfield News-Journal (Democrat), Mansfield, Ohio: "Slow recognition of the unfairness of that Federal $5 automobile use tax is gradually developing in Congress, it appears, as three bills to abolish this tax have been introduced, including one by Congressman J. HARRY MCGREGOR, of this District. This tax is easily and widely evaded and doubt has been expressed by Secretary Morgenthau as to whether receipts from it are worth the cost of collection. Then, too, gasoline and tire shortages make such a tax obviously unfair, as an A card holder is required to pay the same tax as B and C card holders. And, frankly, many motorists—possibly a majority—feel no obligation to pay this tax, and, so far as can be learned, no effort to collect it has ever been made in this vicinity."

I believe these two editorials accurately and adequately give the opinions of the majority of the people of this Nation. Trusting that you will be able to see your way clear to give consideration to this legislation at the earliest possible date,

I am,

Respectfully yours,

J. HARRY MCGREGOR,
Member of Congress.

Peace—Have We Lost It Already?

EXTENSION OF REMARKS

OF

HON. LAWRENCE H. SMITH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. SMITH of Wisconsin. Mr. Speaker, on the eve of that important conference which is about to convene in San Francisco it is important to review briefly what has happened since the Yalta Conference. We ought not bury our heads in the sand merely for the sake of appeasement. Facts must be found and tough decisions made if we are to make any real effort to establish a just and lasting peace. A lasting peace, based on justice can only be attained in an atmosphere of frankness and honest dealing.

A pertinent article recently appeared in the March 10 issue of the Tablet, a Catholic weekly, published at Brooklyn, N. Y. Mr. Speaker, I insert that article as a part of my remarks:

SHALL WE LOSE THE PEACE?

Successful armed warfare is slowly being supplanted by struggling diplomacy.

On two fronts the United States policy is being revealed.

In the Pacific, in the Philippines area, our policy is consistent, logical, straightforward, honest, and idealistic. The partnership we are exercising with the Filipinos is enlightened, open, and not imperialistic. The Philippines are really being liberated and the populace is not being encouraged to war of one against the other. We make no distinction; liberation was our goal and the Philippines will enjoy freedom. Rightists and leftists underground forces and those who have remained passive, all stand as one despite 3 years of occupation by the enemy.

In the European area the policy is different. Here, it would appear, we have jumped head first into the mire of power politics, imperialism, cynicism, secrecy, inconsistency and a lack of ideals. Enough has been learned of the Crimea Conference to make every peace lover wonder; what is to follow is even more a source of worry.

There were two issues—aside from the determination to defeat the common enemy, whose fate has already been sealed—upon which every American had his eyes at Yalta. They were: (1) the fate of Poland and the small nations and (2) the establishment of a general international organization to secure a permanent peace. What has been decided in these two fields?

1. (A) The war was commenced over the freedom of Poland. We entered, dedicated to the principles of the Atlantic Charter, and we loudly proclaimed the "four freedoms" to the entire world. However, nearly one-half of Poland has been seized and given to one nation, and this in violation of oft-repeated pledges.

Poland, contrary to promises and elementary fairness, was not represented at Yalta and her people were not consulted as was pledged, on their fate and one nation of the Big Three joined in voting herself aggrandizement.

Heroic Poland was not even treated as well as a criminal, for the worst lawbreaker is given a trial, a hearing, an opportunity to state or defend a case.

True, Poland is offered a large part of Germany, a deal which the London Universe describes as follows:

"The Poles will be expected to incur the odium of stealing as much of other peoples' property as they can lay their hands on."

The Universe headline is: "Unconditional Surrender in the Crimea."

The hideous nature of the betrayal was revealed on Wednesday when Foreign Secretary Anthony Eden in the House of Commons said he had asked that the Poles who had defended their country be not persecuted by Russia and her puppet Lublin regime. This comes after Prime Minister Churchill is reported to have said the returning Polish soldiers would be subjected to "witch-hunting" and he offered British citizenship to those now fighting for the Allies outside of Poland, believing, no doubt, they would be sent to Siberia like many of their compatriots if they returned to their native land. And this in the name of democracy and at the hands of "liberators"!

(B) Lithuania, Latvia, Estonia, the small Baltic nations, have been given the brutal German U-boat formula of the last war, Spurlos Versenkt, "sunk without trace."

These three states are not historically, culturally, enthnographically or morally an integral part of Russia, yet they have been seized by the Soviet, and apparently without protest.

Both Messrs. Churchill and Roosevelt in their addresses ignored them as though they never existed, and this notwithstanding that the Soviet on its own initiative, and voluntarily, recognized all three in 1920 and up until 1944 had treaties of non-aggression and neutrality with each. As late as October 31, 1939, Foreign Commissar Molotov, of Russia, said:

"We stand for the scrupulous and punctilious observance of pacts on the basis of complete reciprocity and we declare that all nonsense about Sovietizing the Baltic countries is only to the interest of our common enemies and of all anti-Soviet provocateurs."

What was nonsense in 1939 has become a tragic reality. And England and the United States apparently have consented to what Sumner Welles, when Under Secretary of State, called "predatory activities" carried on "by the use of force" and which he denounced on behalf of the United States Government as intervention "in the domestic concerns of any sovereign state, however weak".

Alas, the first of Pope Pius XII's principles of peace has been violated, namely, "the will of one nation to live must never mean the sentence of death passed upon another."

The conscience of Winston Churchill was stirred fiercely in 1938 when he condemned Neville Chamberlain for the agreement at Munich. Said Mr. Churchill:

"All is over. Silent, mournful, abandoned, broken, Czechoslovakia recedes into darkness. She has suffered in every respect by her association with the western democracies."

For Czechoslovakia, substitute Poland, Lithuania, Latvia and Estonia; for Munich, substitute Yalta; for Chamberlain, substitute Churchill; for Hitler, substitute Stalin.

2. The new security organization starts off with the bitterness of the small nations and the fixed impression in the minds of many people that the seeds of future war have been planted in the fields of broken pledges and injustice.

What is more, the demand of Russia that millions of Germans, irrespective of war guilt, be sent to the Soviet as slave labor is bound to thwart future world peace and prosperity and to build enmity on injustice and cruelty.

The acceptance by other Allied Nations of this Asiatic viewpoint calls to mind that for 1,900 years nations and men have sought to keep Asiatic ideology and movements out of Europe and now, it is freely said, a few individuals have in a round table discussion thrown open the doors to influences which must create apprehension all over the world.

In published information on the future security association is the decision that any of the big five nations can veto action against itself thus the principal guaranty seems impotent. If the new organization had been in existence in 1930 neither Japan's seizure of Manchuria, nor Italy's seizure of Ethiopia, the German and Russian attack on Poland, nor the Soviet invasion of Finland could have been prevented for in each instance it was a "great" power which was guilty of aggression. Regretfully, too, many see no word of agreement on disarmament, indicating the emptiness of the propaganda that none of the United Nations could be an aggressor. Meanwhile peacetime compulsory training is advocated to protect us against a defeated and dismembered Germany and Japan.

On April 25, 1945, over 40 of the nations will assemble at San Francisco in the city named after the gentle, kindly, peaceful St. Francis.

Poland, the worst victim of the war, has not received an invitation because she has not yet expressed a desire to participate in the robbery of her country—and peace-loving and peace-experienced nations like Switzerland, Sweden. Portugal, Eire, etc., have not been invited.

What influence the ordinary people of the war—those who fight and die—will have at San Francisco we cannot say.

This, however, can be asserted. There is no reason why Americans cannot agitate at San Francisco for the fulfillment of the Atlantic charter and the "four freedoms" under which banner we marched to conflict and to ask that these ideals be invoked all over the world.

This can be done by organizations and individuals writing to the American delegates who will attend the conference asking them to sponsor principles which will lead to a just and lasting peace.

Let God Almighty whose name was barred at Yalta be invoked to guide humanity. Let democracy and open covenants rule. Throughout the land we can re-echo the cry we have heard so frequently—although not lately—that law must supplant force; that state tyranny, regimentation, seizure of small nations, enslavement of peoples, secret agreements without consulting the people affected are all part of the Nazi and Fascist ideology which our wealth and blood have been pledged to blot off the face of the earth.

Yes, we have sacrificed flesh and sweat, let us not sacrifice principle.

Faith must replace force; law, not the gun, must reign; freedom, not enslavement; liberty, not tyranny; man, not the state; God, not Belial, must rule.

We have won the war; let us not lose the peace.

Veterans' Hospital at Jefferson Barracks, Mo.

EXTENSION OF REMARKS

OF

HON. A. S. J. CARNAHAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CARNAHAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter:

VAN BUREN, MO., *April 16, 1945.*

Hon. A. S. J. CARNAHAN,

Washington, D. C.

MY DEAR SIR: I hear you are on the committee investigating veterans' hospitals. I can only speak for one, that is Jefferson Barracks, Mo. I have two boys honorably discharged from the Army. They were both at home last December. One was suddenly stricken and his brother said, "We have a good hospital and I will have him in there in a few hours."

He went to Van Burean and he and Brownie called the hospital and he was told to bring him on. Driving conditions were bad and they did not arrive until 2 o'clock a. m., but in a few hours they had operated on him and he did splendidly. His wife and the brother cannot find words to give the praise the hospital deserves. His wife was allowed to be with him all through the day and the brother could see him at night.

I wrote to General Hines telling him of the excellent treatment my boy had at Jefferson Barracks and had a personal letter of thanks from him.

I have told you in my own simple way of the treatment and courtesies shown my own boy.

Yours truly,

W. C. SAMPLES.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. ANDREW J. MAY

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MAY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Floyd County (Ky.) Times:

AND ON THE OTHER SIDE

Last Thursday, as American soldiers crossed the last river barrier before Berlin, Franklin D. Roosevelt slipped silently out and across his last river.

Since that time, the great of the world, its newspapers, statesmen, rulers and military leaders, have joined in paying eloquent tribute to this great voyageur. So well have they spoken and written of the late President's major aims and achievements that comment by this newspaper, a week later, would be the retelling of an oft-told tale.

Permit us, then, to write of the comparatively little things in Franklin Roosevelt's life, the things which made him so beloved of all the little people of the earth.

To us, the outstanding achievement in the life of that other war-martyred President, the immortal Lincoln, was not his freeing of the slaves, noble as it was. What stands out in the Great Emancipator's career in our mind is the cumulative effect of all the little homely traits, all the tenderness and humanities that made him noble. His poignant letter to the widow Bixby, the solemn measure of his Gettysburg address, his mercy to soldiers condemned to die, his never-failing sense of humor, his unostentatiousness—these are among the things which add up to the Lincoln the people still love.

And so it is with Franklin Roosevelt.

We do not have to go to Teheran or to Yalta to see the great-souled man that left the world bereft only a few days ago. A trip down to Warm Springs, Ga., to the crippled children there whom he cheered with his gaiety, to whom he gave a new lease on life through his own courage and joyous heart in the face of the same disease which blighted

their young lives—there is found one bright facet of the many-sided Roosevelt personality.

Listen to a youngster there choke out his grief as the President's body left Warm Springs; hear the old Negro accordion player squeeze out the loved hymns the President had often had him play.

You do not have to read the Atlantic Charter to find the true Franklin Roosevelt.

Men, far back up the hollows, men deep in the slums muttered. Hope was gone. A Negro child cried for food. An immigrant woman complained that she could not buy medicine for her sick baby. Franklin Roosevelt heard them with ears attuned to the breathing of men and things down to earth.

"I can't get help here—I'll write the President," men threatened. And they did write. And the President answered. And things were done for such men.

Always the friendly heart, the loving spirit in these two martyred Presidents who, some day, will share history's brightest pages together. A story in homely humor by the one to shake from his shoulders the cloak of melancholy, a flash of wit from the other to shed his mounting load of care—both contributing to the world's laughter.

So very human—that is why humankind loved them.

It would be no small measure of consolation if those who cherish the memories of these two of this Nation's greatest could believe that Abraham Lincoln was waiting with outstretched hand on the other side of that last river—waiting for that kindred spirit, Franklin Roosevelt.

Addresses of President Sergio Osmeña

EXTENSION OF REMARKS

OF

HON. C. JASPER BELL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, April 20, 1945

Mr. BELL. Mr. Speaker, I take pleasure in inserting into the RECORD at this time two speeches delivered in Manila by President Sergio Osmeña of the Commonwealth of the Philippines.

These are great speeches. Every American should read them not only because President Osmeña in words of stirring eloquence has voiced the hopes and patriotic sentiments of the Filipino people but because both of these great utterances are moved by a spirit of devotion and love of liberty which is dear to the heart of every true American.

These speeches for generations to come will be read and appreciated not only by millions of Filipino people who will thank him for his inspired leadership at this time but also by thoughtful Americans who will realize that he spoke as a chosen instrument for the purpose of keeping alive the fires of liberty in that far-off oriental country.

I commend both of these speeches to your thoughtful reading:

ADDRESS DELIVERED BY PRESIDENT SERGIO OSMEÑA ON THE OCCASION OF THE REESTABLISHMENT OF THE COMMONWEALTH GOVERNMENT OF THE PHILIPPINES IN MANILA, FEBRUARY 27, 1945

My fellow countrymen, this is an historic event in an historic city. From the time our Malay ancestors founded it more than eight centuries ago, colonial powers have fought for its conquest and domination. The Spaniards, the Dutch, the English, a Chinese pirate, our revolutionary fathers, have all vied with each other and shed blood for its possession; because its conquest has always meant the ultimate control of the entire archipelago. But today's event is different from any of the previous conquests and victories. The present victory of American arms is not a victory for power, control or domination, but a victory for freedom, democracy and independence.

In sharing with you today the exultation over the triumph of American arms, let us bow our heads in reverent memory of our sacred dead and the dead of our Allies, whose lives are the forfeit that these, our liberties, might be restored. We mourn the destruction of our once beautiful capital city of Manila and the murder of thousands of innocent people by the Japanese vandals, but this latest dastardly act of a savage enemy which has aroused the conscience of an outraged world should steel us to the firm resolve to continue the fight with every ounce of our strength until he shall have been completely vanquished.

To President Roosevelt who, in our grim days in Corregidor and Bataan, solemnly pledged to us in the name of the American people, the men and resources of the United States for our liberation, this day must be also a day of happiness over a pledge fulfilled. We shall be forever grateful to him and to the American people.

To General MacArthur this campaign has been a crusade. Friend and defender of our race he never lost faith in the spiritual strength of our people. In this crusade he is finishing the noble work begun by his illustrious father, Gen. Arthur MacArthur, who, on August 13, 1898, successfully led another American army to free Manila from a European power. Gen. Douglas MacArthur will go down in history not only for his signal military successes but also for consistently following truly democratic methods in dealing with Philippine civil affairs in areas retaken from the enemy. Instead of taking advantage of military operations to maintain military government over territories already recaptured, he has been faithful in his role as liberator in the truest American tradition. Thus, 48 hours after the occupation of Tacloban by the American forces, he turned over the functions of government to our Commonwealth. And now, in this city of Manila, he is following the same procedure.

To all the gallant members of the United States forces I bespeak the immeasurable indebtedness, the highest admiration, and the eternal gratitude of our people for their victorious accomplishments. They have come as brothers in arms enlisted in and dedicated to the sacred cause of restoring our liberties.

The time has come when the world should know that when our forces surrendered in Bataan and Corregidor resistance to the enemy was taken up by the people itself—resistance which was inarticulate and disorganized at its inception but which grew from day to day and from island to island, until it broke out into an open warfare against the enemy.

The fight against the enemy was truly a people's war because it counted with the wholehearted support of the masses. From the humble peasant to the barrio school teacher, from the volunteer guard to the women's auxiliary service units, from the loyal local official to the barrio folk—each and every one of these contributed his share in the great crusade for liberation.

The guerrillas knew that without the support of the civilian population, they could not survive. Whole towns and villages dared enemy reprisal to oppose the hated invader openly or give assistance to the underground movement. It is thus that the Filipino people drew the ire of the Japanese who has never followed the rules of civilized warfare. And now his conduct toward the civilian population has become more cruel and brutal, embittered as he is by his failure to enlist the support of the people. For this reason, it is imperative that the war against him be prosecuted all over the country relentlessly and with dispatch in order that the people's agony may not be prolonged and precious human life may be salvaged.

As I take over the civil functions of the Commonwealth government in our country, I cannot but pause in all humility, for guidance and inspiration before the figures of Jose Rizal for his patriotism, Andres Bonifacio for his indomitable courage, Apolinario Mabini for his far-sighted statesmanship, and Manuel L. Quezon for his devotion to the cause of independence.

That no time may be lost in the complete restoration of the Commonwealth of the Philippines, the executive and judicial branches will be reestablished with utmost vigor and dispatch and I now call upon all the duly elected members of our congress who have remained steadfast in their allegiance to our government during the period of enemy occupation, to be in readiness to meet in Manila as soon as conditions permit for the reestablishment of the legislative branch.

I am fully cognizant that problems of great national significance must be faced immediately. The reestablishment of law and order in areas already liberated, the reopening of schools, the reorganization of the Government, both national and local, are among the complicated problems that have arisen as a consequence of enemy occupation. Foremost among these problems is that a relief and rehabilitation, the urgency of which cannot be overemphasized.

This war has not only caused untold misery and suffering to the individual; it has also brought about wanton destruction, economic dislocation and financial bankruptcy to the nation at large. Farms and industries have to be rehabilitated; banks and credit institutions have to be reopened; roads and bridges have to be repaired; schools and hospitals have to be rebuilt; destroyed and damaged properties, both public and private, have either to be rehabilitated or indemnified. The legitimate claim of the common laborer and of the small farmer who has lost his only work animal and nipa hut must be given preferential attention.

So that these manifold problems may be faced with promptness and energy I shall enlist the assistance of all those possessing not only proven ability and loyalty but also the confidence and trust of the people. In Leyte, as a recognition of the guerrillas who so valiantly fought the Japanese, I appointed Col. Ruperto Kangleon as the Acting Governor of that Province. Today I have the pleasure to announce that, as a tribute to the civilian elements of our country who resisted the enemy with courage and fortitude, I have chosen Gov. Tomas Confesor as the ranking member of my cabinet, appointing him Secretary of the Interior, and in charge of the reorganization of the city of Manila.

Our independence is a settled question. Our five decades of consistent struggles, in peace and war, have come to a definite, successful end. Our Government, when in exile, was considered as possessing the attributes of an independent Nation. We are one of the United Nations. We have President Roosevelt's word that when normal conditions have returned, law and order reestablished, and democratic processes restored, our request for the advancement of the date of independence will be granted. I hope this can be accomplished on August 13, 1945, the forty-seventh anniversary of the landing of the American forces in Manila. Thus Occupation Day will become Philippine Independence Day.

The gravity of our new problems demands the collective effort of all the people. The

Government cannot undertake to solve them alone. It needs the support of the people—a united people. More than ever before, now that the rapid advance of our forces is widening its field of action, the Government needs a united popular support to enable it to undertake successfully its tremendous tasks. Not by dissension and bickerings, not by resort to violence and lawlessness can we serve the national interest. It would be tragic indeed if at this last state of our crucial struggle for nationhood, we should fall apart and be divided against ourselves. We have had enough misfortunes and sufferings in this war; we cannot bear any more. To plunge ourselves into the abyss of disunion would be suicidal.

As the head of your duly constituted Government, I therefore appeal to you, my people, to remain united. I urge you to forget petty political differences, to bury the hatreds and animosities engendered by the struggle, to obey the rule of law, justice, and reason, and to remember that we all belong to one common country, our beloved Philippines. United we will continue assisting effectively in the successful prosecution of the war and in the rehabilitation of our country. United we can speedily achieve the full restoration of the constitutional processes of our Government, disrupted by the enemy. United and in close cooperation with the United States, we can win for ourselves and our children all the blessings of democracy, freedom, and security for which we have sacrificed so much in this titanic struggle against the brutal forces of tyranny and oppression.

ADDRESS OF PRESIDENT SERGIO OSMEÑA ON THE OCCASION OF THE INDUCTION INTO OFFICE OF THE MEMBERS OF HIS NEW CABINET AT MALACAÑAN, MARCH 8, 1945

My fellow countrymen, today I have inducted into office the members of my new cabinet. I wish to take advantage of this occasion when the heads of our various executive departments are installed in their posts to summarize in rough outline the developments of the war during the last 3 years as they affected the functioning of our Commonwealth Government and the carrying out of the independence program as agreed upon between the United States and the Philippines. I wish also to lay down the basic principles that will guide us as we reestablish the Commonwealth Government in our capital city.

I would like my coworkers in the government to always bear in mind two cardinal thoughts: First, That there should always be a close relationship between the people and their government, and to achieve this the government must take the people into its confidence. Second, that our government, as it is today, is the product of Philippine-American collaboration and that every effort should be exerted to maintain and foster closer relationship between the two peoples.

The Japanese occupation of the Philippines was not only a military invasion; it was also an ideological and cultural invasion. It was an attempt to foist on our people the invader's totalitarian ideas, his spirit of conquest and exploitation, his theories of the superiority of the Yamato race, his way of life.

The Filipinos soon found this out, and closing their ears to the alluring promises of the enemy, put up a brave and determined opposition. They continued the struggle even after organized military resistance, so gallantly maintained by American and Filipino soldiers, had to cease before the overwhelming numerical superiority of the enemy.

Now that the veil of secrecy imposed by military necessity surrounding the Philippines has been lifted, the outside world has obtained glimpses of the brave and heroic deeds of our guerrillas, the intrepid exponents of popular resistance. All honor to these soldiers of liberty who brilliantly continued the epic fight of the heroes of Bataan. It would be an error, however, to believe that the struggle was limited to the sphere of action of the guerrillas. The fountain springs were wider and deeper—they were in the very soul of the people itself. Coming from the ranks of the people, the guerrillas were in reality the people's army. For this reason, the enemy, inherently despotic and cruel, laid violent hands on the people. But in spite of his repressive measures, resistance persisted all over the country—on the plains as in the mountains, in the population centers as in the remote barrios, in the northernmost islands, in the southernmost tip of the country. It was the common will of the people; it was the entire nation, resolved to oppose at any cost, domination by the invader.

Throughout 3 long years of misery and suffering, of persecution and sacrifices, the Filipino people remained faithful to their ideals. The military control by the enemy in certain areas, especially near the coasts, did not for a moment break the absolute and complete moral resistance of the people through the length and breadth of the land.

To represent this will of the people and to act on their behalf abroad, and especially in the United States, the highest officials of your constitutional Government accepted the invitation of the President of the United States to evacuate Corregidor, transferring the seat of government to Washington. This step was authorized by an act of the national assembly. The Commonwealth officials realized that so long as we maintained the nucleus of the Commonwealth government abroad through its head, the President, and his cabinet, and by means of the emergency powers given him by the national assembly, our legal status under international law would not be changed, even if the enemy were able militarily to occupy all of the Philippine Territory. It is well known that mere military occupation of a Territory does not confer sovereign rights on the invading army. Thus, despite the Japanese invasion, our constitutional government was not only saved from destruction, but continued to function in Washington. It was officially recognized by the United States and the other 42 countries constituting the important international group known as the United Nations.

Working closely with the Government of the United States, your government, during its stay in that country, set before itself the following objectives:

1. To maintain the interest of the American people in the redemption of the Philippines as a sacred obligation which had been assumed by the United States:

2. To speed up the preparation of the necessary men, matériel, and plans for the reconquest of the Philippines;

3. To accelerate the advent of our independence;

4. To obtain adequate guaranties of the permanence of our political independence;

5. To work for our economic rehabilitation and stability as the material foundation of our independent structure.

All these objectives have been substantially achieved.

The successful landing of the liberating forces under the command of General MacArthur in Leyte, Mindoro, Lingayen, Zambales, Batangas, Bataan, and Corregidor, followed by the complete occupation of the city of Manila, represents a partial but eloquent reply to our appeals to the United States for aid in our redemption. The might of America which has destroyed in a few weeks all the power built up by Japan in years will continue to be employed until every vestige of the invasion has disappeared from our soil.

We were on the road to independence in accordance with the program agreed upon between the United States and the Philippines when Japan treacherously attacked us, bent on taking away that freedom from us. The leaders of your government have taken the necessary steps in the United States so that the realization of this independence program would not be delayed in spite of the war. Not only is the speedy realization of this program already assured, but we have obtained a new and important concession from the United States: the formal pledge that our independence will be guaranteed.

Having been a member during the last 20 years of various Philippine missions sent to the United States, I may say that during our negotiations for independence with the leaders of the two principal parties in the United States, we had never before found any interest among them in the protection of our independence, once granted. The best that we heard from our sympathizers was that since we wanted to be independent, and since independence had been promised, it would be given to us; but once given, our political connection with the United States would be definitely terminated. This aroused in the minds of many of us serious concern as to the future of our independent Philippines. Living in the Orient, surrounded by countries with enormous populations, some of them possessing the spirit of aggression and conquest, never in the past had we discovered a completely satisfactory answer to the question frequently addressed to us as to how we could assure the inviolability of our territory against aggression from a first-class power. It will be recalled in this connection that after our revolutions of 1896 and 1898, when our people succeeded in establishing a republican government in Malolos, the leading officials of that government opened negotiations with the United States for the independence of the Philippines under American protection. The proposal failed of acceptance. It will also be recalled that throughout the long period of our peaceful campaign for independence, all of our political parties always had in their platforms planks expressive of the desire of our people to obtain guaranties of our independence, after its concession by the sovereign power. In these platforms, especially in that of the Nationalist Party, the idea of the neutralization of the Philippines was repeatedly included.

On December 28, 1941, President Roosevelt promised that our independence would be established and protected. This was the first time that a high American official came out with the promise of protection after independence. This promise which gave great encouragement to our soldiers in Bataan, then fighting side by side with the Americans, was an important factor in our decision to transfer the seat of government to the United States to continue there the campaign for independence which seemed to be on the verge of defeat in the Philippines despite the loyalty and heroism of our people. With our reverses on the battlefield, the next phase would have to be fought in the field of diplomacy. If the leaders of the Commonwealth government had committed the grave error of placing themselves within the power of the enemy, not only would every semblance of constitutional government have disappeared, but such a step would have given rise in the United States to the belief that our people had renounced their long-desired independence, the real independence pledged by America, and had resigned themselves to the status of a mere vassal of the Japanese Empire.

I take great satisfaction in informing our people that the promise of independence with American protection made by President Roosevelt on December 28, 1941, which was reiterated by him on August 13, 1943, was given legislative sanction when Congress approved Senate Joint Resolution 93 and which became law on June 29, 1944. This joint resolution was introduced in the Congress of

the United States at our request. We gave it our firm support while it was under consideration by both Houses of Congress and it was finally approved without any party division. In fact, the vote in both Chambers was unanimous.

Thus, the protracted negotiations for our independence which were initiated by the first parliamentary mission to the United States in 1922 under the chairmanship of Manuel L. Quezon, at that time President of the Senate, were happily concluded under the authority of the government of the Commonwealth which functioned in Washington, D. C., from May 13, 1942, to October 3, 1944. The independence of which Rizal and all the other martyrs in our history dreamed, and for the realization of which the heroes of our revolutions gave their lives, will not only be a reality but there is now positive assurance that the blessings of liberty which that independence will bring shall be permanent and enduring.

Foreseeing the serious problems brought about by the ravages of war and the imperative need for the rehabilitation and reconstruction of the country, your Commonwealth government urged the passage of the necessary legislation by the Congress of the United States. Such legislation was approved on June 29, 1944, and under its provisions a Filipino Rehabilitation Commission has been created, composed of nine Americans and nine Filipinos. It is now sitting in Washington and is investigating all the war damages and other rehabilitation needs for proper action, and is formulating plans for our future economic relations with the United States.

Among its most urgent tasks, which likewise is an inescapable duty of the Commonwealth government as a whole, is that of giving the utmost possible aid to the war victims in our country—the war veterans, especially those disabled or crippled; to the widows and orphans who have lost their loved ones in this holocaust of war and misery; to the lonely fathers and mothers who have sacrificed their beloved sons on the altar of freedom and democracy; to the peasant family who has lost its work animals and seen its productive fields devastated by the enemy; to the artisans and the factory workers who are now jobless and in want; to the homeless city dwellers, fire victims who now live in shambles and in crowded rooms unfit for human habitation; to the survivors of the wholesale massacres in Manila and other places in the Philippines.

In the realization of the ideal of independence guaranteed by the United States, the roots of which may be traced back to the glorious days of the Philippine Revolution, the attitude of the Filipinos in Bataan and throughout the whole country has been a vital factor. This is so because it has inaugurated a new era in Filipino-American relationship. It has sealed forever the ties of friendship and understanding binding the two peoples. In the American people it has created a permanent interest in our welfare, our freedom, and our security. Into our people it has infused a new spirit of high responsibility and it has strengthened the friendship and goodwill towards the United States. To the other democracies of the world this attitude has brought the conviction that the Filipino people have already come of age and as a result, these nations, anticipating the date of our independence, have treated the Philippines as an independent nation so that throughout our stay in Washington our representatives met the representatives of these nations on a basis of complete equality.

It is for this reason that in the first words I uttered upon my stepping on Philippine soil in Leyte in October 1944, I affirmed that we came not only to restore the functions of the government of the commonwealth which existed at the time of the Japanese attack on December 8, 1941, but to reestablish the Commonwealth government in a more advanced and progressive form. With this advanced status, we will enjoy new powers which we propose to exercise with care and with the welfare of our people as our sole guide. Obviously, this new situation imposes likewise wider responsibilities which we should shoulder without vacillation.

At this moment when we reestablish our government in the capital city of the Philippines, it is fitting that we make known the ideals and principles which will guide our actions.

We hereby reaffirm our faith in and adherence to the principles of freedom and democracy—a faith and an adherence born in the early days of our Malay history, nurtured by 400 years of western contact, consecrated by our revolutionary fathers, invigorated by the teachings of America, ratified in the constitutional processes of our commonwealth, and now sanctified by the blood of the thousands of Filipino martyrs and heroes of the present war.

We condemn the totalitarian ideology which the enemy has sought to impose on us under a government by self-constituted or God-chosen rulers, and we hereby reaffirm our devotion to the principle of popular sovereignty, of a government of the people, for the people, and by the people.

We believe in the superiority of a responsible democracy, peaceful and law-abiding, loyal to its institutions and determined to fight for its way of life over a degenerate fascism and totalitarianism with its regimented lives, devoid of wills of their own.

We shall reestablish in our country a social and political system which is founded on mutual faith, honesty, and confidence and not on suspicion, corruption, and fear, and in which government officials and employees are not the masters of the people but their servants, acting as necessary instrumentalities through which the public good and the individual welfare may be advanced and safeguarded.

We denounce the barbarous doctrine of collective responsibility for individual acts under which thousands of innocent men and women have met their death.

We stand for the individual liberties, guaranteed by our Constitution, for the right of every man and woman to enjoy life, liberty, and the pursuit of happiness.

We reject the theory of the existence of chosen or superior races; we hold to the self-evident truth that no particular race has a monopoly on the capacity for progress and self-government.

We believe in the universality of culture, and we shall seek the implements of progress in whatever source they may be found.

We reaffirm our faith in the principle of Philippine-American collaboration, its workability having been successfully tested both in peace and in war. This principle has been responsible for the unparalleled progress of our country during the last 46 years. It is a guarantee for the permanence of Christian civilization in the Orient.

We reiterate our adherence to the Atlantic Charter signed by the United Nations, of which we are one, for in that document they expressed their desire to effect no territorial changes that do not accord with the freely expressed will of the people concerned, and "to respect the right of all peoples to chose the form of government under which they will live."

We believe in the efficacy of the principle of collective security as a guaranty of world peace and the best assurance of the settlement of international disputes not by the arbitrament of arms but by the processes of peace and justice. The legislation providing for the use, after the independence of the Philippines, by the United States of naval and air bases here for the mutual protection of the Philippines and the United States is a concrete example of the application of this principle. It is a mutual agreement designed not only for the protection of both nations but as a contribution to the peace of the Pacific region and the collective security of the nations of the world.

We stand for a new world free from want and fear, provided with greater safeguards for lasting peace and offering ample opportunities for friendly negotiations and judicial adjudication of international disputes and the self-development of nations. We are ready to take part, in close association with the United States, in any international pact based on justice and directed toward the organization and preservation of the peace of the world.

On these principles we take our stand.

By the miseries, the sufferings, and the sacrifices undergone by our people during their long night of captivity;

By the smoke that even now rises from our ravaged cities, towns, and villages;

By the blood, Filipino as well as American, which was poured out so unstintedly at Bataan and on Corregidor; in the hills of Leyte, the mountains and plains of Luzon, and all over the Philippines;

We call on the God of Nations to witness, for ourselves and for a people welded into one in the crucible of fire, this pledge to consecrate to the determined prosecution of this war until final victory is achieved, our lives, that which our fathers have bequeathed to us and without which life would be meaningless—our sacred honor.

Resolution Memorializing the President and Congress of the United States and the Federal Agencies Concerned To Amend S. F. A. W. Regulation 26 Effective April 1, 1945, To Eliminate Certain Restrictions Contained Therein With a View of Preventing Undue Hardship to the Consuming Public and Dealers in Solid Fuels in the State of Minnesota

---

EXTENSION OF REMARKS

OF

HON. JOSEPH P. O'HARA

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. O'HARA. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following concurrent resolution of the Senate and House of Representatives of the State of Minnesota, memorializing the President and Congress of the United States and the Federal agencies concerned to amend S. F. A. W. Regulation 26, effective April 1, 1945, to eliminate certain restrictions contained therein with a view of preventing undue hardship to the consuming public and dealers in solid fuel in the State of Minnesota.

Concurrent Resolution 13

A concurrent resolution memorializing the President and Congress of the United States and the Federal agencies concerned to amend S. F. A. W. Regulation 26, effective April 1, 1945, to eliminate certain restrictions contained therein with a view of preventing undue hardship to the consuming public and dealers in solid fuel in the State of Minnesota.

Whereas on the 14th day of March, 1945, Solids Fuels Administrator for War, Harold L.

Ickes, issued a directive effective April 1, 1945, providing among other things that consumers be allotted only 80 percent of their normal annual yearly requirements of scarcer solid fuel from April 1, 1945 to March 31, 1946; that the retail dealer cannot deliver to a consumer more than 50 percent of his annual yearly normal requirements of solid fuel before August 31, 1945; that solid fuel dealers shall be required by the regulation to verify consumers' normal annual requirements of solid fuel; and that retail solid fuel dealers are frozen to old contracts which they previously served and are not permitted to accept any new business with schools, municipal buildings, and government agencies, and

Whereas 80 percent of the consumers' normal annual requirements is not sufficient solid fuel to properly insure sufficient heat and to assure healthful conditions during the long winter months encountered in Minnesota particularly in view of the fact that firewood is not available in sufficient quantities which can be used for heating purposes due to the fact that pulpwood is selling at such a high price; that labor is not sufficiently interested under the present conditions in cutting firewood; and

Whereas because of the severity of the weather conditions in the State of Minnesota causing bad road conditions due to snow, storms, and blockades, which prohibit wintertime deliveries and because of the necessity of providing fuel to the farms, rural schools, industry and homes, a sufficient stock must be on hand at the docks to provide enough fuel to supply this area and therefore the restriction that the retail dealer cannot deliver to a consumer more than 50 percent of his annual yearly normal requirements of solid fuel before August 31, 1945, is not only impractical but is bound to cause severe hardship; and

Whereas the provision to verify consumers' normal annual requirements of solid fuel by the dealer will entail such tremendous amount of detail and office work that it will be practically impossible under the present wartime conditions to secure sufficient help to properly check and provide this information and will add to the already high cost and burden of handling distribution of solid fuel in Minnesota; and

Whereas the provision contained in S. F. A. W. Regulation 26 prohibits dealers from contracting to supply new patrons during the heating season from April 1, 1945, to March 31, 1946, is unconstitutional and by the provisions of the regulation creates an abnormal distribution of solid fuels in the State of Minnesota and places certain consumers in a position where they may not be able to obtain solid fuel without great inconvenience and unnecessary delay; and

Whereas the provisions contained in the regulation have been given serious study and consideration it appears obvious to those who are acquainted with the weather conditions in Minnesota, the manpower shortage, the lack of equipment, and other burdensome wartime delivery restrictions will make the regulation impossible of performance without creating great hardship and suffering on the part of the people. Compliance with S. F. A. W. Regulation 26 will create a shortage which will result in severe hardships on the consuming public and retail coal dealers creating a back-log of solid fuel orders during the winter months; and

Whereas Minnesota receives nearly all of its coal requirements via the Great Lakes; whereas it is necessary to obtain an adequate supply at the docks before navigation closes; whereas any deficiency in movement via the Great Lakes cannot be supplemented except via all-rail movement; whereas facilities for all-rail movement are already overburdened and cannot be relied upon to bring coal into Montant: Now, therefore, be it

Resolved, That a copy of this resolution be transmitted to the President of the United States, to the presiding officers of the Senate and House of Representatives of the Congress of the United States, to Harold L. Ickes, Solid Fuels Administrator for War, and to each Member of the Minnesota delegation in Congress, with the request that S. F. A. W. Regulation 26 be amended to permit sufficient coal to move via the Great Lakes docks during the navigation season and to eliminate the provision pertaining to 80 percent of the solid fuel allocated to the coal-consuming public, and by striking out dealers' verification of consumers' requirements, and to eliminate the restriction providing that only 50 percent of the consumers' normal annual requirements can be delivered before August 31, 1945, with a view of eliminating the plight of the solid fuel industry and the consequent impairment of the solid fuel supply for Minnesota.

LAWRENCE M. HALL,
Speaker of the House of Representatives.
C. ELMER JOHNSON,
President of the Senate.

Approved by the house of representatives, the 16th day of April 1945.

G. H. LEAHY,
Chief Clerk, House of Representatives.

Approved by the senate, the 17th day of April 1945.

H. Y. TORREY,
Secretary of the Senate.

Filed April 19, 1945.

MIKE HOLM,
Secretary of the State of Minnesota.

Resolution Memorializing the Congress of the United States To Enact Such Legislation as May Be Necessary To Provide for Additional Hospital Beds in the State of Minnesota for Disabled War Veterans

EXTENSION OF REMARKS
OF
HON. JOSEPH P. O'HARA
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. O'HARA. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following concurrent resolution of the Senate and House of Representatives of the State of Minnesota, memorializing the Congress of the United States to enact such legislation as may be necessary to provide for additional hospital beds in the State of Minnesota for disabled war veterans:

Resolution 10

Concurrent resolution memorializing the Congress of the United States to enact such legislation as may be necessary to provide for additional hospital beds in the State of Minnesota for disabled war veterans

Whereas there are at the present time approximately 2,400 beds in the State of Minnesota which are available for injured and disabled war veterans, and

Whereas this number is entirely inadequate and there is an acute shortage in this State of beds for this purpose, and

Whereas there is at the present time a waiting list of about 800 such veterans who are in need of hospitalization, and

Whereas the number of returning veterans who need hospital treatment is increasing daily and will greatly increase in the immediate future: Now, therefore, be it

Resolved by the Senate of the State of Minnesota, (the House of Representatives concurring), That the State memorialize the Congress of the United States to enact such legislation as may be necessary to provide in the immediate future for additional beds for disabled veterans in the State of Minnesota; be it further

Resolved, That the secretary of state of the State of Minnesota is instructed to transmit a copy of this resolution to the President of the Senate, the Speaker of the House of Representatives, and to each Member of Congress from the State of Minnesota.

C. ELMER JOHNSON,
President of the Senate.
LAWRENCE C. HALL,
Speaker of the House of Representatives.

Passed the senate the 23d day of March in the year of our Lord 1945.

HY TORREY,
Secretary of the Senate.

Passed the house of representatives the 7th day of April in the year of our Lord 1945.

G. H. LEAHY,
Chief Clerk, House of Representatives.

Approved, April 12, 1945.

EDWARD J. THYE,
Governor of the State of Minnesota.

Filed April 12, 1945.

MIKE HOLM,
Secretary of State.

"My Friend"

EXTENSION OF REMARKS
OF
HON. JOSEPH R. BRYSON
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. BRYSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following poem by George W. Ward, of Washington, D. C., formerly from Greenville, S. C.:

"MY FRIEND"

My Friend! yes he is with us yet,
Though we can't see him through eyes still wet.
His body is laid in Hyde Park sod,
But his soul is at home with God.

Yes, a world weeps for his passing;
But his spirit will e'er be lasting,
For his love was from top on down,
Loving the common man where e'er found.

Ah! My friend, words now immortalized,
By him who the world would so liberalized,
Lifting man to a higher plane,
And planning world peace e'er to remain.

Following Christ who came with a plan,
Saying, "Peace on Earth, good will to men".
Was the supreme hope of our President,
Who worked and worked with that intent.

He traveled far, he traveled near,
Willing to go most anywhere,
For the joy of peace and all its worth,
Planting fellowship throughout the earth.

Though maimed in body and denied of walk,
He inspired the world with fireside talk;
Speaking fatherly in family appeal,
Encouraging righteousness its power to weal.

Why this world citizen and fallen hero,
Was taken now we're at a loss to know.
But he'll live on and on in the hearts of men,
Inspiring them to an upward trend.

This handsome man of human touch supreme,
And filled with a humanitarian theme,
Has left a world much more inspired,
By a sacrificial life to be admired.

Loved and honored by those of foreign lands,
As well as by his own fellow countryman;
For he sought a universal brotherhood,
That nations be loved and understood.

Mourned by both friend foe,
For since he was called and had to go,
They now can better understand,
His aim was ever the uplift of man.

Crowds, crowds viewed the bier along the street,
Of him they so oft did victoriously greet,
Knowing as he traveled along the highway of life.
He rejoiced in aiding those burdened with strife.

Like Moses of whom in the Bible we are told,
He was denied reaching the cherished goal,
But was permitted sure victory to see,
Before being called by God with him to be.

So with eyes filled with sad tears,
We glance down through coming years;
Thanking God, Franklin D. did a pathway blaze,
That we will not enter peace talk in amaze.

Now from the quiet and stillness of the hour,
Though burdened with grief for our friend of power,
We must lift the saber left by his passing so,
And march on as he would have us go.

GEORGE W. WARD.

Franklin Delano Roosevelt

EXTENSION OF REMARKS
OF
HON. ED GOSSETT
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. GOSSETT. Mr. Speaker, the U. S. D. A. Club of Dallas, Tex., composed of the 800 employees of the United States Department of Agriculture, Dallas, at a meeting held on April 18, 1945, adopted a memorial on the death of our late President. The members of that organization are to be commended on this timely and appropriate resolution. Feeling that this resolution should be preserved I am herewith placing it in the CONGRESSIONAL RECORD:

IN MEMORIAL

Whereas it has pleased God in His infinite wisdom to remove from our midst the immortal spirit of our great President, Franklin Delano Roosevelt; and

Whereas he was greatly beloved for his humanitarian acts and his qualities of leadership in a troubled world; and

Whereas his espousal of the cause of the common man and his untiring fight in behalf of social, political, and economic justice rekindled the fires of brotherhood in America, and his great wisdom and his fearless action directed our way through darkest depression and bloodiest war; and

Whereas he relayed to us from the Divine the belief that universal peace is entirely possible and that a society of nations is the hope for such peace and boldly courted the friendship of all liberty-loving peoples everywhere to lay the foundations for such a society of nations; and

Whereas his name will be esteemed throughout all ages, world without end; and

Whereas we, the 800 members of the United States Department of Agriculture Club of Dallas, Tex., seek to make known our heartfelt grief and our sincere appreciation of what he has meant to humanity: Therefore be it

Resolved, That we do hereby recognize our great debt to Franklin Delano Roosevelt, thirty-second President of the United States of America—world citizen, leader immortal—and further, that we inscribe these things in our hearts, and these words in the minutes of our organization, and that we transmit a copy of this resolution to Mrs. Roosevelt; to the President, Harry S. Truman; to the Secretary of Agriculture, Claude R. Wickard; and to each member of the Texas delegation in the Congress.

Submitted by William F. Farrell, Chairman; E. Lee Ozbirn; W. E. Farwell; Meno Schoenbach; William R. Thompson; Latham White; E. B. Johnson; Tom W. Dawsey, Resolutions Committee, U. S. D. A. Club of Dallas, Texas.

Statement of the United States Maritime Commission

EXTENSION OF REMARKS
OF
HON. SCHUYLER OTIS BLAND
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. BLAND. Mr. Speaker, I ask unanimous consent to extend my remarks in the Appendix of the CONGRESSIONAL RECORD and to include therein a statement issued by the Maritime Commission in answer to, and comment on, an article which appeared in the Atlantic Weekly entitled "What Shall We Do With the Ships?" written by Mr. Lewis W. Douglas, former Deputy Administrator of the War Shipping Administration.

I desire particularly to refer to a very complete answer to Mr. Douglas' article which appeared in the Army and Navy Journal and was inserted in the RECORD by the gentleman from California, Hon. RICHARD J. WELCH, on April 19, 1945. This will be found in the Appendix of the RECORD at page 1826. The statement of the Maritime Commission follows:

Lewis W. Douglas, former Deputy Administrator of the War Shipping Administration, has published in the current issue of the magazine Atlantic Monthly an article entitled "What Shall We Do With the Ships?"

This article has been widely quoted and discussed in other magazines and newspapers. Because of Mr. Douglas' former connection with wartime shipping, most of the writers have naturally assumed that his figures are correct. However, Mr. Douglas' official duties had no direct connection with the specialized subjects he presumes to discuss.

Many of his statements are in error, and because of the importance of the entire subject, the Maritime Commission believes the record shall be set straight, insofar as several of the author's principal errors are concerned.

He writes that if the United States were to have a postwar merchant fleet of 20,000,000 deadweight tons, it would cost the taxpayers an operating subsidy of $200,000,000 to $300,000,000 annually. This figure is grossly in error. The maximum operating subsidy paid before the war was $13,000,000 in 1 year. If our foreign-trade fleet were doubled after the war, it would be absurd to assume that the operating subsidy would exceed $30,000,000 maximum.

Mr. Douglas failed to mention in his article that there is a recapture clause in the Merchant Marine Act of 1936 under which the Government will have returned to it over a period of years possibly as much as 50 percent of the operating subsidies paid. The more business done by the merchant fleet the greater the recapture.

Mr. Douglas also fails to explain to his readers that only a small proportion of the merchant marine is subsidized. Coastwise, intercoastal, and lake shipping, which constitute the bulk of the fleet, are not subsidized at all. Tankers are not eligible for subsidy, and only a part of the foreign-trade fleet recives such benefits, and these are paid primarily to maintain the wage scales and living standards of American seamen against the lower wages and living standards of foreign seamen.

In attempting to minimize the merchant marine's activities before the war, Mr. Douglas states that we carried only 20 percent of our foreign trade. The correct figure is 26 percent. The postwar goal is about 50 percent.

Mr. Douglas characterizes the Liberty ship as the "slow 10-knot tramp." This ship, designed for 11 knots, has consistently done better than 11¼ knots, and has been the bridge over which a very large portion of the arms, ammunition, tanks, planes, fuel, food, and other supplies have moved to our armies and the armies of our allies throughout the world.

The American merchant marine is generally considered to consist of dry cargo vessels, tankers, combination ships and passenger ships. Mr. Douglas, however, late in his article, makes the passing comment that he has been referring only to dry cargo ships. Does he mean, then, that his hypothetical fleet of 20,000,000 deadweight tons shall consist exclusively of dry cargo vessels? If so, why?

Similarly, does his reference to the carriage of 20 percent of our foreign trade refer only to dry cargo?. If so, why? Foreign trade is not confined to dry cargo.

In discussing the British maritime position, Mr. Douglas uses obsolete figures (November 1944 in one case, and December 1943 in another). The result is to give a false impression of British losses and her recovery from a substantial amount of those losses.

Maintenance of a strong and vigorous merchant fleet as a naval auxiliary in war and for the transportation of foreign trade in peace is of basic importance to the defense and the economy of the United States. It is a subject which should be thoroughly discussed and understood by every citizen. Opinions may differ on this problem as they do on most others. But they should rest upon facts and not upon error.

International Air Transportation To Be Great Industry in Postwar Period, Says W. A. M. Burden

EXTENSION OF REMARKS
OF
HON. JENNINGS RANDOLPH
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. RANDOLPH. Mr. Speaker, there has come to my attention excerpts from a speech on International Air Transportation by William A. M. Burden, Assistant Secretary of Commerce. It is most informative material, and I include

it at this point, as it appeared in the American Aviation Daily for April 20:

BURDEN PREDICTS FIFTY MILLION A YEAR NORTH ATLANTIC AIR-LINE BUSINESS

Conservative estimates indicate that 6 to 7 years after the war the total revenues of United States air lines in international service may amount to $126,000,000 an amount equal to the entire domestic industry today, William A. M. Burden, Assistant Secretary of Commerce, said in an address before the Bond Club of Chicago today.

"A conservative estimate is that within 5 or 6 years air transport will have diverted 50 percent of first-class passenger traffic from the steamships and created an amount of new air travel equivalent to the amount diverted," Burden said.

"This would mean forty or fifty millions a year of passenger business for American airlines on the North Atlantic. To be sure, the traffic might be carried in relatively few very large aircraft (costing two to three millions a piece) but it would nonetheless be a big business."

Burden said that there was reason to believe that air transport will become the safest form of transportation, and forecast that within 8 or 10 years after the Japanese war, "the revenues of the domestic industry may be 500 to 600 millions or as much as the total passenger revenues of all our domestic railroads before the war."

He said that in looking toward the future "it is well to begin with the outlook for the manufacture of military airplanes. Contrary to popular estimation, commercial aviation—is not likely to grow to such gigantic proportions that military sales will assume negligible importance in the postwar period."

On the contrary, he continued, "if the United States should decide to maintain a 20,000-plane air force as compared to the 4,000 military planes it had in 1940, annual sales of military aircraft would be twice the total commercial sales which can be hoped for even 8 to 10 years after the defeat of Japan."

The armed services, he said, "are fully aware of the catastrophic effect on the industry of the almost complete cessation of military purchases which followed the last war and are almost certain to recommend purchasing policies to avoid a repetition of this situation."

Poland

EXTENSION OF REMARKS

OF

HON. WALTER G. ANDREWS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. ANDREWS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution duly adopted on the 18th day of April 1945, by the Polish-American Congress, western district of New York, at its regular meeting held in the Polish Union of America Building, 761 Fillmore Avenue, in the city of Buffalo, N. Y.:

Whereas the reconstruction of a free Poland, undiminished in her border in the east and rectified in her borders in the west, is an indispensable moral issue and condition precedent to a permanent peace in Europe and the most substantial assurance for the United States against involvement in future wars.

Whereas the Polish Nation, which through its decision to resist German aggression, gave the free nations of the world the opportunity to prepare for victory, paying the supreme price measured by the death of every tenth Pole and the banishment from its ancient domain of one-third of its best sons and daughters of the Nation by both aggressors: Be it solemnly

Resolved, That we unite our efforts and pledge ourselves:

To defend the principle that obligations are sacred.

To defend the Atlantic Charter and the "four freedoms."

To defend the rights of enslaved nations.

To defend the sacred rights of the Polish Nation, based on Poland's moral credit earned by her bravery and martyrdom; it is further

Resolved, That the decisions of the Yalta Conference concerning Poland are incompatible with the spirit of Christian civilization, because they violate its moral foundations; they are inconsistent with international law, because they were made without the participation of Poland and are not to be imposed on her by force; they are incompatible with the principles of free nations, because they violate the rights of such nations; they are not in harmony with the traditions of the United States which has always stood in defense of wronged nations; they are repugnant to the principles of the Atlantic Charter, because all the United Nations have accepted these principles as a symbol in their fight against the use of force; they are also inconsistent with the commitments of the United Nations, who officially recognize the Polish Government in London. Poland, during 5½ years of fighting, gave proof of unexampled sacrifices, heroism, and faithful loyalty toward her allies and she has a right to rely upon the unalterable loyalty on their part.

As Americans dedicated to the freedom of Nations, we feel duty bound, in the name of justice, to take a stand in defense of the full rights of our ally—Poland.

In belief, that the Yalta decisions are not final, we appeal to the Government of the United States, to the United States representatives duly designated to represent the United States of America at San Francisco, California, Conference on April 25, 1945, the Congress and to the whole world, that the unjust decisions of the Yalta Conference concerning Poland, be revised in a spirit of good conscience and equity.

POLISH AMERICAN CONGRESS,
WESTERN DISTRICT OF NEW YORK,
By STANLEY E. CZASTER, *President.*
ADAM FELERSKI, *First Vice President.*
ROSE BIEDRON, *Second Vice President.*
MARIAN WOZNICKI, *Secretary.*
ANTHONY KELLER, *Treasurer.*
JOSEPH S. MATALA,
Member of Supreme Council.
MATTHEW KOWALSKI,
Member of Supreme Council.

Ernie Pyle

EXTENSION OF REMARKS

OF

HON. CARL T. DURHAM

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. DURHAM. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Durham Herald-Sun, Durham, N. C., April 22, 1945:

ERNIE PYLE'S BIG HEART KNOWN TO DUKE PHYSICIANS YEARS AGO

The big, warm, human heart of Ernie Pyle became known to millions of Americans since the beginning of the war. But members of the staff of Duke Hospital have been knowing about it for 9 years.

In 1936 Pyle, then a roving reporter, wrote to Dr. W. C. Davison, dean of the Duke Medical School, about a pathetically afflicted child he had chanced to see suffering from a strange disease, and offered to pay the expenses of diagnosis and treatment.

That was long before the famous war correspondent was "in the money" and it meant no little personal sacrifice on his part.

As the result the child, a 12-year-old boy, was brought to Duke, treated and studied. Later a long scientific paper on the case was published in the American Journal of Diseases of Children, contributing much to the medical knowledge of such afflictions. The case is frequently referred to by medical professors.

The disease in its final stage was an incurable type of calcification of the flesh and skin, and the child died in about 18 months.

"Please understand," Ernie Pyle wrote, "that I realize that the child itself cannot be saved, but maybe others could in the future if doctors knew what was the matter with this one. * * * I have been extremely worked up over this case. It was too horrible to write for my newspapers, so nothing has been written about it, and nothing will be.

"* * * it was the most horrible sight I have ever witnessed—and as a newspaper reporter for many years I have seen some pretty bad things * * * it takes a long stretch of the imagination to consider the object lying there on the box a human being. * * *"

In the light of this case and of his later famous dispatches from the fighting fronts throughout the world, it is clear that Ernie Pyle's quick response to human suffering was a noble, ingrained trait, that he made no effort to avoid his own sense of responsibility. He suffered with the suffering.

Powers of Our Representative

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. KOPPLEMANN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial appearing on April 14, 1945, in the Hartford Times, Hartford, Conn. This editorial raises the question of the American delegate's authority in an international organization with which my bill, House Joint Resolution 131 treats. It approves the use of our armed forces in a preventive policing operation without consulting Congress.

POWER OF OUR REPRESENTATIVES

One great issue in the establishment of a world security organization, as far as the United States in concerned, is the extent of the authority which our representative on the Council shall have to commit the country to the use of its armed forces in an emergency.

The isolationist position is that he should have no authority, and that every such proposal must go to Congress for decision.

Congressman KOPPLEMANN recently stated a view, which also has been expressed by ex-President Hoover, that our representative should have power to agree to use of our forces, after consulting with the Secretary of State and the Foreign Affairs Committee chairmen of the House and Senate.

Senator CONNALLY, chairman of the Senate Committee on Foreign Relations, and a delegate to the San Francisco Conference, expresses the opinion that the United States representative should have the power to vote "without reference to Congress."

This issue will be keenly debated when the plan completed at San Francisco comes before the Senate. Our participation in the new league of nations may be at stake. Certainly our effective participation will be.

Our position will have to be determined within the boundaries of the Constitution. No treaty, no act of Congress, and no agreement with other nations can amend that. Until the Constitution is amended only the Congress can declare war. At the same time, established policy imposes upon the President, as the Commander in Chief of the Army and Navy, the duty to utilize these forces whenever the safety of the Nation is endangered.

Neither of these prerogatives can be set aside. Our representative in the world organization therefore cannot commit us to war, even by consulting with congressional leaders.

On the other hand, if it is deemed that the safety of the United States—which might means the averting of war—requires the use of our armed force, then we believe that our representative, as the agent of the President and at his instruction, might, without consulting Congress, or any Members of it, agree to use of our troops, Navy, or Air Forces, in a preventive policing operation.

We believe that the Congress could not, constitutionally, interfere with such use by the President of his prerogative, whether a world organization exists or not, and that a President would have to ignore attempts to do that. By the same token, we believe it would be going beyond the Constitution to require our representative, who would, of course, be a member of the executive department, to consult with congressional leaders before the President, through him, can assume an obligation to defend the country which the fundamental document places upon the President.

The determination of the authority of our representative probably will be governed by those factors.

From His Grave to the Paths of Peace and Hope

EXTENSION OF REMARKS

OF

HON. CARL T. DURHAM

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. DURHAM. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Durham Morning Herald, Durham, N. C., April 16, 1945:

FROM HIS GRAVE TO THE PATHS OF PEACE AND HOPE

The last rites have been said. The rose-banked garden of the Hyde Park estate hides from curious eyes the last resting place of a great man. But the years ahead will mark a beaten path to that garden gate as thousands seek the privilege of standing as in a hallowed presence where rests in eternal sleep the man, Franklin Delano Roosevelt.

Quietly on Sunday morning, among his friends, they said the final words. The words of the minister intoning the chosen scripture, the carefully worded prayer, and the words of the old hymn of committal, Leave We Now Thy Servant Sleeping, closed the service.

Turning from that little garden, and that new-made grave, were those who for their own sakes and for his, must carry on the work to which he gave his life, and for which he was as much a casualty as any man who has fallen on the fields of fire and blood.

God was gracious to Mr. Roosevelt in death. He did not suffer. His end came after busy days, and immediate busy hours. Death came when he was at the height of his long and arduous career. Death came when he was the acclaimed leader of the world in its struggle back through the labyrinth of destruction and devastation seeking a way of peace.

It is no time to guess the future. The confidence that he had in a God of ruling power may be ours, too. But it is no idle sentiment that Franklin Delano Roosevelt will be strong in death as he was in life. He bids fair to be even stronger. For he left upon his associates, and upon all of us who thought with him toward the security of a war-wracked world, the nobility of a stewardship from which none would escape.

No move will be made in Washington, in the White House, on Capitol Hill, in San Francisco, and in the war and peace conferences of the world, but there will be first a thought as to what he would have said or done. Thus a spirit is not buried; it lives; and shall live. And America will pick up the torch.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. FEIGHAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

Whereas the Cleveland Federation of Labor as well as the whole world has learned with profound regret and sorrow of the death of the late President of these United States of America, Hon. Franklin Delano Roosevelt, greatest friend and sponsor of the people of these United States, and especially the laboring man; and

Whereas as a token of honor and recognition of his eminent public services to the labor movement as well as to the whole world, we the officers and members of the Cleveland Federation of Labor, offer our deepest sympathy to the members of the family and the friends of the late President, in their bereavement; and

Whereas we as workers who were his particular friends, in that all his efforts were directed to a better life and a better world for the workers to have and enjoy; and

Whereas his departing from this life has brought desperation and sorrow to the hearts of the citizens of these United States and the freedom loving people throughout the world: Therefore be it

Resolved, That this Cleveland Federation of Labor, in meeting assembled this 18th day of April 1945, in reverence to the memory of the late President, Franklin Delano Roosevelt, and in gratitude for his accomplishments on behalf of the working people, rise and in silent prayer pay tribute to our departed friend; and be it further

Resolved, That this resolution be spread upon the minutes of the board of business agents meeting, as well as the minutes of the Cleveland Federation of Labor and forwarded to the dear wife, and the members of the family, as well as to the Senators and Congressmen from this district in the United States Congress; and be it further

Resolved, That this Cleveland Federation of Labor, go on record pledging its full support to the new President of these United States, the Honorable Harry S. Truman, in his endeavor to carry out the aims of his predecessor, namely, the winning of this great war, and then the winning of the peace; so that all peoples may enjoy the world of the future so fondly cherished and sought after so vigorously by the late President, Franklin Delano Roosevelt.

CLEVELAND FEDERATION OF LABOR.
WILLIAM FINEGAN, *President.*
THOMAS A. LENEHAN, *Secretary.*

Address of Capt. Donald J. Ramsey

EXTENSION OF REMARKS

OF

HON. HARRY L. TOWE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. TOWE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an address by Capt. Donald J. Ramsey, legislative counsel in the office of the Judge Advocate of the Navy, delivered at the annual meeting of the Bergen County Bar Association, Hotel Astor, Saturday, April 21, 1945:

When Congressman TOWE first spoke to me about addressing you tonight he stated that you were desirous of saving someone talk to you about the peace, which we hope will follow the present wars. I rather think he was afraid that a naval officer could not talk about peace. I can assure you, however, that all of us in the Navy are as vitally interested as any group of citizens in peace, and particularly in the postwar world and our postwar problems. I can safely say that we in the Navy are not interested in keeping up a large Navy just for the sake of perpetuating our jobs. We do not wish to inflict upon the taxpayers of the Nation a burden which is unnecessary, but we are interested in keeping a Navy large enough to insure that we can keep the peace.

There are several other problems relating to the keeping of peace in which we have a vital interest. There has been some talk, and there will be more as days go by, of the organization of our postwar Military and Naval Establishments. There are those who advocate a consolidation of the War and Navy Departments into a Department of National Defense, with one Cabinet member. There have been several different combinations suggested as to how the Army, the Navy, and the Air Forces should be set up in this one department. Under one setup there will be Under Secretaries of War, Navy, and Air. Under another there will be one Under Secretary for the Army, with its air force, and one for the Navy, with its air force. To effect this consolidation some have gone so far as to advocate one uniform for all services.

Most of the reasons advanced for a consolidation have had to do with efficiency and economy. You, of the legal profession, are trained to give intensive study to problems which are presented to you, and I ask you to give this question of consolidation your deep thought. There is much more involved than the alleged increase of efficiency and economy. In considering this question we are misled sometimes, I believe, by the reports and descriptions of our operations, particularly in the Pacific, where the Army

and the Navy work in joint operations as a team.

You sometimes hear that all officers and men wear the same uniform, are under the same commander, and perform the same duties in battle. But there is more to it than that. We must, of course, have close coordination and cooperation between all branches, but this can be effected without any such proposed consolidation. We are given as examples the battles for the coral atolls where Army, Navy, and Marines at times performed identical duties. But where you are conducting operations against a very small island every man, whether he be a boat coxswain or a private, is on the battle line. At times all hands—storekeepers, repair crews—must pick up a rifle and join in the fighting. This is not justification for assuming that every man can be a jack of all trades.

Even should we have a consolidation into one Department of National Defense, it will of necessity break itself down into an Army and Navy. Modern methods of waging wars have made naval and army personnel specialists in their own fields, although no one can argue that in a joint operation of land and sea and air forces there should not be a supreme commander with a unified command organization.

We must have a Navy and a Marine Corps for they are specially trained in just the type of military operations which may be necessary in the postwar world. Even the most ardent advocates of the air arm of our military services must admit that air power alone cannot adequately defend this Nation or wage an offensive war against an enemy. Any military operations beyond our continental limits in the postwar world or from now on will be amphibious in nature. We shall have no need for a large standing army. We shall not again for many a day engage in operations requiring large armies overseas. The Navy will thus become the dominant military arm. We shall have need for a large Navy and a number of troops trained in amphibious warfare. We already have a well-integrated organization in the Navy, the Marine Corps, and naval and marine aviation. Our marines are trained to serve on board ship and when so serving they are an integral part of the ship's organization. They man guns and perform other duties not requiring special training. On the other hand, the record of our marines in this war will clearly show that in fighting on land they have no superiors.

In a democracy where military organizations play a minor part in peacetime, there has been less emphasis in the way of traditions. I feel that what tradition and pride in organization we do have in the Navy and in the Army and in the Marine Corps are therefore important. I am not speaking with too much pride when I say that the Navy has glorious traditions, and so has the Army, and these traditions mean much. We should think a good deal before we merge the two services and they lose their identity. In other words, let us give weight to the personnel factors in our efforts to achieve efficiency and economy. Let us be sure that in the search for the latter we are not destroying a vital factor in the former.

I would like to call to your attention something of which I am sure you are all well aware and that is the esprit de corps of all the armed services and particularly that of our marines. That is one of the secrets of their success. Their esprit de corp has been maintained despite the large expansion which has taken place in that corps. It is still small enough so that all of the senior officers know each other and have worked together for a considerable period of time. Would you destroy this organization with its fine records and great traditions by merging it with the Army and thus cause it to lose its identity? If this is done, in my opinion, the Nation will suffer an irreparable loss.

We will have no need after this war for great strategic air fleets. What we will need will be small, efficient air groups operating from our bases or from our carriers. We cannot afford to support great strategic air fleets, monster planes. Progress in aviation design will necessitate constant changes. That will be tending away from the efficiency and the economy we are seeking. Such needs as we do have for strategic bombing can be taken care of by our marine air arm. They are closely integrated with our marine ground forces. They work together and they are thoroughly trained in amphibious operations. We do not have to go farther back than the beginning of the present war to discover the disastrous effects of not having air forces working in close cooperation with the land and sea forces.

You cannot have close cooperation, coordinated effort, unless your aviators understand the operations of the ships and of the ground troops. They must all be trained in the same school of thought and action. So in the cause of efficiency and economy, I suggest the Navy and the Marines with their air arms as our postwar military organization for all operations beyond the continental limits of the United States. The Marines and the Navy have traditionally taken care of our need for military operations in peacetime.

We can, to some degree, consolidate the services in some matters of procurement and in the military industrial set-up. We now have closely coordinated effort between these activities, but I am strongly of the opinion that competition between the two services along some lines, such as the development of weapons, development of aircraft, has been extremely healthy with very little loss in efficiency or of economy. I feel certain that a little rivalry between the Army and the Navy has been helpful.

There is one further thought I should like to present for your consideration. Is there not some danger in concentrating all of the military forces in one department under one head? Is it not advisable to decentralize the military organization and power in a democratic form of government? Is there not some danger that the member of the Cabinet who heads the combined military services will overshadow in importance other Cabinet members? He will have control of a very large amount of money. We do not wish to become a militaristic nation. This Cabinet member will be the head of a very powerful organization and might carry more weight in the affairs of this Nation than you and I would care to see.

Beach Erosion on Lake Erie

EXTENSION OF REMARKS

OF

HON. WALTER B. HUBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. HUBER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter:

THE LORAIN JOURNAL,
Lorain, Ohio, April 17, 1945.

The Honorable WALTER B. HUBER,
House Office Building, Washington, D. C.

DEAR MR. HUBER: The question of beach erosion mentioned in your letter of April 12 is one of utmost importance for the parts of Ohio bordering on Lake Erie.

It is a question that has been long neglected, a neglect that has already resulted in millions upon millions of dollars loss in land as a result of the encroachment of the lake on the shoreland. Even as far back as November 6, 1878, the minutes of the Ohio-Pennsylvania boundary commission report the shore as being washed away at the rate of 2 or 3 feet per annum. The recent report of the Ohio postwar program commission says that 174 of the 185 miles of lake shoreland in Ohio are subject to constant erosion.

The situation is particularly aggravated so far as Lorain County is concerned. Mile upon mile of beach frontage west of Lorain has been made virtually useless by erosion. Some property owners have told me that they lost close to 20 feet during the past winter alone. Older residents of Lorain say that their boyhood playgrounds are now hundreds of feet out in the Lake.

Lake Erie is one of nature's richest bequests to the State of Ohio. Without it, the Buckeye State would be landbound and its industrial, commercial, and recreation possibilities would be as limited as those of Kansas. But because of neglect of the erosion problem, some of the lake's greatest potentialities have been undeveloped.

Close to the center of population of the United States, the southern shores of Lake Erie with the islands a few miles off Sandusky could be made one of America's greatest playgrounds. As it is, the precious assets of beach and soil are being destroyed year by year. Long stretches of farmland, expensive lake highways, residential districts, and many privately owned buildings have disappeared into Lake Erie during the past years.

Various committees and commissions, including the United States Beach Erosion Board, have made studies of these conditions. There is widespread recognition of the problem. But as yet nothing of a constructive nature has been done.

To my mind it seems that if the Federal Government can spend hundreds of millions of dollars creating new soil and new land in other parts of the Nation, it can and should do something about saving priceless land and soil that we already have.

Furthermore, Ohio's claim for some such action on the part of the Federal Government is strengthened by the fact that taxes from the State of Ohio contributed about 12 cents out of every dollar that the Federal Government spent on reclamation projects elsewhere.

Trusting that this information will be helpful in your appearance before the subcommittee of the Committee on Rivers and Harbors April 24, I am,

Sincerely,

FRANK MALOY,
Editor.

Prevention of Beach Erosion

EXTENSION OF REMARKS

OF

HON. GORDON L. McDONOUGH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McDONOUGH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following joint resolution of the Legislature of the State of California:

Assembly Joint Resolution 38

Joint resolution relative to memorializing Congress to adopt H. R. 2032 and H. R. 2033 in furtherance of preventing beach erosion

Whereas there are now pending before the Congress of the United States two measures designed to aid in the protection of beaches

along the shores of the United States, which measures will shortly be heard before the House Committee on Rivers and Harbors; and

Whereas the first of these measures, H. R. 2032, authorizes general shore-line investigations, with a view to preventing shore erosion by waves and currents and to determining the most suitable methods for the protection, restoration, and development of bathing beaches, the cost of such investigations to be borne wholly by the United States; and

Whereas the second of these measures, H. R. 2033, authorizes Federal participation in the cost of protecting the shores of publicly owned property, declaring it to be the policy of the United States to assist in the construction, but not the maintenance, of works for the improvement and protection against erosion of the shores of the United States that are owned by States, municipalities, or other political subdivisions, provided that the Federal contribution toward the construction of protective works shall not in any case exceed one-third of the total cost; and

Whereas the purposes sought to be accomplished by these measures are of particular interest to the coastal State of California, its political subdivisions, and its people in that thereby damage to public property may be prevented and healthful recreation may be promoted and encouraged: Now, therefore, be it

Resolved by the Assembly and Senate of the State of California, That the Legislature of the State of California hereby respectfully memorializes the Congress of the United States to enact H. R. 2032 and H. R. 2033 of the Seventy-ninth Congress, first session, relating to the investigation and protection of beaches; and, be it further

Resolved, That the chief clerk of the assembly is directed to transmit copies of this resolution to the President of the United States, to the President of the Senate and the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to Mr. J. Spencer Smith, President of the American Shore and Beach Preservation Association, 1060 Broad Street, Newark 2, N. J., and to Mr. Geo. P. Larsen, executive secretary of the Shoreline Planning Association of California, Inc., 1151 S. Broadway, Los Angeles 15, Calif.

Dumbarton Oaks and the San Francisco Conference

EXTENSION OF REMARKS

OF

HON. NOAH M. MASON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MASON. Mr. Speaker, the Dumbarton Oaks Conference held last summer constructed a skeleton organization for world peace. The San Francisco Conference is expected to put flesh and clothes upon that skeleton in order to make it a living, functioning organization. Every American is in full accord with the objective of world peace and is hoping and praying that the objective will be accomplished. We must not blind ourselves, however, to the fact that the concessions made to Stalin at Yalta and the secret agreements arrived at by the Big Three at Yalta will hamper and handicap the delegates at San Francisco in their efforts to complete the task of building an organization that will insure world peace.

The Dumbarton Oaks peace plan is not a new one. It has been tried twice before in the history of the world and failed both times. First it was tried by the Big Four—Great Britain, Russia, Prussia, and Austria—in 1815, when they formed the Holy Alliance to keep the peace of Europe after they had defeated Napoleon. The Dumbarton Oaks plan, based upon a Big Three great-power dictatorship to keep the peace of the world, is in all its basic essentials very similar to the Big Four Alliance that was created following the Napoleonic wars. The Big Four Holy Alliance became a Big Five in 1818 when it admitted a chastened, penitent Bourbon France. Its life was a short one, however, because in 1823 Great Britain seceded from the alliance and it broke up.

Woodrow Wilson's League of Nations was patterned after the Holy Alliance. It was similar in many respects, but was more universal and more idealistic. Wilson's League of Nations was doomed to failure before it began to function. Because Wilson would not accept some protective amendments, his plan for world peace was turned down by the United States Senate. Without the United States as a full-fledged partner the League was doomed to failure. Will the same thing happen again? Will our leaders become so enamored over the Dumbarton Oaks plan, when it has been made into a living functioning organization for world peace, that they will say, as Wilson did, "It cannot be changed, it must not be amended in any respect, it must be accepted as it is"? If so, will the Senate again turn thumbs down on a program for world peace?

Mr. Speaker, in accordance with my unanimous consent request, I include the following editorial from the Saturday Evening Post of April 21, 1945:

SAN FRANCISCO IS ONLY A START

At the outset let us say that the Post favors American membership in the United Nations organization whose birth cry will be heard at San Francisco next week. Membership in this organization is implicit in the fact of our participation in this destructive world war. The problems which the war has created will remain our problems as much as those of any other nation, and we shall have to belong to the institution which is set up to deal with them. Furthermore, and in spite of a lot of nonsense about isolationists and a new "battalion of death" in the Senate, there is no doubt about American membership in this security organization. We are in it from the beginning, and we shall accept our responsibilities.

However, the reason why we are certain to join the new League of Nations is a contradiction of some of the propaganda which has been circulated about it. There will be no trouble in the Senate about joining, because the voting formula agreed to at Yalta makes the league a powder puff as far as the great powers are concerned. Winston Churchill has frankly admitted that the Yalta agreement "does prescribe for a differentiation between the treatment of the greatest powers and of the smallest powers." Now that it has been decided that force may not be used against any of the big five without its consent—a condition for which the Russians are taking the rap—not even the isolationists, if there are any, will oppose American membership. What we are about to set up is a useful international medium for diplomatic activity, with a considerable chance that it will degenerate into living space for the so-called power politics. It can have great influence, but it cannot carry us to greater heights than its members care to scale.

Unfortunately, there is too much snake-oil promotion connected with all this. Overzealous people try to persuade us that by joining this organization we shall somehow or other prevent war. The same people dismiss the old Geneva-model League of Nations rather snootily, as if its founders meant well, but did not have the stamina to provide machinery which would work in a crisis. Our Dumbarton Oaks league, it is implied has teeth like a cartoon Japanese.

But the propagandists seem none too sure of the teeth, for they are warning us, between ecstatic sighs, that the new league will not work unless we adopt the Bretton Woods monetary stabilization fund without a single amendment. Everybody favors currency stability and expanded world trade, and a little tinkering here and there would meet most of the objections to the fund. For one thing, there should be more precise definition of the right of the managers of the fund to act when a member country insists on maintaining social and economic policies which cause people to doubt the value of its money. But no sure-enough Bretton Woods man will stand for anything like that. The War Writers Board, containing such financial experts as Clifton Fadiman, Samuel Grafton, and Franklin P. Adams, polishes off all criticism of Bretton Woods as isolationism. Financial Expert Orson Welles announces that the fund will "prevent such scandals as International Match King Krueger perpetrated in the roaring 20's." Amendments indeed.

Nevertheless, even with Bretton Woods at its back, the league about to be created at San Francisco starts its career less impressively equipped ot prevent war than the old League was. The 1920 League of Nations did, after all, make most nations believe that an aggressor, regardless of size, would confront the might of an organized world. Even without American membership, that illusion lasted until 1932, when Japan destroyed it. This time no great power need torture itself with any such fear. San Francisco may show the way to a peaceful world, but it will be done by road signs and not traffic cops.

We do not say this is bad, because, as our antiperfectionists are now pointing out, coercion of a great nation is, in effect, war. But we do say it is a bad thing to sell the American people an international consultative organization as if it were a guaranteed, fast-working pain and war killer. The new United Nations organization will be forced, in the words of former Assistant Secretary of Commerce John Dickinson, to "operate through and upon the international facts and forces which actually exist, and adapt itself to them." As a matter of fact, this is all that it undertakes to do despite the propaganda of its supporters. It is not set up to punish Hitler, free India, set up boundaries, assess reparations, produce 60,000,000 jobs per square mile in Java, or do anything except provide legal and consultative machinery for dealing with disputes among nations. If it accomplishes that, it will be of a price above rubies provided it leaves the way open for revision of secret decisions by the Big Three. Of this we are certain to hear plenty from San Francisco, in spite of the preference of the big powers for a meeting with no agenda worth mentioning.

Well-meaning people who try to persuade Americans that a new league will perform the impossible are only inviting the disillusion which happens when a man who was sold a shotgun finds an umbrella in the parcel.

Curtailment and Reduction of Federal Bureaus Necessary

EXTENSION OF REMARKS
OF
HON. WILLIAM A. PITTENGER
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. PITTENGER. Mr. Speaker, attention of the public has been directed in newspaper reports Saturday to the testimony of Lindsay C. Warren, Comptroller General of the United States. Mr. Warren vigorously favors an overhauling of the executive branch of the Government. He points out that curtailment and reduction is necessary and that the problems should be tackled by Congress immediately.

Some of us Members of Congress served with Mr. Warren when he so ably represented his North Carolina district in the House of Representatives. All who know him can testify to the fact that while he was a Member of Congress he displayed both ability and courage in his approach to public questions. When he quit his service in the House of Representatives to accept the appointment as Comptroller General of the United States this representative body lost one of its outstanding leaders.

Very seldom does the head of any bureau ever try to offer anything constructive for the American people. Further, such a person, always refrains from any constructive criticism because it might interfere with his efforts to enlarge his own department, increase its activities in a corresponding way, increase his salary, and that of his key subordinates. It is, therefore, very refreshing to note that Comptroller General Warren has disregarded this ancient practice and has boldly and vigorously told the Senate Banking and Currency Subcommittee that something has to be done. I hope that Mr. Warren's testimony will be available for every Member of Congress to study and that we may translate Mr. Warren's advice into some kind of proper legislation.

The Associated Press report which appears in a number of newspapers and which I have clipped from the Washington Post for Saturday, April 21, 1945, reads as follows:

WARREN URGES MERCILESS AX FOR AGENCIES

Wholesale amputation of Government agencies with a bush-ax or a meat cleaver was recommended yesterday by Comptroller General Lindsay C. Warren.

Testifying before a Senate Banking and Currency Subcommittee in favor of a bill to bring all Government corporations under the financial control of Congress, Warren said:

"If the present trend of creating Government corporations continues or is not curbed, we will soon have a government by Government corporations."

Asserting there now are 101 Government corporations, Warren said:

"They are largely independent of Congressional control and free from accountability to the Executive. This thing we call government has reached Gargantuan proportions and is sprawled all over the lot.

"It has become greater than Congress, its creator, and at times arrogantly snaps its fingers in the face of Congress.

"The most necessary thing I know of today along governmental lines is a thoroughgoing reorganization of the executive branch of Government. It should be done scientifically.

"But once the decision is made then a bush-ax or a meat cleaver should be used."

"The only way to reorganize is to reorganize," Warren said with emphasis. "It calls for great courage. Duplication and overlapping are widely prevalent. Untold millions could be saved and efficiency created to a high degree."

"Of course," he added "there would be loud pelks and snarls—that is always true when powers are curbed, consolidations made, or appropriations reduced or discontinued."

Mr. Speaker, not only do I endorse the position taken by Comptroller General Warren, but I offer for consideration of my colleagues a suggestion of another important step that could be taken by Congress and that would be productive of much good. It is well known that most Government bureaus, departments, and agencies always come before Congress and ask for larger appropriations than they really expect to get. If they get more money than they expected to receive from Congress, then they have to get wrinkles on their forehead trying to figure how to spend, and probably waste, whatever surplus money is available.

It would therefore appear reasonable to suggest that we reduce all appropriation bills for the executive departments by about 50 percent and tell the heads of these agencies that such reduced appropriation is all they are going to get for running expenses. Such a step, in my opinion, would go a long way toward a small effort in the way of balancing the Budget.

The Miracle of Supply

EXTENSION OF REMARKS
OF
HON. LEO E. ALLEN
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. ALLEN of Illinois. Mr. Speaker, the Washington Star recently carried an editorial entitled "The Miracle of Supply," which I wish every Member of the Congress could read.

It is a cold factual statement which poses out a few of the problems faced by the Army Service Forces in keeping up the service of supplies to our armies in their breath-taking advances, not alone in Europe, but throughout the world.

Let me quote from that article, a part of which states:

As we follow their sweeping advances upon the map, it does not often occur to us to think of our forces in terms of the supplies they consume—supplies of food, supplies of fuel, supplies of ammunition, supplies of a thousand and one other things needed to keep great masses of men and machines on the move.

Over vast distances, over the oceans, over the face of entire countries, that the fuel and the countless other things—including special materials to bridge great rivers like the Rhine—have been kept moving in prodigious quantities to make possible the military achievements we have been witnessing.

How many of us realize that the men charged with the responsibilities of these supplies from the time of Pearl Harbor are the Under Secretary of War Robert P. Patterson, and Lt. Gen. Brehon Somervell, Commanding General of the Army Service Forces.

Never has history witnessed such cooperation, teamwork, and efficiency between civil and military authorities as have characterized their activities.

There was the task of selecting the millions of officer and enlisted personnel. There was the task to clothe, feed, train, equip, transport, and deliver them with full communication matériel to every fighting front.

It was up to those two to inspire not alone the war workers in our mines, our mills, our factories, our vast rail systems as well as on the farms to yield the fullness of their strength in the production of millions of tons of war materials. "Infinite detail, painstaking planning, and an enormously complex organization of every means of transportation to meet the gigantic Allied logistical problem are the basic reason why our arms are now being crowned with success in Europe and why they are simultaneously faring so well against Japan. The men responsible for this, from the topmost commander down to the obscurest private, have covered themselves with glory. Their work, unparalleled in history, has been little short of a miracle. Had it been poorly done, the news we are reading today would be far less cheering than it is."

It was the Under Secretary, Robert Patterson, who planned and effectuated the negotiation and the performance on every last contract.

It was General Somervell who organized the selective service, the Quartermaster, Ordnance, Signal, Transportation, Medical, and other corps of the Army Service Forces.

It is the result of their joint efforts that we find a great Army fully equipped with food, clothing, guns, tanks, munitions, airplanes, communication and transportation facilities, and built into one mighty cohesive fighting unit.

All was accomplished without any fanfare. There was a job to do and they did it. Of necessity, there must have been errors, but if there were they quickly were sought out and corrected.

Now, Mr. Speaker, let one who served in World War No. 1 and who from his experiences deeply appreciates the significance of this editorial, submit the same for publication in the RECORD:

THE SUPPLY MIRACLE

Without a pause, after a sensational advance of 50 miles in a single day, the American Ninth Army's Second Armored Division has crossed the Elbe, the last natural barrier on the road to Berlin. Now the shattered nerve center of nazidom is virtually within range of our artillery. Now, too, as our Third Army approaches Leipzig and as all of Eisenhower's mighty forces continue to knife forward everywhere, a junction with the

Russians is imminent and Germany is on the verge of being cut in two.

Within little more than a fortnight after the Allied crossing of the Rhine we are thus seeing Nazi disintegration enter its final stage, bringing organized warfare in Europe—as distinct from mopping-up operations—very close to an end. In achieving all this so swiftly our armies in the west have made military history outshining anything of its kind ever seen before, and not the least brilliant facet of it is its logistical background. As we follow their sweeping advances upon the map, it does not often occur to us to think of our forces in terms of the supplies they consume—supplies of food, supplies of fuel, supplies of ammunition, supplies of a thousand and one other things needed to keep great masses of men and machines on the move.

At present the most forward elements of Eisenhower's nine American and Allied armies are well over 400 road miles from Antwerp and more than 700 miles from Le Harve, and beyond such continental ports as these their life lines stretch back for more than 3,000 miles across the Atlantic to America, their main source of supplies. It is over this vast distance, over the oceans, over the face of entire countries, that the fuel and the countless other things—including special materials to bridge great rivers like the Rhine—have been kept moving in prodigious quantities to make possible the military achievements we have been witnessing.

Infinite detail, painstaking planning, and an enormously complex organization of every means of transportation to meet the gigantic Allied logistical problem are the basic reason why our arms are now being crowned with success in Europe and why they are simultaneously faring so well against Japan. The men responsible for this, from the topmost commander down to the obscurest private, have covered themselves with glory. Their work, unparalleled in history, has been little short of a miracle. Had it been poorly done, the news we are reading today would be far less cheering than it is.

Resolution Memorializing the Congress of the United States To Enact Legislation Providing for Wage Readjustment for Postal Employees

EXTENSION OF REMARKS

OF

HON. JOSEPH P. O'HARA

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. O'HARA. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following concurrent resolution of the Senate and House of Representatives of the State of Minnesota, memorializing the Congress of the United States to enact legislation providing for wage readjustment for postal employees:

Whereas employees of the United States Postal Service are today required to perform greater duties than heretofore; and

Whereas employees of such Service have not received a permanent wage readjustment in more than a decade; and

Whereas the tremendous amount of work being done by the employees of the Postal Service is being performed in an efficient manner and is deserving of wage readjustment: Now, therefore, be it

Resolved, That the House of Representatives of the State of Minnesota, the Senate concurring, endorse wage readjustment for postal employees in order that such employees may receive increased compensation commensurate with their work and responsibilities, and to that end urges the Members in Congress and the State of Minnesota to vote for and support H. R. 2071; be it further

Resolved, That a copy of this resolution be transmitted to the presiding officers of the Senate and House of Representatives of the United States and to each Member of Congress from the State of Minnesota.

LAWSON B. HALL,
Speaker of the House of Representatives.
C. ELMER JOHNSON,
President of the Senate.

Adopted by the house of representatives, the 9th day of April 1945.

G. H. LEAHY,
Chief Clerk, House of Representatives.

Adopted by the senate, the 17th day of April 1945.

HY TORREY,
Secretary of the Senate.

Filed April 1, 1945:

MIKE HOLM,
Secretary of the State of Minnesota.

State Department Changes Its Mind on GI Representation at San Francisco Conference—Costello Post Scores Another Victory

EXTENSION OF REMARKS

OF

HON. RAYMOND S. SPRINGER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. SPRINGER. Mr. Speaker, on April 2, 1945, vice commander of Costello Post, American Legion, Washington, D. C., released for publication a letter from the Acting Secretary of State Mr. Joseph Grew, announcing that Commander Harold Stassen would be the sole voice representing the veterans at the San Francisco Conference.

Following this, on April 5, 1945, Costello Post members protested that they desired to have a real GI representation at the forthcoming pariey. This new plea to the State Department appeared in the newspapers as follows:

[From the Washington Evening Star of April 5, 1945]

LEGION PRESSES REQUEST FOR SAN FRANCISCO DELEGATE

A request that Lee Pennington, district department commander of the American Legion, take up with national Legion headquarters the State Department's refusal to appoint a veteran of the present war to the American delegation at the San Francisco conference will be made by the Costello Post, Thomas A. Costello, commander, announced today.

Earlier Joseph Lieb, third vice commander of the post, wrote the State Department suggesting such an appointment. He received a reply from Under Secretary Joseph C. Grew saying that Commander Harold E. Stassen, one of the delegates, would represent the viewpoint of men who had been serving overseas.

Mr. Costello said he regarded the answer as unsatisfactory, as the post wanted a GI veteran, not an active officer or anyone connected with politics, as the servicemen's representative. Before entering the Navy, Commander Stassen was Governor of Minnesota.

On April 12, 1945, I discussed this situation on the floor of the House in which I emphasized that the veterans of this war, and the people generally, want a real GI representative to sit at the peace table. They are entitled to a voice in the discussions of our peace for the future, I added, for they waged the war, and they have made the greatest sacrifices. I demanded that their voice should be heard in the peace conference.

At the suggestion of the Department Commander of the American Legion, District of Columbia, Acting Secretary of State Grew's letter was taken up with the National Commander of the American Legion.

Now it is interesting to note that on April 20, 1945, the press carried the announcement that the State Department had authorized the appointment of two GI combat veterans to assist Commander Stassen at San Francisco. Here is the story:

[From the Washington Daily News of April 20, 1945]

STASSEN PICKS GI'S FOR 'FRISCO AIDES

Commander Harold E. Stassen today selected two wounded fighting men to help him represent the United States armed forces throughout the San Francisco Security Conference.

Stassen, who is considered the armed forces' representative on the eight-man United States delegation, announced that Army Sgt. John Thomson, of Minneapolis, and Marine Lt. Cord Meyer, Jr., of New York, would be his aides at the United Nations parley.

Meyer lost an eye in the Pacific after surviving the bloody battles of Kwajalein, Einwetok, and Guam. Thomson was wounded seriously last January in the battle for Aachen, Germany.

Mr. Speaker, I also present two of the original articles concerning this situation, which follows:

[From the Washington Daily News of April 2, 1945]

GI REPRESENTATIVE

(By Daniel M. Kidney)

Commander Harold Stassen will be the GI Joe representative at the San Francisco Conference, according to a letter written by Joseph C. Grew, as Acting Secretary of State.

The letter was made public today by Vice Commander Joseph Leib, of the Costello American Legion Post here.

Mr. Leib had written Secretary of State Stettinius suggesting that some combat soldier be given a seat on the American delegation to the United Nations peace meeting April 25.

Under Secretary of State Grew replied, March 30:

"As you may be aware, Commander Harold Stassen has been appointed a member of the United States delegation. It is felt that he will fully represent the point of view of men who have been serving overseas."

Three times elected Republican Governor of Minnesota and prominently mentioned as a GOP Presidential possibility, Commander Stassen has been flag officer to Admiral Halsey in the Pacific.

He resigned as Governor to take the Navy commission.

The Army Times, published here, urged editorially this week that cartoonist Sgt. Bill Mauldin be sent to the Conference to represent the Fox Hole Fraternity.

The Washington Daily News suggested Sgt. Joe McCarthy, editor of Yank, the GI's magazine, referring to his long experience in dealing with the GI point of view, and acting as his spokesman.

Both are long-time, front-line fighters against the Nazis.

The Army Times pointed out that the plea for a combat soldier to sit at the peace table had been approved in polls by 8 of 10 civilians. It was presented to his post last June by Mr. Leib and adopted by the national convention of the American Legion in September of 1944.

[From the Washington Post of April 3, 1945]

ONLY SERVICE VOICE AT PARLEY TO BE STASSEN'S

Apparently implying that no other serviceman or veteran will be added to the American delegation to the United Nations Security Conference at San Francisco, Under Secretary of State Joseph C. Grew has declared that Commander Harold Stassen "will fully represent the point of view of men who have been serving overseas."

Grew's announcement came in a letter to Joseph Leib, vice commander of the Costello American Legion Post here, who had written Secretary of State Stettinius urging that a combat soldier be given a place at the peace table. Leib presented the proposal to his post last June and the national convention of the Legion adopted it in September. His letter from the Under Secretary, dated March 30, apparently gave Commander Stassen official designation as the conference spokesman for the men in uniform.

Commander Stassen, who resigned as Governor of Minnesota to take a Navy commission, has been flag officer to Admiral William F. Halsey and recently returned to the Pacific for a few weeks' additional duty before attending the San Francisco parley, which is scheduled to open April 25.

Old-Age and Survivors' Insurance Credits for Veterans

EXTENSION OF REMARKS

OF

HON. BERTRAND W. GEARHART

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. GEARHART. Mr. Speaker, though we have inducted into our military and naval establishments some 12,000,000 young men and women, the flower of our American citizenship, some of whom have been in the service since September 1940, the Congress to this day has failed to enact any legislation or to make any provision for the preservation and protection of their old age and survivors' insurance rights under our social-security laws.

As a consequence of this utter disregard of our legislative responsibility, these young service men and women, some of them in the Army or Navy for more than 5 years, have not been permitted to build up any old-age insurance credits whatsoever, which will be a regrettable circumstance in too many instances to contemplate with equanimity, their only guaranty against old-age dependency, against, perhaps, abject poverty and dire want during their declining years.

Encouraged to do so by the "in principle" endorsement of my bill to rectify this unfortunate situation which I introduced last year, the first one to deal with the subject, by our then President, Franklin Delano Roosevelt, in his message to the Congress of September 14, 1944, the American Legion, in its national convention resolution of the same year, and the more specific approval of its provisions by the Federal Security Agency, speaking for the Social Security Board, I am today reintroducing the measure, again submitting it to the consideration of the membership of the House.

By the terms of my bill, every soldier or sailor who entered the service of his country after September 16, 1940, the day that the Selective Service Act was approved by the President, will be credited on the books of the Social Security Board as if he had entered a covered civil employment, rather than the Army or Navy, and had paid his pay-roll taxes upon the basis, or assumed compensation, of $160 per month.

In other words, had the individual entered private employment under peacetime conditions on September 26, 1940, instead of the Army or Navy, and continued in such covered employment until the date of his discharge from his martial service—whatever that date may be—he would have, in the meantime, paid into the social-security fund pay-roll taxes—which would have been matched by his employer—and would have by the time of the termination of hostilities built up a substantial credit upon his old-age retirement annuity. Under existing legislation he will have been deprived of all of that, this as a sort of a penalty for having answered the call of his country.

If the legislation I propose is not passed and the war continues for 5 or 6 or 7 years, it will mean that our servicemen—our soldiers, sailors, and marines—will be, because of their service to their country during a time of great national distress, without old-age and survivors' credits for the period of their service while those who did not respond to their country's call, the deserters and slackers, as well as the physically unfit, will have acquired theirs.

To withhold this credit from the one who served his country in position of great danger and to freely grant it to another who served in safety in civilian employment is unconscionable. It would constitute a cruel discrimination which, I am confident, no right-thinking citizen will tolerate even for one moment. This bill must be passed and this without delay.

To emphasize the necessity for prompt action, it might be well for me to quote a few words in comment upon my proposal from the understanding pen of Watson Miller, one of the greatest living experts on social security and veterans' legislation, who, in a letter to Chairman Robert Doughton, of the Ways and Means Committee, said:

I urge that immediate action be taken on this proposal. Postponement of action serves only to increase the administrative burden involved. Obviously, the longer the enactment of appropriate legislation is postponed the greater will be the administrative burden of keeping records of service deaths, locating survivors of deceased servicemen, and adjusting cases when death occurs prior to enactment. It must be recognized that the social purpose of the legislation will be impeded by further lapse of time.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following remarks of Gov. Maurice J. Tobin at the memorial services of our late President, Franklin Delano Roosevelt, for the joint convention of the General Court of the Commonwealth of Massachusetts:

The people of the Commonwealth of Massachusetts, and its sister States of the Union, share with all the freedom-loving peoples of the world an hour of deep sorrow in the untimely death of President Franklin Delano Roosevelt.

The leader of our Nation has been called to his eternal reward even as events impend which will affect the course of civilization for centuries to come.

It is not given to man to understand the ways of Divine Providence, but as always in our history let us, agreeably to the will of the Creator, accept this burden of grief with a true spirit of resignation, trusting our future to the same capital Providence which has cherished and protected us in all the crises of our national existence.

Appropriately do we recall the inspiring example of the man whose passing we now mourn. We recollect how in his early manhood he was stricken with an affliction which might have destroyed the spirit of a less courageous man. He did not complain in his hour of tragedy, but with sublime faith in his destiny he overcame personal handicaps to go forward to a record of achievement without comparison in our entire history.

As he had faith, so let us have faith in our destiny as a Nation. For truly did Franklin Delano Roosevelt predict that our generation has a rendezvous with destiny.

To recount the outstanding accomplishments of his life, or merely to review the exceptional or noteworthy events in which he was the moving spirit, would require many hours.

As his contemporaries, we cannot properly appraise his tremendous contribution to the welfare of his country and the world. That contribution will appear in its true perspective in future centuries.

Called to the leadership of our Nation in a dark hour of economic crisis, he electrified and inspired us all with his courage and his fearless approach to the solution of problems which had perplexed the country.

Under his inspired leadership our people gathered strength and renewed faith. He attacked every problem of domestic policy with capability and with confidence. Early in his service in the highest office in the land, he foresaw the gathering of forces beyond our shores, evil forces which threatened the security and peace of the world. He clearly saw that when nations deprive their citizens of the enjoyment of their natural rights, such nations could not be expected to respect the God-given rights of the people of other lands.

In meeting the vexing problems of this era, many nations turned to totalitarian forms

of government, but under the leadership of Franklin Delano Roosevelt never despaired of our faith in the efficacy of those precepts of government which rest upon the natural rights and dignity of man, and the divinely inspired concept of legitimate government.

Even as we mourn the loss of our beloved President, let us be thankful to the Almighty for the many blessings He has showered upon our Nation through the talents and abilities of His servant, Franklin Delano Roosevelt.

No President in all history was as close to the people as he was. We came to know his voice intimately, and we felt his calm assurance and his strong determination as he spoke to us directly and in simple terms of the many problems of our times. This feeling of confidence and trust he transmitted to all the freedom-loving peoples of the world. To them he symbolized and personified their only hope of deliverance from tyranny and oppression.

In this solemn hour of mourning and sadness for the passing of Franklin Delano Roosevelt, the free peoples of the world are drawn even closer together in the common bond of brotherhood. His passionate love for mankind knew no borders. His zeal for the liberty of suffering humanity encompassed the whole world. His large heart went out to all who were heavily laden. All he had he gave to humanity. The world knew him not as a ruler but as a friend, a comforter of the afflicted, a champion of the oppressed. Today—wept over by all who are free or seeking to be free—his fame is universal. In the words of the poet:

"He ruled no serfs, and he knew no pride,
He was one with the workers, side by side;
He would never believe but a man was made
For a nobler end than the glory of trade.
He mourned all selfish and shrewd endeavor
But he never injured a weak one—never."

From Franklin Delano Roosevelt's unselfish devotion to the cause of suffering humanity let us draw inspiration and fortitude to fulfill the destiny to which he aspired. The example of his ceaseless and tireless labor for those who suffered and died seeking freedom, must give us in America renewed strength to remain in the forefront in the struggle for peace. To Almighty God, we humbly address our petition to strengthen, fortify, and guide the President who now undertakes the heavy responsibility of leadership in this crucial hour in the history of our beloved Nation and of the world.

THE COMMONWEALTH OF MASSACHUSETTS BY HIS EXCELLENCY MAURICE J. TOBIN, GOVERNOR, A PROCLAMATION

With profound sorrow the citizens of the Commonwealth of Massachusetts have learned of the untimely death of the President of the United States of America, the Commander in Chief of our armed forces, Franklin Delano Roosevelt.

In common with all our fellow Americans, we bow our heads in submission to the will of Almighty God who has summoned our beloved leader to his richly merited eternal reward.

In common with all of the freedom-loving peoples of the world we mourn the passing of one who gave his very life for the preservation of human liberty.

For more than 12 years, during a period of unparalleled turbulence in the history of mankind, Franklin Delano Roosevelt bore the most onerous responsibilities ever laid upon the shoulders of a Chief Executive. Inspired by a lofty and unfailing idealism, guided by a vision of enduring domestic prosperity and international concord, and sustained in all his trials by an unwavering faith in the Divine Providence, he proved himself a leader of such transcendent greatness that future ages will join with our own in grateful tribute to his undying memory.

Therefore, as a mark of the love and reverence which our people feel for the late President of these United States, I respectfully request that the National and State flags be flown at half staff on all public buildings for a period of 30 days, and that appropriate memorial services be conducted in all of our houses of worship. I further request that on Saturday afternoon, April 14, during the funeral ceremonies, all business in the Commonwealth be suspended between the hours of 4 and 5 p. m., except in such establishments as are engaged in essential war effort.

Given at the executive chamber in Boston this 13th day of April, in the year of our Lord one thousand nine hundred and forty-five, and of the independence of the United States of America, the one hundred and sixty-ninth.

Your Boys in Service

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. KOPPLEMANN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following radio address delivered by me on April 22, 1945, over Station WDRC, Hartford:

Every day I get dozens of letters from my congressional district, and I welcome all of them, especially those that come from you who have sons, or fathers, or brothers, or husbands, or sweethearts now valiantly serving overseas with the armed forces.

"My boy is a marine," writes a naturally anxious mother. "He has been out in the Pacific for 2 years, and now is in the hospital with malaria. Is he being well taken care of?" she asks, "and when can he expect to come home on furlough?"

All of her three sons are in service, writes another mother. Her husband has just died, and she herself is ill. Can her youngest son be sent home to carry on the small family business?

The sister of a family of soldiers writes: "My older brother was killed in France, and the younger is now in Germany, having gone across last summer. Will he be brought home and discharged after the end of the war? She hopes so, for the family needs him badly, as the father is no longer able to work.

All these and many questions like them come to me, and I have been at special pains the past few weeks to get the latest correct information from the War Department.

This broadcast is in the nature of a report to you on these matters that lie close to your heart, and I wish that all of you would pass the information along to any neighbors who have dear ones in service but may not be listening this afternoon.

First, let me assure you that our boys at the front are getting the best of everything and, when hospitalized, could not be better taken care of if they were here at home. The cold, hard facts of the medical records prove this. It is not a mere matter of opinion. There are no better doctors and surgeons anywhere than in our armed forces. Their care of the sick and wounded is the envy and admiration of the world.

Second, let me tell you what I have discovered from the War Department about the granting of furloughs and the policies that will govern the redistribution and partial demobilization of our armed forces after the end of the war in Europe.

These policies, I wish to emphasize, are based upon the expressed preference of the men in service. Months ago it was realized that standards and procedures would have to be established to govern the demobilization of troops both in the Pacific and in Europe after the Nazis collapse. It will obviously take fewer troops to wage war against Japan alone than against Japan and Germany together.

To let our fighting men decide the problem for themselves, questionnaires were sent to our soldiers all over the world, including those on such now inactive fronts as Alaska, the Caribbean, Iceland, Africa, and the Near East.

The men themselves decided to set up four points to govern priority of release from service:

1. Total length of military service.
2. Length of service overseas.
3. Combat-service record.
4. Number of dependents under the age of 18.

At the end of the German phase of the war, every soldier will be given a rating card on which to put down his record on these four points, each of which will be given a numerical value. In general, those having the highest number of points will be demobilized first. In the case of certain highly trained specialists, military necessity may intervene until such time as equally trained men are available.

This system of rating and priority will apply both in the Pacific and European theaters of war—and rightly so. Many men have been out there in the Pacific fighting for more than 3 years, are now battle-scarred veterans of many campaigns, and certainly deserve to come home whenever it can safely be done without jeopardizing the lives of their comrades.

That, ultimately, must be the criterion in this matter—that is, when it can safely be done without jeopardizing the lives of other brave men. This holds not only for demobilization plans but the granting of furloughs.

There is not one of us, I am sure, who would have our sons home again at the expense of the life of the boy next door.

Not one of us, I am sure, would think of allowing our personal desires, however deep and natural, to prolong the war even 1 second beyond what is absolutely necessary. We all want the war won quickly.

And we can all rely, I believe, upon General Marshall to bring final victory in the shortest possible time. We can count on his sound judgment, his tried and brilliant leadership, to accomplish this with the fewest possible losses.

The plans are already well laid for the day when Germany collapses, as I know from my recent talk with high War Department officials. I can't tell you all I learned, of course. But I can tell you—and I hope the Japs are listening—that we are soon going to strike them with devastating blows harder than anyone was ever struck before. We shall give them no rest until they give up and are forced to accept unconditional surrender.

Here, in a general way, is what our President and chiefs of staff have decided upon when the war in Europe ends:

First. We shall fly and ship many elements of the Air Forces directly to the Pacific to to continue softening up the Jap war machine, to keep it from catching its breath or strengthening its defenses and replacing the thousands of ships and planes we have already sunk and destroyed.

Second. We will ship troops—ordnance, quartermaster, transportation, and engineers—to prepare depots and airfields on the

Pacific front, and provide billets for the ground forces to follow.

Military leaders hope to bring back to the United States a large part of the ground forces now in Europe—some to be demobilized under the priority system I have described to you—others to be reequipped and be given rest and furloughs before they receive new assignments in the Pacific.

The rapidity of this movement will depend upon the number of ships available, for the men already on the fighting fronts in the Pacific will rightly have first call on ships to keep them fully supplied. They will need more ships than before as we crowd the Jap homeland ever closer and in larger force.

Some units will necessarily have to be left in Europe as occupation troops, and for these the Army has already devised a broad recreational and educational program. We are planning an Army university which will offer expert instruction in all fields. The men will receive standard college credit for these courses. Those not qualified for college instruction will take high-school courses, either in the classroom or by correspondence. Those who desire it will receive technical training to prepare them for new jobs in the Army or in civil life.

In addition, large recreation areas will be established to which our men can go for rest and relaxation. Many will have an opportunity to travel and acquaint themselves with Europe and the varying ways of life in its many countries, which is an education in itself.

At all costs, and in every way, our men will be kept physically, mentally, and spiritually fit. We can do no less for those who have sacrificed so much to keep the banner of freedom flying so that we here at home can go on enjoying the American way of life.

I know the anxieties and the worries that lie close to the hearts of many of you, and I only wish I could remove them. But in the nature of things I cannot. There is one thing, however, that you and I together can do. We can and should see to it that we never suffer these anxieties and worries again, and it can only be done by outlawing war and making sure that aggressors are stopped dead in their tracks before they start on their bloody path of destruction.

On March 19, 1945 I introduced into the Congress a bill which, in my opinion would do much to prevent war. It would authorize our Government to pledge to any international security organization that may be established the use of armed force against any actual or potential aggressor. This would enable our American representatives on the security council to act promptly without waiting for congressional action, and in concert with other nations, to preserve the peace whenever it is threatened. While it is the right of the Congress to declare war, the Constitution also authorizes the use of extensive police powers, and in my considered judgment, the prompt use of a minimum force to keep the peace falls into police power category.

Many of you have already written me to express your agreement with my point of view. I wish you would discuss this with your neighbors. I wish you would write me. I want to have the fullest possible expression of opinion.

No matter how the goal is achieved, we must make sure that the great sacrifices of all our boys have not been made in vain. We must follow through to attain the objective of lasting peace defined by the great leader and towering statesman we have so recently and so tragically lost. President Franklin Delano Roosevelt—an objective reaffirmed in forthright terms by his strong, able, and already highly respected successor, President Harry S. Truman, another man of the people, long a special friend of the plain soldier, for he was one himself in the last war.

Reward Postal Workers for Fine Services

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. PRICE of Illinois. Mr. Speaker, the man who delivers the mail, and all his colleagues in the Postal Service are, in my opinion, entitled to a permanent raise in their basic wages. Since 1925 these faithful Government employees have had no increase. During the depression years they had to take a pay cut of 27 percent which was restored in 1935.

In May, 2 years ago, they were granted a temporary annual bonus of $300, half of which they lost immediately to the withholding tax. This fails to meet their situation, and H. R. 2071 should promptly be enacted into law as a reward to a group of Federal employees who, through winter storms and summer heat have never shirked their duty. Their present overtime rates are less per hour than regular pay.

None of the arguments about holding the wage line applies in this case, for if Congress fails to act on H. R. 2071 by June 30, the effect will be that of a wage cut. In all fairness to a most deserving group of Government employees, Congress should promptly approve this legislation.

Under leave to extend my remarks I include herewith an editorial written by the Honorable Robert L. Kern, which appeared in his newspaper, the Belleville (Ill.) News-Democrat, on Thursday, April 19, 1945:

POSTAL WORKERS' PAY

When the Seventy-eighth Congress adjourned it left unfinished an act which a majority in both Houses favored and which, if brought to a vote, undoubtedly would have passed.

That bill, known as House of Representatives bill No. 2071, has to do with the salaries of United States postal employees.

It has been reintroduced in the Seventy-ninth Congress and the campaign for its enactment is again under way.

To be of any help to the thousands of the Nation's postal employees, this bill must be favorably acted upon by June 30, for on that date the $300 bonus law expires.

In lieu of this bonus the current bill proposes a $400 per annum increase of the present postal base pay.

It can be readily seen that all the postal employees are asking is $100-a-year increase in pay at this time.

Other provisions in the bill provide, however, for a $200-a-year increase within the next 2 years, a boost for overtime pay, and longevity pay.

Surely, if any group of workers in this country deserves a raise it is the postal employees.

They have not had an increase in salary in the past 20 years.

During the depression years they even suffered a decrease in pay.

As a body they have given much of their time and effort to war activities.

By their faithful cooperation they have been a major factor in the distribution of soldier's bonus bonds, the taking of the unemployment census, alien registration, War bond sales, and numerous other civic activities—all without extra pay.

Now, despite inadequate earning power and with thousands of their fellow employees in the armed services, they keep up their cheerful and satisfactory service in the forwarding, sorting, and distribution of the mail.

The postal workers have renewed their plea to the present Congress for the speedy enactment of this bill.

It is up to all of us who appreciate their service to help them along.

Legislation of this kind is seldom acted upon by Congress unless there is sufficient pressure brought to bear by the electorate back home.

After all, Senators and Congressmen are only human, and if their constituents display no interest in a proposition it is scarcely likely they will.

The time for action on this bill is growing short; less than 2½ months for the decision as to whether the plodding mail carrier, the men and women we know at the local post office, the railway mail clerks, and workers in all the other branches of the Postal Service will get a deserved boost or a decrease in their pay.

It cannot remain as it is.

The decrease will come automatically if Congress fails to act before July 1.

The increase will go into effect if Congress passes the bill.

Congress undoubtedly will act quickly and favorably if enough of their constituents ask them to.

So let's reward all the fine past services rendered us by our post-office friends by writing to our Congressman and Senators telling them we will appreciate their favorable action on H. R. 2071.

Importance of the Development of Hydro-Electric Power for New York State

EXTENSION OF REMARKS

OF

HON. CLARENCE E. KILBURN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. KILBURN. Mr. Speaker, under leave to extend my remarks, I include an excellent statement to the press by Hon. R. A. Newton, Massena, N. Y., president of the Northern Federation of Chambers of Commerce, relative to the importance of the development of hydroelectric power for New York State:

The great need of New York State is the development of all its hydroelectric power if we are to continue to compete with other areas that have hydroelectric power developed by the assistance of the Federal Government. The State of New York has paid from 25 to 35 percent of the costs of these developments, and it is very evident that if we are to continue to be known as the Empire State that we should wake up to the fact that it is very essential that we develop all the natural resources of the St. Lawrence and Niagara Rivers.

At this time I wish to inform the public of what a small hydroelectric development did for Massena. In 1900 Massena had a population of approximately 1,000 people. In 1902 a hydroelectric development was completed here by private interests which developed approximately 75,000 horsepower. As a result of this development the Aluminum Co. of America, which was known at that time as the Pittsburg Reduction Co., leased the power and built some reduction plants

at Massena. At this time the aluminum industry was in the experimental stages. As the aluminum industry developed, the Aluminum Co. kept enlarging the plants at Massena until today they have one of the largest plants in the United States, consisting of blooming mills, rolling mills, wire mills, and many reduction mills. As a result of the industrial activity here, the present population of Massena is estimated at 15,000 people.

The assessed valuation of the town of Massena in 1900 was around $1,000,000. The assessed valuation at the present time is over $20,000,000, or more than one-fifth of the assessed valuation of the county of St. Lawrence.

In 1907 the Aluminum Co. of America tried to develop the power in the St. Lawrence River, and they asked Congress for a 100-year franchise, which was denied them. No doubt if this power could have been developed, the aluminum industry would not have gone into Quebec and developed the tremendous plant known as the Shipshaw plant.

I have been informed that this plant is producing 3,000,000 pounds of aluminum per day. The bauxite ore can be shipped from the mines in South America by water to this plant. One of the officials of the Aluminum Co. informed me a few years ago that the Quebec Government said to the Aluminum Co. officials that they could have perpetual rights to this power providing they furnished employment for labor.

The employment of labor in Canada for the manufacture of aluminum is not much assistance to the labor of the State of New York. This holds true to the manufacture of aluminum and electro-chemical products in Tennessee, California, Washington and the State of Ohio, where these industries have been built up by the development of hydro-electric power. I am in hopes that the labor unions of the State of New York will insist that their Representatives in Congress and the United States Senate give their whole-hearted supported to the promotion of the navigation and power resources of the St. Lawrence River which has been estimated will furnish employment directly and indirectly during the construction period to at least 100,000 people. After it is developed the possibilities of the use of power for industrial purposes should increase the demand for a large amount of labor. Wherever these large hydro-electric developments have taken place electro-chemical plants have been established in their immediate vicinity, for example the development at Niagara Falls.

With the enormous increase in the production of aluminum the result of the building of many plants in various sections of the United States, I question whether the Aluminum Co., at Massena, can continue to make aluminum as cheap here as they can in other parts of the country where more and cheaper power is available. For instance at the Vancouver plant in the State of Washington, power is available for the manufacture of aluminum at 2 mills per kilowatt hour. The Aluminum Co., at Massena, is buying a large quantity of power from Canada to operate this plant. How cheap this power is made available to the aluminum interests I am not in possession of the facts; however it is reasonable to assume that at the Canadian plant power can be produced cheaper than transmitted power.

Here in northern New York we have 2,200,000 horsepower, the cheapest undeveloped electric energy in the United States. It has been estimated by the Power Authority of the State of New York that the power can be developed at the cost of ½ to 1 mill per kilowatt-hour. It is reasonable to assume that if there is a demand for the aluminum that is manufactured that the plants producing the aluminum at the cheapest price per pound are the ones that will continue in operation.

You probably know that the bauxite ore that is used at the Massena plant is shipped from Arkansas by rail and the freight amounts to two or three hundred dollars per car. I feel positive that if the people of the State of New York do not demand and insist that the great natural resources of the St. Lawrence and Niagara Rivers be developed for the benefit of the State, that industries will migrate to other areas where greater quantities of cheaper power are available.

We in northern New York feel that a few selfish interests in the State which we have every reason to believe are opposing this, the Niagara Planning Commission at Niagara Falls, the shipping interest, the elevator interest of Buffalo and the Port of Albany and Port of Buffalo, and the Port Authority of New York have only selfish reasons for organizing to prevent the development of the power at Massena. Of course, their only reason is due to the fact that they do not want competition of cheaper power or water transportation facilities which would be provided by opening the international section of the St. Lawrence River. The shipping interests of Buffalo are afraid if the seaway is developed the boats that now carry large shipments of commodities over the Great Lakes would not break bulk at Buffalo, and the same reason applies to the Port Authorities of the city of New York who fear the possibility of the loss of some business. It is about time Buffalo woke up to the fact that it could become a seaport instead of a lakeport. This certainly should be a great advantage to an industrial city as great as Buffalo as they would be able to ship their products by means of water transportation. With the industrial activity of your city, it might be to your advantage to trade with the rest of the world. Due to rapid transportation facilities, we have become internationally minded. I should also think the city of Rochester would benefit greatly by becoming a seaport.

In my opinion it is an opportune time to start a campaign of education to let the people of the State know the benefits that can be derived by the development of these great natural resources and this can be carried on through the press of the State; and the few selfish interests who are opposing it should not be allowed to continue to block this project which means so much to the future industrial development of the State of New York.

The United States Department of Commerce has conducted a survey of the St. Lawrence to prove that the railroads of the country will not in any way be injured by this development. I feel positive that the opposition of the unions to this project cannot be substantiated by facts, as the increased industrial activity resulting from the developments of hydroelectric resources would mean the employment of many thousands of people.

I am sure that anyone with a grain of common sense should know that the power development of the St. Lawrence River at Massena for which several hundred million dollars would be expended would be a great benefit to the New York Central Railroad as they would be the carrier that would ship all the needed supplies for the development of this project.

You probably know that the St. Lawrence plant at Massena, which was built by the Defense Plant Corporation, was closed down last year, due to the fact that electric energy generated by coal in New York City to operate this plant was costing three and one-half times per kilowatt more than the same current at Vancouver, Wash. I have been reliably informed that this current was costing 7 to 7½ mills per kilowatt.

I feel sure that if the people of the State of New York knew the facts and the importance of this development they would insist that the development be started at the earliest possible date. The best way to let the people know of this situation is through the press of the State; and I am hoping that the various newspapers in the northern, central, and western parts of the State, to whom I am addressing this letter, will favor us with as much publicity in the matter as possible.

I would like to offer at this time a challenge to the opponents of the St. Lawrence seaway and power development to participate in a public debate at any time or any place as they may designate. I would suggest the cities of Buffalo, Niagara Falls, Syracuse, Rochester, Albany, or New York. A free and open discussion would help to enlighten us whether or not the so-called organized groups of selfish interests really have sound and legitimate reasons for opposing the project.

Iwo Jima

EXTENSION OF REMARKS

OF

HON. MIKE MANSFIELD

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. MANSFIELD of Montana. Mr. Speaker, my old friend and colleague on the faculty of Montana State University, Lt. (Jr. Gr.) Ralph Y. McGinnis, United States Naval Reserve, has drawn a word picture of the fighting at Iwo Jima which I feel merits the attention of the House.

While the article speaks for itself, I was especially struck with Mac's last paragraph, in which he says:

> Tomorrow is Sunday. I shall conduct the usual Sunday morning church service aboard ship. But as I read the service, say the prayer, and give my "short talk," we shall be thinking mostly of those United States marines who were with us in our church service last Sunday, but who died on Iwo Jima so that the rest of us might live a better life in America.

Well said, Mac, and well done. You have expressed the hope of all of us that these gallant men's lives will not have been spent in vain. Let those of us who remain behind put up as good a fight as those at the actual battle fronts, and let us, in the memory of their sacrifices, do what we can to insure lasting peace to the people of the world.

Mr. Speaker, under unanimous consent, I am including Lieutenant McGinnis' story as it appeared in the April 10, 1945, issue of the Daily Missoulian, of Missoula, Mont.:

TOO TIRED TO SLEEP AFTER WEEK OF COMBAT, MCGINNIS WRITES ACCOUNT OF IWO JIMA LANDINGS

"When we pulled out of Iwo, I was on the *Conn* as officer of the day—in charge of the ship. The captain had gone below, near collapse from exhaustion. After I came off watch I tried to sleep, but actually I was too tired to sleep. And so I wrote the enclosed account of what I remembered. Censorship restrictions have prevented my mailing the account about Iwo Jima until now," wrote Lt. (Jr. Gr.) Ralph Y. McGinnis, United States Naval Reserve, in a letter received here recently by Fred Barthelmess.

"After Iwo," continued Mr. McGinnis, who in civilian life is a member of the Montana State University faculty, "we were laid up for repairs for several weeks. Now (April 2) we are doing 'milk run' duty—hauling military cargo between advanced bases and invasion beachheads.

"Incidentally, anything you read in the papers and magazines about Iwo Jima was true. Imagine, if you can, over 70,000 men on an island 5 miles long and 3 miles wide playing the game of 'who kills who.' Of course the United States marines finally won, and in so doing captured about 23 Japs alive and dispatched about 23,000 to see their honorable ancestors."

The enclosure, which follows, is dated Saturday night, February 24. The Knudsen mentioned in it is Lt. (Jr. Gr.) Sverre Knudsen, peacetime principal of the Paxson School here, who entered the Naval Reserve and received his indoctrination at the Tucson, Ariz., officer training school with Mr. McGinnis.

(By Ralph McGinnis)

"The following is a brief account of what I have been doing for the last 6 days. Perhaps it will support the news reports that this invasion is the bloodiest battle in the Pacific war. And so it is. At least I don't know how it could be any more bloody.

"Last Monday morning we were part of a great convoy steaming toward the Japanese island of Iwo Jima. Reveille was at 1:50 a. m. Chow was at 2 a. m. (the cooks went on duty at midnight.)' We served a big breakfast, the last meal which many of our marine passengers ever ate. By 4 a. m. we were at our battle stations. Ahead of us in the distance the sky was brilliant with shell fire from the battleships, cruisers, and destroyers, blasting away on the invasion beaches. Everything for us was going according to plan. The precision of the whole operation was phenomenal. By dawn we were exactly in our prescribed position and when the appointed minute of H-hour of D-day was at hand, the invasion began. All of our marine passengers disembarked in amphibious tractors on schedule, but not all of them reached the beaches. One of our amphib-tracks, soon after it left the ship, took a direct hit from Jap artillery and sank with the loss of six marines. Ten others, seriously wounded, were rescued from the water. Those "tracks" which were able to deliver safely their marine troops ashore, came back to the ship to haul cargo. During the next 3 days and 3 nights much of our ammunition cargo was ferried ashore by the amphibious tractors."

EARLY RECEPTION

"The Japanese artillery and mortar shelling began before the first waves of Marines reached shore. Much of it came from Mount Surabachi at the south end of Iwo Jima. It was the Japanese Gibraltar of the Pacific. It was honeycombed with tunnels, and hundreds of guns were imbedded in its caves. Incidentally, Mount Surabachi looks somewhat like Mount Jumbo at home. For 5 days the mountain held out against shelling from warships and assaults by marines. And during those five days it fired thousands of shells at our ships and beachheads. Our ship kept position about 3 miles from shore, but some of our largest warships were stationed within a mile of the shore, firing incessantly to cover the beaches. Late in the morning of the fifth day, Friday, one of our lookouts reported that he saw men climbing near the top of the mountain. Through my binoculars I could easily see American marines nearing the summit. When the marines reached the top, we announced over the ship's public address system what was happening. And then it happened. An improvised flagpole was erected. The Stars and Stripes were flying from its top. As the men aboard ship saw the event take place, they just stood by dumbly and smiled and wept at the same time."

THE WORST DAY

"Friday was our worst day. We had driven the ship up to the beach on Thursday afternoon during a very heavy rainstorm, but we were forced to retract because heavy Japanese shelling of the beach made further unloading unprofitable for us. But shortly after Mount Suribachi had been secured on Friday morning we beached again and continued to unload ammunition and heavy cargo. That night when we were just beginning to feel half secure, a terrific Japanese bombardment began from their guns on the other end of the island. At the same time Jap planes came over from three directions. We fired our guns until the barrels were hot and all planes were either shot down or driven off. Although officially our ship did not down any Jap planes, at least we kept them from diving on us and strafing us, and their bombs fell a safe distance away. The red tracers from the antiaircraft shells made the sky appear as though all the Fourth of July celebrations that ever had been held were going off all at once.

"When the Jap planes were driven off, the bombardment from Jap artillery and mortars became intense. Shells were bursting all around us. Shrapnel was striking around us like hailstones. I crouched beside my gun director's tub for protection. The wide-open sky was above me. I saw three direct hits on the LST beside us. We learned later that two of its men were killed and eight wounded. Knudsen's ship had been in its place during the afternoon. (I had seen Knute for about 2 minutes. We were less than 100 feet apart, but we said nothing. Only stood and shook our heads at each other.) There were six casualties on the LSM to our port side. Another LST had 6 killed and 11 wounded. As the shelling continued, I jabbered some sort of instructions to the men at the five guns which were under my command. But I doubt if they heard me very well. They were as frightened as I. The concussion from the shell bursts stunned the senses. Faintly I could hear the shrapnel and shell fragments clatter off the sides of my gun director tub and zing past above my head. The blood in my nose and cheeks tingled and stung and my brain seemed numb and I was cold all over. Suddenly, the big naval guns from the warships offshore opened up on the Jap area that was shelling us. Truly, hearing the firing and seeing the tracers from these 16-inch, 10-inch, and 5-inch shells whizzing over our heads gave me the most comforting feeling that I have ever known. Gradually the Jap shelling slackened, and after 2 hours it became only sporadic. By midnight, ships all around us were reporting in by radio to the commander their numbers of killed and wounded. By some miracle which never will be explained, our ship had no fatalities and only one man was wounded from a shell fragment. There is a shell hole in the captain's stateroom. Bulkheads, hatches, and ship's gear topside are damaged and scarred from shell fragments. But these damages are not serious. The Japs had used medium-sized artillery and large-sized mortars. It was a terrifying experience for us and it is little wonder that today, as the men talk about it, some of them look wide-eyed and wild."

BACK FOR MORE

"When we departed from Iwo Jima this afternoon we were still under occasional Jap artillery fire. So far, the marines have captured about half of the island, but our ship is heading back to an advanced base for repairs and then another load of marines and cargo for another operation. The week has been a nightmare, and I shall never forget it, for these things I have seen:

"Dead United States marines, face down and bloated, floating past the stern of the ship;

"American planes, struck by antiaircraft fire, burn and crash into the ocean;

"Ships and boats afire, listing and sinking from Japanese bombardment;

"A working party of 'CBs' fall like dominoes when a Jap mortar shell landed in its midst;

"Soft-spoken, dare-devil marines, with whom we had eaten chow, played cards and sung songs, die helplessly when their amphibious tractor was shelled and sunk.

"The scenes of death and destruction on the beach were ghastly. One of the news reporters told hardly half of the story when he radioed the States: 'The black volcanic ash around the battle-dressing stations became brown and muddy with blood from the wounded and dying and dead.'

"Throughout this past week there has been only one glorious sight to see: the American flag flying from the top of the Japanese Gibraltar of the Pacific.

"Tomorrow is Sunday, and I shall conduct the usual Sunday morning church service aboard ship. But as I read the service, say the prayers, and give my 'short talk,' we shall be thinking mostly of those United States marines who were with us in our church service last Sunday but who died on Iwo Jima so that the rest of us might live a better life in America."

Radio Address That President Roosevelt Intended To Make at the Jefferson Day Dinner, April 13, 1945

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

Americans are gathered together this evening in communities all over the country to pay tribute to the living memory of Thomas Jefferson—one of the greatest of all democrats; and I want to make it clear that I am spelling that word "democrats" with a small "d."

I wish I had the power, just for this evening, to be present at all of these gatherings.

In this historic year, more than ever before, we do well to consider the character of Thomas Jefferson as an American citizen of the world.

As Minister to France, then as our first Secretary of State, and as our third President, Jefferson was instrumental in the establishment of the United States as a vital factor in international affairs.

It was he who first sent our Navy into far distant waters to defend our rights. And the promulgation of the Monroe Doctrine was the logical development of Jefferson's far-seeing foreign policy.

Today this Nation, which Jefferson helped so greatly to build, is playing a tremendous part in the battle for the rights of man all over the world.

Today we are part of the vast Allied force—a force composed of flesh and blood and steel and spirit—which is today destroying the makers of war, the breeders of hatred, in Europe and in Asia.

In Jefferson's time our Navy consisted of only a handful of frigates headed by the gallant U. S. S. *Constitution—Old Ironsides*—but that tiny Navy taught nations across the Atlantic that piracy in the Mediterranean—acts of aggression against the peaceful commerce and the enslavement of their crews was one of those things which, among neighbors, simply was not done.

Today we have learned in the agony of war that great power involves great responsibility. Today we can no more escape the consequences of German and Japanese aggression than could we avoid the consequences of at-

tacks by the Barbary corsairs a century and a half before.

We, as Americans, do not choose to deny our responsibility.

Nor do we intend to abandon our determination that, within the lives of our children and our children's children, there will not be a third world war.

We seek peace—enduring peace. More than an end to war, we want an end to the beginnings of all wars—yes, an end to this brutal, inhuman, and thoroughly impractical method of settling the differences between governments.

The once powerful malignant Nazi state is crumbling. The Japanese war lords are receiving, in their own homeland, the retribution for which they asked when they attacked Pearl Harbor.

But the mere conquest of our enemies is not enough.

We must go on to do all in our power to conquer the doubts and the fears, the ignorance, and the greed, which made this horror possible.

Thomas Jefferson, himself a distinguished scientist, once spoke of the brotherly spirit of science, which unites into one family all its votaries of whatever grade, and however widely dispersed throughout the different quarters of the globe.

Today, science has brought all the different quarters of the globe so close together that it is impossible to isolate them one from another.

Today we are faced with the preeminent fact that, if civilization is to survive, we must cultivate the science of human relationships—the ability of all peoples, of all kinds, to live together and work together, in the same world, at peace.

Let me assure you that my hand is the steadier for the work that is to be done, that I move more firmly into the task, knowing that you—millions and millions of you—are joined with me in the resolve to make this work endure.

The work, my friends, is peace. More than an end of this war—an end to the beginnings of all wars. Yes, an end, forever, to this impractical, unrealistic settlement of the differences between governments by the mass killing of peoples.

Today, as we move against the terrible scourge of war—as we go forward toward the greatest contribution that any generation of human beings can make in this world—the contribution of lasting peace I ask you to keep up your faith. I measure the sound, solid achievement that can be made at this time by the straight-edge of your own confidence and your resolve. And to you, and to all Americans who dedicate themselves with us to the making of an abiding peace, I say:

The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith.

Pan-American Day Address of Hon. Pete Jarman at Santiago, Chile, April 14, 1944

EXTENSION OF REMARKS

OF

HON. ROBERT B. CHIPERFIELD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CHIPERFIELD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by the gentleman from Alabama [Mr. JARMAN] on April 14, 1944, at Santiago, Chile, at a celebration of Pan-American Day:

Mr. President, Mr. President of the Republic, distinguished guests, and fellow representatives, my colleague and I are thoroughly conscious, and equally appreciative, of the honor which is ours in representing our country on this solemn occasion by joining with you in celebration of the day of the Americas, and we wish to sincerely thank you for the privilege of doing so.

Mr. President in extending the kind invitation to our House of Representatives, you referred to the occasion as one "particularly propitious for consolidating the ties of understanding and co-fraternity among the American Republics." Be assured that your invitation was accepted in exactly that spirit. I am happy to greet you on behalf of the House of Representatives of the United States, to felicitate you and express our best wishes, not only for the success of your deliberations but for each of you personally. Seniority doubtless means much in your body, as it does in ours, and it is our hope that each of you may continue to ably represent your respective constituencies for many years.

I regard the reference to Chile as the California of South America as quite appropriate, even though your Pacific coastline exceeds that of California, Oregon and Washington, our only Pacific States, by 1,450 miles. That is, your Pacific coastline is twice as long as ours plus 250 miles. I have always understood that the customs, dispositions and general characteristics of the people of Chile are very similar to those of citizens of the United States. My delightful association with you abundantly confirms that opinion and causes me to regard the fact as quite complimentary to my people.

Our countries have both been melting pots in which peoples from throughout the world have found havens of peace, happiness, independence, and freedom from fear and persecution. You Chileans are instinctively democratic, just as we are. I am impressed that our political ideals are identical and that the background for the founding of our countries was the same. Your great Bernardo O'Higgins and our great George Washington had uppermost in their minds independence and liberty, as well as cooperation. The world owes much to these outstanding soldiers and statesmen. Patriots of our two countries have throughout the intervening years fought and died to continue the independence and freedom of our respective republics. We have developed cultures, customs, and traditions characteristic of our peoples, our climates, our ideals. Yes; we enjoy a brilliant common heritage, of which every citizen of both countries can be very justly proud. And as our heritage is common, so is our destiny.

While I have referred particularly to Chile, much of what I have said equally applies to the other American republics, some of which certain of you distinguished gentlemen so ably represent. The mutual advantage of closer economic and cultural relations between all of our republics is impossible to evaluate. Suffice it to regard it of sufficient importance that we establish it as one of our main goals. With all American nations working closely together toward that end, strictly on a par as to sovereignty and national dignity, which is the idea of all our conferences and dealings, there is no limit to our possibilities for accomplishment.

Although the good-neighbor policy is comparatively new by that name, inter-American cooperation is as old as the American republics themselves, and let us hope that no deterioration therein will ever occur. As you know, an eminent Chilean, Don Juan Egana, is entitled to credit for the first proposal for pan-American unity. With statesmanlike vision he foresaw as early as 1810 the importance of unity of purpose and policy by the American republics. With the progress of the years we Americans have substituted the equality of states for balance-of-power politics.

Once it was difficult for us to know each other sufficiently because of handicaps of distance and lack of rapid transportation. These handicaps have happily been removed by the airplane, which has so greatly shortened the distance between our countries. The better we know each other the greater is the possibility, yes, the positive probability, of maintenance of hemispheric solidarity. Consequently we of the United States Congress were delighted when your delegation of newspapermen visited us last May, and particularly so, Mr. President, when you so honored us in November. Similarly, my colleague and I are happy to visit your interesting country. However, our diplomatic corps constitute our front lines in this respect. You Chileans are very justly proud of your diplomatic representation in Washington headed by that eminent statesman and excellent diplomat Ambassador Michels, who, along with the members of his staff, is held in the highest esteem and affection in my country. We are equally proud to be represented in yours by one of our ablest and most experienced Ambassadors. We know you enjoy your association and business with Ambassador Bowers and the members of his staff.

Pan-American cooperation is, as I have said, by no means new. Its success has undoubtedly influenced the beginning of cooperation on a much larger scale. The first attempt at cooperation between 44 coequal nations with equal rights, equal privileges and equal responsibilities occurred with the United Nations Relief and Rehabilitation Administration Conference in Atlantic City last November. As we embark on this broad, cooperative effort, so pregnant with possibilities, let us, with determination, indulge the hope that it may prove as successful as has the cooperation among our American republics.

As illustrative of the attitude of the body it is our privilege to represent, all of the members of which, except six, belong to our two main parties, I refer to the unanimity of our Foreign Affairs Committee. I am one of its 14 Democratic members, while my colleague ranks third among the 11 Republicans. Although we naturally sometimes differ on, and argue about, domestic policies, those differences of opinion have not been permitted to interfere with our foreign policy. To illustrate, every bill reported from our Committee since Pearl Harbor has gone to the floor of the House with unanimous approval with one exception, when one member dissented merely because a minor amendment was not adopted. Yes, the sole test has been, not the party to which we belong, but whether the measure under consideration would contribute toward winning the war and bringing about a just and lasting peace. My colleague joins me in assuring you that in the United States, partisan politics stops at the water's edge.

I wish to reiterate the deep appreciation of our House of Representatives and of Congressman CHIPERFIELD and myself of the kind invitation of this distinguished body which afforded us the great pleasure of enjoying this momentous occasion with you. May I also sincerely thank you for the many courtesies with which you have honored us. We have enjoyed every minute of our visit, on which we will always reflect with such pleasant memories as to hope that the happy day is not far distant when we may return, accompanied by our wives, that they too may learn from experience what a delightful country yours is.

As we celebrate the fifty-fourth anniversary of the founding of the Pan American Union, organized to promote peace, commerce, and

friendship between the American republics by fostering continued cooperation among them, it is appropriate, I think, that, while offering sincere, heartfelt thanks for what has been accomplished, we emphatically rededicate ourselves to these noble purposes and the furthering of those excellent relations which alone can fully reap the reward to which our peoples are entitled and achieve the common destiny of which I spoke.

Full Employment and Social Security Under a Free-Enterprise System

EXTENSION OF REMARKS

OF

HON. JAMES E. MURRAY

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the RECORD an address entitled "Full Employment and Social Security Under a Free-Enterprise System," delivered by me in St. Louis on April 20, last, before the St. Louis chapter of the Missouri Association for Social Welfare and the St. Louis Chamber of Commerce.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Ladies and gentlemen, during this past week, Americans everywhere have been thinking with a deeper intensity about the future of our country and of the world. We have lost a great leader at a time when mankind stands at the crossroads of decision. Part of the victory over the evil that threatened the world has been won. But all that we have gained thus far will come to less than nothing if we lose courage now and if we falter from an excess of caution where we should proceed with boldness. The greatest tribute we can pay to our late beloved President, Franklin Roosevelt, will be to push forward with renewed determination toward those goals of freedom, security and opportunity for all men everywhere which he so clearly saw and toward which so many of his policies were directed.

Franklin Roosevelt was guided by a great vision. He was clear in his mind, and gave clarity to the minds of tens of millions of people, that peace, freedom, and security are not only compatible one with another but also are interdependent. He had read history with a discerning mind. He had learned the profound lesson that economic peace and security are essential for political peace and security. We are all grateful that it has fallen to the lot of farsighted and courageous American, Harry S. Truman of Missouri, to take up the reins of government in this critical period and carry on the struggle for economic freedom.

The Economic Bill of Rights presented by President Roosevelt stands as a new charter and a new goal, coequal with the Bill of Rights enacted by our forefathers. We pledge our support to President Truman in all his efforts to achieve this goal. We have full confidence in his ultimate success.

And so, today, I am glad to be talking to you about three related measures which will help carry us toward that goal—measures inspired by ideals which are common to all Americans but which have been given new meaning and new force over the past 12 years. Those measures relate to full employment, regional development, and social security.

I start with full employment because it is so comprehensive that it embraces the other two. Social security and regional development will be an essential contribution to full employment. Jobs for all is the best safeguard of freedom and security for the American people. At a high level of employment we can keep the economic hazards of unemployment, dependent old age, sickness, and dependency within manageable proportions. Similarly, the large and expanding market that accompanies full employment, facilitates regional development of natural resources and creates the most favorable circumstances for progress on cooperative local, State, regional, and Federal projects. At a high level of employment at home, we are best equipped to be good neighbors and good friends abroad.

PREVENTION OR CONVALESCENCE?

Some of you may be wondering why there is so much concern over jobs. It is clear that during the war we have actually had full employment. The never-satiated demands of war have strained our reserves of manpower and womanpower to the very limit. And we are continually reminded by press, by radio, and by personal experience, that the end of hostilities throughout the world will release a vast backlog of civilian needs that necessarily have been pent up during wartime. Even more significantly, many consumers will have piled up large amounts of savings with which to make these demands effective. So why are we worrying now about post-war markets and post-war employment opportunities?

We are worrying about markets and employment after this war, in part, because of our experiences after World War No. 1. We had difficulties then, even though our mobilization for war was far less complete than it is in the present struggle. A much greater segment of our resources and productive capacity is now mobilized for war. More than twice the number of men have been drawn into the armed forces, and a far greater proportion of our population is now engaged in producing implements of war than in 1918.

The boys now fighting so valiantly in Europe know that their fathers who pounded the Germans on those same battlefields the last time found themselves pounding the pavement at home a few years later, or selling apples on the street corner. And they know that their own reinstatement rights on the old job, if they had one, will not amount to much if several other GI's have the same right to the same job, or if the boss does not have enough capital, materials, or confidence in the future to resume peacetime production.

Likewise, civilian war workers are fearful of the war's aftermath. Many millions of them face the prospect of at least several months of unemployment while war factories are being dismantled and reconverted. Farmers have had record earnings during the war, but they can see ahead to the inevitable shrinkage of foreign markets when liberated nations start feeding themselves once more. Businessmen are aware of these things, and the threat they will be to post-war markets.

It is one of the paradoxes of our modern world that we are also concerned because after the war fewer men will be needed to produce the same volume of goods and services we consumed before the war, and because there will be more people available for production. Under the stress of war our industrial efficiency has greatly increased. At the same time, partly as the result of the normal growth in population, our labor force has expanded and will undoubtedly remain larger after the war—even assuming that several million people now engaged in war production who are not regular workers will retire from the labor market when the fighting is over. It has been estimated that 15,000,000 to 20,000,000 people will be unemployed if our production after the war returns to the 1939 level. In order to provide employment for all who may be seeking work, we would have to produce about 60 percent more than in 1939.

The pent-up demand and the savings which have accumulated during the war, if released gradually and in step with the reconversion of industry, can be of help in achieving a high level of employment and production in the years immediately following the cessation of hostilities. They will not, however, be able to assure a continuous high level of demand in the more distant years ahead. Can we, then, maintain a high level of production and employment over the long period?

One thing we have learned since the last war is that the economy will not, if left to itself, automatically stay in balance and provide adequate job opportunities and steadily rising standards of living. Laissez faire had failed a long time ago; but the world did not have the courage and the understanding to disown it. Another thing we have learned—and this is much more important—is that we can, through the kind of cooperative action that we term governmental policy, deliberately undertake to keep the economy on an even keel and achieve those goals which the devastations of depression and war have made even more precious to us—namely, economic opportunity and security for all, and for each an ever-increasing share in the good things of life, within a democratic society based on private enterprise.

We have witnessed the vast extent of our productive capacity when management, labor, farmers, and the Government were mobilized for a single purpose—the successful prosecution of the war. I have a deep conviction that in peace Americans can put aside greed and selfishness and work together in preventing a recurrence of the tragic waste and demoralization of mass unemployment—that we can marshal our large productive capacities and resources for a high and expanding level of national well-being.

WHAT THE FULL-EMPLOYMENT BILL PROPOSES

To reach this goal we need first of all a periodic comprehensive inventory and forecast of significant economic trends for the Nation. Secondly, it is essential that legislative policies should be guided by this analysis of economic trends and directed toward specific measures which this stock-taking may indicate to be necessary for the attainment of our over-all goals.

These are the two basic steps embodied in the full-employment bill, Senate bill 380, sponsored by Senator WAGNER of New York, Senator THOMAS of Utah, Senator O'MAHONEY of Wyoming, and myself; and House bill 2202, by Representative PATMAN of Texas.

The bill places on the President, with the aid of his administrative agencies, the responsibility for putting together in an annual budget—which is described as the National Production and Employment Budget—the best available information for the coming year on the expected total volume of consumption and investment. This total is simply the summation of outlays planned by consumers, farmers, businessmen, and local, State, and Federal Governments—the outlays which taken together determine the level of production and employment for the coming year. The National Budget must give in addition an indication of how far the expected level of total outlays will go in achieving the full employment of our manpower, our capacity, and our resources. A comparison of the expected level of outlays and of the total outlays necessary to keep all would-be workers employed sets the

Nation's economic problem before the administration, before the Congress, and before the American people.

The second part of the job is for Congress to decide what should be done if there is a danger of a significant gap between the expected and the required levels of total expenditures by consumers, producers, and governments. If the expected expenditures promise to be too great, anti-inflation masures will be needed. The other possibility is that the expected expenditures may be too small—equally serious because this would mean unemployment.

The bill does not prescribe the kind of legislation Congress should enact. It requires that the President shall make recommendations to the Congress on a program for full employment. The bill indicates the kind of measures which might be included in these recommendations—such as measures dealing with taxation, banking and currency, monopoly, and competition, foreign trade, agriculture, social security, the development of natural resources, and public works. The bill does not, however, make any commitments as to specific measures that should be proposed or adopted. It does not expand the functions of the Federal Government or prescribe any new economic controls. Nor does the bill grant the administration any blank checks to spend at its own discretion.

The bill does set forth, in unmistakably clear terms, the final objective—the right of every individual who wants a job to have the opportunity to work. It constitutes a promise to the Nation that the Government will never lose sight of this goal. The bill emphasizes that competitive private enterprise should be strengthened and assisted in the achievement of full employment, and that the government should do all in its power to encourage private enterprise to attain this goal. In deciding how to do this it will still be the responsibility of the Congress, as it always has been, to reflect and to reconcile the desires of the many interested groups throughout the country in such a way as best to promote the public welfare.

But—and this is the second new element—the bill requires that Congress should do this in a coordinated and informed fashion. Enlightenment would follow from the solid basis of information provided by the estimates in the President's annual message to the Congress. Coordination would follow from the provision that a joint committee from both Houses of Congress should study the President's message as a whole, and, on or before March 1 of each year, recommend to Congress how each of the various measures likely to come before it can be fitted in with the full employment goal.

The purpose of this program is not merely to fill a gap but to prevent one from occurring. In this way it proposes to prevent unemployment. It reaffirms that the strength and prosperity of a nation is in the health and productive work of its people.

POLITICAL IMPLICATIONS

The political implications of this approach go far beyond anything I have time to discuss at length. Let me just point out that it would make for a much more clear-cut relationship between the Executive and the Congress. The opportunity for constructive cooperation between the Federal and the State and local governments would also be increased. To illustrate, let me refer you to the full-employment legislation which was recently introduced in California. This proposal is similar to the national full-employment bill which my colleagues and I are sponsoring in Congress. It indicates a gratifying awareness of the important implementing role which will have to be played by State and local governments.

But no Government action, at any level, will be of much avail unless backed by the cooperation of the functional groups in the country. Our bill provides for an advisory council with representatives of business, labor, agriculture, and the public. Civic leaders like yourselves would have an important responsibility in making your interests and views known to Congress and to your local and State legislatures, and in helping thresh out a realistic and workable program.

As I said earlier, the full employment bill is based on the conviction that Americans can work together, through democratic mechanisms, to make our free enterprise system produce for all the people in peace as effectively as it produced the weapons of war. There can be few men whose imaginations have not been quickened by a vision of the new freedoms for the individual, the flowering of the human spirit, which can grow out of the vast productive potentialities of our modern economy. If the vision is to become a reality, it must be translated into specific goals; goals widely accepted and understood; goals for this year and next year and the year after; goals which will change and expand but will serve continuously to give focus and direction to our many diverse activities. The significance of our full employment bill is that it provides a method by which such specific goals can be developed and can be implemented through legislative action that will back up and reinforce the actual productive efforts of all private and public groups in our society.

MISSOURI VALLEY AUTHORITY

I wish I had time today to illustrate some of the different types of post-war projects, large and small, which are being planned, both by private business and by local and State governments; but that is not possible. I would like, however, to comment on one proposed Federal project, which more than any other I know of, would implement the peace-time development of the States of Missouri, Kansas, Iowa, Nebraska, North Dakota, South Dakota, Wyoming, Colorado, and Montana. I refer, as you may have guessed, to the much-discussed Missouri Valley Authority.

It is hardly necessary for me to speak to a Missouri audience on the need for harnessing the Missouri River to work for the people and not against them. The unruly Missouri has been exacting a heavy toll through devastating floods and ruined farms. For more than 20 years the Missouri Valley States have been losing population despite their vast natural resources, despite their potential agricultural, and other possibilities. This exodus from farm and town will continue unless the resources of the area can be mobilized to create new wealth in the form of increased productivity, better land values and more and better job opportunities. The holding power, and the drawing power, of any area is directly related to the standard of living it will support.

For a century and a half the people of this country have been trying to cope with the problems of river control and river development, but never until the Tennessee Valley Authority Act have we seen fit to look upon a river as nature made her, namely, a single, undivided whole. Instead we have directed one agency to improve a river for navigation, another to build dams for reclamation, still others for flood control, or for power. We have been tampering with the Missouri for generations, we have spent millions of dollars on flood control and navigation alone. We have failed because we have not had the courage to treat one river as one problem.

Senate bill 555, which I introduced in February 1945, proposes the establishment of a single regional agency, the Missouri Valley Authority, to provide for unified water control and resource development of the Missouri Valley region. The bill does not propose to copy T. V. A., no two river valleys are alike. It does propose, however, to follow the principles and broad policies which have been tested and proved by the T. V. A. in one of the most dramatic chapters of our economic and social history.

Briefly, the M. V. A. bill would set up a regional corporate agency under a three-man board, appointed by the President with the advice and consent of the Senate. The agency would have headquarters in the region; it would be fully responsible to the President and the Congress.

Upon this corporation would rest the responsibility to establish and maintain a broad program of unified water control and resource development for the entire river, its tributaries, and watershed. To this end the agency would utilize to the fullest possible extent the advice, assistance, and cooperation of the people of the region, and their public and private organizations, local and State, as well as that of the operating agencies of the Federal Government.

The corporation is authorized to construct, operate, and carry out such projects as would best serve to control and prevent floods, to safeguard the navigable waters, to reclaim the public lands, to encourage irrigation, to promote family-type farming, to foster navigation, and to generate electric power to whatever extent is consistent with its primary purposes.

The agency is charged with the duty of reconciling the conflicting demands of reclamation, flood control, navigation, and power—conflicting demands which have so long served only to plague and befuddle us. It is required to report to Congress within 2 years a unified plan for the development of the Missouri Valley, the plan to become effective only after Congress has had an opportunity to approve or reject it.

Admittedly this is a strong measure. A large and urgent problem and a great need call for a strong measure. Its very strength has been the target for the most concentrated fire from the opposition. With pious claims of agreement with end objectives, they nevertheless fall back on the age-old tactics of trying to defeat by division. They would perpetuate the patch-work approach, the competitive and contradictory agencies which have so long characterized our efforts to control the Missouri. We have acted on their advice in the past. We know how barren are the results. The floods have become more devastating; there has been a negligible development of industry; the productivity of 140,000,000 out of the 316,000,000 acres in the valley is threatened by erosion; 40,000,000 acres have eroded to a point where their use is no longer economically practical; there has been a steady decline in population and failure of business growth.

We cannot avoid the fact that this seeping away of population has been accelerated in the last 5 years, when it is estimated that some 1,000,000 persons have left the valley. How many of the war workers, the young men and women of the armed forces who have left may we expect to return to this area? What promise of future prosperity, of individual opportunity, has the Missouri Valley region to offer? In the vast richness of the river and the valley it traverses we have the answer at hand if we can but find the courage and the determination to make it a reality.

I should like to repeat, I know of no single undertaking that has greater potentialities for sound post-war prosperity than a comprehensive program for the development of the Missouri. Nor can I think of one which would do more to revitalize a region, to encourage new business, or to create a setting more conducive to full and stable employment and to prosperity for an important part of the Nation. Through the M. V. A., the people of this area can be greatly strengthened in their opportunity to provide a high

standard of living for themselves and to contribute in a large measure to our national prosperity.

SOCIAL SECURITY

Let us now shift our attention from problems of employment and regional development to some of the Nation-wide issues of social security. I know these are of equal interest to this audience.

One of the pointed lessons of the war years has been that jobs alone do not guarantee security for all American workers and their families. A program of full employment reaches only the employable; it does not meet the problem of the men and women who are no longer able to work. Nor do jobs, in and of themselves, guard against such hazards as illness and injury which, striking unexpectedly, may leave the worker disabled and his family dependent. We must look toward other measures for protection against the insecurity which results from these personal calamities; we must look to additional measures to rid people of the fears of insecurity.

I believe that the most equitable, and the most economical way of providing security for those who at any time cannot work is through a unified and comprehensive system of social insurance to cover the common risks of old-age, unemployment, sickness, and disability, and the costs of medical care. Under the Social Security Act, we have made a notable beginning in this direction. Almost 10 years of experience has proved that the principle of social insurance is sound when applied to the American system of free enterprise and cooperation. This experience has revealed limitations in our present programs, and it has indicated points at which extension and expansion are needed.

OLD-AGE-INSURANCE COVERAGE

One of these is the extension of coverage under old-age and survivors' insurance. Large groups are still excluded. Among these are the self-employed (in commerce, industry, and on farms), wage workers in agriculture, domestic employees in private homes, and employees in nonprofit institutions and governmental agencies. The 1940 census showed some 20,000,000 persons in these types of employment. There is no justification for further delay in extending old-age protection to these groups. In fact, among this segment of the population are to be found some of the workers whose employment conditions are the most uncertain, whose pay is the lowest and who in consequence are the least able, through individual effort, to safeguard themselves and their families against the risks of premature death or against dependency in old age.

These exclusions from coverage not only bar millions of workers from old-age protection, but they also reduce the size of the benefit to which many eligible workers are or will become entitled. Many workers, in the course of a working lifetime, shift back and forth between types of employment now covered and those not now covered. This results in disqualifying many from insurance benefits; it also reduces the earnings which can be credited toward benefits and thus lowers the amount of the payment to which the worker is entitled upon retiring or to which his widow and orphans are entitled upon his death.

Furthermore, some change is needed in the benefit formula itself in order that payments will be more nearly adequate as a basic retirement income. The revised bill which Senator WAGNER and I plan shortly to introduce, based on the Wagner-Murray-Dingell bill of the last Congress, will provide for substantial liberalization of benefit provisions as well as the numbers of people to be covered.

UNEMPLOYMENT COMPENSATION

Changes are also needed in the present unemployment-compensation program. Even if our goal of full employment is reached with maximum speed, some wage loss from temporary unemployment will be unavoidable. It is generally estimated that even in a fully active and smoothly functioning labor market about 2 to 4 percent of the civilian labor force is unemployed, at any one time.

Because of its division into 51 separate State and Territorial systems, and because of existing inadequacies in amounts and duration of benefits, the present unemployment-compensation program is not well adapted to the demands of Nation-wide reconversion or of full employment. During the past months, some States have revised their unemployment-compensation laws to make them somewhat more adequate for the tasks ahead. But the changes have been too limited. I am convinced that if we are not to jeopardize our efforts to achieve full employment, we must merge our present separate State systems into one national system, providing more adequate protection, and protection equally available, to workers in all parts of our country. We shall also need, during the reconversion period and afterward, a well-coordinated national system of employment offices, to bring workers and jobs together, and to direct displaced war workers and veterans alike to job retraining and new work opportunities.

DISABILITY INSURANCE

I believe that the time has also come for expanding our social-security program to cover the risks of sickness and disability.

It is not necessary for me to describe to this audience the social and economic consequences of illness and disablement. Many of you know, better and in more detail than I, the deprivation and slow demoralization that follows illness, especially among low-income groups. You know, too, that aside from periods of mass unemployment, sickness and resultant disabilities are the major causes of dependency and poverty among American families. It is estimated that on an average day there are about 7,000,000 disabled persons in the United States, and that of these nearly one-half have disabilities that on that average day have already lasted for over 6 months. Such figures include all age groups and all types of illness. Even among the gainfully employed, however, disability rates are high, with 1 out of every 2, 3, or 4 workers experiencing some job interruption because of illness or injury in the course of a year.

In the main, disability is of two major types. It may be acute with early recovery probable; or it may be chronic and likely to continue for a long time or until death.

Of the temporary disabilities, the majority are caused by diseases or injuries which result in short periods of incapacity, and involve equally brief periods of wage loss. In this respect, temporary disability is similar to temporary unemployment. It seems reasonable, therefore, for temporary disability insurance to be geared into the program for unemployment insurance, with similar provisions as to amount and duration of benefits.

Long-term or permanent disability, on the other hand, very closely resembles old age in its effect on the earning capacity of the worker, for it frequently results in his permanent retirement from the labor market. The consequences for the family may be even more serious than in old age, however, since premature disablement is likely to occur at a period when the worker's children are young, when family responsibilities are heaviest, and when the family has not had opportunity to accumulate substantial savings. Such disabilities often place a double strain on the household in which they occur. If the wage earner himself is incapacitated, family income is reduced or cut off at the time when the family is burdened with the additional expenses of necessary medical care. I propose, therefore, that permanent disability benefits similar in amount to old-age benefits be provided as part of a comprehensive social insurance program.

MEDICAL AND HOSPITALIZATION INSURANCE

I see the problem of providing economic security against the risks of illness and disability as twofold, and I am convinced that it can be met only by a two-way attack. There is, first, the problem of wage loss during periods of disability, which I have just described. There is the further problem of paying for medical care if it is needed, when it is needed.

It happens that my personal interest in social security began through concern about the problems of health and medical care. In 1939, I was privileged to serve as chairman of a subcommittee of the Senate Committee on Education and Labor which was in charge of the hearings on Senator WAGNER'S health bill, S. 1620. I was shocked by the evidence which was presented to the subcommittee on the prevalence of poor health and of failure to obtain needed medical care. Many persons go entirely without care, because they cannot afford to pay for it at the time they need it. Many persons receive care no better than their grandfathers received, in spite of the spectacular advances of modern medicine.

Because the costs of medical care are uneven and unpredictable for the individual, the social-insurance method of paying these costs is particularly applicable. Workers can pay in advance and pay at an average rate. The pooled funds under such an insurance system are then available to pay doctors and hospitals and laboratories for all the services which may be needed by insured persons and their families when illness occurs.

In 1943, Senator WAGNER and I, in the Senate, and Representative DINGELL in the House, introduced a bill to amend the Social Security Act which included, along with the other social-security measures we have been discussing this afternoon, a proposed plan of medical and hospitalization insurance. This part of the bill has been the target of one of the most vitriolic attacks the American public has ever witnessed. The spearhead of the attack is the so-called National Physicians Committee for the Extension of Medical Services, which boasts of the 15,000,000 pamphlets it has printed and the 18,000 releases it has sent out weekly to newspapers and magazines attacking our bill. This kind of campaign takes a lot of paper and a lot of money, and as I believe the American public knows, is not entirely motivated by concern for the public welfare.

A system of medical and hospitalization insurance, such as that proposed in the Wagner-Murray-Dingell bill does not affect, nor does it attempt to affect, the essential professional aspects of the practice of medicine. I say this advisedly and in contradiction of the hysterical prophecies of impending doom for American medicine which are coming almost daily from the leaders of the American Medical Association. Under medical care insurance, every eligible individual is guaranteed the right to choose his own doctor from among all those in the community who participate. Doctors remain free to accept or reject patients. The treatment of the patient is entirely the doctor's responsibility. And doctors can receive payment for their services according to the method they prefer. Where groups of doctors prefer to work together to give more competent and more economical service, they can do so under an insurance system more easily than today. Neither doctors nor hospitals would be "regimented." Our new bill will make this even clearer—if possible—than the 1943 bill.

If we had medical and hospitalization insurance, the medical care received by the American people would be vastly improved. Many people who now receive no care or who delay in going to the doctor because of the costs, would, under an insurance system,

have paid in advance and be entitled to care when they need it. Many others who now get inadequate care would have thrown open to them all the benefits of specialists' services and of modern laboratory techniques. Doctors also would have the satisfaction of practicing better medicine, while earning, at the same time, more adequate and more assured incomes than most of them ever earned in peacetime. We are proposing a system of prepaid medical and hospital care, not something that the opposition vaguely calls socialized medicine.

PUBLIC ASSISTANCE

Thus far I have talked only about the insurance aspects of a program of social security. I should like to point out, even though briefly, that no matter how adequate a social insurance system may be, there will always be some families with special needs, and some needy persons who cannot work and do not qualify for insurance benefits. A comprehensive social-security program, consequently, must include provision for public assistance which is granted on the basis of individual need. We must expand the insurance system for those who work and earn an income; but we must also strengthen the existing public assistance program. As I see it, one of the major needs in this area is to develop a unified assistance program which—in addition to present aid to the blind, the aged, and to dependent children—would include provisions for Federal matching of funds for general relief. There is need also for revising the present equal matching provisions so as to give a special Federal aid to States whose economic resources are small in relation to their assistance needs. Only through some such plan will it be possible to achieve more adequate grants to the needy individuals who are dependent on these programs for their maintenance.

SOCIAL SECURITY FINANCES

Both our present social-security program and our newer proposals have been criticized on certain economic grounds. The general criticism that we cannot afford comprehensive social security is economic nonsense. We cannot afford to be without it. The costs involved already exist to a large extent in the form of the wage loss suffered as a result of old age, unemployment, disability, and death, and of payments now being made individually for medical care and hospitalization. The contributions levied under social security represent, in the main, a method of distributing the burden of these already existing costs among all members of society through relatively small regular payments, rather than permitting the unfortunate families for whom risks actually occur to bear the whole loss.

Without sacrificing the advantages of the insurance method—the use of earmarked contributions and the payment of benefits as a right—we can assure that the rates of the pay-roll taxes are so adjusted that to the maximum extent possible, they work along with—and not at cross-purposes with—other plans and other measures for a high-level economy and full employment. To these ends, we have been studying the problem very carefully. I believe that our revised social-security bill will contain a satisfactory proposal.

A comprehensive program of social security can make many and valuable contributions toward a stable peacetime economy. It would aid greatly in maintaining labor mobility, an important requisite if we are to achieve our goal of full employment. A Nation-wide employment service would facilitate job placement, and would reduce the interval elapsing between jobs. An adequate system of benefit payments would make it possible for aged and disabled persons or mothers of dependent children to retire from the labor force if they wish to do so, thereby reducing some of the pressures on the labor market.

As the years pass, I am increasingly aware of the interrelations between social security and the basic stability of our economy. Social security payments help to put a floor under the purchasing power of the Nation. They help to establish a minimum level of demand for the output of factories and mines, and farms, and thus serve to check decline in consumption. Used as they are for current maintenance of many families who would otherwise be without income, their effect on consumer demand is immediate, and disproportionate to their size.

CONCLUSION

In spite of their seeming diversity, the matters I have spoken about stem from an all-important common denominator—the well-being of the people of this Nation. I see such well-being as having its foundation in a virile and stable economy in which there is an active market for goods and services, where people have the opportunity to work at rates of pay that will sustain a rising standard of living, where all gainfully employed persons have the facilities for pooling some of their funds for mutual protection against the more common risks to their security, and where the natural resources of the country are harnessed to work, not for the privileged few, but for the good of all the people.

A program of full employment and social security under a free-enterprise system will not come to the United States full blown or of its own accord. If we want that program and want it in operation, we have to plan it, work for it, fight for it. There is always powerful opposition to any change in our social and economic life. We were forced to fight for the protection of children from hazardous employment. We fought for a limitation of hours of labor and for workingmen's compensation laws. We fought for the right of labor to bargain collectively through representatives of their own choosing. We carried on a long struggle for an equitable system of income taxes, for a program of social security, and for many other humane measures—the enactment and successful operation of which have contributed immeasurably to our present high standards of living and our national prosperity.

Let us go forward in this period and make democracy in America work to carry us through to a safer and better world. If you believe with me that all this is worth having, join with me in the work and the fight to achieve it.

A Time for Rededication to Democracy

EXTENSION OF REMARKS

OF

HON. CLAUDE PEPPER

OF FLORIDA

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. PEPPER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address I delivered before the National Democratic Club of New York on the 27th of January last, the subject being A Time for Rededication to Democracy.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Judge CORNELIUS F. COLLINS. Ladies and gentlemen, our members and guests participating in this session, and of our radio audience, the National Democratic Forum now assembled in regular session at our clubhouse is resuming today, after a lapse of 3 years due to the war, its popular, intensive forum activities for the discussion of timely, patriotic subjects by outstanding guest speakers.

To inaugurate this, the opening session of our 1945 series, the club has the gratifying happiness to welcome as our guest of honor the famous statesman and orator, United States Senator CLAUDE PEPPER, of Florida. [Applause.]

He has chosen as his subject of discussion the ideally timeful and potential theme, "A Time for Rededication to Democracy."

Although he is so well known generally as to need no introduction, I would be inclined as chairman of the forum to yield to temptation to formally present him, even if justified only by the desire to express the high esteem in which we hold him, but for the fact that no danger must be incurred to encroach upon his radio time. It is my very happy privilege in behalf of the National Democratic Club to present our distinguished guest of honor, Senator PEPPER.

[The audience arose and applauded.]

Hon. CLAUDE PEPPER. Mr. Chairman, ladies and gentlemen of the National Democratic Club, and kindred spirits of democracy, your distinguished chairman has spoken with characteristic Democratic eloquence and generosity in his kindly words of introduction of me, and I hope I in a properly accredited Democratic spirit may express my deep gratitude for what he has said.

I am deeply conscious of the great honor which you bestow upon me to allow me to come into the list of the distinguished speakers who in your long past have come here to your forum, and I particularly am grateful that you have allowed me today to substitute for one of the great Democrats, one of the great statesmen of America and the world, the Senator whom New York has given to the United States, Senator ROBERT F. WAGNER. [Applause.]

And I may say that I remarked to Mr. Norton, who was gracious enough to escort me here, as I arrived, that I was most happy to see a liberal sentiment housed in such comfort and affluence as one may say is exhibited by your magnificent building here. I think there are a lot of people who are astonished constantly that any Democrat has more than 30 cents of his own [laughter] and to find here an organization which has lasted so long and is so well housed and, if I understand correctly the information I have received, so well off in the world's goods, I am persuaded that you are a living example of the fact that as honesty is good policy in business, democracy is also good policy to pursue.

Today, our country and the world are involved in a ghastly war. There are many causes which might be specified which have led to this terrible tragedy which today bleeds the heart of the world and pours out its treasure, but I think it might be simplified if we said that the cause of this war is the failure of democracy to work in the world.

Democracy is not only a philosophy. It is a process and human beings are the agencies through which that process if successful must be carried out, and somewhere in the world those in authority and those responsible for the course of human events failed to make men appreciate the worthiness of democracy and failed properly to execute and employ the democratic process; for had democracy existed in the world, there would have been no chance for tyranny and totalitarianism. There would have been no opportunity for nations to have made themselves masters of their fellow nations and of the world. There would have been a democratic recognition of the right of all nations to live and move and have their being without trespass from or aggression by other nations, because the essence of democracy is independence.

And now we are fighting that war, this war, in order that we might restore the democracy which has been destroyed by aggressor nations and that nations and men might again be free in the world; but we face the task not only of military victory upon the battlefield and upon the dark and rough oceans and in the thin air of the earth but the greater task of preserving in democratic institutions the victory which we shall win upon the many fields of battle.

There are in the United States Senate and in the country already emerging dangers which jeopardize the security of the peace for which we are daily paying so dear a price. There are some disposed to take advantage of the obsolete technic of our Government through the instrumentality with which we take our part in world affairs.

It is well that you who are concerned with democratic processes and their successful execution examine with a careful eye into the machinery through which your Government and your country alone can have a part in determining the kind of a world ours is to be.

We assume that our President is somewhere in council or soon to be in conference with the leaders of the United Nations and that there they are planning and, we hope, praying that they may succeed in reconciling conflict and finding harmony in which they may prosecute not only the war but make permanent the peace.

But we must realize that our President, if asked what commitments our country would be willing to make as a part of the general plan of world harmony and security, is utterly incapable of giving any advice save that he will do his best in rallying public opinion and in appealing to the United States Senate.

But in candor he must inform his colleagues that he can only submit what he proposes to do to the Foreign Relations Committee of the United States Senate and that that committee has the right of almost interminable hearings, and then when a treaty or a proposal might be reported out to the Senate there is the privilege of unlimited debate upon the Senate floor, and then the decision must at last be taken by a two-thirds majority of the Senate and of the Senators voting upon the proposal, and they are very practical, and if abused and taken advantage of, very dangerous obstacles to America making that quick decision necessary to maintain equilibrium or to suppress aggression in a split-second world.

It is not within our power in the interval between this time and the necessary consummation of these international agreements that we may change the constitutional process, as some hope we in time will, and make it possible for a majority of the Senate and a majority of the House of Representatives to concur with the Executive in the making of American commitments in international affairs.

All that we can do is to make individual Senators realize their obligation, if necessary, to submerge prejudice or even individual differences in the common good, so that they may not take advantage of this old process which may be responsible for two wars in one generation.

And so through public opinion alone is there any hope that this time we may win the peace after we have won the war, a public opinion which will discipline and chasten those who would dare to jeopardize what we have won at such terrible price.

But this organization which we contemplate setting up must be not only an organization to preserve the peace but an organization to promote the welfare of the world. That doesn't mean that the United States is to be a Santa Claus to anybody.

I had the privilege of being in South America recently and when asked what my views were about American policy respecting other republics in this hemisphere, I said, "Let me first make it clear that America is no Santa Claus to anybody. We want to make all the money we honorably can. We want to grow and prosper in every possible way, but we are intelligent enough to be enlightened in our selfishness and we know that if we prosper our sister republics must prosper as well."

And so we propose to have our part in promoting the welfare of the world, not to squander the taxpayer's money or to dissipate the Nation's credit but to help to make a prosperous world upon the assurance that we with our genius, which is not inconsiderable, shall be able to derive our fair share of the prosperity which the earth may enjoy.

Now shortly the Senate shall have before it the Bretton Woods report which was arrived at by the community of nations' representatives, the hope of which is to achieve currency stability among the nations of the world and to provide an agency through which international capital may find proper investment in the broken areas of the earth and an opportunity to build anew the enterprises which are needed not only for the well-being of the nation in which they may be constructed but for all people everywhere.

We have, therefore, a terrific task facing us. We shall have to be an export nation for a number of years after the war is over, but eventually we shall have to receive goods from other countries and we must not put the obstacle of a dangerous tariff in the way of the receipt of those goods nor deny to those people their ability to sell to us in order that they might buy in turn what we produce in our own fertile land.

But we are more directly concerned in what we shall do here in our own country. We know something of the magnitude of the problem we shall face, with a great Army demobilized, with war plants and factories dismantled, with the economy disordered by war restored to the uncertain ways of peace, a huge national debt that staggers the imagination, and millions of people impregnated with the idea that we fought and worked in this war not only for a better world but for a better country within our own shores.

That leads me to suggest the consideration of the eight-point economic bill of rights suggested by President Roosevelt not long ago to the Congress:

"The right to a useful and remunerative job in the industries or shops or farms or mines of the Nation.

"The right to earn enough to provide adequate food and clothing and recreation.

"The right of every farmer to raise and sell his products at a return which will give him and his family a decent living.

"The right of every businessman, large and small, to trade in an atmosphere of freedom from unfair competition and domination by monopolies at home or abroad.

"The right of every family to a decent home.

"The right to adequate medical care and the opportunity to achieve and enjoy good health.

"The right to adequate protection from the economic fears of old age, sickness, accident, and unemployment.

"The right to a good education."

I have had occasion in the course of the last year and more, as chairman of a Wartime Health and Education Committee of the Senate, to make some inquiry into the Nation's health. My inquiry was initiated after the discovery by Selective Service that over 4,000,000 men within the ages of Selective Service were ineligible to serve their country in its greatest crisis because they were educationally or physically unfit for their country's armed service.

I have often wondered if people appreciated just how intimately related the Nation's health and the Nation's strength are; but when we saw the Selective Service figures, when a family saw a husband and a father go to war maybe not to come back while a single man remained next door out of the war because he was illiterate or because he was diseased or because he was defective from infirmities which long ago could have been cured, then we began to appreciate how intimately the Nation's health was related to the Nation's security and strength.

That illustrates what I should like to leave in your mind about this thing called democracy—those who are liberal Democrats, those who are the exponents of and the warriors for, many of you here among that number for a long time.

There are some—our critics perhaps—who think that our attitude proceeds out of an enmity against someone who may be fortunate enough to have more than we. I think there is no greater fallacy in the understanding or the misunderstanding of what we mean by democracy.

Democracy is right, in the first place, if you believe in the dignity of men and women and children. Democracy actually pays. It pays not only the little man at the bottom. It pays the big man at the top.

The way to build a prosperous society is not as Alexander Hamilton proposed—the way you fill a bottle, from the top down—but as Thomas Jefferson argued—the way you build a house, from the foundation up.

You can take any great industry in America and you will discover that the prosperity of that industry depends upon the well-being of the masses of America's people.

Not so long ago in our great city of Miami—and, of course, I wouldn't want to let this occasion pass without putting in a word for Florida [laughter]—a little while before my recent election, one of my good banker friends, pursuing almost a forlorn hope, decided that he would get some of his colleagues in the business world together for a luncheon so that they might discover that if I had horns at all, they were relatively small horns and very much blunted by a kindliness which perhaps they didn't understand.

We sat around the luncheon table that day and just talked as man to man. It happened that on my right was the head of a big loan association on Miami Beach, and I said, "By the way, what is the average loan that you make?" He said, "I believe about $6,700 for home building."

Then the man on my left was the head of a big saving and loan association in the city of Miami proper, and I asked what was the size of his average loan. He said, "$5,700."

Across the table from me sat the heads of the two largest department stores in the city, and I asked the one who was most opposed to me what was his average sale. He said, "About $3." I asked the other one and he said substantially the same thing.

So when I came to make my little talk afterward, I said, "Gentlemen, I never realized before just what an advocate of big business I really have been, because the policies that President Roosevelt has pursued and I have humbly tried to pursue were aimed at making it possible for people to build those houses with your money and to buy those goods from your stores."

You can take the great motion picture industry built up upon the dimes of children and the half dollars of people all over America and in every business you could find almost an analog.

I regret to see, therefore, so many who still hold out against the idea that to embrace democracy means to sacrifice something you are otherwise entitled to enjoy. There are a great many people. I have had an instance of it in the last 2 or 3 days in Washington in some hearings which have been in progress there. They say that what everybody knows, even the courts know, we lawyers say, and I assume that this well-informed

audience at least has knowledge of the hearings to which I refer.

But the question was earnestly put by able and earnest Senators about this matter of borrowing money and Federal credit, and with fear any possible increase was contemplated. Yet I wonder if those gentlemen realize what would happen to the private budget of an unemployed nation or to the Federal Treasury if the Nation were unemployed.

I have seen a statement by the Secretary of the Treasury that the only possible way to pay off or to pay even the interest off the debt this war has forced upon us is that we maintain a high national income, not less than $150,000,000,000 a year, and far better if it could be maintained at $200,000,000,000 a year. In other words, the aim of full employment for the Nation's people is the greatest assurance of prosperity that the people of this country could possibly have.

I do not speak, therefore, about the political upheaval, about the civil danger, about the agitation in our domestic life which would ensue from unemployment and economic chaos. I suggest that full employment, 60,000,000 jobs for America—not less than 57,000,000—as a national aim effectively and properly carried out will assure not only the greatest abundance that the consumers of this country have ever enjoyed, but a degree of prosperity for the business and the professional man which we have never experienced in our long past.

I can emphasize further the Nation's health, not only 4,000,000 rejects. What we are struggling with is to discover the democratic way of providing for the protection and the preservation of the Nation's health, not by socialized medicine, not by taking away from the patient the right to choose his doctor or his dentist or his nurse, but some plan of coverage which in a proper way will make it possible for us all to cooperate through the insurance principle with one another in providing those things which under the present system are not individually available.

Therefore I know of no greater task which the National Democratic Club could set itself—rather I should say I know of no greater task which you should continue to pursue than this job of forever continuing to improve the democratic process by education.

People in this great democrary must no longer be illiterate, because they are sovereigns who have an influence not only upon the course of our country but upon the destiny of the world. People must not be kept from the enjoyment of the franchise in a democratic society because they have not possessed or have not paid a sum of money for that privilege, no more than should the possession of property be a qualification to the exercise of that franchise.

People in this country must not be throttled in their efforts to have their part, to play their own honorable and effective part in building the free enterprise of this country by tyrannical and monopolistic practices which deny the principle of free competition which is the spirit of American business, and people must not grow up in ignorance because they cannot get the money to go to college. They must not grow up as unskilled workmen because they do not have access to vocational training which will increase not only their income but their capacity to build a greater America and a greater world.

So I should like to leave it with you as perhaps the benediction upon democracy to say that I am told in the days, happier days than now, when a glorious Scandinavian society existed, it was the practice on some occasions when the seamen went down to the sea in ships upon their dangerous journeys to have their priest accompany them to their ships and, as their families stood around them, to stretch his hands above their heads and impose upon them the blessings and the challenge of what is called "The Fisherman's Benediction," and I say it to democracy: "May the Lord bless thee and keep thee, grant thee favoring winds, a prosperous voyage, safe harbors, and stout hearts for the storms." Thank you, very much.

[The audience arose and applauded.]

Tribute to Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. THEODORE G. BILBO

OF MISSISSIPPI

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. BILBO. Mr. President, on the 15th of April in the little city of Raymond, Miss., a memorial service was held for the late President Franklin Delano Roosevelt. On that occasion the county prosecuting attorney, the Honorable John Bell Williams, who suffered the loss of one arm and had one leg crushed in the present war, delivered the address of the occasion. This able address deals with the life work and services of the late President. I ask that it be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Franklin Delano Roosevelt is dead, he has crossed the river, and rests in the shade of the trees. The Commander in Chief has joined his men, who as he did, gave their lives that we might live.

Four times President of the United States, Commander in Chief of our Army and Navy, international statesman, humanitarian, Christian gentleman, and devout father and husband—Franklin Roosevelt overcame seemingly insurmountable physical and psychological handicaps to become the most adored and revered man of his day, and the most signally honored man in the turbulent history of his native land.

The story of Franklin D. Roosevelt does not find a parallel in the phenomenal rise of Abraham Lincoln—or even of Roosevelt's successor, President Truman. On the contrary, President Roosevelt was brought into the world in the lap of luxury—he never knew a material want—and the friends and associates of his youth were those, who as he, were far removed from the poverty, hunger, and privation with which every nation and people are ever conscious and beset. But he grew—as did our Saviour—in wisdom as in stature, and the rich and wealthy background of his early days only seemed to enhance and deepen his sympathy for his less fortunate brothers.

As a young man he suffered the ravages of deadly paralysis—the crippler that knows no man but makes visitations on the homes of the rich as well as the poor. This was to leave a mark on the physical being of Franklin Roosevelt that he was to carry to the grave. At this point in his life, Franklin D. Roosevelt made a decision—a momentous decision—that was to play a leading role in shaping the future of the entire world. He could have lived comfortably in the pleasant security of his Hyde Park home, but he chose rather to serve his people, and to devote his life to their welfare and to the struggle for a better world.

In 1933, after more than two decades of honorable public service to his people in various capacities, he became the thirty-first President of the United States. Into his unfaltering hands were placed the reins of a ship of state sorely obsessed of chaos and depression and internal strife and starvation. But his mighty hands were capable, and with the divine help of a gracious and merciful God, our President led this Nation out of depression and want into plenty. It was then that he carved his first niche into the hall of eternal fame.

But when he had completed this task, and was preparing himself for his return to the quiet and peace of private life, another obstacle even greater and more ominous suddenly appeared, which was to compel a weary Franklin D. Roosevelt to remain at the helm; his people demanded that he continue to lead them—for he had now become a living symbol of unity among men.

And now, as did Moses of old, he has led his children to within sight of the Promised Land; and, like Moses, he has been denied entrance, but his spirit shall be watching from its place in the ethereal land of God as his followers march on to the victory that he was to share. And his spirit shall be free.

But Franklin D. Roosevelt left more than victory in this war. By his unerring hands was molded the greatest singleness of purpose and action ever achieved in any nation. He sympathized with the weak and the poor, and he supplanted oppression with tolerance and understanding. Publicly, through the medium of radio, he led his people in humble and reverent prayers for the well-being of a stricken humanity. It was he who proved to us that we had nothing to fear but fear itself.

Heartfelt grief at the loss of Franklin D. Roosevelt is not confined to the mere bounds of his own country—but its scope is international—for he was the shining symbol of freedom, liberty, and hope to countless millions of war-ravaged souls throughout the entire world.

Just as every other human, he had enemies. But his enemies were political—not personal, and even his political enemies join his personal and political friends in mourning his untimely passing.

What mistakes he might have made in the discharge of his duties were the natural result of human weaknesses and the human inability to foresee the inevitable; not as a result of any diversion of the man from his conscience, for sincerity, the love of righteousness, and the love of God was the basis in which he found root for his every move.

Gone is the exuberant smile of F. D. R.; gone his fighting and determined chin, and the familiar comforting voice that stilled the aches in the hearts of millions. These characteristics, which are already a part of world history, will be seen and heard no more. But they shall live among us forever, and shall present themselves in our memories as a ray of hope to give light to our darkest hours. Franklin D. Roosevelt was a great man in every construction of the word, and his memory is an inspiration, for indeed, he left footprints on the sands of time:

"Footprints, that perhaps another,
Sailing o'er life's solemn main,
A forlorn and shipwrecked brother,
Seeing, shall take heart again."
—*Longfellow: A Psalm of Life.*

Roosevelt was not indispensable; but he was irreplaceable. Long after his body has returned to its original dust, and we, who knew him and loved him have joined him in the Great Beyond, he shall live—for he is an immortal, and has joined their exclusive company.

Thus cracks a noble heart. We shall not see his like on earth again. The soil has claimed its own

To the people at home, Franklin D. Roosevelt was President; to the soldiers at home

and on farflung battlefronts, he was Commander in Chief. To me he has been both President and Commander in Chief, and:

"Tho' from out our bourne of Time and Place
The Flood may bear me far,
I hope to see my Pilot face to face
When I have crossed the Bar."
—*Tennyson: Crossing the Bar.*

To a Great Lady

EXTENSION OF REMARKS

OF

HON. ALBERT B. CHANDLER

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. CHANDLER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "To a Great Lady," published in the Washington News of Saturday, April 21, 1945. The editorial is a well-deserved tribute to Mrs. Roosevelt.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TO A GREAT LADY

During this last turbulent week, while the country mourned its late President, while news of war and major political change filled press and radio, we all lost sight, to some degree, of the fact that to Mrs. Roosevelt the loss was infinitely greater. Because her dignified, friendly courtesy remained unchanged.

Like the great lady she is, she did the thousand and one heart-breaking things one has to do at such a time, keeping her own special, personal grief locked up in her heart.

So the day came, almost unnoticed, when Washington lost one of its greatest friends. Last night she quietly left the city which has known her for so long.

She has fought to clear our slums, to improve our hospitals, to feed our poor, to nourish our underprivileged school children, to protect our penniless aged and infirm; she has been a good citizen of our town, and we're grateful.

So Washington has lost a great friend and a great lady. In her column, which she will continue to write, she says today: "Now I have spent my last night in the White House. * * * Yet I cannot feel that it is good-bye, for when you are fond of people you are sure to meet again."

Mrs. Roosevelt, we want you to know that you haven't brought more warmth to Washington than Washington gives you.

So we won't really say good-bye either. We hope that when your loss is less near and poignant it will make you as happy as it will make us to visit us often.

Unsparingly Honest Survey Needed

EXTENSION OF REMARKS

OF

HON. FRED L. CRAWFORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CRAWFORD. Mr. Speaker, it is a fact that when it comes to the question of free trade and of tariff protection for American agriculture and industry, that the economic interests of certain of our people greatly conflict. For example, the cotton South naturally desires free trade to a great extent. But at the same time those several Southern States which today produce the very necessary crop of peanuts consumed by the people of this country, and which crop is taking on great significance in certain areas—that group, of course, would aggressively oppose the elimination of the very high duty per hundredweight which is now assessed against foreign-grown peanuts entering the United States. Thus we have in the crops cotton and peanuts great economic conflict, and in almost the same identical area. Then there is the great automobile industry which operates on a free-trade basis, and which advocates the removal and lowering of tariff barriers. This automobile industry primarily sells its production of both touring cars and trucks to the people whose activities are more or less protected by tariffs which are now imposed against competitive products entering the United States.

The reciprocal trade agreements hearings are now being conducted by the Ways and Means Committee. The Bretton Woods proposal is now being heard by the House Banking and Currency Committee. Within a few days the convention will open in San Francisco, and the representatives of the United Nations will be in attendance, and unquestionably the problem of tariff reduction will be discussed.

Mr. K. G. Pennell has written a thought stimulating editorial which is of interest to millions of our people, and I submit his observations for the RECORD.

The editorial follows:

FILLING IN THE FACTS

(By K. G. Pennell)

Workers once believed that the tariff was a friend; protecting wages and jobs against low-cost products from abroad. Now they are told, by a chorus of influential voices, that the reverse is true. A shrinking tariff is said to be essential to an expanding world trade; low rates, to the "greater prosperity that expanding trade brings." To work these tariff rates down, accordingly, it is proposed to increase the State Department's power in making reciprocal trade agreements, by permitting an additional 50-percent cut in tariff rates wherever the Department sees fit.

Filling in the picture with pertinent facts would be most helpful; and Congress is the agency which should provide those facts through an unsparing survey. Knowing that the tariff touches few if any imports, except those that compete with American products, it is easy to see where the survey ought to be made. It ought to find out what happens to the jobs of workers directly affected by trade agreements.

One instance was reported in this magazine last month by the American Lace Manufacturing Industry. Tariff rates on lace and veilings were sharply reduced by a "trade agreement" made with France in 1935. Imports of those items had averaged only about 16,000 pounds a year up to that time; but rose quickly, reaching 354,000 pounds in 1938. Workers were affected, of course. Sixty-six out of each hundred lost their jobs. How many other such disasters have been silenced by war no one seems to know. Readers, however, are invited to send to the writer, care this magazine, whatever facts they have on the matter. They need to be assembled and aired.

Meanwhile, there are some more general facts which seem to bear directly on the matter of expanding trade and the American tariff. Perhaps the high tariff we had in the 1920's was not responsible, but at least the American people bought a lot of things from other countries at that time, and also had good jobs, good pay and lots of money in their pockets. Our imports grew slim in the 1930's, after jobs and pay got scarce. These facts do seem to suggest, at least, that in this country the jobs at home come first. They suggest, too, that we'd better find out what tariff reduction actually did to those jobs, before dynamiting the dikes any further.

TARIFF THINKING SHOULD BE MADE IN AMERICA

A world perspective is perfectly consistent with the proposition that tariff thinking in this country should be made in America. Everyone knows that heat will make a solid out of eggs, while making a liquid out of butter. Not enough people know, however, that tariffs are a lot like heat in that respect. High tariffs may be necessary to protect high living standards in one country, yet produce poverty in another. That's why our thinking about tariffs needs to be made in this country.

It happens, however, that an immense amount of economic thought over here had its origin overseas. It would be insular indeed to argue that Americans have nothing to learn from Vienna, Berlin, Stockholm, Paris, or London. It would be absurd. But it is equally absurd to overlook the fact that economists are, or should be, practical men thinking about a practical problem. When their lives are or have been centered in Europe, it is almost inevitable that their mental center of gravity should be centered there also.

With respect to the tariff, few of the European countries are situated as we are. Instead, if we imagine Connecticut, New Jersey, Pennsylvania, and New York as separate nation, Connepenny, with half a dozen independent sovereign powers in our present area, our problems of trade would then resemble those of Europe. Like Britain and Germany, Connepenny would look across national lines for both customers and main sources of supply. Low tariffs within this area would be then as important as they seem to leading European nations; and their thinking would then have promise for our own problems.

FROM "INFANT INDUSTRIES" TO VULNERABLE WORKERS

In days gone by the tariff was defended as a protection for "infant industries." It was a perfectly valid argument then, but does seem worn a trifle thin as we look at those gigantic "infants" of the present day. If America was ever to develop from agriculture, and to provide its people with varied outlets for their infinite individual talents, that protection was certainly essential. Otherwise English and German industries would have crushed American industry in its nest.

Today we are facing something new in the world. Machines are no longer the exclusive possession of western peoples with high standards of living. They have already been taken over by the Japanese—whose products threatened to dominate all the markets of the world, except where held in check by tariffs or some equivalent. They have been taken over by countries like Russia; where totalitarian methods take away the meaning of production cost in international trade. India and China are beginning now to acquire the machine techniques.

Those techniques, to be sure, could most profitably be used to raise the living standards of these new recruits. Doubtless to some extent they will be. But almost without doubt they will also be used in connection with low and coolie-like wage scales to undersell the products of western workers even in

their own home markets. As buyers, of course, individual workers would welcome these low-priced products of the Orient. But as workers they would be pitifully vulnerable; and we know all too well that no prices can be low enough to seem cheap to the man who walks the street without a job. Tariffs will indeed be needful—not to protect industries no longer infants, but to stand guard over workers no longer safe.

RECIPROCAL TRADE AGREEMENTS—PROMISE OR THREAT?

Nearly all economists are greatly enamored with reciprocal trade agreements. They can readily see the great possibilities for good which lie within this procedure. If men entrusted with responsibility are equal to their task, and understand the real nature of the workingman's need for protection, and what he needs to be protected from, their opportunities for service are truly exceptional. Such agreements could be made to fit the actual need for protection in each case; while never, in any case, shutting us in behind some Chinese wall of exclusion.

So much depends on their competence and objectives. Makers of these agreements sit largely behind closed doors. American workers are their pawns. For one thing, they need the innocence of lambs, the wisdom of elephants, the cunning of serpents. They require economic ideas centered on the economy here at home. Any negotiator who consciously or subconsciously sees the world from London or Vienna or Paris, no matter where he may have been born, may govern his decisions according to yardsticks not suited to New York or San Francisco.

We do not know what kind of strategy is being used on this economic chessboard. We do not know how many pawns, if any, have been needlessly swept off the board. Four years of peacetime progress in making such agreements, however, have gone into history. There must be a record of achievement and of failure which can be found and used for a guidepost to thought and to congressional action.

What is the score on these activities? Not as to agreements made, and preferences given and received; no, not that. We need to know the score in terms of the human workers who are the pawns. That's why Congress should undertake an unsparingly honest survey now. It should neither argue nor vote until the facts are known.

Nazi Atrocities

EXTENSION OF REMARKS

OF

HON. ALBERT B. CHANDLER

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. CHANDLER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial published in this morning's issue of the Philadelphia Inquirer entitled "America Must Not Forget—Again!" The editorial demands that a permanent record be kept of German atrocities so that mankind may always remember or be reminded of what has happened to prisoners in these critical days.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AMERICA MUST NOT FORGET—AGAIN!

In all the tragic history of human suffering there is nothing to compare with the wholesale barbarities perpetrated by the fiendish Nazis.

Such frightfulness must never again be tolerated on this earth.

Millions of men, women and children murdered in cold blood; millions tortured; millions starved; millions wantonly and brutally mistreated—every day new evidence of Germany's appalling wartime crimes is being uncovered as the avenging armies of the Allies march to victory over Hitler.

These shocking accounts of the horrors at Buchenwald, Dachau, Oswiecim and other prison and concentration camps are not propaganda tales concocted for the gullible. They are facts, borne out by photographs, affidavits and official records.

But will they be remembered 5 or 10 years from now?

The human mind has an amazing faculty of adapting itself to changing conditions. It can quickly forget pain and sorrow. In particular, the American people are all too prone to forget the hardships, difficulties and mistakes of the past.

Will we ever learn from history? Twenty-five years ago some cynical Americans were saying that the stories of German brutality in Belgium were chiefly propaganda directed—before April 6, 1917—at getting the United States into the European war.

Today there are those among us who not only take no stock in the certified records of German bestiality in World War No. 1 but who scoff at the evidence of unspeakable German atrocities in World War No. 2 as propaganda.

But our soldiers know. Our boys who have been prisoners in German camps know. The British and the Russians know. They know that not a fraction of the full story of Nazi barbarism has as yet been made public.

General Eisenhower knows the truth. That's why he proposed that delegations of Congressmen and editors and publishers speed to the scenes of the Nazi outrages to see the evidence for themselves.

That is as it should be, so far as it goes. But it doesn't go far enough. Every Member of the United States House of Representatives; every Member of the Senate; every publisher and every editor who wants to see with his own eyes the exhibits of German brutishness should have opportunity to do so. Surely ways can be found to permit a thousand American civilians, lawmakers and publicists, to visit the German crime spots.

We regard as thoroughly sound the suggestion of Representatives BROOKS, GOSSETT, and FLOOD that a full-time agency be set up to keep a permanent record of German atrocities. But more than that is needed to maintain in the public mind a realization of German criminality in this war.

There should be established in Washington a museum to preserve, so long as such a reminder is necessary, factual, authentic documents, photographs and other displays to keep the American people from forgetting the horrors committed by the Germans in the name of nazi-ism and the vile Hitler.

Twice in one generation the people of the United States have been called to help put down mad-dog Germany and save Europe from itself. Twice is enough. There must be no further call for America to join in this task, at a cost of thousands of our sons.

German-instigated wars must be stopped for all time. When this war is over German militarism must be destroyed and the Reich policed. The nations must organize for enduring peace and security. But beyond all this:

Nazi Germany's crimes must be kept blazoned on the consciousness of the world. We must not forget—again!

Should Management Be Unionized?

EXTENSION OF REMARKS

OF

HON. FRED L. CRAWFORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. CRAWFORD. Mr. Speaker, under the provisions of the Wagner Labor Relations Act there is imposed upon ownership and management some very direct responsibility.

Recently the National Labor Relations Board made a ruling in connection with the so-called Packard Motor Car Co. case which is tremendously significant, and which no doubt will be carried to the Supreme Court.

It has been pointed out that granting collective bargaining to foremen will not prevent cut-backs in employment nor make for more supervisory jobs. On the other hand, if the Board recognizes the unionization of management representatives and thus overthrows the rule heretofore established by the Board, such a reversal of ruling will tend to disrupt production and management techqnique in mass production industry and destroy the very thing which made possible almost unheralded production of war materials.

For the record, I submit a statement made by General Motors, which was published in many of the leading newspapers of this country.

It is a matter which Congress will undoubtedly have to deal with, and perhaps through materially amending the Wagner Labor Relations Act.

The statement follows:

SHOULD MANAGEMENT BE UNIONIZED?—A STATEMENT BY GENERAL MOTORS

The National Labor Relations Board has ordered a bargaining election among the foremen and other supervisory groups of a Detroit automobile company.

This company is not a part of General Motors, but we are concerned with the principles involved.

This confusing action by the Board means that it is sanctioning and promoting the unionization of management personnel, in spite of the fact that the National Labor Relations Act includes as an employer "* * * any person acting in the interests of an employer directly or indirectly."

We are sure that Congress did not intend to approve unionization of management when it passed the act.

The results if applied throughout industry would be bad for the mangement groups involved, bad for industry, bad for labor, bad for America.

BAD FOR FOREMEN

We think it would be bad for foremen if American industry should be compelled to make a change in its proven type of organization, which would unavoidably reduce the foreman's status, diminish his responsibility, authority and influence, decrease his opportunities for personal advancement.

In General Motors, foremen have always had important responsibilities and authority.

We have always guarded the status of our foremen, and have provided special training to improve their abilities, increase their efficiency and enhance their opportunities

for promotion to even more important management positions. The great majority of General Motors' principal executives at one time were foremen.

We are convinced that it would be impossible for a foreman to follow both management and union leaderships at the same time, and under those conditions to carry on all his duties as they now exist. All elements of management must have a common objective.

It would obviously be impossible, for instance, for him as a fellow unionist with those under him, to perform his functions which relate to their working conditions, wages, promotions, and assignments on the unbiased basis which is essential to good management.

BAD FOR INDUSTRY

From our experience both before and during the war, we are certain that the accepted American method of spreading managerial authority and responsibility among foremen—so that management is in close, direct contact with comparatively small groups of workmen—is the best and only sound method of handling day-to-day relations with the thousands of employees engaged in modern mass production.

Anything which would require a change in this set-up would interfere with employer-employee relations and with production.

For example, there have been many strikes in war-production plants, particularly in Michigan. Charges have been made that workmen have been loafing in plants engaged in war production and that they are being paid high wages for not working. We are conscious that the public feels that there must be something wrong. The attempt to tear down the position and authority of foremen and to unionize members of management is importantly contributing to this condition.

BAD FOR LABOR

As a matter of fact, the close-contact method is about the only way that management and labor can work harmoniously together in large organizations.

Much is said these days about cooperation. It would be a serious handicap to any hopes for teamwork and the pursuit of common interests, if anything were done to remove this facility for knowing and understanding each other.

It is our firm, sincere belief that loss of this close contact would make harmonious relations between management and labor almost impossible and would interfere with practical collective bargaining.

BAD FOR AMERICA

The removal of foremen from their present position as a vital, integral part of management would require reorganization of factory management on a basis far more complicated and decidedly less effective. Necessary factory discipline would suffer, worker efficiency would be impaired.

We believe the effect on you—on the public as a whole—would be very real.

It would interfere with the war effort.

It would make war materials cost more.

It would slow up post-war reconversion to civilian production.

It would delay adequate post-war output of cars, refrigerators, ranges, furniture—all the things people need so much and have waited for so long.

Finally—and, in the long run, perhaps most important of all—it would so increase production costs as to boost prices and the cost of living and make the problem of reasonably full employment much more difficult.

ACTION CALLED FOR

When people have as deep a conviction about anything as we have about unionizing management they ought to do something about it.

If the meaning of the National Labor Relations Act can be so confused as to promote unionization of management—and thus impair the effectiveness of the American production system of which are all so proud—then the meaning ought to be cleared up.

General Motors believes—and hopes others will feel the same—that it is a patriotic duty, a duty to the foremen, to industry, to labor, and to the public as a whole—to oppose the unionization of management by every proper and lawful means.

That is our intention.

THE POSITION OF FOREMEN IN GENERAL MOTORS

In General Motors foremen are the managers of their departments. They participate in establishing management policies in both production and personnel matters. They have full authority to approve or disapprove the hiring, to supervise the work, and to make work assignments of the employees under their supervision. They initiate wage increases, transfers, and promotions. They are directly responsible for the efficiency and safety of their group. They have full authority when necessary to take immediate, appropriate disciplinary action for violation of shop rules and other improper conduct of their employees. They are the first point of management contact and make the first management decision on all matters relating to the employees under their direction.

Tribute to Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. EDWIN C. JOHNSON

OF COLORADO

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. JOHNSON of Colorado. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a very able address by a distinguished citizen of Colorado, Mr. W. W. Grant, at a memorial service for the late President held by the Denver Chamber of Commerce on April 13.

I commend this address to all who would appraise the tremendous contribution President Roosevelt made to world history.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

We gather today to lay a wreath on the tomb of Franklin Roosevelt. Not for his sake—we can do nothing for him—but for ours. He has gone the way of all the earth.

The ungenerous and the mean-spirited will rejoice, but those who have hoped for a better world with good will toward men know that a great man and a great leader has gone.

It is impossible at this time properly to appraise the significance of President Roosevelt's contributions to his country. His friends are too ardent—they praise his mistakes equally with his accomplishments. His enemies are too bitter—they damn the good he has done indiscriminately with the bad.

He is entitled to praise. He is entitled to blame. Above all he is entitled to that justice which fair-minded men will not withhold from the dead. And justice is the most difficult thing in the world to define and to administer because it differs not only in every case, but in each case with every varying circumstance. The President leaves behind the friends and enemies a strong character always begets.

I think of him it can be said that he typified Bagehot's definition of a successful and popular leader—an uncommon man with an understanding of common ideas.

Courage was his outstanding quality. He was a stubborn and resourceful fighter, not only against the ravages of disease but in the political arena. He comprehended and confronted new ideas without fear. His actions and speeches indicate that when he spoke of "freedom from fear" he was dealing with something in his own experience—a personal victory. He realized and acted on the realization that a new world—social and economic—was in the making; that the good old days were gone forever; and that the era of the 1920's was one with Nineveh and Tyre.

He knew we lived in a world in which everything is global; in which war is no longer sectional or private; a world in which all the nations, crowded into next-door neighborhood, must live in peace or perish; a world so small that a conflict in a little insignificant country on the other side of the planet can give rise to a chain of circumstances that will put your boy into the cockpit of a bomber or destroyer on any one of the seven seas, or in a grave under alien skies.

The mourning for him is as wide as the world he sought to draw together. Last night this was heard in a Brazilian broadcast: "Only the combined effort of all men for the common good can meet this irreparable loss."

It is true that a prophet is not without honor save in his own country and by his own fireside. That means a sense of perspective is denied to those who are too close to either a man or an occurrence. The same people who admire Churchill and dislike President Roosevelt would, if they were English, have the reverse opinion—they would praise Roosevelt and damn Churchill.

The farsighted leader justifies the future by the past. From the past he knows that nothing is constant except change and that the line or trend of change can be apprehended. For instance, only next August will the United States have been a Nation as long as it previously was a collection of colonies. The time is now almost here when in the evolution of history the United States will definitely enter on its next stage of development, which is that of one of two or three of the greatest powers in a shrinking world.

How long it will be until we have a single world government I do not know, but it approaches. One hundred years in the life of a nation or of the world is as nothing compared to a year in our individual lives.

All these things Franklin Roosevelt knew. Opposition to him was not based on the fact that he did not see, but that his approach and his methods were unconventional and that precedents were to him of comparative unimportance. When the time came to change, he changed. Many of his followers did not. That is why many New Dealers from the early days of his administration are today stranded on the sandbars of what was new and necessary in 1932, but is now outmoded and inappropriate to the changing present.

The President was not a magnanimous foe. He was tough and skillful in controversy and he understood the signs of the times better than most. That is why he had the hearts of the average people. And they constitute the vast majority in a democracy. When they vote, they rule. And they voted consistently for him.

A conservative friend of mine said a number of years ago that President Roosevelt understood more about the salvation of all of private enterprises that could be saved than any of his opponents, and he knew better how to save it.

What I am afraid of is that private enterprise has been given so much rope it may hang itself—that in its eagerness to vindicate itself it has undertaken too much. After the war it has tacitly promised to furnish fifty-five to sixty million jobs more or less. It cannot do it. It is inevitable that the Government will have to furnish ten to fifteen million. Thus, when the Government steps in, it will be in response to public demand and not as an interference with business. The President was always astute in laying the groundwork for what he foresaw as necessary or inevitable.

I think after the war people are going to demand more from life than ever before. And they are going to get it. They are going to get it because they have the votes. All this the President knew. He—the uncommon man with the common ideas. He was the symbol to the common man of what he called the more abundant life.

He was a superrealist and consequently a superpolitician. If, as Von Clausewitz said, war is merely the extension of politics into the physical realm, it accounts to a considerable extent for the President's success in carrying on the war and for his judgment of generals and admirals.

That he was a good family man everybody knows, and his sons have not shirked their individual responsibilities in this war but have done as have millions of others. His wife's telegrams to them on their father's death are models of their kind.

Franklin Roosevelt was the greatest and most astute politician this country has ever seen. His policies, both foreign and domestic, were broad in conception and daring in scope and execution. The objections to them were not so much to their merits as to methods of administration. For instance, the United States comprises at least six different geographical and economic regions. No over-all, uniform system of regulation can possibly fit them all. Genuine success in administration depends on adaptation to the particular region. The O. P. A. is a daily recurring illustration that a Government regulation is not the equivalent of judgment though the thing is good in itself.

It is my own personal opinion that Franklin Roosevelt carried the United States through a revolution which, if it had not been expressed in laws, might have been expressed in violence. It was a civilized way of handling necessary, inevitable, and radical change.

The one thing he has lived for during the last 6 years has been an international order to settle international controversies by peaceful means. To that purpose he has bent every energy; and it can be truthfully said that he died for it. The mistakes of Woodrow Wilson he has avoided. Congress is in on the ground floor and both parties are represented. The job is being done about as well as it could be. It will cost something, but war costs more. That is the alternative which he completely understood.

His death, instead of setting the movement for an international order back, will give it added impetus. The personal hostilities he aroused in Congress now have nothing to feed on. As Ruskin said:

"Man cannot benefit those that are with them as they can benefit those that come after them; and of all the pulpits from which the human voice is ever sent forth, there is none that reaches so far as from the grave."

President Roosevelt is the last of the two greatest American proponents and champions of the obvious fact that the world is one. The other was Wendell Willkie. They both knew that though there was ample assurance from practical people that an international order was impracticable if not impossible, they nevertheless were also aware of the fact that the present short range of rocket bombs would be corrected—on the authority of our Ordnance Department; and they both knew that the common sense of the American people would come to the obvious and correct conclusion in spite of the so-called practical people.

With all his human frailties and shortcomings, the President loved democracy and believed in God and leaned on Him. He took the longest step toward a world of truth, unity, and concord that any American has ever taken.

If it is true that every generation makes some contribution to its country, then future ages may judge that our generation deserves well because it first made world peace possible. If that is so, the name of Franklin Roosevelt, for that reason alone, will go down in history as one of the great ones of the earth.

As the French poet said:

"For blessed are those who died for carnal earth
Provided it was a just war.
Blessed are those who died in a final high place
Amid all the pomp of grandiose funerals.

"Blessed are those who die, for they have returned
Into primeval clay and primeval earth
Blessed are those who died in a just cause."

May his vision of world order and peace come true.

May he rest in peace.

May God sustain his successor.

The San Francisco Conference

EXTENSION OF REMARKS

OF

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. JAMES J. DELANEY. Mr. Speaker, the San Francisco Conference opens this afternoon. The delegates of our country who will attend the conference have had no expression of policy from the Congress concerning any territories, islands, or other lands recently acquired by our Government through conquest in the far Pacific. I feel that it is the duty of the Congress at this time to take a definite stand by expressing its sentiments as to the manner in which these islands, territories, and lands will be held and administered. This must be in keeping with an established policy, which should be adopted by the delegates of the San Francisco Conference. We do not seek to dominate any nation; nor do we seek territorial expansion. However, the overwhelming public opinion in the United States favors the retention, to some degree, of control over the islands and other lands so acquired. Many plans have been devised. Up to the present time, a trusteeship has been the most acceptable, but opposition to this proposed form is rapidly gaining momentum. This dilemma can be overcome by adopting a concept which would be somewhat analogous to the British Commonwealth of Nations. Of course, the problems that would have to be met and overcome in the proposed American commonwealth of nations, which is embodied in the resolution I have introduced today, would be quite different from those which the British Commonwealth of Nations are attempting to work out.

The American commonwealth would include all lands, territories and other lands now occupied or hereafter acquired by the United States, whether in the Atlantic or the Pacific oceans. This concept would be flexible enough to allow complete local autonomy and at the same time provide adequate national defense for both the United States and all other members of the proposed American commonwealth of nations. Such a concept would be broad enough to include the Philippine Islands.

This idea would be dynamic enough to take care of all future acquisitions and at the same time, flexible enough to allow full self-government to all of the lands and territories embraced within it. The inhabitants of these territories are entitled to rule themselves as they see fit, but we cannot allow them to be at the mercy of any nation, or group of nations, seeking expansion. As a practical matter, we are bound to protect and defend them against any aggressor. Therefore, a definite policy must be established immediately. It must be clear, emphatic, just and with sufficient flexibility to insure the fullest autonomy consistent with the common defense.

I ask that all the Members of this House acquaint themselves with the provisions of the resolution I have introduced today calling for the establishment of an American commonwealth of nations and hope for their earnest support.

Ernie Pyle

EXTENSION OF REMARKS

OF

HON. DENNIS CHAVEZ

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Tuesday, April 24 (legislative day of Monday, April 16), 1945

Mr. CHAVEZ. Mr. President, Miss Dolores Espinosa, a senior in the Immaculata Seminary, has penned some very beautiful words on the death of Ernie Pyle, and I ask unanimous consent that they be inserted in the Appendix of the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

ERNIE PYLE

A mountain rose from out the ocean floor,
Its sides were shattered by the mortar's roar;
A small craft hurried in, on duty bent,
The man who told the tale, we now lament.
The beach was reached, and then, a landing made;
The small form, with his buddies, unafraid,
Was stilled forever, sharing common fate;
The story teller joined the Nation's great.

—*Dolores Espinosa.*

APRIL 23, 1945.

Appeal in Behalf of Central European Nations

EXTENSION OF REMARKS

OF

HON. THOMAS S. GORDON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GORDON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a resolution adopted by the Central European Federal Club of London, England, appealing in behalf of the central European nations.

CENTRAL EUROPEAN FEDERAL CLUB,
London, March 1945.

Members of the following nations: Austrians, Croats, Czechs, Estonians, Hungarians, Latvians, Lithuanians, Poles, Serbs, Slovaks, Slovenes, Ukrainians, and White Ruthenians, having met at the Central European Federal Club in London, and having discussed the present circumstances of their conationals in their home countries, decided to address themselves to all men of good will with the following appeal:

In flagrant violation of the Christian principle which places right before might, the leaders of present-day Germany embarked on a policy of brutal force to establish their domination and to impose on mankind their pagan philosophy. Almost the entire world has risen in arms to face this monstrous challenge. Poland was the first nation to take up arms in defense against the aggressor. Other nations followed.

While the conflagration was still spreading, in 1941, the Atlantic Charter, a message of good will, reached the stricken nations and filled their hearts with hope for a better future. Millions of human beings saw in that document the firm resolve and the solemn promise to restore justice on earth. The new charter proclaimed the Christian moral principle of right before might as the fundamental rule for international relations and national affairs. In 1942, 26 Allied Governments affixed their signatures to this document. By this endorsement the good auspices for the realization of the noble principle gained further strength.

Today, however, as the terrible war is nearing its closing stage in Europe, it becomes more and more apparent that the high ideals of human freedom and true democracy are not being put into practice.

The democracies drew the sword in defence of the freedom and integrity of Poland. Today the decisions of the Crimea Conference seem to aim at the partition of Poland along lines similar to those of the Russo-German Agreement of 1939, which filled the world with disgust and despondency. These decisions propose to establish a government against the will of the peoples of Poland and without the participation of her constitutional leaders.

A few years ago a wave of indignation swept the democratic countries when the free and independent states of Estonia, Latvia, Lithuania, and Finland fell victims of aggression. Today, however, little or nothing is heard of their plight. When the peoples of Yugoslavia rose in arms against the aggressors the whole world admired their heroism. Today, as a reward for their endurance and sufferings, the Serb, Slovene, and Croat nations are being put at the mercy of a Communist dictatorship.

We mention Poland in the first place because hers is a test case. If Poland were deprived of real freedom and independence, all the other countries of central Europe would be faced with similar circumstances and subject to similar treatment. It would be tragic if entire nations or national groups were to be incorporated into state organizations which they would never join voluntarily; if they would have to accept governments imposed upon them from outside without the slightest regard to the wishes of the peoples concerned.

Furthermore, governments are being set up pretending to command the confidence, approval, and support of the people by virtue of their composition. In actual fact, however, they are composed in the first place of agents of the occupying power; secondly, of individuals tolerated by that power; and in the third instance only, of persons forced into office and compelled to carry out their functions under the threat of death to themselves or their families.

The decisions of the Crimea Conference, it appears, have created conditions the fulfilment of which would be tantamount to a total surrender of more than 12 central European nations to the Soviet Union and their enforced submission to any arbitrary dictation the U. S. S. R. may be desirous to impose. These nations would thus be placed at the mercy of another totalitarian dictatorship whose regime is in irreconciliable contradiction to the laws, ethics, religion, customs, social and economic structure and historical tradition generally recognized and honored in the civilized world.

The decisions of the Crimea Conference are causing deep consternation and anxiety to millions of men and women in Europe. The Continent is, in fact, confronted with developments for which there exists no precedent in history.

This plain statement is no exaggeration and no propaganda. On the contrary, propaganda is aiming at concealing or tarnishing the truth but is unable to put it out of existence. The world must awake to the reality of the situation and recognize that it is essential to guarantee equal freedom and independence to all nations situated between Germany and Russia. Liberated countries cannot remain under the exclusive control of one occupying power, and it is essential for all of them that they should be enabled to develop those vital links between their nations which are indispensable for their peaceful progress and prosperity.

In the reconstruction of Europe after the end of hostilities two periods are, in general, recognizable. In the first, the repatriation of all displaced people, restoration of their properties and reorganization of the civil administration will have to be carried out. In the second period a census will have to be taken for the control of electoral rights, the organization of constituencies and elections to be held for the establishment of democratic governments.

It is easy to hold elections in countries like, e. g., Great Britain or the United States, where the political machinery is intact and where there still exists a measure of political stability. Not so on the Continent, where the machinery for the elections has been wrecked in most countries and no political stability exists today. Hastily carried out elections would only lead to bogus democracies. People pressing for such are only looking for opportunities to fish in troubled waters.

During both periods of reconstruction inter-Allied military governments composed of representatives of the great powers should be set up for joint control. These should only be withdrawn when the political and economic consolidation of the countries concerned is finally secured. Germany and all territories between pre-1938 Germany and pre-1938 Soviet Russia should thus be occupied and no change should be imposed on the inhabitants without their freely expressed will.

In this tragic hour we are approaching all men of good will, all Christian citizens of the world with the urgent plea not to permit the extinction of Christian civilization in the homelands of more than 100,000,000 Europeans.

We submit as immediate measures to be taken:

Cessation of all political persecution such as executions, imprisonment, deportation, and conscription into the so-called national armies of the countries concerned;

Release from imprisonment and places of deportation of all persons, first of all women and children, and granting without delay of all facilities for their return to their homes;

Admission of the International Red Cross and other charitable and religious organizations which would bring help, relief, and consolation to the tortured and starving populations, in the territories occupied by Soviet forces;

Admission to those territories of the representatives of the free press of the democratic countries who should be allowed to work there without the interference of political censorship.

We address ourselves to the conscience of the world. Our kinsmen are being decimated by firing squads, our nations faced with slavery, starvation, death, and extinction. It should not be permitted that this war, fought for the victory of Christian principles and ideals shall be fought in vain. Evil shall not triumph over virtue, might over right.

We pray to the Almighty that He may open the eyes of mankind and enlighten its leaders in securing aid and support for our righteous cause which is also the cause of the whole world.

On behalf of the representatives of the above-mentioned nations.

The Presidium of the Central European Federal Club in London: Peter Pridavok, president; Stefan Pomian, honorary secretary; Jozef Godlewski, senator of the Republic of Poland; Stanislaw Jozwiak, member of the Parliament of the Republic of Poland; Dr. Karel Locher; Gen. Lev Prchala, D. S. O.; Prof. Tadeusz Sulimirski.

Other signatures are affixed to the original of this document preserved in the files of the Central European Federal Club.

What Should Be the Postwar Policy of the United States

EXTENSION OF REMARKS

OF

HON. CHARLES M. LaFOLLETTE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. LaFOLLETTE. Mr. Speaker, those of us who have sponsored House Congressional Resolutions 21, 22, and 23 calling for a world security organization to be set up in support of the moral law and the pattern for peace outlined by the three great creeds in America—Catholic, Protestant, and Jewish—have occasion to be heartened by the news which appeared in the press today indicating that four of the great powers who are sponsoring the meeting in San Francisco—the United States, Great Britain, Russia, and China—have agreed to accept the Chinese plan for a world rule by law.

In the light of these developments, it does not seem wholly inappropriate that I extend into the RECORD a speech which I made on March 29, 1945, at Indianapolis, Ind., before the Indiana Committee for Victory, which treats with certain aspects of this question of rule by law, and particularly with reference to the advantages to be attained by requiring compulsory submission of all disputes to the International World Court, notwithstanding the fact that the world has not reached the point where it is yet willing to accept the theory of compulsory enforcement of the decisions.

The speech follows:

The subject of this meeting, What Should Be the Postwar Policy of the United States? as far as I am concerned, requires a definition by me of one of its terms, namely, the term "postwar." As far as I am concerned, the term "postwar" means all of the future which lies before the United States after the defeat of both of our enemies. It certainly cannot refer to some limited period of 6 months or a year after the termination of this conflict.

I insist upon this definition for the reason that a foreign policy, just like a domestic policy, to be effective must be a dynamic and growing thing if it is to have any force or value. I insist upon this definition, first, because I believe the United States must live in a world in which there is an organization for international cooperation, of which the United States is a part.

I want to further clarify the position I have just stated by pointing out that those who would tell the people that the mere creation of an international organization will guarantee peace are guilty of an over-statement which will do the cause of international cooperation great harm. On the other hand, our experiences in this war, which followed the last war by but 25 years, does justify me in saying that it has been demonstrated pragmatically that if there is no world organization of which we are a part, we will most certainly be involved in another war and that in a relatively short time. Our attempt for 25 years to segregate ourselves from world affairs and by that method to attempt to immunize ourselves from world problems has been demonstrated to be a failure, not by words, but by the fact that we are presently, today, fighting on more fronts and in more parts of the globe than we ever dreamed we would fight upon in the so-called World War No. 1 of 1914–18. Therefore, the need of an international organization and the necessity for the United States to join that organization is firmly established by the scientific method of trial and error, which all of the so-called realists of the world have approved where that method has been applied in the realm of exact science dealing with material things. It seems to me that this proposition needs no further discussion.

I do feel, however, that there is present in America a misunderstanding which greatly endangers the hope of future generations for permanent peace through the advance of the judicial order into the world and that that feeling arises out of an attempt of some to present the Dumbarton Oaks proposals and the results of the Yalta Conference as the last word in international cooperation, and that once these proposals become a reality and the Government of the United States becomes a member of the organization which is brought to completion at San Francisco on April 25, that then nothing more need ever be said and done upon the subject of international cooperation, and that we can all sit back and expect peace to arise because perfection has been reached. This is not true. Those who advocate it apparently advocate it because they do not trust the American people or because they feel that those of us who feel that the organization is by no ways perfect, that it does not establish the juridical order in the world, will destroy the chances of our joining any organization by stressing too much the imperfections and limitations which are inherent in the present proposals.

As far as I am concerned, the fears of those who are attempting to sell the present proposals as the ultimate in international cooperation are based upon a lack of confidence in the American people and a consequent fear that they will be carried away by the arguments of perfectionists. I have more confidence than that in the American people. But, on the other hand, I feel that it is my duty to point out that, while the Dumbarton Oaks proposals and the pronouncements as to voting procedure which came out of the Yalta Conference are sufficient as an initial step to justify our adherence to them; that they are not perfection; and that certain modifications of these proposals should be urged by the American delegates to the San Francisco Conference to the full extent of their ability, at the same time admitting the necessity of accepting the plan as presently proposed only after it is clearly demonstrated that the extensions or modifications or changes in it, as proposed by the American delegates, because of the present state of enlightenment among world powers, can not be immediately accepted.

As far as I am concerned, Dumbarton Oaks and the Yalta Conference are but a stepping stone toward the creation of a perfected world organization calculated to produce peace with justice; an ultimate organization, free from the danger that power will be exercised without regard to justice, which condition must be the ultimate aim of mankind and without which there can be no permanent peace in the world.

In the first place, the Dumbarton Oaks proposals create a confederacy of sovereign states and not a federation of states having a higher degree of sovereignty over questions involving the international world order. These proposals, therefore, are quite comparable to the proposals found originally in the Articles of Confederation adopted by the Thirteen pre-Revolutionary War States in 1778. The experiences of those States, operating under those articles for 9 years, demonstrated to them the necessity of establishing a federation of States and the calling of the convention which led to the drafting of the Constitution of the United States in 1787. The development of our Government thus demonstrates that perfection in government must, of necessity, be a matter of evolution, and this historical fact alone is the justification for our adherence to a world organization built upon the present Dumbarton Oaks proposals and the proposals arising out of the Yalta Conference with reference to the voting procedures.

The present proposals do not deprive the United States, or any member of the organization, and particularly any of the permanent members of the Council, of any part of their present sovereignty, because, under the veto powers which were created at Yalta, the provisions of chapter 8, section B, which have to do with the enforcement provisions of the charter, cannot be brought to play against any permanent member of the Council without its consent. Nor, indeed, can they be brought into play against any power without the consent of each of the five members of the Council. This being true, there are no grounds whatsoever for saying that the United States is bound by the present proposals, against its will, to use any part of its armed forces to suppress any uprising anywhere in the world or to police any part of the world.

When this proposition is clearly understood it seems to me that even the most violent prewar isolationist must be satisfied and his fear of surrender of sovereignty forever removed. If he is intellectually honest, he must find new arguments against the proposals and forever cast into discard those based upon loss of sovereignty which he had previously expounded and relied upon.

As I stated previously, I am willing to accept these proposals as a minimum, but only on the condition that the people shall be told that this is but a stepping stone toward the elimination of war through the extension of the juridical order into the world; and further on the condition that I may urge certain modifications now with the hope that if they strike a responsive chord in the American people, that they be advanced by our delegates at San Francisco seriously, honestly, and courageously, not for the purpose of preventing the formation of a world organization but for the purpose of bringing into being at this time, as an initial stepping stone, the most perfect organization which can be perfected, having regard to the present capacity of the world for international cooperation.

Basically, I believe that the chances for permanent peace in the world cannot be brought about until the world accepts the moral law and the juridicial order as the basis for world cooperation and world government. I believe firmly in the seven principles enunciated in the Pattern for Peace contained in the Catholic, Jewish, and Protestant declarations on world peace, signed by the leaders of those faiths and presented to America and to the world on October 7, 1943. Because of that belief, on January 17, 1945, together with Congressmen FEIGHAN and WEISS, I introduced House Concurrent Resolution 22, which embodied these principles. I feel that the cornerstone of the juridicial order should be an international court of justice and not an international political organization. Therefore, I believe that the San Francisco Conference should produce a charter which has within it a requirement for a compulsory submission of all disputes which cannot be otherwise settled and that this compulsory submission should be binding upon members of the permanent Council as well as all other members of the organization. As I shall presently develop, I do not ask for compulsory enforcement by the security councils of the judicial opinions rendered by the court upon the disputes over which it is given compulsory jurisdiction.

I find justification for my proposals of compulsory submission of all disputes in principle number five of the "Pattern for Peace" which reads as follows:

"INTERNATIONAL INSTITUTIONS TO MAINTAIN PEACE WITH JUSTICE MUST BE ORGANIZED

"5. An enduring peace requires the organization of international institutions which will develop a body of international law; guarantee the faithful fulfillment of international obligations, and revise them when necessary; assure collective security by drastic limitation, and continuing control of armaments, compulsory arbitration and adjudication of controversies, and the use when necessary of adequate sanctions to enforce the law."

It happens that I believe that the ills of any society, from the family up through an international society, cannot be cured by a declaration of principles or the mere adoption of resolutions announcing principles. It happens that I believe that if a person is to make a contribution to society, he must do more than declare principles or participate with others in the adoption of resolutions. He must then offer and act upon concrete, specific proposals, calculated to carry out and to make effective in the world, the principles and propositions in which he claims to have a belief. He must do this, even though by acting he brings himself onto the field of battle and into the public arena, where his specific proposals may be rejected, and rejected even by those who

have heretofore been satisfied to pass resolutions upon a subject, but have secretely been unwilling to take any action or to run the risk of public disfavor by proposing any action calculated to make effective the principles which he has proposed.

It is my belief that if we are to extend the juridical order into the world, we must dramatize and call to the attention of the peoples of the world the limitations in the law necessary for the government of a world society. And, even before the peoples of the earth can accept a world-wide set of moral principles, they must further understand and have brought to their attention the fact that there is very little law in the world to govern the interrelations of nations or international law. I therefore believe that the very fact that there is presently, today, a most imperfect body of law governing international relations cannot be logically used as an objection to the establishment of compulsory jurisdiction in the proposed international court of justice, but that this very imperfection, in a sense, will never be cured unless the imperfection is brought to the attention of the peoples of the various nations of the earth through the medium of a series of decisions of a world court in which the court recites that it cannot adjudicate a dispute because there is no existing international law or existing principles of law governing the interrelations of nations upon which it can act. I have sufficient faith in the integrity of the jurists who would administer an international court to believe that they would not attempt to extend international law by declaring principles were nonexistent, which would be judicial legislation, which every student of the juridical system denounces; but that, to the contrary, the jurists of this court, if given compulsory jurisdiction over all disputes which cannot be settled by arbitration or conciliation, or in any other peaceful manner, would hand down an opinion that they could not settle the dispute as a court because there was no existing law applicable to the dispute; and this fact alone would force the rulers and representatives of the nations of the world to satisfy an aroused people by making an initial attempt, at least, to create—by legislative action, if necessary—a rule of international law to govern disputes whose constant cropping up would, of itself, evidence the need for law in that particular field of international relations.

I wish to point out further to those who say that this would permit the court to hand down rulings in cases where there was no law, that such an argument is a perversion of the philosophy of law as it has always been understood when applied within nations. Hans Kelsen, a distinguished student of international law who was Oliver Wendell Holmes' lecturer at Harvard in 1940 and 1941, in his most recent work, Peace Through Law, published in 1944, pointed this out very clearly when he said:

"A positive legal order can always be applied to any conflict whatsoever. Only two cases are possible, either the legal order contains a rule obliging one party to behave as the other party demands, or the legal order contains no such rule. In the first case, application of the legal order to the conflict has the effect of admitting the claim; in the second case, the application of the legal order has the effect of rejecting the claim."

It follows, therefore, that those who fear that compulsory adjudication of unsettled international disputes by an international court would result in the parties being subject to a decision affecting a controversy as to which there is presently no rule of international law, results from a misunderstanding of the nature of rule by law.

One great advantage to be gained, therefore, from compulsory adjudication of international disputes is that which I have advocated, namely, that the inadequacy of international law and the vast fields which it does not cover will be accentuated and called to the attention of peoples and rulers of peoples to a greater degree than it has ever been called to their attention before, and thereby the need for the creation of a greatly expanded body of international law will be definitely delineated. I know of no way by which the extension of the juridical order into the world can be accelerated than by the time-honored method of demonstrating the lack of a body of law upon which it must exist, so that from the deficiency thus demonstrated there will arise in the world a demand for the elimination of this deficiency.

The compulsory submission of disputes to the international court would also assist in removing the coat of hypocrisy which, in the past, too often has been used as a cloak to cover a sham claim that a political, and, therefore, nonjusticiable, issue was involved between nations, whereas the actual issue was a legal one covered by the law of nations. The Italian aggression against Abyssinia is one of the most striking examples in relatively recent years of the use of this method and of the danger to world peace inherent in the use of this dishonorable and dishonored device.

A provision for compulsory adjudication of international disputes is also the only method that I can see by which any of the five great powers which are to have permanent seats on the World Council can have disputes involving them subject, at least, to the weight of world public opinion against any of them whose claim against any other member of the world organization—large or small—is not, in reality, founded upon justice or honor. Under the Dumbarton Oaks proposals as they now exist, together with the Yalta formula for voting, this is the only effect which a requirement for compulsory adjudication of international disputes could have upon any of the Big Five or any member of the family of nations.

In order to allay the suspicions or the fears of those who would claim that this country would be subject to anything else except to this public opinion, under the proposition which I am advancing, I shall conclude my present treatment of this subject with an analysis of chapter VIII of the Dumbarton Oaks proposals and the effect of the Yalta Conference agreement as to voting upon it.

Chapter VIII of the Dumbarton Oaks proposals deals with the arrangements for the maintenance of international peace and security, including the prevention and suppression of aggression. Section A deals with the subject of specific settlements of disputes; section B deals with the question of determining whether threats to the peace or acts of aggression exist, and if they do, the action to be taken under the charter with respect thereto; section C has to do with regional arrangements, and while the second sentence of paragraph 1 of section C is covered by the Yalta agreement, my observations upon section A will dispose of my thinking upon section C without requiring specific reference thereto.

The Dumbarton Oaks proposals contemplate a security council consisting of five permanent members: the United States, Russia, Great Britain, China, and ultimately France; and six nonpermanent members. The conferees at Dumbarton Oaks left the method of voting in the council open because they could not reach an agreement. At Yalta the representatives of the United States, Russia, and Great Britain reached an agreement as to voting procedures which is to be submitted to the San Francisco Conference. Under the agreement, each member of the Council, permanent or nonpermanent, or, as I shall hereinafter respectively refer to them, large and small powers, shall have one vote; on all matters other than those set out in subsection A of chapter VIII and in the second sentence of paragraph 1 of section C of that chapter, decisions must be made by the affirmative vote of seven members, including the concurring or affirmative vote of each of the five large powers. This arrangement applies to all decisions for the use of force contained in section B of chapter VIII and its effect is to give a veto against the use of power against itself to each of the five large powers. In other words, under this arrangement, the United States could prevent the use of international force and any action by the military staff of the world organization against itself by the simple process of refusing to vote for the use of such force against itself. Or, more than that, it could prevent the use of international force against any other powers, large or small, by the simple procedure of voting against the use of such force—this is the reason why I stated earlier that even the most violent isolationist should be satisfied with the proposals as they now exist, for the reason that our Nation cannot be forced either to use its own force or to permit the force of any other nations to be used, for policing the world in any case where it is felt that the dispute involved did not justify the use of sanctions, force, or intervention, either by itself or by the joint military power of the four other great powers. The United States also, by its own action could prevent the use of such power against itself. Certainly there can be no loss of sovereignty involved in such arrangements, particularly so far as any of the five large powers are concerned.

It might be expected that with reference to the use of all persuasive means short of force, which are provided for under section A of chapter VIII, that the Council could act without a too strenuous veto upon this power, because such a veto might readily be used to prevent even the moral persuasion involved in an aroused world-wide public opinion from being brought to bear upon an aggressive power through the simple expediency of refusing to permit a dispute which any permanent member of the Council wished to hush up, from being investigated or settled by peaceful means. This condition exists under the present status for the reason, that although any member of the Security Council involved in a dispute is required to abstain from voting, still any one of the remaining three or four large powers—assuming that the dispute was either between two large powers or between a large power and a small one—could prevent any action being taken under section A by the simple device of refusing to concur. This is true because the Yalta voting agreement still requires the concurring vote of all of the noninvolved large powers before any of the instrumentalities for peaceful settlement provided for in section A can be invoked.

Under the Dumbarton Oaks procedures and the Yalta agreement for voting, there is no arrangement by which the Council can be required to order all disputes submitted to the International World Court. Yet, the whole purpose of an organization to preserve the peace should be centered, as much as possible, in making the peaceful means effective, so that the use of force should be resolved into a position of last resort, rather than accentuated as it is presently. I propose that the Dumbarton Oaks and the Yalta proposals with reference to voting be amended to require mandatory submission to the International Court of all disputes which are not settled by any of the other means outlined in paragraph 3 of section A of chapter VIII. I also propose that as to this mandatory power, there be no veto by a large power, either directly or indirectly, and that no member or members of the Council, either large or small, who are parties to a dispute be permitted to vote on this question.

As against those who would say that a dispute endangering world peace should not be permitted to pend before the court for a

decision and thus become so magnified as to endanger world peace, I am further of the opinion that the Council should have the right to exercise the power vested in it under section B of chapter VIII before, concurrent with, or after it ordered submission of the disputes to the international court. In either of these events, the security council, by exercising its powers under section B would be merely occupying a position comparable to that of a policeman who holds the parties to a dispute by the arm to prevent them from harming each other or endangering the community, at the same time taking them before the court and requiring them to submit their cause to the magistrate for decision.

Any action taken by the Council under section B would not constitute an execution of a judgment of the court, because I do not propose to disturb this power in any respect whatsoever. We, therefore, do not have a situation presented where the Security Council would attempt to enforce an order of the court in cases where international law did not apply. The action of the Security Council under the present state of world enlightenment is called into being without regard to the legal rights of the parties. It therefore does not constitute an enforcement of the court's decisions. Nor do I propose a mandatory enforcement of the decisions. But, a decision coming after action under section B would again have the salutary effect of pointing up any deficiency in international law as it now exists. This is one of the fundamental purposes behind the whole proposal to require a mandatory submission of cases to the international court.

I think the effects which can be expected from conferring mandatory jurisdiction upon the international court can be summarized as follows:

First. A mandatory submission to the jurisdiction of the court is all that is asked. We do not propose or suggest, at this stage of the development of international law, that there shall be a mandatory enforcement of the court's decision.

Second. It is the most effective way to force the development of international law by demonstrating, through the court's decisions, the present inadequacy of that law.

Third. A mere novice in the realm of international relations understands the danger to world peace involved in the present distinction between legal or justiciable and political or nonjustificiable disputes. He is also aware of the fact that in the absence of mandatory submission of causes to an international court, many dishonorable and warlike acts, which were, in fact, legal and justiciable, have been hidden behind the hypocritical mask or a professed indignity to national honor or some other form of falsely presented so-called political issue, which the parties refused to submit for adjudication Mandatory adjudication, if it did nothing else, would tear away this mask and make ineffective one of the devices by which the peace of the world has been repeatedly upset.

Fourth. It is the only effective way to bring the weight of world public opinion into action against the five great powers and it is the only procedure by which an abuse of power by them can be subject to any deterrent, either peaceful or forceful.

We are told, and we want to believe, that this power can be granted to the five great powers because they are peace-loving nations. If they are peace-loving nations, then they will not be afraid to submit their action to the decisions of an international court to be vindicated in the eyes of the world. As far as the United States is concerned, I have sufficient confidence that we shall continue in the future to be a peace-loving nation, willing to submit our actions to such an impartial tribunal in order that they may be vindicated before the peoples of the earth. It does not seem too much to ask of the other four great powers that they shall be willing to support this proposal as evidence of their own future intentions.

A critical analysis therefore of the situation which confronts the nations of the world as they face the San Francisco Conference no method better calculated to advance international law. Surely, there is no method by which the cause of peace can be better advanced than by calling into being the public opinion of the people of good will of this world—which is, and shall remain forever after, one world—than the impartial decision of jurists who hold a reputation, both national and international, for integrity and ability.

EXTENSION OF REMARKS

OF

HON. JOHN J. SPARKMAN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. SPARKMAN. Mr. Speaker, in the course of this war many things have happened to bring forcefully to the mind of our people the manner in which our communities and our people back home are so closely tied in with the success of the war. Recently two such instances have impressed me. I realize that these instances are only two among thousands but I do feel that they are typical.

In the article by the late and greatly lamented Ernie Pyle as it appeared in the Decatur (Ala.) Daily on March 30, 1945, the story was told of how one of Decatur's fine young men became an ace. That part of the article follows:

PYLE TELLS HOW ENSIGN TROUP OF DECATUR BECAME ACE

IN THE WESTERN PACIFIC.—The pilot on our carrier who shot down the first Jap plane of our trip was Ensign Frank Troup, of Decatur, Ala. It was a reconnaissance plane, and he got it the day before we got to Tokyo waters.

It was his fifth, and made him an ace. Troup said the only reason he got it was that he happened to be closer than his wingmates when they spotted it.

The boys who fly the patrols say that when they spot a single Jap plane, everybody in the patrol opens wide open, and it's just like a horse race to see who gets within shooting distance first. This time it was Troup.

Next in line to Troup was Ensign Bob Hickle, of (146 Santa Ana Street) Long Beach, Calif. That was the third time they'd been together when Troup got a plane. It had almost got to be a joke. Hickle had gradually worked into the same category as "always a bridesmaid, but never a bride."

Hickle joked, "Now that Troup has got five, he'll have to start helping me get some."

And the very next morning Hickle came back glowing. He had got his first plane. Yes; Troup was with him, but Hickle got it all by himself, without any help.

I asked Hickle how it felt, and he said that he was so anxious to get him that he almost ran into the pieces when the Jap turned over in the air and exploded.

In another item appearing in the Tri Cities Daily, Sheffield, Ala., recently, the story is told of a local paratroop officer making a broadcast just before jumping with his troops behind German lines and how in that broadcast he told of his own feeling of security because of the fact that the fighting equipment and material he was using had come from his own home and surrounding section—the aluminum in his plane from the Reynolds Metals Co., at Sheffield, and the ammunition he was using from the arsenals at Huntsville. The news item follows:

Those listening to the Army Hour Sunday afternoon heard Capt. Harry B. Rahner, son of Mrs. H. B. Rahner, 324 North Court Street, Florence, speaking from an Army transport plane carrying paratroopers behind the German lines along the Rhine. Captain Rahner, in command of the paratroopers aboard the transport, stated that neither he nor his men were afraid, for their plane was of the aluminum made by his friends at the Reynolds plant and that their ammunition was made by his friends at the Redstone arsenal, Huntsville. He spoke just before making his nineteenth jump, but it was to be his first combat take-off. Captain Rahner is an electrical engineer, having received his degree from Auburn in 1935. After his graduation, he was employed by Birmingham Electric Co. for 5 years. An officer in the Reserve, he asked to be assigned to active duty in September 1940, and in November was ordered to Fort Jackson, S. C., as a first lieutenant in the Field Artillery. He was later stationed at Fort Bragg, N. C., and Camp Blanding, Fla., and it was in October 1942, while stationed at Camp Shelby, that he volunteered for the paratroopers. He was sent to Fort Benning, Ga., where he received his wings March 13, 1943. Captain Rahner's wife, Annie Lee Livingston Rahner, is making her home with her parents in Orangeburg, S. C.

Poland

EXTENSION OF REMARKS

OF

HON. CHARLES R. CLASON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. CLASON. Mr. Speaker, on the eve of the great San Francisco Conference, the hopes of freedom-loving people everywhere are high that the decisions reached there will guarantee the political integrity of all nations, large and small, who have fought valiantly as our allies against the Nazi aggressor. A great body of American citizens are concerned that Poland be accorded fair treament in the deliberations and in the solutions of the delegates of the difficult problems which are to be solved. In this connection, I wish to insert in the RECORD, under leave to revise and extend my remarks, the following statement of the Federation of Polish Combined Clubs and Societies of Chicopee, Chicopee Falls and Willimansett, Mass. I commend its reading and careful consideration to all Members of Congress:

The decision of the Yalta Conference, with respect to Poland provoked a storm of protest and denouncement from a great mass of liberty loving people in America.

The spirit of fair play so deeply rooted in us since youth, and so typically American, cannot but be outraged at the shabby treatment accorded Poland for her valiant stand against Axis aggression, for the terrible sacrifies and horrible sufferings endured by her people because of their loyalty to the

Allied cause, as proved by German failure to find collaborationists or Quislings among them; and for the unmatched courage, loyalty, and daring of Polish soldiers and airmen in carrying on relentless warfare against the murderous invaders of their country.

Poland has earned, and rightfully deserves, a high position among the nations of the world, instead of being penalized with the loss of one-half her territory.

Both Mr. Roosevelt and Mr. Churchill spoke of compensation to Poland. Clearly, statements of this nature are admissions that a wrong has been committed, for where there is no wrong there is no need for compensation. Poland does not seek, nor does she need, compensation. All she wants is what belongs to her.

The apportionment of eastern Poland is another Munich-like compromise which cannot lead to a permanent peace. Further, it more nearly approximates a ratification of the Molotov-Ribbentrop line, rather than the so-called Curzon line, which never contemplated that Lwow, Wilno, and eastern Galicia should go to Soviet Russia.

Mr. Edward Stettinius, Secretary of State, said: "It has been the consistently held policy of the United States Government that questions relating to boundaries should be kept in abeyance until the termination of hostilities." Mr. Anthony Eden, British Foreign Secretary, said on July 30, 1941: "I also desire to assure you (Poland) that His Majesty's Government do not recognize any territorial changes which had been effected in Poland since August 1939."

When subsequent actions controvert these assertions, is it possible for other countries to have faith and confidence in spoken or written pledges of high Government representatives? Are our American boys fighting and dying for the preservation of power politics? Is this our conception of national honor?

Firm in the belief that our representatives in Congress and our delegates to the San Francisco Conference desire to uphold our national honor and back up America's pledge of freedom and democracy for all countries, large or small, we urge most vigorously that:

1. Poland be accorded the same rights and privileges accorded all members of the United Nations by being represented at the Conference.

2. Boundaries be left unchanged until hostilities are terminated, and residents of areas in question are given an opportunity to decide freely, without coercion from any source, where they wish to belong.

3. An Allied Commission be appointed to prevent the removal from eastern Poland of Poles who are opposed, or are suspected of opposing, the Soviet-sponsored Lublin government. Moreover, the hundreds of thousands of Poles already transplanted from this area should be returned to their homes prior to the elections, or failing that, some method be devised to give them representation in the voting.

WALTER M. GROCKI,
President.
JOSEPH A. NOWAK,
Secretary.
ADOLPH J. GOLEN.
WALTER J. TRYBULSKI.

Problems of United Nations Unity

EXTENSION OF REMARKS

OF

HON. AUGUSTUS W. BENNET

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. BENNET of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following proceedings of the Forum for Democracy entitled "What Are the Problems of United Nations Unity?" Times Hall, New York City, March 2, 1945:

Chairman SAMUEL L. M. BARLOW. Ladies and gentlemen, this is the fifth session of the Forum for Democracy, and I am going to go over the season a little bit for you, because there are some new people. And I warn you that I have a very important announcement to make at the very end of the evening, concerning the Forum. Our last month's session, as you know, concerned itself with job discrimination, and our next will be about the punishment of war criminals. This evening our subject is, as you know, How We Can Maintain Allied Unity After the War.

Those of you who are our regular customers may now do a little quiet digesting of your dinners while I briefly restate why your Forum for Democracy presents these, what I think I can probably call "hot" topics, in its own special manner.

We believe that what affects the body politic affects us; and, combined with that, we believe that one bad apple can contaminate the whole barrel. So we praise, we elucidate, we condemn, but we do not go about gloomily muck-raking. On the contrary, we are hopeful of the future—as our list of subjects shows. We have, I think, a real confidence in the morrow, provided one thing: provided that our citizenry is as alert as it is privileged, for we are an extremely privileged citizenry in this year of grace, 1945.

We might, but for the grace of God, be the citizenry of Warsaw, Chungking, Naples, or Aachen. Or we might be in other hungry and devastated places. And our privileges of security and ease can be held fast only by citizens' action, not by inertia nor by whirling in space like a dervish. And it is exciting—let me tell you it is exciting—to be informed, alert, active! Of course it is!

Now, we also believe this Forum for Democracy is your forum—and I think it belongs more intimately to you than other forums belong to their people. And we believe, when we listen to these other forums that have sprung up rather like mushrooms in dew around these parts, that many of them, in fact all of them, are so intentionally disputations that the residue of one of their sessions is utter confusion. We turn off the radio or leave the hall with no clear thoughts, no informed emotion; above all, with no incentive and, as I have said before in this place, it is unhealthy to emote without action. It is like getting hot without sweating. It is very bad for you.

So, the speakers at your Forum for Democracy start on an agreed basis, a conviction that progress and liberality and the extensions of democracy, as well as peace itself, are the proper business of these United States.

And if the function of education is to turn events into ideas, I am convinced that the function of educated adults is to turn ideas into action. And we cannot act with vigor unless we act with conviction. And our convictions, after all, spring from our knowledge and our true information—what we hope is true, anyhow.

This forum, then, airs for you those things that you are interested in. It airs them through the channel of the best informed, most eloquent speakers we can find. You know them. We have had Malcolm Ross, Raymond Walsh, Hulan Jack, Clayton Powell, Emanuel Celler, Lisa Sergio, Frank Kingdon, Arthur Pope and all the others we have brought to you so far in this very short first year of ours, and those we are bringing to you tonight.

Now, other forums concentrate on what I might call heat, with mental calisthenics predominant. They knock people down or scratch their backs. Here, I might say, we concentrate on light, trying to keep it a lively light, to be sure, and under no bushels. Nor is this forum meant to be a stall for sacred cows. In fact, next year, if we have 5,000 instead of 500 members, and two forums a month instead of one, as well as our weekly programs on the air (which you know we have over WOV) I would like to see, for example, a good evening's discussion of modern art, with, shall we say, Jo Davison as umpire. And you can have a lot of fun.

Now, tonight for example, we here, I think, on the platform, are all agreed that world peace depends on world-mindedness and interdependence, and not on the pharisaical isolation nor aloofness. We thank God, I think all of us here, for Teheran, Moscow, Yalta, and for Dumbarton Oaks. But as somebody said, we are by no means out of the Bretton Woods yet.

And tonight I can see, in spite of our unanimity of basic agreement here, an awful lot of thorny questions, and there will be some from the audience later. I foresee the question of economic expansion. We all agree it is necessary. At all events, it is a fact. Yet Mr. Joseph Grew, in his book, let slip—and I am afraid that is what I must say—he let slip the phrase that the line between economic expansion and exploitation was often hard to see.

Another thing we can trip ourselves over: What are the solvents and reconciliations to be tendered in the postwar period to the Allied uncomfortables—because they make us feel uncomfortable—Marshal Tito, Red China, Greek partisans, De Gaulle, the Spanish underground? I have very definite feelings on those, but I doubt if six other people would have the same feelings.

What is a colonial possession between friends, may I ask? Well, there is Hong Kong. What resurrection do we offer Manila (our own adopted child) or the Jews? How can we curb the old, reactionary political machines in America, as well as in France, and in England, from upsetting the apple cart in their lust to get back in the drivers seat?

Now, some of these will be thoroughly aired tonight. But, as I am told there's a curfew law, we won't get around to all of them. However, I think the moment has arrived to get on with some of these excitements, and I shall now call upon our speakers to hand you the fullest excitement that is before us.

Now, I want to go botanical for a moment. There is a charming flower which in the Elizabethan period was called the "Eye of Day," because it is white and gold. But for all its being white and gold, it has not lost its roots in our plain, home fields. It is, in other words, the day's eye, or the daisy.

There is a lady who, because of her courage, her charm and her intelligence—because of those things which are her passports to any country, I might add—was lately our Envoy Extraordinary to Norway. She is now the chairman of the Committee on Women in Industry of the Council of National Defense, and Democratic National Committeewoman for the District of Columbia. She is also, and very proudly so, vice president of Americans United for International Cooperation. And I would add that she too, to her friends, is known as Daisy.

So it is with great pleasure that I present Mrs. Borden Harriman. [Aplause.]

Mrs. J. BORDEN HARRIMAN. Mr. Chairman, ladies and gentlemen, it is gratifying to have a cheerful subject to talk about, such as unity in the postwar world through a United Nations organization. I do not mean to underestimate the difficulties and the outrages and the misery all around us or the horrors still to face before peace comes. I am only trying to say that the future is

worth fighting for, and must be made in the great mold of democracy.

It has been wisely said that this is a peoples' war, a peoples' revolution. The people of the world are on the march and they must have an understanding and a vision or they will not succeed in their goal. What is their goal? If I read them rightly, they want something different from the last peace, which was not a good peace. It was not what the people of the world, through 4 long years of war, had hoped for.

This time an organization to save mankind from destruction must not be made light of or discarded. The same talent and energy that has been put into erecting the machinery of war should be put into the machinery for peace.

My complete conviction is that there will be a United Nations organization evolved out of the present international turmoil, but I am an optimist. Let me assure you that even I know that we have a rough road to travel before we can be sure of Senate approval of America's participation. But the mere creation of such an organization is only the beginning. It must have behind it, in each country, a mobilized opinion and a working force of people. No government or movement has ever been maintained unless supported by its people—this will be even more true of an international one. Our big job after we get the international organization will be to develop an educated and alert people who will insure that its powers are used really for the benefit of all, and not for the benefit of a few or to preserve a dubious status quo.

The $64 question is, How can we maintain and improve United Nations unity after we get it? To do it we must develop, or find the way to, a sense of belonging to an international community and a feeling for that community such as we now feel for our Nation through patriotism. Patriotism is loyalty. We have found the way to expand our sense of loyalty from the family group to the home town, to the State, and to the Nation. Now we must take the next step—to include all the human race in one family.

As members of a family have different temperaments and tastes, and we fight with them but try for the good of the whole to reconcile our differences, so we must strive to have the same attitude toward our neighboring peoples. It is not necessary to say we love them all, or that we must love them all. Of course, we won't. Many times they will annoy us, and undoubtedly we will annoy them, but the time is here that, whether we like it or whether we don't, we are rapidly being forced into the necessity for intimate contacts with all the world. Now that we are going to be able to breakfast in New York and dine in London, and every great base is within 60 hours of every other great base, we can no longer hold ourselves aloof from any quarter of the globe.

Shortly before he died, Wendell Willkie made the following statement: "I tell you that if a man is not in favor of the closest possible relations of all nations, then it does not matter what else he is. Such a man will be antilabor, even if he praises labor 24 hours a day. He will be antilabor because he will be working for a contracted America, a less-prosperous America. For the very same reason, such a man will be antibusiness, in the deepest sense, even though he may consider himself a servant of business, even though he falls on his knees before business. He will be antibusiness because he will be working for a smaller America, a less-important America. This is the touchstone to a man's entire position in politics today."

How can we go about reaching this ideal? First, we must assume that our joining a world organization is only a beginning. All of us who have been working so long in the international field may be too inclined at that time to relax, to say that now our job is done and we can take a rest. And the United States as a whole has a habit of thinking that to pass a law is all that is required to handle a situation.

This is no time for us to continue that old habit. If the United States Senate approves our taking part in the new international pattern, it will still be necessary to make the machinery work. The officials (our own representatives as well as those of other countries) whose task it is to handle our international problems, must feel behind them the weight of informed and opinionated peoples. They must not be left in a vacuum. The absence of sufficiently powerful organizational support of international law, the free flow of trade and collective security among popular groups was one of the essential reasons for the break-down of the League of Nations.

I myself have heard the foreign ministers, meeting at Geneva, complain that they were too removed from reality—that they needed closer contact with the people—that it took too long in a crisis for public opinion to register.

In this country we have proved that the safest base for sound government lies in the party system. Through the mechanism of the parties we debate our great national issues. Perhaps in time we will come to that internationally. Perhaps not, but for the present we should encourage, and work with our own interest groups—at the international level.

We have many good starts, the International Labor Organization, the International Food Institute at Rome, the new Food and Agriculture Organization, the Pan-American Bar Association, etc. We should extend each such domestic organization to the international field where we can meet with people from all countries whose life interests are our own. If we are social workers, or farmers, clergymen, doctors, or businessmen, we should know our opposite numbers in other nations, and plan our international functions to meet the real needs of all.

Then we will need the same international exchange of political ideas such as is now afforded by the Free World Association. Groups within each country working for the same ideals, must have an international meeting ground, completely independent of government, and their members free to speak their minds. These groups will serve to spur the United Nations into action, or to check their contemplated action if it is not in the people's interest.

We must have all these, and public-spirited persons taking part in their activities, internationally as they do now, nationally. If with these we have a free flow of news by press and by radio, then the next Manchurian crisis will not find a League of Nations too weak, and people everywhere too lethargic to force it into action, but a world of United Nations prepared to protect its peace.

We in the United States passed up the chance before to help in building a family of nations. It is wonderful that we have a second chance. America was never before 1920 afraid of an experiment, and our timidity then has proved disastrous. This reminds me of the famous scientist, Dr. Harlow Shapley, who said, "We should welcome growth, whether it is in social mechanics, or in advancing pure knowledge, or in political orientation, or in enriching the life of the common man.

"The bullfrog for millions of years has conformed with the policy of 'the good days.' He has been sitting on his rotting log in the swamp, croaking and croaking; he has tried nothing new, nothing bold, and the bullfrog remains a bullfrog."

America is only being true to its own life pattern when it faces the future with boldness and imagination. We must not only go forward with the other nations, but must do so with tolerance and patience. We must proceed to play our part in the Court of Nations. [Applause.]

Chairman BARLOW. Thank you, Mrs. Harriman.

I enjoyed that story about the bullfrog floating down a river on a Taft—on a raft, excuse me. [Laughter.] Well, since we are being aquatic about this, I can keep right on in the same vein. I don't know whether he can tickle a trout but I know he can kill a Fish. And he did it rather magnificently. Most of the people from New York State don't have to hang their heads in shame when they read who said what in Washington any more. Yes, I think he is a doctor, too. He cured us of trichinosis, which is a disease you get when you have too much bad Ham. [Applause.]

But now to be serious for one moment, if I may. You remember in the Bible, just before David slew Goliath, his friends came and railed at him. Do you remember what David's answer was? He said, "Is there not a cause?"

It is with great pleasure that I introduce Congressman BENNET. [Applause.]

Congressman A. W. BENNET. Mr. Chairman, fellow guests, and members and friends of the Forum for Democracy, this is not my first appearance before a New York audience and I hope it won't be my last. I am a native of New York City. I attended the public schools here and Townsend Harris High School, which I am sorry to say is no more. I always feel at home here in the city. About half my life was spent here, and about half up in the district which I now represent. It is always pleasant to come home again. I hope that somewhere in this audience there may be someone who has shared one or another of my experiences here in the city, and with whom I may have a chance to meet briefly afterward and exchange some reminiscences.

History suggests that there has been the greatest degree of world unity when the world was either dominated by one nation possessing overwhelming economic or military power, or when, in the absence of such a nation, there was the freest possible exchange of goods and services.

An outstanding example of the first condition was, of course, the so-called Pax Romana which, behind the spears of the Roman legions, kept the peace by force for several centuries. I take it that no one here tonight would suggest that we want to attain unity by that method even if we could possibly do so.

Comparative unity in most of the world existed during the eighteenth and nineteenth centuries when the sea routes were kept open and international trade was promoted by the British working through their predominant Navy. Of course, there were wars during these centuries just as there were outbreaks while Rome controlled, but on the whole, there was a rapid increase in prosperity for most of the world, a great growth of population, and a substantial increase in the comprehension of other nations' problems, coupled with some effort to definitely plan for stabilized conditions.

An opportunity to re-create the conditions of the eighteenth and nineteenth centuries is now, or shortly will be, opened to us. In a sense, we will have available both methods of promoting unity. We can, through the instrumentality of the Security Council, visualized by the Dumbarton Oaks agreement, enforce peace and we can also, through a determined effort to satisfy the aspirations of the maximum numbers of peoples and nations, foster good will and understanding.

The first and most essential task in bringing about this latter type of unity is the formulation of a new world set-up after victory which will carry out, as far as possible, the best features of the Atlantic Charter.

It is already obvious that some of the smaller nations are going to be disappointed at the treatment accorded them, but we in this country must use every effort to see that there is the least possible justification for such disappointment.

Primarily we have a sales job and those who sincerely hope for the success of the projected world organization, must use every effort to play down the inevitable incidents which could breed discord and suspicion, especially among our present allies, whose cooperation is absolutely essential if an effective world government is to be created.

Those who use every opportunity to denounce the attitude, for example, of Russia and Great Britain toward specific matters, accomplish nothing toward the correction of the attitudes and merely arouse in the minds and hearts of large segments of our population a bitterness and hostility which will create a formidable obstacle when the time comes to seek ratification by the American people of whatever plan may evolve from the San Francisco Conference.

The rest of us should employ every opportunity to create a good atmosphere by playing up points of agreement between the great nations rather than the points of disagreement.

It is probably safe to say that a vast majority of the American people and of their elected Representatives in Congress, desire to participate in setting up a workable organization which can preserve world peace, promote international trade and eventually establish a forum in which disputes between nations and their citizens can be settled by the orderly processes of law rather than through resort to force. With this favorable condition it will be the fault of people like ourselves if we fail to work out an acceptable plan and then fail to sell that plan to people who are already in a receptive frame of mind.

A rival sales force is already in existence. Isolationism is not dead. Its leaders loudly proclaim that they will be restored to power within 2 years. It could happen. It must not be allowed to happen. It is up to you and others like you throughout the United States of America to determine the outcome and to see that that outcome is the one which is going to make possible the establishment of the form of world organization to which we all aspire. [Applause.]

Chairman BARLOW. Well, our speakers have the merit of being almost too brief, it seems to me. Well, you will be able to get back at them very shortly because you are going to ask some questions.

I notice that Congressman BENNET mentioned that he had been to the Townsend Harris High School here, and that name, I think, is very pertinent to the discussion tonight. You may remember that Townsend Harris went with Perry and opened the ports of Japan, and from there went and did the same thing on his own in Siam, unless I am greatly mistaken. And he was one of those people who was anything but an isolationist. Perhaps that is why they closed his school, I don't know. But he was in the great free American tradition which brought us Alexander Hamilton from an English island, and sent American Townsend Harris to China, and sent Joe Barlow to Paris. There were no isolationists in those days. I don't know how it has grown upon us.

Now, I don't know how we procured our next speaker; it is kind of a mystery. He usually is and is expected to be lecturing all over this country to foreign-policy associations, chambers of commerce, to other forums, or to all the universities about his activities in Russia or China or Japan. So what he is even doing in the country, I don't know. However, we are lucky to get him.

He also found time, I may add, to write about a dozen books, with all that. But quite seriously put and simply put, I doubt if in the United States today there is a more experienced and trained authority, with years of training, on the eastern question than he. So it is really no mean privilege to introduce General Yakhontoff. [Applause.]

Gen. VICTOR YAKHONTOFF. Mr. Chairman, ladies, and gentlemen: "United Nations" is not simply a term coined in 1942 by those who were united in their determination to check the Fascist aggressors, but a reality that was forged by the interdependence of the participants in this World War No. 2, and strengthened by the realization of the fact that victory over Hitler and his coconspirators was possible only through the unity of action, unity of spirit, and unity of purpose of the partners in this titanic struggle. (To use the words of the declaration issued by President Roosevelt, Prime Minister Churchill and Marshal Stalin after their meeting at Teheran.)

The latest in the series of the meetings of the big three—that of Yalta—has clearly established not only the durability of the military cooperation, but the determination to extend it after the victory, as a measure of control over Germany. She is to be demilitarized and made harmless, and measures established for maintenance of order in the Reich, under the general direction of a central control commission, representing the supreme commanders of the big three, with headquarters at Berlin. As for Japan, the Crimean Conference tactfully did not discuss (at least officially) the fate of that country, with which the U. S. S. R. is not at war. This status was not only accepted by the others, but clearly underlined by the very wording of the Declaration of United Nations.

For a while, before the Conference at Yalta, we heard people asking if the pacts concluded by some of the United Nations, were not in discord with the spirit of unity. Such were, for instance, the 20-year treaties of alliance between the U. S. S. R. and Great Britain, France, and Czechoslovakia. In the heat of debating this question some critics called these pacts unilateral. Naturally this was a misnomer, for something concluded by two cannot be unilateral, which means onesided. If the critics meant that Moscow acted upon these treaties without consulting her partners, Great Britain and the U. S. A. obviously there was some sort of a confusion. Dr. Benes, of Czechoslovakia, went to Moscow to sign the pact after Teheran; went there from London, and, naturally, not without keeping his host and us posted. The treaty with France, certainly could not be a very different case, if different at all, from the Czech-Soviet agreement and its prototype, the 20-year treaty with Great Britain.

In other words, there is nothing either to object to or to get excited about. Such pacts, obviously, are helping and not hindering the main purpose of building mutual confidence and pave the way toward genuine friendship and cooperation.

As for the question asked by some people: If we, too, should not have some agreements of that kind. The answer seems to be "Why not"? Provided, of course, that such bilateral pacts are not designed to exclude any of the United Nations. But pacts of alliances are hardly what Washington is looking for. Alliances are, certainly, much more than the Isolationists (or whatever their name today) would approve. And their power of obstruction, let us be frank, still is something to worry about.

There is another question that makes many people uneasy and anxious to get more light on it. What about the future of the empire? What about the colonies and the colonial peoples? Most of our people are definitely against the subjugation of other peoples by the Big Powers. This clearly speaks well of American belief in fair play and of prevailing good sense. But, there are some among us who demand control over, if not purely and simply for annexation of, various Pacific islands. Personally, I believe that a more reasonable solution could be found in the establishment of control under general supervision of the United Nations; not annexations, not even new mandates. What is important is the elimination of any danger that those islands be again used by any nation as stepping stones for any attack on others.

To keep in trust, with collective responsibility, is quite another thing than to take; to gain possession.

It is most unfortunate that a few among us were talking of taking over from Great Britain; of the American century and the like, which sounded rather un-American. Fortunately, we do not hear about these plans lately.

As for the colonial and semicolonial peoples, it looks as if the chances for keeping them much longer in that status are getting slim. Wendell Willkie discovered this. Many others know it. Much more will be learned. The twentieth century hardly is favorable for the continuance of the old colonial regimes.

Colonial empires were built by the expanding economies of the old. If they have no extra good chance for survival, what about the more modern expanding tendencies (mostly of economic nature) of the Big Three? Is there no menace for their unity? One of the three, the Soviet Union, is not a menace for the others; it is not a rival, for it is not interested in foreign markets in the same sense as the others are. Its national economy does not depend on any control of foreign markets, it does not seek any monopolistic position, and therefore has to be excluded from this question. As for the others, much will depend on the soundness of the basis on which the competition will develop. Some good steps, apparently, were made at a number of international meetings which were held recently. How will this develop? Let us hope we will not see the repetition of the wild race; restoration of tariff walls; discrimination; cut-throat competition, instead of sensibly regulated foreign trade in the interest of all.

A very interesting opinion on that point was expressed by Mr. Henry J. Kaiser (in his speech at Madison Square Garden, on November 6, 1944) and I quote:

"When Russian industrialism matches our own in volume, when comforts and conveniences are a commonplace for her people, the great mass of mankind throughout the world will be seeking goods and more goods to satisfy their awakened desires. In the New World there will be no place for the theories of overproduction."

"We welcome Russian competition," he added, for "it means vast increase in the supply of essential goods and services." Competition on such a basis, certainly, is not something to be worried about.

And here is the last of the questions I was asked to touch upon. It is about the self-determination of peoples. As anything else, it is good in moderation, i. e., if not stretched beyond logical, sound bounds. It can be overdone, as most things, good or otherwise.

The principle of self-determination, advanced by the Russian Revolution, and included in the Fourteen Points of Woodrow Wilson, and then accepted at Versailles, as applied in the past, proved to be not always to the good. The time was abnormal, if not pathological, as the result of war, revolution in Russia, and revolutionary movements in other countries. The rush for independence was spurred by some outsiders who were interested in the cordon-sanitaire idea for isolation of the young Soviet state, or wanted to have convenient stepping-stones for the attacks on Russia. As a result, a number of small units were built; some of them too small and too weak to resist the schemes of the bigger, more powerful states; and therefore independence proved to be not

more than an illusion. They became pawns in the hands of others, and this aggravated, not improved, the international situation. This much we all know, and have to remember when discussing again the question of self-determination.

Of course, this said experience of the past does not repudiate the principle itself. There is nothing wrong with the desire of any ethnic group to be independent, to be free in developing its own cultural growth, and thereby to contribute the most and the best it can to the whole of humanity. But the application of this good principle should not ignore the reality: The existing political and economic conditions. Certainly it is desirable to give the fullest right to every nationality to establish or restore independence, but with due regard to the actual situation. In other words, it seems reasonable under certain circumstances to advise postponement of such separation simply in order to prevent unpleasant complications.

This natural desire for freedom and independenece of nationalities should not be treated differently from the way any civilized society is treating the desires and inclinations of individuals living in its midst. There is, and obviously has to be, certain limitations of the individual to protect the interests of the whole. We all can imagine what would happen if every motorist would be allowed to ignore the traffic rules and regulations, and do the driving according to his inclinations and taste. We already do know what happened when all the applications for independence were so easily approved at Versailles. Is it not better to be more careful in the future?

We have certainly reason to hope that after this war is over, and the world will be built on the sound foundations laid at Teheran and Yalta, and mutual trust among the nations will be established, and their cooperation will become a happy reality, that there will remain less reason for caution of the sort described. If so, let us hope, sometimes there will also disappear any justification for boundaries, and then the very idea of self-determination would be considered on an entirely new plane. [Applause.]

Chairman BARLOW. Thank you, General. Very enlightening.

Now, I was very interested in what the General said when he brought up the question of empires and colonies, and I am thoroughly in sympathy with the idea that ultimately there must be wards or trusteeships of a national council; a sort of colonial pool may be one way of looking at it. I am not sure. Of course, there are the snags, but we are here tonight to discuss the snags, and all our beautiful ideas, and to see how we can get around them.

Presumably we are going to fortify Guam against future attack from the Orient, from Japan, because we know perfectly well that we have to disarm Japan totally. Yet we know what happened to Germany, who was totally disarmed 25 years ago—and up she comes again. So we are probably going to—I don't say I like it, but I think that is the future—we are going to fortify Guam. But if we keep Iwo, for example, and we are the trustees or the wards for Iwo under the United Nations, can we fortify that against Japan? In other words, does colonial trusteeship end in defensive fortification? It might well, and it may be a good thing, but I just don't know. How about that, General?

General YAKHONTOFF. Well, it would not be so necessary to fortify Guam or Iwo or any other islands if we have an international trusteeship. The trouble with the islands in the Pacific was the result of agreements reached at a Washington conference as a compromise in order to force the approval by Japan of the plan of these unequal naval quotas. We made a very bad mistake promising that we and the others would not fortify the islands in the Pacific. Japan very easily approved this and started immediately fortifying the islands from which she was able and actually did attack us. And she did not allow anybody to go there and find out, in spite of the fact that the islands were under a mandate of the league. The League of Nations, naturally, ought to have watched that a little bit more closely.

Japan was able to attack us from fortified islands while we honestly continued to stick to the agreement and we did not fortify our Philippines. And we know the result. Neither did we dare do anything about Guam.

Now, if we change the situation so as to make an international trusteeship, with actual control, I don't think it would be necessary to spend money on fortifications.

Chairman BARLOW. I want to see a forest of hands from the floor.

QUESTIONER. If people's governments are established all over the world—and I would like to ask General Yakhontoff whether he thinks there will be such establishments all over the world—will defense mechanism really be necessary? Because I think if people's governments are set up throughout the world there will be no fear of aggression on their part.

General YAKHONTOFF. Well, there is this beautiful idea that if people's governments would be established; in other words, if democracy would prevail, real, genuine democracy all over the world, then there will be no reason to fortify, because there is no chance of war. Well, it is a little bit too farfetched in 1945. It may happen later. But what I said before about Guam and Iwo, and so on, did not mean, of course, that the international group, the Security Council, would not need to take care of some strategic points in the world, to make sure that the jumping stones were prepared in order to check the aggressors. In other words, though being an incorrigible optimist, I still wouldn't go so far as to suggest that we drop our arms completely, and believe that after tomorrow we will have a beautiful world with no conflicts at all.

Dr. SHERMAN. Recently there was issued a statement signed by 1,600 religious leaders signifying that it is their belief that no representative of organized religion should sit at the peace table. That was immediately attacked by the Vatican.

I should like to pose this question to all three speakers and get their point of view on the attitude of religion at the peace conference.

Chairman BARLOW. I will repeat the question. Recently, 1,600 religious leaders in this country wrote and asked that organized religion should not be represented as such at the peace table, and that as a result of that letter signed by 1,600 people the Vatican sent a letter of protest, implying, I presume, that organized religion, sectarian religion, should be represented at the peace table. Have the three speakers got any comment they dare make?

Congressman BENNET. I don't mind making a comment on it.

It seems to me if religion, whether organized or otherwise, is going to play a vital part in the world, it ought to be interested in everything vital that goes on. And I can't think of anything more vital than that peace conference. That conference and its outcome is going to affect the lives of everybody all over the world, including the members of those religious groups.

Chairman BARLOW. Yes, but do you want to add conflict to conflict? In other words, naturally everything that is vital should concern the churches. But the question is, does it? If you remember your history, the Tartar Empire was quite prepared to go Christian instead of Mohammedan, and for 500 years there was a period when it wavered like that, and it was quite late when they decided in favor of Mohammedanism because they had seen the squabbles of the seven sects of Christian monks who had gone there to convert it. Now, that is historically true.

One of the matters that I had in mind tonight, and a good disputatious one it is too, is that to date in history no church that we know of has ever prevented a war, whereas the two great churches that we just mentioned, the Christian and the Mohammedan churches, are frequently indulging in holy crusades. In other words, they make wars; they do not stop them.

Now, I am a church-goer, a believer, which is a very different matter from feeling that I can speak my mind on the past. I certainly think that there ought to be a United Council of Churches, existing in just the way the International Labor Organization exists. It does not need to have any more than labor should have. Therefore, I don't believe that the Vatican, or in place of the Vatican, Bishop Manning, should represent the church. However, I do think that the churches should get together and possibly send an appointee—but try and get that.

General YAKHONTOFF. May I disagree. I rather agree with what Congressman BENNET said, that it is natural that they have interest, but to have interest is one thing and to be active in decision is entirely a different thing. I am very much interested, say, in ballet, but that doesn't mean that I can perform.

As to the suggestion of our chairman that the Council of Churches should be treated in the same way as labor, I violently disagree, because labor is not specializing in spiritual things. And the church, according to our Constitution, is separated from the state, and the church, in my opinion, should not be a part of any decisions of that kind. One thousand six hundred religious leaders—they were not laymen, they were representatives of the church, and they could easily be followed by thousands of others—if approached for their opinion would certainly say "No." Most of the churches do not approve of it, and if some do, that is no reason to agree with them. [Applause.]

Mrs. HARRIMAN. I would like to add that the members who are going to be appointed to the peace table will be members of the different churches, and will be quite equal to representing the thought of those churches.

Chairman BARLOW. I think that is true. It is a perfectly proper answer. Mrs. Harriman said that since the delegates to the United Nations Council would all belong to different churches the churches would automatically be properly represented. [Applause.]

QUESTIONER. What is Italy's position in the United Nations today?

Chairman BARLOW. She is not a member of the United Nations. I think that is one of the things that was not settled. And the President, I think, even mentioned the fact that the position of certain nations had not been made clear. Because after all, don't forget, that half of Italy is still making war on us. Unfortunately, it is bound to cloud the issues. I don't think it would be possible to make a proper decision at the present moment. You can't even get all the Italians together in one free land to vote yet. Italy has been a current thorn, because we love the Italians, and here only half of them are now with us. And it is a very, very distressing picture. There is no doubt about it. But I don't know how you can be categorical and make a sweeping answer to it. As a matter of fact, the answer has not been made.

Mrs. HARRIMAN. Mr. Chairman, that is something that will be taken up at San Francisco.

QUESTIONER. I wish to address a question to General Yakhontoff: In discussion of the subject of the smaller nations and also in the method of treating colonial and smaller islands, there is an implication that you do not have sufficient faith in the efficacy of the Dumbarton Oaks proposals as being able

to control and dominate so that no aggressive developments should take place in those small nations supported by the bigger powers.

General YAKHONTOFF. I believe I even stressed the point that the idea is perfectly all right. But my suggestion is to go slowly, because, with all the Dumbarton Oaks proposals and San Francisco in the future. I don't believe that we will be ready at the end of this war with this new Security Council to yet forget all of the yesterdays. We have to act with care. I do not disapprove of the idea of self-determination, but I only suggested that we go slowly in order not to repeat the mistakes of yesterday, and, as I said, not to create unpleasant situations that will be difficult for the Security Council to settle.

QUESTIONER. I would like to address this question to Mrs. Harriman. Today under military operation and military occupation certain of the Big Three Powers have been allowed to exercise a unilateral influence in certain countries. For example, Britain in Greece, we in Italy. We are exerting an influence and they are exerting an influence to their own interest. Now, how does that square up with this democracy for all nations or for a united government in the world? In other words, why don't we have representatives of the Big Three in Greece, representatives of the Big Three in Italy, each sitting together and each deciding what is best for all?

Mrs. HARRIMAN. Do you want to know what I think? It does not square up.

QUESTIONER. Well, then, it is so negative and so contradictory. We all talk about these beautiful principles, this beautiful world to come. Right now we have a very real chance to put those principles into effect, and we are not doing it at all. How can we do it later?

Mrs. HARRIMAN. I don't think we can say we are not doing it at all. You have given two instances where we have not done it as we had hoped, but I think it will be worked out.

Chairman BARLOW. There is one that has troubled me. But the answer is, not having Dumbarton Oaks yet there is no machinery for doing that. It is one of the great arguments for Dumbarton Oaks. One of the great arguments for Dumbarton Oaks is the mess we get into without it, as we certainly have. And I may add that I would quarrel with my questioner there, that we were puddling around in Italy for our own advantage. I don't see that. There is no doubt that England made errors in Greece with its postwar expansion policy. We have not made less errors without any postwar expansion policy at all in Italy.

Part of your phrase I should say is correct about England, and I would say she was the first to regret it.

QUESTIONER. I have another angle. Maybe I was wrong to say to our advantage, but I could say to the disadvantage of the country.

Chairman BARLOW. Sure, but I say it is because of not having Dumbarton Oaks. And this I do want to bring home to you all. Don't forget that one of the important wings or arms of Dumbarton Oaks is a court of law, and there will be no question of rushing ourselves into battle before the case of an aggressor has been taken to a court of law. There will be no question of oppressing a small country until the small country has had a chance to air its troubles. If we had Dumbarton Oaks now, the Council would be sitting at Geneva, or where have you; it would be now hearing that case before disinterested lawyers of the United Nations. They can't do that now.

QUESTIONER. I would like to hear what General Yakhontoff has to say on that subject, and also Mr. BENNET.

General YAKHONTOFF. My only addition to what was said already is that we shouldn't be in such a hurry to solve all the problems, but we should be alert. And we can see from here that people are worried about it, they are talking about it, they are asking questions, and we are all together trying to discuss it and come to the proper solution.

That is exactly how democracy has to work. I for one am rather optimistic. They exposed the situation in Greece. But to say that we didn't act properly in Italy—I for one wouldn't say it just like that.

QUESTIONER. I wish to ask this question of General Yakhontoff: I understood from the President's report yesterday that the Polish border was going to be set in the east on the Curzon line, and in the west temporarily to take in part of East Prussia. I believe that this is predominately a German territory or German people's territory. Don't you think that it is a cause for future trouble if Poland takes in part of East Prussia?

General YAKHONTOFF. Well, such opinion was expressed by the gentlemen who remained in London. They were worried—and some others joined them. They said that it would bring trouble. But here is one fact, one historical fact, that East Prussia originally belonged to Poland. East Prussia originally was inhabited by Slavs and the Slavs were unceremoniously chased away by the Teutons. And to restore the territory facing the Baltic to Poland, in my opinion is quite justifiable. Poland must have something to be able to exist economically, so in addition, for instance, of Upper Silesia, which is an extremely important addition; much more valuable than what is beyond the Curzon Line, she will get East Prussia. I should even say especially Prussia, because as you all know it is the cradle of Junkerdom. And so, in order to remove the Junkers, it won't be such a bad operation. I think it would not do much harm to the German people. [Applause].

Mrs. HARRIMAN. Might I also add that they are going to get Danzig, which means a great deal.

General YAKHONTOFF. And more than that. They have been promised also that the western border will be somewhere around the Oder River. And here again there is some historical justice. The Poles used to live there. But there is a question mark, of course. And very wisely they decided to postpone this question until—not until the peace conference, which they say won't be convoked at all pretty soon—some time in the future when they will decide these rather ticklish questions.

Congressman BENNET. But Danzig, for example, is somewhere around 90 percent German. Her question was, wouldn't the taking of a German place like Danzig and turning it over to the Poles create a breeding place for another war?

General YAKHONTOFF. But Danzig used to be Gdansk, and it was Poland. I personally remember having a very unpleasant encounter in Pennsylvania at the beginning of the war in one place where too many Poles were in the hall. They vigorously and violently objected when I passed over Danzig lightly. And they said: What do you mean? Danzig is Polish originally, and if there are many Germans there, it is just too bad for them. [Laughter.]

QUESTIONER: Wouldn't it be more important to edit the history books of all the countries instead of fortifying little rocks in the south Pacific somewhere, which can be taken in a week or two anyhow?

Chairman BARLOW. Well, we are doing that, both in England and here. And we have a reciprocal committee to clean up the neutrals. It should be done all over the world.

General YAKHONTOFF. It is a very good idea.

QUESTIONER. I would like to ask in line with this, suppose we had Dumbarton Oaks, how would the problem of Palestine be handled in connection with that?

Congressman BENNET. I suppose if we had this court set up, this question of what should be the boundaries of Palestine and what should be the governmental set-up would be submitted to the court. For the time being Palestine is a protectorate. And as I recall it, Palestine is still predominately Arab, by a very large majority. If that is not satisfactory to the Palestinians they will have to take their case before the international court and try to get whatever relief the court will give them.

Chairman BARLOW. It is not a very satisfactory answer because it is putting off everything into the future. But there again, we can't do much about anything until we have Dumbarton Oaks.

QUESTIONER. Presumably, we have to resort to some basis such as self-determination. That's what Dumbarton Oaks would represent, wouldn't it?

Chairman BARLOW. Yes. There will be a special court under which you plead.

QUESTIONER. I would like to ask the general to explain a little more carefully his remarks on unilateral versus bilateral action of Russia and Poland. The Russians chose to deal with one group, the English the other, and at no time was it taken care of by the Polish people themselves. Where does he get off calling it bilateral?

General YAKHONTOFF. Well, the answer is, I think, that these questions still are in the process of being solved. What was done at Yalta, point 1, was only the recognition of the Curzon line. The existence of a de facto government, formerly the Lublin group, the national liberation group—well, some people like to say it was sponsored by the Russians, some others would go even further and say it was organized by the Russians; that is not the point, I think—depends upon Poles. And all of Poland is now liberated from the Germans, and this was done by the Russians' bleeding and dying; not to take it but to give it back to the Polish people. So whatever Poles are there, those are the Poles who remained and were under the heel of Hitler. They were suffering and fighting while the little group in London who had deserted their people did not fight, did not suffer—only humiliation, of course. [Applause.]

The main point of this answer to the question, of course, is that it was not bilateral or unilateral, but it was multilateral, because at Yalta we know President Roosevelt and Churchill and Stalin were talking about this, and certainly they considered this group which is considered the de facto government in Poland. [Applause.]

Chairman BARLOW. For the moment the question period is over because we are going on the air in 3 minutes. I am going to ask Dr. Charles Obermeier of the N. M. U. to come up and join us for the round table because I have some questions I want to ask him. Our merchant marine is too valuable an arm to be left out of any discussion.

Just before we go on the air I want to quote Dr. Sherman. Since we're a young forum we want to be judged by our virtues and aspirations. We want to bring a warm exciting light to our subjects and our problems—with your help. This is your forum. With your cooperation, we can expand, shed more light, more diverse light, and incidentally knock the spots out of any other undigested or predigested forums in this neck of the woods.

I want to tell you that at the end of this evening, in exactly 31 minutes, I have two very interesting announcements to make concerning the forum and concerning you, and I might also add, contradicting everything I have said to you before. I am now going to sit down. We are going on the air, and we want your applause, but nothing else.

[On the air.]

Chairman BARLOW. Good evening. Mr. Charles has told you where we are and who we are and how we are. We have just had a question period—questions of how to keep alive and vital that unity which we have achieved as a war measure to date. How can we keep it in peacetime? We have had a lot of questions from the floor. Questions such as: If we would have people's governments in every country would that mean the end of armaments? A question like, if there were a colonial pool or trusteeship of colonies, would the trustee be allowed to fortify them, like Guam, for instance? Questions of religious participation at the peace table; the status of Italy; and the Curzon line question; and the question of the Germans in East Prussia?

Now we will go right on on that basis, trying to shed light on those things which seem to us important, and I am going to begin by asking a gentleman I have just asked up to the table, Dr. Charles Obermeier, of the N. M. U., a question. I am going to tell him a little story first.

Mr. William Green, the head of the American Federation of Labor, made a statement at the Miami convention, I believe it was, concerning German labor in the post-war period as a consequence of the military victory of the United Nations. If I remember correctly, Mr. Green explained that the resulting enslavement, as he called it, of German labor, constituted a threat to American labor, which would then have to face competition by low-paid, unfree, slave labor in the world market.

Now, Dr. Obermeier, what about this as an interpretation? Is it as unsound as I think? Is Mr. Green indicating, possibly indirectly, that he is opposed to the policy of unconditional surrender?

Dr. CHARLES OBERMEIER. I am afraid you are right. I think I would agree with you. One reason why I say so is because Mr. Green has pulled out stubbornly—I say that advisedly—from the World Conference in London; the World Labor Conference. This Conference is the first great attempt for a long time really to unite labor. After a certain amount of disunity and disruption, let us say, from some old elements, they achieved a magnificent unity which represents 60,000,000 workers of the world. It is a very great thing indeed. It is something that will strengthen not only our Yalta Conference but it will also strengthen anything we will be doing at San Francisco.

The question I would like to ask Mr. Green, quite simply, is this: Why, at this very critical moment, when world labor is so involved in the future of the whole world, why did the A. F. of L. not send a representative to London? And in London the Conference stood for unconditional surrender of Germany and for a complete liquidation of fascism. And I cannot for a moment see that a liquidation of fascism can be anything else but the beginning of the liberation of the German workers. And how liberated German workers can do any harm to the American workers or affect the standard of living of the American workers, I fail to see. [Applause.]

Chairman BARLOW. Well, I want to ask another question myself, and I am waiting for one of you boys and girls to come on and help me with questions.

I don't want to appear to pick on Russia, because in a sense Russia is the hero of the occasion to a large extent, but General Yakhontoff in his speech this evening earlier said that Russia wants no foreign markets. Now, I see no objection to her having foreign markets. But I just don't happen to agree with the general. I think she does want foreign markets; I think she should want them; in fact, I think she wants them so much that she is very anxious to stabilize the Balkans on almost reactionary principles, I would say, and far from being in the mood to bolshevize or communize the Balkans, she wants something very stable there with which she could do a nice honest bit of trade.

Now, how do you figure that out, General?

General YAKHONTOFF. I said that the Soviet Union, in other words, Russia of today, is not interested in foreign markets in the same sense as the others. What I meant is that the Soviet Union is not interested in a monopolistic position. She is not interested in getting control of foreign markets to the exclusion of others.

Congressman BENNET. Do I understand the general that the rest of us are interested in monopolizing world markets?

Chairman BARLOW. No. But I think he was kind of letting out Russia from wanting to do business by what I would call a very proper way. I think she is interested in world markets, but not at the expense of anybody else. That is the whole point. That is what the Ambassador from Canada said, that it must be controlled, it must be enlightened—it may be self-interest, but it must be enlightened self-interest. And that is perfectly proper, because there is every indication that without stabilization we will not have peace; without sound economy we won't have peace; and that expansion is part of sound economy, but a decent expansion. I think we were very handsomely answered on that.

I want to ask another question, and I want to ask this of Congressman BENNET. We haven't mentioned it but I think in the post-war world it is going to be one of the most important of all, and that is the question of tariffs. Now, I know that Congressman BENNET is a Republican, but I suspect that maybe it was the hand of Isaac that he saw, but the voice is darn well the voice of Jacob. I think he might agree with us that the tariff might as well go "behind the eight ball" if we are not going into full isolationism.

Congressman BENNET. I want it understood that I speak only for myself and not for my party. I do not know what the party attitude is on it. I don't profess to know and don't wish to commit the party. As far as I personally am concerned I think we must have a free exchange of goods and services throughout the world. Prosperity elsewhere will reflect in prosperity here. Just how we are going to go about that I don't know. There must be a lowering of tariffs on some things and a raising of tariffs on other things. That must be done by experts. I think we must have the removal of as many barriers as possible on international trade. [Applause.]

Mrs. HARRIMAN. Could I ask anyone who wants to answer, don't you think that the high tariff we had, had a great deal to do with bringing on the war?

Congressman BENNET. No. I don't think the high tariff had anything much to do with bringing on the war. I think the cause is much more elemental than that. I don't think our tariff policy was a great factor in the renaissance of German power. I don't think it was a great factor in the rise of Hitler.

The thing that brought that about, I think most of us are agreed, was the mistakes made at Versailles, followed up by the mistakes made by all the democratic people of the world in being unwilling to pay the price for keeping German militarism down. There is no question, of course, but that Germany's economic prostration is what brought Hitler on, but I think our tariff played a small part in that. I think the reparations demanded and the other restrictions put down on them were the primary cause of it.

Mrs. HARRIMAN. Don't you think they were prevented from paying their debts a great deal because we did not buy from them the way we should?

Congressman BENNET. Why, say "we" did not buy from them?

Mrs. HARRIMAN. I meant our allies couldn't pay their debts to us.

Congressman BENNET. I notice that the present trend is to forget about dollars and cents and the talk is about payment in other mediums. I think that would have been a good policy 25 years ago, but it was not the policy. I think the tariff was only one of the many factors that contributed toward it.

Chairman BARLOW. Definitely. On the question of reparations—we are back on this slave business again, and I would like to put it on the air. You know, the first question that I asked, about the creation of a slave population in Russia of Germans, or in France; taking these troops, these masses of Germans, to work there. I believe that under Dumbarton Oaks—and we come back to the business that we need Dumbarton Oaks so quickly, we need it right now, we shall need it when we start reparations, we shall need it from the first minute, we need it from this second—those men will have a case before the international court. They will be paid, and the reparations will be just. At the present moment there is no tribunal. That is the great trouble; that is why we have gotten in trouble in Italy, in Greece, and a lot of other places. There is no ultimate court. That is why I think we are agreed that Dumbarton Oaks should be established as quickly as possible.

Mrs. HARRIMAN. Mr. Chairman, I understood that Dumbarton Oaks is only a skeleton of what is to come, and what we need is the United Nations Council, which is set up through the plan of Dumbarton Oaks, only enlarged and strengthened.

Congressman BENNET. Not only that, but if I understood the question correctly, Mr. Green's worry is caused because of the possible competition with well-paid American labor against slave labor. I understood the proposal was only for the purpose of rebuilding the destruction of Russia, at least, and possibly other parts of Europe, with which we were not going to be concerned anyhow. We were not going to compete in those markets. We were not going to send our workers there. So I don't see where the competitive element enters into it.

General YAKHONTOFF. Apparently Mr. Green and those who follow him are suffering from some kind of effect of Versailles. They do not see that there is slave labor and plenty of slave labor in Germany. There are some suspicions, of course, that the Russians are planning to treat the Germans in the same way.

From what we heard from the President yesterday; from what we have seen published after the Crimean Conference, apparently nothing of the kind is planned, and to my knowledge the Russians are not planning to starve, to mistreat, or to transform the Germans into slaves. But the Germans will certainly have to rebuild what they have destroyed. [Applause.]

Chairman BARLOW. I have in my hand now a little document by Dr. William J. Schieffelin considering what to do with Germany after the war. I see he is here, and I am going to quote one paragraph from this document, because I think it will create a nice little argument for a couple of minutes. He said:

"There might well be an interim advisory commission to direct Germany composed of Russian, Jewish, Polish, Czech, French, Dutch, Danish, and Norwegian men and women." [Applause.]

You will notice that the English and the Americans are not mentioned. I think it is rather a splendid idea myself. It is putting the mice, a great many mice, to watch the cat. And I think it is a darn good idea myself.

Congressman BENNET. What sort of advice is the committee supposed to give?

Chairman BARLOW. To administer Germany instead of U. N. R. R. A., I suppose, or instead of Mr. Murphy.

General YAKHONTOFF. The trouble is, instead of mice there can be rats, and it will be too bad. [Laughter.]

Chairman BARLOW. I think it is probably not going to take place, but I think it is a nice idea.

Mrs. HARRIMAN. This is going a little afield, but don't you think the consensus is that this country, being the mightiest country in the world, is always too timid and actually afraid of other countries? For instance, in back of Mr. Green's decisions or discussions, don't you think the fear is that we have always been too timid and haven't realized our own power?

Chairman BARLOW. It is the kind of provincialism coming from having once been a colony. [Laughter.]

Congressman BENNET. I think it is tradition over here. We always get the worst of it. Every time we get into an international entanglement everybody is always talking of Uncle Sam losing his shirt. Every time he goes into one of those things——

Mrs. HARRIMAN. He doesn't go in.

Chairman BARLOW. I think it is totally unjustified.

Congressman BENNET. I personally think if we don't take a leading part nothing will happen. And I think the other countries of the world are going to see what we are going to do, and if we hold back certainly nobody else is going to take the initiative. [Applause.]

Mrs. HARRIMAN. If we don't go into the Council there will be no League of Nations.

Dr. OBERMEIER. There seems to be a contradiction there. If we are so very timid and backward in entering all of these things, how come these other nations seem to be afraid of us? Why is England so worried about these great United States? I think there must be something else besides our timidity.

Chairman BARLOW. I think a very dangerous thing has happened, and I think I know what is in back of your mind, Dr. Obermeier. And that is, that quite recently we have been anything but broadminded in the matter of oil or in the matter of control or exploitation of the air, and we have quite definitely let England down. I wouldn't be surprised if you would agree, or expand on the point, that one reason that England has made rather frantic efforts toward maintaining markets in the Mediterranean was because in the small attempts she has made for cooperation with us, we pretty well kicked her in the teeth. I don't know how true that is, but I would like to hear from you on it.

Dr. OBERMEIER. There is a certain amount of truth there, but there is a bigger truth than that. At this Civil Air Conference in Chicago, which was held late in the fall of last year, we decidedly kicked England in the teeth. We came out very definitely for free air, and England wanted a controlled air, she wanted an internationally controlled air. She wanted an air with allocations from different countries, and naturally for herself also. She knew very well that free air meant free competition, and free competition meant that the whole world's air would be full of American airplanes, mass produced. Undoubtedly we can outproduce the whole world in airplanes. Therefore, when in this Conference we came out for this free-air policy, we were throwing our weight around.

There is one thing I would like to mention in that connection, just to see how you feel about it. That Conference in Chicago was a conference largely between England and the United States. There was one great weakness in that Conference, and that was the omission of the Soviet Union. You may remember that the Soviet Union refused to appear at that Conference, for a reason that she gave, which was that Fascist countries, as she called them, like Spain and Portugal, and other countries like Switzerland and Sweden, who were helping Germany, were invited at this Conference.

In other words, this was not a conference in the spirit of Teheran, or of Yalta, or of Dumbarton Oaks, or of San Francisco. It was a conference, really, in which two rivals were fighting it out. It was not a world conference. It was a conference to a certain extent against this new unity which we have built up. And we have begun to learn, I think, that only in real world unity, in a unity in which at the present moment the big powers are are all represented, can this real rivalry between the United States and England be sublimated, because the moment you have the third power present this rivalry seems to lose itself in planning for bigger things.

It is partly a new logic, a new sense of values, if you like, but also a new determinism that is coming into the picture. That is why I think we mustn't be too certain that the United States is always timid. [Applause.]

Chairman BARLOW. Well, I sometimes think that the expedition with which we get places, at the same time that we say we lose our shirt, reminds me of a book I once read on eighteenth-century etiquette, which said: "Do not pick and choose the pieces upon the platter; the discerning eye at once sees the best piece." [Laughter.]

Congressman BENNET. When we lose our shirt that's when we engage in diplomatic exchanges. When we don't lose it we are talking about business matters. That's quite a different thing. With all due respect to Mrs. Harriman, we are talking here about oil and airplanes, and that's where our businessmen come in, and they are not losing any shirts that I know of.

I think we ought to bear in mind, too, about being hard-boiled, that we have poured out the oil here, our natural resources, all over the world, for England, Russia, and everybody else. One of the things I am thinking of is, Where are we going to get that back? I would rather get that instead of all the dollars. I think we are entitled to some consideration.

Chairman BARLOW. Am I wrong in saying it was the representatives in Congress that turned down Ickes' adventure in the oil fields?

General YAKHONTOFF. Mr. Chairman, can I add one word? A gentleman from the floor, before we went on the air, asked if it wouldn't be a good idea to have some international editorial board to check on histories. Would it not be proper to discuss at San Francisco, or at this new League of Nations, or whatever the name will be, how to take care of those who are not timid about the cartels and about business going out of the country and creating, if not exactly a situation for war, preparing difficulties? Would it not be proper to include on the agenda, and to insist on behalf of the people, that the cartel business should be very seriously discussed and the nontimid elements should be more timid? [Applause.]

Congressman BENNET. Well, on this cartel business, General—here again I am speaking as an individual—I think that most of the people, at least in Congress, are not going to be in favor of cartels. If there are to be cartels at all, certainly the Government is going to have to have a hand in it. [Applause.]

Chairman BARLOW. There is time for about one more point, and in discussing cartels and tariffs I would like to briefly mention South America. I would like to ask a question about the handling of South America—Argentina in particular—because we are at the present moment going through a phase with Argentina which is the kind of a phase that is going to make or break the success, the later success of the Council of Nations.

Mrs. HARRIMAN. Well, I have been very influenced by Mr. Sumner Welles on that subject. I think he did more for the good-neighbor policy than anybody in this country has ever done. I also think he has one of the most brilliant minds we have ever had in our country. On the other hand, it seems to me the situation ought to be a little differently handled, considering it is wartime and what is going on there, with the "fifth columnists," and so forth, that it would be in ordinary days.

Congressman BENNET. I always feel a handicap in discussing these problems, because I don't feel I have the facts to sufficiently form an intelligent opinion. I know, like Will Rogers, what you read in the papers. But I do feel the average citizen feels it is a mistake to show sympathy to people who spend a lot of time trying to hamper the efforts we make to win the war. [Applause.]

I don't think it would be a good-neighbor policy to be tough with Argentina, so to speak, but it certainly would appeal to the natural instincts of most people to be tough with them.

Mrs. HARRIMAN. Don't you think it took us a long time to get the confidence of South America, and we have to treat them differently than we do the ordinary neighboring countries?

Congressman BENNET. I think we are treating South America as we are treating all the other countries.

Chairman BARLOW. I think I can interject one word there, and that is, that it is not our attitude that has riled South America but it is the method. I thoroughly disapprove of a great deal we have done down there. We have not been forceful enough down there at the right time, and have made forceful remarks when we didn't mean them.

General YAKHONTOFF. Well, I agree with Ambassador Harriman. I also have the highest respect for the intellect of my old colleague Sumner Welles. Certainly he is a very intelligent gentleman, and he knows and he did a great deal for the good-neighbor policy. But I fail to understand his advice to deal with Argentina with velvet gloves, because it smacks to me too much of appeasement. Argentina today is so definitely a place to watch, and it is watched very carefully by the Germans and some Spaniards, and undoubtedly it is a place where plenty of trouble may occur in the very near future. [Applause.]

Chairman BARLOW. I also might say that my firm conviction is that the other end of the axle is Madrid, and until we clean up Madrid we will have trouble in South America. [Applause.]

Now, in summing up the round-table discussion, a discussion of how to maintain that precious unity, that global cooperation which we have achieved as a war measure—even to the global strategy mentioned yesterday by the President—I think we are agreed, and want everybody here to be agreed, that just as war is people, so, too, peace is people. The present conference in Mexico is concerned with people. Before this, conferences concerned themselves with boundaries, tariffs, and treaties. Now we know that the world is one world, a congress of people—biologically and spiritually, brothers. And, as among people there must be cooperation, if you are going to get anything done, so among groups of people, or nations, there must be cooperation.

We must remember Mr. Joseph Grew's phrase that economic expansion is closely akin to exploitation. (God knows, Mr. Grew is no New Dealer nor ever wi' Wallace bled.) We must remember that without peace there can be no legitimate economic expansion; without stabilized economy there can be no peace. Bretton Woods and Dumbarton Oaks are our springboards. Bretton Woods should end currency inflation. (God knows why any bankers are against it. After the last war you may recall our fabulous bank loans to Germany; loans with which Germany built her war machine. Perhaps prophetic vision and economic myopia make bad bedfellows.) At all events, Dumbarton Oaks is the basis of our future security. And the Atlantic Charter is the flag at our masthead. Yes, it may flap in the breeze, I admit. But keep it there; it's got to stay there. Why delay

in some muddled search for perfection? That kind of delay is properly called obstruction.

These, then, are the springboards of democracy in action. Cooperation is the touchstone. And responsibility lies on each one of us. We must be alert; write our Congressmen; make our will known, for Congress will pass on all these questions. Speak out we must, or we may lose these previous controls over our own future and that of our children. And we will lose them if we sink lazily into the easy corruptions of silence.

As was said lately in this forum, "Speak up, that we may forever after hold our peace." [Applause.]

Now, I have one or two important announcements to make about the forum. Now, this is really extremely exciting to us, and when I said I was going to make an announcement that is going to contradict everything I said before, this is it. You know, the Independent Citizens Committee for the Arts and Science, under Jo Davison—it is a pretty grand committee. This afternoon two of us, Mr. Brooks and I, conferred with Jo Davison and Mr. March and various others—and I may say they went a-wooing. And they went a-wooing because they need a forum. And the proposition was put up to us on the kind of line we like. They said, here we are, two-thousand-and-odd members at our first meeting; 800 turned out for just an ordinary meeting; we have some dough. And they have tremendous names behind them. And they said they had to, to justify their existence in one way or another, set up a forum. That is the way you speak to people nowadays, unless you hire a commentator. And the forum they had a liking to was this forum, because it started from a liberal basis; it wasn't just confusion.

They asked us if we would play ball with them. And with their backing, and with our established forum; with the 500 here that I hope will be 5,000; with the alliance we have also made with Mrs. Eleanor Gimbel and the Citizens Action Committees—which you know are nonpartisan and are spread all over this town, just to make citizens take an interest in their community—I don't see why next year we can't take Town Hall twice a month, have our weekly broadcasts and reach about 10,000,000 people. And we can, and I think we will. [Applause.]

Now, we are going to keep our name and our autonomy and carry on just the same. And we are going to have our subscription membership. You belong to the forum, you don't belong to the Independent Artists and Scientists and Professional Men. You can belong to them, if you are entitled to. We don't bother with that at all. We have our forum membership, and they will all belong to the forum, we hope, at 10 bucks a year. But we are not so sure about you all belonging to them, because you may not all be artists and scientists.

I think we can go places with that very definitely.

Now, the first thing they asked us to do—I would like to get your reaction to this—they said if we hooked up right away we might perhaps have 4 more forums this year, this winter, instead of just 2 more, which we are able to afford at the moment. If you boys and girls here would bring in 10 people we could afford to hold 4 more on our own. So be sure, all of you, that you sign up and belong to this. You get not only the forum but you get our literature. It means we have your name, and if we are having a party you will get the announcement in the mail, if you belong to the forum.

Now, we were going to have, as our next subject, the Punishment of War Criminals. But Jo Davison and Marc Connelly and Mr. March and his charming wife are pretty well excited about something else, and they said they thought the war prisoners could wait. They were excited about the problem of censorship in New York City. I think it is a darn hot subject, because, as a little tip to you, all our "mossy boss-ies" or "bossy Moss-ies"—whichever way you want to put it—if they get away with one thing, it is rumored they are going after the Voice of the Turtle. It is true. You laugh because it is utterly ridiculous. Remember, every 5 or 10 years you have to get up and swat that kind of idiotic censorship on the head.

I would like to go ahead with that forum, and we can get all the literary guys in the world. And if you approve, that will be your next one. [Applause.]

Now, we have seats on April 4 for the Glass Menagerie, which is opening with Eddie Dowling, Laurette Taylor, and Julie Haydon, and we have seats of our own to sell for that. I think everybody who is here surely wants to see that play. This is one way of raising money, and we've got a lot of bills to pay.

That is my little say for the evening and I hope you will approve and give me a hand on this cooperation with the Citizens Committee and Mrs. Gimbel's. The latter doesn't mean money or a real affiliation, but means they will get our literature, and I hope they will come in a great body and will listen to us. On the other hand, we will have a close affiliation with what I call the Jo Davison committee. [Applause.]

Now, is there any urgent question that has come out of the round table?

QUESTIONER. Nothing has been said about VANDENBERG. Where does he stand? He said he wouldn't represent the Republican Party at San Francisco, but something should be said to clarify it?

Mrs. HARRIMAN. Mr. Chariman, he has not refused.

QUESTIONER. He took a very definite stand on Dumbarton Oaks. Where does he stand?

Congressman BENNET. What has that to do with San Francisco?

QUESTIONER. Where does he stand on Dumbarton Oaks?

Congressman BENNET. I don't want to say where Senator VANDENBERG stands. I think he should say that for himself. I think the speech he made went a pretty long way toward confirming Dumbarton Oaks.

I want to say that Senator VANDENBERG is a keyman in the United States Senate at the present time. He controls the thinking, I think, of quite a few Senators there, and I am very hopeful that he will not only participate in the San Francisco Conference, but the results will be such that he will go back enthusiastic about them. You have to look facts in the face; he is a very influential Member of the United States Senate, and we need him. [Applause.]

QUESTIONER. What is Congressman BENNET's ideas in connection with the opposition by the American Bankers Association to the stabilization proposal of Bretton Woods?

Congressman BENNET. I have a big pamphlet in my pocket that I brought along to read on the train. I was a little sleepy and I didn't do so very well with it. I know they are in favor of half of the plan. They are in favor of the part for the International Bank, which is to be organized along the lines conservative bankers approve of. I know they are opposed to the rest of the plan, because they think we are putting all the real money into it, and the others are putting in mostly obligation, which they owe us. The only cold cash they say is going to be put up by Uncle Sam in the form of gold, because we have almost all the gold there is.

I have this feeling about it, although I am not an expert in international finance. They are probably too conservative in their outlook. They are really intelligent people. They have something in their objection. No plan that is proposed of that sort is likely to be perfect. Maybe some of their ideas will be put into practice. I think they should recede somewhat from their viewpoint, and others should recede somewhat, in order to establish something which will help these governments reestablish themselves.

Maybe the proposal of Bretton Woods is not the right thing, but I think it is in the right direction. If any safeguards are needed, I think they can be supplied.

Chairman BARLOW. I would say the bankers have darn near sabotaged Bretton Woods, and they weren't out for little adjustments, as far as I can see. But I may be quite wrong.

QUESTIONER. Miss Lillian Hellman, who just returned from a 4 months' stay in Russia, had an interesting statement to make, in which she said she considered it one of the tragedies of our time that so much misinformation exists about Russia among our people. I think that is an interesting statement in relation to the forum tonight about the problems of United Nations unity. Both Mrs. Harriman and you, Mr. BENNET, said that we needed an informed people, and it is not only among isolationists that this misinformation exists.

Don't you think it is a duty of the Congress or of our Government to inform our people and remove this, what you would call, the tragedy of our time?

Congressman BENNET. It certainly is not the duty of Congress to do that under any stretch of the imagination. That is not the function of Congress. It might be the function of the Government. But in the last analysis I think it is the function of the various boards of education. I think provision should be made for it in the school curriculum—but don't get me started on that. [Applause.] Anybody will agree we don't know enough about any of these countries, not just Russia. We don't know much about many others.

I would like to just say this, since I got a chance to say something here that I really feel strongly about, and I am awfully glad you brought it up. On the teaching of American history in my day—I am not going to criticize present day teachers—when I went to school a very poor job was done. My impression of the British, for example, was that they all wore red uniforms, and that they were called Hessians, or something of the sort, and that they came over here with big armies and tried to collect a tax on tea, or something of the sort. That was the general impression I got.

Now, that doesn't make approaching these international problems any easier. I think we should have the teaching of history as nearly as possible on a true basis and not show nothing but American victories. We ought to know a good many of the American defeats. Somebody ought to show why we got licked. We don't get enough of that.

As for Russia, that's another field about which we know even less. We can come a lot closer home. What do we know about Mexico? What do we know about a lot of places we have to do business with? South America has been mentioned. We know less about that place than we do about Russia. That's an awfully big field.

Chairman BARLOW. It is a field, I may add, if you open it up. It is a good many years ago since Mr. Hitler crept into the crack. That crack of ignorance is the thing that he has worked on more than anything else. He is the one who sows the seeds of anti-Russianism, and that kind of discrimination, and that is one of the main things in the German far-flung technique of stirring up people against their allies and making trouble. And it has been used most beautifully by the Chicago Tribune. And it is just that point of education that has been the loophole into which Hitler's propaganda has crawled.

Mrs. ELEANOR GIMBEL. I would just like to say to the gentleman who asked the question, that I don't think it is Congress who

should educate the people, I think it is the people who should educate Congress. [Applause.]

Chairman BARLOW. That is what this forum is about, and though we are fortunate to have an educated Congress, greater education is needed.

Problems Confronting the Clothing Industry

EXTENSION OF REMARKS

OF

HON. JAMES E. MURRAY

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address which I delivered on April 11, 1945, before the Woolen Wholesalers National Association, Inc., in New York City. The address dealt with the problems arising from War Production Order M-338, and the proposed maximum average price plan of the Office of Price Administration.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I have come here to discuss with you informally some of the problems confronting the clothing industry, our Government, and the consuming public which arise from War Production Board Order M-388 and the proposed maximum average price plan of the Office of Price Administration.

As chairman of the Senate Small Business Committee, I have received a great flood of telegrams, letters, telephone calls, and visitors to my office seeking our aid in bringing about a reasonable adjustment between the demands of the military, the Government control agencies, the consuming public, and the clothing industry. I have gladly devoted a great deal of my all-too-limited time to this important task. The Senate Small Business Committee intends to continue its vigorous program to insure fair and equitable treatment to independent and small business in these difficult war days and in the reconversion period which now, thanks to our good fortunes on the battlefields, lies just ahead.

As chairman of the Senate Small Business Committee, I am particularly interested in the effect of this order on the very small business concerns. These small businesses are dependent wholly on the jobbers for their supplies of materials. It will readily be seen that any order which would adversely affect the jobber would also directly affect the small manufacturer, tailor, and retailer. Therefore, these very small businesses stand to be destroyed by this order unless it can be so formulated as to protect and preserve the small business of the country and their sources of supply. The Senate committee would therefore feel compelled to take the most drastic steps to prevent an order of this kind to be put into effect if it appears it would adversely affect these small business interests.

The last word has not been said on M-388 or M. A. P. My own remarks this evening must be considered in this light for minor modifications of the order have already been made and more are under consideration at the moment. The changing conditions of the war and weaknesses which will undoubtedly be brought about by the administration of the order will require further changes. Nor do I wish to be cast in the role of an expert concerning the interpretations of the administrative purposes and probable effects of this long and involved Order M-388. I am told that many a man who has spent a lifetime in the textile industry and knows it in all its ramifications is not crystal clear concerning the purposes and effects of this order.

I have long been a believer in the necessity of establishing the closest and most harmonious relationship between industry and Government control agencies during this war period when the demands on all of us are so great. Consequently, it was quite disturbing to me to find that M-388 was apparently promulgated without sufficient prior consultation or negotiations with the members of industry. The record shows that only in the last week of January was there a meeting called by the War Production Board at which some 700 representatives of the more than 150 industrial groups affected by the order were present. This mass meeting was hardly the kind of a gathering which could work out the details of such a complicated order. It is small wonder that when it was officially announced some 3 weeks later, on February 19, 1945, many parts of the industry were taken by surprise, and the order failed to take into account the specific problems of many branches of industry. This is not my idea of close cooperation and I have so informed those who are responsible for it.

But in justification of their action, the W. P. B. contends that the acute situation and shortage of time made impractical any thoroughgoing consultation with the more than 150 different textile groups.

As we look forward to the close of the war and reconversion which follows, I am even more certain that we must make very sure that Government agencies, industry, and the general public work in the closest possible cooperation if we are to bring about a transition to peace without great hardship and suffering.

It is my understanding of M-388 that the order was made necessary by the sudden and greatly increased military demands on American textiles and textile products. It seeks to channel a substantial proportion of the limited civilian supply into the most essential items of wearing apparel. Mr. Kenneth W. Marriner, Director of the Textile Clothing and Leather Bureau of the War Production Board, justifies the order on the ground that it is in keeping with W. P. B. orders and practices of the past several years, under which a priority system is set up whereby manufacturers and processors who agree to produce essential civilian goods will be given assistance based upon their past production records in obtaining priorities for goods from the limited supply available. I hesitate to do more than highlight the order because of its complicated and involved nature and because of modifications contemplated.

My understanding is that at the retail level M-388 has the effect of channeling essential apparel items onto retailers' shelves other than the highest-price merchandise. I am informed that in men's clothing, for example, retailers will be deprived almost entirely of suits wholesaling above $32.25. The retailer is further affected by the application of M. A. P., which I am informed may provide merchandise at the average maximum price to be fixed by the base period, resulting in rollbacks that may well affect a substantial proportion of all woven garments.

At the mill level, I am informed that the spinning of worsted for civilian supply has been frozen until June and that what may happen thereafter depends entirely upon military needs and activities. I am informed that W. P. B. directives issued on woolens cut off about 50 percent of the civilian supply, including certain special programs for such items as mackinaws, snow suits, and legging sets. When the most gloomy view is taken of this mill situation on woolens, it would appear that the substantial part of the yardage available for civilian uses will go to fill highest priority orders. The amount available for free goods will consequently be insignificant.

The M-388 order appears to affect the manufacturer of garments in several ways. The order provides AA-4 priority ratings to those manufacturers of essential products so that they may receive piece goods. It would work out so that in men's suits priority assistance would be given to cover 50 percent of the quantity of suits produced in each quarter of the base period, 1943, at prices, however, not above $32.25 wholesale. For students' suits, priority assistance would reach 80 percent of the base period of production and a maximum wholesale price of $17.50. On ladies' suits, however, the priority assistance covers only 20 percent of base period production and reaches a maximum wholesale price of $22.75. I believe some substantial relief is being considered on this item. I am further informed that the AA-4 rating does not guarantee manufacturers that they will get such percentages of piece goods. Rather, this priority has been called by some a hunting license. The order also lists certain essential articles which do not require priority ratings but can be made from free wool goods such as separate trousers, overcoats, etc. But, I have been led to believe that the amount of free goods which will be available at the woolen mills may be very small indeed.

So much for the highlighting effects of Order M-388. What can be done about this situation? The first serious charge leveled at the order is that it contains features and provisions which make it unworkable. It fails to take into account adequately certain inventory provisions essential in the industry. It has been written in terms of calendar quarters whereas the industry is of a seasonal character. The time intervals for manufacture seem to have been insufficiently considered and problems of geographical demands likewise have been slighted.

These particular unworkable features have been brought to the attention of W. P. B. and I am pleased to inform you that some important amendments are in preparation to better these conditions.

I am certain that the Senate Small Business Committee, and I, as its chairman, will make every effort to see that further examination of these essential details results in reasonable modifications of the order.

This order is made necessary, let me repeat, because of the sudden and drastic revision of military requirements for cloth and textile products. I am told that these requirements are unusually high and sustained in considerable part through the third and fourth quarters of the calendar year 1945.

I am one among those Members of the United States Senate who has given fullest support to the Army leaders in their attempts to provide the matériel needed to wage a successful war and bring it to its earliest possible conclusion. We civilians in Government, industry, and private life will make any and every sacrifice to insure that the Army does not arrive too late with too little. But this does not mean that the civilian branches of Government must abdicate to our military leaders. My colleague, Senator WAYNE L. MORSE, the junior Senator from Oregon, speaking in the Senate on April 2, 1945, said, in part:

"I will pay as strong a tribute, and with as much sincerity, as any Member of the Senate to the magnificent job our military and naval forces and their great leaders have done on the fields of battle to keep Americans free men. Mr. President, let us be frank * * * by training, by responsibility, by point of view, on the whole those in charge of the military and the Navy are men of action. They are men who want immediate results. * * * Mr. President, the argu-

ments of the Army and the Navy in regard to the problem of civilian production carry very little weight with me because, having observed them function in the field of civilian production for 2 years, I much prefer to leave the problem of civilian production in the hands of free employers and free labor in this country unrestricted by the type of dictatorship that the military and naval officials, at least, shall we say, unconsciously are seeking to impose upon us."

This statement was made in reference to the manpower bill, but it so clearly indicates the need of a limitation on military leadership in civilian matters that I consider it particularly apt with reference to M-388. I would deplore any suspicion that that order has been dictated by the military leaders. It is my firm conviction that the W. P. B. in reaching its judgments to be expressed in M-388, should take into account and weigh carefully all of the demands, both military and civilian, upon the productive machinery of this great Nation.

I am wondering whether the Army has determined its greatly increased demand for textiles, including the outfitting of a new French Army and the provision of essential items in the first 6 months of liberation for war-torn areas, in the light of what Dr. W. Y. Elliott, Chief of the Civilian Requirements Section of the War Production Board has reported concerning, for example, conditions in France. He suggests that the French textile industry could go far toward supplying the present needs of the American and French Armies. It could also supply the numerous uniforms that have to be made up for the special forces attached to our armies, in connection with the occupation of Germany. We have the raw materials; our warehouses are bulging with cotton and wool; yet, we are seeking to provide these foreign demands with American-furnished goods at the expense of the depleted wardrobe of our own civilian workers.

Yes; I am aware of the probable answers which the Army chiefs may give concerning the tight shipping conditions, break-down in fuel supply in France, etc. But the "on the ground" survey recently made by Mr. Elliott concludes that these are by no means as final and determinative as Army leaders would have us believe.

I have said before and must repeat again, that it is the obligation of the War Production Board to so adjust military and civilian requirements, taking into account every possible source of supply so that we can be absolutely certain that the demands made upon American civilians are just and necessary. The changing character of military decisions in the immediate past, not sufficiently well explained by the course of military events, have resulted in sudden cutbacks and equally sudden step-ups in requirements of a wide range of items. Such a course cannot be accepted as a normal pattern upon which to base any reasonably sound program of action. This becomes even more pointed as victory in Europe becomes almost a matter of days.

I am not prepared at this time to discuss the nature and effect of the proposed M. A. P. order because that order has not yet been finally promulgated by the Office of Price Administration. It is my sincere conviction, a conviction which I am sure you share, that the principles of sound price control are imperative if we are to avoid unstable price fluctuation and probable inflation. I believe, because I have discussed this matter with the leaders in the textile industry, that you too are committed to such a program of price control—that this industry in no wise seeks to be exempted from the administration of proper price-control measures.

It may be that the ultimate solution of the difficulties which the textile clothing industry faces, because of M-388, will be found in the early approach of VE-day. I do not subscribe to the theory that this Government's production and purchasing policies must be predicated on the theory that the European war will continue indefinitely. I am, however, in full sympathy with the need of this Government and our allies to supply the essential repair and replacing equipment so that these countries at the earliest moment can put their own manpower at work to provide the food, clothing, shelter, and other essentials of life which they need.

Mr. James F. Byrnes in his recent report on War Mobilization and Reconversion, indicated a very substantial reduction in the Army supply program in the first quarter following VE-day.

While it is true that he did not refer specifically to textiles and while there may be some increased demands in certain lines, such as cotton fabrics and even in some woolen garments, as our activities increase in the Pacific Theater, competent authorities declare that the Army cannot justify their textile requirements after VE-day. If this is true substantial cut-backs can be expected when Germany falls. I know, for one thing, that the Army expects a sizable reduction in its personnel; these returning men will again become civilians and must be clothed as civilians.

While I believe the end of the war in Europe will offer the first major hope for relief from some of the more serious effects of M-388, I do not by any means wish to imply that that result will automatically follow. What happens when VE-day comes must be written into requirements, orders, policy declarations, and carried out in the administration of the control agencies. We must all adopt a realistic approach to the situation confronting us.

Once again I repeat, in closing, that the armed forces must have everything they need in order to wage a two-front war in such a manner as to bring victory to us at the least possible sacrifice of our sons and brothers and in the quickest space of time. But their demands for textiles and textile products must be subjected to the careful screening of the control agency, the War Production Board, which the Congress has set up to do just this job. The result of that screening must be a program which accomplishes the military purposes, while affecting adversely the civilian economy as little as possible.

As Chairman of the Senate Small Business Committee, I am continuing conferences and negotiations on M-388, which were begun at the insistence of the small and independent businesses affected by that order. We intend to protect to the full extent of our ability the legitimate interests of these businesses, and we seek to do so in a cooperative spirit for the benefit of the American people.

These remarks are not intended to be a final statement on this subject—but rather a preface to our deliberations here today and to other meetings and negotiations which must be held in the future.

Tragedy—and a Challenge—Face America

EXTENSION OF REMARKS

OF

HON. ARTHUR CAPPER

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. CAPPER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an interesting article by the Senator from Wisconsin [Mr. LA FOLLETTE] on the death of Franklin D. Roosevelt, which appeared in the Progressive Magazine of April 23, 1945.

There being no objection, the article was ordered to be printed in the RECORD as follows:

TRAGEDY—AND A CHALLENGE—FACE AMERICA

(By Senator ROBERT M. LA FOLLETTE, Jr.)

The death of Franklin D. Roosevelt came as a shock to the Nation and the world. It removed from the global stage one of the most dramatic and colorful figures ever to tread those boards. No one could come in contact with him without realizing the great quality for leadership which he possessed to so marked a degree. Handsome, genial, with a flare for the dramatic and an extraordinary feel for timing, he was a man who had a sixth sense in dealing with people as individuals or in the mass. I have never known anyone who had more personal and social charm.

Elected President in the most serious economic crisis this Nation has yet faced, he steadied the ship of state and convinced the people they had nothing to fear but fear. Against the background of the economic crisis he pressed for social and regulatory reforms which will have a lasting influence upon the destiny of the Nation.

Contrary to the general impression, I never found him unwilling to listen to opinions which differed from his own. I never pulled my punches in discussing questions of public policy with him and, so far as I was able to tell, he never harbored any resentment because of my frankness.

Naturally, the sharp, fundamental disagreement over foreign policy lessened our contacts, and with the entry of this country into the war and the terrific additional burdens it entailed upon the President, I saw him infrequently during the last few years.

We are too close to the momentous events of the past 13 years to form any definitive estimate of Franklin D. Roosevelt and his policies. The final historical judgment must be reserved until the consequences flowing from his life and actions are revealed by the passage of time.

The precedents he shattered, the domestic and foreign issues he dealt with, the physical handicap he so gallantly overcame, his ability to win support of the rank and file of people, the fact that he died in office with victory in a global war in sight—all these are factors which will affect any measured appraisal of his virtues and his faults.

But no one questions that he will loom large in the annals of time, or that he has profoundly influenced the course of history and the future of our country and the world. His memory will be cherished by millions of his fellow men.

America's thirty-third President took over the helm a few hours after his captain died. No man in our time has faced a greater challenge than this man who came up from being a haberdashery clerk, to county judge, to United States Senator, to Vice President, and now to the Presidency of the most powerful Nation on earth in the most crucial era of modern times.

A tremendous responsibility has fallen upon President Truman, who assumes the power of the greatest office in the world in the midst of an unfinished war of unprecedented magnitude and with the shape and character of the peace to follow it in the process of formulation. He is confronted with the traditional necessity of carrying on the policies of his predecessor without the freedom of action which would be his had he been elected President. His every move will be watched and his slightest decision will be given an unwarranted significance.

President Truman's personality, however, has won him a host of close friends in Congress as well as in the Executive branch of the Government. His outstanding work as chairman of the Senate Committee to Investigate the National Defense Program gives him a background of knowledge concerning the war effort unequaled by any other person not responsible for its conduct.

No man in public life since the Civil War has been on a tougher spot. Yet he already has the good will of his fellow countrymen with their spontaneous and sympathetic appreciation of the enormous difficulties he faces. I know he will give to the utmost the best that is in him. I have great hope that it may meet the occasion.

Battle of the Warsaw Ghetto

EXTENSION OF REMARKS

OF

HON. WILLIAM LANGER

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address I delivered at the Never-Back-to-the-Ghetto rally, held in Carnegie Hall, New York, April 19, 1945.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman, ladies and gentlemen, we are met here tonight to pay tribute to a gallant band of men and women who 2 years ago fought to the death the common foe whom our victorious armies have at last beaten to his knees. They fought so gallantly, against odds so overwhelming, that what might otherwise have seemed a mere street fight won a place among the world's great battles.

It was a battle in our common war. Lesser battles have won great rewards for warriors. How have the United Nations rewarded the warriors of the battle of the Warsaw ghetto?

How, indeed, have the United Nations rewarded the warriors who were the first of the United Nations? Who were fighting the vicious war monster a full 6 years before Poland became a member of the United Nations by being invaded? Whose casualty rolls surpass the total casualty lists of 90 percent of the United Nations combined?

How are we rewarding those valiant warriors—those who remain of those valiant warriors? We are rewarding them by letting them fight more and more battles of the ghetto—unsupported, unaided, unrecognized.

We welcome to the ranks of the recognized United Nations countries and miserable kinglings who short weeks ago were actual enemies of the United Nations and the cause of the United Nations. We invite them to sit at the council in San Francisco which is purportedly to decide the shape of the peace to come. We lay down the red carpet and we bow them into the council halls. But we don't even open the back door to a man or a woman who will speak for the few survivors of the brave bands of Hebrews who fought and still fight from the Rhine to the Jordan.

I am not speaking of the Jews who are fighting valiantly in the American Army, the Canadian Army, or any of the armies of the United Nations in which they serve with their fellow countrymen of many creeds. They are Americans, and Canadians, and Dutchmen, and so on; and they are acquitting themselves nobly, upholding the tradition of their ancient heritage under the banner of the country to which they have willingly given their allegiance.

No it is not because of their efforts that their Hebrew kinsmen in Europe and Palestine seek the recognition that is their due. The brave Hebrew soldiers, for the most part fighting underground, have earned their own right to recognition. And it is this acknowledgment that they demand: That they shall be recognized as a nation, and as a full ally of the United Nations, and as a full participant in the councils of the United Nations.

There is no question of humanitarianism here any longer—although one would think that on humanitarian grounds alone, a decade of persistent persecution, torture, and death would have earned the Hebrew people of Europe and Palestine the right at last to life, honor, and national dignity. No it is a question of practical justice and practical foresight. At San Francisco next week will meet delegates of forty-odd national sovereignties. They will endeavor to shape the course of the peace that we hope will endure for all eternity. May God grant them success in their endeavors. All the sovereign peoples of the world will sit there who have earned the right to sit there. All but one. The Hebrew people—a sovereign people, owing allegiance to no nation but the Hebrew nation—will not sit there because no one invited them to sit there.

Because they didn't earn the right to sit there? We know better. We have seen how they have earned that right—a hundred times over.

Then the sovereign peoples who have earned the right to sit there will make some provision for bringing in those peoples who didn't earn the right to sit there, because they stood by and preserved a questionable neutrality while the Axis beast sought to ravage the world. And still the Hebrew people will not be invited.

Why? I do not know why. There is no reason, there is no logic, there is no justice in it. Therefore I, who make some pretense to being a reasonable, a logical, a just man, cannot say why. No one can say why. So no one says anything.

The subject is ignored. Perhaps it is ignored in the hope that if no one pays any attention to it, the problem will disappear. This line of reasoning has some cogency. The problem has more than two-thirds disappeared already—because more than two-thirds of the people involved in the problem have disappeared—disappeared through the gas-chambers, the slaughter camps, and the extermination points. Two-thirds of the Hebrew people of Europe and Palestine have been exterminated. The remainder are rapidly joining the ranks of the slaughtered.

Is this the solution the statesmen of the United Nations are waiting for? Is this the sort of solution to the world's problem for which we are spending our blood and our youth? I say it is not. And I say we must let our leaders know that it is not. I say we must let the leaders of our British allies know it is not. I say we must tell our leaders and the leaders of Great Britain that we have fought this bitter war to restore the dignity of man, not to drive it deeper down.

We must tell them that the Hebrew people have earned the right to national dignity, to national honor, to national restoration. They must have that national dignity, that national honor, that national restoration while some still remain alive to enjoy it.

You, who tonight enjoy the rights of free men, must exercise those rights so that all men everywhere may enjoy them. You must fight and fight and fight to make the San Francisco Conference what the common people everywhere demand that it shall be—the greatest successful effort for peace that ever took place in the history of the world.

Address by Former Senator F. Ryan Duffy at Memorial Services for the Late President Roosevelt

EXTENSION OF REMARKS

OF

HON. JOSEPH F. GUFFEY

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. GUFFEY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address delivered by our former colleague, Hon. F. Ryan Duffy, now United States district judge for the eastern district of Wisconsin, at a memorial service for the late President, Franklin Delano Roosevelt, at Milwaukee, Wis., on April 15, 1945.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

After years of struggle, sacrifices, and heartaches due to the great World War, our people were cheered in recent months because they thought they could detect the dawn of a new day. Victory in Europe seemed near at hand. The bravery of young Americans was bringing defeat after defeat to the unspeakable Japs; the Dumbarton Oaks Conference, with its fine hopes for the future, had been held; our great President had returned from Yalta; the San Francisco Conference had been called. Our people knew that a program for enduring peace was closest of all to the heart of our President. His international stature was great; his influence among the leaders of the Allied Nations was tremendous. And then, like a bolt of lightning from the blue sky, came the unbelievably shocking and paralyzing news of the sudden death of this great world figure. Our citizens in all walks of life were dazed. It was news they could scarcely believe. Its import they could not comprehend. To most of our people there was a sense of personal loss, just like the passing on of a member of the immediate family. A nation paused and bowed its head in sincere and intense grief. And today the mortal remains of Franklin Delano Roosevelt were committed to the earth at his beloved family home at Hyde Park on the shores of the Hudson River.

What manner of man was this who was held in such high esteem by so many of the people of the world? How come that so many of even the humblest of our citizens knew deep down in their heart that this man was their friend?

He was a man of splendid personality, and had great personal charm—the most magnetic man I have ever met. He inspired confidence in all with whom he came in contact. Whether it was Prime Minister Churchill of Great Britain, or Premier Stalin of Russia, or Chiang Kai-shek of China, they all respected him for his high ideals and for his integrity of purpose.

The people of the world soon realized that he believed in deep fundamental principles for the betterment of mankind. He proclaimed the "four freedoms"—freedom of speech and of religion and freedom from want and fear—as fundamental to perpetual harmony among the nations of the world. When tyranny and persecution reared their ugly heads, he vigorously denounced them. He despised intolerance in any form. His heart beat in sympathy for the underprivileged and the less fortunate. He was the champion of the oppressed and the downtrodden. Yes, the "little people" all over the

world loved him and had great reverence for him.

Mr. Roosevelt first entered public life in 1910 when he was elected a State Senator from Dutchess County, N. Y. His independence and his disdain for a powerful political boss early brought him to public attention. Limitation of time prevents more than the mere mention of Mr. Roosevelt as Assistant Secretary of the Navy and as Governor of New York. When he was elected President in 1932, our Nation was in the throes of a devastating and paralyzing depression. Thirteen to fourteen million of our citizens were unemployed. Despair was in every heart. Under his guidance and program of humane legislation recovery was rapid. But even as our Nation emerged from the depression, President Roosevelt detected disturbing rumblings from across the seas.

I recall on Washington's birthday in 1935, when Mr. H. W. Story of this city and I had a conference with the President in his study in the White House, we were his only visitors that day. While the subject we were to discuss was unemployment insurance, yet the President spent considerable time telling of his grave apprehension of the Hitler movement and how he feared it might bring the horrors of war to Germany's neighbors and perhaps to other nations of this world. And shortly after that Mr. Roosevelt began to insist more and more upon increased appropriations for our Navy and for our Army. I know how sincere his interest was because it happened I was a member of the Senate Appropriations Committee, and was entrusted with the duty of assisting in the endeavor to get some of the increased defense appropriations through the Senate. I state frankly to you here that if it had not been for the powerful influence of the President, many of the increased appropriations would never have been passed. He was driven to the expedient of diverting P. W. A. funds from ordinary construction projects to build much needed battleships, cruisers, and destroyers.

It was at the President's insistence, before we were attacked at Pearl Harbor, that the Selective Service and Training Act was passed which provided for a peacetime army, which proved to be of tremendous value in stemming the tide of the aggressors when war was forced upon us. Who here can deny but that the entire Allied cause might have been lost had it not been for Franklin Roosevelt's vision and insistence that this country be adequately prepared for any eventuality? If we had waited until after Pearl Harbor, it might easily have been too late.

While most Americans realize the heroic efforts which our President made to provide a program of adequate defense for our country, many have forgotten the desperate effort he made on the evening of September 28, 1938, to avoid a world conflagration. It was that night that he made his direct appeal to Adolf Hitler.

You will recall that in March of that year Germany had taken over Austria. Everything that Hitler had said seemed to point to his determination to bring the armed might of Germany crashing down upon helpless and poorly defended neighboring nations. The war clouds over Europe became blacker and blacker. From frightened humanity the anguished cry went up, "Is there no other way than war?" President Roosevelt at first addressed a communication to Chancelor Hitler, and to the Prime Ministers of France and Great Britain. Hitler made a reply which indicated his mind harbored no thoughts of peace and his blueprints for the future were war maps. Almost in desperation the President of the United States then addressed a message direct to Hitler, in which among other things he said, "The world asks of us who at this moment are heads of nations, the supreme capacity to achieve the destinies of nations, without forcing upon them as a price the mutilation and the death of millions of citizens." The President was expressing the opinion of the great majority of our people when he continued, "The conscience and the impelling desire of the people of my country demand that the voice of their Government be raised again and yet again to avert and to avoid war."

While the appeal of our President fell upon the ears of a madman deafened to any appeal for peace, and who apparently had long before September 1938 determined to advance his personal ambitions at the expense of the life and blood of so many millions of human beings, yet this personal appeal to him emphasizes that always the great concern of President Roosevelt was to try to prevent sorrow, heartaches, and destruction among the peoples of the world.

Yes; the President of this great Nation was willing to go hat in hand and humbly beg the war-mad dictator to change his course if, by so doing, peace on earth might be preserved. How great was his love for his fellow men.

The day before he died President Roosevelt prepared a brief address which he expected to deliver to the American people on last Friday night. It was not delivered. The grim reaper intervened. But listen to these last words:

"We as Americans do not choose to deny our responsibility.

"Nor do we intend to abandon our determination that, within the lives of our children and our children's children, there will not be a third world war.

"We seek peace—enduring peace. More than an end to war, we want an end to the beginnings of all wars; yes; an end to this brutal, inhuman, and thoroughly impractical method of settling the differences between governments."

Yes; his voice is now stilled, but his spirit lives on. May that spirit guide a confused and bewildered world to a lasting and enduring peace.

His death was a tragedy to the peace-loving people of the earth. His superb leadership and his inspiring vision will be missed. But the American people have it in their power to erect a living memorial to our departed President. Let them unite behind our new President who seeks to carry out the Roosevelt program of bringing lasting peace to the nations of the world.

If that time comes when war, with all its misery, is no longer the instrument of settling disputes among nations, due in part at least to the foundation laid by Franklin Roosevelt, how the peoples of the world will bless him. And we can imagine that we hear a voice from the heavens saying, "You have run a good race; you have fought a good fight; you died in the service of your country. 'Well done, thou good and faithful servant,'" to which the grateful people of the world give answer, "Amen."

Address of W. Kingsland Macy, Chairman, Suffolk County Republican Committee, Great River, Long Island, N. Y.

EXTENSION OF REMARKS

OF

HON. EDGAR A. SHARP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. SHARP. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address of Hon. W. Kingsland Macy, regent of the State of New York, former chairman of the New York State Republican Committee, and chairman of the Suffolk County Republican Committee, made following his election as president of the National Republican Club, and at a meeting held in the clubhouse, 54 West Fortieth Street, New York City, Tuesday evening, April 24. Mr. Macy, a member of National Republican Club for 25 years, and chairman of its executive committee for the last year, succeeds as president, Representative RALPH W. GWINN, of Westchester County:

Officers and members of the National Republican Club, tonight you have honored me by election as your president of this club. You have given me opportunity to fill a very important post—a post which has been filled with such distinction by so many able executives and leaders. I pledge to you that I will strive to meet the responsibilities you have given me with every bit of energy and ability I may have.

This club has a long and honorable history. It is steeped in tradition and genuine accomplishment. Often it has been a rock of strength amid tumultuous political seas. And, it might be added that not infrequently it has absorbed as little fiscal nourishment from being a lone sentinel among such seas as a rock generally absorbs.

The National Republican Club has been host to many great men. Its walls have resounded with the thunder of the voices of great orators. Its halls have echoed with the spontaneous applause of many thousands—thousands who have derived enjoyment and inspiration from the Republican doctrines enunciated by those who addressed us. Our foyers have been graced by leading citizens, leaders of our party, men from all walks of life, visiting us to enjoy our warm hospitality, and avail themselves of the club's accommodations, so graciously offered. Political history has been made here; great administrative problems have been discussed here; solutions of national questions have here been reached.

Why, then, you ask, as many ask, does the club, on occasion, run upon the rocks of financial coast lines? Well, a few of the answers might be found in the following:

The Republican Party has lost the last three national elections. That's not news, but defeats do have an effect upon party organizations. The club, though in nowise intended as a closely organized vehicle of the Republican Party, is nevertheless a valued one. And it does no good to say to those who, in past years, have left the active service of the party, "Oh, ye of little faith." Human nature being what it is will not be changed particularly by platitudes in stained-glass attitudes. But party reverses do not make for party prosperity, and until the advent of Governor Dewey, Republicans of the State had not elected a Governor in over 20 years. Further, Republicans of the city have not enjoyed the prestige that they rightfully earned in their fight in the good cause of anti-Tammany government.

I think that the club in latter years has lost in prestige through laissez faire and failure to stand out boldly for high principle, and I say this in no spirit of criticism. After all, any institution, any cause, any candidate, any industrial product is only as good as its consumer acceptance, and consumer acceptance can only be gained widely through merchandising and figurative window displays of "sales leaders." Retail merchants declaim, "Bring the public into the stores, and we'll sell 'em."

I think the potentialities of the club as a city, State, and national unifying force of and for republicanism has escaped men high in Republican councils, and this potential has not been brought home with sufficient force to those who might well join, but who have not.

I think, too, that perhaps insufficient importance and public notice have been given the work of club committees, and to their reports in particular. This can easily be remedied.

I am inclined to think that city, State, and national Republican committees may have been prone to regard the efforts of the club as possible threats to their own organizations, rather than as a perfectly logical and useful supplement and help to these all-important groups.

In the foregoing connection, it could be added that the fact that the club itself, as an entity, wants nothing in the way of material political advantage may well have been overlooked by those at the head of our party in city, State, and Nation.

While insisting that this club should not and cannot be a ladder placed outside the walls of county, State, or national organizations, placed there for the purpose of the ambitious gaining entrance to lofty vantage points through the second-story window, I do think that the club would profit, as would the party, if greater recognition were given the club and its members when useful constructive thought accrued to the party from the club. That is in no way contradictory to anything I have said previously.

It is my further view, that if a greater degree of solidarity were developed among members, the club would profit, and the individuals would gain.

I think the club may have erred in past years, by placing an inadequate accent on youth; perhaps it is that our appeal to youth has been incomplete. But, youth is fighting this war; the men who return will run this Nation of ours—one day—perhaps not too far distant. So, in our future planning let us put more emphasis on youth—seek to make the club more attractive to youth, albeit retaining the best features of decorum and inherent dignity. But this is an age of youth which has come into its own during our generation. Who would protest this? Definitely not your new president.

Finally, we can hardly do better than to revert and adhere to what was so succinctly and effectively set forth in the National Republican Club's original charter adopted in June of 1887, namely: "To promote the cause of good government throughout the United States; to advocate, promote, proclaim, and maintain the principles of the Republican Party; to promote an active interest in politics among all citizens of the United States." That was the conception of the club's objectives held by Col. Andrew B. Humphrey, who was the last of the club's original founders when he passed away recently in his ninety-fifth year. Colonel Humphrey was one who never wavered in his republicanism. He was disappointed when the club seemed to stray from the precepts he revered, but before his death his enjoyment in the club's activities was again revived in that he felt that the club's course had been directed once more in what he firmly believed to be the right and proper direction to fulfill its predestined purpose.

The stunning death of President Roosevelt caused abandonment of the particular type of address I had in mind. Frankly, with the Nation still rocking from the impact of the death of their courageous war leader, it is too early to outline any specific plan of action. More important, it is vital that no political group, or political party, launch mortar fire at President Truman while he is valiantly striving to pick up the reins of Government.

The Republican Party, for 12 long years, disagreed with many of the philosophies of Mr. Roosevelt. Thinking citizens were not infrequently appalled at the vast power he had taken into his own hands. They wondered, as you and I often wondered, what would happen to the Nation in crucial war days if the Almighty God, in His infinite wisdom, called home his valiant soul? We feared the catastrophe that might well follow. I know that I was so moved by this very probable peril, that I wrote to the New York Herald Tribune about it in a communication published in that newspaper in full on June 25, 1944.

Conditions leading up to the last Presidential contest were not unknown. Well-informed people had a perfect awareness of what was taking place. The lack of surprise on their part, which attended the fateful news that finally came, attests to this. It is a tribute to the sportsmanship for which the American people are noted—in which sportsmanship newspapermen are entitled to full measure—that so little emphasis was made publicly of the precarious condition of our late President's health. However, it is not without significance that the nomination for Vice President was so much to the fore at the Democratic convention in Chicago last summer.

It is an interesting matter of record that President Truman, of the seven Vice Presidents of the United States, including himself, who have succeeded to the higher office, is not the one with the longest remaining term in view. President Tyler had all but 1 month of the full 4 years following President Harrison's death, while President Johnson only a fortnight less, after President Lincoln's assassination. President Truman, of course, lacks almost 3 months of the 4-year term. Theodore Roosevelt, when he succeeded to the Presidency at the age of 42, the youngest President of the United States, had not quite 3½ years remaining after the assassination of President McKinley, and President Arthur only a few days less after President Garfield's assassination. President Fillmore had 2¾ years following the death of President Taylor, and President Coolidge had only a little over a year and 7 months remaining to him of President Harding's term at the latter's death.

But, even with the passing of our war leader, our democracy is built upon such solid rock of tradition and common sense, that while the Nation's structure trembled for 48 hours, it did not crack, nor were its firm foundations impaired. Vice President Harry S. Truman rose to the occasion; with swift, certain, and reassuring actions and words he calmed a troubled people and a troubled world. God grant that he may be able to perform the crushing tasks before him, and that from out this welter of blood and battle, a lasting peace may come. God grant that tryants—alive or still unborn—will perish from the earth before their sinister philosophies may again plunge the world in war.

Further, let us be thankful for the strength drawn by the American people from their way of life—from their Nation. Thank God for American courage and stamina. Thank God for our valleys, our plains, our mountains, our foothills—our snows and rains and fogs and brilliant sunshine—all contributing component parts to that magnificent manhood and womanhood that is so peculiarly, so convincingly, and so beautifully American. Thank God for the courageous European strains that have been brought here; for the pioneering spirit of our ancestors in our own land who spanned this continent by covered wagon, ox cart, mule back, plodding horses, and on foot. Thank God for that American spirit which shouted to the high heavens—which sent its clarion call to God—"Onward, ever onward, with you my Lord, at our side."

Yes; America met the devastating emergency which came like a lethal blow out of the Georgia blue. Harry Truman, prayers on his lips, picked up the fallen standard of Government, and made it clear he needed the help of the American people and their Congress. And the apparent restoration to Congress of its powers, after long last, cannot help but be an excellent thing for the Nation and the world. Such restoration will make for legislative and administrative stability. Such restoration will insure that should death strike again—and God forbid that this should happen—the Congress and the people would have a clearer conception of the vast problems before them, the Nation, and the world.

With such all-embracing problems awaiting solution—not the least of which is the opening tomorrow of the San Francisco Security Conference, held in the Golden Gate City, any far-reaching suggested political program of mine would appear to be completely lost—and rightfully so—against the gigantic backdrop of the world-crisis scene. However, I think I can say the following:

The strength of Franklin D. Roosevelt in political contests and in many of the policies he promulgated had its genesis in his interest in and affection for the so-called little people, forever being pushed around. And this despite the fact that by birth, wealth, and social position Franklin D. Roosevelt was remote from the underprivileged, the oft-mentioned "one-third of a Nation." Yet, despite all this, Mr. Roosevelt was a keen student of social justice, and a firm foe of religious and racial discrimination and intolerance.

Now the Republican Party, long since, proved its interest in the underprivileged, and both National and State records of the Republican Party disclose this beyond a shadow of any argumentative doubt. And in this State, Republicans everywhere have applauded the strong stand taken by Governor Dewey in matters covering liberal, social, and humanitarian laws which he has caused to be enacted since he became the State's Chief Executive.

I know, and I am sure you do too, that the Republican credo in this State has been on the side of social laws, and this has been emphasized so many times in the last decade by the Republican-controlled State legislature. But one thing stands out, and that is, even conceding the magnificent intent and purposes of the Ives and antibias job bill enacted into law upon the recommendation of Governor Dewey at this year's legislative session, the fact remains that the need for the passage of this law clearly demonstrated that the State and the people of the 62 counties had failed to inculcate into all the people the real purpose and meaning of American democracy. But the various creeds and racial groups and the different organizations representing all minorities must aid too, and very probably can do so more efficiently by tying in their efforts with those of the State and the Governor.

I urge upon you that, in our future political deliberations we lend what support we can to the aims and aspirations of the distaff side in securing equal rights. Let us, during our deliberations, give wholehearted support to the Nation-wide drive to write into the Constitution the just proposal calling for equal rights for women.

Recall, if you will, that on March 24, last, both Houses of the State legislature unanimously memorialized Congress to adopt and send to the several States the equal-rights amendment, now pending before Congress. Surely women for their work in war, if for no other reason— and there are many other reasons—merit equal rights, equal opportunity, equal protection, equal treatment. What intelligent man or woman can say them nay?

I do think, however, that we may all subscribe to the thought that our corresponding secretary, Mr. Edward Rager, has so cogently set forth in the current club bulletin which he edits so ably and carefully to such advantage in keeping our widespread membership informed. It is suggested that some limitation be placed upon taxation so that the people generally may have a little advance notice as to how to budget their taxes as with other expenses in a somewhat orderly

fashion. Further, that Government regulation of everything be pruned as extensively as possible, allowing, of course, for the maintenance of fair trade practices and the prevention of monopolies by capital or labor. Thus free enterprise, for which I assume we all stand, should be afforded the widest opportunity.

So much for a few generalized but important subjects meriting our attention, and then back again to the club itself.

Fundamentally, I think well of that epigram of the Reverend Father Gannon, who said in a recent speech: "When carrying a torch for a cause or an ideal, do not run so fast as to extinguish it." I think there is much truth to what the learned father said. Therefore, I will not jettison my complete cargo of recommendations or thoughts all at one fell swoop. However, a few additional statements would not go amiss.

As a stanch believer in the two-party system and having faith in the responsible leaders elected thereunder in each party, it has always been stimulating to me to find that those well grounded in party affairs as well as in history accorded great importance to the processes of party machinery and the responsible elected party membership.

If I recall aright it was President Coolidge who spoke in such complimentary vein about members of the county committee in the one-hundred-thousand-odd election districts of the country when he said that while we have faithful committee members we are additionally assured of worthy public officials; and he went so far as to say again, if my memory serves me correctly, that without such committee members popular government might almost fail of success. And one of our opposite political faith, a noted authority on government and history, Woodrow Wilson, spoke of the extraordinary development of party authority in the United States and how outside the Government itself there had been so elaborate and effective an organization of parties. He said that there was no interior organization to hold the various independent units of Government in harmony and cooperation and that, therefore, an exterior organization had evolved, which exterior organization he contended was the political party.

Obviously we will get more members in proportion as we do those things, stand for those principles that make appeal constructively. I have always felt, and I still strongly believe, that our party has made its greatest strides when sincerely and diligently it has sought to be an instrumentality for good government. And, in this connection, I would emphasize that we are not as much interested in making Republican policy in city, State, or Nation as we are in stimulating thought leading to more far-reaching Republican policies as arrived at by local, State, and National units of the party.

Again, the club could well become the means of further corralling to its membership and recruiting for the Republican Party many more substantial citizens, not now active in political affairs and apparently not available for recruitment in district organizations.

Not only that, but I would like to see returned to active membership in the club a considerable number of the party's elder statesmen who have resigned, or if still members, who have drifted away from active participation. The Republican Party and this club need all the brains they can muster if party success in the future is to be achieved. If we continue to be aloof from those who have served the party so well in past years, then we are closing our doors upon experience, ideas, and proved working capacity. It is also my earnest hope and wish that our club may attract to its membership all those national leaders and State leaders and others prominent in our party's affairs throughout the length and breadth of our land, who are not already included on our roster.

As I proceed with my new task of serving you faithfully, I shall frequently place before you additional recommendations, additional thoughts on club development, club management, and political issues. In the interval I want to pay my personal tribute to my two immediate predecessors, with whom I have had the fortunate opportunity of working very closely, and the other outgoing officers for their splendid service and their many sacrifices of time, energy, and money in behalf of our great organization. I speak more particularly, of course, of RALPH GWINN, who has but latterly entered upon an illustrious career in the House of Representatives, and Thomas J. Curran, who carried the party banner for United States Senator in the last Presidential election, and who then and is now so ably conducting the important office of secretary of state in this State.

Then, later, when my term of service has been completed, I will be happy if you find I have done well. Such commendation, unspoken or articulated, will be my prized possession, and I say to you again, I will leave no stone upturned to prove to you that you have not misplaced your confidence.

Thank you very much.

Moonbeams That Unite

EXTENSION OF REMARKS

OF

HON. BURNET R. MAYBANK

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 25 (legislative day of Monday, April 16), 1945

Mr. MAYBANK. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial appearing in the Charleston (S. C.) News-Courier of January 12, 1945, in reference to a speech made by the former distinguished Postmaster General and chairman of the Democratic National Committee, Hon. James A. Farley.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MOONBEAMS THAT UNITE

James A. Farley, former Postmaster General and now chairman of the Coca-Cola Export Corporation, in an address to the National Foreign Trade Convention last October, quoted this from an address of Miss Ellen Wilkinson, member of the British Parliament and chairman of the British Labor Party:

"This war has produced many surprises but none, I think, more important for the future than the discovery that modern empires do not disintegrate under the shock of war. The British Empire, which, according to Ribbentrop, is united only by moonbeams, has proved that these, after all, natural phenomena, are stronger than Fascist truncheons."

It is indisputable. The British Empire has endured and does endure. The "moonbeams" that unite the New Zealanders, the Australians, the Canadians, with their mother country are stronger than the truncheons of Prussia that attached the Bavarians, the Austrians, and other Germans to Berlin.

In South Carolina, by the way, is no "labor party," but in no party, not even the party of the "Regulars," is a member who has uttered a sentence of the beauty and strength of this one from the woman of the Labor Party in Britain.

Columbia Valley Cooperative Authority

EXTENSION OF REMARKS

OF

HON. WALT HORAN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. HORAN. Mr. Speaker, last week I introduced H. R. 2923 which proposes to set up a Columbia Valley Cooperative Authority. It is the intent of the bill to place this authority as close as possible to the resident population of the area. One feature of the bill is qualification affecting the commissioners to be appointed by the President of the United States. The bill would require that four of the five commissioners be appointed from lists of residents from the four States involved. This is very definitely a limitation of the appointive power of the interests of Government by the people and it is my pleasure to include in the extension of my remarks some of the precedents which make this proposal constitutional.

MEMORANDUM AS TO POWER OF CONGRESS TO SPECIFY LIMITATIONS WITH RESPECT TO APPOINTMENTS TO FEDERAL OFFICES

Article II, section 2, clause 2, of the Constitution provides, in part, that the President "shall nominate, and by and with the advice and consent of the Senate, shall appoint Ambassadors, other public ministers and consuls, Judges of the Supreme Court, and all other officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by law: but the Congress may by law vest the appointment of such inferior officers, as they think proper, in the President alone, in the courts of law, or in the heads of departments."

It may be stated as a general principle that, by reason of this provision of the Constitution, Congress may not designate the person to fill a Federal office, and may not provide for the making of appointments except by the President, by and with the advice and consent of the Senate, by the President alone, by courts of law, or by heads of departments.

It also follows that Congress may not restrict the field of choice of the appointing authority in a manner which will be equivalent to making the choice or designation of the person who is to be appointed. However, there are statutory precedents for imposing certain restrictions upon the field of choice of the appointing authority.

Among these are the following:

In section 10 of the Selective Training and Service Act of 1940 (U. S. C., title 50 War App., sec. 310) there appears the following provision:

"Each local board shall consist of three or more members to be appointed by the President, from recommendations made by the respective governors or comparable executive officials."

The act of July 18, 1918, as amended by Public Law No. 125, Sixty-ninth Congress, provides as follows:

"That a commission is hereby created, to be known as the Commission for the Standardization of Screw Threads, hereinafter referred to as the commission, which shall be composed of nine commissioners * * * four to be appointed by the Secretary of Commerce, two of whom shall be chosen from nominations made by the American Society

of Mechanical Engineers, and two from nominations made by the Society of Automotive Engineers."

Another precedent which is of interest is contained in the Railroad Labor Act. I quote the provision relating to the Adjustment Board, as it appears in title 45, section 153 of the United States Code:

"(a) That the said Adjustment Board shall consist of 36 members, 18 of whom shall be selected by the carriers and 18 by such labor organizations of the employees, national in scope, as have been or may be organized in accordance with the provisions of section 152 of this title."

It seems difficult to reconcile this provision of the Railway Labor Act with the general principle above stated, but so far as I know its validity has not been questioned.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. FRANK T. STARKEY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. STARKEY. Mr. Speaker, I request to add my humble tribute, which I am sure expresses the sentiments of my constituents, to that great American—Franklin Delano Roosevelt.

He was a man of world stature—Franklin Roosevelt—the greatest figure of our time, who leaves an indelible imprint on history and whose influence will help to shape the course of the world for centuries.

Peoples all over the world mourn his death, with the excellent reason that they know he was urging, for all of them, a better and more prosperous life. But the most poignant grief comes from those whose lot he bettered from his first days in office—the plain, ordinary, untitled people of the United States.

Thousands, millions of these people wept unashamedly at the news of his death. They were not selfish tears, but tears shed for one they had come to love as a great benefactor of the common man.

These oceans of tears, more than anything else, may stand as his memorial, for they may be said to embrace the dozens of Rooseveltian measures by which he sought to lighten the load of the Nation's weary workers.

President Roosevelt came on the scene, assumed his office, in the darkest hour of our economic history, when there were millions of unemployed tramping the land, seeking to earn enough to provide even the barest necessities for themselves and their families.

There were bankruptcies and bank failures by the thousands, costing the poor their life savings, accumulated through toil and denial to themselves of what the more fortunate would have called necessities of life.

Into that picture of approaching national chaos came the man we mourn. Moving with supreme courage, he made a series of quick decisions, which not only restored the confidence of the people but began the building of a firm foundation for our economic life.

None who remember those eventful days will forget the depths into which the Nation had been plunged, nor the almost immediate pick-up in morale, discernible in every face one passed in the street, as the bank holiday halted the downward slide.

This change was both actual and psychological.

And then followed the series of measures enacted over the period of a decade, which will stamp that decade as the most progressive in American history, when legislation for the people was placed ahead of all other considerations.

There was enacted old-age-pension legislation, to bring some cheer into the lives of those who had been unable to save in early years because of adversities; unemployment insurance, the Nation's guaranty of freedom from want for those who, through no fault of their own, could not find employment, and freedom from fear for these same people who, previously, never were free from the dread of unemployment; the minimum wage law, which corrected some pitiful cases of mere subsistence living and brought to thousands 100 percent and more increase in incomes, removing fear of hunger.

These and many more Roosevelt-inspired measures followed in rapid succession. It is perhaps symbolic that he also championed the cause of rural electrification, for it was characteristic of him that he sought always to bring us from economic darkness into light.

President Roosevelt left us when we were able to see the light, not only with a plan of full employment and economic stability, but when we can also see on the world horizon, largely through his efforts, a world organization and pattern to preserve the peace, that all peoples of the world can emerge from living by the law of the jungle—survival of the fittest—to a system of Christian procedure which recognizes we are our brother's keeper.

Through his whole career his every effort was directed toward bringing "peace on earth and good will to men."

President Truman

EXTENSION OF REMARKS

OF

HON. JOHN J. SPARKMAN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. SPARKMAN. Mr. Speaker, I am sure that no President of the United States has ever come into office with a more united people behind him than has been true in the case of President Truman. He has been acclaimed by the press, the radio, and the people generally of this Nation. Many have been the editorials written about him. Under leave to extend my remarks, I am including two such editorials, one from the Birmingham (Ala.) News of April 17, 1945, and another from the National Tribune of April 26, 1945:

[From the Birmingham (Ala.) News of April 17, 1945]

TRUMAN RINGS TRUE

President Truman's first speech rang true. It was irreproachable in taste and in content. He spoke as the inheritor of Roosevelt's mantle. He gave every assurance of intending to hew to the line which had been marked down by his predecessor. With unaffected simplicity, he besought the aid of Congress and his countrymen for the performance of his monumental task.

Of necessity, he gave major emphasis to the war and the peace. He could not have been more reassuring in defining his attitude on that score. The policies which have brought us so close to victory and which have gone so far toward the erection of hopeful machinery for durable peace will be adhered to. Our military and naval leaders will not be interfered with. Unconditional surrender is still a sine qua non. There will be no relaxation in the drive for total defeat of the enemy. Mr. Truman is not interested in a partial triumph. He insists on the same complete crushing of the foe for which Mr. Roosevelt stood.

By the same token, Mr. Truman insists on the consummation of Mr. Roosevelt's peace program. He is a believer in the possibility of eliminating war. He does not hold with the doctrine that as things have been they are bound to remain. He is on the side of those who hope, those who have faith, that the good will and ingenuity of civilized men can contrive to shape a system of justice, fair play, and law which will reduce aggression as a threat to the rights and happiness of mankind.

Mr. Truman is a realist, and he recognizes the large part which must be played by the great powers in the molding of such machinery. It is their strength which must be relied upon to clinch the enterprise of peace which is to receive fresh momentum at San Francisco. It is their strength, used to serve, not to dominate lesser nations, which will determine whether the world is to face other futile and devastating resorts to arms in international affairs. That is why the continued cooperation of the Big Three is an unspeakably precious desideratum.

The President had relatively little to say about domestic matters. But he made it clear that here, as in the foreign field, he is keeping before him the outlook and desire of the fallen captain. He spoke as a thorough progressive. We must look forward, we must move forward, he said. This does not sound like the talk of a man intent on marking time. The social gains which have been won must be preserved, and that large-mindedness does not apply to Americans alone. We must work for the revival of other peoples. We must trade with them, deal with them, not merely for our own sake, but for the sake of those whom we would be helping. Mr. Truman gave no comfort to our nationalists, or to any other supporters of a conception of our country as a curmudgeon among the nations.

It was a capital speech, with the President's sincerity and honesty running through it like a golden thread. Time alone can tell what the pressures to which the White House is subject will make of Mr. Truman. But in his address to Congress he was a very earnest man, admitting his awareness of staggering problems, by no means sure that he can measure up to his great responsibility, but doggedly resolved to live up to it, if a dedication of heart and soul can make him equal to the challenge. This is a President without a trace of pretense, without dramatic fire, but a good man in the old-fashioned sense, and a competent man to the extent of his experience.

His speech was in effect an appeal for support from all quarters, on the basis of toler-

ance, on the basis of commonly accepted goals, on the basis of human decency among the children of men. We have nothing to fear under the leadership of a President so ingenuously devoted to the simple, heartfelt things, unashamed to display "an humble and a contrite heart," ready to pray with Kipling:

"God of our fathers, known of old,
Lord of our far-flung battle line,
Beneath whose awful Hand we hold
Dominion over palm and pine—
Lord God of Hosts, be with us yet,
Lest we forget—lest we forget!"

[From the National Tribune of April 26, 1945]

"CAPTAIN HARRY"

Just after Pearl Harbor, a bespectacled United States Senator called on Army Chief of Staff Gen. George C. Marshall to offer his services in uniform. It is reported that the general listened patiently and then said laughingly, "We don't want any old goats like you." In answer, if this story which is making the rounds in Washington is correct, the Senator replied, "I'm not as old as you are," and the retort followed, "No, but I'm a general and you would be only a colonel." The general is still directing the war effort, but Senator Harry S. Truman is now President of the United States and the "old goat" is also General Marshall's boss and Commander in Chief of all of the armed forces.

We pass the story along to our readers because the President's offer of his services is typical of the man who has succeeded to one of the most exacting positions any person has ever been called upon to fill. This newspaper commented very briefly last week on Mr. Truman's succession to the Presidency. Following, as he does, a Chief Executive who had served longer than any of his predecessors, a leader who had captured the imagination of the world and one whose demonstrated popularity with the people of the country was unparalleled in history, we commented principally upon the fact that Harry Truman was the first war veteran to enter the White House in 36 years. We sketched in bare outline the enormous task facing him, warned against harsh and premature judgment of his capabilities and bespoke for him the united support of the Nation's veterans and of all of our people to the end that victory over our enemies might soon be assured.

That was to have been the extent of our comment at this time, but since we expressed these few thoughts things have happened that warrant further expression. It could have been expected that the public would be confused by the unexpected death of a man who had been directing the country and its war effort with such tireless energy, but Mr. Truman at once went about his new and exacting duties with a surprising dispatch that indicated an unexpected discernment of the problems at hand. He at once addressed the Congress in person and talked by radio to the armed forces and, through both of them, to the world. He showed an astonishing knowledge of conditions both at home and abroad, and the minds of the people were at once eased by the assurance that this new Chief Executive is one of them and likes them, that he is capable and physically able to command, and that he is not by any manner or means just a bystander.

With direct simplicity, he so sought the bipartisan cooperation of the Congress and the public that congressional leaders have pledged their united support of every proper endeavor. His avoidance of the dramatic and his proved understanding of the needs of the average man have brought to him unsolicited resolutions of confidence by the legislatures of many of the States. An even temperament, lack of impulsiveness, and a God-fearing approach to the conduct of his office has further appealed to those who must be the President's followers, and an open and receptive mind and an amiable nature tend to emphasize an ability that may well lead the way to that national unity and directness of purpose so necessary in these days of trial.

Although the commanders of the country's organized veterans were among the first to assure President Truman of their allegiance and personal good will, they could be expected to watch as critically as any the spoken words of the first comrade to assume the Presidency since Theodore Roosevelt was retired in 1909. They were attracted first to Mr. Truman's message to the Congress, because, while he stated quite simply and humbly his hopes and his ideals, he also recognized in that first public utterance that "our debt to the heroic men and valiant women in the service of our country can never be repaid. They have earned our undying gratitude. America will never forget their sacrifices." Those were the words of a soldier who knew a soldier's life and understood the cost of his service to his flag. The hearts of our veterans were lightened.

Again Comrade Truman spoke plainly the language of a thoughtful veteran when he talked by radio to the armed forces last week. We are printing the full text of that address in this issue. It voices eloquently the thoughts of this man who had waived his own disabilities in order to don his country's uniform 28 years ago and who had tried once more to be admitted to active service in World War No. 2. As he said, "I have seen death on the battlefield * * * I know the strain, the mud, the misery, the * * * weariness of the soldier in the field. * * * I know too his courage, his stamina and his faith," we saw here a man who would not forget his love of comrade, one who would remember the needs of such men and one with the power to excite a lagging interest of citizens who are wont to forget after the shooting is over.

With Mr. Truman's rise to the Nation's leadership, the GI's of his day are vying with one another in repeating anecdotes of their service under him in France in 1918. He exacted from them the loyalty and the discipline expected from men of any command in time of war, but he defied anybody who would do them injustice. As a captain of artillery he proved to be so fair a taskmaster that he became known and remembered only as Captain Harry, and he is still Captain Harry as he continues to attend annual reunions of his old outfit. Veterans like that. They like the cut of the jib of a man who remembers not to forget.

They like the prayer this man made last week on the rostrum of the House of Representatives when he asked his God to keep him in his faith and his good works. They like the forthrightness with which he instructed that veterans be represented at the San Francisco Conference where will be laid the groundwork looking to the permanent peace and security of our country. And they rejoice in the sentiments expressed by their President last week when he described "my hope for the future" and quoted the immortal words of Abraham Lincoln "let us strive on to finish the work we are in; to bind up the Nation's wounds; to care for him who shall have borne the battle, and for his widow, and his orphans."

America's veterans recognize such language. They have faith that the Captain Harry who led so well in 1917–18 has the fortitude to continue to be Captain Harry while conducting the Nation's business. Courage was present in abundance during the days that have gone; it will be needed abundantly in the days that lie ahead. We are convinced the "old goat" has what it takes.

A Good Soldier Goes Home

EXTENSION OF REMARKS
OF
HON. T. MILLET HAND
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. HAND. Mr. Speaker, under leave to extend my remarks in the RECORD, I include excerpts from an excellent editorial recently appearing in the Vineland (N. J.) Times-Journal, concerning our late President, and entitled "A Good Soldier Goes Home":

A GOOD SOLDIER GOES HOME

Now that Franklin D. Roosevelt has joined the immortals, we can reflect on his letter, written to Democratic Chairman Robert E. Hannegan prior to the 1944 national convention:

"All that is within me cries out to go back to my home on the Hudson River, to avoid public responsibilities, and to avoid also the publicity which in our democracy follows every footstep of the Nation's Chief Executive.

"Such would be my choice. But we of this generation chance to live in a day and hour when our Nation has been attacked, and when its future existence and the future existence of our chosen method of government are at stake.

"To win this war wholeheartedly, unequivocally and as quickly as we can is our task of the first importance. To win this war in such a way that there be no further world wars in the foreseeable future is our second objective. To provide occupations, and to provide a decent standard of living for our men in the armed forces after the war, and for all Americans, are the final objectives.

"Therefore, reluctantly, but as a good soldier * * * I will accept and serve in this office, if I am so ordered by the commander in chief of us all—the sovereign people of the United States."

He was so ordered, and good soldier that he was, he fought the good fight down to the final few hours of his earthly existence.

At the very threshold of a new day, with victory in sight, this good soldier has gone home. As surely as the most humble soldier in the ranks, he laid down his life for his country—indeed, for all humanity. His gallant spirit bids the living to justify the great sacrifices which have been made in this terrible conflict. He marked the path of an enduring peace, for his was a heart of compassion, charity, and justice.

MAX LEUCHTER.

Italy

EXTENSION OF REMARKS
OF
HON. VITO MARCANTONIO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. MARCANTONIO. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following statement made by me on House Joint Resolution 99, before the House

Committee on Foreign Affairs, Wednesday, April 11:

Nineteen hundred and forty-five is the year of decision, undoubtedly the most tremendous military decision in the world will be made in Europe soon. That military decision will signalize the extirpation of fascism not only in Europe but everywhere in the world and will strengthen the fight in these United States to destroy the forces of domestic fascism. February 1945 marked the announcement of the most far-reaching political decisions in the history of mankind. The decisions at the Crimea Conference constitute implementation on a world-wide basis of the Declaration of Independence, the Bill of Rights, and the Atlantic Charter. Lasting and democratic peace are dependent entirely upon the grand coalition cemented at Crimea and to be further reinforced at San Francisco. The immediate success of this war is dependent upon the success of the grand coalition composed of Great Britain, the Soviet Union, and the United States. Only the other day we saw living proof of this when the Soviet Union delivered a hammer blow against Japan in announcing the abrogation of the neutrality pact. I do not want to see that coalition impaired under any circumstances. It is in the interest of the world of today and tomorrow that all questions be subordinated to the problems of the preservation and strengthening of this coalition. In making my plea for Italy I do so in the hope that her problem will be solved within the structure of the coalition. In making my plea for Italy I do so with the full realization that Italy's cause, the cause of all nations, can be saved only as a result of the success of the coalition, as a result of the success of its decisions, and as a result of the further strengthening of the coalition. The chances for a democratic Italy, a democratic Greece, a democratic world is dependent entirely on the success of the coalition of these three great nations and the fruition of the decisions made at Yalta by the leaders of the people of these great nations. If San Francisco fails, if the coalition is disrupted, Italy's cause, the cause of all other nations, the cause of the world will fail. Therefore, I again say that in pleading Italy's cause I do so not in contradiction of the great decision at Yalta but with the full understanding that the cause of a democratic Italy is an integral part of the living flesh and blood of the Teheran agreements, of the agreements of Yalta, of Dumbarton Oaks, and of the great meeting which will take place at San Francisco. For this reason alone Italy cannot be left out of the meeting at San Francisco.

Fascism was imposed on the Italian people from the outside, with foreign guns and foreign funds. For 21 years the Italian people had to live with a bayonet at their throats. The traitor Mussolini supplemented the tyranny of Italian fascism with that of the might of the Nazi Wehrmacht. By 1939 the Fascist peninsula had become a Nazi concentration camp. Italy no longer had sovereignty, no longer freedom of action. Its traitor, Il Duce, had surrendered the people of Italy to Adolf Hitler. Thus, in 1940, when the Italian Fascists entered this war it was not any choice on the part of the people, it was a mere declaration on the part of the Nazi warden, Benito Mussolini. An imprisoned nation could have no choice. Time and events have demonstrated that it had none, except to revolt. The Italian people did revolt. They used the only method that was possible for them and that was voluntary surrender of hundreds of thousands of its soldiers. The Italian people are not cowards. The history of Garibaldi and his legions will always remain glorious pages in the history of world heroism. Men and women of Italian origin of these United States—over 1,000,000 of them in the armed forces—their exploits and their achievements in this war will always give the lie to anyone who snidely charges cowardice to be an Italian characteristic. The 300,000 Italian partisans now engaged against the common enemy have been described by General Alexander: "The resistance movement in Italy has been more effective in fighting the Germans than any other resistance movement in Europe." Up to date more than 250,000 Italians have lost their lives in that resistance movement. No; the surrender of hundreds of thousands of Italian soldiers was not an act of cowardice, it was an act of revolt, revolt against Fascist-Nazi tyranny. It was the only form of revolt that a people with a bayonet at its throat could undertake. Italian soldiers can fight for liberty and freedom. History has demonstrated it. Italian soldiers refused to fight for tyranny and slavery. Events of only yesterday have demonstrated it. All that Italy seeks now is that she be permitted to fight against the common enemy as an ally. I can say with full confidence that Italy is ready to declare war against Japan just as she declared war against Germany. All she asks is that the fetters of the armistice which deprive her of the right to declare and make war be removed. That the dignity of her people be restored by recognizing as allies these people who are now actually fighting on our side, whose patriots are actually fighting and dying on our side, whose navy is actually engaged in warfare on our side. All she asks is to be permitted to mobilize her forces, to be assisted in doing so, by removing the shackles of the armistice and granting to her the status of what she actually is and what her people have always been, allies, and to grant her the right to participate in the building of a world security organization for democratic and lasting peace at the San Francisco Conference

Italy has earned this right with the blood of her men, the famine of her children, and the suffering of her women. To continue Italy to be humiliated by refusing her the recognition of an ally, by barring the doors of San Francisco to her, while at the same time her people are fighting against fascism at home and abroad, restricted by the impossible terms of an unrealistic armistice, is not in keeping with the spirit of the agreements at Teheran and Yalta.

Italy's contribution to Allied victory began long before the armistice. It was not only the blows of our military might that brought about the overthrow of Mussolini, but it was also the act of revolt, the surrender of Italian soldiers at the front, the sabotage of Fascist military efforts by the Italian people at home.

In a report to Congress on the subject of the progress of the war made on September 17, 1943, the President stated: "Italian soldiers, though disorganized and ill-supplied have been fighting the Germans in many regions. In conformity with the terms of unconditional surrender the Italian fleet has come over to our side and it can be a powerful weapon in striking at the Nazi enemies of the Italian people." It must be remembered that when we invaded Italy we at all times stated to the Italian people that we were entering Italy as liberators and not as conquerors. This was said truthfully as we recognized that the people of Italy would have no truck with a Fascist-Nazi war. In a radio address to the Nation on July 29, 1943, following Mussolini's overthrow the President promised: "Eventually Italy will reconstitute herself. It will be the people of Italy who will do that, choosing their own government in accordance with the basic democratic principles of liberty and equality. In the meantime, the United Nations will not follow the pattern set by Mussolini and Hitler and the Japanese for the treatment of occupied countries—the pattern of pillage and starvation." And again on September 11, 1943, immediately following the armistice in a joint statement, both President Roosevelt and Prime Minister Churchill said to the people of Italy: "Take every chance you can, strike hard and strike home. Have faith in your future. All will come well. March forward with your American and British friends in the great world movement toward freedom, justice, and peace."

I sincerely believe that all of these messages and promises were made in good faith and it is my firm belief that the President will do his utmost to see to it that these promises made to the Italian people are kept. It is my firm belief that the overwhelming majority of people in America, Great Britain, and the Soviet Union do not desire a status of conqueror and conquered between them and the Italian people but of liberator and liberated.

It is with regret that I must state that the events subsequent to the armistice in Italy have not conformed to the spirit, honor, and letter of the pledges made. The armistice itself restricted Italy's army to 11,000, and now that the restriction has been slightly lifted to allow Italy an army of a little better than 50,000, Italy's 300,000 partisans are fighting the enemy behind the lines. Her soldiers are at the front and her Navy is doing a good job. Although it is extremely doubtful whether under the terms of the armistice Italy will be permitted to declare war against Japan and pool what she has into the war in the Pacific, for Italy cannot under the armistice declare war without permission of the Allied Commission, I am confident that Italy will make war against Japan if permitted and will do an effective job if material assistance is given to her. I am not going to discuss the economic terms of the armistice except that they place on a country impoverished by the rapacious forces of the Nazis a burden that no nation can ever carry. I do not care to give a recital of the indignities imposed on the Italian people by the Allied Commission as it would serve no purpose at this time. I will simply give you those instances which will apprise you of the nature of the conqueror role that the Allied Commission has played in Italy: One, with the exception of the slight increase from 11,000 to some fifty-odd-thousand in the armed forces, the Allied Commission has consistently denied the appeal of the Italian Government to permit her to raise an effective fighting army. Two, even on the matter of relief the Allied Commission for months refused to carry out the President's order to increase the daily bread ration from 200 grams to 300 grams. The President issued this order some time in October. It was finally put into effect on March 1, 1945. Three, when a national government composed of all anti-Fascist political parties was established in June of 1944, the Soviet Union sought to extend diplomatic recognition of that government, the Allied Commission in an arrogant letter to Prime Minister Bonomi informed the Italian Government that it could not enter into diplomatic relations with any government, including an ally.

It is not necessary for me to recite the conditions of famine and disease now rampant in Italy. These are well known, and as for those who do place the blame on the Italian people, may I remind them that the retreating Nazis took along with them all the cattle they could seize, all the grain, all the food, clothing, bedding, and other household furniture. What they could not take they destroyed. In many towns the Italian people were left without food and shelter and yet these people still refused to have truck with the Nazi-Fascist war lords and welcomed those who came as liberators. Disillusionment followed soon, caused not by our soldiers, nor by the people of the three great nations, but caused by an Allied Commission

which sought to play the role of Caesar rather than that of a Lincoln.

We all welcome the news of the easing of some of the restrictions. Italy now is permitted to govern most of the liberated territory although its national liberation committee is still denied jurisdiction in areas that are now being liberated. The people are being allowed a greater degree of self-government and Italy today may enter into diplomatic relations with other nations. In fact Italy today is in diplomatic relations de facto and de jure with Great Britain, the Soviet Union, and the United States. There is an Italian Ambassador in Washington and an American Ambassador in Rome; and yet we have the incongruous situation of having diplomatic relations with a nation, with that nation and its people suffering and at war with the common enemy, and still refused recognition as an ally and representation in the family of the United Nations at the San Francisco Conference.

How will this situation affect us here at home? Will it contribute to that post-war stability which is so necessary to carry out our program for 60,000,000 jobs and a healthy agriculture? Let us bear in mind that no nation can gain for itself prosperity over another nation, particularly one fighting on our side, which is prostrated and gradually forced to the brink of political chaos and complete economic disintegration. Unless we aid Italy the pressure on the present democratic government of Italy will be so great that it may bring about its overthrow, that it may be supplanted by a government of reaction composed of former Fascist forces. Italy, so governed by these elements would be another hindrance before that democratic world for which decisions were made at Teheran, Yalta, and Dumbarton Oaks, and for which nations are meeting at San Francisco. Shall we force upon Italy another Fascist regime without black shirt, but nevertheless Fascist in character? Shall the war criminals in Italy be permitted to become the masters once again of the Italian people? The answer to that question lies in the determination of the question whether or not we in America will lead the way toward recognition of Italy as an ally, toward having her represented at the San Francisco Conference.

Spring will soon come to the unliberated regions of Italy. The rivers will overflow. The floods will add to the untold hardships of the winter that has just passed. The destruction of those valleys will not make for post-war economic stability. Unless we aid Italy now by extending lend-lease aid to her as an ally, to assist her in reconstruction, to help her to prevent further damage, to help her mobilize her forces fully so that they can join with us in defeating fascism, Italy will be a liability and a serious drag in the post-war world. Is it not sound economics as well as justice that Italy be permitted and enabled to assist in the full dignity of a member in building the post-war democratic world? The answer to this question too lies in the determination of Italy's status, conquered country or liberated country: a co-belligerent or an ally: an outlaw nation or partner at the San Francisco Conference. It is my considered judgment, my earnest conviction that to recognize Italy now, to extend to her lend-lease aid now and to invite her to participate at the San Francisco Conference will be in the interests of American agriculture, American labor, in the interests of 60,000,000 jobs, in the interest of a healthy, free Europe, in the interests of domestic and world stability and in the interests of a democratic world. These interests are our interests, the interests of the American people. They are in the interests of an America that is on the march on the far-flung battle fronts of the world, in the interests of a great America of today and of a greater America of tomorrow.

Don't Fence New England Out!

EXTENSION OF REMARKS

OF

HON. ANGIER L. GOODWIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GOODWIN. Mr. Speaker, the prosperity of this Nation in the post-war period depends upon a concerted and united policy to develop to greatest usefulness all the natural facilities for business and commerce throughout the country.

Such a policy must recognize no frontiers except our actual boundaries.

The greatest possible utilization of our facilities for the enjoyment of our share of the world trade of the future requires that every section of the Union be permitted to contribute to the national welfare by making the most of the natural advantages of that section, geographically, economically or otherwise.

Unfortunately, evidences multiply that Washington authorities intend that New England shall be a neglected corner.

The prosperity of New England and the capabilities of New England to contribute to national prosperity depend upon the development of the port of Boston and the extension of facilities for handling an increased air traffic. The recent order of the Civil Aeronautics Board canceling the scheduled opening May 1 of air service out of Boston to the West is a blow to the program to make Boston what it ought to be, an international airport.

I have written the Civil Aeronautics Board protesting the recent ruling and urging that it be reconsidered and reversed. Do not fence New England out.

I append an editorial from the Boston Herald of April 24, which admirably states the case:

DUBIOUS C. A. B. RULING

The United Air Lines and the Transcontinental and Western have virtually completed preparations for new direct service to the West from Boston starting May 1. They have mobilized their staffs for a total of five round trips a day between here and Chicago. The chamber of commerce has announced aviation week to usher in the new service. But over the week end the Civil Aeronautics Board suddenly said "No!" There is some reason to question the soundness of this ruling.

The C. A. B. points to the terrific congestion on the transcontinental lines. A civilian is said to have only one chance in 84 of completing a coast-to-coast trip. The board has, therefore, declared that the planes and pilots scheduled for the Boston-Chicago run must be diverted to relieving the transcontinental bottleneck.

There are two objections to this, however. In the first place, as United has pointed out, cancelation of the Boston service does not assure an equivalent additional mileage on the New York trips to the West. This is because of the efficient use of pilot-hours on the trips from here.

In the second place, as the Chamber of Commerce points out, movement of military personnel from Boston to the West is very great and becoming greater. This is now one of the largest ports of debarkation in the country.

If service personnel landing at Boston en route to the west coast must fly by way of New York, efficiency is not served, and the congestion at the latter city is increased. The movement from Europe to the Pacific will grow rapidly, and to channel the great bulk of it through New York does not seem sensible. There is nothing in the C. A. B. explanation to indicate that it took these factors into consideration.

The disposition in Washington to slight Boston's justifiable aspirations a an international airport must be corrected. In this instance we have a perfect demonstration of the correlation of three factors—a busy seaport, geographical convenience for travel from Europe to the West, and freedom from New York's congestion—which ought to mean a speedy inauguration of the Boston-Chicago service rather than postponement.

America Must Not Forget—Again

EXTENSION OF REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. FLOOD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Philadelphia Enquirer of April 24, 1945:

AMERICA MUST NOT FORGET—AGAIN!

In all the tragic history of human suffering there is nothing to compare with the wholesale barbarities perpetrated by the fiendish Nazis.

Such frightfulness must never again be tolerated on this earth.

Millions of men, women, and children murdered in cold blood; millions tortured; millions starved; millions wantonly and brutally mistreated—every day new evidence of Germany's appalling wartime crimes is being uncovered as the avenging armies of the Allies march to victory over Hitler.

These shocking accounts of the horrors at Buchenwald, Dachau, Oswiecim, and other prison and concentration camps are not propaganda tales concocted for the gullible. They are facts, borne out by photographs, affidavits, and official records.

But will they be remembered 5 or 10 years from now?

The human mind has an amazing faculty of adapting itself to changing conditions. It can quickly forget pain and sorrow. In particular, the American people are all too prone to forget the hardships, difficulties, and mistakes of the past.

Will we ever learn from history? Twenty-five years ago some cynical Americans were saying that the stories of German brutality in Belgium were chiefly propaganda directed, before April 6, 1917, at getting the United States into the European war.

Today there are those among us who not only take no stock in the certified records of German bestiality in World War No. 1 but who scoff at the evidence of unspeakable German atrocities in World War No. 2 as propaganda.

But our soldiers know. Our boys who have been prisoners in German camps know. The British and the Russians know. They know that not a fraction of the full story of Nazi barbarism has as yet been made public.

General Eisenhower knows the truth. That's why he proposed that delegations of Congressmen and editors and publishers

speed to the scenes of the Nazi outrages to see the evidence for themselves.

That is as it should be, so far as it goes. But it doesn't go far enough. Every member of the United States House of Representatives; every Member of the Senate; every publisher and every editor who wants to see with his own eyes the exhibits of German brutishness should have opportunity to do so. Surely ways can be found to permit a thousand American civilians, lawmakers, and publicists to visit the German crime spots.

We regard as thoroughly sound the suggestion of Representatives BROOKS, GOSSETT, and FLOOD that a full-time agency be set up to keep a permanent record of German atrocities. But more than that is needed to maintain in the public mind a realization of German criminality in this war.

There should be established in Washington a museum to preserve, so long as such a reminder is necessary, factual, authentic documents, photographs, and other displays to keep the American people from forgetting the horrors committted by the Germans in the name of nazi-ism and the vile Hitler.

Twice in one generation the people of the United States have been called to help put down mad-dog Germany and save Europe from itself. Twice is enough. There must be no further call for America to join in this task, at a cost of thousands of our sons.

German-instigated wars must be stopped for all time. When this war is over German militarism must be destroyed and the Reich policed. The nations must organize for enduring peace and security. But beyond all this:

Nazi Germany's crimes must be kept blazoned on the consciousnes of the world. We must not forget—again!

A Nodding Bouquet for the O. P. A.

EXTENSION OF REMARKS

OF

HON. GEORGE E. OUTLAND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. OUTLAND. Mr. Speaker, under permission to extend my remarks in the Appendix of the RECORD, I include here an editorial on the Office of Price Administration from the California Grange News of March 5, 1945.

A NODDING BOUQUET FOR THE O. P. A.

We have on occasion indulged in the popular national pastime of ribbing that much discussed and cussed Government agency, the O. P. A.

We are glad to compliment the Office of Price Administration for their recent publication, Extent of O. P. A. Responsibility in Wartime Programs Affecting the American Farmer.

We hasten to explain that the above is not the pamphlet itself but the title thereof, and yet, in spite of its periphrastic and circumlocutory titling, every granger will welcome this booklet as a time and temper saver.

It tells you where to go to get information so clearly that the farmer will feel less inclined to tell the O. P. A. where to go.

In modern quiz fashion it gives the farmer facts he should know about agency responsibility in such simple language that the reader does not have to be a Joel Kupperman to figure it out.

It is a right smart piece, and will take the steam out of many a kick aimed at the shins of Chester Bowles and Co.

Get yourself a copy and see for yourself.

The Republican Party Makes Important Constructive Suggestions to the President

EXTENSION OF REMARKS

OF

HON. THOMAS A. JENKINS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. JENKINS. Mr. Speaker, under leave to extend my remarks, I wish to say that yesterday the Republican membership of the House of Representatives held a conference, in which it took very significant action. The action of the Republican conference is, generally speaking, the action of the Republican Party as far as the matter under consideration at that time is concerned. At the conference held yesterday the Republicans adopted a resolution which took into consideration the deplorable food situation and which in effect calls upon the President to take immediate action to relieve the situation which has now become a little short of desperate and which is fast becoming worse.

About 2 years ago the Republican leadership in the House of Representatives appointed a special committee known as the Republican Congressional Food Study Committee. The purpose of this committee was to investigate thoroughly all phases of food activities. The committee did me the honor to select me to act as its chairman. That committee is made up of membership from all geographical sections of the country and from all walks of life and representing all food activities from the producer to the consumer.

That committee in its report to the Republican membership recommended that a conference of the full membership be called. This was done on yesterday and that conference adopted the following resolution:

Resolved by the Republican conference of the House of Representatives, That the President be urgently requested to take immediate and positive steps to relieve the present deplorable food situation particularly with a view to preventing further and more serious consequences which are fast developing; and be it further

Resolved, That in an earnest desire to be of assistance to the President in finding the right solution to this problem, we suggest to him:

First. That as authority and responsibility, in the various aspects of food production, processing, allocation and distribution, price and rationing, are now divided among at least six agencies of Government—thereby generating conflicts of authority, confusion in administration, and uncertainty of results—that the President immediately vest in one single agency full authority and responsibility for the production, distribution, and export, including price and rationing, of all food available to the United States.

Second. We suggest further that the President classify food production as an essential war industry and immediately instruct those Federal agencies concerned with manpower, transportation, storage, farm machinery, and fertilizer to so direct the activities of their respective agencies as to give special assistance to the production, processing, storage, and distribution of foods.

The conference by the adoption of the resolution attempts to be constructive. The conference appreciated the deplorable conditions of the food situation of the country and decided that immediate and firm action by the Chief Executive is absolutely necessary if the situation is to be relieved and if future serious consequences are to be averted.

I am sure that it is the sense of the Republican food study committee that the President should act immediately and if he feels that he does not have full authority, this committee will cooperate in the fullest toward the passing of whatever legislation is necessary to give to the President full authority to act.

Under the direction of the Republican food study committee I introduced a bill in the last session of Congress. I have reintroduced the same bill in this session of Congress. That bill would give to the President all the authority he needs to relieve this situation. The late Representative Hampton Fulmer, who was then chairman of the Committee on Agriculture of the House of Representatives, introduced a bill in the last session of Congress which would have provided the President with ample authority to act to relieve this serious food situation. That bill was sponsored by the Republican food study committee and it was recommended for passage by the Committee on Agriculture. That bill was not reached by the Congress in its consideration. I feel sure it would have been approved by Congress if it had been considered. I have reintroduced the Fulmer bill in this session of Congress. That bill is slightly different from my original bill, but either of these bills will furnish the President with ample authority. Personally, it is my hope that the President will act immediately because the interests of the people demand such action. There is plenty of food in the country if the same is properly distributed. And with proper encouragement the production of food could be greatly increased so that by the coming of next winter we would have sufficient to carry us through in good shape if the same was properly distributed.

Price Increases for the Steel Industry

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following editorial from the Granite City (Ill.) Press-Record:

STEEL INDUSTRY IN SERIOUS POSITION UNLESS PRICE INCREASES GRANTED

For the past 4 years steel industry profits have been declining steadily in spite of the fact that its production has been at record levels. This arises from the fact that the industry has been squeezed between substantially increased costs and fixed price ceilings at levels which have been in effect since 1939. Currently more than 70 percent of the carbon

steel products made by the industry are being sold at a loss. The effect on the small semi- and non-integrated steel companies has been most severe and is approaching a point where the financial stability of these companies is in jeopardy. These small companies have been unable to offset losses on carbon steel products with the profits on war products or shipbuilding which have sustained the larger steel companies.

Thus, in spite of record operations, the small steel companies are either in the red at the present time or fast approaching that condition.

Typical of the semi-integrated companies is the Granite City Steel Co., which has been the mainstay of this community for 50 years. For the past 4 years its production and pay rolls have steadily increased, but the results of its balance sheet have shown a downward trend. O. P. A. has been furnished with complete cost and profit data and yet has delayed for months the price increases the steel industry needs to continue operating. Special price relief which O. P. A. previously granted the smaller companies can no longer be counted upon. With the imminence of VE-day and reconversion to civilian steels, no company receiving special price relief could hope to get its share of the business.

The steel industry has made an outstanding contribution to the war effort. It can do the same in peacetime only if its price structure is restored to a sound basis. It can continue steady employment only if its problems are given fair treatment.

It should be remembered that the steel industry has not only had to absorb substantial cost increases over the past 5 years without price adjustment, but the retroactive wage increases granted last December have further severely aggravated the situation.

The administration's goal of 60,000,000 peacetime jobs must take cognizance of the jobs its deflationary price policies are threatening in the steel industry. Only prompt and adequate price action by O. P. A. on an industry-wide basis can help prevent a serious tailspin following VE-day.

We Must Do Better by the Veterans

EXTENSION OF REMARKS

OF

HON. JERRY VOORHIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1945

Mr. VOORHIS of California. Mr. Speaker, under leave to extend my remarks, I include herewith an article appearing in the April issue of Harper's magazine, written by Charles G. Bolté, chairman of the American Veterans Committee.

The American Veterans Committee is a group of veterans of the present war whose primary objective is the making of a lasting peace as the only reward worthy of the sacrifice of the veterans of this war. This organization has other objectives as well, similar to those of other veteran organizations. But it is laying primary stress upon this one main objective.

I found the article which follows extremely challenging to my own thinking. I sincerely believe that it is the duty of Congress to examine all the legislation affecting veterans with a view to improving its functioning and its administration, and especially with a view to simplifying and improving the contacts which the individual veterans must make with agencies of the Government in the process of making their readjustment to civilian life.

The article follows:

THE VETERANS' RUNAROUND

(By Charles G. Bolté)

(Mr. Bolté, who lost a leg at El Alamein, is now one of the organizers of the American Veterans Committee.)

The veterans are getting the runaround. More than a million and a half men have already been discharged from the United States armed forces; if their average experience thus far is any criterion of what is ahead, the 12,000,000 yet to be discharged are in for hard times, confusion, and bitter disillusionment.

Comparatively few veterans and servicemen feel that the country owes them a living; most of them, like most civilians, do feel that they should be restored to the status in life they would have held if they had not gone to war. In many cases that restoration to civilian status is not being carried out, despite the loud, unanimous assertions of politicians, bureaucrats, community leaders, social workers, industrialists, and labor chieftains that "nothing's too good for our boys." The loud assertions, the fanfare over the G. I. Bill of Rights, the endless and much-publicized seminars on rehabilitation have all held out a tremendous promise to the returning soldier. But the gap between promise and performance is very wide. And in 12,000,000 veterans who are disillusioned with the promise of democracy there lies a grave potential danger for America.

To a returned serviceman seeking assistance in his readjustment to civilian life, America today looks like the land of good intentions. Everybody wants to help him, but few are capable of giving him what he needs capably, quickly, and without chasing him around from one agency to another. The Veterans' Administration, already looming as the post-war colossus of Government agencies, recognizes no less than 62 separate organizations which deal with the problems of the veteran. He applies at one place for a job, another place for legal advice, another for medical services, another for financial aid. The armed forces, the Federal Government, many communities, the service organizations, industry, the labor unions, and the veterans' organizations are all out to rehabilitate him.

The inevitable result is confusion, overlapping jurisdiction, duplication of effort, and what is in effect competition among these myriad aid societies to see which can do the most good for the veteran—and incidentally reap the most credit for itself. The resultant feeling in many veterans is just as inevitable; they are coming to regard themselves as footballs being kicked around in an exceptionally disorderly game from which the referee has withdrawn.

If the situation is not corrected soon, it is unlikely ever to be corrected—except by overcorrection. In the past we have been able as a nation to appease the war veterans and our own consciences by belated bonuses, pensions, allotments, and grants of a truly astonishing variety. They have always been too little, too late, and too unfairly distributed. This time we may not be allowed the luxury of such an easy out. Placed in an unjust position, a large proportion of our new 12,000,000 veterans may demand their own version of justice. Unless we devise now a democratically planned and ordered method of restoring the veteran to civilian status, we face the real threat of some native demagogue arising with a glib cure-all designed to bring order out of confusion the Fascist way.

II

The simplified organization chart showing the agencies which deal with the veteran's rights and benefits consists of 38 separate boxes, interconnected by a maze of solid and broken lines. A 28-page pamphlet issued by the O. W. I. on the topic had to be checked and cleared by the Retraining and Reemployment Administration, the War Department, the Navy Department, the Veterans' Administration, the Veterans' Placement Service Board, the Selective Service System, the United States Employment Service, the United States Civil Service Commission, and the American Red Cross. At the top of this agglomeration of bureaus is the Retaining and Reemployment Administration, a branch of the Office of War Mobilization and Reconversion.

Brig. Gen. Frank T. Hines, chief of the huge Veterans' Administration and Administrator of Veterans' Affairs, was appointed chief of the Retraining and Reemployment Administration by the President.

The test of an organization lies not in the simplicity of its administrative chart nor in the degree to which power is concentrated in the hands of a single administrator. It lies in how well its job is done; and for testimony on this, only the men for whom the job is being done are qualified to speak.

They tell tales of red tape, of inadequate counseling, and of insufficient medical care in all parts of the country.

After listening to many such stories, the American Veterans Committee, a new organization comprising both veterans and servicemen of this war, decided to send its veteran members a questionnaire asking what happened to them when they got out of the service. One member expressed the average feeling when he returned his with a note saying, "Sort of painful filling out another questionnaire. You know that's about all a vet gets thrown at him—reams of questions, but who the hell is around to answer a few of Joe's questions about jobs, education, my dough, these-buzzing-ears-of-mine, and how-now-little-man?"

Once dropped by the armed forces, the veteran needs above all else a single information and service center in his home community, where he can find the answers to most of his questions. Although these have been set up in many communities, and talked about in more, they are not yet widely established or widely publicized—several men didn't know whether such a center existed in their home towns. Where none existed, the men usually went to the local Veterans' Administration office. A majority—discharged with the war still on, with jobs easy to find, and knowing what they wanted—got it: advice on education, conversion of life insurance, a job, a disability rating. Others were not so lucky: they were chased from one agency to another, found the Veterans' Administration taking weeks to answer letters, and experienced what one of them described briefly thus: "Information was so confusing that I had to rely on my own inadequate judgment."

Most of these men didn't have jobs to go back to—no problem these days, but what of after the war? (Selective Service estimates that only 25 percent of the men now in service qualify under the rehiring provisions of the Selective Service Act—the other 75 percent came from temporary defense jobs, school or college, or their own enterprises.) Of those who did hold permanent jobs before entering the service, most were restored; some had trouble with their employers on the grounds that they were disabled. Some received advice or assistance from their unions, notably members of the United Automobile Workers-C. I. O.; but most had little help—which is something for the unions, who have had such a bad press

during the war, to ponder over. Those looking for new jobs applied primarily to the United States Employment Service; and although a majority found it helpful, one summed up the minority opinion by saying: "There is too much emphasis put on just getting a job. What about wages, or the kind of job one wants, or—more important—doesn't want? General attitude is that the vet should be glad to get any old job, never minding what the wages, conditions, or anything else are."

The most serious complaints in the field of jobs came from middle-class veterans—professional men, white-collar workers, and the like—the same class which has been hardest hit by a war demanding welders and ship fitters. The United States Employment Service "had absolutely no leads on newspaper jobs," wrote one veteran. "They have nothing in Los Angeles, Washington, or New York for legal or personnel men," wrote another who had tried hard. Lawyers who maintained offices of their own came home to find their practices gone and their offices occupied; doctors and dentists met the same situation. This group faces one of the most difficult readjustment problems; in a situation involving seemingly insuperable legislative questions, they must depend on the loyalty of their clients and the helpfulness of their professional associations for a solution.

III

The Veterans' Administration, currently the most promising bureau for civil servants seeking permanent berths, comes in for the most thorough excoriation by the newly returned servicemen. A majority of veterans responding to the questionnaire were dissatisfied with this organization, mostly because of the red tape which marks all of its activities. One man reported a 7-week silence from the Administration after the Army had submitted his application for a disability compensation. Another went to a veterans' facility—as V. A. hospitals are called, in businesslike fashion—and reported, "If I'd been sick enough I'd have died before they took care of me."

Several were refused admittance to already crowded hospitals. Construction of new veterans' facilities is evidently not keeping up with the increase in the number of disabled veterans, despite large appropriations from Congress for that specific purpose; and instances of over-crowding have been reported from several facilities. The hospitals themselves are often located far from the centers of population. "Hospital too distant from my residence" is a common complaint.

The isolation of V. A. hospitals has more serious consequences than merely making veterans travel inordinate distances for treatment. A prominent physician was recently quoted as saying: "The Veterans' Administration hospitals are in the back-waters of American medicine, where doctors stagnate and where patients who deserve the best must often be satisfied with second-rate treatment." Civilian doctors who have studied the V. A. say that the isolation of the veterans' hospitals from medical schools and research centers cuts them off from the invigorating influence of doctors fresh from the study of new techniques; that research is discouraged; that improvements in medical science are generally introduced late and reluctantly; that the doctors are hampered in the performance of their chief duty—the healing of the sick—by the necessity of filling out forms and pension claims for the very men they are trying to heal; and that the present method of granting disability allowances to psychoneurotic veterans "consists essentially of paying men to remain ill."

These are serious charges, not lightly to be raised at a time when the peace of mind of so many servicemen and their families depends on their faith in the medical services that a grateful Government will provide for the physically and mentally disabled. Yet it is precisely because that faith must be justified that it is necessary to let light and air into the functionings of the Veterans' Administration. A letter recently received by the American Veterans Committee may be in point:

"For nearly 7 years I have been a physician in the Veterans' Administration. * * * Of course we have some physicians here who are capable, progressive, and diligent and who despite the many obstacles give their patients excellent care. * * * By and large the Veterans' Administration is staffed with many lazy, reactionary duds; it is cluttered with paper work which robs too many valuable hours of physicians' and nurses' time from clinical and scientific work; it features a pension business which too often takes precedence over therapeutic considerations; it really hasn't grasped the enormous problems of rehabilitation.

"* * * Blame can be spread everywhere, but many of us feel that the veterans' service organizations are largely at fault. In my 7 years' service with the Veterans' Administration I have often heard the veterans' organizations clamor for more monetary benefits and I have seen them maneuver for special privilege, but I never saw them exert themselves to raise the Veterans' Administration's standards of medical treatment. How come? They surely have no objections to good treatment of their members.

"The service organizations acquire their power from large memberships; they recruit power from large memberships through offers of greater monetary benefits and special privileges. Locally the organizations are constantly appealing cases for higher ratings and trying to force into the hospital their members and prospects. The typical sales talk runs like this: 'We've got the finest doctors in the country in the Veterans' Administration. You come with me and I'll get you in there.'

"Now what has this to do with the standards of medical treatment in the Veterans' Administration? Mainly this: veterans' organizations have most use for docile physicians and executives. Such men have been rewarded with the leading positions in many but not all instances. Many good men have resigned in disgust."

General Hines is a man of irreproachable character, distinguished by his honesty, integrity, and administrative efficiency. The red tape which slows the wheels of the V. A. is an unhappy byproduct of the careful checks on graft and dishonesty he instituted when he took over the Administration after the last war from the scandalous and ineffable Colonel Forbes, who went to Leavenworth for his sins. But honesty, business efficiency and saving the taxpayers' money by penny-wise-pound-foolish methods may not be sufficient where the future well-being of a large segment of the American people is concerned.

IV

How well do the men most directly concerned feel that the return of veterans to civilian life is being handled? A majority of those answering the A. V. C. questionnaire thought it was only fair.

The rehabilitation machinery is set up to do work on a quantitative, not a qualitative basis; as usual, the things needed are coming later than they might have come with wiser planning. There seems little imaginative understanding of the tremendous task that lies ahead; rather there is a widespread willingness to wait and see how things turn out, then adopt stopgap measures. Without a comprehensive community-government program, more public education, more enlightened personnel in the Veterans' Administration, and more emphasis on guidance for the veterans themselves, the situation cannot be materially improved.

Many servicemen and new veterans are sure that a strong new veterans' organization could do much in the way of bringing about these improvements. "Put the vets themselves in charge of their rehabilitation," one wrote. "Not World War I vets." (The feeling is widespread that this war's veterans can handle their own problems better than the last war's veterans, who now appear settled in life; the young men, as usual, would rather be left free to make their own mistakes.) They want more attention paid to the individual veteran and his problems; having freshly escaped from the highly institutionalized armed forces, they are not eager to be steered through still further institutional channels. Finally, they want less delay in the whole process.

The shortage of trained vocational and educational advisers, of guidance experts, and especially of psychiatric social workers is acute—and not much is being done about it. Result: Too much general advice and not enough individual counseling, which could develop the potentialities of men who have lost their self-confidence and sense of direction. The veteran who knows where he's going doesn't need much help; the veteran who comes home more or less disabled, physically or mentally, the veteran who has been in service so long that he feels out of contact with civilian life—these need help. Too often they are not getting it; or, more likely, they are getting the wrong kind.

These things are not going to be settled by the G. I. bill of rights, nor by any other omnibus legislation. As far as the G. I. bill goes, the honeymoon is over; "our boys" in whose name Congress congratulated itself after passing the bill, are finding out that it is not the key to their brave new world. Under its provisions the veteran can resume his education, if he can live on $50 a month; can get the Government to guarantee up to $2,000 of a loan at 4 percent interest to buy a house or a farm or to go into business, if the lending agency thinks he is a good risk; can get up to $20 per week unemployment compensation for up to 52 weeks, if he is unemployed through no fault of his own within 2 years after his discharge or after the end of the war, whichever is later. But the bill was oversold as much more than this. It was presented to the world by Congress, by the American Legion (which wrote it), and by many banks (with an eye on the loan business) in a fanfare of public relations, like a new breakfast food. Consumer reaction has taken a nose dive in proportion as the build-up was gaudy. In actuality, the bill is carelessly worded and, although businesslike, certainly not overgenerous in its provisions. The point is that by building false hopes we store up an inevitable reckoning of disillusionment and bitterness that will prove deeply damaging; whereas if we simply presented the facts of legislation and the rehabilitation program, the servicemen would know what to expect and would be correspondingly strengthened by preparedness.

V

The real needs of the 12,000,000 will be met neither by catch-all legislation nor by the present uncoordinated and disorganized measures taken in the name of rehabilitation. The veteran needs a coherent program which relates national legislation, State legislation, and community action together in a cooperative entity. It will take a congressional investigation to determine the true efficacy of the Veterans' Administration, to eliminate its weaknesses, and to reinforce its strong points. It will take another congressional committee, a Herculean one, to codify the existing Federal laws relating to veterans, which fill an 800-page book. It will take a greatly expanded public education program to inform American civilians as to what their sons and lovers have been through and what

they will need when they come out. The aim of such a program must be to mobilize the resources of each community to the end of making the serviceman's transformation from uniform to civilian clothes as quick and painless as possible.

In the final analysis, only community action will do the job. A rehabilitation program, like a legislative program, is no better than the individuals who administer it; and on the community level are to be found the men and women most intimate with the individual veteran, with his wants for a job, for education, for training, and for personal readjustment.

Bridgeport, Conn., has come closer to a solution than any town I know of. Its community advisory service center is a pleasant house on a hill just above Main Street, which deals not only with veterans but with displaced war workers and occupational migrants—in itself a healthy sign, indicating to the veteran that he is not being fenced off from the rest of society. Seven towns in the Bridgeport area pay all expenses of the center through the United Community and War Fund; its trained professional staff is headed by Dr. Randall B. Hamrick, a member of the Personnel Training Committee of Connecticut's unique and far-sighted Reemployment Commission, which has guided and trained thousands of individuals into useful, skilled jobs.

There are no well-intentioned dogooders in the center; you have to know the language of the trade when a veteran comes in with a problem, and there are 90 subjects—by actual count—on which you might be asked questions. A receptionist routes the veteran or war worker to an educational consultant, an employment consultant, a regional representative of the Veterans' Administration, a representative of Selective Service, a Connecticut reemployment commission man, a Veterans' Administration doctor, or a Veterans' Administration vocational training officer, depending on his needs. If a man must be referred elsewhere, as to the United States Employment Service, for instance, he is referred directly to an individual, not simply to the agency; an appointment is made by telephone while he is sitting there; and the case—which is never referred to as "a case"—is followed up to see that the proper adjustment is made.

Much of the actual adjusting is done by the 26 committees which cooperate with the center—committees of bankers, insurance brokers, manufacturers, social-work agencies, veterans' organizations, and so on. "We're only a coordinator," Dr. Hamrick says. "We're interested in putting other people to work." Their work lies in providing the proper jobs, the proper help on financial matters, the follow through which does most to restore veterans to a useful and productive place in the community. The best testimonial to their success is that the majority of the men who come to the center say they've come because a friend, another veteran, told them to; they are treated neither as charity cases nor as convicts out on parole, but as individuals and normal human beings.

"You can't fence the veteran off in one field," soneone at the center said. "A member of the family laid off his job creates a new problem for the veteran. They're all human beings, and you can't have one-half of the community adjusted and the other half not adjusted."

In essence, this is the true "veterans' problem." There are many individual veterans' problems, but the one overriding veterans' problem is identical with the overriding national problem: How to create a more democratic and prosperous America in a world organized against war. No peace for the Nation means no peace for the veteran who fought to restore peace. Mass unemployment for the Nation means mass unemployment for the veteran who fought for the right to work. Intolerance, discrimination against minorities, inflation, farm foreclosures, factories turning over at half-speed in the Nation—all these plant at home the seeds of that same fascism which the veteran defeated abroad. The number of servicemen and veterans who know these things would astonish the advertising boys who write of mom and blueberry pie. Most of them do not seek a Government handout, nor retirement in an old soldiers' home. They seek the door back to productive civilian life, in a democracy which fulfills its promises, and in which they can make their own futures.

Congress and the People

EXTENSION OF REMARKS

OF

HON. JOHN B. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. SULLIVAN. Mr. Speaker, under leave to extend my remarks I include an editorial of the St. Louis Post-Dispatch of Sunday, April 15, 1945, commenting on the proposal that Congress arrange its work so that Members may return to their districts periodically to discuss important issues with their constitutents. This proposal was made before the Joint Committee on the Organization of Congress by our able and distinguished colleague from the Fifth Congressional District of Arkansas, the Honorable BROOKS HAYS.

As one who in the trying days of the Seventy-seventh Congress was unable to return to my district for this or any other purpose because of the congressional schedule, and as one who in this Seventy-ninth Congress took advantage of the recent brief recess to go to my home district, I say BROOKS HAYS' proposal is sound.

My visit was strenuous. I met and talked with many people, visited many groups and received many delegations. I answered many questions and asked them. But, I returned refreshed in spirit and with the satisfaction that I had provoked study and thought and discussion of the grave problems confronting us.

A well-informed people is the bulwark of our democracy, and a well informed people will usually reach the proper conclusion.

CONGRESS AND THE PEOPLE

We are glad to learn that Representative BROOKS HAYS' recent appeal to the Joint Committee on the Organization of Congress to give attention to the relations of Congress to the electorate has had its effect. The committee has now undertaken to include this phase of legislative duty in the scope of its study, which is good.

The Arkansas Congressman pointed out in his testimony that the war had kept most of the Members in Washington so much of the time that their opportunities to learn what the folks back home are thinking have been greatly reduced. Such long absences, he contended, might lead to misunderstandings and loss of confidence by constituents in their Representatives.

To offset developments of this sort, he suggests that Congress arrange its work so that Members can make definite plans to visit their districts to answer questions, discuss policies, and revitalize their contacts with their electorates.

This looks like practical democracy of the sort the United States needs. The essence of the title "Representative" is that the individual so selected shall stem from and maintain a continuing contact with the people he represents.

As the Washington Post points out:

"There is much complaint about the influence of special interests, but not much about the contacts between Congressmen and their constituents. The power of the lobbies is likely to be weakened as the influence of the people is increased. Nor can we forget the great responsibility of Congressmen to educate their constituents as to the value of national policies that may not be properly understood in areas distant from Washington."

Mr. HAYS has made a real point. Congress should be streamlined in its representative relations as well as in its internal rules and procedures.

Reemployment of Returning Veterans

EXTENSION OF REMARKS

OF

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. FEIGHAN. Mr. Speaker, citizens of ward 7 of the Twentieth District in Cleveland, fully cognizant of the sacrifices and hardships endured by the members of the armed forces, have determined to lend every assistance possible to place their returning veterans in suitable employment. This same spirit of helpfulness might well be copied by citizens of other wards and districts throughout the country, who, I am sure, would be willing to assist their returning servicemen during the reconversion period. I ask unanimous consent to insert in the RECORD the following clipping from the Cleveland Press of April 21:

WARD 7 JOB GROUP HOLDS FIRST PARLEY

The more than 300 servicemen registered with Draft Board 7 today have a neighborhood organization which is going to help them get jobs when they return home.

Elected officers of the neighborhood committee, which represents the area within Ward 7, are James Kmiecek, Cleveland Trust Co. foreign-exchange agent, chairman; John T. Bilinski, assistant police prosecutor, vice chairman; and Mrs. Catherine L. Dempsey, chief clerk of Board 7, secretary.

The first meeting of the community group was called last night at Merrick House, 2531 West Eleventh Street, by Thomas F. Latta, chairman of Board 7's reemployment committee. B. C. Seiple, U. S. E. S. director; Commander C. D. Finn, draft official; and Dr. Frank E. August, director of the Veterans' Information Center, addressed the group. The organization of the jobs committee is believed one of the first of its kind in the Nation.

Mr. Justice Black

EXTENSION OF REMARKS

OF

HON. W. O. BURGIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. BURGIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address made by Hon. Fred M. Vinson, Federal Loan Administrator, now Director of War Mobilization, at a testimonial dinner honoring Hon. Hugo Black, Associate Justice, United States Supreme Court, at the Statler Hotel, Washington, D. C., on Tuesday evening, April 3, 1945:

Mr. Toastmaster, Mrs. Roosevelt, Mr. Justice Black, ladies and gentlemen, "Our object was to maintain the will of the majority * * * and of the people themselves. We believed that man was a rational animal endowed by nature with rights, and with an innate sense of justice; and that he could be restrained from wrong and protected in right, by moderate powers, confided to persons of his own choice and held to their duties by dependence on his will. * * * We believed that men, enjoying in ease and security, the full fruits of their own industry, enlisted by all their interests on the side of law and order, habituated to think for themselves, and to follow their reason as their guide, would be more easily and safely governed than with their minds nourished in error * * * vitiated and debased * * * by indigence, ignorance, and oppression. The cherishment of the people then was our principle."

These words, written by Thomas Jefferson to Mr. Justice Johnson in 1823, comprise the philosophical core of Mr. Justice Black's life. "The cherishment of the people" is the principle which has consistently animated and conformed his conduct in public life.

It is fitting and proper that this band of Americans, gathered from every avenue of our national life, should gather to pay tribute to his public services. As legislator and jurist he has been a preeminent tribune of the common man. I am glad to add my voice to this chorus of admiration and gratitude.

Often it seems that public plaudits are reserved for those who court the passing fancy of the hour. Frequently those who simply labor in the vineyards of democracy are left to plow the lonely furrows of public service. They receive too late their just desserts of recognition and gratitude. Then they cannot derive that lift of inspiration which even the most disinterested public servant must necessarily breathe from the appreciation of those for whom he has fought the good fight. Therefore I am especially happy that those of us who have followed the pioneering footsteps of Hugo L. Black have banded together to acclaim his achievements while he can drink from that cup of inspiration.

For some men, yes, even, for some judges, praise might act as an unhealthy opiate. Recently, another distinguished American retired from the public service after several years of especially arduous and thankless devotion in the war effort; and, his retirement was the occasion of much laudatory comment. A friend asked him how he felt about the acclaim. "Oh, praise is all right," was the reply, "so long as you don't inhale it."

Mr. Justice Black's career has been stamped with an inability to inhale either praise or unjust criticism. Without regard to these twin irrelevancies of political life, he has kept resolutely to the course of principle.

This fixed resolution that principle must come first, the disregard of the counsels of expediency, has been one of the outstanding hallmarks of Hugo Black's public life.

Expediency would have counseled him, as a struggling young lawyer, to court the favor of those interests which can offer so many rewards to the talented advocate. Instead, he devoted his growing gifts to the service of the humble.

Expediency would have counseled him, as a young and newly elected Senator, to take at face value the accepted economic and political shibboleths of the twenties, accepting the then prevalent counsels of those who held that all was well in this best of all possible words. Instead, he chose to challenge those shibboleths, and to raise his voice in protest against the injustices and inequalities which rode rampant over our national economy.

Experiency would have counseled him, as a new-robed judge, to take refuge in the dignified anonymity which a lesser man might seek to find on the bench. Instead, he straightway challenged in unequivocal tones many of the widely accepted juristic canons of the day.

No one can contend that Mr. Justice Black has ever feared to own the cause in which his loyalties were enlisted. I recall hearing a friend say of a Kentucky political figure that his contracts ran only for the current fiscal year. But Mr. Justice Black's enlistments have always been for the duration of the war.

If courage and adherence to principle have been the woof of Mr. Justice Black's career, a fierce and undeviating devotion to the common man has been its very warp. As a Senator he was the tribune of the common man, in and out of season. On the bench he has been preeminently the guardian and protector of the basic freedoms of the common man.

Perhaps it may be felt that this devotion is quite natural and logical. Mr. Justice Black himself sprang from the common people. To him, the common man is no mere abstraction—no mere creation of a philosopher's imagination. The daily struggles of the common man—the needs of humble men and women—the aspirations of simple folks—are all a part and parcel of his own experience.

And yet how often have we seen the self-made man who feels that his own success is but a bench mark of individual superiority and vindication of the essential rightness of the process by which he has surpassed his fellow man. With Hugo Black it has been otherwise. His own struggle against adversity, his rise to a position of eminence, was to him but a vindication of his faith in the capacities of the common man. It served constantly to revitalize his dedication to the gospel of equal opportunity.

When Hugo Black first came upon the scene of national affairs, champions of the common man were few and far between. Many of our most respected and prominent leaders, in politics, in business and finance, were convinced that, under the guidance of the so-called best minds, America had entered upon a new era of perpetual prosperity. It was not felt necessary to make legislative provision for the general welfare of the common man. His natural resources were, in many instances, bartered away to private monopoly.

Senator Black did not accept part and parcel the established order of things. He insisted on looking beneath the surface to the underlying realities. He demanded that the people's heritage of natural resources be preserved as a public trust, to be developed in the common interest. This insistence bore fruit in T. V. A. He relentlessly exposed the efforts to pervert the processes of popular government; and this exposure assisted in the passage of corrective legislation. He insisted that no prosperity which did not extend to the very soil itself could long endure; and demanded a greater measure of justice for the man on the farm. He participated in the agricultural legislation of 1933 and the years which followed. At a time when collective bargaining was regarded by many as inconsistent with the American way of life, he insisted upon legislative protection for the rights of men in factory and mine, to associate themselves together for mutual aid and defense of their economic interests. This insistence bore fruit in the labor legislation which is now accepted as the foundation rock of national labor policy. At a time when the abolition of the sweatshop was regarded by many as unconstitutional, Senator Black pioneered in the preparation and introduction of legislation to protect the common man against wages, hours, and working conditions inconsistent with the basic premises of economic democracy. This work bore fruit, in the Fair Labor Standards Act, which bears his name, and which alone would have earned for him the grateful remembrance of all humble folk who live by toil and sweat.

There is a Chinese proverb that he who lights a candle is better than he who curses the darkness. In all his public life Hugo Black has never contented himself with cursing the darkness of social injustice, economic inequalities, special privileges, or deviations from the essence of democracy. Rather, he has struggled always to light the candle of constructive action, casting the light of correction into the dark corners of our national life.

It is the unfortunate fate of most of us to have the range of our interests and the boundaries of our capacities fixed in early manhood. Experience and time may add unto us skill and judgment, but for most of us the range of possible achievement is determined in the earlier years. With a few fortunate men, this is not so. With them there seems to persist a dynamic quality, a faculty for growth which consists not merely in realizing the promise of youth but in developing newer and wider horizons. Such a man was Lincoln, whose earlier years held little of the promise so richly realized in the hour of supreme national crisis. Such a man was George W. Norris, who recreated so much of the essence of Lincoln's mind and spirit. At 80 years of age, when most men may with justice and honor live in the triumphs of the past, George Norris was blazing thoroughfares.

Such a man is Mr. Justice Black. As a legislator he constantly widened his horizons. And yet, at a time when most men begin to think of resting on the laurels of past achievement, he took on the burdens of a wholly new task, bringing to high judicial office the same intense devotions and the same capacity for unremitting labor which had distinguished his legislative career.

Only a few terms of Court were necessary to bring to the bar the realization that here was an authentic talent—a lucid intellect and a disciplined craftsmanship harnessed to the purposes of creative judicial democracy. Within the limitations of the judicial process—and none is more scrupulous to observe those limitations than Mr. Justice Black—his craftsmanship and intellect were propelled by the same democratic purposes which motivated his senatorial career. For him the Constitution, statutes, and common law are all charters of dynamic freedom for the common man, are all organic testaments of a democratic ideal.

And so tonight we honor him as one who has in two careers distinguished himself as a witness and a warrior for the democracy of the common man.

It is especially appropriate that these ceremonies should take place under the auspices

of a Southern Conference for Human Welfare. A passion for human welfare is woven like a thread through Hugo Black's entire life.

Likewise, he has been a preeminent southerner. Every man is the product of his environment, and even those of us who live somewhat closer to the Mason and Dixon's line like to believe that the South cannot fail to leave her imprint on any of her sons. Least of all has it failed to leave its imprint on Hugo Black. He has ever been conscious of his South—of her special social and economic problems, of her peculiar political traditions, of her sensitive and self-conscious pride.

And yet he has never been provincial. He has realized and led in helping his fellow-southerners to realize that the South cannot fulfill her destiny in isolation or in withdrawal from the destiny of the Nation. Rather, he has struggled to obtain for the South a fuller participation in the benefits of the American heritage and a fuller opportunity to contribute to the enlargement and enrichment of that heritage.

Thus, he has transcended the limitations of sectionalism and established himself as an unmistakably southern but genuinely national statesman.

Those, then, are the fixed stars in Mr. Justice Black's intellectual and moral firmament—a resolute and inflexible adherence to principle; an undeviating devotion to the welfare of man as the hub of the democratic universe; a constant widening of interests, sympathies, and horizons; and a realization that democracy, if she is to thrive, must transcend the provincial boundaries of State or section—or indeed any boundaries less wide than those of humanity itself.

Such are the qualities out of which has been compounded the amalgam of an already distinguished career.

Tonight we bear witness, by our presence here, that Mr. Justice Black is already a cherished asset in the heritage of freedom. He is an asset with many years ahead in which to increase his value. And as we offer him our acclaim and our encouragement to persevere in the course he has set for himself, we draw from him inspiration for the challenging tasks of the future, a future which we shall win only if we highly resolve, as Mr. Justice Black has always highly resolved "to strive, to seek, to find, and not to yield."

Polish Deadlock

EXTENSION OF REMARKS

OF

HON. THOMAS S. GORDON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GORDON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial from the Washington Star of April 24, entitled "Polish Deadlock":

POLISH DEADLOCK

It is regrettable that the San Francisco Conference—barring a last-minute reconciliation of views—should have to open under the cloud of what seems to be a deadlock in the Polish negotiations.

The extent of the unsettling influence which will result from the disagreement among the three great powers on the Polish issue remains to be determined. It should not and probably will not cause a breakdown of the security discussions. But at a time when there is need for the greatest confidence and unity, it cannot fail to be a disturbing factor—a continuing source of concern to those men who are striving earnestly toward the goal of lasting peace and a ready-made foundation upon which the obstructionists can build.

It has been said, and it is perfectly true, that the essential condition of international security in the post-war world will consist of the ability of the United States, Russia, and Britain to work together. There will be differences among them, of course, but if these nations can establish a working relationship based upon mutual confidence and a close identity of interest the outlook for a long period of stable peace will be good. On the other hand, if this relationship cannot be established among the Big Three, it is hardly conceivable that any agrement made at San Francisco can contribute much to the peace of the world.

This is why the Polish question assumes so much importance. It provides the first real test of the capacity of the Big Three to agree on a controversial matter, and it also tests their willingness to abide by the letter and the spirit of an agreement once it has been made. For these reasons it is to be hoped that the Polish discussions will be renewed at San Francisco, as the White House forecasts, and that a settlement will be reached. Otherwise, the area of disagreement is almost certain to grow, regardless of anything that the delegates of the United Nations may put down on paper in the next few weeks.

Extension of Reciprocal Trade Agreements Act

EXTENSION OF REMARKS

OF

HON. HUBERT S. ELLIS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. ELLIS. Mr. Speaker, in view of the fact that the Reciprocal Trade Agreements Act—with authority to cut tariff rates—no doubt will soon be before the House for consideration, I believe it desirable that we have the benefit of the opinion of responsible persons from every section of this country.

Today, I submit an editorial from the Wheeling Intelligencer, one of the great papers of the Middle West, published in Wheeling, W. Va., and edited by Thomas O'B Flynn. You will find his editorial very interesting:

IF A LOWER TARIFF IS GOOD, WHY ISN'T NO TARIFF BETTER?

Extension of the Reciprocal Trade Agreements Act, with authority to cut tariff rates another 50 percent, "would give the rest of the world a tangible proof that we mean what we say about joining with other nations in working toward a more prosperous and more secure world," Secretary Stettinius told the House Ways and Means Committee the other day.

Now, it seems to us that if we are going to give examples we should make them full-bodied, striking examples. If it's a good example to cut our tariff in half again, why wouldn't it be a much better example to wipe the tariff out altogether?

If it's a matter of proving our good faith and showing an example, let's do it right. Let's scrap all this burdensome machinery of trade trading, of lopping the tariff here and there piecemeal. Let's say boldly that on and after June 30 next, there will be no tariff at all, no trade restriction of any kind imposed by the United States. Every country will be free to send as much of whatever it has to sell to this country, enter it duty-free, and take its chances of disposing of it on the American market.

Why not?

If the argument the administration and the lay supporters of its trade policy make about increasing prosperity and good will through the less obstructed flow of trade is sound, why isn't it ideal to remove all obstructions and make the flow completely unrestricted? And why, if it is up to us to set an example, and if we would be, as argued, the chief beneficiaries of such a policy, don't we make it, as above suggested, a real example?

Which brings us to a curious and significant political fact.

Not a single one of the foreign-trade enthusiasts of the New Deal era, not a single critic of the Republican protective-tariff policy, ever yet has proposed free trade.

Why not?

It is reasonable to conclude that if they haven't proposed free trade they don't believe in free trade.

If they don't believe in free trade they must believe in protection. For there can be no other reason for a tariff. They must believe that the United States cannot safely open up its market to unrestricted competition with products from abroad.

If this be true—and we submit the evidence in support of this premise is overwhelming—their whole case falls to the ground.

It is no longer an argument between the rival economic theories of protection and free trade.

It becomes merely a question of how much protection.

Which brings us back to this newspaper's basic position:

That we need no cumbersome machinery for the negotiation of trade agreements; that all we need is a simple tariff policy of imposing flexible duties as changing conditions suggest, designed to equalize selling costs on the American market between every domestic product and its imported counterpart, whatever its origin. Where there is no competition, no tariff. Where there is competition, an equalizing duty, no more, no less.

It's as simple as that.

Joint Army-Navy Statement

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GAVIN. Mr. Speaker, last December two boys out of a family of five boys in the service from Johnsonburg, Pa., my district, were killed in action, within a week. I took this matter up with the War Department relative to placing the remaining boys of the family in noncombatant service feeling that where two boys in any one family were killed in action was a great sacrifice.

The War Department, Maj. Gen. Stephen G. Henry and Secretary of War Stimson, advised me they had certain

definite policies on matters of this nature, however, they would take it under consideration.

I want to advise the Members of the House that this policy has now been changed and I am inserting in the RECORD a news release of the War Department for the information of the Members.

I am gratified that the Secretary of War has seen fit to change the War Department policies on a matter of this kind.

JOINT ARMY-NAVY STATEMENT

The War and Navy Departments have long recognized the sacrifice entailed when a family suffers the loss of successive members as war casualties. To lessen the risk of additional sacrifice by such families, a policy has been adopted to assign remaining members who are in the armed forces, to nonhazardous duty. It is estimated that approximately 10,000 individuals in both services will be affected. This is an extension of the previous "sole surviving son" policy.

Specifically the policy will apply when it is established that two or more members of an immediate family group while serving in the armed forces in this war have been killed, died as a result of wounds, accident, or disease, or been reported as missing in action or as prisoners of war.

The remaining members of such a family who are in the armed forces will be assigned to nonhazardous duty upon request of the serviceman concerned or a member of his immediate family. This may mean duty in the rear area of an active theater, duty in an inactive theater, or duty in the United States. A remaining member who is the sole surviving child or sole surviving son will in every case be retained in or returned to the United States for permanent assignment.

Cases under this policy must be brought to the attention of the Army or Navy by a member of the immediate family or the serviceman concerned.

Cases which have been previously submitted and denied under the "sole surviving son" policy should be resubmitted if consideration is desired under the new and broader policy.

Requests under this policy should be submitted to The Adjutant General, Washington, D. C., for those persons in the Army of the United States and to the Bureau of Naval Personnel, Commandant of the United States Marine Corps, and Commandant of the United States Coast Guard, Washington, D. C., as appropriate, for those persons in the Navy, Marine Corps, and Coast Guard. The person making the application should furnish the name and relationship to the writer of all persons in the immediate family. For those members in the armed forces the grade, serial number, organization, and station assignment should be included. For those members lost in the present war the grade, serial number, last organization, and station and available information as to death, capture, or missing status is necessary. Full and complete information will be of great assistance to the departments in taking necessary action and no action can be taken unless a request is started by a member of the family concerned or the serviceman himself.

A Nonpolitical Appraisal of Our Postwar Trade Prospects

EXTENSION OF REMARKS
OF
HON. HOWARD H. BUFFETT
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. BUFFETT. Mr. Speaker, the "bloodless verdict of the market place" is usually a sound yardstick for measuring political ballyhoo. A market place appraisal of postwar trade prospects is found in Barron's National Financial Weekly for April 23.

The contrast between this nonpartisan report and the rainbow painting of Bretton Woods and tariff-cutting advocates is enlightening.

America will serve her own people and the word best if the people of America understand honestly the problems we are facing. Here is Barron's forecast:

FOREIGN TRADE

The administration continues its drive for tariff-cut powers designed to stimulate postwar foreign trade, apparently with no consideration of the fact that there will be little real trade to stimulate. For years to come, normal exchange of goods and services will be practically impossible except with the Latin-American countries and—within the limitations set by the imperial preference system—with the British Dominions. Exports to other areas will be largely at the cost of a further rise in our national debt. Those areas will, by and large, purchase from us with the help of whatever credits we decide to grant. A few nations will be able to use their gold to buy essential food and machinery.

Wherever Germany's industrial capacity has not been turned to rubble, Allied control of her war potential will eliminate the enterprises on which she used to depend for most of her exports.

Russian use of German labor will have tremendous social and economic implications, not least of which will be destruction of that labor's ability to buy abroad. Most of Continental Europe has been so drained of machines and materials and faces such political turmoil that large-scale mutual trade with us is hard to envisage. For that matter, the whole Eurasian Continent presents the same cheerless prospect.

China's poverty is well known and Japan will be in the same case as Germany, if not worse. India's frozen sterling balances in London will force her to buy from the United Kingdom. As for Russia, her post-war industrialization program will leave little for exports. What she does buy from us will have to be paid for in gold of the proceeds of long-term credits.

Great Britain will also take relatively little from us except on credit, at least in the initial stages of her reconstruction. Subsequently, to help pay her debts and regain some of her world commercial position, she will have to become a keen competitor for what export trade is available.

Two Questionnaires

EXTENSION OF REMARKS
OF
HON. DUDLEY G. ROE
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. ROE of Maryland. Mr. Speaker, under leave to extend my remarks in the RECORD, I include two questionnaires, one coming from the O. P. A. office in Baltimore, Form No. 653–40, which was evidently sent out with the idea that the small businessmen of this country have nothing to do except to fill in questionnaires.

Many of the questions in this form are absurd and ridiculous, and I venture the opinion that the answers will never be classified or used for any useful purpose.

The second questionnaire is from the Department of the Interior, and is an insult to the small businessmen of our Nation, threatening them with criminal prosecution, fine, and imprisonment. If I had the power, I would fire whoever prepared this questionnaire before sundown.

It is just too bad that the small businessmen of our country, with either no, or more inefficient, labor, should be compelled to spend so much time answering these useless, annoying questionnaires, which can be of no assistance to anyone. I include the questionnaires in question, as follows:

O. P. A. Form 653-40 (Rev. 1-45)

Budget Bureau No. 08-R610.3
Approval expires September 30, 1945

UNITED STATES OF AMERICA

OFFICE OF PRICE ADMINISTRATION

DETERMINATION OF MAXIMUM PRICES FOR SOLID FUELS SOLD BY DEALERS

This form must be filed each time maximum prices are determined or redetermined under rule 1 of section 1340.254 of Revised Maximum Price Regulation Number 122.

Name of company

Address—Number and street

City, postal zone number, State

TO BE MAILED TO YOUR DISTRICT OFFICE

INSTRUCTIONS

Column 1: Define by type of customer and method of sales, i. e., "Domestic delivered to bin," "Commercial delivered," "Industrial delivered," etc. Your discounts for yard sales, if any, should be reported as item 4 on page 2.

Column 2: Give the name under which the coal was sold to you, for example, "Pocahontas egg," "East Kentucky lump," "Penn anthracite stove and nut," "Byproduct coke," etc.

Columns 3, 4, 5, and 6: These items will be found on the invoice from your supplier. For column 3, specify the size group number or the screen size dimensions.

Column 7: Enter for each kind and size of solid fuel the highest cost to you during December 1941 before discounts, allowances, or service or treatment charges, and excluding freight costs. Do not include any oil or chemical treatment charge. If no such solid fuels were purchased in December 1941, use the first preceding month in which the solid fuel was purchased.

Column 8: Enter your supplier's present maximum price before discounts, allowances, or service or treatment charges. Supplier means the person from whom you purchase your coal.

Column 9: State the freight rate per net ton (2,000 pounds) followed by "R" if the coal is obtained via railroad, "T" if via truck, "V" if via vessel, or "B" if via barge.

Column 10: Enter your highest selling price in December 1941 for this type of sale before discounts, allowances, or service or treatment charges.

Column 11: Enter present maximum selling price for this type of sale before discounts, allowances, or service or treatment charges.

	Type of sale (1)	Name and kind of solid fuel (2)	Size and origin of coal: Size (3)	Size and origin of coal: Name of producer or distributor (4)	Size and origin of coal: Producing district number (5)	Size and origin of coal: Mine index number (6)	F. o. b. supplier's shipping point: Highest purchase cost December 1941 (7)	F. o. b. supplier's shipping point: Supplier's current maximum price (8)	Present freight rate per net ton (2,000 pounds) (9)	Dealer's highest selling price per ton: December 1941 (10)	Dealer's highest selling price per ton: New maximum selling price (11)
1											
2											
3											
4											
5											

If more space is necessary attach additional sheets using the above column headings

Enter in the appropriate spaces below the charges and discounts made in December 1941, if any were made. Indicate by reference to line number to which of the sales described on the other side of this form these discounts and charges apply. If all, so indicate. (If these have been modified since the base period by O. P. A. order, enter only your present charges and discounts and state the O. P. A. order number in the space labeled "additional information.")

1 a Are the prices listed on the other side of the report based on one-ton sales? Yes ☐ No ☐

b If "No," state on what size sale they are based

Line No. (page 1)	Size of sale (i. e., 3, 5, etc., tons, load lots, carload lots)

2 a Indicate how prices for sales in fractions of a ton are computed (i. e., one-half-ton price equals one-half the ton price plus 25 cents). If the standard unit is more than one ton, indicate how prices for sales in quantities of less than the standard unit are computed.

Line No. (page 1)	One-fourth ton	One-half ton	Other (specify)

b List prices for coal sold by the pound in bulk or bagged

BULK

Line No. (page 1)	Per Lbs.	Per Lbs.

BAGGED (specify weight of bag)

Line No. (page 1)	Yard price to consumer	Yard price to reseller	Delivered price to reseller

3 Specify discounts per ton for sales in larger quantities than the standard unit

Line No. (page 1)	Discount per ton (specify size of sale)

4 Discounts per ton for yard sales to:

Domestic consumers	Resellers

5 Specify the cash discounts per ton allowed

Line No. (page 1)	Time of payment	Discount

6 Charges for special services (if charges are made on hourly basis, specify rates per hour)

Service	Per ton	Other quantities
Carrying from curb to bin		
Carrying up or down stairs		
Wheeling from curb to bin		
Trimming		
Other		

7 Other special charges

Oil or chemical treatment

Extra long haul (if you have a regular schedule of hauling charges for deliveries to other localities, attach a copy to this form)

Other (specify)

ADDITIONAL INFORMATION

I certify that the information contained herein is true and correct.

O. P. A. Form 653-40 (Rev. 1-45) back.

UNITED STATES
DEPARTMENT OF THE INTERIOR,
SOLID FUELS ADMINISTRATION FOR WAR,
Washington.

TITLE 30, MINERAL RESOURCES—CHAPTER VI, SOLID FUELS ADMINISTRATION FOR WAR—PART 602, GENERAL ORDERS AND DIRECTIVES

AMENDMENT 1 TO S. F. A. W. REVISED REGULATION NO. 5

To correlate the provisions of S. F. A. W. revised regulation No. 5 with the provisions of S. F. A. W. regulations No. 26 and No. 28, it is necessary to amend it as follows:

1. Paragraphs (d) and (e) of section 602.81 are amended to read as follows:

"(d) 'Wholesaler' means any producer to the extent that he ships, distributes, or sells anthracite to retail dealers or over-the-road truckers, and any person to the extent that he receives or purchases anthracite for shipment, distribution, or resale to retail dealers or over-the-road tuckers.

"(e) 'Retail dealer' means any person (including the retail outlet, branch, or department of one who is also a producer, wholesaler, or lake or tidewater dock operator) to the extent that he distributes anthracite in any transaction, except a transaction between a wholesaler and an over-the-road trucker involving the disposal of anthracite physically handled in a truck, wagon, or other less-than-carload facility, without regard to quantity or frequency of delivery."

2. Wherever the year "1944" appears in paragraph (a) of section 602.83, it is amended to read "1945." Wherever the year "1945" appears in said paragraph (a), it is amended to read "1946."

3. The date "April 1, 1944" appearing in paragraph (b) of section 602.83 is amended to read "April 1, 1945."

4. The words "90 days' supply" appearing in section 602.84 are amended to read "60 days' supply."

5. In appendix A, "Bureau of the Budget No. 42-R706" is amended to read "Bureau of the Budget No. 42-R706.1." "Approval expires April 30, 1945" is amended to read "Approval expires April 30, 1946." Wherever the year "1944" appears in appendix A, it is amended to read "1945" and wherever the year "1945" appears in said appendix A, it is amended to read "1946."

6. Appendix B is amended to read as follows:

APPENDIX B TO SFAW REVISED REGULATION NO. 5

Bureau of the Budget No. 42-R705.1
Approval Expires April 30, 1946.

PENALTIES FOR MISREPRESENTATION

Any person making a false statement or representation on this form is subject to criminal prosecution and upon conviction is subject to a fine of not more than $10,000 or 10 years' imprisonment, or both.

This amendment shall take effect 12:01 a. m. on April 1, 1945.

(E. O. 9332, 8 F. R. 5355; E. O. 9125, 7 F. R. 2719; sec. 2 (c) 54 Stat. 676, as amended by 55 Stat. 236, 56 Stat. 176 and 58 Stat. 872.)

Issued this 2nd day of April 1945.

HAROLD L. ICKES,
Solid Fuels Administrator for War.

Military Service by 18-Year-Old Boys

EXTENSION OF REMARKS
OF
HON. JAMES I. DOLLIVER
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. DOLLIVER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter written by me recently to the Under Secretary of War:

APRIL 24, 1945.

Hon. ROBERT F. PATTERSON,
Under Secretary of War,
Washington, D. C.

MY DEAR MR. SECRETARY: There is no disposition on my part to control the conduct of the war. I am not even suggesting any material deviation from policies already in effect. Nevertheless, I have had justifiable complaints from my district regarding the policy of putting 18-year-old men into the battle lines without adequate mental or physical preparation.

Under date of December 8, 1944, the War Times carried the announcement reported from your press conference that under no circumstances would a man be sent into an active overseas sector without a period of 8 months intervening between his induction and going into combat.

Some instances have come to my attention where this policy has been violated. I have in mind a specific case from my State where an 18-year-old boy was informed, while still in basic training, that he would go overseas immediately upon the completion of his 15 weeks' basic course. While the boy was in fine physical condition, he did not believe that he had received adequate training and accordingly discussed this point with his father. The latter, being fully informed of your press conference and the December news release, assured his son that he would not be sent into combat without 8 months' training because the War Department could be depended upon to abide by its publicly expressed policy.

However, this boy was immediately sent overseas and was but 2 weeks in a replacement pool in France before being sent into combat. Within a week from the time of going into the front line outfit he was killed. It seems to me that there is no excuse for sending these men into combat without the training that had been promised, and especially is there no excuse for not frankly telling them what they are facing.

I respectfully request that the policy of the War Department be adjusted to conform to the December announcement. Many boys at 18 have just finished their high-school course and are not physically nor mentally equipped to enter into the rigors of active warfare without a more adequate preparation than some of them have received.

Respectfully,

JAMES I. DOLLIVER.

Constitution as a Model

EXTENSION OF REMARKS
OF
HON. CHARLES R. ROBERTSON
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. ROBERTSON of North Dakota. Mr. Speaker, as the opening day of the great San Francisco Conference is at hand the people of America are deeply concerned with the objectives which bring together this cosmopolitan mixture of citizens from all over the world. It is a great effort in a new direction. The task will not be easy, but it is tangible evidence of intellectual minds trying to find a way to stop wars. We must, under all circumstances, as we think of this gathering, bear in mind that delegates

here assembled represent the bloodstreams of many continents, and should they not in this preliminary event fit together all of the phases essential to a well-organized family of nations of the globe, let us have the beginning here and let time play its part in the days that follow.

I ask for unanimous consent to include herewith an editorial so ably expressing this phase of the Conference taken from the Bismarck Tribune under date of April 18, the author of which is Kenneth W. Simons:

CONSTITUTION AS A MODEL

Nearly 30 years after the Constitution of the United States was written and submitted to the States, Thomas Jefferson wrote: "Some men look at constitutions with sanctimonious reverence, and deem them like the Ark of the Covenant—too sacred to be touched. They ascribe to the men of the preceding age a wisdom more than human."

That reverence which Jefferson noted has grown through the years. Today we are inclined to be forgetful of the Constitution's early history and of the amendments which we have seen fit to make in it. Because the Constitution is great and impregnable today, we sometimes talk as if it had been conceived in harmony and born in triumphant strength and full-blown perfection.

So we should be vigilant against demanding the same impossible perfection of the document that will issue from the San Francisco Conference. And perhaps it will increase that vigilance if we review a little further some of the circumstances of the Constitution's birth.

The structure of free representative government explicit in its final form was the fruit of expediency as well as idealism. Smaller States, bucking control by New York, Pennsylvania, and Virginia, the Big Three—and how modern that sounds—won such compromise victories as proportional representation in the House and the popular vote for presidential electors by threatening to walk out of the convention.

The Constitution was presented to the people with considerable fear. Some of the delegates went home before the job was done. Three who remained refused to sign the document. Others were reluctant. Ellbridge Gerry thought it would provoke a civil war. Jefferson, in Europe, was astonished that it contained no guaranty of basic human rights.

At first the Constitution found its support among the rich, and its opposition from the poor and a handful of rich, "visionary" champions of democracy. The series of Federalist papers by Hamilton, Madison, and Jay helped greatly in swinging popular opinion. But even so, Rhode Island, which had refused to send delegates to the Convention, waited 3 years before ratifying the Constitution.

The point is that the Constitution has grown more democratic, stronger, and more effective with the passing years. Today, thanks to the Bill of Rights and subsequent amendments, it stands before the world as a paragon of political right and wisdom, however short we may fall of fulfilling its letter and spirit.

The moral of this short refresher course is obvious. The San Francisco Conference, also sailing an uncharted course, is bound to produce an imperfect plan. By refusing it we should have nothing to take its place. By accepting and amending and improving it we can look with confidence toward a world in which men may live out their lives in peace.

Postal Clerks Need Help

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GAVIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Oil City (Pa.) Derrick of April 21, 1945:

POSTAL CLERKS NEED HELP

According to the information furnished us there has been no increase in the pay of postal clerks for 20 years. They are now getting the benefit of an emergency subsidy of $300 per year, but the base pay remains the same. A bill sponsored by THOMAS G. BURCH, chairman of the House Committee on Post Offices and Post Roads, provides that every regular post-office clerk and every special clerk will receive on July 1, 1945, an increase of $400 in base pay.

There are more than a dozen other provisions in the bill designed to benefit the clerks. Congress may have the notion that the bill goes beyond reason in some particulars. It would take time to figure out the propriety of awarding all that the clerks ask, but certainly there can be no objection to an increase of $300 in the base pay. Let the other provisions be threshed out in committee, but let justice be done to those faithful and hard-working employees.

Postal jobs require skill and intelligence. Money orders, stamp sales, air mail, parcel post, handling of star and rural routes, and the dispatch of the mail to have all the time possible require good judgment and expert handling. These jobs are several grades above that of manual labor. They involve much responsibility. This kind of help will not be available if it be underpaid. There are other drafts on the salaries for which allowance should be made. One of these is the 5-percent deduction for retirement.

There is a great difference between the earnings status of a postal employee now and what it was 20 years ago. There is the increased cost of living due to the war. There are deductions for war taxes. There are War bonds to buy and insurance to keep up. Everything is up from where it was two decades ago.

The Burch bill, No. 2071, deserves immediate action by Congress. Something must be done for the clerks and carriers before this service so valuable to the public breaks down through a serious help shortage.

Guts

EXTENSION OF REMARKS

OF

HON. WILLIAM T. BYRNE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. BYRNE of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following story which was in the New York Sun of April 18, 1945, under The Sun Dial by Mr. H. I. Phillips. This story was brought to my attention by Mr. Charles J. Tobin, counselor at law, of Albany, N. Y., in the interest of a boy whom his family knows quite well. Mr. Tobin feels that the story should be inserted in the CONGRESSIONAL RECORD for the benefit of some of those who complain about Government regulations.

GUTS

To home fronters, all too easily disturbed by trifles and too ready to kick, the following letter is recommended. It is from Lt. Bob Hardart, son of Gus Hardart, of the Horn & Hardart Co., from a hospital in France:

"DEAR DAD: First of all, I want you to know that I am cheerful and looking forward to getting home and learning to lead a new kind of life.

"Now, I'll tell you what happened to me, so kind of brace yourself:

"My legs were badly wounded, but in time will be as good as new. I lost my right arm just below the elbow. Just now I can't see. But the eye doctor says there is a slight chance they can make me see in time.

"However, I am not counting on that too much because I have a feeling I will remain this way.

"Well, there's the story. I hated to tell you, but I know you would want to know. For gosh sakes, don't feel sorry for me. If you could see me here in the hospital with all the fun I am having, kidding with the nurses and talking with the swell visitors we have, you would say, 'There is nothing wrong with that guy. Send him back to duty.'

"I've got a heck of a lot to live for, plus my faith.

"Say, I'm running overtime, so I'm sending all my love. You can believe me when I say I am happy and contented and have great faith and hope in my future.

"Lovingly,

"BOB."

Security Delegate

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. KOPPLEMANN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial appearing on April 18, 1945, in the Washington Post. This editorial raises the problem of the authority to be given our delegate to an international peace agency and points out dangers which my bill, House Joint Resolution 131, would eliminate.

SECURITY DELEGATE

For the present we think that the duties of the American delegate to the proposed Security Council are less important than creation of the Council. With the San Francisco Conference still before us, first attention must necessarily be given to the structure and operation of the international peace agency itself. Chairman CONNALLY of the Senate Foreign Relations Committee has again raised the problem of the American delegate, however, and it may properly be considered along with the larger issue.

Senator CONNALLY is undoubtedly right in saying that our delegate to the Council must

be given "power to act in all cases of emergency." The voting arrangement in the council agreed upon at Yalta has removed the only serious objection to the use of police forces through executive action. Military's sanctions will be applied only when there is unanimous agreement among the big powers and acquiescence by two smaller powers represented on the Council. In our opinion routine policing of this type can be entrusted to the President and the delegate without fear of encroaching upon the power of Congress to declare war.

Senator CONNALLY'S talk last week raises one question, however, that will bear much discussion. While speaking of the broad powers to be granted our delegate, he said that he would not object to a provision in the statute to create that position requiring the delegate to consult with the President before voting on any question involving the use of force. This seems to imply that he would make the delegate independent of the President—that the delegate could consult with the Chief Executive and then vote in the Council as he chose. We can think of no more dangerous diffusion of power.

Of course, the power to make these decisions as to the use of our forces to keep the peace must remain in the President himself. The Constitution makes the President Commander in Chief and only the Commander in Chief can order American forces into action. Consultation there should be. But it should be in the nature of the delegate getting instructions from the President, not advice that he would be free to accept or reject. Otherwise, we should create a two-headed system that could lead only to chaos.

The most difficult problem, we think, is in providing for consultation between the President and Congress on these problems. Even though responsibility for control of our peace forces will be in the hands of the President, he will want to ascertain the views of Congress to avoid misunderstanding and unnecessary friction. Representative KOPPLEMANN has introduced a bill providing that our delegate could pledge the United States to the use of armed forces through the Security Council after such consultation as may be practicable with the President, the Secretary of State and the chairmen of the Senate and House committees dealing with foreign affairs.

If Congress were properly organized, such discussions would naturally center in a legislative cabinet or council. If no centralization of legislative power is achieved by the present move to reorganize Congress, it may be necessary to create a special council of legislators to consult with the President on foreign policy. Certainly some mechanism to keep the two branches working together in this field is desirable. In our opinion, the efforts of Congress should be directed toward this objective and not toward setting up a delegate to the council who would be independent of presidential control.

Money

EXTENSION OF REMARKS

OF

HON. KARL M. LeCOMPTE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. LECOMPTE. Mr. Speaker, under leave to extend my remarks I submit an original poem written by a well-known citizen of Iowa, Mr. John S. Stamps, prominent farmer, educator and poet of southern Iowa. He has defined money in a few short verses and gives his conception of the evils of manipulating the flow of currency. The poem is as follows:

MONEY

Money? The "root of all evil"
Not only that but the tool
Used to deceive wise men
As well as to fleece the poor fool!

Money? A "measure of value"
That changers shrink or expand
As suits their pleasure or profit
And makes wealth theirs to command!

Money? The blood stream of business
That freely must flow for good health
But is so controlled and diverted
That mostly a few get the wealth!

Money? The pea of the shell game
That "slickers" shuffle so well
You bet them your farm you can find it
And find you have only the shell!

Money? The Dillinger's loot sack
That you with your chattels must fill
His machine gun, a mortgage, points at you
You know it will riddle and kill!

Money? That trust so sacred
By the fathers on Congress laid
But by them given over to bankers
Leaving the people betrayed!

Money? The base for a "racket"
The greatest the world ever saw
By which the people are plundered
By "changers" protected by law!

Money? The devil's own magic
That devils on earth here employ
To wreck and ruin and ravish
To damn and deceive and destroy!

—*J. S. Stamps.*

SEYMOUR, IOWA.

Truman Takes Over

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I include herewith an editorial by Hon. Robert L. Kern which appeared in the Belleville (Ill.) News-Democrat on Tuesday, April 17, 1945.

Mr. Kern is an astute political observer. The son of the late Hon. Fred J. Kern, a former Member of this House, he has followed in his distinguished father's footsteps as one of the most prominent publishers in the State of Illinois.

The editorial follows:

TRUMAN TAKES OVER

It is not without significance that President Harry S. Truman's first formal pronouncement on public policy was made in the form of an address to Congress.

Neither is it without significance that the reception accorded him by that body upon his appearance was an ovation every bit as great as any given other Presidents on similar occasions.

It is also worth noting that on President Truman's very first day in office he visited the Capitol and conferred with the leaders of the Senate and House of Representatives.

His address yesterday consisted in the main of his expressed determination, with the support of Congress and the American people, to continue waging the war relentlessly until the enemy submits to unconditional surrender and those guilty of the conflict and its atrocities are hunted down and brought to justice.

He inferred, with no mistaking his meaning, that no neutral nation would be permitted to give the guilty ones a refuge.

Our new President made it plain that he was not one of those who hold that wars from time to time are inevitable, but rather that he entertains the firm belief that a lasting peace can be had through the medium of a United Nations organization.

"The duty of the great states," he said, "is to serve and not to dominate the world. We have learned to fight with other nations and now we must learn to live with other nations."

Any hopes that Germany and Japan may have had that America would fall out of step, if only for a little while, during the change in leadership was most certainly dispelled in yesterday's speech.

Mr. Truman promised there would be no change in our military policy or military leadership.

He reiterated the earlier statement that he would largely retain Mr. Roosevelt's Cabinet and would do his utmost to carry on the Government as his predecessor would have wished.

Following his opening sentences, a touching eulogy on the fallen President, he said: "He [Mr. Roosevelt] looked forward and moved forward; that is what America will do."

This is in accord with the Nation's tradition.

As far back as 1865, Andrew Johnson took over Lincoln's Cabinet and Lincoln's policies.

Theodore Roosevelt did the same thing when McKinley was assassinated, and Coolidge adhered to the rule when Harding died.

In ordinary times and with ordinary Presidents such a transition causes no marked difficulty.

There was no disturbance of the even tenor of our prosperity when Theodore Roosevelt succeeded McKinley.

Mr. Coolidge easily gave us the same sort of normalcy which Mr. Harding had promised.

But in extraordinary times and with the passing of an extraordinary President, a change is not such a routine affair.

Both in 1865 and today a President of unknown quantity steps into the picture.

As their first acts both Andrew Johnson and Harry Truman pledged themselves to carry out the policies of their dead leaders.

Both men were sincere and possessed the best intentions, but let us hope the parallel stops there.

On the day of Lincoln's death, when the Nation was prostrate with grief, little men in Washington got together and started scheming how they could undo Lincoln's program.

For years Congress and northern business interests had been restive under the wartime powers of President Lincoln, and now was their chance to do to Johnson what they had not dared to do to Old Abe.

To their surprise they found that Johnson was an honest man who meant what he said about carrying out Lincoln's policies.

There are still Copperheads in Congress, industry, and journalism today, and they, too, will discover that Harry Truman is also honest and sincere in what he says.

There is little doubt but that they, like their counterparts of Johnson's day, will try to gang up to ruin him and the Roosevelt program.

They made Johnson's name a thing for ridicule, and lost the peace Lincoln had fought to win.

The Nation still bears the scars of that reconstruction period.

Let us hope for our sake, and the world's sake, that Harry Truman is given the chance

denied Andrew Johnson by power-hungry Congress and profit-hungry industry and a hate-inoculated press.

These are extraordinary times and Franklin Roosevelt was an extraordinary President.

It is clear, therefore, that the change in the White House will put a strain on our public machinery and a strain on all of us.

There is no reason, however, to be discouraged.

It is well to look facts in the face and take account of all the unhappy potentialities which the situation holds.

But it is also well to recall that the Presidency has a way of lifting men and expanding their minds and their powers.

Even Mr. Roosevelt was a much bigger man at his death than he had been in 1932 when first elected.

Like most of our recent Vice Presidents, Mr. Truman is more or less an unknown quantity, but he did effective work as a Senator and he has shown qualities of mind and character which encourage the hope that he will not fail his country in this trying time.

Let us also hope that the American people will not fail the new President in the endeavors he has pledged himself to carry through.

Oldsters Are Forgotten Men!

EXTENSION OF REMARKS

OF

HON. JOSEPH E. TALBOT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. TALBOT. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to include the following editorial from the Army Times of April 21, 1945, concerning a demobilization plan for men in the service who have celebrated their thirty-fifth birthdays:

OLDSTERS ARE FORGOTTEN MEN

In an organization the size of the United States Army there always are a few forgotten men. In the Army it is the few thousands who have celebrated their thirty-fifth birthdays.

These oldsters are the victims of circumstances. Their draft numbers were low. They were eligible when the Selective Service System occasionally reached into their age brackets. They were able to meet the minimum physical standards. If it hadn't been for these circumstances they would still be in tweeds, virtually immune from the draft.

The Army, by lowering the age for induction to those under 30, has admitted that it needs and wants only young men. This is no insult to the oldsters. They try valiantly to be good soldiers, and many succeed, but age has slowed most of them down. They just can't keep up with the younger fellows.

The oldsters face a serious problem in the post-war period. If forced to compete against the youngsters in a heavy labor market they probably will have extreme difficulty finding jobs. Many industries in pre-war years would not hire men in their age groups. Others in their upper thirties have found that Army life and training have drained their strength and given them odd mental complexes—taking orders from "youngsters" has been tough. These men realize that the problems of the readjustment period promise to be much more acute than those faced by the younger men, and they are worried.

The overage group receives no special consideration in the demobilization plan. It is just as well. The oldsters should not have to wait for VE-day to be discharged—they should be given that white paper now.

Setting up a demobilization plan for that small group would be comparatively simple. There are not enough of them to cause any great confusion or change in strategy. Each man 35 or over should be given the opportunity to apply for a discharge. If he wants to stay in service let him stay. If he wants to get out let him out at the earliest possible moment. If he holds a key job find him a replacement and then let him out. Above all, get the job done before the mass demobilization, with all its considerations, gets under way.

What Are Our Pacific War Aims?

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GAVIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Times-Herald:

WHAT ARE OUR PACIFIC WAR AIMS?

It has been said that war is a continuation of politics. It is also true that politics is a continuation of war.

We saw the first of these truths illustrated when World War No. 2 broke out in September, 1939, as a result of peacetime political stresses and strains in Europe. It was illustrated again when we went to war against Japan as a result of Pacific and Asiatic power politics.

Peacetime politics—boundary revisions, reparations schedules, etc.—will be the outgrowth of what happens in the war, and will be roughly determined on the basis of where the armies stand when the shooting stops.

The future of Europe after the war is already pretty well outlined in the minds of the Allied peoples. Germany is to be torn up and hammered down. Russia is to be the dominant land power as regards at least the eastern half of Europe, and maybe the whole Continent. The rest of Europe is to return pretty much to the status quo ante.

But as far as the Pacific war is concerned, nothing definite about Allied war aims and objectives has been decided upon—or if anything definite has been worked out, the Allied peoples have not been told of it.

A SUBJECT FOR FRISCO

The San Francisco Conference opens day after tomorrow. At that Conference, this question of Allied war aims in the Pacific should be thoroughly discussed. The time is ripe for such discussion, in view of the facts that the German war is to all appearances in its last stages and that the United States effort in the Pacific war is often described these days as being ahead of schedule.

The most pressing phase of the question from the American point of view is how much of the total Pacific war burden the United States is to carry from here on.

We have done 95 percent of the work of booting the Japs northward from the Solomons and westward from the Marshalls, of cutting their navy down by perhaps 66 percent, of blasting their cities, of cutting their sea routes to Indochina, Malaya, Burma, and the East Indies.

We have now won most of our war with Japan, so far as our primary interests go. We shall have won it entirely when MacArthur has finished cleaning the Japs out of the Philippines, and our naval and land forces have nailed down a few more Pacific islands which we can use as sea and air bases to contain Japan as long as we keep those bases up to par.

What happens then?

DO WE DO IT ALL?

Do we go on to throw the Japs out of the Dutch East Indies, Malaya, Burma, French Indochina, Hong Kong, Shanghai, and even China itself? After that rather hefty task is done, do we hand those places back to their former owners—the Dutch, British, French, and Chinese—free of charge, and guarantee their quiet and peaceable possession of those places forever after?

Or do we ask that the British especially, and the Dutch, French, and Chinese according to their ability, do the land fighting to get those places back, while our Navy cooperates to the best of its ability?

Then, too, how about Russia? Russia is understood to want to get Manchuria from the Japs, if no more. Manchuria, under the name of Manchukuo, is a nice prize, with 500,000 square miles, some 40,000,000 people, extremely fertile soil, and large iron, gold, coal, and oil shale deposits. But it will require a bit of taking. The Japs have manned it with a lot of their best troops, and presumably have spotted fortifications here and there of the kind our boys have run into on Iwo Jima, Okinawa, and elsewhere.

Do our boys take Manchuria away from the Japs and give it to Russia free of charge, as a graceful addition to the $9,000,000,000 worth of United States war material we have already given Russia free of charge?

If these are the plans for the Pacific war, we can expect to be fighting in the Pacific for a number of years to come, and to lose quite a few of our boys. Japan still has some 5,000,000 soldiers, most of whom are tough fighting men.

Or is it our plan to concern ourselves mainly from now on with our own Pacific safety—to invite the Philippines to join us as our 49th State, and to make the Philippines the key bastion in a network of defenses for the continental United States? Do we let our allies do most of their own fighting to get their Far East empires back?

Our leaders have told us nothing definite—except that military men have been saying lately that after Germany is beaten a lot of our best European-war troops must be sent at once to the Pacific.

These matters should be talked over at San Francisco. Then they should be passed on by the Congress of the United States.

Resolution Adopted by the Young Men's Republican Club of Waterbury, Conn.

EXTENSION OF REMARKS

OF

HON. JOSEPH E. TALBOT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. TALBOT. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to include the following resolution adopted by the Young Men's Republican Club of Waterbury, Conn.,

on April 17, 1945, extending the sympathy of the club to Mrs. Roosevelt:

YOUNG MEN'S REPUBLICAN
CLUB OF WATERBURY,
Waterbury, Conn., April 18, 1945.

Hon. JOSEPH E. TALEOT,
House Office Building,
Washington, D. C.

DEAR SIR: At a meeting held last evening the following resolution was adopted:

"Be it resolved, That the Young Men's Republican Club of Waterbury, Conn., in assembly held on April 17, 1945, does hereby go on record to publicly extend its deepest sympathy to the wife of our late and beloved Commander in Chief, Franklin D. Roosevelt."

Also, it was requested that you incorporate the above resolution in the Appendix of the CONGRESSIONAL RECORD.

Thanking you for your attention, we remain,

Sincerely yours,
YOUNG MEN'S REPUBLICAN
CLUB OF WATERBURY,
SAMUEL CERVERO, *President,*
HENRY A. CORDEN, *Secretary.*

A Square Deal for Postal Workers

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following editorial which appeared in the April 21, 1945, edition of the Boston (Mass.) Evening Record:

A SQUARE DEAL FOR POSTAL WORKERS

Many weeks have passed since the Post Office Committee of the House of Representatives concluded public hearings on a measure giving postal workers their first actual increase in pay in 20 years.

But, as C. W. Doherty, president of the National Association of Letter Carriers points out in a letter printed elsewhere on this page, there is still no assurance that the measure will be approved.

It has not even been reported out of committee as yet, although there was no effective opposition to the measure in the public hearings and indeed an almost complete lack of any opposition.

Until the committee reports, the measure cannot be acted upon by the House of Representatives and the necessary approval of the Senate cannot be obtained.

Consequently, this important measure is as securely blocked as if the prevailing opinion in Congress opposed it—whereas, nearly the entire membership of Congress has expressed vigorous and seemingly sincere approval of it.

Apparently something is needed to stir Congress out of its apathetic mind about this matter.

If this session of Congress fails to act upon the matter of raising the salary standards of postal workers, as so many sessions have done before it, there is more involved than an injustice—although that should be sufficiently persuasive.

The stark reality confronting the postal workers of the Nation, if this measure fails again, is that they are not only going to be denied an increase in pay, but are actually going to suffer a drastic reduction.

They have been working during the past year under the temporary benefit of a sop tossed to them by Congress in the form of a $300 bonus.

This will expire at the end of June.

Then the postal workers will be compelled to exist on the basic wage scales established 20 years ago—the annual salary of $2,100, from which the withholding tax and retirement contributions are deducted, leaving a scant $1,500 as cash in hand.

As Mr. Doherty bluntly warns, the postal workers cannot exist decently on this inadequate wage and they are not going to try it much longer.

They are weary of 20 years of promises by Congress.

They are fed up with public expressions by sympathy.

In short, if this last appeal for justice is futile, many of them are going to seek the chance to live decently in other fields.

And if they do that, as Mr. Doherty emphasizes, the whole vital structure of Postal Service—already impaired by the war—is going to suffer.

This is inevitable.

The issue is no longer the simple one of whether or not justice is to be done for the postal workers.

It is whether or not the United States mails are going to be moved expeditiously according to the high traditions of the Postal Service, or even be moved at all—of whether or not there is going to be any postal service adequate for the needs of the country.

If Congress is not to be persuaded by considerations of justice to the postal workers in this matter, at least it can be persuaded by prospect of a disastrous failure of the Postal System itself.

It is up to the American people to perform the duties of persuasion in this latter respect.

Though they have tried honorably and conscientiously, the postal workers have apparently failed in their efforts to be persuasive in the former respect.

Every American citizen conscious and resentful of the protracted injustice against the postal workers—and if not of that, of the imminent collapse of the whole Postal System—should write his Congressman, and demand that the people performing such vital service to the Nation be allowed to live and support their families—according to American standards—and no longer according to the condition of near-serfdom they have so long endured.

Roosevelt Called Most Brilliant of the Nation's War Presidents

EXTENSION OF REMARKS
OF
HON. HERMAN P. KOPPLEMANN
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. KOPPLEMANN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by one of the outstanding analytical experts on this war, Maj. George Fielding Eliot, appearing April 14, 1945, in the New York Herald Tribune. Major Eliot's inspiring article on our late beloved President Roosevelt enshrines him in the hearts of men as not only our gifted leader in peacetime but our brilliant strategist in wartime who led the world from a path of enslavement to liberty.

ROOSEVELT CALLED MOST BRILLIANT OF THE NATION'S WAR PRESIDENTS—MORE THAN ANYONE ELSE, HE ASSURED DEFEAT OF AXIS AIMS—HIS FORESIGHT AND UNDERSTANDING OF BASIC STRATEGY PAVED WAY FOR VICTORY

(By Maj. George Fielding Eliot)

The death of Franklin D. Roosevelt has taken from this Nation a great President and a great war leader—perhaps the ablest wartime Commander in Chief in our history. No President since Washington—with the possible exception of Theodore Roosevelt—has so well understood the basic strategical needs and interests of this Nation. No President before him has led the Nation in war with such competence, indeed, such brilliance, as Franklin Roosevelt.

During his term of office there arose the most terrible danger to the cause of freedom, to the concept of individual human rights and dignity which free peoples of the world have had to face since the Dark Ages. The basic principle upon which this Republic was founded, that the state exists to serve and to protect the individual in the exercise of his inalienable rights, was directly assailed by powerful forces which were dedicated to the view that the individual exists only to be the slave of the state. From the very beginning President Roosevelt saw the real nature of this threat, recognized it as a threat not only to Britain and France and China but to ourselves and to freedom everywhere, and opposed it with all his energies. The venomous attacks upon him by our German and Japanese enemies show clearly that they recognized in him the arch foe of their evil designs. More than any other human being, Franklin Roosevelt has brought about the defeat and downfall of those designs.

WON REVISION OF NEUTRALITY

When Hitler launched his legions across the Polish frontier and began his attempted conquest of Europe, President Roosevelt saw further than the ruins of Warsaw. He knew that in very truth our frontiers were on the Rhine; that is, he knew that the security of the North Atlantic was essential to the security of the United States, and he knew that if Britain and France and the Low Countries went down, the Atlantic approaches to our eastern seaboard would be in the hands of our enemies. Therefore, he secured revision of the neutrality laws so that we could supply Britain and France, and at the same time he pressed for a greatly accelerated naval-building program, the so-called two-ocean Navy.

In these measures, and in the policy which they implied, the country was far from united behind the President. During the spring of 1940, dissension increased, but the fall of France in the summer of that year shocked most of us into some understanding of our real danger. The President acted swiftly to take advantage of this change in public sentiment. Having, on his own responsibility, sent all the available small arms and field artillery in the country to arm the British people against possible invasion, he sponsored and drove through Congress the selective-service act—the first peace-time conscription law in our history. That measure gave us months of advantage when war came to us.

Still keeping a watchful eye on the Atlantic sea lanes, where German U-boats were cutting sharply into our shipments to Great Britain, the President engineered the famous destroyer deal by which 50 American destroyers were transferred to the British Navy in return for a number of Atlantic bases which would give us far better security should disaster come to Britain. Anxious also about political dissension at home, the President took the remarkably foresighted and courageous step of appointing two lead-

ing Republicans—Henry L. Stimson and Frank Knox—as Secretaries of War and of the Navy, respectively, appointments which the country had no subsequent reason to regret.

INCREASED NAVAL PROTECTION

Early in 1941 the Lend-Lease Act increased our power to aid Britain and other nations fighting Germany. Again there was bitter opposition from those who could not see the reality of the danger. Again the President prevailed. There followed increases in our naval protection to the North Atlantic sea lanes, with American bases in Greenland and Iceland. In July, Japanese aggression in French Indo-China brought the cutting off of oil supplies to Japan. In August the dramatic mid-Atlantic meeting between the President and Prime Minister Churchill electrified the world and brought new hope to millions of hearts.

The actual coming of war—with the treacherous Japanese attack on Pearl Harbor—found this Nation better prepared than for any other war in our history. We were not, of course, fully prepared, or even well prepared. But comparison with the past shows how much had been accomplished by the foresight and determination of the President.

As Commander in Chief the President was immediately confronted by the necessity for a fundamental decision: Should the power of this country be thrown first against Germany, or against Japan? Obviously we could not divide our forces, or we risked defeat everywhere by trying to be strong everywhere. This basic military principle, we may thank God, the President understood. He chose Germany as the most dangerous and the nearest enemy, and events have proved that he chose rightly.

At the same time it was necessary to coordinate our efforts with those of our British Commonwealth allies, and for this purpose there was created—largely at the President's instigation—the most successful agency for the higher conduct of an Allied war that military history records: The combined chiefs of staff which, from then on, almost without friction or disagreement, has directed the employment all over the world of all the resources and power of the American and British nations as though they were one. Unity of purpose and effort, implemented by unity of command, is the key to victory in war. That lesson, too, the President understood and applied.

CHOSE WAR LEADERS WELL

He chose his military leaders well, and he supported them with unswerving loyalty. Never in our history have our armies and fleets been so ably commanded from the very outset of war. Never have we had such an unbroken record of victory piled upon victory as we have in this war, after our first dismal set-backs in the Pacific. That the President was wholly the author of these victories he would be the last to wish that anyone should assert, but he made them possible by his wise choice of leaders, by his clear understanding of the basic principles of strategy, and by his ability to mobilize behind the fighting forces the full resources of the American Nation.

Now, in the very hour of victory over his most dangerous foe, in the bright promise of victory in the Pacific as well, our great war President is taken from us. The God who has watched over the destinies of this Republic from its earliest days has, in His infinite wisdom, thought best to call His servant home to rest. But the Republic lives on. It lives because it is, and always has been, greater than any single man. It survived the loss of Abraham Lincoln in another hour of victory and trial. It will survive the loss of Franklin Roosevelt in this strangely similar hour. Lincoln gave his life that the Union might be preserved; he died before he knew that, from the wreck of war, a stronger and more enduring Union would arise. Franklin Roosevelt gave his life that a greater Union—a Union of all peace-loving peoples to achieve peace and guard the hard-won heritage of freedom—might rise from the desolation of a more terrible war than Lincoln ever imagined. He, too, died before he saw the fulfillment of his vision. To us who remain behind he left the heritage and the responsibility of that vision, that bright hope from which his purpose never turned aside.

He gave us victory. We shall not fail to harvest the fruits of victory—the just and enduring peace which shall forever be his shining monument in the hearts and memories of freemen throughout this world.

The Late President Roosevelt

EXTENSION OF REMARKS

OF

HON. A. S. J. CARNAHAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. CARNAHAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a tribute to the late President Roosevelt by a Negro pastor of Festus, Mo., published in the Tri-City Independent, of Festus, Mo., Thursday, April 19, 1945:

NEGRO PASTOR PAYS TRIBUTE TO LATE PRESIDENT ROOSEVELT

"I have caused thee to see it with thine own eyes; but thou shalt not go over thither." Deuteronomy 34: 4.

There comes a time in the lives of men when, as a unit, they are prone to question the wisdom of God; that time comes at a moment when the will of God, executed, seems to strike a hurting blow to our own will, and we are left bewildered amid the wreckage of our own plans. When we have appraised ourselves of the power of God as the Supreme Being and Divine Intellect, and through a close scrutiny of the works of all nature we are made to understand that He Himself has set the course of the history of mankind; and as surely as the succession of the seasons or the fixed course of the celestial bodies of the universe, the course of mankind's history is inevitable and the plans of God immutable.

It is said that history moves in a cycle. If we are to use the Holy Scriptures as a proof, then we are assured that history has once again completed a cycle, and we find ourselves where the children of Israel were on that memorable morning, when they stood silent and grief-stricken on the plain of Moab in mute farewell to a leader whom they had come to love and depend upon during their quest for a God-promised land of tranquillity and contentment. Though Israel may have questioned the wisdom of God, who had called away their great leader, they could never, so long as they remained mortal, have realized the ecstasy and joy which must have overcome him there at the top of Mount Pisgah, as he enjoyed the special privilege of seeing with his own eyes that which had heretofore been only a 40-year dream. Surely he must have felt the glory of God as he heard the voice speaking to him, saying, "I have caused thee to see it with thine eyes, but thou shalt not go over thither."

Yes; mankind stands in grief for the loss of a great leader who has led the way over 12 years through the wilderness of disillusion and chaos, holding high a torch for the hopeless to see, and assuring the low in spirit that God had prepared a land of promise for those who have the courage to press onward.

The land of promise, as visualized by Franklin Delano Roosevelt, was a new world, not unlike the One World of the immortal Wendell Willkie; a new world wrought of drastic social, economic, and moral changes which would make for peace.

His was a new world wherein the most important cog was the common man—the underdog, the down-trodden—whose race, color, or creed played absolutely no part in the final determination of his status. His was a promised land wherein the right to life, liberty, and happiness became more than an expression of eloquence, and wherein the strong would stand as a protecting wall to secure the integrity and God-given rights of the weak.

All mankind has lost a great leader, but the Negro and the colored peoples of the world have lost what seems to have been our best friend—one of the greatest friends that a minority people of any era of history could have ever had. Lincoln gave to us freedom, but it was F. D. R. who, when the odds were all against us, gave us the courage to fight for our rightful place in the society of men.

We are tempted to question the wisdom of God, who gave and has taken away this great friend, but we know that God moves in a mysterious way His wonders to perform. If God has promised a new world, and had sent Franklin Roosevelt to lead us on the journey, then that new world is just over the hill; though we may not understand, even as the children of Israel failed to understand, God shall provide for us to come into that place.

Truly we are bowed in sorrow and stricken with tears, but somewhere in the lofty heights of moral achievements, beyond the calculations of man, Franklin Roosevelt stood last Thursday, amidst the clouds of glory—honored by God, yes, glorified by God—and beheld the world of promise. Out from the echoes of good reports from our armed forces on the far-flung battlefields, he must have heard the voice of God as he lay in unconsciousness, saying, "I have caused thee to see it with thine eyes, but thou shalt not go over thither." He must have flashed that friendly smile to us who stand in the valley below, and with his eyes wet from the mist of unshed tears, he must have stepped into formation—our Commander in Chief at attention in the ranks of the immortal: Moses, Washington, Jefferson, and Lincoln.

As a minority people, he has left on record words of encouragement, which ought to give us new hope in the years to come: "We have nothing to fear but fear itself."

Rev. F. LEMOYNE WHITLOCK.

Missouri River Valley Authority

EXTENSION OF REMARKS

OF

HON. CHARLES B. HOEVEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. HOEVEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution recently adopted by the board of directors of the Sioux City Chamber of Commerce, of Sioux City, Iowa, in opposition to

S. 555, known as the Murray Missouri Valley Authority bill:

Whereas the United States Army engineers have had under their jurisdiction the control of projects concerned with the development of the Missouri River; and

Whereas the United States Army engineers and the engineers of the Bureau of Reclamation have a broad knowledge of the Missouri River, gained through practical experience over a period of many years; and

Whereas the Congress of the United States has adopted, and the President has signed, legislation for the complete development of the Missouri River under the coordinated Pick-Sloan plans; and

Whereas certain interests are seeking to impose an authority over the entire Missouri Basin patterned after the T. V. A., which would ignore all of the plans and work already accomplished by the United States Army engineers and Bureau of Reclamation; and

Whereas the Sioux City Chamber of Commerce, being especially concerned with the progress of this project with the least possible preliminary delay; and

Whereas the substitution of an M. V. A. plan would unduly delay the furtherance of said project and would otherwise be inimical to the best interests of the entire valley: Therefore, be it

Resolved, That we, the Board of Directors of the Sioux City Chamber of Commerce, commend the Congress of the United States for their action in authorizing the United States Army engineers and Bureau of Reclamation to proceed to completion, their proposed projects for Missouri River development: Be it further

Resolved, That we commit ourselves to being opposed to the establishment of the Missouri Valley Authority as outlined in S. 555, known as the Murray-Missouri Valley Authority bill, and respectfully urge our congressional delegates to use their influence in the interest of defeating the above proposed legislation at such time as it may be placed before Congress for consideration.

(The Sioux City Real Estate Board of Sioux City, Iowa, unanimously adopted a similar resolution under date of April 11, 1945.)

Salvage Ace in Toughest Task

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following article by Lawrence R. Goldberg, which appeared in the Sunday Boston Post April 1, 1945.

SALVAGE ACE IN TOUGHEST TASK—BAY STATE WIZARD FAST OVERCOMING ALL SORTS OF DIFFICULTIES IN CLEARING HARBOR OF MANILA

(By Lawrence R. Goldberg)

For salvaging wizardy, under the most difficult and dangerous wartime conditions, 50-year-old, rugged and fabulous Commodore William A. Sullivan, of Lawrence and Winchester, takes top honors.

Three years after supervising the raising of the 83,423-ton, 981-foot *Normandie*—in the face of moanings that it couldn't be done—this Andover and M. I. T. schooled and trained United States naval officer, has been chosen for the impossible task of clearing up Manila Harbor, recognized as the greatest salvage job in history.

The harbor and bay must be cleared—within a specified time—of more than 300 hulks, either scuttled by the Japs as blockships, sunk by American bombs, or destroyed by Admiral George Dewey's fleet in 1898.

SAME EFFICIENCY

This is Sullivan's assignment and he has promised the Navy Department that it will be done with the same efficiency and dispatch that marked his carrying out of the assignments he received while in the European theater of war to clear the harbors of Naples, Cherbourg, Granville, St. Malo, Le Havre, Boulogne, Calais, Marseille, Casablanca, and Port Lejautey.

Operating under his direction—and by his side on the ocean's bottom amidst specially devised booby traps arranged among and attached to the hulks and blocks that must be moved—will be a crack team of Army and Navy divers, second to none in the world. At their special disposal will be a flock of blueprints and lessons gathered and improved upon by the commodore as a result of the Pearl Harbor disaster, the *Normandie* experiment, and his clearing of European ports during the past 4 years.

A human dynamo of energy and drive—indefatigable and at his best when the going is toughest—Sullivan (born at 524 Andover Street, Lawrence, and making his home with his sister Margaret on Lebanon Street, Winchester, when the war started) is a happy mixture of sparkling intelligence and good nature when the hour and conditions permit him to relax. On such occasions all those who come in contact with him feel his personal magnetism.

POUNDING AWAY

At work, however, he is dogged and determined every second—pounding away incessantly—literally wearing down whatever obstacles may be in the way—never recognizing any such complaint that the task at hand is impossible.

As an example of what his assignment of supervising the raising of the *Normandie* involved, the following facts are cited:

Portholes closed, 356; 5,447 square feet of deck openings patched; 6,000 tons of debris and scrap removed; 5,000 tons of superstructure removed; 8,000 pounds of broken glass cleared; 10,000 cubic yards of mud moved; 240,500 board feet of lumber placed by divers as shoring and bulkheads; 4,500 wedges, plugs, and small patches placed by divers; weight of patches, 150 tons; 1,685 tons of concrete added to ship; 40 ten-inch, 28 six-inch, and 25 three-inch salvage pumps put into action aboard, pumping 40,000 tons of water per hour; 700 men employed on wreck; 70 divers; cost of salvage, $3,750,000.

And the *Normandie* was floated on schedule.

MANY DIFFICULTIES

So that the reader may get a better idea of just what Commodore Sullivan faces in his new assignment, the following facts—established by proper and efficient reconnaissance above and below the waterline—are cited in connection with conditions in Manila waters:

Submerged or partly submerged there are 62 large vessels, each in excess of 2,000 tons; 68 small craft in the northern half of the harbor; 50 small craft in a half-mile of the Pasig River up to Jones Bridge; 21 vessels chained bow to stern and sunk across a 10,000-yard stretch from the yacht basin to the main breakwater; 6 ships blocking the channel entrance through the breakwater to the deep-sea piers; and 3 ships lying alongside piers 7 and 5.

In addition, a hundred or more craft of various sizes, including the 20,000-ton Dewey drydock towed out there in 1904, scattered over the bay bottom.

At this writing Sullivan's men have already patched and hauled one of the 3,000-ton blockships from the mouth of the Pasig and opened the river to traffic. They expect to blow a second one from the channel soon.

HARDEST AREA

The most difficult area is the narrow entrance through the typhoon breakwater, where the Japanese cleverly sank six large ships in the 38-foot main channel. The bow of a big tanker sticks out from the channel ledge and divers will tackle that first.

Inside the breakwater other large craft block the anchorage, sheltered from the typhoons that sweep in from the South China Sea.

On the north side of pier 7, Manila's longest, a 4,000-ton ship is submerged on its beam-ends. At the south side of the same pier a 10,000-ton freighter with two torpedo holes presents the commodore with his main problem.

On top of that ship the Japanese sank three of what Sullivan calls "Sugar Charleys." These are 500-ton wooden coastal craft, a dozen of which Sullivan's men have already raised in the harbor.

"SUGAR CHARLEYS"

"They're all over the place," is the way the Bay State salvaging wizard has described the situation in his preliminary report to the Navy Department. "One contained a cargo of children's marbles and a Chinaman has been carting them away by the sackloads."

On the same side of pier 7, according to his report, lies a 2,000-ton interisland steamboat and a half a dozen more "Sugar Charleys" and tugboats. Sullivan says he will also have to deal with a double-decker, a Philippine steamboat, that ran on top of a Spanish-American War wreck 8 years ago.

Three enemy warships, including a light cruiser, also were sunk near the mainland and two destroyers are lying off Cavite, the commodore reports.

Each vessel, he reveals, poses a different problem.

"But it's like building a bridge; you assemble all the facts first and the job solves itself," he says—to lead you to believe it is just as simple and easy.

USES BLUEPRINTS

In tackling hulks in the past Sullivan has obtained as many blueprints of them as are available from merchant marine sources. From these he studies the ship's deck and hull plan. Then he sends down his diver—or goes down himself—to locate and patch holes and attach air pumps.

Blueprints are not always available and hulks don't always turn out to be what they looked like at first, however, and then the commodore and his crews run into the unexpected and into plenty of trouble.

One help—for example—that Sullivan has been tackling at the breakwater of Manila, has proved particularly pesky. It isn't going to slow up the commodore or cause him to be late in clearing Manila. But this is what he has to say about that one single obstacle:

"We keep on plugging holes and finding so many new ones that I suppose we'll have to drive in toothpicks."

In the face of the terrific salvaging task ahead, however, Commodore Sullivan wants his friends and acquaintances back home in Lawrence and Winchester, especially, to know that not only will the job be finished on time, but that some of the enemy freighters sunk to block the harbor would sail again, and shortly, under the Yankee flag.

H. R. 2071

EXTENSION OF REMARKS

OF

HON. EUGENE J. KEOGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. KEOGH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following brief which was submitted to the House Post Office and Post Roads Committee by the New York State Federation of Post Office Clerks urging approval of H. R. 2071:

You are hereby advised that the New York State Federation of Post Office Clerks, which represents the large majority of these employees in this State, favors the enactment of the Post Office Reclassification bill, H. R. 2071. We also favor the amendments suggested by the National Federation of Post Office Clerks, as well as any other changes which would grant additional consideration to postal employees.

The justification of such legislation was recognized by many Members of Congress during the past session and resulted in the enactment of a temporary bonus bill. The War Labor Board has adopted what is known as the Little Steel formula, which was based upon the increase in living costs between January 1941 and May 1942, and as a result employees in private industry have received increases in wages of 15 percent since that time.

Postal employees, however, have not received any increase in their compensation since 1925, and we feel that it is unfair to apply the same formula to their basic compensation that was used in the consideration of salary adjustments of private industries employees, whose wages had been advancing on numerous occasions prior to 1941.

It might also be noted that since the adoption of the Little Steel formula the cost of living has greatly increased and, while there is a variance between the statistics of the Department of Labor and the American Federation of Labor, conservative estimates show an increase of well over 30 percent.

It has been long and universally recognized that postal employees are highly efficient and skillfully trained and underpaid in comparison to wages paid for similar knowledge and duties in other industries.

Over 35,000 of these employees are serving in the armed forces of our Nation. As a result a huge additional burden has been thrown upon the remaining employees. The manner in which this greatly reduced force has handled the greatly increased volume of mail during the past few years is a high tribute to the loyalty of these employees. Their hours of labor have been lengthened and their production greatly increased.

The general procedure in all occupations coming under the jurisdiction of the War Labor Board has been to grant employees time and one-half for overtime service. This includes all work in excess of 40 hours per week. Postal employees, however, receive straight pay for overtime, and that rate is not computed on the basis of a 5-day, a 40-hour week, but is based upon a 48-hour work week established in 1925—20 years ago.

We urge that this be corrected and time and one-half be paid for all work in excess of 40 hours per week, and that same be computed on a 253-day-per year basis. We also request that some consideration be granted employees who have performed long and faithful service in the form of longevity payments. It is also suggested that this feature be made retroactive to a degree at least so as to adequately compensate employees who have rendered many years of service, and many of whom may never advance to the top grade if the bill should be enacted in its present form.

It might be well to add that the salaries of these employees have lagged considerably behind prevailing rates of pay. Also that the service rendered by them produces revenue from which they are paid. These revenues are higher than they have been in the history of our Government and they likewise represent the great burden of work performed by the faithful employees of the Post Office Department.

However, we are vitally interested in securing the enactment of H. R. 2071, along with the amendments suggested by the National Federation of Post Office Clerks, as well as those mentioned herein and any others of a beneficial nature now being considered by the committee, at the earliest possible date.

Reorganizing Congress

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following editorial which appeared in the April 21, 1945, issue of the Boston (Mass.) Post:

REORGANIZING CONGRESS

As evidence of the need for reorganization of the legislative branches of our National Government there are at least 20 different bills before the Congress seeking in one reform or another to streamline the procedures and create a more efficient deliberative assembly.

It is a good thing generally for the Nation that the House and Senate have been reluctant to revise their parliamentary procedure, to scuttle the absurd cloture rule in the Senate and get a firmer grasp upon current problems which require swifter action in the Congress than is now possible.

One of the chief complaints and arguments of the wing of public opinion whose tendency is to shun world cooperation in military measures to control and punish aggressors is that Congress must not yield any of its present powers to declare war.

The obvious remedy is a revamping of Congress to permit swifter action in emergencies and the power of review of such emergency action by later amendment. The whole constitutional provision for repeal of amendments to the Constitution is now cumbersome and ineffective, yet any suggestion that this be altered would arouse a tempest of disapproval.

But even the most stalwart champions of the rights and privileges of Members of the Congress now admit that Congress has just passed through the most critical years of its life, when its influence diminished steadily and the legislative functions were swallowed up by Executive orders. It is doing the late President Roosevelt no disservice to say that the Congress resented this intrusion upon its domains, but it must also be said the Congress did very little about it.

It is evident that many congressional leaders perceive at the present time, when peace is at hand in Europe, and victory mounts in the Far East, that the country will undergo another change, the reconversion to peace. They understand that it will be far easier in these dynamic times to alter their procedure and reform and streamline the Congress than it would be in the settled, prosy times when there are no wars, no rumors of wars, and the lethargy of peace settles upon the Nation.

That Congress needs considerable dusting off and refurbishing cannot be denied. It is fortunate that President Truman has worked and taken part in the deliberations of Congress and understands the problems.

The public must be alert, however, as they were not alert in the tempestuous days of 1932 to 1936, to prevent an abridgment of legislative power by the executive power or vice versa, for the checks and balances of the legislative, executive, and judicial branches of our Government are as delicately poised as a great weight on the point of a needle. Once the balance is destroyed the whole precious structure of democracy may crash.

Total Victory—Durable Peace—We Must Not Fail

EXTENSION OF REMARKS

OF

HON. OREN HARRIS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. HARRIS. Mr. Speaker, today the most important conference in the history of human experience begins in San Francisco.

We look back to the signing of the Magna Carta as an outstanding historical accomplishment breathing life into an instrument advancing the cause of humanity.

We look back to the formation and the adoption of our own Declaration of Independence and the Constitution of the United States as the second great accomplishment advancing the cause of the common people and again breathing freedom and democracy into the lives of all of our people.

As we have again experienced the horrors and tragedies of war—as we have sacrificed our blood and treasure, to loosen the bonds of suffering humanity and to prevent the enslavement of the peoples throughout the world—yes, and to maintain the freedoms and liberties that we have maintained by the goodness and mercy of God, certainly we have realized the tremendous importance and the dire necessity of world security.

So today, Mr. Speaker, begins a conference of the peace-loving and freedom-loving nations of the world, who are determined to accept the grave responsibilities of bringing about another living document for the advancement of

humanity, the cause of the common people, and to establish peace and security in an effort to prevent a third world war.

It was truly said by our beloved and lamented President that "We see peace in enduring peace. More than an end to war we want an end to the beginning of all wars." Never was there a greater challenge to a people, and never have we been more determined to accept this challenge and heed the responsibilities of accomplishing our most worthy objectives.

I believe, Mr. Speaker, the result of the San Francisco Conference to be of such importance as to determine if the "limit to our realization of tomorrow will be our doubts of today."

Just as we have been determined to win the war, and victory is rapidly approaching throughout the world, so shall we determine that our sacrifices shall not be in vain. Unconditional surrender is the only way to end barbarism, to have total and complete victory, which we will have; it cannot be anything less.

We are committed to the destruction of militarism in Germany and Japan and all they possess for the production of weapons of war. We must not permit such desperate enemies to again be armed and again disturb the peace of the world.

We are also determined that the enemy must make reparation for the destruction, terror, and devastation they have brought upon innocent people by unholy aggression. Yes, Mr. Speaker, it is our responsibility to see that those guilty of the terrible atrocities, of the inhuman and beastly acts, must suffer the penalty for their terrible deeds. These war criminals must be sought and run down to the ends of the earth, if necessary, brought to justice and severely punished for their crimes. They must be exterminated and completely and permanently removed from society.

The accomplishment of these objectives, however, will never be realized until we establish the means of insuring a peaceful settlement of differences between nations.

We must not make the mistakes that were made following the last World War, thereby laying the foundation for another world war that will completely destroy our civilization.

The Conference at San Francisco will decide our future. It will determine if the nations can agree on an international security organization that will give to the world a just and durable peace, an organization that will establish the faith and confidence of all nations and permit us to live and survive and work together in a peaceful world.

Our brave and gallant men fighting throughout the world are conquering our enemies, they are bringing us victory, but this is only a part of the great task that lies before us. We must finish the job and insure our victorious armies that the final objective, peace, lasting peace, will be realized.

We must not fail—we will not fail—to complete the task of final victory and lasting peace.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. J. VAUGHAN GARY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. GARY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by me on Franklin Delano Roosevelt at the convocation exercises of the University of Richmond, April 20, 1945:

Dean Holtzclaw, members of the faculty, ladies and gentlemen, I am deeply grateful for this opportunity to participate in your convocation exercises today. It is always a pleasure for me to return to this campus which I love so dearly, and it is a privilege to be permitted to pay tribute in this assemblage to our former President, Franklin Delano Roosevelt, who has passed on to take his place among the immortal benefactors of mankind.

There is little that we can say, however, that will add to the expressions of grief and sorrow which have come from all parts of the world. The spontaneous reactions to the announcement of his death evidenced the greatness of the man and the high place he occupied in the hearts of the people. The radio industry, at tremendous financial sacrifice, immediately canceled all commercial programs and for 3 days paid him homage; places of amusement closed; gaiety ceased; a hush fell upon the land; and people of every creed, class, and faction, in all walks of life, mourned his passing. Such a tribute of love, admiration, and respect has never before been so lavished upon anyone.

Although this demonstration was unprecedented, it is not difficult to understand when we consider the outstanding role President Roosevelt played in national and international affairs during the past 12 years. He guided the destiny of the Nation through some of the most critical years of its history and led us successfully through crisis after crisis when men of lesser mold faltered and despaired.

Mr. Roosevelt first entered upon the national scene as Assistant Secretary of the Navy in 1913 at the age of 31. Then a young man of excellent physique, exceptional intellect, outstanding capabilities and winning personality, his possibilities were quickly recognized; he made many friends and established a brilliant record during World War No. 1.

After an unsuccessful campaign as the Democratic nominee for Vice President in 1920, he was stricken with paralysis, a malady which threatened an abrupt end to his political career. But he was not to be denied; he was not the type to permit difficulties to thwart his plans, and with tremendous courage and indomitable will he set about to overcome the great handicap which the disease had placed upon him. In 1928, just as he was begining to take his first steps following his illness, as the Democratic candidate, he was elected Governor of the great State of New York, although the national Democratic ticket, headed by the popular New Yorker, Alfred E. Smith, trailed him by several hundred thousand votes and failed to carry the State. In 1930 he was reelected to that high office.

Two years later, when the Nation was passing through its worst depression and our people had lost confidence in those who directed the affairs of our Government, they began to search for a new leader. The overwhelming choice fell upon Franklin Delano Roosevelt, and he was elected President of the United States. On March 4, 1933, when he assumed the duties of his office, banks in 38 States were closed; millions were jobless; despair gripped the country. Declaring in his inaugural address, "We are at war with the depression," in confident tones he assured the people, "The only thing we have to fear is fear itself."

He had a definite philosophy of government and he immediately put it to work. He subsequently summarized that philosophy in one of his messages to Congress in the following words:

"We have accepted, so to speak, a second bill of rights under which a new basis of security and prosperity can be established for all, regardless of station, race, or creed. Among these are:

"The right to a useful and remunerative job in the industries or shops or farms or mines of the Nation.

"The right of every farmer to raise and sell his products at a return which will give him and his family a decent living.

"The right of every businessman, large and small, to trade in an atmosphere of freedom from unfair competition and domination by monopolies at home or abroad.

"The right of every family to a decent home.

"The right to adequate medical care and the opportunity to achieve and enjoy good health.

"The right to adequate protection from the economic fears of old age, sickness, accident, and unemployment.

"The right to a good education."

The application of these doctrines brought numerous innovations into the Federal Government, many of which were severely criticized and bitterly opposed. Gradually, however, the faith of men in their Government, in the system of free enterprise, and in the fundamental soundness of democracy itself was restored. Banks were stabilized, industries were refinanced and strengthened, and the interests of the individual received special attention in the passage of labor, social security, and other laws for his benefit. Mr. Roosevelt soon became the recognized champion of the underprivileged and oppressed. "Democracy can thrive," he declared to the Nation in 1940, "only when it enlists the devotion of those whom Lincoln called the common people. Democracy can hold that devotion only when it adequately respects their dignity by so ordering society as to assure to the masses of men and women reasonable security and hope for themselves and for their children."

In 1936, when he was reelected for a second term, the people gave the most emphatic approval in history to his record. Forty-six of the forty-eight States of the Union registered their satisfaction with overwhelming majorities in his favor. As he continued, during this term, his social program notably for housing and wages and hours legislation, there came the first rumblings of war. President Roosevelt was one of the first to recognize the threat to freedom when greedy dictators commenced their aggressions and began their conquests for world domination. For a long time his was almost a lone voice in America crying for preparation to meet their challenge. Finally, after his election to the Presidency of the United States for an unprecedented third term, the enemy struck, and we were at war.

His leadership in war was as vigorous and as effective as it had been in peace, and to him more than to any one individual is due credit for the fact that the dictators, in the recent words of their own propagandist, now "have sunk very low." The strenuous duties of waging a successful war and plan-

ning a durable peace, when added to the normal activities of his office, proved too much of a strain upon his tired and weakened physique, and shortly after entering upon his fourth term as President, he passed on to his final reward. His fellow countrymen will ever regret that he was not spared to behold the full fruits of the victory for which he sacrificed his life.

I personally have always been tremendously intrigued by the paradoxes which characterized Mr. Roosevelt's life. Born into a wealthy family and nurtured in the lap of luxury, he was a stanch friend to the common man. He was reared in conservative surroundings and educated in conservative institutions, and yet he became one of the great liberals of his day. He hated war, and yet he became a great leader in war. It has even been suggested by responsible sources that when the story of the war can be freely told it will reveal him as one of the great military strategists of history. Crippled to the point that he moved with difficulty, he became a world traveler. Although he prosecuted the war with a fury surpassing all previous conflicts, the entire world looked to him for leadership in the establishment of peace.

One of the paramount questions in the minds of the people of the world today is the effect that Mr. Roosevelt's death will have on the prosecution of the war, and the attainment of a durable peace. So far as American participation is concerned, Mr. Roosevelt left the war effort in competent hands. He selected able leaders for our armed forces on land, on the sea and in the air. He did not limit or restrain their activities but to the contrary he gave them the fullest latitude in the execution of their commands. His faith in them has been justified. They have demonstrated their fitness. The armies of the Reich have commenced to disintegrate and the glad tidings of new victories which are daily coming from the Atlantic and the Pacific give evidence of the fact that it will not be long before the martial tread of Allied troops will resound in both Berlin and Tokyo. President Truman has assured the world that there will be no change in our war policy or leadership. We may, therefore, look forward with confidence to early and complete victory.

The task of perfecting the peace has just commenced. The presence of Franklin Delano Roosevelt at future peace conferences will be sorely missed, but his influence will still be surely felt. He has already contributed much to the laying of solid foundations upon which a satisfactory superstructure of peace may be erected, and President Truman has proclaimed to the world that he will continue to build upon those foundations. I am convinced, however, that the kind of peace we eventually attain will depend to a large extent upon the desires and the efforts of the citizens of the United States. President Roosevelt's program, which I believe has the wholehearted support of the vast majority of the people of this country, was outlined by him in 1944 when he said:

"We must, and I hope we will, continue to be united with our allies in a powerful world organization which is ready and able to keep the peace, if necessary by force. To provide that assurance of international security is the policy, the effort and the obligation of this administration. We owe it to our posterity, we owe it to our heritage of freedom, we owe it to our God, to devote the rest of our lives and all of our capabilities to the building of a solid, durable structure of world peace."

The foundations for such a structure have been laid at Dumbarton Oaks, Bretton Woods, and Yalta, but already the isolationists are at work seeking their destruction, and their tactics bear striking resemblance to those which defeated the League of Nations 25 years ago. There has been little criticism of the political agreements reached at Dumbarton Oaks, but there can be no complete international accord without economic understandings. The international stabilization of currency and the regulation of international trade are technical subjects beyond the understanding of the average man. For this reason the greatest experts of the world were assembled in conference at Bretton Woods for a scientific study and consideration of these subjects. The conference agreed upon the creation of an international bank and a stabilization fund as necessary steps for the solution of our economic problems. We are told by those who would defeat the plan that the bank is sound but that it will be a fatal mistake for the United States of America to enter into any agreement looking toward the stabilization of the currency of other countries.

Frankly, I am not an expert in the field of banking and currency. I do, however, have several well-defined views with reference to the peace program. In the first place, I do not agree wtih those who contend that the United States alone is entitled to dictate the terms of the peace. I am not unmindful of the fact that without our help the war probably could not have been won by our allies. I am, however, mindful of the fact that in the dark days following the surrender of France, England stood alone against the might of Germany. Few believed at that time that she could endure more than a fortnight and, yet, with, characteristic courage and determination, she continued to fight on and made an inestimable contribution to final victory. I am also mindful of the magnificent achievements of the Russions, and the contribution of China to the cause of victory. They have richly earned a right to participate in the solution of the problems of peace. Moreover, the smaller nations who must cooperate in the maintenance of peace, if it is to be effective, must have a voice in the peace councils. I am convinced that a durable peace cannot be secured at the dictation of any nation, but that it must come about through compromises and voluntary agreements.

We in America should not be averse to compromises when we realize that our own Government was established only after months of wrangling between the several States, and the problem then was not dissimilar to the problem now. It revolved largely around the question of voting strength in the new organization. The larger and more populous States refused to enter an organization unless they had a larger vote than the smaller States. The smaller and less populous States refused to enter the new organization unless they had equal representation. Finally, as a compromise, two bodies were created, the United States Senate, in which the States have equal representation, and the House of Representatives, in which representation is proportioned on the basis of population. Unless we can enter the San Francisco Conference, and those which are to follow, in a spirit of give and take, our efforts to establish a permanent peace will be in vain.

I am also convinced that however harmoniously, patiently, and long we may labor, we can never design a perfect international organization. Let us again consider the history of our own country. Although I have always marveled at the wisdom, the judgment, and the skill of those who framed our Federal Constitution, we must admit that it was not a perfect instrument and our own State refused to ratify it without certain amendments upon which our representatives insisted. Those amendments were adopted immediately after ratification, and many others have been necessary during the ensuing years to meet new and changing conditions. If we now insist upon perfection in the proposed international organization, again our labors will be in vain. Let us, therefore, content ourselves at this time with the laying of solid foundations upon which we may continue to build until permanent peace becomes a reality.

The last words penned by our departed leader were written the night before his death and published while his body was on its journey to its last resting place. They constituted a speech which he had prepared for delivery on the anniversary of the birth of another great and liberal American—Thomas Jefferson. In the concluding sentence he wrote, "The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strength and active faith." God grant that we may dispel our doubts and move forward to the realization of that coveted goal of "peace on earth among men of good will" for which men have striven since the proclamation of the angels on the hills of Judea. No more appropriate monument could be erected to the memory of Franklin Delano Roosevelt.

False Economy in Interior Appropriation Bill Will Dwarf Our Future

EXTENSION OF REMARKS

OF

HON. JOHN R. MURDOCK

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. MURDOCK. Mr. Speaker, as chairman of the Irrigation and Reclamation Committee of the House of Representatives, I congratulate the Interior Appropriations Subcommittee on the recognition it gives the work of the Bureau of Reclamation in connection with the war food production program. The subcommittee, beginning on page 15 of its report, paid a well-deserved tribute to the crops produced on the reclamation acreage in 1944, which were valued at approximately $400,000,000. I also note that the committee recognized the tremendous value of the power activities of the Bureau of Reclamation through its statement that the power revenues in 1944 amounted to $13,530,000. It should be noted that the power installations of the Bureau of Reclamation made equally great contributions to the war through providing power for war industries in the West.

But, Mr. Speaker, the committee has overlooked the opportunity that the Bureau of Reclamation offers to serve the country in the post-war period as effectively as it has during the war.

This oversight threatens to hamper seriously the Bureau of Reclamation in its preparations for providing employment through permanent public works that will conserve and utilize western water and land resources and provide settlement opportunities for returning servicemen when Germany and Japan are vanquished.

At the outset, Mr. Speaker, I call attention to the reductions in estimates for operation and maintenance of projects which have been constructed with Federal funds. It seems to me that the Congress owes it to the taxpayers of this

country to see that the project facilities in which Federal funds are invested are operated and maintained efficiently. I have confidence that the Bureau of Reclamation under Commissioner Bashore has requested only those funds which are necessary to effect economical and efficient maintenance of these Federal facilities. Every dollar expended for operating these projects is repaid by the water users on the projects and by the sale of electric energy.

The Committee on Irrigation and Reclamation is now engaged in hearings on H. R. 520, a bill designed to facilitate the settlement of veterans of World War No. 2 on reclamation projects in the West. This bill gives 90-day preference to returning servicemen in the settlement of irrigated lands on reclamation projects where the heroes of this war can become self-sustaining, support their families and make lasting contributions to the welfare of the country.

The Bureau of Reclamation, if provided with funds, will be in a position not only to provide employment on the construction of reclamation projects, but will also be able to provide irrigated farms for more than 100,000 returning servicemen within a few years. Under the Reclamation Act and other laws passed by this Congress, the Bureau has been authorized to complete projects now under construction and to begin the construction of new projects which will assure more than 100,000 irrigated farms in the 17 Western States. In addition, other projects are under study which would increase the number of farms to nearly 200,000.

In order to assure this employment and the speedy construction of the projects authorized to provide the farms, the Bureau of Reclamation must be provided with funds to complete field investigations and to prepare designs and specifications so that contracts may be let as soon as manpower is available. This necessity was recognized by the late President Roosevelt when he transmitted the Bureau of the Budget estimates for the fiscal year 1946 for the Bureau of Reclamation.

I direct particular attention to the Budget estimate of $5,500,000 under the heading of general investigations. This amount was to be payable from the reclamation fund. Approximately half of this amount was to be spent for the completion of field investigations and the remainder for the preparation of designs and specifications on projects which the Congress authorizes.

The reduction of this $5,500,000 item to $1,485,000 will seriously hamper the Bureau of Reclamation in preparing for a post-war program. I call this reduction to the attention of the House at this time, feeling sure that the committee unintentionally has failed to grasp the significance and importance of adequate preparation for post-war construction work so that returning servicemen may be able to earn a livelihood by doing useful construction work. In this connection I also call attention to the reduction from $500,000 to $400,000 of the amount for general investigations from the Colorado River development fund. This fund is made up of receipts from the sale of power at Boulder Dam and like the appropriations from the reclamation fund it does not come out of the General Treasury. The Bureau of Reclamation is now engaged in completing a comprehensive report on the uses of the waters of the Colorado River Basin, in which seven Western States are concerned. The Colorado River development fund can be used for no other purpose than the development of the Colorado River Basin and all of it should be so used.

Another major item in connection with H. R. 3024 to which I direct the attention of the House is the elimination of the provision for continuation of the predevelopment program on the desert mesa lands of the Gila project in Arizona and the All-American Canal project in southern California. The work on the Gila project has been authorized by the War Production Board and has been endorsed by the War Food Administration as an essential activity contributing to the prosecution of the war through increased production of alfalfa. The long-time benefit from this predevelopment work has been recognized as desirable in order that future settlers on both the Gila project and the All-American Canal may know the kind of crops that are best adapted to these areas where returning servicemen can be settled. I have received many inquiries from veterans of the Second World War concerning opportunities in this favored area.

Like all western Members of Congress I favor the development of any section of this country. I have followed with interest the discussions regarding the program for the development of the Missouri River Basin. I was pleased last winter to see that the Bureau of Reclamation and Corps of Engineers of the War Department had agreed on a coordinated plan for this development. This coordinated plan was subsequently approved by the Congress in the Flood Control Act of 1944 and construction to the extent of $200,000,000 by each of these agencies was authorized.

The authorization of the Bureau of Reclamation extended to some 30 irrigation and multiple-purpose projects on the tributaries of the Missouri. The Corps of Engineers was authorized to construct some 6 or 8 large dams principally on the main stem of the Missouri.

The late President Roosevelt transmitted to the Congress a Budget estimate of $4,480,000 for the Bureau of Reclamation and other agencies of the Department of the Interior to complete field investigations and studies and prepare plans for the developments which the Department of the Interior was authorized to carry on. It was with great regret that I noticed that the estimate for the Bureau of Reclamation was reduced to $1,440,000 or about one-third of the Budget recommendation. The amount for the Bureau of Reclamation itself was cut about in half.

The explanation of the Appropriations Committee for this reduction does not recognize the fact that the Bureau of Reclamation and other Interior agencies are concerned not only with the construction of dams but must also plan irrigation systems, transmission lines, land-use developments, and study the water resources of the Missouri Basin. On the other hand, the committee cut the amount for the Bureau of Reclamation to the same figure of $1,440,000 named in the War Department Civil Functions Act for advanced planning by the Corps of Engineers.

I feel sure that this action by the committee was taken without full recognition of the importance and significance of the work to be done by the Bureau of Reclamation as well as the cooperative work by other agencies of the Department of the Interior. The work outlined under the estimate of $4,480,000 is absolutely necessary if the irrigation and other projects in the Missouri Basin are to be ready for construction in the postwar period to assure opportunities for employment and for settlement on irrigated land for returning servicemen.

I shall not take time to discuss other individual items where the Budget estimates were reduced, but I suggest to the western Members that they review the items listed in the tabulations on page 17 where the reductions are set forth. In conclusion, Mr. Chairman, I urge the Appropriations Committee to take full cognizance of the responsibilities of the Congress for providing the Bureau of Reclamation with funds to carry forward its preconstruction and other work essential to preparations for construction that will provide employment and settlement opportunities on irrigated land for veterans of World War No. 2.

Following the War Between the States we had an era of transcontinental railroad building which furnished employment and opportunity for the creative energies of our people. Following the First World War we had a great impetus in automotive transportation, which called for the building not only of automobiles but of many thousands of miles of concrete highways. This furnished employment and constructive opportunity for the energies of our people. What logical and needed new avenues of construction comparable to the others may be offered our people following this war? It is my conviction that reclamation offers such an outlet for energy in wealth-creating effort. It is a solemn responsibility resting upon Congress to avail the Nation of this opportunity in the immediate post-war future. Let us not muff this opportunity.

Radio Address of President Truman Opening San Francisco Security Conference

REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. McCORMACK. Mr. Speaker, in his radio address opening the United Na-

tions Conference on International Organization in San Francisco, President Truman presented clearly the reasons and necessities for action being taken to outlaw war. It was a powerful speech, convincing in every respect, which the delegates at the conference for the national interests of their own countries, as well as the future welfare of decent mankind, cannot ignore. It was an appeal to apply sound reason to the conditions that exist in the world of today and of tomorrow. It was a speech of recognition of the influence and the spirit of Franklin D. Roosevelt.

The world is watching hopefully the Conference that is now under way. If successful it will go down in history as one of the great turning points in the history of mankind. It will take its place among the foremost events of history.

As President Truman well said:

You members of this Conference are to be the architects of the better world. In your hands rests our future.

The opportunity and responsibility is theirs. Let us hope and pray that they will rise to the occasion.

Following is the text of President Truman's radio address of last evening:

Delegates to the United Nations Conference on International Organization, the world has experienced a revival of an old faith in the everlasting moral force of justice. At no time in history has there been a more important conference, nor a more necessary meeting, than this one in San Francisco, which you are opening today.

On behalf of the American people, I extend to you a most hearty welcome.

ROOSEVELT NAMED ABLE DELEGATION

President Roosevelt appointed an able delegation to represent the United States. I have complete confidence in its chairman, Secretary of State Stettinius, and in his distinguished colleagues, former Secretary Cordell Hull, Senator Connally, Senator Vandenberg, Representative Bloom and Representative Eaton, Governor Stassen, and Dean Gildersleeve.

They have my confidence. They have my support.

In the name of a great humanitarian—one who surely is with us today in spirit—I earnestly appeal to each and every one of you to rise above personal interests, and adhere to those lofty principles which benefit all mankind.

Franklin D. Roosevelt gave his life while trying to perpetuate these high ideals. This Conference owes its existence, in a large part, to the vision and foresight and determination of Franklin Roosevelt.

Each of you can remember other courageous champions, who also made the supreme sacrifice, serving under your flag. They gave their lives so that others might live in security. They died to insure justice. We must work and live to guarantee justice—for all.

You members of this Conference are to be the architects of the better world. In your hands rests our future. By your labors at this Conference, we shall know if suffering humanity is to achieve a just and lasting peace.

WORTHY PEACE TO BE GOAL OF CONFERENCE

Let us labor to achieve a peace which is really worthy of their great sacrifice. We must make certain, by your work here, that another war will be impossible.

We, who have lived through the torture and the tragedy of two world conflicts, must realize the magnitude of the problem before us. We do not need farsighted vision to understand the trend in recent history. Its significance is all too clear.

With ever-increasing brutality and destruction, modern warfare, if unchecked, would ultimately crush all civilization. We still have a choice between the alternatives: The continuation of international chaos or the establishment of a world organization for the enforcement of peace.

It is not the purpose of this Conference to draft a treaty of peace in the old sense of that term. It is not our assignment to settle specific questions of territories, boundaries, citizenship, and reparations.

This Conference will devote its energies and its labors exclusively to the single problem of setting up the essential organization to keep the peace. You are to write the fundamental charter.

TO CREATE STRUCTURE OF PEACE LEAGUE

Our sole objective, at this decisive gathering, is to create the structure. We must provide the machinery which will make future peace not only possible but certain.

The construction of this delicate machine is far more complicated than drawing boundary lines on a map, or estimating fair reparations, or placing reasonable limits upon armaments. Your task must be completed first.

We represent the overwhelming majority of all mankind. We speak for people who have endured the most savage and devastating war ever inflicted upon innocent men, women, and children.

We hold a powerful mandate from our people. They believe we will fulfill this obligation. We must prevent—if human mind, heart, and hope can prevent it—the repetition of the disaster from which the entire world will suffer for years to come.

If we should pay merely lip service to inspiring ideals, and later do violence to simple justice, we would draw down upon us the bitter wrath of generations yet unborn.

JUSTICE REMAINS GREATEST POWER

We must not continue to sacrifice the flower of our youth merely to check madmen, those who in every age plan world domination. The sacrifices of our youth today must lead, through your efforts, to the building for tomorrow of a mighty combination of nations founded upon justice for peace.

Justice remains the greatest power on earth.

To that tremendous power alone, will we submit.

Nine days ago I told the Congress of the United States, and I now repeat it to you:

"Nothing is more essential to the future peace of the world than continued cooperation of the nations, which had to muster the force necessary to defeat the conspiracy of the Axis Powers to dominate the world.

"While these great states have a special responsibility to enforce the peace, their responsibility is based upon the obligations resting upon all states, large and small, not to use force in international relations, except in the defense of law. The responsibility of the great states is to serve, and not dominate, the peoples of the world."

None of us doubt that with divine guidance, friendly cooperation, and hard work, we shall find an adequate answer to the problem history has put before us.

A MIGHTY UNITED EFFORT IS REQUIRED

Realizing the scope of our task and the imperative need for success, we proceed with humility and determination.

By harmonious cooperation, the United Nations repelled the onslaught of the greatest aggregation of military force that was ever assembled in the long history of aggression. Every nation now fighting for freedom is giving according to its ability and opportunity.

We fully realize today that victory in war requires a mighty united effort. Certainly, victory in peace calls for, and must receive an equal effort.

Man has learned, long ago, that it is impossible to live unto himself. This same basic principle applies today to nations. We were not isolated during the war. We dare not become isolated in peace.

All will concede that in order to have good neighbors we must also be good neighbors. That applies in every field of human endeavor.

For lasting security men of good will must unite and organize. Moreover, if our friendly policies should ever be considered by belligeren leaders, as merely evidence of weakness, the organization we establish must be adequately prepared to meet any challenge.

SOME DISAGREEMENTS MAY BE WHOLESOME

Differences between men and between nations will always remain. In fact, if held within reasonable limits, such disagreements are actually wholesome. All progress begins with differences of opinion and moves onward as the differences are adjusted through reason and mutual understanding.

In recent years, our enemies have clearly demonstrated the disaster which follows when freedom of thought is no longer tolerated. Honest minds cannot long be regimented without protest.

The essence of our problem here is to provide sensible machinery for the settlement of disputes among nations. Without this, peace cannot exist. We can no longer permit any nation, or group of nations, to attempt to settle their arguments with bombs and bayonets.

If we continue to abide by such decisions, we will be forced to accept the fundamental philosophy of our enemies, namely, that "might makes right." To deny this premise, and we most certainly do, we are obliged to provide the necessary means to refute it. Words are not enough.

WE MUST PROVE RIGHT HAS MIGHT

We must, once and for all, reverse the order, and prove by our acts conclusively that right has might.

If we do not want to die together in war, we must learn to live together in peace.

With firm faith in our hearts to sustain us along the hard road to victory, we will find our way to a secure peace, for the ultimate benefit of all humanity.

We must build a new world—a far better world—one in which the eternal dignity of man is respected.

As we are about to undertake our heavy duties, we beseech Almighty God to guide us in building a permanent monument to those who gave their lives that this moment might come.

May He lead our steps in His own righteous path of peace.

We Have an Obligation to Our Gallant Fighters

EXTENSION OF REMARKS

OF

HON. WALTER B. HUBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 25, 1945

Mr. HUBER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Akron Beacon-Journal:

"WE HAVE AN OBLIGATION TO OUR GALLANT FIGHTERS

"First Lt. John S. Knight, Jr., O439199, distinguished himself by heroic and meritorious service in action while serving in the Army of the United States against an enemy of the United States. On January 21, 1945, First

Lieutenant Knight with a small reconnaissance patrol cleared the enemy from Hautbellain, Belgium. In the face of a numerically superior force, the patrol, under the aggressive leadership of First Lieutenant Knight, skillfully carried out its attack completely routing the enemy. The actions of First Lieutenant Knight were in accordance with the highest standards of military service.

"W. M. MILEY,
"Major General U. S. A., Commanding
"Seventeenth Airborne Division."

"MUENSTER, GERMANY, April 2.—First Lt. John S. Knight, Jr., son of the publisher of the Beacon Journal, was killed on March 29 near Haltern while leading a small reconnaissance party on the right flank of the Seventeenth Airborne Division's drive on the Westphalian capital of Muenster.

"The 22-year-old Knight, who won the Bronze Star for gallantry beyond the call of duty in the Seventeenth's bitter fight on the Ardennes bulge, was reconnoitering the road leading from Haltern to the small village of Hullern when he and his party of four enlisted men were ambushed by a relatively strong force of well dug-in, carefully camouflaged Germans on Hullern's western approaches."

Johnny is gone. The lovable, kindly kid who never had a vicious thought in his life is sleeping in Germany because of the mad, senseless ambitions of a demented paranoiac; because in the last 20 years the statesmen of Europe have repeatedly sacrificed principle on the altar of power politics; because those of us in all lands who fought the last time failed to insure a lasting peace; because as his friend and fellow paratrooper, First Lt. Denis Jones of Landisburg, Pa., expressed it, "Johnny was killed just the same way he lived, doing just a little more than anyone asked him to do—giving more than he was required to give. That is one thing nobody will ever forget about him—no matter what he was asked to do, he always threw in a little extra."

As we strive to fight back the tears, there are memories of his childhood, his blond curly hair, his sensitive mouth, his contagious chuckle, his affectionate hugs.

Like every other normal American boy, he had the desire to excel in athletics, became a crack boxer and cross-country star. Never a good student, he tackled the roughest work in a lumber yard during summer vacations with real zest and characteristic energy.

Johnny was never intended to be a fighter; he loved people too much. I have seen him apologize to men he could have knocked flat with a single blow. He knew his physical strength and feared it.

War to him was not a glamorous adventure but a job to be done so that he and millions of other American boys could live normal lives when it was finished.

Yet he took all the tough jobs in stride as paratrooper, liaison pilot, and combat patrol leader.

That was Johnny's way.

There are moments of comfort when we are told of the esteem in which Johnny was held by commanding officer and enlisted men alike.

Lt. Col. Lyle McAllister, of Seattle, Wash., writes that "your son was one of the finest officers in the division and consistently entrusted with the most dangerous and difficult missions."

Pvt. (1st Cl.) Earl Holcomb, of Fola, W. Va., pays this tribute: "He never told us to go where he wouldn't go himself. When you went out on a job with Lieutenant Knight, you knew that he would lead and you would follow. He was the kind of officer who really led."

But then, the tears come faster.

Johnny is gone.

Try as we may, it is difficult not to become embittered. All of the kindly, sympathetic words we have spoken to others now taste like ashes in our own mouths.

Perhaps it is always that way.

The great tragedy of the Johnnys, the Sams, the Petes, the Joes, and all the hundreds of thousands of other fine young men who have died for us is that few of them ever had a real chance at life.

There were so few years, so little time for them to have achieved but the smallest part of their hopes and aspirations.

It was intended by divine providence that the young should have their day in which to rectify the errors of their elders; to press boldly forward without fear or inhibitions in a world which has somehow managed to survive the sins and greediness of countless generations.

This chance has been denied them—forever.

Actually, they wanted so little.

A good home, children, a job, and a future bursting with opportunity.

Now it will never be theirs to know. They have given their lives so that our country might live, that you and I can continue living in security and freedom from fear.

They never had a chance.

We hear the war is practically over in Germany, that losses are light. But every second of every hour it continues, some fine young American boy is being slaughtered by a maniacal foe indoctrinated with cruelty and hate.

Nearly 300,000 Johnnys are gone.

We must make an appointment with those gallant boys and give them a solemn pledge that we shall never again shirk the task of achieving a peaceful world, free from the bestialities and carnage that have made a mockery of civilization through the ages.

We must guarantee them further that their returning comrades will be given the chance at life which was denied to them, that no one of them shall ever suffer through our selfishness and greed, that our high-sounding promises will never reecho as a hollow mockery of words.

Above all, we must work unceasingly for a rebirth of spiritual values and the strengthening of our national character.

Here at home we have undergone no such test as that faced hourly by our youngsters on the fighting fronts. Sometimes I think it would have been better if we had.

But the test will come when the parades are over and bands stop playing.

We have an obligation to those who have made the brave and gallant fight, a covenant with the dead.

To the Johnnys who are gone and the millions of Johnnys to come, let it at least be proved by our acts that we sought redemption and endeavored to make atonement for the sins of a shallow, self-indulgent, and greedy generation.

Through tear-dimmed eyes, I offer a silent and humble prayer.

May his noble soul rest in peace.

JOHN S. KNIGHT.

What Shall Be Done With Germany?

EXTENSION OF REMARKS

OF

HON. DAVID I. WALSH

OF MASSACHUSETTS

IN THE SENATE OF THE UNITED STATES

Thursday, April 26 (legislative day of Monday, April 16), 1945

Mr. WALSH. Mr. President, recently See magazine conducted a prize contest and asked for the views of contestants on the question "What Shall Be Done With Germany?" The first prize was awarded to George M. Halliburton, 14 Pond Street, Boston, Mass. I ask that his brief and concise article be published in the Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

1. The United Nations should form a joint occupation government.
2. Convicted war criminals publicly executed.
3. Military courts for postwar criminals.
4. Supervision of education, and suppression of dangerous organized propaganda.
5. Minimum period of occupation 15 years, Germans to work as hard rebuilding Europe as they did to destroy it, with standard of living their own wartime standard.
6. Reparations based principally on value of 15 years' estimated industrial, mining, and agricultural production above living requirements (total perhaps $350,000,000,000); occupation beyond 15 years if production program not met.
7. Industrial relocation: (a) For several years Germany to produce, at full capacity, machinery, steel, etc., to build industry of European non-Germanic countries. (b) During next few years German heavy industry, including chemical plants, to be moved to non-Germanic countries; German railroads reduced to requirements of agriculture, mining, prescribed light industry; remaining railroads between Oder River and Rhine changed to narrow gage. (c) During remainder of occupation displaced German labor to be channeled into agriculture, and neighboring countries, industries protected from German domination.
8. Germany to be divided thus: (a) East of Oder River, to Poland. (b) Saar Basin, to France. (c) Rhineland, including industrial Westphalia, to be an internationalized state. (d) New Germany to be balance of prewar Germany.
9. Throughout occupation, separate civil administrations for Saxony, Hanover, Bavaria, etc., fostering local ties, and democratic, rather than totalitarian, ideals.
10. Continued restrictions on Germany: (a) No airplanes. (b) Army limited to border-protection militia. (c) Imports limited to requirements of new Germany economy. (d) No loans, except with United Nations' approval, after full publicity.

Postwar Policy on Synthetic Ammonia Plants

REMARKS

OF

HON. HENRY D. LARCADE, JR.

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. LARCADE. Mr. Speaker, while the reciprocal trade agreement is being considered by committees of the House and Senate, I was amazed to learn of a press release issued by the Department of State under date of April 3, and being No. 293 which revealed a pledge made to the Government of Chile that the United States would retain in stand-by condition the synthetic ammonia plants which it owns during the postwar period. Mr. Speaker, in Lake Charles, in my district

we have a large operator of a Government anhydrous ammonia plant, who has been interested in obtaining an additional sodium nitrate plant in order that the ammonia can be turned into nitrate fertilizer for the postwar period, and since I have one of the largest and most important agricultural districts in the United States, in my opinion, such fertilizer operations would not only be of great value to the Government, but also to my district, State, and the territory surrounding.

Mr. Speaker, the agreement which I refer to is with one country and covers one commodity, synthetic nitrogen, and brings to your attention the danger involved.

The text of the agreement is as follows:

During the course of the Inter-American Conference on Problems of War and Peace at Mexico City, discussions were held between the United States and Chilean delegations regarding the operation and disposal of synthetic-nitrogen plants owned by the Government of the United States.

As a result of those discussions the Secretary of State informed the Minister of Foreign Affairs of Chile that it was not the intention of the Government of the United States that the production by the Government of synthetic nitrogen in plants owned by it and constructed for war purposes, should be continued beyond the period necessitated by the conditions or consequences of the war, except as might be necessary in order to maintain the plants in efficient operating condition for national security from the point of view not only of physical condition but also for the purpose of continuing scientific research and technological progress. The Chilean Minister of Foreign Affairs was also informed that should it be necessary for the Government of the United States to modify this position, there would be consultation with the Government of Chile before any action was taken.

The Secretary of State also informed the Foreign Minister of the intention of the Government of the United States to consult with the Government of Chile with respect to such Government plants for the production of synthetic nitrogen, constructed for war purposes, as might not be dismantled, or converted to uses other than the production of synthetic nitrogen, or maintained for national security, if the terms or conditions of cession, sale, or lease of such plants to private interests might create serious problems affecting the production or exportation of Chilean nitrates. Such consultation would be for the purpose of reaching such accord with respect to those problems as would, while protecting the interests of the United States Government, give due consideration to the effects upon Chile, particularly from the point of view of the competitive situation created by the terms or conditions of the cession, sale, or lease of those plants.

Speed?—Take the Air Ferry

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include an informative article, "Speed?—Take the Air Ferry," written by W. Clifford Harvey, appearing in the April 7, 1945, issue of the weekly magazine sections of the Christian Science Monitor, of Boston, Mass., of the outstanding 4 years' record of the officers and enlisted men of the Air Transport Command under the able and courageous leadership of Maj. Gen. Harold L. George.

The fine work of the officers and men of this command, with very slight public recognition, has played an important part in the successful progress of the war.

The article follows:

SPEED?—TAKE THE AIR FERRY

(By W. Clifford Harvey)

During the half-hour it takes the average suburbanite to get into the office each morning, and every half-hour thereafter on a round-the-clock schedule, two airplanes complete a crossing of the Atlantic Ocean. Every 51 minutes other planes are landing somewhere after hopping the Pacific Ocean.

From transoceanic supply bases direct to the war zones, these planes are carrying 50,000 tons of high priority cargo and passengers every 30 days. And 4,000 wounded soldiers are flown from the battle fronts to America by this greatest of all air-line ferries every month.

Little wonder, then, that the Air Transport Command of the United States Army will look back over 4 years of sparkling achievements on its fourth anniversary, May 29, with the proud observation that in those 4 years of war it has linked together the complete framework of a potential, postwar pattern of international passenger and freight air service.

In the year just ended the ATC, headed by Maj. Gen. Harold L. George, formerly Chief of the War Plans Division of the Air Staff, piloted 1,250,000 war-important passengers, most of them to locations overseas. Passenger and freight tonnage for the year equaled 580,000 tons, including 3,500,000,000 "pulls" of GI mail. Which adds up to a combined total of 600,000,000 miles of flying, or 25,000 times around the world at the Equator in a single year.

Yet, back on May 29, 1941, this now vast, coordinated system of scheduled air services, flying 2,000,000 miles every day, consisted of only two officers, four enlisted men, a map of the world, and the vision of a meritorious job to do.

Drama, pathos, humor, suspense, and all the range of human emotions are loosed in the tales of those who have flown with the ATC. It has a long list of notable performances, including a nonstop flight from London to Washington in less than 18 hours, and a direct flight from Washington to Paris with General Marshall aboard. Its longest overland supply route (from Central Africa to China) has just completed its first full year of operation without a single fatality. It carried a party of United States Senators on a 38,000-mile trip around the world, including a 3,200-mile, nonstop flight from Ceylon to Carnarvon, Australia.

The story behind the splendid record of the Central African Division is basically the story of the Command itself, of persevering men thousands of miles from their homes, of typical American ingenuity working day and night to maintain plane schedules, and to keep vital parts for planes, tanks, guns, and trucks moving to the battle fronts. Preface for the complete story is the arduous training of pilots and crews, who must undergo refresher courses every 90 days to keep abreast of the fast-moving panorama of aviation progress.

Flying time from Accra on the African Gold Coast to Karachi, India, is about 33 hours, or twice the flying time across the United States. Flying conditions involve excessive heat, with only meager reports of weather conditions which are snapped wide open with little warning by windstorms. But, despite these obstacles, the Command flies on over jungles, deserts, and treacherous mountain ranges, operating around the clock, and only waiting proudly for the day when its facilities can be turned to routine schedules carrying peacetime freight and passengers.

Indicative of the air traffic over the North Atlantic these days is the announcement by the Air Command that in one single month it furnished sleeping quarters to nearly 150,000 persons, served 350,000 meals, putting up another 54,000 meals in transit. Transient accommodations were provided at ATC bases for 15,000 people in Alaska, 26,000 in the Caribbean, 26,000 in central Africa, 21,000 in Europe, 44,000 in Indo-China, 110,000 in north Africa, 75,000 in the Pacific area, and 27,000 in the South Atlantic region.

This largest of all hotel chains spreads out over 160,000 miles of air lines and provides the foundation and basic experience that will be required for rapid conversion to routine air-line travel after the war. In a single year the Command, through its 9 foreign divisions, served as transient quarters to more than 5,000,000 persons.

They are not all the luxury types of hotels. "Hotel de Gink" is the popular name for billeting accommodations at many bases. Some are Nissen huts, or wooden barracks, deep in the jungles. Others are just plain tents on remote islands, or brick buildings in the middle of thriving cities. But they are all comfortable, and they enjoy the distinction of paving the way for the great air-line hotels of the peacetime period to come.

Trade and travel on an air-line transportation service of this type necessarily must have its banking and foreign exchange set-up. This the ATC has on a world-wide basis, with banking facilities at nearly 100 separate stations from Greenland to Alaska to Australia, dealing in the currencies of 36 nations.

The Air Transport Command was the result of a directive by President Roosevelt to the Secretary of War, on May 28, 1941, to assume full responsibility for the deliveries of aircraft to the United Kingdom. This function was shortly broadened to include deliveries to other countries receiving lend-lease aid after the United States entered the war. A day after the President's directive, the Army assumed its responsibility under the leadership of the late Maj. Gen. Robert Olds. It was originally known as the Ferrying Command.

The Command developed rapidly, being divided into two wings, domestic and foreign, and on July 1, 1942, shortly after General George took over, the ferrying, transport, and cargo operations were consolidated under a single command. By the end of 1943, the Command had a personnel strength of more than 85,000 officers and men. Today its strength totals more than 160,000 officers and men.

When the war is over and the victory is appraised in terms of operational contributions, the Air Command will stand high on the list of historic achievements paving the way to a higher civilization. An army cannot move without supplies keeping up with the front lines. And these supplies depend upon the importation into defense plants of materials from all over the world. Hog bristles for making gun brushes, feathers and down for flying suits and sleeping bags, tungsten for armor, tools and filament for radio-radar, industrial diamonds for machine tools, and tin for tin plate came in on the wings of the Transport Command for the American "blitz" abroad.

When the War Production Board informed the ATC that there was not enough talc on hand to keep up production of radio-radar for another 10 days in June 1944, the Command diverted three cargo planes from regular runs in its Central African Division to bring talc from India only 4 days later. Tube production was not delayed a minute.

It was the India-China Division of the ATC that kept China's lifeline open with the outside nations on the most hazardous airway in the world, namely, "over the Himalayan hump" between India and China. During a 6-day period, recently, transports took off for China from India every 4 minutes.

When Mme. Chiang Kai-shek, wife of the Generalissimo of China, came to New York, it was the ATC that brought her in 27 flying hours. It is the ATC that is bringing the battle with mosquitoes, wild animals, heat, thirst, and high altitudes to a successful conclusion on world-wide fronts. Weather and communication stations set up in lonely outposts of other worlds, serviced by the ATC, enabled American troops to construct airfields right under the noses of the Japanese. Dog teams directed by the Command rescued the crew of a B–17 lost on the Greenland icecap.

One thing that General George and his staff are not talking about is the process of reconverting their gigantic air-line set-up to immediate civilian and peacetime cargo transportation after the war. They are out to win the war first, leaving the performances of the ATC to speak for themselves in glowing terms of what can be done in a short time to lift freight and passengers into the air lanes.

Price Control

EXTENSION OF REMARKS

OF

HON. GEORGE E. OUTLAND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. OUTLAND. Mr. Speaker, I have been gratified to notice the increase in understanding and approval of the work of the Office of Price Administration on the part of the vast majority of American people. This war agency probably has the most unpopular duty of any of the home front organizations. In spite of the difficulty of its task, it has done a magnificent job. The inevitable mistakes have become fewer in number and less important.

A large share of the credit for the successful achievements of OPA has been due to its present Administrator, the Honorable Chester Bowles. It seems to me most appropriate that as the time draws near for the renewal of the Price Control Act we give to Mr. Bowles credit for his achievements.

As part of my remarks, I should like to include a radio talk given by him over the Blue Network on April 19, 1945:

Hello everybody. For many weeks now, I've been meeting with you in these radio talks. Often we have had guests * * * to bring out special points about our rationing, rent and price control—points which I felt you would be most interested in.

But today I have no guests. I'm going to talk to you alone. I'm going to talk to you—directly and frankly on a subject of utmost importance to you and your children, and to all the boys in our armed forces now fighting in all parts of the world to bring this terrible war to a victorious conclusion.

Just a few days ago the news of Mr. Roosevelt's death came to us over our radios and through the headlines of our newspapers. It was a shock to every citizen of the United States regardless of his political belief. Likewise it came as a shock to all the people of England, Canada, Russia, China, and all other parts of the world, looking to America for strength, help, and democratic leadership.

As we slowly recover from the shock, we all realize more than ever, the desperately difficult period in which we are now living. In my opinion—and in the opinion of most of us here in Washington—the next 12 months may well be the most critical year in all American history.

Although the war is going well on all fronts, it remains a tough war. It remains a costly war—a war that must be fought vigorously to a victorious end.

Ahead of us lie the problems of working out a permanent peace that will assure all of us and our children, and all the rest of the world, against future wars of devastation.

Finally and of almost equal importance: This year will also decide whether or not this war will be followed—as the last one was followed—by a period of skyrocketing prices, and then the inevitable collapse.

This coming year will decide whether or not we can keep our economy on a sound and a solid basis—on which to build a future of full employment and full production, and prosperity for all of us.

So far, for the first time in any war, the forces of inflation have been kept under control. We have seen, for the first time, in any war, how you and your neighbors working with your Government, can keep prices on a relatively even basis.

For 2 years now, although there have been some slight price rises here and there we have held the line on rents, on food, and on most of our other essentials.

But now I come to the $64 question! The question it's up to you to answer. The question that every one of us—every one of our neighbors, of our farmers, our Government, must answer—not only for our own sakes, but for the sake of all the boys in your town, and in all our other towns, who are away fighting this war.

Will we have the courage and good sense to keep inflation in check during the months that lie ahead?

This coming year is the test, for in this year, the inflationary pressures will be greatest.

This year is the test, because during the coming months, the lobbyists and pressure groups, who sometimes seem willing to risk our whole future security in their efforts to gain some benefits for themselves, will be on the attack.

Now while OPA is responsible for maintaining control over prices, rents * * * let me make this point emphatically clear. OPA cannot do this job without your vigorous help * * * without your continued support and backing.

Let me repeat that fact. This job—of keeping prices in line—of fighting inflation * * * is your job. It's up to you and your neighbors * * * it's up to our farmers * * * our businessmen * * * our factory workers * * * to all of us—as well as to our Government.

On all sides, the lobbyists and pressure groups are exerting their power. They are trying to tear down the structure which we have built up in this war to protect you against higher—and still higher—prices.

In 1918, after the end of the last World War, similar selfish forces managed to set off a disastrous inflationary spiral.

If we are to avoid the mistakes of the past—we must understand those mistakes—and see that we do not repeat them. Let's recall, for a minute, what happened after the armistice was declared in 1918.

War industries, of course, closed down * * * throwing thousands out of work.

Yet prices—which had soared during the war—continued to rise * * * even faster after the shooting stopped.

What few controls we had had—were dropped as soon as the war was over. As a result—with nothing to stop them—prices went their way unhampered. By May 1920, they had reached their peak. Everything was sky high. Clothing prices, for example, were three times what they had been before the war. A suit of clothes that sold for $25 before the war—then had a price tag of nearer $75. Food prices more than doubled. Rents were up sharply. Rents were half again as high as before the war.

Then the crash came. It came fast. In a little more than a year, factory workers' pay dropped 25 percent. Then more workers were laid off and factory pay rolls dropped 44 percent. Millions of people—innocent victims of a war inflation—walked the streets * * * looking for jobs. More than a hundred thousand businesses—most of them small businesses—failed in a 5-year period. Soldiers back from France were unable to find jobs. Many were reduced to panhandling in the streets.

Nor was it only city people who suffered. Nearly a half a million farmers lost their farms in those same years.

I remind you of what happened after the last war, because that's what we face again today—only on a far larger scale—if we fail to keep prices down, if we fail in our fight against inflation.

That's the decision we must make. That's the $64 question we must answer. Are we going to let inflation beat us again—or are we going to beat inflation? That's the question that is squarely up to us, and there's no dodging it.

I think you understand that. I think most reasonable people do. But there are powerful minorities in business and industry, and let me emphasize that they are minorities, who do not understand this.

They are so absorbed in their own interests—they fail to see the picture as a whole. They don't stop to think that a price increase for them, will not stop with them. They overlook the fact that it only takes one price rise here, and another one there, to set off the whole inflationary spiral, where nobody is the winner, and everybody is the loser.

Most of these men have made good money during the war. Naturally they want to continue doing so. But what they fail to realize is—that neither they nor any of the rest of us can make any money—if higher and higher prices drive us into inflation—and its inevitable result, collapse. They don't see what they themselves stand to lose.

In their determination to put their own interests first—these pressure groups don't stop to consider any of those facts. They go on straight ahead—intent on gaining the price increases they want for themselves. They come to Washington in force, hundreds of them. They crowd the lobbies of Washington hotels. They have big expense accounts, provided by the groups they represent.

Now right here, I want to make one point perfectly plain. When I speak of pressure groups I am not speaking of business generally. By and large, business is solidly behind wartime price control, because they know it's good business. OPA is helped constantly by the advice, cooperation, and leadership of business. Many of the strongest supporters, advocates of price control, are from the ranks of business—both large and small.

Likewise, when I speak of pressure groups I do not refer to businessmen with just grievances, who come to Washington to show us with their records that wartime price controls are causing them real hardship.

The position of OPA has always been very clear. We stand ready to give relief to any industry suffering hardship because of price controls.

But we stand equally firm against all purely selfish and unwarranted demands for higher prices. We will continue to resist those—who to further their own personal interest—try to break down the price controls set up to safeguard our national country's business economy in wartime.

I repeat, we stand staunchly against any selfish groups, which render lip service to the idea of wartime price control but actually do everything they can to sabotage it.

Today we stand at the crossroads. We have our choice of two paths to take.

One road leads to inflation and economic disaster. Knowingly or unknowingly this is the road that the pressure groups are trying to make us travel. They will use every means at their command. They will play on our fears and our emotions. They will ask again and again for selfish concessions. As the Price Control Act comes up for renewal in Congress during the coming weeks, they will try to break its protection by tacking on weakening amendments. If we submit to this pressure—prices will begin to rise. Rents will rise. All this will happen slowly at first. Then as it gains momentum—there will be no stopping it. Prices will go up and up * * * faster and faster.

You'll find your rent—your grocery bill—and all your other bills—getting bigger and bigger. You'll rightly demand higher wages—so you can pay your ever-mounting bills. Wages will start up—but more slowly * * * lagging behind, as they always do. But then they, too, will start upward.

The whole merry-go-round of higher prices—higher wages—will start spinning its dizzy whirl * * * faster and faster carrying us straight into another wartime inflation.

In the face of ever-rising prices—merchants will outbid each other in their rush to build up their stocks—paying any price so long as they can charge more. Prices will reach such heights—that once again—people will not be able to pay them. Then crash! The bottom will fall out of everything * * * plunging us again into the depths of depression.

Merchants will not be able to get a fraction of what they paid for their stocks. Businesses will go bankrupt. Factories will shut down. Farm mortgages will be foreclosed. Millions will again walk the streets * * * in the hopeless search for jobs that aren't there. Breadlines will form in every city. Our returning soldiers—who have won their victory on the battlefront—will find that we have lost our battle on the home front. What a hollow victory * * * to win the war—and lose the peace.

Yes, that is where the first road leads all of us—the road to inflation, to disaster, and ruin. This is the road down which pressure groups and lobbyists would—knowingly or unknowingly—lead us.

But now let's look ahead on the other road. This road is difficult and inconvenient. But it leads to a sound postwar economy—security and full employment for all. We have a good start along it already.

But the going is sometimes rough and steep. Some of us stumble and would turn back. Especially now, when all of us are weary of war, tired of all its restrictions and inconveniences.

But we cannot falter. We must go on. Even though the war news gets better every day we must push on—just as our fighting men are doggedly pushing on. In the postwar world this road means protection for our savings—good wages for our workers, good profits, and far-reaching markets for our businessmen—continued high income for our farmers.

In order to follow this road we must follow the signposts of OPA price and rent control. We must stick to our OPA ceiling prices and other wartime rules. Weary as we are of all of them, they have served us well through difficulties. And the sooner we get safely to the end of the road the sooner we can get rid of them.

Whatever the difficulties, this is the road we have marked for ourselves, this is the road we are determined to follow. Nothing can divert us. For we know that if that happens we are lost.

Let me pledge the full, vigorous efforts of our OPA organization, and all the people in it here in Washington, in our regional and district offices, in our local war price and rationing boards, to lead the fight against lobbyists and pressure groups, against higher prices and rents, against the forces of inflation.

Your letters and your messages prove that we are all in this fight together.

We have our decision—130,000,000 of us. We have the courage to carry it through. Under the leadership of President Truman we'll continue our march. We'll keep on pushing ahead against our enemies abroad, against inflationary forces here at home. We'll march straight on, 130,000,000 strong, up our road to victory.

Prejudice: Our Postwar Battle

EXTENSION OF REMARKS

OF

HON. FRANK E. HOOK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. HOOK. Mr. Speaker, with the war in Europe against the Nazis drawing so close to final victorious conclusion, with the end of the Nazi's nightmare of race superiority so near, I think it is appropriate and necessary that we in this country give serious thought to the problem of racial antagonisms here in our own country.

We all know of the prejudices and intolerance that mark the pattern of behavior here in many sections and communities with regard to our minority groups. Some of us are trying to pave the way to eradicate these evils through the passage of a bill making it illegal to discriminate against persons because of their race, color, creed, or national origin in the matter of employment.

I would like to obtain permission to insert in the RECORD a very fine article appearing in the May 1 issue of the national magazine, Look, which presents this whole problem of intolerance and prejudice and makes some very sound suggestions as to how to combat it.

I therefore ask unanimous consent to revise and extend my remarks and include therein an article from Look magazine:

PREJUDICE: OUR POSTWAR BATTLE—WHEN THE OVERSEAS CONFLICT ENDS WE FACE AN INTERNAL WAR UNLESS RACIAL AND RELIGIOUS TENSIONS ARE REMOVED

The architects of peace, gathering in San Francisco this month to blueprint a better world, probably have never heard the story of the Negro girl who was asked by her teacher to name a suitable punishment for Hitler. "Paint him black," was her bitter suggestion, "and bring him to America."

This has been a war of liberation for oppressed peoples all over the globe. Yet within the borders of our own Nation one-third of the people—the minorities who constitute our second-class citizens—are still behind the barbed-wire fence of prejudice.

Hatred and suspicion divide America. On one side, generally, is the white, Protestant majority. On the other are the 17,000,000 "sub-Americans" of different races and colors—Negroes, Mexicans, American Indians, Japanese, Chinese, Filipinos—plus the 23,000,000 Catholics and 4,500,000 Jews who, because of religion, are sometimes shut out from main currents of national life.

The powder keg of prejudice awaits the spark that may detonate conflict. When restraints of war are off and demobilization, reconversion, and lay-offs disrupt the Nation, trouble is expected. Minorities will not easily accept "discriminatory discharges." Merchants of hate will exploit friction.

Can the United States, dedicated to the proposition that all men are created equal, ward off postwar catastrophe? An important, timely book—One Nation, by Wallace Stegner and the editors of Look, to be published this fall by Houghton Mifflin—astutely analyzes the state of our prejudices. In the pages that follow, based mainly on One Nation, Look diagnoses this insidious illness which afflicts all America and suggests some possible cures.

Underlying our prejudices, whether racial, religious, or cultural, is fear—the fear of being overrun, changed or diluted, done out of our jobs or social positions. Thus prejudice is a defense of our particular status quo, our "pure" race, our "right" faith. Too many Americans who should know better shy away from people who appear to be "different" and deliberately or unconsciously wall them off.

SEGREGATION—SHAME OF DEMOCRACY

Probably the most common symptom of our malady is segregation. The South's Jim Crow caste system, at odds with all democratic principles, separates the Negro on trains and busses, excludes him from parks, hotels, restaurants, beaches and schools frequented by whites, seats him in a "nigger heaven" balcony at the theater. Even in our armed forces, Negro enlisted men are often kept apart.

To a lesser extent, Filipinos and Mexicans on the west coast are barred from "white" restaurants, segregated in theaters. Chinese are apt to be confined to "Chinatowns."

Advertisements for resorts or for the sale or rent of property often stipulate "protestant only" or "white only" or "gentile only". Restrictive clauses in property deeds, agreements among neighborhood associations and real-estate agents set up the equivalent of a "no dogs allowed" ban against the unaccepted. Even wartime-housing projects are likely to discriminate. In northern cities, colored ghettos have become worse, rather than better.

BYPRODUCTS: DISEASE, POVERTY, CRIME

One effect of physical segregation in slums and "shacktowns" is overcrowding, which in turn produces poverty, squalor, disease, crime and ignorance. Here, even such elementary needs as garbage disposal and fire prevention are generally inadequate.

Illness of almost every kind is pronounced in the black belts of virtually every city where Negroes have settled. Pneumonia and scarlet fever, for instance, hit their highest peak there. Infant mortality among Negroes in Chicago is twice as high as it is in the rest of the city. Among the Hispanos (Spanish-Americans) of New Mexico, the tuberculosis death rate is about three times the national rate; in San Francisco's Chinatown, it is three times the city's average.

In supporting segregation, as One Nation points out, America is subsidizing social evils,

When diseases in slums break away and become epidemic, when anti-social behavior created by slum living turns into a crime wave, or when race tensions explode into riots and bloodshed, the entire population pays the bill.

WANTED: EQUAL OPPORTUNITIES

Reinforcing the fencing-in process, economic discrimination resists the efforts of our sub-citizens to rise out of their class. A number of business firms will not employ Catholics or Jews. The South recognizes "white men's jobs" and "nigger jobs," the latter being the servile, the low-paid, and the unpleasant. Thirty-two labor unions either exclude Negroes or shunt them into Jim Crow locals. Hate strikes have broken out against hiring and upgrading of Negroes, in the North as well as the South.

Highly trained Chinese and Japanese have been forced into menial jobs. Mexicans and Filipinos generally have been confined to back-breaking migrant labor. Although the manpower shortage and the President's Fair Employment Practices Committee have recently tended to even up work opportunities, widespread discrimination persists.

SCHOOLS ARE HAND-ME-DOWNS

As with jobs and homes, education is offered to some minority groups only on inferior or separate terms. Certain colleges and professional schools have "quotas" for Jews and the colored races. The system of separate schools for colored children, prevalent in the South, shows signs of spreading to the North. Southern schools for Negroes are crowded, inadequately equipped; colored teachers draw salaries lower than those of white teachers. Mexicans in Los Angeles and other Southwest communities have similar educational hand-me-downs.

THE LAW, TOO, IS PREJUDICED

Inevitably, legal discrimination has become part of the pattern of keeping the sub-American "in his place." Police protection for minorities is frequently a farce. "Law and order" too often is applied according to the ruling caste, class, color, and faith. When hoodlums attack a minority group, victims rather than aggressors are jailed—"for protection." Voting procedures like the poll tax in seven Southern States, or direct intimidation at balloting or registration places, rob Negroes and others of their franchise.

The ultimate stage of the sickness known as prejudice is violence. It may take the form of hoodlumism, vigilante action, or terror. Recent incidents directed at Negroes, Jews, Japanese, Mexicans, and Filipinos have a clear relationship with the Nazi philosophy of hate; the difference is only in degree.

HATE MONGERS USE NAZI METHODS

Feeding these fires of discord is the slimy propaganda shoveled out by the demagogues who spread their lies via whispers, chain-letters, mass meetings, pamphlets and periodicals. Their poison infects all sorts of people. A decent, well-meaning American is likely to swallow the most whiskered myths and generalizations—canards about Catholic "opposition to scientific progress," Jewish "monopoly," Negro and Mexican "shiftlessness," the Filipino "threat to young American womanhood," unfair Chinese "competition with white labor."

The task of checking group tensions, before they break out into a postwar battle, is America's challenge. How can we meet it?

At no time in recent history have the American people been so conscious of racial and religious prejudice as they are today. Under the impact of war and its democratic aims, more has been done to combat discrimination in the past few years than in decades before. Over 200 inter-racial committees, created by public or private agencies, are tackling local issues. But the outcome of our civil war against intolerance must eventually rest with you, as a voting citizen, and with your community.

You can help bulwark your democracy against the enemy within. Here are some specific things you can do about it:

FACTS REFUTE THE MYTHS

1. Nail the lies. Refute the moth-eaten labels, libels and worn-out club-car jokes about members of minority groups. Generalizations about any racial or religious group are absurd. The Negro's achievements in the arts and science, in industry and on the fighting front, blast the myth that he "can't do skilled work," that he is "a child, with a child's emotional equipment and dependence." If the Catholic Church in politics scares some people, you can point out that Catholics in America are of virtually every political persuasion.

THERE IS NO COMPOSITE CHARACTER

The Jews are neither a race nor a nation; they are so mixed that generalizing about them is impossible. There is a higher percentage of Jews in the armed services than in the general population. Election statistics prove the Jew is not a Communist. Nor does a study of bank directorates indicate that he is an international banker. The composite Negro or Catholic or Jew does not exist.

2. Support legislation, both local and national, outlawing the evils of intolerance. Legislative firmness not only can curb prejudice; it can help break down that prejudice by making people learn that the thing they have feared is no more than an inflated bogey.

New York State has just enacted a law designed to prevent discrimination in employment. There is need for a permanent Federal Fair Employment Practices Committee, a Federal anti-lynching law, repeal of poll-tax statutes, a ban on discrimination in our armed forces, schools, trade unions, housing projects, medical care.

GIVE THE MINORITIES A CHANCE

3. Help open up equal employment opportunity, in private industry and Government. This can be a real contribution to economic security of minorities and to better harmony.

During this war, our second-class citizens have demonstrated their ability to handle any and all jobs, skilled or unskilled, if they are only given the chance of training and experience. If you're an employer, give them the same kind of chance in peacetime, too.

4. Participate, wherever possible, in educational campaigns to combat prejudice. Through our schools and churches, young and old must be made to see prejudice not as white versus black, or Protestant versus Jew and Catholic, but as democracy versus fascism.

Schools should become a social pilot plant for the understanding of races, cultures, heredity. In most young people, merely going to school together breaks down the worst prejudices, unless they are subjected outside to propaganda fomenting district, snobbery, and hatred.

NEEDED: MORE SPRINGFIELD PLANS

Schools can actively educate for racial and religious democracy. An outstanding example is the Springfield (Mass.) plan. A few years ago, this city found that soon its schools would be attended mostly by children of foreign stock, rather than by Yankees. In a decade, these "across-the-tracks" children, grown up, would run Springfield. Rather than look down on the minorities, Springfield decided to make them full and equal Americans. So the school board revised the curriculum, launched an experimental program to meet the problem.

Under the plan, students are given practical experience in working together. Pride in their backgrounds is encouraged. The Negro, Jewish, or Polish child gets a chance to learn, write, and talk about the contributions his group have made to America. Parents get the same chance through forums and adult classes. The many kinds of people in Springfield have been welded into a community.

Other cities are studying and copying the Springfield plan. You should try to interest your town in adopting it.

THEY, TOO, ARE FELLOW AMERICANS

5. Know your neighbor. Nobody knows so little about a minority group as the average American who has lived near it for years. Since prejudice feeds on ignorance, any sort of contact, any break-down of the segregation wall tends to weaken or destroy it. Take part in church, school, and community center get-togethers with people of varied cultural, racial, and religious backgrounds.

6. Help marshal public opinion against intolerance. Get behind one of the many interfaith and interracial organizations, support your mayor's or Governor's committee planning and promoting internal harmony.

PREJUDICE ENDANGERS YOUR OWN WELFARE

You have a personal stake in a working democracy. . Prejudice, through the evils it creates, undermines public health, public safety, religion, the home, business.

There is no magic formula to end intolerance in America. We can start with education, better jobs, better housing, more social freedom, more political freedom. Progress in one field advances others. But our basic, important mission is to guide the potential good will of Americans into channels of working and living together as a nation united.

International Office of Education

REMARKS

OF

HON. EMILY TAFT DOUGLAS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mrs. DOUGLAS of Illinois. Mr. Speaker, I wish to say a word for House Resolution 215, which would establish an international office of education. Such an office should ultimately be included as one of the agencies responsible to the Economic and Social Council which is a part of the Dumbarton Oaks proposals, to be acted upon at San Francisco. I hope that committee hearings on this resolution may begin promptly.

A group of outstanding educators have forcibly reminded us that "the peace of the world cannot be maintained by police power or economic or social arrangements alone. For the success of a world security organization, there must be developed a climate of world opinion which not only wants such institutions and arrangements but also wants them to succeed."

Among the immediate needs will be the rebuilding of the educational system of large sections of Europe, Asia, and the Philippines. Famous universities, libraries, and museums with age-old treasures have been laid waste, while the teachers and leaders of thought have been liquidated in order to uproot the culture of those lands. Not only money, but every type of technical cooperation will be needed to restore some measure of the heritage of these peoples and prevent

their slipping back into the illiterate state to which the Axis had doomed them.

Second, should come the regeneration of Axis youth. Granted that large numbers of these will be immune to new influences, a job must be done with the present school children. Already distinguished Americans have helped liberal Italian educators revise school texts, the "delousing" of young minds as this process has been called. Some years back I collected a set of colorful Fascist texts and every page showed the perversion of education for the purpose of creating obedient Fascists. The German system was an even harsher innoculation with Nazi viruses. The most enlightened thought is needed to reverse this process. With the systematic liquidation of liberal educators in the Axis nations, moreover, help from outside will be needed to promote this work.

Third, work should be done to adjust both the outlook and the skills of the physically handicapped. A pooling of experience and techniques could salvage thousands of otherwise wrecked lives and release their energies for useful purposes. To these who have sacrified most heavily in our common effort, the world owes help.

Among the permanent objectives would be the opportunities for better international understanding through conferences of educators, exchange of students, and, in general, the encouragement of friendly relations among nations, peoples, and cultural groups.

German Horror Camp

REMARKS

OF

HON. EMORY H. PRICE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. PRICE of Florida. Mr. Speaker, for the information of the House I desire to read a letter received from a boy who has just been released from one of these horror camps in Germany:

Mrs. GEO. W. PHILIPS,
Birmingham, Ala.

DEAR MOTHER: I am now at a large camp near —— France, where the Army is building my body back into condition to make a trip home. I know of a thousand things to say and I know that you have a thousand things to ask.

We were liberated on April 2, and I was flown out of Germany in a C-47 on April 7. I am now in a large camp near —— France. We are getting equipped, paid, etc., here.

I am getting the best of treatment. I am back in the hands of the U. S. A. and it's the most wonderful thing that ever happened to me. I brushed my teeth for the first time since December 19, 1944. I changed clothing yesterday for the first time in 103 days. Yesterday I had the first fresh fruit or real food of any kind that I had eaten in nearly 5 months.

The Germans gave us nothing; no toilet articles, no clothing, no diversions—nothing.

We slept on 3-tiered wooden bunks, with a burlap bag filled with straw for a mattress. Our diet was unchanged from day to day. We were given a week tea, with no sugar, for breakfast; one liter of a tasteless potato soup at noon; for supper, on every day except Saturdays and Wednesdays, a slice of black bread, 250 grams. On Saturdays and Wednesdays we received 210 grams of bread. To augment the supper, we had an occasional 30 grams of marmalade. To flavor the bread, we were given 20 grams of margarine, which is about the size of a pat of butter.

The lice were intolerable. Many of the men have ghastly sores from the bites they scratched. I was more fortunate in that I didn't scratch the bites.

It is like being reinstated to life in heaven after being confined to an inferno, to be back in the hands of Uncle Sam. (Will continue on next sheet of V-mail.)

I am completely at ease now; am being given everything I desire to eat, but I have to eat in very small quantities because otherwise my stomach becomes extremely nauseated and I have to toss the food up. I am in a hospital with plenty of nurses and doctors around to see that I do not hurt myself.

Oh, mother, it is all so beautiful, so wonderful, to be free and clean and not hungry again. I can only choke up and stop talking when I try to tell the nurses how grateful I am.

Don't write to me at the present address, because I will not be at this place very long. All that matters is that I'm free and that I'm coming home for a furlough just as soon as I'm in condition. My heart is bursting with thanksgiving every day. I have been given an opportunity to live again in the most glorious land in the world—to go back to the family I love more than life itself; to share my future with my brothers and sisters; to consult a loving, understanding mother and dad when I am in trouble. And I can feel my soul singing inside me over the magnificence of it all.

Your loving son,

GEORGE.

Illinois Legislature for Postal Pay Increase

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. ROWAN. Mr. Speaker, under leave to extend my remarks, I include the following resolution adopted by the house on March 28, 1945, and concurred in by the senate on April 5, 1945, Sixty-fourth General Assembly, State of Illinois:

House Joint Resolution 28

Whereas the postal employees of the United States have not received an increase in base pay for over 20 years; and

Whereas during the present emergency they are receiving a $300 a year bonus (said bonus expires on June 30 of this year); and

Whereas these loyal employees of the Postal Service must have an increase in wages if they are to maintain a normal standard of living: Therefore be it

Resolved by the House of Representatives of the Sixty-fourth General Assembly of the State of Illinois (the Senate concurring herein), That we go on record in favor of H. R. 2071, now before the House Post Office and Post Roads Committee of the United States House of Representatives, which provides for a reclassification of salaries for postal employees; and be it further

Resolved, That a copy of this preamble and resolution be sent to the Honorable Senators LUCAS and BROOKS, to the Illinois Members of the United States House of Representatives, and to the House Post Office and Post Roads Committee.

Adopted by the House March 28, 1945.

HUGH GREEN,
Speaker of the House of Representatives.

FRED W. RUEGG,
Clerk of the House of Representatives.

Concurred in by the Senate April 5, 1945.

HUGH W. CROSS,
President of the Senate.

EDWARD H. ALEXANDER,
Secretary of the Senate.

Juvenile Delinquency

EXTENSION OF REMARKS

OF

HON. GERALD W. LANDIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. LANDIS. Mr. Speaker, juvenile delinquency is a national problem. It is a challenge to every parent and community. This problem may not be eliminated but it can be reduced by all forces in the community working together.

The chief causes of juvenile delinquency can be classed as economic, educational, emotional, and those growing out of faulty home training. We find that the offenders, in most instances often play truant, are antagonistic to their teachers and are violators of the rules of the school. Experts tell us that these delinquents have had very little religious or moral training. Most of them rank two or three grades lower than the normal student. However, many experts in the field of juvenile delinquency are stating that the big problem is adult delinquency rather than juvenile delinquency.

For a good many years, our liberal thinkers, both in the fields of education and religion, as well as political, have been dealing in many social experiments that have been unwise and unfounded. We have been taught during the last 12 years to rely upon social planners and good-doers to guide our children instead of training them in the home. We are not giving them the interest and discipline that our fathers and mothers gave their children.

From the statistics of the Federal Bureau of Investigation we learn that juvenile delinquency is on the increase. It is said that the increase is about 50 percent among girls and about 10 percent among boys. The chief offenses among girls seem to be ungovernability. For the boys it seems to be in the field of larceny and particularly the stealing of automobiles. In the State of Indiana, in the first 2 months of 1945, juveniles were involved in more than 83 percent of the car thefts.

If we study the early history of our Nation and study the criminal careers of the notorious criminals we would find that the outstanding examples of adult crime started in acts of juvenile delinquency.

The crime wave in America cost our people billions of dollars. We can save billions if we solve the problem of juvenile delinquency. It will be necessary to spend more money on education, vocational guidance, physical fitness programs and youth centers to take care of the youth of our communities. The time has come to invest in these programs because they are fundamental to the safety, security, productiveness and welfare of the Nation.

The time has come to pass an act to assist in making adequate provisions, through the public schools, for physical education and vocational guidance among and with the States insofar as the grants-in-aid to the States herein authorized will permit, without the exercise of Federal control over educational policies of States and localities. Each congressional district in the United States shall receive annually $92,000 from the Government to hire physical education and vocational guidance instructors and purchase the necessary materials to carry on the work. An act of this kind will promote national preparedness and the national welfare. It will be a step in the right direction toward eliminating juvenile delinquency. This program is more vital than compulsory military training.

Every child is entitled to the fullest education that he is capable of assimilating, taught by a competent, sympathetic teacher and learning under a curriculum that is broad and flexible enough to meet the scholastic and vocational needs of every student.

Vocational guidance is very important to the young people of America. The schools of America should be responsible for personal adjustments, as well as for the mastery of book learning. Vocational guidance can be made effective with qualified instructors and up-to-date material and equipment.

A complete physical fitness program will provide a system that will bring to the youth of America the opportunity to guard against their health to develop their bodies so they will be able to take their proper place in society.

We need more youth centers to give us means of bettering our community recreational opportunities. These centers must not merely become a place for jitterbuggers but a place that will offer a program to meet the recreational needs of the community.

The teen-agers do not want just a place of recreation but they like to feel that they are a part of the community and its activities. They want a chance to prove their abilities, especially their leadership which will help them to be the builders of their own community and be prosperous citizens of tomorrow.

Lack of health and physical fitness prevails among the youth of our land because our Nation has failed to recognize the importance of these things. America needs a constructive program of action. No one group can change the condition by itself. It will take an all-out concerted effort of all those concerned.

The future of America depends upon the youth of our land. Our youth must be militant, alert, and aggressive. What are you, as an American citizen, going to do about helping our youth get a start in life? What can you do in your community to improve conditions?

Outlook for Freedom

EXTENSION OF REMARKS

OF

HON. RAY J. MADDEN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. MADDEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following excerpts from an address by Paul G. Hoffman, chairman of the Committee for Economic Development, president of the Studebaker Corporation, before the Chamber of Commerce, April 4, 1945, Hammond, Ind.:

We are meeting here tonight in the wake of a succession of military and naval victories of momentous proportions. There can no longer be any vestige of doubt as to ultimate victory over Germany and Japan. When victory will come, no one knows, and we should not forget for one moment that much terribly tough fighting still lies ahead. If we are ever tempted to relax for even a moment in the carrying out of our war assignments, let us remind ourselves that on the last day of the First World War there were 26,000 casualties. We must continue to give unquestioned priority to the war effort, because otherwise precious time might be lost in bringing the war to a victorious conclusion. Nevertheless, somehow or other we must find time to help set the stage for the winning of the peace.

That phrase—winning the peace—conveys varied meanings, but I am confident that whatever else it may mean to us Americans, it also means the maintenance of a free society with the accent on individual freedom. It is only our deep intuitive knowledge that we are fighting for freedom which reconciles us to our vast outpouring of blood and treasure in this war.

As we plan for the future, let us accept freedom in its broad sense as our most priceless heritage and let us determine to give it new and deeper significance. That is the great challenge. If we accept it, let us recognize the responsibilities it imposes on all of us. It is not enough that our Government be so organized as to safeguard and advance individual freedom. Our homes, our schools, our churches, our businesses, and our labor organizations are in a certain sense governments. Each one must contribute toward the strengthening of our freedoms. Each one must provide conditions which encourage the development of the individual. Only by action on all fronts can we push forward the frontiers of freedom. It is a task not for the few, but for the many. It is a task to which you and I must devote ourselves.

Our free society may face a great crisis during the transition from a war to a peacetime economy. If we should be confronted with either mass unemployment or the mass employment of millions by the Government on "made work," the situation would be pregnant with danger. In the first place, the millions out of work suffer a partial loss of freedom as we have defined freedom. That in itself would be a major disaster because our goal must be more and more freedom for more and more people. In the second place, too much unemployent for too long might open the door for the passage of legislative measures calling for unwise expansion of Government controls over business. Government has, of course, the responsibility of exercising whatever supervision is necessary to protect the general public welfare, but if there are too many controls, and the controls are of the wrong character, the exercise of them might lead to a creeping paralysis of our free economy. If our free economy should wither and die and be replaced by State operation, it would not be long before civil rights would be abrogated and religious freedoms put in jeopardly. That was the sequence of events in Italy and Germany, and there is no reason to believe that it would not be followed here.

How many jobs will be needed to provide abundant employment? No one knows exactly; however, there seems to be general agreement among economists and statisticians that an employment level in the immediate postwar period of between fifty-three and fifty-six million civilian jobs, not counting those in the armed services, will be satisfactory. Involved in the reaching of this goal is the creation of from seven to ten million more peacetime jobs than were available in 1940, our last peacetime year.

When will these seven to ten million new jobs be needed? That depends entirely on when we achieve final victory over Japan as well as Germany. However, our plans for providing this greatly expanded employment should be ready to put into action the minute Germany collapes, because the period of greatest crisis may well be that between the fall of Germany and that of Japan. On the day Germany gives up, our domestic economy will be confronted with a high percentage of the problems that total peace will bring. Cutbacks in war production will throw millions of men out of employment and the probabilities are that the armed services will begin releasing men. If we don't have plans ready to get these men back into civilian jobs as quickly as possible, if we are not prepared to deal with the problems of peace when Germany falls, partial peace may bring a partial paralysis of our economy. That would be disastrous, not only from the standpoint of winning the peace but also that of finishing the war with Japan in the shortest possible space of time. Confusion and chaos on the home front would delay the day of ultimate victory; high and sustained civilian morale, based on confidence in the future, will hasten it.

Where will those jobs be found? Employment is found in only two fields—private and public enterprise. In 1940, of the 46,000,000 jobs then available, approximately 43,000,000 were in the field of private enterprise—in commerce, agriculture, manufacturing, the professions, trades, and services. The balance of 3,000,000 was in the field of public enterprise—in regular Government establishments at the Federal, State, and local levels. There will doubtlessly be in the postwar period some expansion above the prewar level of employment in regular governmental services. Useful public works would also supply some of the new jobs needed, but there is unanimous agreement that it is highly desirable that the great bulk of those jobs be found in the field of private employment. Conversely, every businessman will agree that nothing would be more disastrous than to rely on government alone for the expansion in employment which is necessary.

Nothing I have said should be interpreted as opposition to having available jobs on public works. It is unfortunate that we haven't ready now a much larger shelf of projects blueprinted and with financial arrangements made. Too much of the planning for postwar public works is still in the dream stage.

How are jobs created? It is easier to tell how jobs are not created than how they are created. They are not created by speeches about full employment, nor are jobs created in any real sense by adding names to public or private pay rolls. Actually, useful jobs stem only from the production and distribu-

tion of goods and services. Therefore, to get more jobs born we must expand consumption and production.

Involved in an expansion of production—an expansion of private enterprise—are many complex factors, ranging from hard cash to daring imagination. Before output can be increased sufficiently to provide one new job, someone has to have an idea, a plan, capital, the willingness to risk that capital, plus the necessary skill in production or distribution, or both, to translate that plan into a program of action. To create the 7,000,000 to 10,000,000 new peacetime jobs we'll need in the postwar period will require hundreds of thousands of ideas, billions of risk capital, and a vast amount of courage, because these new jobs can be created through an increase in our national output of goods and services to a level 30 percent to 45 percent above that of 1940. Stated in terms of 1943 prices, it means we must achieve a gross output of from $155,000,000,000 to $170,000,000,000.

It is the studied opinion of the Research Committee of the Committee for Economic Development that this goal can be reached—and perhaps exceeded—in the first post-war decade, provided:

1. That America's 2,000,000 employers are ready, when the green light is given for civilian production, with bold, smart plans.

2. That the economic climate is favorable not only to the expansion of present businesses, but also to the starting of a vast number of new businesses quickly. We must attract at least a million new enterprisers who will shift from job-holding to job-giving. One fact we should recognize is that most of these new enterprisers, in fact, most of the expansion of our present enterprisers, must come in the field of distribution. It is the trades and services which hold much of the promise for the attainment of new levels of employment.

3. That we have peace rather than war on the industrial front.

Business, labor, and agriculture each have the right—in fact, the responsibility—to make suggestions and recommendations as to the changes in laws and policies which they believe necessary. Our committee, in considering how it might engage in a constructive activity looking toward the creation of a better economic climate, reached certain conclusions. First of all, we recognized that the only sound approach in the appraisal of policies should be from the standpoint of the general public welfare. We did not subscribe to the idea that what helps business helps you, but rather what helps you and every other American helps business. Our primary concern is over the maintenance of a free dynamic society in the postwar period. If such a society prevails, business and labor both can be assured of their essential freedoms.

Civil war on the home front may nullify the victories won for us by our men on fighting fronts throughout the world. We who are managers of enterprise must go far beyond mere cooperation in trying to work out a harmonious relationship with labor. We must fight for peace. Just within the last few days Mr. Eric Johnston, Philip Murray, and William Green joined in proposing a seven-point charter to govern the successful relationships between management and labor. The charter asserts that (1) increased prosperity involves high production and adequate wages; (2) the rights of private property and free choice of action must continue; (3) the inherent right of management to manage shall be recognized; (4) the fundamental rights of labor to organize and engage in collective bargaining shall be recognized and preserved; (5) the independence and dignity of the individual and the enjoyment of his democratic rights are inherent in the American society; (6) an expanding economy at home will be stimulated by increased foreign trade; and (7) an enduring peace must be secured. In my opinion, this agreement represents a most significant step forward toward a sounder labor-management situation. I suggest that it merits the enthusiastic support of all of us.

Let me summarize, if I may, what I have been saying. First, I have suggested that our most priceless heritage is freedom. I have affirmed that we the people—you and I—have the specific and personal responsibility of contributing as best we can to creating conditions in our homes, our schools, our churches, and our businesses, which will promote freedom. I have defined the condition of freedom as a dynamic one that promotes the growth of the individual physically, intellectually, and spiritually. I have stressed the dangers that might assail our freedoms in the event of mass unemployment and suggested, therefore, the great urgency of maximizing the contribution of business to the achievement of a high level of postwar employment. Again I say that by business I mean all of us—you and me. I have sounded a battle cry for industrial peace. I have urged that in addition to our war effort we must help set the stage for the winning of the peace. Please note that phrase, "Set the stage for the winning of the peace." It is our task to win and hold a beachhead. In the actual battle for the winning of the peace we are going to have the tremendous advantage of having with us as allies the millions of young men who are now engaged in fighting to protect our freedoms. They will supply so much daring, resourcefulness, and inventiveness that I have every confidence that with their help their world can be a better one than we have ever known.

Washington Merry-Go-Round

EXTENSION OF REMARKS

OF

HON. HERBERT J. McGLINCHEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. McGLINCHEY. Mr. Speaker, under leave granted by the House to extend my remarks in the CONGRESSIONAL RECORD, I include a part of an article written by Drew Pearson, which appeared in the Philadelphia Record on Tuesday, April 24. I wish to call attention to the account of the dinner given at the Hotel Statler last week by the National Homebuilders' Association, at which a number of Members of Congress were present, and to congratulate the gentleman from Ohio [Mr. HUBER] on his prompt and courageous denunciation of the indefensible attack on our late beloved President and his wife. I believe the entire membership of the House will join with me in commending his action. The article follows:

LOAN LOBBYISTS

About 35 Congressmen got roped in on an off-the-record dinner at the Hotel Statler last week. They came to have fun, but some of them went away boiling mad.

Their hosts were the National Homebuilders' Association, recently active in lobbying among Congressmen to keep the Government out of the postwar housing picture. Despite failure to provide adequate low-cost housing in the past, many finance companies specializing in home loans are doing their best to block Government operation.

No speeches were scheduled for the Statler dinner, but Senators and Representatives were asked to take a bow. GOP Representative FRANK KEEFE, of Wisconsin, took this occasion to tell how his own banking business planned to issue home loans to veterans, while GOP Representative REID MURRAY, of Wisconsin, urged more bathrooms for farm houses. He said farmers were able to pump water into bathrooms because of Rural Electrification Administration.

Then came the big event of the evening. After all the solons had taken their bows and everyone was in relaxed mood, Lobbyist Daniel A. Loftus, of the National Homebuilders, was introduced as the association's "forensic star." Then only 5 days after Franklin Roosevelt had breathed his last, Loftus launched into a bitter attack on the late President and Mrs. Roosevelt.

"Roosevelt," denounced Loftus, "was a great dreamer who started to socialize things, aided and abetted by his wife, who rushed around with her rubber boots and her little blue roadster—which was a Cadillac."

He followed with a tirade about the "socialistic schemes" of the New Deal and the Communist influence upon the White House. Direct object of his attack, of course, was the National Housing Act.

The good will earlier generated by the lobbyists disappeared. A dozen Congressmen got up and walked out while Loftus was speaking, the attack especially arousing young WALTER HUBER, promising freshman Democratic Congressman from Akron, Ohio.

HUBER got to his feet as soon as Loftus finished and declared:

"It comes with ill grace 2 days after the burial of our great President to make a personal attack upon him and his bereaved widow."

The room became hushed. Nearly everyone present, including Republicans, nodded agreement with HUBER.

"As a neophyte Member of the Public Buildings and Grounds Committee," continued HUBER, "I don't claim to know all there is to know about housing—public or private. But I've heard mention this evening of dreaming and of bathrooms in farm houses.

"As I look about me, I see here many who recently opposed the confirmation of one of the ablest Administrators we have ever had as head of the REA—Aubrey Williams. I'd simply like to point out that without the vision and the dreaming that created REA and a number of other Federal projects since 1932 you gentlemen wouldn't even have the home to build so that you can put bathrooms into them."

The housing-loan lobbyists will have a hard time staging another dinner in the future.

Tribute to Late President by Bishop Sheil

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. ROWAN. Mr. Speaker, under leave to extend my remarks, I include the following memorial address delivered by the Most Reverend Bernard J. Sheil, D. D., auxiliary bishop of Chicago, over radio stations WIND and WBBM on April 14, 1945:

The great friend of the common man is gone.

The defender and protector of the "little people" is dead. He who knew their thoughts and their aspirations, who voiced their hopes and dreams, has laid down his burden and gone to rest. Across his record can be written in lines of burnished gold: "Died in the line of duty."

"For greater love than this hath no man: That he should lay down his life for a friend." And he laid it down with a will, fully conscious of the fact that he had carried forward a little farther mankind's eternal quest for freedom.

"Freedom is not to limit—but to share,
And freedom here—means freedom everywhere."

But his memory shall live on. His brave words and braver deeds will become as shining beacons beckoning onward a tired and flagging humanity. There can never be rest for those of us who hold dear his memory. As he did, so must we do.

We must spend lavishly our coin of life to purchase for our fellowman those ideals he fought and died for. We must pour out, with generous measure, the very breath of existence in an unceasing struggle for the dreams he dreamed, but did not live to see accomplished.

Yes; his memory shall live on. It will spring into being in the smile of a little child yet unborn, who will know a richer, fuller life because he lived.

It will shine in the face of a tired, benumbed laborer, crouched in front of a mammoth machine, overwhelmed by the mechanics of industry, yet conscious of his dignity as a human being because of the goal President Roosevelt had pointed out.

It will burn in the hungry breast of a war-weary European peasant who will again know of hope and faith and charity because these were gifts of which he gave freely.

It will blaze as an unquenchable fire in the minds and hearts of all men, everywhere, who yearn for freedom.

It will gleam in the dark nights of human despair, and men will warm themselves in its glow and return renewed and revitalized to the struggle for human rights.

His memory will stand as a mightly bulwark, an impregnable fortress against those enemies of democracy who would encompass and destroy it. And his name alone will be sufficient to rally freemen to the standard of humanity.

Dry your tears.

Lift up your hearts.

Let not the hours be wasted in unavailing grief.

His work remains to be finished and it needs the willing hands of all those who marched beneath his banner.

He cannot rest in peace while one human being wears the chains of slavery.

He cannot rest if one mouth goes unfed, one body unclothed.

He will not rest if the fires of victory turn into the dead ashes of forgotten promises, broken pledges, and battered hopes.

But he shall rest, aye, and endlessly * * * if the dreams he dreamed become the reality of a bright tomorrow.

He shall rest, and his gallant spirit will at last go winging home if mankind can find in the unity of grief over his death that unity of life to which he dedicated his entire being.

The stage is empty.

The great, brave voice is stilled.

And from the wings the soft-murmured lamentations, eddy and swell.

The people are taking him to his last resting place.

"The long journey" is over.

The tired and strained ship has anchored in the harbor.

And on the shore the watchers stand mute, each man alone.

The people are taking him to his last resting place.

To deep solitudes and quiet moments.

To silent hours and noise-hushed thoughts.

To that small castle in which few may enter.

The people are taking him to his final resting place.

Beat softly drums.

Blow gently bugles.

This moment is sacred.

The people are enshrining him in their hearts.

"Eternal rest grant unto him, O Lord:
"And may perpetual light shine upon him."

Address of Hon. Hugh De Lacy, of Washington

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include a splendid and effective radio speech made over Station WJW, of Cleveland, by the gentleman from Washington [Mr. DE LACY] on April 25, 1945, on a program sponsored by the employees of the Fisher body plant, of Cleveland, Ohio:

Today, April 25, 1945, the peoples of the world, through their chosen representatives, sit down in San Francisco to build a living monument to Franklin Roosevelt.

And fittingly so, for the fervent prayers and ceaseless labors of this great American, conquering death, are still moving mountains of prejudice, bringing all peoples closer together, and guaranteeing to them and their children forever, without distinction of race, nationality, geography, or creed, freedom from age-old oppression, freedom from the horrors of war, freedom to think and speak, freedom to work and live and die in accordance with the teachings of their own consciences and the laws and customs of their own countries.

Labor has strong cause to cherish the memory of our country's greatest President. Taking office in a troubled time, with millions in distress and despair, President Roosevelt, backed by the people's representatives in Congress, wrote into law that working men and women could never again be denied the right to organize into unions of their own choice, provided that the jobless must not starve, began a vast slum clearance and low-rent-housing program, set a limit below which wages may not fall, and established 40 hours of labor as the maximum for a week without payment of overtime rates.

Each time after a terrific fight, President Roosevelt inaugurated a system of social security and old-age pensions, guaranteed the little man's savings, protected his widow against unscrupulous stock manipulators, and changed the outlook of the Supreme Court from the last voice of reaction to a powerful bulwark of the people's liberties and trenchant defender of the right of Congress to pass laws providing greater security and justice and opportunity for the common man.

By these and other fundamental measures, which pass unchallenged today, Roosevelt strengthened the economy and the Government of this country. Giving back to the hearts of millions their faith that democracy can and does work for the people was President Roosevelt's first great blow against the Fascist and Nazi Powers that were then fooling and terrorizing so much of the world.

You men and women who are listening in tonight, builders of bombers and fighters and tanks, makers of the indispensable tools of modern war, fathers and mothers and dear friends of the brave young men who are killing and routing and breaking our enemies in far away lands and seas—you here today have a right to take deep pride in the great part your united strength, marshaled behind President Roosevelt, has played in stiffening freedom's forces here and throughout the world. You have a right to take pride in the skill of your hands and in the magnificent contribution you have made through your unbroken observance and your recent overwhelming reaffirmation of labor's voluntary no-strike pledge.

If on this historic day we pause in our thoughts and hopes of the future to remember the great man who brought us so far forward upon this path, it is because Roosevelt towered high above the spokesmen of division and prejudice and appeasement, because he warned us all against the Nazi menace when Litvinov, of Soviet Russia, was the only other strong voice urging united world action against aggression. We honor our fallen leader today because on the Atlantic, at Casablanca, Quebec, Teheran, and Yalta, more than any other national or world leader, he fought for and won the basic agreement, the unshatterable unity of the United States, Great Britain, and the Soviet Union, which is the source of the devastating military power now crushing our enemies and the foundation for the new world organization which the San Francisco delegations are starting this day to build.

We remember and give thanks for Roosevelt today because the great work he wrought so well he also left in safe, sure, devoted hands. In President Harry S. Truman the people will find another devoted champion; the Nation, another unswerving leader, and the world, another strong American spokesman for liberty, justice, security, and peace.

During his 12 years in the United States Senate Truman supported President Roosevelt's program every step of the way. His legislative record is second to none, whether the measuring stick is labor legislation, social security, the outstanding accomplishments of the Truman committee, pronouncements on foreign policy, appropriations for war, or his courageous vote twice to close debate on the anti-poll-tax bill.

Asked in his first press conference where he stood on the Missouri Valley Authority, public power, and the creation of a permanent Fair Employment Practice Committee, President Truman impatiently replied, "I stand where Senator Harry S. Truman stood in his speeches of last year on the Senate floor."

Only 11 short days ago on the floor of the Congress, addressing a joint session, his first Presidential message, Harry Truman, raised up from a farm in Missouri, solemnly declared—

"Almighty God has seen fit to take from us a great man who loved and was beloved by all humanity. * * * The world knows it has lost a heroic champion of justice and freedom. * * *

"So much blood has already been shed for the ideals which we cherish and for which Franklin Delano Roosevelt lived and died, that we dare not permit even a momentary pause in the hard fight for victory. * * *

"I call upon all Americans to help me keep our Nation united in defense of those ideals. * * *

"I want, in turn, to assure my fellow Americans and all those who love peace and liberty throughout the world that I will

support and defend those ideals with all my strength and with all my heart. That is my duty, and I will not shirk it."

Reiterating America's demand for unconditional surrender, President Truman said, "Having to pay such a heavy price to make complete victory certain, America will never become a party to any plan for partial victory. * * * We will not traffic with the breakers of the peace on the terms of the peace."

"We will face the problems of peace," President Truman said, "with the same courage that we have faced and mastered the problems of war. In the memory of our fallen President, we shall not fail."

"The peace-loving nations," he continued, "must be united in their determination to keep the peace under law. * * * Nothing is more essential to the future peace of the world than continued cooperation of the nations which had to muster the force necessary to defeat the conspiracy of the Fascist powers to dominate the world."

Appealing again to every American, "regardless of party, race, creed, or color," to support the building of a United Nations' organization for world peace, the President said to Congress, "Surely you know how I feel. Only with your help can I hope to complete one of the greatest tasks ever assigned to a public servant. With divine guidance and your help, we will find the new passage to a far better world, a kindly and friendly world, with just and lasting peace."

"Here in America," President Truman reminded Congress, "we have labored long and hard to achieve a social order worthy our great heritage. In our time tremendous progress has been made toward a really democratic way of life. Let me assure the forward-looking people of America that there will be no relaxation in our efforts to improve the lot of the common people. * * *

"On the battlefields we have frequently faced overwhelming odds—and won. At home, Americans will not be less resolute."

Friends, our most fitting salute to the historic labors begun this day at San Francisco is to serve notice on our enemies that this great Nation stands united as never before, behind the work and ideals which Franklin Roosevelt has left for completion to the strong and devoted hands of President Truman.

Under his leadership and with the help and unwavering support of all of us, America will go forward. We will crush the military power of Japan and Germany forever. We will take our rightful part in the organized councils of world peace. Adopting the reciprocal trade and Bretton Woods' agreements, as requested by President Truman, we will find markets abroad for otherwise excess plant capacity to the lasting benefit of ourselves and of the peoples of other lands.

We will fight and win the battle of jobs for all—for war workers and veterans, for black and white, for men and women, without discrimination. Standing together, we will win the fight to bring the best medical care within the reach of everyone, to set up a uniform system of federally guaranteed unemployment compensation and increased old-age benefits. Standing together, we can ensure a high and steady volume of purchasing power in America's vast home market by guaranteeing a minimum annual return to every worker and farmer.

Standing together against tyranny, standing together for peace and democratic progress, standing together as Roosevelt taught the peoples and the nations of the earth to stand, thousands gathered here today and millions throughout America and the world turn toward San Francisco, knowing what we want and confident that this time no power is left on earth strong enough to stop our forward march.

The Polish Problem

EXTENSION OF REMARKS

OF

HON. THAD F. WASIELEWSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. WASIELEWSKI. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Post of April 26, 1945:

FIRM AND FRIENDLY

Discussion of the Polish problem has been transferred to San Francisco, where the British, Russian and American Foreign Secretaries are still seeking agreement. Current indications are, however, that the deadlock can be broken only in Moscow. President Truman did not yield to the appeal of the Soviet Foreign Commissar, V. M. Molotov, for representation of the existing made-in-Moscow Polish Government when the two met at the White House. He stood firm on the American-British policy of refusing to invite a Polish delegation to the United Nations Conference until the Government at Warsaw has been revamped into a genuine government of national unity.

The White House announcement about the conference between the President and Foreign Commissar Molotov was very brief. It made clear that conversations would continue at San Francisco after Mr. Molotov has had an opportunity "to consult with his Government." That is a pretty clear indication that President Truman was putting it up to the Russians to comply with the Yalta Agreement. We think that he was right in doing so. Undoubtedly, his continued rejection of the Russian appeal was friendly and expressed with the greatest good will, but also with commendable firmness. That is an attitude which the Russians will both understand and respect.

Our Government is in a specially advantageous position to stand firm in this matter because our troops in Germany are holding to the lines of occupation agreed upon by the Big Three. They could have moved into Berlin. They have refrained from doing so in deference to our understanding with the Russians. Similar compliance with the Yalta formula as to Poland can now be required in the spirit of reciprocal respect for international commitments. Every effort to reach an agreement within the principles laid down at Yalta will doubtless be made. But the abandonment of those principles would not be in the interest of Poland or of good international relations. We think that the people of the United States will overwhelmingly uphold the President in standing firm on this vital issue.

Will the Order Closing the Gold Mines Be Lifted on VE-Day?

EXTENSION OF REMARKS

OF

HON. CLAIR ENGLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. ENGLE of California. Mr. Speaker, for almost 3 years the gold mines of this country have been closed down as nonessential to the war effort, while the mines in other countries, some of them desperately involved in this war, have continued full blast.

No industry in this country has suffered under a similar order to that inflicted upon the gold-mining industry. Other industries closed down by the war have been able to translate their capital and equipment into other lines of production, but no such steps have been possible for the gold miners. As a consequence, the gold mining operators have had to stand idly by and watch their mines fill up with water, the tunnels cave in, and many gold-mining properties representing lifetimes of investment and work of these people have been totally sacrificed and lost to them. Others have spent thousands and thousands of dollars trying to keep their mines timbered up and trying to keep the water out of their mines in order to save their lifetime investments against the day when they would be permitted to again operate. All of this—the payment of maintenance, taxes, and other expenses—has been borne by the miners alone without Government assistance, but the mortality rate among the gold-mining operations has been heavy.

We have therefore looked forward with extreme anxiety to the day when gold mining could be resumed. When reconversion was first talked of last summer and fall, the WPB was contacted in regard to the resumption of gold mining and we were given a definite assurance by Mr. Krug that the WPB planned the lifting of the ban on gold mining at the end of the hostilities in Europe.

Recently a committee has been set up known as the Committee on Period One, for the purpose of determining which orders should be lifted on VE-day. Among these—and there are 300 or 400 altogether—is Order L-208, closing the gold mines. The list is currently being circulated among the various Government departments for their comment. I understand that the WPB and the War Manpower Commission have both recommended against lifting the order closing the gold mines.

This adverse recommendation is based upon the proposition that there is a critical need of lead, copper, and zinc for war production and it is claimed that permitting the resumption of gold mining may draw men out of the lead mines, in particular in Arizona, Colorado, Idaho, and Utah. My information is that this is not true and that the lead operators in those four States themselves have stated that they will not lose any manpower by reason of a lifting of the gold-mining ban.

There is a limit to the sacrifice which the gold-mining people should be requested to make on one pretext or another by the WPB and other agencies. No industry has suffered such extensive loss as the gold-mining industry and simple justice demands that this outrageous order, which was never justified in the first place, should be repealed. I call this matter to the attention of my colleagues in the House—those representing gold-producing areas and those in particular of the four States of Arizona,

Colorado, Idaho, and Utah—and ask that you all join in in demanding immediate justice for the gold-mining industry of this country.

The Principles and a Pattern for the Peace

EXTENSION OF REMARKS

OF

HON. A. L. MILLER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. MILLER of Nebraska. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include an article by the Honorable Robert G. Simmons, chief justice, Supreme Court of Nebraska, on the principles and a pattern for the peace.

The Honorable Robert G. Simmons served as a Member of this House for a number of terms.

Mr. Speaker, the article by the chief justice of Nebraska was written several months ago but it points out very clearly some of the roads we must travel if we are to forge the instruments or even draw the blueprints which will establish a permanent and durable peace:

[From the American Bar Association Journal of April 1945]

THE PRINCIPLES AND A PATTERN FOR THE PEACE

(By Hon. Robert G. Simmons, chief justice, Supreme Court of Nebraska)

Now and then judges, in deciding cases, become wearied by the effort to distinguish the differences in the details of legal opinions. Occasionally, and perhaps too seldom, they turn to fundamental proven principles of the law and on that foundation build a sure and just decision. Why not do that on the problems of the peace?

The American people are now confronted with the question of whether liberty and world peace can be assured under law. In our own country we have witnessed the settlement of disputes by an established system of justice according to law. These disputes go the full way from family quarrels to controversies between States and even with the National Government itself. They go to liberty, to property, and to all the rights of men, including their right to think, to speak, to live, and to worship. Trial by battle has been outlawed long since and only resorted to in diminishing cases, where the use of arms is necessary to enforce the judgment of our organized society. We have proved, as indeed have all civilized nations, that within our own borders it is not necessary to go to war to settle disputes.

It is obvious that some organization to attempt to insure peace will be set up after the close of this war. We are generally agreed on the objective. We seek the principles and the pattern by which such a system may be established among nations. Those in high places, who speak for us, are now working on that problem, and have suggested the principles and lately a method.

In World War No. 1 we had President Wilson's Fourteen Points. The historians and the statesmen still debate their meaning. This war, so far as our Nation is concerned, was preceded by the historic meeting of our President and England's Prime Minister, from which came the Atlantic Charter. There have followed the President's "four freedoms," the declaration of the United Nations, the declaration issued from the Moscow Conference and Tehran, and others. We now have the result of the labors at Dumbarton Oaks.

Disagreement, confusion, and debate, too often of detail, have followed each of these pronouncements.

Any peace that is to be permanent and any organization that is to be acceptable must be founded on moral and spiritual principles that are understood by and acceptable to the peoples of the world. It must be a workable plan. It is to be remembered that, while officials of government may propose, the effective result will depend upon the final willingness of the peoples affected to make the sustained sacrifices and give the support that will insure vitality and power to such an organization.

PRINCIPLES FOUND IN THE AGE-OLD SPIRITUAL FAITH

Let us then go to proven principles and a known, tried pattern—principles that are age-old, a pattern that has proved successful in this Republic.

The principles upon which this Republic is based are three. They are stated in our declaration. They bear repeating. Men have unalienable rights which governments must respect and protect—these rights are stated in the bill of rights of our Constitution. Men are created equal. Governments derive their just powers from the consent of the governed.

Those principles have a spiritual foundation. Their source is in the belief of men in the fatherhood of God and the brotherhood of men. If you seek proof of this, study the influence of the churches, of churchmen as pastors, teachers, and public leaders during that time. Study also the dominant place of the schools conducted by the churches in the then educational system. That belief and that alone was the unifying faith that brought and held the colonists together. We built this great Nation, and based our entire system of jurisprudence upon that faith and those principles. For over a century and a half in America we, as a free people, have moved in accord with them. Admittedly we, as humans are wont to do, have failed to achieve the full realization of those ideals, but we have built upon that foundation, and we have had those ideals to inspire and to guide.

We in America do not have a monopoly upon that faith. The people of the Allied Nations do not have a monopoly upon that faith. Multiplied millions of peoples now ruled by the Axis Powers have that faith also. It is the one fundamental ideal common to the peoples of every race and every nation.

But it may be said that we in America have succeeded in building and maintaining a Government based upon those principles because we are a united people. Let's examine the situation that existed when we adopted our constitutional system and started it in operation. For it is to that then, not to the now, that we must go to make the comparison.

THE PATTERN IN OUR FEDERAL SYSTEM

We were then 13, largely independent States, but recently colonies of England. We had 13 separate and in some respects conflicting systems of government. We were a people of many racial ancestries, but recently removed from the mother countries. There were among us colonies of men and women from practically every nation and race of the Old World, with different group spredominating in some of the States. These peoples collectively and individually had a pride in their race, their cultures, their old-country methods and traditions. We were of many races, not one race, at that time. Whatever merging into a people of one race then taking place was toward a State loyalty and a State citizenship. The national conception was not then predominant.

We were also a people of many creeds with different religious organizations dominant in certain of the States. For instance, there was the Church of England in Virginia, the Catholic Church in Maryland, the Quakers in Pennsylvania, the Congregationalists and Puritans in the New England and Northern States. We, as a people, worshiped at many altars.

The States were not of equal strength and population. There were the powerful States of Virginia, Pennsylvania, and New York, and others so sparsely populated that at least four of them did not have any city with a population of 5,000 within their borders.

Some of the States had spent large sums in the prosecution of the war and were in serious financial difficulties—others had not and were not.

Some of the States had as their only industry a primitive agriculture. Others had become commercial centers, had developed some manufacturing, and a not inconsiderable maritime business.

Physically close together, they, because of slow communications and means of travel, were far removed from each other. Other differences need not now be mentioned.

The weak States feared the strong, the strong were not too willing to undertake to carry the burdens of those less favorably situated. There were jealousies and antagonisms between States. They were tired when the Revolution ended, just as the people of this and other nations will be tired when this World War comes to a close. But they had their ideals, the three mentioned, that were common to all. They realized that something had to be done to assure peace, liberty, the well-being of all. The thirteen States sat down together, reconciled their differences, gave and took, drafted our constitutional system and builded our Government.

CONSTITUTIONAL GOVERNMENT WAS RESULT OF WORK, EFFORT, AND SACRIFICE

Three further facts are to be remembered in comparing our then with the world's now. The Colonies first attempted to tie themselves together by the Articles of Confederation. They did not confer a power to enforce decisions. Congress became a debating society. The system fell apart as the result of its own infirmities. Second: There was a waiting period between the close of the war and the drafting and adopting of the Constitution, during which men reasoned together. Third: Constitutional Government did not become an established fact when that instrument was adopted by the States. It came only as the result of years of work, effort, and sacrifice guided by a faith and a will to make it succeed. But it came.

If 13 States could do it then, why cannot 13 nations, or 26, or 50, do it now? Superimpose the problems of the nations now upon the problems of the States then, and we find many that were common and few that were different. Our perplexities are no more difficult to us now than theirs were to them then. They solved them by building around a common spiritual faith.

Should not this Nation frankly and simply declare that we fight that the unalienable rights of men will be preserved, protected and respected by governments on this earth; that the truth of the fatherhood of God and the brotherhood of man will control in man's relation with his government and his fellows; and that for all peoples there will be established governments that exist by the consent of the governed? Should we not declare that these truths will become the fabric of the treaty and will control in the writing of the peace? Should we not pledge our Government honestly and courageously to advance these ideals among governments when the readjustments and the rebuildings come that will follow this war? Should we not declare that they will be maintained in the years ahead? We will then be declaring purposes that express the ideals and hopes

of men of every race and creed—ideals that they understand and will support. If that is done, we may look forward to a lasting peace and real progress in self-government among men.

Should we not, can we not, now go to those same basic principles of the rights of men and of governments and, on our constitutional pattern, build the organization that will give the world the blessings that our system has given to us? It is a method that has been tried and proved. It is founded on the solid rock of the religious faith of men. Our ancestors, coming from many nations, made it succeed. Cannot their descendants in the many nations do likewise? I submit it is worthy of a trial.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter and resolution:

BALTIMORE ASSOCIATION OF COMMERCE,
Baltimore, Md., April 21, 1945.

Hon. THOMAS D'ALESANDRO, Jr.,
House of Representatives,
Washington, D. C.

DEAR MR. D'ALESANDRO: The board of directors of the Baltimore Association of Commerce, at its meeting on April 19, unanimously adopted a resolution recording its deep sorrow at the untimely death on April 12 of our late President Franklin D. Roosevelt, and pledging its wholehearted support and cooperation to President Harry S. Truman in the vital and difficult tasks which lie before him.

I am pleased to transmit to you herewith for your information copy of this resolution.

Very truly yours,

W. G. EWALD, *Secretary.*

Resolution by the Board of Directors of the Baltimore Association of Commerce, April 19, 1945

On behalf of the business and industrial community of Baltimore, the board of directors of the Baltimore Association of Commerce records its deep sorrow at the untimely death on April 12, 1945, of President Franklin Delano Roosevelt, and wishes to convey this expression to the family of the President and to his associates in government.

Throughout a lifetime devoted to the common good, Franklin Delano Roosevelt labored unceasingly for the welfare of his country and of the entire world. In a time of crisis and despair his was the vision and faith to lead us not only to victory but beyond to lay the foundation for a just and lasting peace based on good will and a better understanding among men and nations. Only future generations who profit by his labors will realize his true stature.

To the new President of the United States, Harry S. Truman, we wholeheartedly pledge the support and cooperation of Baltimore business in the vital and difficult tasks which lie before him. As he assumes the heavy responsibilities of his office, the managements of the commercial and industrial establishments of this community desire him to know they are ready to meet whatever calls may be made upon them in the attainment of final victory and in the solution of the grave peacetime problems which will follow.

Exemplary Debate

EXTENSION OF REMARKS

OF

HON. WALT HORAN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. HORAN. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I am pleased to include an editorial from this morning's Washington Post commenting on the debate held last Monday between Mr. LAFOLLETTE and Mr. HAYS.

I think this comment is timely and of much interest.

EXEMPLARY DEBATE

In their debate Monday on the proposed Fair Employment Practice Commission, Congressmen LAFOLLETTE and HAYS did credit to the best traditions of the House of Representatives. More important still, they demostrated to the House that even this emotion-charged issue can be debated with temperance, dignity, and a mutual acknowledgment of good faith. It is a pity that during much of the debate less than a quorum of the House was in attendance.

The procedure was unusual in that the two men dealt with a piece of legislation on which a rule governing debate has not yet been granted by the Rules Committee. The debate was, therefore, in a sense entirely unofficial. Mr. LAFOLLETTE, one of the sponsors of a permanent FEPC, and Mr. HAYS, a declared opponent of the proposal, simply agreed with one another to present arguments on the issue, pro and con, and secured from their colleagues two special orders to proceed. They divided their time with careful equity, each affording the other an opportunity for rebuttal. By way of sticking to the central issue, both gentlemen sensibly declined to yield for interruptions which might have stirred up the acrimony customarily associated with this particular issue.

"The points on which we agree," observed Representative HAYS, "are as important as those on which we differ. We both believe in the democratic process and we have taken this means of presenting our views with the feeling that perhaps it might tend to clarify the issues. We both believe that we must do everything that men in positions of political responsibility can do to preserve the democratic means of settling differences between groups, not only between races, but between groups of different religious views." The spirit of this approach, which Mr. LAFOLLETTE manifested equally, is certainly much more conducive to a fruitful settlement than abuse of the motives of opponents. Let us hope that Congress as a whole will follow the good example.

Photograph of Mount Suribachi, Iwo Jima

EXTENSION OF REMARKS

OF

HON. W. STERLING COLE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. COLE of New York. Mr. Speaker, on April 21, I wrote to the President and the Secretary of the Navy, calling upon them to take whatever steps might be necessary to acquire in the name of the United States Government all proprietary rights in the famous photograph which depicted raising the American flag on Mount Suribachi, Iwo Jima, by the United States marines. This recommendation was based upon a complaint from a constituent against being required to pay a fee for the use of the photograph in connection with the forthcoming War bond drive. On yesterday, I received a letter from Kent Cooper, executive director of the Associated Press, together with copies of certain correspondence which discloses that all proceeds derived from the sale of copies of this photograph or reproduction rights are to be donated by the Associated Press to the Navy Relief Society on behalf of the Marine Corps.

Such action by the Associated Press is most highly commendable and entirely in keeping with the fine traditions of that organization, and I take this opportunity to compliment them for it. With the belief that Members of the Congress and the public are interested in learning of this fact, I am assuming the liberty of including in my remarks copies of the correspondence which I have received, even though the Associated Press made no effort to capitalize upon this indication of its fine public spirit:

THE ASSOCIATED PRESS,
New York, N. Y., April 24, 1945.

The Honorable W. STERLING COLE,
The House of Representatives,
Washington, D. C.

DEAR MR. COLE: In a quotation of your statement to Congress that I have read you apparently, but I hope unintentionally, reflected the idea that the Associated Press has been selling the Suribachi flag picture for profit.

I enclose a copy of a letter that I wrote on April 12 to Secretary Forrestal, a copy of his reply dated April 14, and a copy of his acknowledgement of the first check.

I have been so anxious for the Associated Press not to appear to seek acclaim for this action that I would never have thought of giving any statement out about it except for your statement in Congress. I felt I had to refute the insinuation.

Under the circumstances, perhaps you'll want to make a statement by way of correction, with this correspondence before you.

Sincerely yours,

K. C.

APRIL 12, 1945.

The Honorable JAMES FORRESTAL,
Secretary of the Navy,
Washington, D. C.

DEAR MR. SECRETARY: You are acquainted with the remarkable photograph that Joe Rosenthal, a staff photographer of the Associated Press, took on Mount Suribachi. I was gratified at your commendation respecting it.

As would be expected, the photograph has had unusually wide publication. As a result, requests for copies of the picture and the rights to reproduce it were received from every part of the United States. These requests came from the mothers of boys in the service, historical, civic, educational, and business organizations. Among them was one from the Treasury Department, which desired to use the picture in connection with the forthcoming Seventh War Loan drive.

Recognizing the value of the picture for morale, the Associated Press has made it available to all those who agreed to make

proper and fitting use of it, but not for advertising. The charges made have been nominal, and the Associated Press has borne the expenses of reproduction. This has been with the idea that whatever income is received by the Associated Press in connection with the photograph will be donated to the Navy Relief Society on behalf of the Marine Corps. The gross amount received will be sent, the Associated Press witholding nothing because of the cost of reproduction and mailing. The Marine Corps is mentioned because all of the men but one in the picture are marines, and that one was a Navy corpsman.

I write to you first to ask whether you will accept the fund for the purpose indicated, and second, that upon General Vandegrift's return to the country you will acquaint him with this correspondence.

Perhaps, too, I should assure you that the Associated Press has no intention of making any public announcement about this in order to seek acclaim for itself. It is just that I want to be sure that I am proceeding in the right manner by addressing you.

Awaiting your further advice, I am

Sincerely yours,

KENT COOPER.

THE SECRETARY OF THE NAVY,
Washington, April 14, 1945.

Mr. KENT COOPER,
New York, N. Y.

DEAR MR. COOPER: As Secretary of the Navy and honorary vice president of the Navy Relief Society, I shall be pleased to accept for the society the donation tendered by the Associated Press, in your letter of April 12, on behalf of the Marine Corps.

The Navy Relief Society renders aid in time of need to officers and enlisted personnel of the Navy and Marine Corps and their dependents, without regard to rank or rating. I shall inform General Vandegrift with respect to this correspondence.

I am requested by the board of managers of the society to express its appreciation of this generosity of the Associated Press.

May I also add my personal thanks for your thoughtfulness.

Sincerely,

JAMES FORRESTAL.

THE SECRETARY OF THE NAVY,
Washington, April 20, 1945.

KENT COOPER, Esq.,
Executive Director,
The Associated Press,
New York, N. Y.

MY DEAR MR. COOPER: Thank you, on behalf of the families helped by the Navy Relief, for your check covering the receipts from sales of Joe Rosenthal's picture. I look forward to receiving the two lithographs but I appreciate even more the reason that you give for sending them.

Sincerely yours,

JAMES FORRESTAL.

Pay of Postal Employees

EXTENSION OF REMARKS

OF

HON. ROBERT J. CORBETT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. CORBETT. Mr. Speaker, it is a vital matter that I wish to discuss with you today; a matter that is very much your business and your concern. I sincerely hope, therefore, that we may have 10 or 12 minutes of your time to consider the welfare of a large group of our citizens who daily serve us.

Specifically, I want to tell you about your postmen and all those allied with them in their work. I want you to know more about the services they are performing in these difficult times and the compensation they are receiving for their work.

Those of us who have loved ones far away, or who anxiously await business decisions, know well the thrill of pleasure when the postman brings the mail. We also know something of the vast network of rail, air, and motor transports that move the mail from place to place and the thousands of persons who must sort and handle the mail so that it will reach you swiftly and surely.

The miracle of our Postal Service has been taken for granted for a century. Perhaps most of us have even been thoughtless of its efficiency as we drop a letter or deposit a large package destined to go thousands of miles at a cost so moderate that it is not considered. But it all does not just happen after you drop your letter in the slot. Decades of scientific planning, years and years of training and experience, and thousands of inventions all blend together to give you the certain confidence that your message will reach the designated person wherever in the world he may be. Whether there be blizzards, rain, desert heat, city sidewalks, muddy roads, or pleasant weather your letter moves until it reaches waiting hands.

If the Postal Service broke down for 1 week—yes; even for 1 day—almost every adult and most of our older children would cry or complain. The Postal Service is such an integral part of our business and our family life, it means so much to separated loved ones, to the maintenance of friendships, and the dissemination of knowledge, that without it life in these United States would simply not be the same.

Therefore, I am most anxious that you consider with me today the welfare of your employees who make this miraculous service possible. I say your employees correctly, because you and I as citizens of this country are the employers of everyone connected with the post offices and the Postal Service from the postmaster of the great New York office to the substitute carrier in "Crossroads," Nev. Through our Representatives in Congress we fix their salaries, pensions, vacations, and working conditions. They cannot secure a general raise or reclassification without an act of Congress, and Congress cannot act permanently and decisively without the support of public opinion.

Now what are the hard financial facts about our Postal Service and the compensation of our postal employees? As you listen to these facts you are apt to be quite amazed and perhaps a bit ashamed.

To begin with there has been no basic pay raise, reclassification, or regrading of postal employees for 20 long years. Since 1925 through the boom years, the depression, and the war inflation postal salaries and the possibility of promotion have remained frozen except for a 27 percent economy cut during the depth of the depression and a makeshift flat temporary raise after our entrance into World War No. 2.

Please note this specific situation. If one of our returning veterans enters the Postal Service as a clerk at the age of 19 he will earn $1,700 a year. Each year thereafter that he serves meritoriously he can secure a raise of $100 per year until he reaches the maximum of $2,100 per year. Then he will be 24 years of age with no hope of further advancement unless he can get into some other classification. That is a typical, not an exceptional, example.

But before we deal with other specific points let us look at the general picture some more. Your Post Office Department employed 275,000 persons in 1935; today it employs 375,000. This is a 10-year increase of only 36 percent. In 1935 approximately twenty-two and one-third billion pieces of mail were handled in contrast to the estimated 37,000,000,000 pieces in 1945—an increase of 65 percent.

In 1935 postal revenues totaled $631,000,000; in 1945 they will total $1,300,000,000 for an increase of 100 percent. In 1935 the Post Office Department showed its usual annual deficit. That year it was $70,000,000. This year, believe it or not, the estimated surplus will be $117,500,000, and that leaves out of consideration $137,400,000 worth of free mail and $91,300,000 worth of military mail. The Post Office Department has definitely come out of the red. And all of this increased business has been handled with customary efficiency despite the absence on military leave of 50,000 postal employees.

Here are some other interesting facts, some minor, some major. Annuity deductions have been increased from 3 percent to 5 percent. Recent rate raises did not benefit the postal employees in any way.

Letter carriers are paid from postal receipts, not from general taxes. Postal employees are not exempt from any taxes. The Government does not furnish the mailman a uniform. The Post Office Department only sanctions overtime in the event of emergencies. Postal employees receive 18 cents an hour less for overtime than for regular time.

Obviously all of this adds up to a bad situation. We cannot hope to keep our postal service efficient on this basis. It is amazing that the workers' morale has stood the shock of rising costs of living as well as it has. It is not surprising, however, that capable men are not being attracted to the Service and that well-trained employees are slipping away. The long-deferred hope that their good efforts would be recognized and rewarded has kept most of the postal employees loyal and persevering, but the hope cannot be longer deferred without long-time serious consequences.

What should be done about it? Again the answer is obvious. The basic pay of

all postal employees should be promptly raised. Existing inequalities and injustices should be removed in every possible instance. And the longevity principle of better pay for better continuous service should be more generously applied.

The House Post Office Committee is fully cognizant of the need and desirability of such a speedy remedy. The committee has concluded hearings and has reported out with unanimous approval H. R. 3035, introduced by its chairman, the gentleman from Virginia [Mr. BURCH]. This bill in general does everything that the situation demands. It, of course, does not correct all inequalities, and it does not go far enough to suit all groups of employees.

Many amendments will be considered, and some may be adopted, but in the main the bill does provide the basic raise, the reclassification, and the broadening of the longevity principle which has been awaited for 20 years by anxious employees and their families.

I urge you, therefore, to put your active support behind the bill. Let your congressional Representative and Senators know that you favor adequate compensation for your postal employees. Let them know that you want your good Postal Service to continue to improve.

Let them know that postal employees should not have to suffer a decreasing standard of living just because they cannot utilize the means available to other working groups. There are several groups in our economic life who have been abused and neglected, but few, if any, have been more forgotten than the postal employees.

Personally, I want to go on record as pledging my vote to the passage of H. R. 3035 and as a member of the Post Office Committee of the House of Representatives I will support every reasonable amendment designed to properly compensate as fine a group of employees as we have in our public service. And I urge everyone do the same. Talk to your neighbor on the bus, or street car, or in your automobile pool about this bill. You and they as the users and employers of the postal employees should take a positive stand for or against H. R. 3035. If you are against pay raises and merit promotions for postal employees, they should know it and your Representatives in Congress should know it. If you are for the bill, you should tell everyone concerned how you stand.

I am confident when you weigh the facts and figures and when you remember that the cost of this bill can be largely or wholly paid for out of surplus earnings, that you will be glad to help correct an injustice that has been allowed, in my judgment, to exist too long. If you and I really get behind this bill with enthusiasm and vigor, it will be passed on time and when we next greet our mailman at the door or the clerk at the post-office window, we can greet him with an honest, wholehearted smile. We will have done our part to reward our loyal servants for a job well done.

Veterans' Benefits

EXTENSION OF REMARKS
OF
HON. GEORGE W. GILLIE
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. GILLIE. Mr. Speaker, I know that all Members of Congress are eager to remedy any legislative difficulties involved in the administration of the so-called G. I. bill of rights in order that veterans may readily obtain the benefits Congress intended they should receive. With this thought in mind, I am glad to call to the attention of the Congress the following resolution of the Fort Wayne Board of Realtors which calls for study and amendment of the G. I. bill so as to insure our veterans receiving the benefits Congress provided:

Whereas the Servicemen's Readjustment Act of 1944, commonly known as the G. I. bill of rights, contains certain provisions for loans guaranteed by the United States for the purpose of purchasing, building, or repairing homes; the purchasing of land, buildings, farm equipment, and livestock; the purchasing of business, land, buildings, machinery, and tools, the guaranty not to exceed $2,000; and

Whereas the Veterans' Administration has final determination as to the probability of success and the loan risk; and

Whereas it has become apparent that the method of handling loan applications is complicated and the processing of loans involved in red tape which renders processing very slow; and

Whereas it is apparently becoming quite evident from actual experiences of many banks and other lending agencies that the act and its regulations as written do not permit the full accomplishment of its intended purposes by any organization or agency; and

Whereas the returning veteran applicants for loans are inclined to charge responsibility for denial of loans to the bank through which applications are made even though responsibility for denial rests upon the regulations contained in the act and upon Government agencies and not upon the banks; and

Whereas the banks of Fort Wayne, and the Fort Wayne Board of Realtors desire to render every available service to returning veterans in order that they may be assured the rights which the Congress intended they should enjoy as a reward for a very distinguished and sacrificial service to their country in the armed forces: Now, therefore, be it

Resolved by the Fort Wayne Board of Realtors of Fort Wayne, Ind.:

1. That the United States Veterans' Administration establish a plan of passing upon applications for veterans' loans shorn of red tape and complicated procedure in order that qualified veterans may qualify for loans promptly and with as simple procedure as can be evolved.

2. That when a loan is denied by the Veterans' Administration or on appraisal of the Federal Housing Administration or any other governmental agency, the agency denying such loan be required to certify its denial directly to the veteran making the application and to state its reason for such denial, rather than to leave the impression with the veteran applicant that the bank is responsible for denial of such loan.

3. That every necessary procedure be taken to make the loan features of the G. I. bill practical and workable consistent with reasonable protection for the returning veteran by every Government agency chargeable with administration of the provisions of the law and that the bill itself and its regulations be carefully studied and so amended as to make it genuinely workable and beneficial; be it further

Resolved, That a copy of this resolution be forwarded to the Senators from Indiana, Congressman GILLIE, the Realtors' Washington Committee, and the press in Fort Wayne.

Legs Don't Make the Man

EXTENSION OF REMARKS
OF
HON. THAD F. WASIELEWSKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. WASIELEWSKI. Mr. Speaker, in the course of this war thousands of our men will be maimed. Thousands will return home minus a limb or limbs. The rehabilitation of these men, the instilling of hope, courage, and the will to carry on is undoubtedly going to be one of the most difficult tasks in the post-war era.

Our late President better than any man in modern times demonstrated that a man can conquer his affliction and render great public service in the highest office of the land, and serve with higher than average distinction.

The exploits of the English flyer, Wing Commander Douglas Bader, who lost both of his legs in a flying accident, have come to public attention when he was released recently from a German prison camp. The record of this resourceful and distinguished aviator should serve as encouragement to men similarly situated. His example of courage, tenacity, and performance should be emulated not only by men who may have suffered loss of limb but by all.

The following is tribute paid to Wing Commander Bader by the Christian Science Monitor in an editorial appearing April 20, 1945, entitled "Legs Don't Make the Man":

LEGS DON'T MAKE THE MAN

All those strong words of the heart—mettle, pluck, courage, fortitude—come rushing to the mind as one reads the epic story of Wing Commander Douglas Bader of the R. A. F. Now that this extraordinary figure, a fighter pilot without legs, has been freed by the Americans in Germany, one is tempted to cheer.

Douglas Bader lost his legs in a flying accident in 1931. But that didn't stop him. When the war broke out, he pestered the military authorities until they gave him his chance—and he justified their judgment by becoming an ace, with 22 enemy planes to his credit before he was shot down in 1941. His coolness in unstrapping one leg by which he was trapped and bailing out must have been admired by even his German captors. They dropped a message to the British about Bader's need, and the British dropped him

another leg. Four times Bader escaped from prison camp—until the Germans finally separated him from his legs at night.

If Bader could fly without legs and keep on running away from prison, a lot of fellows who have had encounters with land mines and artillery can certainly learn to do thousands of simpler jobs. The heroic example of this dauntless, legless ace is of uncommon value at this time.

The British Navy has a word for Bader—in fact, it named a battleship for him years ago: Indomitable.

Praise Is Rare for G. I. Heroes

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following article by Mr. Lester Allen, which appeared in the Boston (Mass.) Post of April 22, 1945:

PRAISE IS RARE FOR G. I. HEROES—BUT, DECORATED OR NOT, GENERALS AND ADMIRALS KNOW IT IS THESE MEN WHO ARE MAKING HISTORY

(By Lester Allen)

Every fighting man in the ranks dreams at some time of performing some heroic deed and thereupon having admirals or generals crowd around to offer personal praise and commendation.

But, the reality is altogether different from the dream, and, although thousands of decorations have been handed out since we went to war, it is rarely that a general or admiral gets around to extending his personal slap on the back to a man under his command.

In fact, it seems that the admirals and generals receive most of the high honors and promotions, while the kids who are in there doing the pitching flash only for an instant from the anonymity of the mass of men, and then sink back into obscurity again.

FLASH FOR INSTANT

The names of Eisenhower, MacArthur, Nimitz, Halsey, Spruance, Mitscher, Patton, Hodges, Bradley, Patch, and a dozen other top commanders on land and sea and in the air are household words—and their deeds are too well known to require a review, but the millions of lesser fighting men, who have flashed out of the mass in one blazing moment of supreme courage, never seem to become more than a momentary sensation.

No group of men is more concerned about this fact than the top commanders themselves. They fret about this fact constantly and do everything they can to get across to the men under them that they, more than anyone else, appreciate what the obscure man has done.

The soldier, sailor, or marine may grouse that his blood and his courage are expended to make a great name and a great reputation for his top commander, who may never have to take one-tenth the risk that he takes.

And, basically, this is so, but there is very little the top commander can do about it because of the way modern warfare is organized. Generals and admirals do not go into battle waving swords and cheering their men on, except in rare exceptions.

It is the exceptions that demonstrate how the top commanders feel about this vital matter. General Patton swims a river to show his men it can be done. Maj. Gen. Maurice Rose, commander of a crack tank division, is killed after being captured by a German patrol while up among the forward elements of his division.

No one knows better than the generals that if all the men who were entitled to decorations actually received them our fighting forces would be spangled like a jeweler's window. They know, too, that a large percentage of the deeds of valor are never rewarded, never reported, for the deed is performed without eyewitnesses, alone, unaided, and with death following to seal the lips of the valorous.

GENE BUCK EXPLAINS

Gene Buck, producer, song writer, and raconteur, was telling a story in Washington the other day to illustrate how the top commanders feel about their inability to do exactly what men in the ranks sometimes dream about.

He was at a social function in the home of a friend to which Admiral William Halsey was invited. Admiral Halsey is a man's man, rough, tough, sassy, and very fond of the men who fight under his command.

As Buck tells the story: "A young fellow in a navy lieutenant's uniform arrived late at the party. He was a slim, nice-looking lad and I didn't recall ever having seen him before. I introduced myself, and he told me his name was Gay.

"'How'd you like to meet Admiral Halsey?' I asked him.

"'I'd consider it a great honor,' he said. 'But perhaps I had better not. He's got an awful lot of rank, you know. I'm just a lieutenant.'

"'Stop talking like that,' I told him. 'Come on in the next room. He will be delighted to meet you.'

"Remember I didn't know this Gay from a cord of wood, but I took him by the arm and dragged him in to meet Halsey. 'Admiral,' I said, 'this is Lieutenant Gay.'

"'Sir,' said this kid, 'this will always be remembered as one of the great days of my life. I have always wanted to meet you since I got into the Navy.'

"The old boy drew down those shaggy eyebrows and frowned at me. 'Do you know this man?' he asked, nodding at Gay.

"I said that I just met him a minute or two before.

"'Let me tell you something about him,' said Halsey. 'I bet you never heard of Torpedo 10. Well, on June 4, 1942, Torpedo 10 went out after the Jap fleet at Midway—15 planes. The Japs had turned away from Midway and started to retreat. Torpedo 10 went in against overwhelming odds, kept boring in. There were 30 officers and men against all the mighty Jap Navy. And none of them came back except this man right here. He was shot down after he put a torpedo into a Jap carrier, and he sat out there in the middle of the Pacific and saw the whole Jap fleet go scurrying past him, high-tailing for home."

BIG DAY FOR ADMIRAL

"'Lieutenant, you make me feel very humble. This is a red-letter day in my life, because at last I have a chance to tell you what I think about it. It's men like you who make men like me. I would have done it long ago if it had been possible. But now all I can say is that I will always be grateful for what you have done. Mr. Buck, this man is Lt. G. H. Gay, Jr., the only survivor of Torpedo 10, and I am proud that I have been privileged to meet him.'"

Except for chance meetings of this kind men high in command seldom have a chance to express personally their thanks to the men who have carried out the orders they have issued which have brought about victories. The higher the rank, the more remote the commander is from those men.

Because of the stilted and formal language of citations, the words read to the man by some officer when the decoration is pinned on are in no way adequate to get across the sense of obligation the commanders feel for their men.

At present the services are revising their policy of wording citations and are employing men trained in writing to put into words a more graphic description of the deeds of heroism. But even the written citations ccuched in the best style, do not measure up to what the top commanders feel.

They are intensely aware that their very best planning is only as good as the most humble man in the ranks, and they all declare over and over again that Americans have emerged from the war as the most intelligent, skillful, and courageous of all men in a world at war.

When the Bastogne break-through by the Germans caused heavy losses, which had to be immediately plugged by replacements, the top commanders in Europe experienced agonies of spirit over the sacrifices the men were making.

GREEN MEN SENT IN

A high-ranking general told this writer not long ago: "The replacements came up from the rear areas, new to combat, bewildered by the complexity of war. Often they went into position at night, right up into the teeth of the enemy. They couldn't see the man on their right or the man on their left. God knows what they thought and felt as they hung on. And some of them were dead before daylight without ever having known the men of the outfit to which they were assigned. They died alone in the dark. It had to be that way, for the need was great. But I shall never forget them, and if prayer helps, I pray for them every night."

The organization of command in wartime does not permit any great degree of fraternization between the high command and the lower ranks. But it will not always be that way. When the war is ended and peace comes the comradeship the humblest soldier, sailor, or marine knows with the men of his own outfit extends upward to the very highest commanders.

Few American generals or admirals of flag rank of the First World War failed the men who fought under them. As long as they lived no sacrifice was too great, no man who ever served under their command too humble for inclusion in a vast comradeship tested in war and cemented in peace.

This is something that is typically American. High-ranking officers of other nations seldom unbend, even with the veterans of their own campaigns and commands. But the democratic American spirit rejects such austerity. The commanders prize the esteem of the men who fought under them, and demonstrate it in a thousand ways when peace comes.

Warfare brings to all men a change in outlook, a subtle difference in character. They have learned to rely upon one another, have tested their worth in blood and battle—and they never forget that. The veterans' organizations of America's wars—the vanishing G. A. R., the Spanish War veterans, the veterans of World War No. 1 and World War No. 2—are eloquent testimony to the leveling effect of peace. Rank ceases to be of importance when peace comes. To these veterans it is only important that they fought together for a common cause no matter how humble the rank.

The holders of decorations for heroism and service will be the first to admit that they know of others who have never been given such recognition who richly deserve citations. And virtually all the commanders are certain of the loyalty and affection of their men, those whose deeds have been recognized as well as the countless majority who have never been decorated. The pride that Patton's men have in him is matched by the pride millions of men have in their own commanders who have proved themselves in battle.

Morale, which was slow to develop in the armed services, except in famous outfits like the First Division, is now a reality through-

out the services, each fighting man convinced that his outfit, and his commander, is the greatest extant.

And the men who place the highest value on this feeling their men have for them are the generals and the admirals, for they know they owe all men under them a debt they never can repay. Without the men, and their devotion to duty, the generals and admirals would be nonentities. And they wish, more than anything else, that they could tell each man so face to face, man to man.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. AUGUSTINE B. KELLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. KELLEY of Pennsylvania. Mr. Speaker, under permission to extend my remarks in the RECORD, I am including a tribute upon the death of the late President Roosevelt given by Elizabeth Glaser, a sophomore at Seton Hill College, of Greensburg, Pa., during commemoration hour for Franklin Delano Roosevelt, late President of the United States. This was conducted on Thursday, April 19, at the college:

"Any man's death diminishes me, because I am involved in mankind." So, 300 years ago, John Donne spoke of death and of its impact upon those who knew and loved the dead. In these days since April 12, we too, as a nation, have known death—the death of a giant leader whose passing diminishes us all more than we like to think upon.

In the death of a friend we experience an uneven struggle—between sorrow for him who lies waxen in his coffin, and sorrow for ourselves on being deprived of a source of personal happiness and security. The struggle is uneven because our selfish interests continually vie with our interest in another. Thus when we saw the newspapers splattered with the headline, Nation Mourns Death of F. D. R., did we think of the loss of security to our own little world? Or did we remember the man, and his courageous fight against the infirmity of his body? Did we remember the helper of the laboring man, the advocate of social welfare, the statesman who was a strategist keen to circumvent or escape the snares of international intrigue. I think once again the balance was uneven; but surely it tipped in the direction of him who lay waxen in his coffin.

We had admired him. Even though we joked about his 12 years in the White House, we admired the dominating personality and strong character that had put and held him there. This man was truly our captain—not only of the ship of politics but of the barque of Christian culture which is our ideal. We were proud that he was, in the highest sense, a gentleman.

Journalists, commentators, political opponents, even his severest critic, the common man, forgot that they had disagreed with many of his policies. They forgot that, listening to his now immortalized "fireside chats," they had tried to fathom what undivulged thoughts and events underlay them. They forgot their petty censure and their not too polite jokes about his family. They paid tribute to what the man had really been and done, and erased the irrelevant details. They even ignored a fear that this our loss might raise the morale of the enemy. There was no need for this fear: the demonstration spanning our Nation, mourning the death of the President, sign of our unity, of our faith in and devotion to our leader—this could have but a demoralizing effect on the enemy. Despite his untimely passing, Roosevelt still stands as the dominating figure of our age.

All this has been said before and many times. So widespread a tribute as has been paid to our late President leaves no room for originality; but there is yet space for sincerity. The house of the United States, the house of the world, now bears a gold-starred service flag for the thirty-second President of this Nation—one who lived and fought and died for his country.

"Any man's death diminishes me, because I am involved in mankind." The death of President Roosevelt diminishes us all, because we are, with him, America.

Social-Security Protection for Employees of Public Agencies

EXTENSION OF REMARKS

OF

HON. LINDLEY BECKWORTH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. BECKWORTH. Mr. Speaker, I wish to include in the RECORD a letter I have received from Mr. A. J. Altmeyer, Chairman of the Social Security Board, which states that—

The Social Security Board believes that coverage should include all public employment by Federal, State, and local governments in such a way that the Federal insurance system would afford a basic protection on which would be superimposed the protection available through special retirement systems.

In my opinion, every Federal, State, and local government employee should have protection just as employees who are under social security.

I sincerely hope the Congress will approve some plan beneficial to these groups.

The letter follows:

FEDERAL SECURITY AGENCY,
SOCIAL SECURITY BOARD,
Washington, D. C., April 19, 1945.

Hon. LINDLEY BECKWORTH,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN BECKWORTH: I am replying to your letter of April 12 with which was transmitted a marked page from the CONGRESSIONAL RECORD—Appendix concerning coverage under the Federal old-age and survivors insurance program for employees of State and local governments.

The question of extending social-insurance protection to employees of public agencies is one to which the Social Security Board has given considerable attention and study. The Social Security Board believes that coverage should include all public employment by Federal, State, and local governments in such a way that the Federal insurance system would afford a basic protection on which would be superimposed the protection available through special retirement systems. It is hoped that this matter will receive consideration in connection with any hearings on social-security amendments.

As you requested, I am returning your enclosure.

Sincerely yours,

A. J. ALTMEYER, *Chairman.*

Draft of Farm Workers

EXTENSION OF REMARKS

OF

HON. WILLIAM H. STEVENSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. STEVENSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following joint resolution of the Legislature of the State of Wisconsin:

Senate Joint Resolution 42

Joint resolution memorializing the Congress of the United States, the War Mobilization Director, and Maj. Gen. Lewis B. Hershey, Director of Selective Service, to reconsider the proposed plans to draft all skilled farm help and skilled workers processing dairy products for the military service

Whereas the President, the War Mobilization Director, and Maj. Gen. Lewis B. Hershey have recently requested that approximately one-half of the 364,000 deferred farm workers of the country between the ages of 18 and 28 be inducted into the military service by July 1 in spite of the provisions of the Tydings amendment of October 1942; and

Whereas it is realized that in the present critical war situation people in agriculture and skilled workers processing dairy products are not exempt from military service; and

Whereas it must be urged that there must be a selection and reexamination of those who may be escaping their wartime duty and a deferment of those who are truly essential to agricultural production and to the processing of dairy products; and

Whereas it is further deemed essential and desirable that operation, function and selection under the Tydings amendment be continued so that the local boards will be given the power to determine the standards for essentiality on a farm or in a dairy processing plant rather than apply an arbitrary standard of deferment with inelastic and consequent hardships under the proposed program of conscription; and

Whereas with an intelligent understanding of the agricultural problem, the necessity of supplying an adequate labor pool, the avoidance of a food famine, the farmers of this State and of the country will toil with their brothers in arms to make this country safe for democracy in the American and cooperative way of life; and

Whereas the farmers and skilled workers processing dairy products in Wisconsin have performed magnificent miracles of production with less help and farm machinery and only with the inspired aid of grandfather and the womenfolk and children; and

Whereas Wisconsin is the leading dairy State and holds top rank in many foods desired by the Quartermaster Corps, and a substantial number of the deferred farm cases are located within the State, the present critical labor shortage is intensified to one of existence or departure from the farm, with an aggravation of present food shortages; and

Whereas the dairyman must have experienced, skilled year-round labor, and other labor available at the right time for harvesting or processing and cannot depend alone on the aged and physically unfit, but must have an adequate reserve of farm help in order to insure an adequate production of food that will win the war and write the peace: Now, therefore, be it

Resolved by the senate (the assembly concurring), That the Legislature of the State of Wisconsin memorialize the President, the War Mobilization Director, Maj. Gen. Lewis

B. Hershey, and the Congress of the United States, to reconsider the calling and inducting of about half of the agricultural workers and skilled workers processing dairy products in the country by July 1, and to urge the continued application of the Tydings amendment that places the power in the local board to grant individual farm and dairy processing plant deferments; in order to save the agricultural and dairy industry of this State, and be it further

Resolved, That properly attested copies of this resolution be sent to the President, the War Mobilization Director, Maj. Gen. Lewis B. Hershey, Director of Selective Service, the War Food Administration, to both Houses of Congress, and to each Wisconsin Member thereof.

OSCAR REUMBOHM,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.
DONALD C. MCDOWELL,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.

Air Transportation Faces Problems; Airport and Other Legislation Needed

EXTENSION OF REMARKS

OF

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. RANDOLPH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following enlightening address by C. Bedell Monro, president of Pennsylvania Air Lines, before the Advertising Club of Washington, on Tuesday, April 24, 1945:

Less than 20 years ago, all of the United States domestic air lines carried in 1 year a combined total of about 5,800 passengers. Eighteen years ago, in 1927, the date of P. C. A.'s start in life, the combined total was 8,861. This month, only 18 years later, P. C. A. is alone transporting in 4 days as many as the entire industry carried in a year in 1927.

In 1941, the last year of normal operations, over 4,000,000 persons availed themselves of the benefits of air travel. As aircraft were drafted for military duty, the passenger totals in 1942 and 1943 fell below that figure, but in 1944 the total was again over 4,000,000. This year, on its routes now authorized, including new service into New York, P. C. A. expects to carry in excess of 700,000 passengers—and our company is only 1 of 16 domestic air lines, and is fifth largest from the point of view of passengers carried.

As an indication of the rapidity with which air transport is maturing, in 1930 the number of landings and take-offs at the old Washington Airport averaged less than 500 per month. True, this airport was but little more than a cow pasture, but for years it was the air terminal of the Nation's Capital. At the new Washington National Airport, acknowledged to be the finest in the country, last month there were 13,000 landings and take-offs, or 1 every 3½ minutes.

* * * * *

In reappraising aviation's problems, we must first consider the matter of airports. They represent a National, State, and civic problem requiring foresighted policy and reappraisal, not only from year to year but more frequently, to anticipate technological, traffic, and other developments which are controlling as to airport size, location, and facilities.

The importance of this cannot be exaggerated, as is exemplified by the fact that LaGuardia Field in New York, where operations started in 1939, is now not only inadequate but in every respect is obsolete. This metropolitan airport cannot be expanded or improved to take care of the volume or to meet technological developments of the future, such as instrument approaches and instrument landings.

Possibly within a year, New York will have a new air terminal at Idlewild, which is planned for the future in such a way that reappraisal will only mean adding to, and not replacing or destroying, what has been done.

Interesting features of this new air terminal include the fact that it will comprise 6 square miles, with the terminal area in the center, an area equivalent to the distance from Pennsylvania Station in New York to Radio City. It will have six runways at first, and ultimately 12, each of which will extend from 6,000 to 10,000 feet. It will be equipped to take care of up to 360 aircraft movements per hour, or 6 per minute, in all types of weather. There will be 70 loading positions and 10,500 feet of gate space to adequately handle its patrons.

Let us take a look now at our own airport—the Washington National Air Terminal. Although it has been in operation only a little over 3 years, it is already inadequate in many of its facilities—and is becoming more so. It is not, however, obsolete as there is some room for further improvement and expansion. The terminal building is inadequate, needing more loading positions, more operations offices, more ticket counters, and added facilities. More hangars are needed, as well as other buildings for shop space, storage, and offices. The runway system is satisfactory, but is restricted by the proximity to Bolling Field and Anacostia. The problem in Washington is not one so much of airport landing space but air space, so concentrated are flight operations in this area.

Plans for the correction of inadequacies are currently being made, and great credit in this regard is due the C. A. A. and the airport management. But at an early date the whole airport situation in Washington must be reappraised to anticipate future requirements, for Washington already is one of the few great terminals of the world for domestic as well as international operations. It is not a prediction, but a simple fact, that this city is destined to be he world's most important air capital, the hub of a vast network of international and domestic routes, of which we see today only the beginning. Reappraisal, then, is doubly necessary in Washington in order that this city will anticipate and be prepared for the inevitable ascension of the importance of air transportation here.

There is now a national airport program under way, with legislation currently being considered by Congress. This legislation is most constructive and vital to the continued development of every phase of aviation. It is equally vital to the national defense.

A word of warning, however, is appropriate in consideration of airports on a national scale. The possibility of wastage in funds is enormous, for without fitting the airport to the city, there could easily arise a succession of "super-colossal Hollywood epics." Each airport should be planned and developed in accordance with the specific local problem and local needs, and planned so that with each new development in our industry, another stage can be added. New York's problem is not that of Washington, or Chicago, or Knoxville.

Another problem in air transportation requiring constant reappraisal is that of air traffic control, including methods of making instrument approaches to airports in conditions of low ceilings and limited visibility. This problem is linked closely with airport features such as runway patterns, size, and similar factors. The functions of airway traffic control are the determination and constant checking over the entire Government airways system of the spacing, both as to altitude and horizontal distance, of all operating aircraft, to avoid the possibility of collision. It also concerns the clearing for final approaches into airports of such aircraft desiring to land. Following the clearance, the local airport tower control takes over for landing guidance in accordance with field traffic. Anticollision is the primary purpose of air traffic control.

In good weather, this is all very simple. But in bad weather, the problem grows more complicated, particularly at airports such as Washington, Chicago, New York, and other large centers, where there is a large volume of converging traffic.

The present system of air traffic control has been in effect about 10 years, and is as completely inadequate and as obsolete as a pair of high-buttoned shoes.

Although constant studies have been made, changes and improvements have largely been prevented through the lack of availability in wartime of new and improved radio facilities. Both the air lines and the Government should bear a measure of blame for the delay in reaching even a tentative conclusion for this long overdue change. For on the solution of air traffic control depends the increased safety of air-line operations, and the development of real air-line efficiency. Although the air lines complete over 90 percent of their scheduled flights, this is not enough, for the general acceptance of air travel cannot be realized until it can be counted upon 100 percent of the time.

Examples of flights that were canceled, or that were required to hold an approach pattern over an airport under adverse weather conditions, are too numerous to mention, but they are too widely known in and out of the industry for dependable, all-weather flight efficiency.

The question of what airplanes, and what type of airplanes, will use airports in the future, is itself a lengthy subject. Let me say without qualification that the C. A. B. has done a masterly job in securing the release of aircraft to the air lines for conversion to commercial use. There are more air liner seats now available than at the 1941 peak, due in part to the greater utilization of aircraft by the air lines.

The question of aircraft for commercial use, however, is only a part of the entire question. More fundamental is the lesson we have learned from the war, which is recognition of the importance of air power. I hope we shall never again become so dulled by propaganda, so lulled into security by fatness and well-being and softness, so misled by false prophets, that we shall forget the vital need for supremacy in the air, for both military and economic protection. This means that we must make certain that our aircraft manufacturing does not decline as it did after the last war.

Few people realize what we did after World War No. 1, having built by the end of the war a great, new industry capable of great production. We dumped used aircraft on the country and on our foreign markets. Almost a decade was required before manufacturers could develop either interest or a market for new and better planes. We actually scrapped an industry by immediate abandonment and by the attrition of dumping. We actually sabotaged America's air power and its military power.

This must not happen again. Every nation in the world, friendly or unfriendly, now realizes that in any future war of aggression the United States must be attacked first, rendered impotent, or destroyed, because our vast production potential will turn the scales as it has in the last two wars.

Any attack upon us will certainly be through some form of air assault. This means that we must maintain a strong

manufacturing industry, capable of instant quantity production of aircraft, engines, radio, and other accessories, better than those of any other nation. This means scrapping utterly obsolete military and commercial type aircraft as soon as practicable, which is whenever newer types are proven and are available. This also means maintaining in high gear at all times aeronautical research and engineering, which is the very heart of aviation progress. The Government must encourage such research. It must aid research through subsidy, if necessary. This aid will be the highest type of national peace insurance, purchased at the lowest cost in premiums.

The cause of the manufacturers is the cause of all aviation, of military advancement, of commercial advancement. It is the cause of government and of the private citizen—your cause and my cause. Nothing in our national life requires more intelligent handling and constant reappraisal on the part of all of us.

The late President Roosevelt stated just a little over 6 years ago, in a statement on the Civil Aeronautics Act, that "underlying this statute is the principle that the country's welfare in time of peace and its safety in time of war rests upon the existence of a stabilized aircraft production—an economically and technically sound air-transportation system, both domestic and overseas."

* * * * *

In addition to the problems of airports, air traffic control, rates and fares, there is, over the industry, an umbrella—one that could fall to pieces and expose air transportation to an unrestrained and destructive downpour, or one that could fold in on us and actually prevent us from taking another forward step. This air umbrella is legislation.

Air transportation has been exceptionally fortunate in growing up under laws that have fostered its development in the public interest and in the interest of national defense. Great credit for much of existing legislation is due to certain Members of Congress, the C. A. B., and our industry for the foresight and constructive thinking, directed toward modernizing legislation for a modern industry.

Here, however, as in everything in our business, there is necessity for constant reappraisal. It is vital that no legislation be enacted, either National or State, which will be stultifying to the rapid progress of aviation. That stultification might be accomplished by the States, through the establishment of controls and agencies duplicating in each State the C. A. B.'s jurisdiction over interstate commerce, which can prove to be a real barrier to air progress; or nationally, through enactment of legislation which would set up any air transport monopoly either in domestic or international operation or any basis which would be inflexible or incapable of simple and quick change.

Should the mistake be made of sanctioning the creation of a gigantic air transport monopoly, be it called the "chosen instrument," or the "community company," or any new name with the same old meaning, and should the Government attempt to correct this mistake, the corrective processes will be interminable if not impossible. Only with the greatest difficulty could such a Frankenstein be disassembled.

Let us not do anything with air transport's "air umbrella" to prevent or to slow the necessary reappraisal of our fast-changing and constantly changing requirements.

To list but some of the problems confronting aviation today, one need mention only manpower shortages; union jurisdictional campaigns and disputes; multiple taxation; new and increased State gasoline taxes; restrictive State legislation; higher airport rates and rentals; increased requirements for real-estate purchase and building construction; new route expansion and development; increased competitive aspects of air transportation; revision of ground facilities and procedures for handling of larger aircraft; efforts of surface carriers to control or participate in our field under the guise of integration; improvement in service despite equipment, manpower, and supply shortages; increased activities of oil companies to secure exclusive fuel franchises at airports under a monopoly arrangement and at a dictated price structure; extent of further activity in the development of air express and air cargo; and an intelligent program for securing additional capital, through borrowing or equity financing, for post-war development.

Nor are we alone in the obligation to reappraise our policies—for our problems are shared, to whatever degree may be proportionate, by those in Government. The Chief Executive, Congress, the Cabinet, the many agencies—all of those who have anything to do with any phase of aviation, as well as those in every other business which aviation touches, must share with us the complexity of problems that lie ahead, still unsolved.

Democracy Takes Its Inspiration From the Gospel

EXTENSION OF REMARKS

OF

HON. EDWARD A. KELLY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. KELLY of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following sermon delivered by Most Rev. Samuel A. Stritch, archbishop of Chicago, on the occasion of the installation of Most Rev. Eugene J. McGuinness, coadjutor bishop of Oklahoma, in Our Lady's Cathedral, on January 10:

DEMOCRACY TAKES ITS INSPIRATION FROM THE GOSPEL, SAYS ARCHBISHOP STRITCH

Our thoughts this morning center on the office of a bishop. We are here to congratulate good Bishop Kelley who has received from the Holy See the extraordinary favor of having had given him as his coadjutor a bishop with whom he worked for long years in his apostolate for our home missions, whom he knows and esteems, with whom he has shared his great zeal for souls. We are here to express our good wishes to Bishop McGuinness, whose worth we know and whose achievements are the safe guaranty of his success in this new field of labor. But here this morning our thoughts turn to the office of a bishop. We try to catch its meaning and find ourselves dwelling now on one phase of it and now on another. In fact, we confess to ourselves that our poor minds cannot do more than consider a single phase of the office of a bishop at a time. May I, therefore, express to you my thoughts on a phase of the office of a bishop which in these tragic times seem to me of utmost importance? For a few minutes I am going to ask you to think with me on the bishop as a peacemaker in society.

WHAT DEMOCRACY HOLDS

As we look out on this war-torn world and see a hard-earned victory for our arms on the horizon, we wonder how out of the chaos of the after-war period men can bring order and that tranquillity of order which is peace. One thing seems very certain to us and that is that peace will come with the realization of the ideal of true democracy everywhere in the world. True, there are those who say that democracy has seen its day and is worn out and inept. They would substitute for it other systems of political absolutism in one form or another. Events have given the lie to this assertion and men everywhere in their hearts are longing for the happiness in the enjoyment of the common good which only a genuine democracy can achieve. In his Christmas message Pope Pius XII says:

"If, then, we consider the extent and nature of the sacrifices demanded of all the citizens, especially in our day when the activity of the state is so vast and decisive, the democratic form of government appears to many as a postulate of nature imposed by reason itself."

We are among the many to whom the Holy Father refers. We are convinced that in the modern state, which exercises such wide authority in the social relations of the citizens, there can be no genuine peace and happiness where the ideals of democracy do not obtain. It is in the very war aims of our country to base the peace on democratic ideals and principles.

But in the confused thinking of the times, it is well for us to stop and take thought with ourselves on the nature of a true democracy and the truths from which it comes. Basic in democratic institutions is the recognition of the person in every man and his human dignity. Man is a rational free being, responsible for his behavior and compelled by his very reason to seek the development and perfection of his innate powers. This man in his very nature is endowed with rights which are sacred and inviolable. Now rights are rooted in law. In what law are these inalienable rights of man rooted? Can the pragmatist or the materialist answer this question? Rightly we say in the law of nature, that is, in that law which is written in human reason. But law demands an author, a legislator, and a judge and sanctions. There is nothing real in the law of nature unless we acknowledge God as its author and its judge and unless we recognize that it has sanctions from God. If you talk about human freedoms, human rights, you must logically talk about God. Within me there is the command: Do right; avoid evil. There can be no real democracy without the fact of God and fact of moral obligations. These truths seem so clear to us in whose democratic traditions they are the constant, the absolute. Now while a truth may be a thing of reason and knowable to man in the light of reason, it is a fact that many such truths are clearer to us if the light of revelation, God's greatest manifestation of Himself to man was Christ Jesus, the Saviour. The Saviour underscored all His teaching with the truth of the moral accountability of man to God.

On the cross He died for man the sinner. As we kneel before that cross how clear to us is the natural truth of innate human rights or freedoms! And when I recall that there on the cross He is the propitiation for my sins, how well I realize my human dignity! It is plain fact of history that the Christian Gospel ministers to man the very basic truths on which democracy rests, the fact of human freedoms rooted in the natural law of God, strengthened and ennobled by the Saviour.

SEEKS THE COMMON GOOD

But before we finish with the origins of democratic ideals there is another fact or series of facts which we must recall to mind. This man, endowed with rights and obligations under the moral law, by a very necessity of his nature, is social, that is, he must provide for his necessities and realize his perfection in social life with his fellow man. He is not a hermit, he is not an all-contained individual. The very moral law in which his

freedoms are rooted governs his relations in society with his fellow man. Under the stress of a natural urge man lives in political society. Therefore he must seek with his fellow man the common good. Full well he knows that this common good is identified with his enjoyment of the free exercise of his innate rights and full well he knows that the moral law imposes on him obligations in political society or the state. Let us look again at the cross. There the Saviour hangs with arms outstretched wide for the salvation of all men. He taught that "greater love than this no man hath that he give up his life for his friend." On the cross we see how in Christian truth justice and charity demand that we not only accord to our fellow men the enjoyment of their rights but that also we go beyond justice in devoting ourselves to helping them in social life to achieve happiness and peace. Again let me say that democratic ideals become potent social concepts when men kneel at the foot of the cross!

Our Holy Father Pope Pius XII recently said the characteristics which should distinguish citizens in a democracy are: The right to express his own views of the duties and sacrifices imposed on him by political authority, and the right to be heard before being compelled to obey. Succinctly here we have stated that rational intelligent participation of the citizen in government is at the very core of our democratic traditions. In a democracy there is organic, organizing unity. Every citizen senses his civic responsibility and seeks to make his contribution to the good of the whole. This freedom is not conducive to chaos because it is constitutive of unity. We know full well that there must be an authority and after we have expressed our views we are ready to obey that authority when it acts within its own acknowledged competence. We choose by a free ballot our civil authorities and recognize in them the authority which our constitutions and laws give them. But we hold to our right to express ourselves on public affairs and we consider it our duty to make the fullest possible individual contribution to the common good.

PEOPLE VERSUS MASSES

Now in our times there has been revived in new garbs political systems which are the very antithesis of a democracy. Leaders by violence or deceit secure political control. They by propaganda and force impose their wills on the masses and sometimes seek to give the world the species of a democracy. But there is a difference between the masses in these countries and the people in a genuine democracy. These leaders recognize no innate human rights in the masses and reduce them to the status of a mere machine. Political life is not energized by the united action of the citizenry but the masses are moved by the dictator leadership. Under stress the masses fall into hysteria and frenzy and, when deftly used by the dictator, are a mere tool in his hands. In a democracy we speak of the people and in a dictatorship they talk of the masses. This system or theory comes from the philosophy of materialism and it significantly persecutes the Christian who even in the catacombs defended human rights against the Caesar on the Aventine.

And how am I going to connect this thought with the office of the bishop? The bishop is the witness of Christ among men. "You will be witnesses to Me," said the Saviour to the first bishops. In witnessing Christ the bishop keeps alive among men the truths on which democracy must rest. Today he looks with tear-stained eyes at the enslavement of the masses on many lands, at the suffering which godless dictatorships have inflicted on the world, at the dangers which imperil the establishment of a lasting peace when victory comes to our arms. He has no fear of genuine democracy; in fact, he is convinced that in the modern world it is the sole political form which can establish a good peace. He knows that democracy takes its inspiration from the gospel of Christ and he realizes the weight of responsibility which his office, as a teacher of that gospel, imposes on him. He is a peacemaker and today he knows that peace is inseparably connected with the establishment of genuine democracy where it does not obtain and with its preservation and development in countries which long have been its strongholds.

TRIBUTE TO TWO BISHOPS

Perhaps these thoughts came to me today when I reflected on how through many years there has sounded from this city through the Nation a pleading, eloquent, courageous voice, begging that men withdraw themselves from satanic chant of the siren of materialism and see on the cross of Calvary, their blood-stained, thorn-crowned King and Saviour, Christ Jesus our Lord, Bishop Kelley through the years has used his rare gift of eloquence, his pen, and his energy in witnessing the Saviour. Who can say what he has contributed to church and country? Today Bishop McGuinness, full of strength and vigor and the desire to do here what he has done so very well in North Carolina, takes up his work among you. He is a peacemaker among you, the servant of Him who promised to men the peace which the world cannot give. In his work of serving his church he will strengthen the foundations of true democracy among us and give of his strength and talents that genuine democracy based on immutable Christian truth, in the nations, and in international relations, may bring to men peace in justice and charity. Ad multos annos!

Increase of Compensation for Postal Employees

EXTENSION OF REMARKS

OF

HON. WILLIAM S. HILL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. HILL. Mr. Speaker, I favor H. R. 2071. I hope the leadership of the House will bring this bill up for immediate consideration and passage.

One of the last acts of our State legislature, which adjourned in early April, was the passing of a resolution supporting an increase in the compensation for postal employees. I enclose the resolution as part of my remarks:

Senate Memorial 8

Whereas there is now pending in the Congress of the United States, H. R. 2071, which provides for an increase in the compensation of certain postal employees, and also provides for other beneficial employment features of said employees; and

Whereas said employees have received no increase in compensation for many years, with the exception of a small war bonus; and

Whereas the Post Office Department has long been recognized as one of the most efficient and reliable of the Federal agencies, and the employees thereof should be rewarded for their capable and faithful service: Now, therefore, be it

Resolved by the senate of the thirty-fifth general assembly, That the Senators and Representatives from Colorado in the Congress of the United States are hereby urged to support and vote for the passage of H. R. 2071; and be it further

Resolved, That this memorial be spread upon the journal of the senate, and a copy hereof sent to each of our Senators and Representatives in the Congress of the United States.

WILLIAM E. HIGBY,
President of the Senate.
W. C. BLAIR,
Secretary of the Senate.

Let America Insure Itself

EXTENSION OF REMARKS

OF

HON. JOHN JENNINGS, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. JENNINGS. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include therein an address by the Honorable K. E. Steinmetz, an able member of the Knoxville, Tenn., bar:

In thinking about the terms of arrangement and framework of the machinery for preserving the world peace after the Axis has been whipped, it seems to me there are some fundamental elements which must of necessity be considered.

While their recognition makes the task of formulating a postwar set-up more difficult for whoever will be the negotiators, ignoring them will simply produce future further disaster.

It is probably true that most of our kind of folks, and perhaps most of the human race, know that war is horrible, wasteful, and really silly. There are, however, some races of people who do think differently, and one curse of humanity is that the civilized races have in the past glorified war in fiction, music, and so-called history. There are even some learned men who can give you good arguments that war is a biological phenomenon and a necessity.

The main disturbing element is that ethnological factors, chiefly racial characteristics, prevent world unanimity in any conception of the relations between the individual and the State. Thus, for instance, the Celts devised the clan, the Latins the empire, the Slavs the communistic idea. Others devised the tribal system, and still others the various types of feudal systems, royalties, monarchies, and what-have-you. These various racial characteristics are just as fixed and so much a part of their nature as their differences in language, taste in foods, and genius or talent in music, art, literature, invention, commerce, or industry.

The greater part of the world today still conceives the state as resting in some individual such as an hereditary monarch, or a shiek, fuehrer, duce, dictator, son of heaven, Maharajah, chief, and so on, almost endlessly.

With these the citizens are subjects, and dependent in varying degrees on the Government, and without freedom of choice of vocation, and often of religion, movement, place of residence, or station in life. These, to us, erroneous concepts, have persisted through the ages, and it was only yesterday, in the history of mankind, that the concept arose that there ought to be no government without the consent of the people, that the people were the state, and that the Government operating through its legislative, judicial, and executive departments, was the servant and not the master of the people. The pity is that even in America, the recent generation or so of school children have not learned this fundamental truth and a great many of our politicians and so-called statesmen and bureaucrats at Washington apparently do not know it yet.

To escape the evil of depending on rulers or the governing class, America was settled and colonized, and here was established a government of, by, and for the people under a charter made by the citizens, called a Constitution. If we can keep it.

Many other races and nationalities are ethnologically, historically, and educationally incapable of understanding and functioning under such a form. Ideal constitutions adopted by Latin-American countries have been consistently and historically ignored, because of inherent racial psychological inability to really understand and function under them. They seem to prefer the "strong man" or some sort of empire or junta, even though they operate under the name of republics.

But the United States was organized, in the light of the experience of mankind through the ages, noting the weakness and failure of other systems with their crushing of freedom, individual initiative, speech, worship, ambition, endeavor, and hope of reward, and here was discarded the idea of excessive governmental supervision and suppression, and dependence on the rules of the Government. And here was discovered and recorded the modern truth that the people are the sovereign and not the subject, and that the governmental agencies, bureaus, and administrators, executives, legislators, and courts, are employees only, and are the servants of the sovereign people, and not their bosses or rulers. Recently there has been a tendency to ignore or evade these fundamental truths by an avalanche of bureaucratic, European "pushing the folks around," and an illicit hankering after some foreign, un-American concepts and practices, which the draftsmen of our Constitution knew had been tried and worn threadbare by race after race, nation after nation, in the ages past, since mankind first tried to organize itself into a working society.

We do not need or want any social revolution" in the United States, to un-Americanize the American Nation, or its way of life. It is more plausible that we need a revolution to throw out the insidious weakening foreign idealogists, bureaucrats, and fellow travelers, and restore America to the Americans and come back home to the Constitution by cutting out our philandering with foreign political paramours and bureaucrats and give posterity in America some incentive to try to make an honest living, with at least a gambler's chance of reaping reward for skill, energy, talent, industry, and initiative.

Among a lot of other fundamental factors inherent in this, our American way of life, is the spirit of competition and cooperation. This is really the reason the United States, as a so-called decadent democracy, can spot the Axis a touchdown or two and come from behind and win the game, or, after having been slugged while asleep, recover from the daze and proceed to give unholy hell to the would-be assassin. Incidentally, I believe our great interest and ccomplishment in team sports, like baseball and football, has a meaning. Not only the player, but the public spectator absorbs and realizes the necessity of the two essentials—vigorous competition and absolute team work. No lying down, sulking, or going soft, and no starring or grandstanding by any pet of the coach. Fight hard and cooperate. This is second nature to Americans now.

These considerations seem to make it apparent that any postwar set-up of a supergovernment, predicated on the theory that the other nations can, to a limited degree assumed necessary for the purpose, surrender sufficient of their sovereignty to let the joint agency, thus established under whatever name, enforce disarmament and keep the peace, is insufficient.

It is unfortunate, but manifest, that too many of them are simply inherently handicapped by their racial and ethnological psychology to feel and understand the problem. Little Yugoslavia, an artificial ideal "state," created after World War No. 1, with three or four different races or "nationalities" within its boundaries, is a recent example of the fallacy of such an assumption. And the constitutional inability of the French people at this, of all times, to "get together" is still a more recent one. Ideal plan and formal signed agreement are not enough. Plan and agreement was once almost too risky for even the United States, with its constitution of a group of States more nearly alike in thought and temperament than can be found anywhere in the world. These component states surrendered more of their sovereignty to form the strongest, closest knit "league of nations" in the world under their great constitution than any nation would ever agree to surrender to a postwar superagency, but what would have happened when brother disagreed with brother in the horror called the War Between the States, if it had been, by the accident of history, the faction in the northern area which had announced its intention to secede from the Union and establish its capital at Chicago? The side that had the most effective force prevailed in the end. If the South had had that force, then what about the Constitution, the ideal league? And Berlin, Rome, and Tokyo are nearer to New York today than Atlanta was to Washington in 1861.

War is evil, hideous, and insanely unwise from an economic standpoint, or it is good, pleasant, and economically wise. We are either right and the Axis Powers wrong, or vice versa. On the economic point alone, how few days' cost of the present war would pay for what it would have taken to pay the entire expense, from Versailles to Munich, to have kept us constantly the most effectively prepared nation, with the preventative power sufficient to definitely deter the outbreak of any maniac fuehrer, duce, or descendant of the "Son of Heaven"?

The world knows we have no tendency or disposition toward territorial aggression. There is the case of the Philippines. Our humanitarian disposition is so well known we are by many nations regarded as soft and suckers. And it takes so long and costs so much in lives, bodies, and the money of ourselves and posterity to come from behind every now and then.

Why shouldn't Britain, with the United States, or the United States alone, if necessary, after our enemies have been thoroughly beaten and their capitals invaded and their peoples made to see and feel some of the hell of war they have been inflicting on their victims, their criminal leaders captured and belittled and made ridiculous before their own people, and then finally and permanently punished, disarm these bandit states with their own will and force, and keep them disarmed forever?

Not so incidentally, perhaps, this belittling and ridicule of upstart Napoleons, is rather important. Has it not been another curse of civilization that the tyrant war lord, in the past, when finally conquered, was, no matter how despicable and culpable, tendered the honors of war and merely imprisoned or exiled, to be later excused, then extolled and often nearly cannonized by sobsister historians? Or glorified and glamorized by poets, musicians, and critics? Then a generation or so later some Schicklegruber somewhere figures that he is smarter than the Kaiser and can avoid the Kaiser's mistakes, and conquer where the Kaiser failed. During the effort, all these Napoleons, Caesars, Mussolinis, and Schicklegrubers strut and parade, fume and storm, preen and perform in their vanity and self-assumed might, importance, and glory, feeling secure that if they ultimately fail, all that happens is heroic exile and pseudo martyrdom in a life of comparative ease and comfort of the erroneous but vanquished hero. Doorn or St. Helena were not so bad after all.

Why repeat the mistake? Why not experiment with the possible deterrent effect on future up-starts of showing the world, and especially his former subjects, what a small assinine and ridiculous figure their former boss is, after all? Show him to every citizen of his country, garbed in humiliating raiment, displayed in a Yankee circus cage, and let little children of his oppressed ravished victims, taunt and defile him, time and again, while a sound picture is made of his humiliation for future reference and to keep the record straight.

Colossal vanity, strutting and egotism are the principal stock in trade of such maniacs, and maybe a lot of future would-be-world conquerors would never start, if they knew such would be the consequences of their failure.

They do not need any armament. We are not going to assault them. They know it. But by past performances we know they will assault us, if we let them have what it takes to do it with. And are we not suckers if we depend solely on some postwar contract, treaty, or league with other nations, and do not keep ourselves ready and able to do alone, what it takes to enforce the peace, when the other parties to the treaty welch out on us, secede, or find themselves unable to cooperate for reasons of national self interest?

Salaries of County Agents

EXTENSION OF REMARKS

OF

HON. LINDLEY BECKWORTH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. BECKWORTH. Mr. Speaker, county agents and employees of the Extension Service constitute a group which has had much to do with the winning of the war. Without fail our county agents and our home demonstration agents are called on to participate in and usually to take the lead in all governmental programs having to do with rural people. It is my opinion they have not been rewarded for their good work as they should have been for they have received no appreciable raise in their pay for many years. They deserve a raise in their salaries.

I sincerely hope the Congress and the various State Governments will lose no time in doing something of a helpful nature for this group.

Under unanimous consent I include in the RECORD a letter I have received from Hon. Marvin Jones, of the War Food Administration:

WAR FOOD ADMINISTRATION,
Washington, April 20, 1945.

Hon. LINDLEY BECKWORTH,
House of Representatives.

DEAR LINDLEY: We have your letter of March 27 asking us to state what we feel can be done to provide a pay raise for county agents.

Cooperative extension work in agriculture and home economics is carried on by this Department in cooperation with the land-grant colleges of the States in accordance with the act of May 8, 1914, and the State colleges determine the salaries paid to State and county extension workers.

The salaries of county agents are usually paid from Federal, State, and county funds, due to the cooperative nature of the extension program.

There is no uniformity in the salaries received by county agents in the various States. The records show that the average salary paid to county agents in Texas in 1944 was about $2,680, while the average salary paid to county agents in California was $3,995, and the average salary for the United States was $2,880. The salaries paid county agents in many States are lower than the salaries paid to persons holding comparable positions and Director M. L. Wilson of the Extension Service has urged the State extension directors in those States to raise salaries as soon as the financial situation will make this possible. Several States have provided wartime bonuses for their county agents and we have been informed that some legislation has been proposed in the Texas Legislature which, if enacted, will help relieve the situation in that State.

I assure you that we will continue to urge State extension directors to do everything they can to raise the salaries of county agents where such salaries are lower than salaries paid for comparable positions.

Sincerely,

MARVIN JONES, *Administrator.*

More Bungling

EXTENSION OF REMARKS

OF

HON. WILLIAM LEMKE

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. LEMKE. Mr. Speaker, Here is some more bungling of the OPA. This bungling is not limited to the OPA. The WPB has bungled the lumber situation even more. This is the price we pay for permitting government by bureaucracy—by permitting one-man-made laws.

The truth is that we are no longer governed by laws, nor even by bureaucracy, but by deception and make-believe. We are governed by Alice in Wonderland, with a lot of little fellows sitting around pushing pencils, issuing edicts, rules, and regulations. This until we are beginning to feel a real food shortage right here in Washington.

The OPA with its rules and regulations, restrictions and manpower consumption—manpower waste—has not only produced a shortage of butter and meat, but will produce a general shortage of food within a very few months unless Congress wakes up and takes some steps to kick this bureaucracy off of the producers' backs.

Here is a letter I have just received from the North Dakota State Dairy Commissioner, together with a resolution passed by the State Legislature of North Dakota.

STATE OF NORTH DAKOTA,
Bismarck, April 18, 1945.

Hon. WILLIAM LEMKE,
House of Representatives,
Washington, D. C.

DEAR SIR: I am enclosing a copy of Resolution 2, introduced in the North Dakota House of Representatives by the ways and means committee, and passed both the house and senate without a dissenting vote.

This resolution was introduced as a protest to the policy being pursued by the district OPA office in Fargo in prosecuting our North Dakota creameries for alleged upgrading of butter. The Fargo office of the OPA seemed to have assumed the attitude that all of our creamery operators are law violators, and that, as such, they are all guilty of violating OPA regulations.

Out of the 105 creameries we have in our State, over half of them have already either paid a fine to the OPA, or have been served with a summons to appear in Fargo to defend themselves against these charges. It would appear from a check-up of the action taken by the OPA that they are determined to find something wrong in every plant inspected. If you have had any occasion to check on regulations issued by the OPA you will realize that it is almost impossible at the present time to operate a business and comply fully with all the regulations that they have issued.

In the first place, it would be necessary for a businessman to spend a good share of his time studying the regulations, and then it would be necessary for him to request an interpretation of many points which are definitely not clear in the regulations. After getting the interpretation from the OPA office he would then have to, in most cases, hire an attorney to try to clarify the interpretation. This program of the district OPA is causing irreparable harm to the dairy industry of our State and is resulting in a lower price being paid to our farmers for butterfat.

It appears to me that our sense of American justice, as we were taught to understand it, whereby a party charged with illegal action, was considered innocent until proven guilty has been completely reversed, so that now under the OPA policy, a businessman is considered guilty unless he can produce documentary proof that his is innocent.

I believe that Congress should take some definite action to curb the officials of the OPA in this attitude, and that all unnecessary and unjustified prosecutions be stopped immediately. The dairy industry of North Dakota is soliciting your help on this question.

Very truly yours,

WM. J. MURPHY,
Dairy Commissioner.

House Concurrent Resolution Z

Concurrent Resolution Memorializing Congress, the President of the United States, and Chester Bowles, Administrator of the Office of Price Administration, to permit the sale of North Dakota butter within ceiling prices on the basis of its true commercial value, and to cease unjust discrimination against butter made in the State of North Dakota

Be it resolved by the House of Representatives of the State of North Dakota (the Senate concurring), That, whereas the creamery industry contributes materially to the aggregate economy of the State of North Dakota, and is the only branch of agriculture in which practically all the processing of the products are carried out within the borders of the State; and

Whereas the Office of Price Administration has adopted a policy in dealing with our North Dakota creameries based on the erroneous conclusion that top quality butter cannot be produced in North Dakota, and pursuant to said policy has classified North Dakota as a B grade butter State; and

Whereas this action is doing irreparable harm to our dairy industry as a whole and particularly to the producer, as any action that compels creameries to market butter on the theory that Government grades are the sole and only basis of its commercial value will automatically reduce the price the creamery can pay to the producer in this State for butterfat; and

Whereas if damage actions by the Office of Price Administration succeed as against creameries which have bought and paid for butterfat, to the producer on the theory that such butterfat could be and was processed into butter that could be lawfully sold for a price actually based on its real commercial value, within ceiling-price limitations, and judgments for damages against said creameries are obtained, then and in that event, as to cooperative creameries, the damages will be collected from the pockets of the farmer producer, and as to independent creameries, the judgments will have to be collected out of the working capital, as in truth and in fact the prices that were paid to the farmer were based on the prices the creameries have received for the butter, and in truth and in fact, no damage has accrued to the consumer; and if the present program of the OPA is carried out, no benefit can or will accrue to the consumer. The North Dakota producer will be materially damaged and the ultimate consumer will receive no benefit: Now, therefore, be it

Resolved, That we petition the Congress of the United States to investigate the activities of the OPA in connection with the matters hereinbefore referred to, and to urge Chester Bowles, Administrator of the Office of Price Administration, to issue such regulations as may be required to permit North Dakota creameries to sell North Dakota butter within ceiling prices on the basis of its true commercial value, and that the present program of the OPA, based on alleged upgrading, be forthwith terminated: It is further

Resolved, That a copy of this joint resolution be sent to the President of the United States, to Chester Bowles, Administrator, and to each of the North Dakota Members of Congress.

(NOTE.—The above concurrent resolution was passed by the house of representatives and the senate without any opposition by voice vote.)

A Letter From Home

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. ROWAN. Mr. Speaker, under leave to extend my remarks, I include the following letter which I have received from one of my constituents, namely, Mr. Arthur B. Dargan, 4609 Indiana Avenue, Chicago, Ill.:

CHICAGO, ILL., *April 17, 1945.*

The Honorable WILLIAM A. ROWAN,
House of Representatives,
Washington, D. C.

DEAR SIR: Recently a lady told me that if an international bank is formed, she will promptly cash in all her War bonds. I replied that, in that case, I shall immediately buy another bond to counteract, in some measure, her action.

I think that all peace-loving people should work for the programs outlined at Bretton Woods and Dumbarton Oaks.

I heard our President on the radio yesterday. I think the forward-looking people of America should unite to give him maximum support in order that the program laid out by our late beloved President may be developed.

At the present time, the following lines written by a patriot and statesman keep

running through my mind. It is my belief that no man can read them without profit.

"Man's dearest possession is life;
And as it is given him to live but once,
He must live so as to feel no torturing regrets for years without purpose;
So live as not to be seared by the shame of a cowardly and trivial life;
So live that, dying, he may say:
'All my life and all my strength I gave to the finest cause in the world: The liberation of mankind.'"

Yours very truly,

ARTHUR B. DARGAN.

Lt. Lois I. Jernberg

EXTENSION OF REMARKS

OF

HON. MIKE MANSFIELD

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. MANSFIELD of Montana. Mr. Speaker, I feel especially privileged to call to the attention of the House of Representatives the awarding of the Bronze Star Medal to Lt. Lois I. Jernberg, of Butte, Mont.

Lieutenant Jernberg is the first Montana woman to be honored by military decoration for service at the battle front. This award was made for gallantry in the performance of her duty as an Army nurse.

While my respect for our nurses has always been high my regard for them and my appreciation of their job has increased since I have come into close contact with these gallant girls in India, Burma, China, and other parts of the world. No matter where they are or what their job is, they can be depended upon to live up to the highest ideals of their country and their profession.

To all of them and to my fellow Montanan, Lieutenant Jernberg, I can only say "We're proud of you."

Mr. Speaker, under unanimous consent, I am including an article from the Daily Post of Butte, Mont., dated April 10, 1945, covering the outstanding work of Lt. Lois I. Jernberg, Nurse Corps, Army of the United States:

LIEUTENANT JERNBERG WINS UNITED STATES BRONZE STAR

Lt. Lois I. Jernberg, of Butte, Montana's first woman honored by military decoration for service at the battle front, has been awarded the Bronze Star Medal by Lt. Gen. George S. Patton, Jr., for gallantry in the performance of duty as an Army nurse.

The 25-year-old Butte girl is currently serving at an evacuation hospital in Germany. A "shock nurse," she administers initial care to men evacuated directly from the field of battle, giving them plasma and preparing them for entrance into the hospital from the shock camp.

In company with 12 other members of the Army Nurse Corps, Lieutenant Jernberg, daughter of Mr. and Mrs. J. C. Jernberg, of 704 West Park, received the Bronze Star and personal congratulations from General Patton at a formal ceremony at Third Army field headquarters on the western front.

Before a military police guard of honor and headquarters band, the 13 cited nurse officers heard the general read the citation: "The Bronze Star Medal is awarded for meritorious service in connection with military operations against an enemy of the United States in France and Luxemburg to the following members of the Army Nurse Corps."

General Patton then pinned the medal upon the blouse of each nurse officer, shook her hand, and commended her on the excellent performance of her stringent duties. When the general had completed the presentations, his chief of staff, Brig. Gen. Hobart S. Gay, and the chief of the Third Army nurses, Maj. Bernice J. Sinclair, congratulated each of the decorated nurses.

Lieutenant Jernberg has been overseas a year last January. She entered service 2 years ago. A graduate of Butte High School, she completed initial nurse training at Tacoma General Hospital, Washington, and later graduated from a public health nursing course at the University of Washington in Seattle. For a time before her enlistment she was a member of the Murray Hospital nursing staff in Butte.

Price of Crude Petroleum

EXTENSION OF REMARKS

OF

HON. LYLE H. BOREN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. BOREN. Mr. Speaker, on April 18 I introduced H. R. 2940 which relates to the price of crude petroleum. I desire at this time to call further attention to the bill and the general subject involved.

The bill as introduced is identical with the Disney bill H. R. 2887, which passed the House on December 13, 1943, but was never acted on by the Senate. The principles of the bill were then offered as an amendment to the Price Control Act and this amendment was tentatively passed by the House on June 10, 1944, which action was reversed and the amendment defeated on June 14, 1944. There, the matter ended so far as action by the Seventy-eighth Congress was concerned.

That, however, was not the end of an economic and industrial injustice that has existed since price control began in 1941.

The bill which I have introduced has been commended by many Members of the House. It has been criticized by others for the same reason that the Disney bill was, namely, that the Congress should not attempt to fix specific prices of a commodity. This, of course, it does not do; it offers a standard by which the fairness of crude oil prices may be measured. We have legislated heretofore along this line with respect to some other commodities.

Like the attempts made previously to act legislatively on the oil price question, I offered this bill to seek correction of an outstanding injustice that has been perpetrated and maintained by the agency to which control of prices has been entrusted. This agency has not been guided by the intent of Congress in this matter, but has substituted for that intent a philosophy of its own whose origin I cannot attempt to explain except to say that it grew in part out of the incompetency of the men who were given authority over the matter of oil prices. They have never gone much further than to look at the earnings statements of the largest oil companies and conclude that all the oil companies are doing very well and that the thousands who produce crude oil exclusively are to be judged by the same standards as those who make profits from the operation of pipe lines, refineries, and marketing facilities.

The State of Oklahoma has imposed new and additional taxes on its people in the session of the legislature just closed. Under a decent price for crude oil it probably would not have had to do so, as there is a 5-percent tax on the gross value of crude oil. The legislature of Oklahoma knew that the need for additional revenue could not be met by the oil producers. The price of oil is little more than in 1941, and the State's production fell about 30,000,000 barrels in 1944 under the 1941 total. Meantime, the producers' costs went up 30 percent and more.

The bill I introduced provides a parity formula for fixing the ceilings on crude oil prices. The price of crude oil today, nationally, is 62 percent of parity with respect to all commodities.

The producers of oil have cried out for 4 years for recognition of the simple, basic economics of their situation. They have not relaxed their efforts to meet the ever-increasing demand for their product. There have been no strikes, no shutdowns. They are Americans, and they have done their utmost to serve America. From time to time during this period they have suffered casualties. There have been many sales of producing properties to the companies whose profits come from the manufacture and sale of products, and who have sought to safeguard their future supply of raw material by such purchases. Many wells have been abandoned. In my district there is one field which in 1943 produced 3,800,000 barrels. The wells generally produce considerable water with the oil and the cost of producing is greater because of the volume of fluid that must be pumped to get the oil. In 1944 the operators began giving up the wells, and they abandoned 59 of them. Production in 1944 was about 1,100,000 barrels less than in 1943—more than 1,000,000 barrels of badly needed oil that a higher price would have brought to the surface. It will never be recovered, for only an extremely high price for oil would enable anyone to redrill the field. More wells in this field are being sold to the salvage dealers, and with a continuance of present conditions it will disappear completely. The subsidy on oil production which is being paid on some classes of small wells does not apply to this field, for the average per well daily production is higher than the upper limits that were set.

This is one example. We can find many more. No industry can continue to operate properties whose costs exceed income.

When the war began the oil industry had a substantial capacity to produce which was in excess of the demand for oil. This has been used up and conservation principles are being violated right and left to get the oil out quickly and

meet the war needs, at the expense of the final total recovery from fields now wastefully produced.

We would have lost this war without a supply of oil adequate to the military needs of ourselves and our allies. That supply came from this country, and for a long period it was nowhere else available.

National security demands that we replenish our ability to produce oil. It demands that we provide conditions which will enable the oil industry to operate, not abandon, present reserves. It is a blind, ignorantly conceived policy that is being followed. There is not a barrel of crude oil produced today that is not being sold at less than the cost of replacement through discovery of new fields.

And simple justice demands that the large army of oil producers who have served this Nation so capably in the past be encouraged to continue their service, not driven from their lifetime occupation.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. JOHN B. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. SULLIVAN. Mr. Speaker, under leave to extend my remarks, I include a resolution adopted by the officers of the St. Louis locals of the United Electrical, Radio, and Machine Workers of America, CIO, in tribute to Franklin Delano Roosevelt.

This resolution also pledges cooperation to President Truman and calls for redoubled efforts in winning the war and establishing a lasting peace:

In the deep sorrow we all feel for a truly great man who was our friend, we ask the members of the UE to do honor to his memory not in mere words, but in deeds. We must rededicate ourselves to the great principles for which he stood, and do our full, unstinting part to make a reality of his aim of lasting peace and security for the peoples of the whole world.

During his entire 12 years in office, working people have known that Franklin D. Roosevelt was their friend. They have come to realize that he was also one of the few really great men of history, a peerless world leader for freedom and democracy, for the abolition of Fascist tyranny and aggression. In our sorrow at his death we are one with the whole freedom-loving people of all lands.

In honor and gratitude to Franklin Delano Roosevelt, we must redouble our contributions to the war effort—in loyal effort on the production line in support of our victorious fighting fronts, to the final victory over Germany and Japan—and carrying out labor's responsibility to help unite the American people and the United Nations for Victory and Peace.

Upon Harry S. Truman, of Missouri, has fallen the mantle of President Roosevelt. He is our President, our Commander in Chief, our member of the United Nations Big Three. We know that he will fill that role worthily and effectively with full devotion to the principles and leadership of his dead chief.

Harry Truman needs the full support of all Americans in carrying out that program. He assumes office at a critical period in history, when the final and decisive battles are being fought against German and Japanese fascism, when decisions must be made which will affect the future of our country and the world, the peace and well-being of the people, for generations to come. Taking over the duties of President Roosevelt after his leadership of 12 years is a tremendous responsibility for any man.

It is our duty as working people to close our own ranks and help units the whole Nation in uncompromising unity behind President Truman. Let us not tolerate the enemies of unity, nor the carping critics and the loose-tongued whose careless talk would undermine the leadership of our new President. Let us go on with full confidence in his high office and his leadership.

Behind President Truman we shall work with greater determination than ever to see this fight through—the fight to complete victory in the war and unity with our allies in the councils of the United Nations, for a world of freedom, democracy, and prosperity.

In the spirit of Franklin D. Roosevelt, we carry on.

William Sentner, general vice president; Robert B. Logsdon, international representative; Eustus Brendle, president, Local 1102; James Click, business agent, Local 1102; J. W. McConnell, president, Local 825; Archie Wayne, recording secretary, Local 825; Orville Munzer, vice president, Local 825; Frank Lenhardt, president, Local 1108; Ray Mertens, president, Local 1104; Louis Wagner, vice president, Local 1104; Lowell Waldron, secretary-treasurer, Local 1104; R. J. Bergman, president, Local 816; Clarence Bingaman, president, Local 810.

In the Air

EXTENSION OF REMARKS

OF

HON. JOHN W. GWYNNE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. GWYNNE of Iowa. Mr. Speaker, in accordance with permission granted me to extend my remarks, I include an editorial from the Wellsburg Herald, Wellsburg, Iowa:

IN THE AIR

More and more are men in industry and agriculture voicing a fear that the stage is being set for total Government domination of basic production activity in the United States.

The farmer senses it just as he senses changes in the weather. The industrialist senses it, banking senses it, the electric industry has definitely felt it, transportation sees it growing in various branches of that industry, and many lines of business are aware of pressure that makes private operation constantly more difficult.

When bureaucratic demands are finally made that industry cannot comply with, those who would have Government become all powerful, will say: "Private enterprise has failed, Government must take over."

No one has more to lose before the onward march of all-powerful Government than the workman. Wherever Government dominates the individual becomes a slave to an official aristocracy. He finally loses his liberty when a benevolent despotism feeds him with a gilded spoon for which he has to pay.

Peace With Honor

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter and editorial:

THE MARYLAND CITIZENS
COMMITTEE FOR DEMOCRACY,
Baltimore, Md., April 23, 1945.

Hon. THOMAS D'ALESANDRO,
House Office Building,
Washington, D. C.

DEAR MR. D'ALESANDRO: We are sending the enclosed editorial to you because we thought you would like to have the opportunity to read Gerald Johnson's personal tribute to President Roosevelt. We think it is very beautiful and expresses so well what is in the hearts of so many of us.

We would appreciate it if you would have it read into the CONGRESSIONAL RECORD.

Sincerely,

ELIZABETH HOLT DOWNS
(Mrs. James R. Downs),
Corresponding Secretary.

PEACE WITH HONOR

(By Gerald W. Johnson)

"The great old chief is safe at last—he sleeps well;
Treason has done his worst; nor steel nor poison,
Malice domestic, foreign levy, nothing
Can touch him further."

To those of us who have followed him faithfully down all the thundering years there is grim comfort in the thought. Never before has it been true. From that moment in 1933 when he returned from a brief vacation to take up the burden of the Presidency, only to find at Miami a lunatic lurking in the dark with a pistol, he has been the target of every sort of sniper.

The rage of the common enemy is understandable. But it's the "malice domestic" that is beyond belief. Friday night, when they were bringing his body up from Georgia while a weeping Nation stood by, I found in my mail a pamphlet—written by a person, thank God, to me unknown. It was snarling, vicious, mean beyond the limit that one likes to attribute to humanity. It ended, "The Roosevelts seem to be having so much fun. And the world is drenched with blood and tears."

From now on, however, Roosevelt is safe from the assaults of enemies, foreign or domestic. Only the measured judgment of historians will be worthy of respect henceforth, and what their verdict on his career will be it is far too soon to know. You can measure the height of a molehill in a minute, but to determine the true altitude of a mountain requires long and careful calculation.

Yet already certain things about him are easy enough to see. One is that his is among the most dramatic lives in all human history. In part, this was the result of circumstance. It was fate, not his own choice, that brought Roosevelt to power within the same 24 hours

that saw Hitler's elevation. Roosevelt was inaugurated for the first time on March 4, 1933, and on March 5, 1933, the German Reichstag passed the enabling act that gave Chancelor Hitler complete control of the nation.

Each man headed a nation in the depths of despair. Germany and the United States alike were economically prostrate. Germany and the United States alike faced a huge problem of unemployment. Germany and the United States alike saw the whole social system in danger of disintegration. Germany and the United States alike looked to a new leader to devise new methods of dealing with an ancient evil.

Each man attacked the problem according to his own character. Hitler chose the autocratic method, Roosevelt the democratic. Hitler tried to frighten his people into action, Roosevelt tried to encourage his. Hitler raised a thousand bugaboos—Jews, Russians, Frenchmen, Englishmen, labor unions, books, churches, Freemasons—and warned the Germans to beware of them. Roosevelt said, "All we have to fear is fear itself." Hitler relied upon the spur of hate. Roosevelt relied upon the spirit of the good neighbor.

So the long duel began, the contest that was to last for a dozen years. At that time Churchill was not even in the picture, and Stalin was too busy in Russia to pay much attention to what went on outside. For years the leaders of the two divisions of mankind were Roosevelt and Hitler, and at every turn their policies were diametrically opposed.

John Bunyan wrote it centuries ago in the Pilgrim's Progress. It was the age-old contest between Christian and Apollyon, between the man and the demon. At first the demon was spectacularly successful, and the issue was long in doubt. The man, indeed, was wounded unto death, but in the end the demon was chained for a thousand years. Who doubts that it will be so again? Our champion lies dead, but every breeze from Europe brings fresh assurance that the covenant with death shall be disannulled, and the compact with hell shall not stand.

Yet while this dramatic contest will enchain the imagination of future generations, we who were upon the scene should be able to understand simpler, human things. This man, himself disabled, who risked his own fortune to bring help to the afflicted when he bought the Warm Springs property and dedicated it to the service of victims of infantile paralysis; this cripple who traveled tens of thousands of miles, by land, by sea, by air, for a great part of the way in danger of a resolute and ferocious enemy, and every mile of the way suffering fatigue, discomfort, and strain to which no cripple should be subjected, in order that you and I might be safer; this man, who dared walk arm in arm with death as others walked with an old friend, was a hero in the great tradition.

Therefore those of us who followed him can walk today with heads erect, apologizing to no man. We may not be much ourselves, but at least we have what it takes to know a great man when we see one. When we chose a leader we did not pick any waverer, any faint heart, any sunshine soldier. From the moment his first call sounded we knew "it is Richard, it is Raymond, it is Godfrey at the gate," and from that time until the black day last week when taps wailed over the gun carriage that bore his body, we had no reason to change our minds.

We are men of the twentieth century, in some ways the most terrible, the bloodiest, the fiercest in history. The follies of the twentieth century have been colossal, its crimes titanic, and to some extent all of us are implicated in them. Yet in some ways the greatness of that century has been proportionate to its evil. Even to us small men, helpless to shape the gigantic events happening around us, the century has presented the opportunity to choose whom we would serve. Not every generation is allowed the chance to follow two of the mightiest heroes of the realm of the mind and the spirit. In some ways it is a misfortune to have been born into the twentieth century; but the century has allowed to us the honor and pride of having followed first Woodrow Wilson and then Franklin Roosevelt.

The great old chief is safe at last, and although his going has left us desolate, it was not really mournful. For it was with him as it was with Mr. Valiant-for-Truth, when he stood at the brink of the River of Death; so let John Bunyan have the last word:

"My sword I give to him that shall succeed me in my pilgrimage, and my courage and skill to him that can get it. My marks and scars I carry with me, to be a witness for me that I have fought His battles who now will be my rewarder . . . so he passed over, and all the trumpets sounded for him on the other side."

Address of William B. Ziff

EXTENSION OF REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. FLOOD. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert the following address made by Mr. William B. Ziff, noted author and publisher. This speech was delivered at Carnegie Hall in New York City on April 19, 1945, at a meeting sponsored by the American League for a Free Palestine on the occasion of the second anniversary of the Battle of the Warsaw Ghetto. Mr. Ziff's strong contention that Hebrew Palestine should be represented at San Francisco, just as the mandated territories of Syria and Lebanon are represented, and that the solution of the age-old Hebrew problem has a vital bearing on the stability of Europe and the Middle and Near East, must be given serious consideration. The text of Mr. Ziff's address follows:

The battle of the Warsaw Ghetto, in which 40,000 Jews—consisting almost altogether of starved little tradesmen who had never even held rifles before in their hands—died, will rank as one of the epic battles of this war. With smuggled small-arms, these men and women heroically fought for every street and every house and did not yield until the last survivor finally died. It was necessary for the Germans to use against this embattled group of fighters a total machinery of war, including tanks, airplanes, and flamethrowers. The engagement cost them several thousand men and the use of a great deal of ammunition and other war material. It was the first organized revolt against Hitler. This tremendous effort on the part of a doomed people received scant recognition everywhere, but will rank in history as one of the great events of the war.

It is a tragic fact that almost all of the five million who died could have been saved, if nations had prepared a sanctuary in the mandated Palestine. There was room for six million there, as is attested by the fact that the 750,000 Hebrews who live there live on about 3 percent of the land. The thing which stood in the way was the opopsition of a small group of Colonial Office functionaries who were determined that no western people capable of building factories should inhabit this part of the world. The result was a continuous effort of sabotage on behalf of a group of Arab tribes—none of whom have been pro-United Nations during this war or the previous war, with the exception of the small group that was with Lawrence.

In the present war, Arabia actually was on the enemy side. It was the British Army and a small group of Hebrew guerillas who saved the Mosul refineries from falling into the hands of the German officers who were working with the Iraqian troops. Hebrew Palestine gave the allies in the most critical moment not only an arsenal of factories, but also 30,000 men who made up a large part of Montgomery's army. The Arabs were either apathetic or hostile to the United Nations. Thus Hebrew Palestine was the only ally the United Nations had in this part of the world.

Only when it was clear that the Germans were already beaten did the Arab kings jump on the United Nations bandwagon. At the present time the Arab kings, under the stimulation of Colonial Office functionaries, are talking in grandiose terms of a great pan-Arabia. Such a pan-Arabia can never exist except in the minds of imperialistic politicians. The Arab kings themselves are dictators, the very tyrants we are fighting against. The tyrant Ibn Saud represents everything the soldiers of the United Nations are fighting against. He is a one-man tyrant whose people have no rights whatsoever, and in his country Christians and Jews cannot even live. Yet it is this man and other Arab kings who have been invited to sit with us in San Francisco as full partners, even though they are anti-Christian and wish to solve the problem in Palestine by the murder of all the Hebrews there. Ibn Saud's prime minister lauded Hitler's methods of dealing with the Hebrews.

Yet it is these men who are now getting lease-lent arms from the United States.

This would be one of the most tragic occurrences, to give the Arab kings lease-lent arms, even from the viewpoint of democratic Arabs who are seeking to overthrow them.

Even today the question of the unfortunate Hebrews of Europe cannot be solved independently of Palestine. They must be allowed to reconstitute themselves there as one of the recognized nationalities. They cannot return to Europe, which has been thoroughly infected with the Nazi doctrine. This is true even of France.

The great opposition to the return of Hebrews to Palestine comes not from the Arabs, but from Colonial Office functionaries. It is they who have instituted a set of anti-Hebrew laws, seeking to prevent the Hebrew from coming in, to prevent him from owning land, and to keep his colonization from being effective.

It will be necessary for the San Francisco Conference to consider this entire problem, and to get independent reports on it, either by the Mandates Commission of the old League of Nations, or by a newly appointed commission. Colonial office functionaries cannot be allowed to sit in judgment of their own crimes.

Hebrew Palestine is a national entity which has fought valiantly on the side of the United Nations in this war. It should be represented in San Francisco. The fact that it is mandated territory would not prevent this. Lebanon, and Syria, and other mandated territories which did nothing on our side during this war, will be represented at San Francisco, but the Hebrew people is refused representation.

No part of the world problem can be solved until justice is done to these first of the victims of Hitler's fury, the homeless Hebrew people of Europe. This is not a problem which can be disposed of at will by English colonial office functionaries. It is a world question which relates directly to the stability of Europe and the Middle and Near East, and must be considered in this light.

Oregon Troops Overseas

EXTENSION OF REMARKS

OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. ANGELL. Mr. Speaker, we from the State of Oregon are proud of the record made by Oregon troops and also servicemen who received their training in the State of Oregon. They have made an outstanding contribution toward the winning of the war. An editorial appeared in the Portland Oregonian in its issue of April 23, 1945, commenting upon this record. I include the editorial as a part of my remarks, as follows:

OREGON TROOPS OVERSEAS

He who writes the history of this war will have to use many chapters for troops recruited or trained in Oregon. Press dispatches revealing that the Ninty-sixth Infantry Division is on the front line at Okinawa, the One Hundred and Fourth in Halle, and the Ninety-first in Bologna round out the record of Oregon troops on major fronts throughout the world—and a proud record it is.

The Ninety-sixth, commanded by Maj. Gen. J. L. (Smiling Jim) Bradley, was activated at Camp Adair in August 1942, was trained additionally at Camp White, and participated in the Oregon maneuvers of 1943. It went overseas in time to storm the beaches of Leyte on October 20, 1944, where it killed 7,677 Japanese soldiers and was commended by General MacArthur. The story of its fight on Okinawa has not been told, for the decisive battle has yet to be fought.

Those who know General Bradley and the training he gave his selectees from all over the Nation—training so tough that more than 3,000 men failed to make the grade—know that the Ninety-sixth will more than hold up its end in the dark days of battle ahead. The division which did not have time to nickname itself may find a name by popular acclaim on the field of battle.

Oregon's own Forty-first Division, the hardest fighting unit in the Pacific, is secure in its grimly won laurels, after more than 3 years of jungle fighting and seven major assault invasions, from New Guinea to Mindanao and Palawan. But the Forty-first's glorious record does not dim the honors which have been won by Oregon's adopted divisions, the Ninety-sixth, the Seventieth, the One Hundred and Fourth, and the Ninety-first.

Oregon took the Seventieth Division, trained at Camp Adair under the colorful Maj. Gen. John E. Dahlquist (now commanding the Thirty-sixth on the European front), to its heart when it was activated as the Trailblazers in June 1943. The Seventieth went overseas in the fall of 1944, and several units fought with the task force which captured Wingen from Nazi S. S. (Elite Guard) troops in a bitter 3-day struggle in January. Late in February the Trailblazers went into action as a division, commanded by Maj. Gen. Allison J. Barnett, for the first time. They helped wrest the industrial Saar from the Germans, and now, presumably, are driving into Bavaria with other units of Lt. Gen. Alexander M. Patch's Seventh Army.

The One Hundred and Fourth Division, activated at Camp Adair in September 1942, and with many Northwest men in its ranks, landed in France 2 years later, fought first with the Canadian First Army, then joined the American First. The Timber Wolves were commended by the corps commander for seizing the great industrial area, Eschweiler-Weisweiler-Stolberg, and termed "one of the finest assault divisions we ever had in this corps." Led by Maj. Gen. Terry Allen, the One Hundred and Fourth in February plunged through the Roer River defenses in the great Allied drive onto the Cologne Plain. Piling aboard tanks, the Timber Wolves surged into the heart of Cologne on March 5.

Now the Timber Wolves have taken Halle in a terrific drive by Lt. Gen. Courtney H. Hodges' First Army on the Nazis' central front after the initial surrender terms of Count Felix von Luckner, the "sea devil" of the last war and No. 1 citizen of that city, had been rejected by "Terrible Terry" Allen.

The hearts of a lot of World War No. 1 veterans beat faster when the famed Ninety-first (Wild West) Division of St. Mihiel, Meuse-Argonne, and Ypres-Lys fame was reactivated at Camp White in August 1942. Official dispatches from overseas on the progress of the far West's most famous division of the last war have been few, but in late summer, 1944, the Three Hundred and Sixty-third Infantry Regiment of the Ninety-first was among the first units to drive into the northern Italian cities of Livorno and Pisa under the command of Col. W. Fulton Magill, of Portland. Now the division has occupied Bologna.

And the story would not be complete without the record of the Forty-sixth General Hospital in France, organized at University of Oregon Medical School with a staff of Oregon doctors and nurses in July 1942, and veteran of north Africa. The unit was awarded the meritorious service plaque in January. The highest praise was given it and its chief, Col. J. Guy Strohm, of Portland, by ex-Ambassador William C. Bullitt, in a letter to Life magazine.

We think no other State has contributed a greater proportionate share in victory than the fighting sons and daughters, native and adopted, or Oregon.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following excellent poem by Mr. Henry Gillen which appeared recently in the Boston (Mass.) Post:

FRANKLIN DELANO ROOSEVELT

(By Henry Gillen)

He who has known the wonder and the woe
Of depths and mountaintops in men's affairs,
He who has raised the poor and felled the foe,
And borne the endless burden of our cares,
Unsparing and unceasing in the quest
That night be starlit and the fearsome day
Be calmer, kinder, gentler, nobler, lest
Man and his monuments shall pass away,
Now at the zenith finds a sweet surcease
While battles rage and youths as splendid die,
Turning away from strife, he comes to peace
That God assures and fiends cannot belie,
Leaving the heritage as he departs,
Of goals to gain with courage in our hearts.

Jefferson Day Address of Hon. Albert M. Rains, of Alabama

EXTENSION OF REMARKS

OF

HON. BROOKS HAYS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 23, 1945

Mr. HAYS. Mr. Speaker, under leave to extend my remarks, I include the following address by the gentleman from Alabama, the Honorable ALBERT M. RAINS, at the Jefferson Day dinner in Montgomery, Ala., on April 13, 1945:

Mr. Toastmaster, ladies, and gentlemen, I am very grateful for that generous, though undeserved introduction. I am grateful, too, for the high honor and pleasant privilege you have accorded me with your invitation to be your speaker on this auspicious occasion. I am proud also, for the opportunity to get away from Washington for a stay, that is all too brief, with my friends at home.

Here, tonight, my friends, in the historic and beautiful capital city of my beloved native State, on this the birthday of the immortal Thomas Jefferson, it is altogether fitting and proper that we, as Democrats meet to review, in brief, the glorious record of our party; to renew our faith in the proud principles of Democracy, and to rededicate our efforts to the cause and call of Jefferson.

In June and July of 1776, in Philadelphia, a lean, lanky, freckled-faced man, wearing ill-fitting clothes, sat in a cheaply furnished rented room, busied himself day and night writing a paper entitled "A Declaration." John Adams said that he was chosen for this momentous task because, as a Member of the Continental Congress, he had earned "a reputation for literature, science, and a happy talent for composition." Out of his magnificent mind and memory, filled with words of wisdom gained and gleaned in years of study and reflection, the document later to be acclaimed by all mankind as the greatest declaration of human rights since the Magna Charta came into being.

It is this dramatic scene out of the history of a people struggling for independence, by which Jefferson won the admiration of all the liberty-loving people of the world.

Perhaps this masterpiece, setting out in burning eloquence the right of men to be free, and declaring the self-evident truth that "all men are born free and equal," and are "endowed by their Creator with certain inalienable rights" is the crowning glory of Jefferson's life.

A few weeks ago I was privileged to visit the home of Jefferson at Monticello. While there, I saw the plain, white shaft that marks the last resting place of all that was mortal of this immortal man. On the modest marble stone was engraved the epitaph by which the great Democrat wanted to be remembered: "Here lies the body of Thomas Jefferson, the author of the Declaration of Independence and of the Virginia Statute of Religious Freedom and the founder of the University of Virginia."

There was not a word to tell of the prestige that was his; no line to commemorate his long life of political achievement; no mention of the high offices to which he was elevated by the people. As I stood there and recalled that he was President of the United States, Vice President, Secretary of State, Governor of Virginia, and Ambassador to France; that the people who loved him gave him every honor to which he could aspire, I was deeply moved by this simple, but meaningful self-written epitaph. Jefferson, the

great Democrat, preferred that posterity should remember him not for the personal attainments which were his, but for the unselfish service rendered to mankind in the authorship of the great document of human liberties, in the writing of the statute of religious freedom, and in the founding and fostering of a great university for the education of the youth of the land.

There are those who will portray him as the idealistic, the unrealistic dreamer of dreams; others erroneously point to him, and to certain of his printed and uttered statements in support of their animosity toward liberal, progressive government; still others, out of the wealth of their own wishful thinking, exalt him as the champion of unchanging status quo. Some, because of deliberate, inborn reaction, see in his speeches and writings the anathema of all present day, liberal trends in American thought and Government. Jefferson was never a defender, either in his own country or abroad, of an imperfect or unjust state of being, but always believed in the necessity of change as the circumstances warranted and justified. As examples of his liberal faith, and as positive proof of his eternal belief in the sovereign will of the people, he wrote shortly before his election to the Presidency, the famous and oft quoted words, "I have sworn upon the altar of God, eternal hostility against every form of tyranny over the mind of man."

All men agree today that Jefferson was our most eloquent and outstanding apostle of democracy. It is true that he always desired a mild and inoffensive type of revolutionary change, insisting that custom and precedent be broken only to permit a new and better order for the greater freedom of the people. None of us can doubt that we live in a revolutionary era today. Living as we are in a changing world, it is essential and necessary that the processes of government change to meet the needs, desires, and ambitions of a democratic people. It is unjust to the memory of Jefferson to attribute to him the authorship of any idea that government should be weak, or should revert from the purpose which Jefferson stated as the end sought. "The freedom and happiness of man—are the sole objects of legitimate government."

So, today, my friends, as we honor Jefferson, we honor the democratic concept upon which this Nation was born, and we honor the great political party which was founded on his faith in the right of the people to rule, and in his eternal belief that all men should be free and untrammeled.

To review and recall the record of the Democratic Party is to restate the history of our country. It is an accepted historical truth that in every great national emergency, the people have turned for leadership to the Democratic Party. It is to the everlasting credit and glory of our party, and to its leaders down through all the years, that we have never failed to give to the Nation and the people, the leadership that the occasion demands.

A nation founded in the democratic, freedom-loving principles of Jefferson, found itself threatened by greed, graft, corruption, and special privilege, in the administration of another great Democrat—the hero of Horseshoe Bend and of New Orleans—Andrew Jackson. It was the strong iron will of Jackson, his brave and courageous heart, his everlasting determination to preserve the Nation for the people, that enabled him to save it in one of its darkest days.

Touching, as I must, only the high spots in the brilliant history of our party, we see next the "schoolmaster of Princeton" as he assumes the duties of President. Born, bred, and schooled in the principles and precepts of democracy, with a firm belief in the ability of the people to rule; recognizing also that changing times and circumstances demanded that the Government provide more protection and service to the people, Wilson's administration enacted into the law of our land some far reaching, and at that time considered radical an revolutionary legislation. The Federal Reserve bank for the stabilization of our currency, and for the elimination of the evils of the money system that had plagued our people over all the years. The Adamson 8-hour-day law, the first major gain for the men who toil in our great industries, and on our railroads. The Federal Land Bank System for loans for farmers, the beginning of the system of farm loans, the continuation of which has meant so much to Southern farmers and to those of the Nation.

And then finally, and much against his will, Wilson was forced to lead his Nation into war. A war in which many of you, here tonight, participated; a war which was to "make the world safe for democracy." Under his proud leadership as Commander in Chief, and as President of the Nation, the gallant men of America, the fathers of the soldier, sailors, and marines who fight today, gave to the world an epic lesson in gallantry all the way from Chateau Thierry to the Argonne Forest. Armed with the holy cause of free men; backed and supported by a nation whose destiny was at stake, these "doughboys" of another day, broke the back of German militarism, and then came Versailles.

To that conference went Woodrow Wilson, tired and sick of the horrors of war, convinced in mind and heart that humanity's only hope for a peaceful world was an international peace organization. For weeks and months he labored with the statesmen of Europe of that day, as they played their power politics around the peace table, and finally, by the sheer force of his will, the might of his intellect, he was able to bring back to America a plan for the perpetuation of world peace.

The Nation was weary of war, and in the hearts of the American people was the ever-present desire to return to "normalcy" again. All over America discord, dissatisfaction, and disapproval of the League of Nations, gained headway. We, as a people, were already, within a few short months, forgetting the price we had paid in blood and treasure in "the war to end wars."

Wilson was being termed as an idealist, a visionary, a dreamer. Recognizing the opposition that was abroad to the League of Nations, he assumed his last major role as a great statesman. Broken in health, and against the advice of friends and physicians, he made a nationwide speaking tour, in a last-ditch fight to preserve for America and the world its chance to live in peace. From coast to coast he carried the message to the Nation of the hope and opportunity for world peace.

Finally, one afternoon at a stop made by his special train at a little town in Arizona, he stood on the platform and made a speech to the people gathered. Among other things, he said, "We have just come through a great world war. Unless America, with the rest of the world, is willing to enter into an international agreement for the preservation of the peace of the world, the little boys now in the arms of their mothers here in this audience, 25 years from now will be bearing the brunt of bloody conflict on battlefields all over the world. Humanity has been able to survive this war, terrible and costly though it has been, but it will be difficult for humanity to survive another." This was his last speech. He returned to the White House a disillusioned and disappointed man. Soon Wilson's arch opponents, amid the plaudits of the multitude, buried the League of Nations, and thus paved the way for the bloody holocaust in which we are now engaged.

To my mind, my friends, Wilson was the peerless leader, the pure Democrat, the man of vision, and the prophet that was "not without honor, save in his own country."

And then, after that sorry interlude in American history, we passed into the "normalcy" of Harding and Coolidge, and then into the panic of Hoover.

Once again the Democratic Party was called upon to furnish the leadership, and to find a way out for a nation in distress.

There are those who are anxious that the people of America forget the black night of depression brought upon this country by Republican misrule, greed, graft, and mismanagement. I shudder as I recall the plight of the people, not only in Alabama, but in the Nation; farms were being sold under the auctioneer's hammer, schools were closed because there was no money with which to pay the teachers, banks were failing with monotonous regularity, the smokestacks of industry were filled with cobwebs, long lines of eager, anxious workmen were in the bread lines, with empty stomachs and fear-filled faces. The black hand of dry rot was clutching the throat of the Nation. And then, to power came the administration of Franklin Delano Roosevelt—the man of faith, hope, and courage. To millions today, and certainly to the generations of the future, looking back across the pages of history, he will be known as a man of destiny.

As he assumed office, the people in desperation were approaching revolt. Under his leadership, and with the help of the farsighted statesmen of the Democratic Party, a new day was ushered in for America. Mistakes were made, of course, but it was no time to falter, and certainly not time to fail. Assistance was given to the farmers whereby they could save their farms from mortgages; markets for their crops at reasonable prices were provided; workmen were given jobs in industries whereby they could feed and school and clothe their families; industry reaped reasonable profits; deposits in banks were guaranteed; social-security legislation was enacted.

But there is no need for me to recount for you the legislation that has been enacted during the years of the Roosevelt administration, it is contemporary history to you. It is sufficient to say that the progressive, liberal legislation promulgated by this administration has won the support of the masses of the people of America, and the record made by this administration has run the gauntlet of a national election on four given occasions.

My friends, we can hardly pause to consider the past because of the awful impact of the present, and because of our anxiety and hope for the future.

There were those in the despicable land of Hirohito, and those in Hitler's Germany, and the little tin-horn Mussolini, who referred to "the decadent democracies," and to us in particular, as being too soft to wage war even in our own defense. None of us can ever forget that Sunday afternoon, December 7, 1941, nor the days and months that followed. How the wrath and might of a great nation rose in a mighty torrent! How the young men of America, answering the call of their country, tripped off to battle with a smile on their face, and a song in their heart! How the men and women in industry and labor and on the farms of America, bent in ceaseless toil to the task of building the greatest navy and the greatest army on the face of the earth!

As I contemplate and reflect on the gallantry of the American men who bear arms in this the greatest of all conflicts for human freedom, the grateful words of Winston Churchill as he spoke of the young men of the Royal Air Force who had just won the battle of the blitz over London, come to mind,

"Never in the history of the world, have so many owed so much to so few."

On a hundred battlefields all over the world the valor of American men and the might of American arms, has carried, and is carrying the Stars and Stripes to victory. Mussolini has been toppled; the cruel and inhuman reign of Hitler is practically at an end; the blazing guns of American war ships and the fire of American bombs is burning down the cities of the empire of the Rising Sun; victory is near at hand. A victory out of which we want nothing but peace. Other nations may fight for territorial gains; other nations may fight for positions of world influence in international trade; but America, thank God, fights not for selfish gain.

Surely this time, my friends, we will benefit by the mistakes of the past; surely this time our feet will be guided by the lamp of experience; surely we will remember the admonition given to America by President Roosevelt in his message to Congress on March 1, "There can be no middle ground—we shall have to take the responsibility for world collaboration, or we shall have to bear the responsibility for another world conflict." And so, another great Democratic President pleads with America to assume its rightful role, as a leader among the nations of the earth, for the perpetuation of world peace, and for the elimination of cruel, murderous war. We owe it to the war weary people of the world, to the starving millions of Europe and of Asia, to the fathers and mothers of America, and most of all to the gallant men and women who have fought and died in this war to see that this never happens again.

Across my desk come many letters from men in uniform; men fighting for the cause of freedom and for peace. From a young lieutenant, who has since been killed in action, came this statement, "The only thing that I want after this war is over is to see that these G. I. kids get the breaks they deserve. They are the best in all the world, and we all know that they are fighting for the best country in the world. I have seen them in battle," he wrote, "I have seen them die, and if ever a man has seen courage, I have. I want to be assured that when this war is over our country will take its rightful place in preserving the peace that we are going to win. I want to be sure that all the people back home are going to join us in seeing that this never happens again."

There is today pending before the Congress of the United States the first of a series of legislative measures providing for the participation of the United States in an international peace organization. The House Committee on Banking and Currency, of which I have the honor to be a member, has for many weeks been considering legislation known as the Bretton Woods proposals, which has for its purpose the elimination of economic warfare between and among the nations.

By and large, it appears that the vast majority of the people of our country favor the adoption of Bretton Woods proposals. However, there are some who are steeped in isolationism, who oppose this bill and all measures of world collaboration—setting up as the basis of their opposition the fact the danger that the United States will lose its investment in the stabilization fund and in the international bank, which would amount to eight and three-quarter billion dollars. While it appears that the investment itself will be sound from an economic standpoint, it certainly seems foolish to me to oppose entry of the United States into this program for world collaboration and for the perpetuation of the peace, when the war in which we are now engaged is costing us approximately a half billion per day. If we are to fail in our efforts at world peace, it is of little consequence as to whether we have prosperity or depression, whether we have a balanced budget or an unbalanced budget; whether we are a creditor nation or a debtor nation; since another world war, fought as it would be with the new and ingenious devices of death and destruction, would mean the complete destruction of our Nation, the obliteration of the world, and a total blackout for civilization. There are those who say that our plans for world peace, Bretton Woods proposals, the Dumbarton Oaks agreements, and the agreement which will come out of the San Francisco Conference, will not succeed. I can only think of the awful and terrifying alternative. I can only see what will happen if our efforts at world peace do not succeed. It does not take a prophet or visionary to foretell what the fate of the world would be, and thus to every American who remembers the sacrifices in the war in which we are now engaged is given the positive compulsion to see that the peace of the world is perpetuated.

All of us agree that the peace this time should be a just and equitable peace—the people's peace. Too often heretofore the people have fought the wars and won the victories, made the sacrifices in blood and tears, while around the peace table at the peace conferences the politicians of the world have frittered away the chance of the peace-loving men and women of the earth to end war. It must not happen again. This is our chance, and our last chance, and so every Democrat, every American, every man, woman, and child should urge upon the Congress of the United States—upon all in authority—the compelling necessity for positive action now.

And, my friends, if we, the people of America, fail to do our duty in this crucial hour within the next 25 years, we may be looking into a television set, we may see the President of the United States, probably a man now fighting in some far-off battle, a man who knows war in all its horror, and filled with eternal and everlasting hatred for its brutality and killing, but because of his official position called upon now to speak to the Senate and the House of Representatives of the United States in joint session. He recounts and recalls recent events that have transpired in international relations; with a sad face and aching heart, he comes to the conclusion of his speech with the fateful words, "I call upon the Senate and House of Representatives of the Congress of the United States to declare that a state of war exists * * *." And then the President may say, as was once said, "God help us, we can do no other." And I say to you, my friends, God help us and the future generations of America if we fail to act now for the preservation of world peace in the future.

Fair Employment Practice Commission

REMARKS

OF

HON. MARY T. NORTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mrs. NORTON. Mr. Speaker, I come before the House today to place on the desk a petition to discharge the Rules Committee from further consideration of H. R. 2232. This is no new procedure for me as chairman of the House Labor Committee. The Rules Committee has continually since 1937, when I made my first request to that body as chairman of the Labor Committee, refused to grant rules to bring constructive labor legislation to the floor of the House.

H. R. 2232 is a bill which is strictly nonpartisan since it is sponsored by an equal number of Republicans and Democrats and the members of both parties are strongly in favor of immediate action. Since it is impossible to get action from the Rules Committee, I am asking all the Members of the House to sign this petition now, today, so that the issue may be discussed freely on the floor of the House and disposed of.

In simple language the bill prohibits discrimination in employment because of race, creed, color, national origin or ancestry. With the opening of the San Francisco Conference yesterday, we have the greatest opportunity to prove our sincerity to the world by adopting this bill. If we in America do not believe in this doctrine, our position at the San Francisco Conference would be impossible to explain. I ask unanimous consent to extend my remarks and include some necessary information concerning the bill. There has been so much misinformation about H. R. 2232 that we hope the Members will read this very clear explanation of exactly what this bill will do and will not do. I regret the necessity of placing a petition on the desk to discharge the Rules Committee from further consideration of the bill but we consider it to be very important to get the bill before the House without further delay. More than 2 months have elapsed since the Labor Committee requested a rule.

QUESTIONS AND ANSWERS ABOUT H. R. 2232, THE PERMANENT F. E. P. C. BILL

1. Question. What does the bill provide?

Answer. It forbids discrimination in employment because of race, color, creed, national origin, or ancestry, and creates a permanent Fair Employment Practice Commission to prevent such discrimination.

2. Question. What groups are forbidden to discriminate by the bill?

Answer. Agencies of the Federal Government;

Employers of six or more persons whose operations affect interstate or foreign commerce;

Federal contractors and subcontractors who employ six or more persons;

Labor unions whose practices affect interstate commerce.

3. Question. What types of discrimination are forbidden by the bill?

Answer. Only discrimination in employment or union membership, i. e., hiring, discharge, wages, seniority, transfers, demotions, upgrading, union auxiliaries, etc. The bill does not apply to discrimination in education, transportation, recreation, voting, or places of public accommodation.

4. What principal minority groups are protected by the bill?

Answer. Thirteen million Negroes, 5,000,000 Jews, 20,000,000 Catholics, 3,000,000 Americans of Mexican or Hispanic origin, 11,000,000 persons of foreign birth.

5. Question. How will the F. E. P. C. be constituted?

Answer. It will be a permanent salaried Commission of five members, appointed by the President, with the advice and consent of the Senate, for 5-year terms. The size of its staff will depend upon the amount of money Congress appropriates for it.

6. Question. How will F. E. P. C. determine whether an employer or union has discriminated?

Answer. By careful and thorough investigation of the complainant's charge, the employer's or union's explanation, and the surrounding circumstances. The burden of proof will be on the complainant, not the

party accused. If F. E. P. C. believes the charge has merit, it will seek to adjust it by informal and voluntary methods. Where settlement is not possible, F. E. P. C. will conduct a full and fair hearing in which the party charged has the right by counsel to present his version of the facts and to cross-examine witnesses. After the hearing, F. E. P. C. will issue a decision and order, but court approval is necessary before the order can be enforced. Its administrative procedure is like I. C. C., F. T. C., S. E. C., F. P. C., F. C. C., and other administrative agencies.

7. Question. How can discrimination be proved?

Answer. The acts or statements of a party charged are used to prove discrimination. In many cases discrimination is flagrant and revealed by union contracts, newspaper advertisements, discriminatory orders to U. S. E. S., or pay-roll records. In other cases, an employer's pattern of rejections or statements made by personnel officers often indicate discrimination. Weak complaints will be dismissed by the F. E. P. C. without even the necessity of a hearing.

8. Question. What penalties are provided for violators?

Answer. No criminal or civil penalties. F. E. P. C. may merely petition a Federal court to compel obedience to its orders. Violation of a court decree is punishable as a contempt of court. F. E. P. C. will not be able to enforce its orders without court approval. Government contracts may also be withheld from violators. Willful interference with Commission agents is, however, made a crime.

9. Question. What is the penalty when a Government official or agency discriminates?

Answer. The F. E. P. C. may request the President to compel obedience to its orders and he may discharge any willful violator.

10. Question. Does the bill require an employer to hire Negroes, Jews, Mexicans, or other minorities?

Answer. No. An employer may hire or reject anyone he pleases, on any basis and for any reason, so long as a needed and qualified person is not rejected because of his race, color, creed, national origin, or ancestry.

11. Question. Does the bill require an employer to hire a particular percentage or quota of Negroes or of any other minority group?

Answer. Definitely not. The bill provides only that employees shall be selected on the basis of their qualifications. A quota plan makes hiring dependent upon race and is, therefore, itself discriminatory.

12. Question. Will the courts be able to review the decisions of the F. E. P. C.?

Answer. An employer or union aggrieved by an F. E. P. C. order may appeal to the courts. A court will review all questions of law. On questions of fact, the findings of the F. E. P. C. will have to be supported by substantial evidence. This is the customary procedure for judicial review of administrative agencies and has been approved by the Supreme Court. Orders against Federal agencies are not subject to review.

13. Question. Does the bill apply the State or municipal employees?

Answer. No; nor does it apply to any State agency.

14. Question. Does the bill apply to retail stores or domestic servants?

Answer. No. It applies only to those employers who are engaged in interstate commerce or operations affecting such commerce and who employ six or more persons.

15. Question. Are religious associations subject to the bill?

Answer. No, because the bill applies only to employers engaged in interstate commerce.

16. Question. Will the bill make possible racketeering, blackmail, or groundless suits?

Answer. No; because the F. E. P. C. will dismiss all groundless charges on its own initiative, without formal proceedings and before there is any contact with the accused employer. The present F. E. P. C. has dismissed two-thirds of all the complaints filed with it. F. E. P. C. thus serves as a necessary safey valve for people who fancy they were discriminated against.

17. Question. What guaranties are there that the F. E. P. C. will not itself be biased and unfair?

Answer. The members of the F. E. P. C. will be appointed by the President of the United States and will have to be approved by the United States Senate. That is the best guaranty of a fair-minded Commission. In addition, the orders of the Commission need court approval before they can be enforced by the F. E. P. C. The Supreme Court requires a "fair hearing" before an administrative agency.

18. Question. What supervision will Congress exercise over the F. E. P. C.?

Answer. Congress will pass upon its annual request for an appropriation. Congress also may, by concurrent resolution, amend or cancel any regulation of the Commission. Congress can at any time investigate the conduct of an administrative agency.

19. Question. Why should we outlaw discrimination in employment?

Answer. It is un-American. It results in low income for minority groups, thus limiting the market for goods and employment opportunities generally. It leads to interracial conflict. It creates a supply of strike breakers. It forces minority groups into substandard conditions of living, detrimental to the community. It depresses wage levels. It decreases the Nation's capacities for war of defense. It injures our standing with the United Nations.

20. Question. Is there enough discrimination in employment to justify a Federal bill?

Answer. The present F. E. P. C. has received almost 7,000 complaints since it was created in July 1943, and it has jurisdiction only over war industries or Government agencies. Many of these complaints involve thousands of workers or an entire industry. In the last 4 months 50 different bills have been introduced in 20 States proposing the elimination of discrimination. This indicates how widespread the problem is. Only one-quarter of F. E. P. C.'s cases originated in the South.

21. Question. Is this a new idea in Federal legislation?

Answer. No. The United States Constitution forbids discrimination by the Government; this bill extends the principle to employers and trade-unions. In the last 10 years Congress has enacted 23 laws which forbid discrimination in their enforcement.

22. Question. Is the bill constitutional?

Answer. Certainly. The United States Supreme Court has repeatedly condemned discriminatory employment practices. A New York law forbidding discrimination by trade-unions was recently upheld as constitutional.

23. Question. Does the bill prohibit prejudice?

Answer. No. Prejudice is a state of mind. The bill prevents discrimination which affects pay envelopes. Discrimination can be eliminated or at least greatly reduced by a firm national policy. An F. E. P. C. will protect those who do not discriminate.

24. Question. Can the bill be enforced effectively?

Answer. No law ever receives 100 percent obedience, but the great majority of employers and trade-unions are law abiding. The small minority will have to conform. Even the present F. E. P. C. without sanctions and with a small staff have been able to stop a great deal of discrimination.

25. Question. Does the bill confer special privileges on minorities?

Answer. No. It merely assures equality of opportunity and equality of treatment. It requires that persons shall be hired on the basis of their qualifications and not rejected because of the immaterial fact of their color, or religion, or place of birth.

26. Question. Why can't the existing F. E. P. C. handle the problem?

Answer. It is a wartime agency without power to enforce its decisions and will terminate as soon as the war is over. Today more than 500 cases, one-fourth of the F. E. P. C.'s case load, are unadjustable at the regional level. People will obey a statute who disregard an Executive order. F. E. P. C.'s accomplishments were possible only because of manpower shortages and wartime appeals to patriotism.

27. Question. What happens to the present Committee on Fair Employment Practice if the bill becomes a law?

Answer. The Committee will cease to exist, but its papers, funds, and employees will be transferred to the new Commission. The new Commission could discharge any employee it did not want.

28. Question. Does this bill impair or conflict with existing State laws?

Answer. There are no State laws which require or permit discrimination in employment. Hence the bill does not affect existing State laws nor does it invade States' rights.

29. Question. Can't this problem be handled by the States themselves?

Answer. Only two States, New York and New Jersey, have comprehensive laws forbidding discrimination in employment. Nor is it likely that such State laws will be passed throughout the country. In any event, Federal action is more effective since most large employers or trade-unions have plants or locals scattered throughout the country in every State. Finally, Federal employees can be protected only by a Federal F. E. P. C. The Federal Government can most effectively enforce the Federal Constitution.

30. Question. Does this bill promote "social equality?"

Answer. The bill has nothing to do with personal or social relationships. It is concerned only with equality of job opportunity.

31. Question. Will such a law cause riots or bloodshed?

Answer. On the contrary, it will lessen the danger of such violence because orderly governmental procedure will be substituted for mob action. Immediately after the last war there were 26 major race riots. We want to avoid a repetition of such disorder.

32. Question. Can't this problem be handled by education alone?

Answer. No. Education is desirable, but as a supplement, not an alternative, to Federal legislation. There are always a few employers or unions who cannot be relied upon for voluntary cooperation. Legislation itself is a most effective form of education. The problem is so urgent it requires immediate action, without waiting for the slow, uncertain processes of education. Education alone in the last 80 years has not proved effective.

33. Question. Isn't the recent Supreme Court decision in the Negro fireman's case adequate to eliminate discrimination?

Answer. The decision in *Steele* v. *Louisville Railroad*, decided December 18, 1944, applies only to discrimination arising from a contract between an employer and a labor union. It leaves untouched all the varying forms of discrimination engaged in by employers acting alone or by trade unions acting alone. There are no Federal statutes today which forbid racial or religious discrimination in employment.

34. Question. Why shouldn't the Federal courts handle this problem instead of a new administrative agency?

Answer. An administrative agency is necessary—

(a) To prevent the flooding of courts and the clogging of their calendars to the detriment of their other work;

(b) To screen out worthless complaints which otherwise would harass innocent employers or unions. A respondent has to defend every suit filed in court, but most administrative agencies dismiss from two-thirds to three-fourths of all charges submitted;

(c) To protect the rights of employees without compelling them to hire their own lawyers;

(d) To insure speedy action and avoid delays and excessive costs in the courts;

(e) To insure uniformity by having one agency interpret the bill instead of 94 Federal district courts;

(f) To permit a commission of experts to devote full time to the problem;

(g) To avoid the necessity of criminal penalties which juries hesitate to impose.

35. Question. Why doesn't the bill allow an accused party a jury trial?

Answer. The bill imposes no criminal or civil penalties, nor should it in this type of legislation. The only sanction the bill provides is a cease-and-desist order issued by the F. E. P. C., carrying no penalties. A jury trial (used in criminal cases or private suits to settle private differences) is inapplicable. Society has a stake in eliminating discrimination and should therefore assume the responsibility and costs of such enforcement, rather than leave it to private parties to hire their own lawyers and enforce the national policy. Such enforcement by private suit is haphazard-and means long-drawn, complicated, expensive litigation.

36. Question. Does this bill repeal or impair the veterans' laws?

Answer. No. The bill does not supersede or conflict with veterans' preference laws. The bill forbids discrimination only because of race, color, creed, national origin, or ancestry. It does not forbid discrimination because of war service.

37. Question. Who introduced the bill?

Answer. H. R. 2232 was introduced by Mrs. NORTON, Democrat, New Jersey, chairman of the House Labor Committee, at the request of that committee. The bill is a composite of 13 different F. E. P. C. bills sponsored by the following six Republican and six Democratic Representatives:

Republicans: BALDWIN, New York; BENDER, Ohio; CLASON, Massachusetts; DIRKSEN, Illinois; LAFOLLETTE, Indiana; VORYS, Ohio.

Democrats: DAWSON, Illinois; DOUGLAS, California; BOYLE, California; HOOK, Michigan; NORTON, New Jersey; POWELL, New York.

38. Question. Is there a permanent F. E. P. C. bill pending in the Senate?

A. Answer. A similar bill was introduced by the following seven Senators: CHAVEZ, Democrat, New Mexico; WAGNER, Democrat, New York; MURRAY, Democrat, Montana; DOWNEY, Democrat, California; AIKEN, Republican, Vermont; LANGER, Republican, North Dakota; and CAPPER, Republican, Kansas. That bill has been referred to the Senate Committee on Education and Labor of which Senator MURRAY is chairman.

39. Question. What groups have appeared against the bill?

Answer. Not a single person or agency testified against a similar bill at the hearings held last session by the House Labor Committee.

40. Question. What national groups are supporting the bill?

Answer. The following is an incomplete list:

Alpha Kappa Alpha Sorority.
American Association of University Women.
American Civil Liberties Union.
American Friends Service Committee.
American Jewish Committee.
American Jewish Congress.
American Unitarian Association.
American Unitarian Youth.
B'nai B'rith.
Catholic Interracial Council.
Central Conference of American Rabbis.
Common Council for American Unity.
Congregational Christian Churches (Council for Social Action).
Congress of Industrial Organizations.
Delta Sigma Theta Sorority.
Evangelical and Reformed Church, General Synod.
Federal Council of the Churches of Christ in America.
Fraternal Council of Negro Churches in America.
Improved Benevolent and Protective Order of Elks of the World.
International Brotherhood of Sleeping Car Porters (A. F. of L.)
International Ladies Garment Workers Union of America (A. F. of L.)
Iota Phi Lambda Sorority.
Jewish Labor Committee.
Jewish War Veterans of the United States.
League of United Latin-American Citizens.
March on Washington Movement.
Methodist Church, General Conference.
Methodist Ministers' Union.
Military Workers, Joint Board (A. F. of L.)
National Alliance of Postal Employees.
National Association for the Advancement of Colored People.
National Association of Colored Graduate Nurses.
National Bar Association.
National Community Relations Advisory Council.
National Conference of Christians and Jews.
National Consumers League.
National Council of Catholic Women.
National Council of Jewish Women.
National Council of Negro Women.
National Council of Student Christian Associations.
National Council for a Permanent F. E. P. C.
National Farmers Union.
National Federation for Constitutional Liberties.
National League of Women Shoppers.
National Negro Insurance Association.
National Urban League.
National Women's Trade Union League of America.
Negro Newspaper Publishers Association.
Post-war World Council.
Presbyterian General Assembly.
Sigma Gamma Rho Sorority.
Southern Conference for Human Welfare.
Southern Tenant Farmers Union.
Study Conference on Just and Durable Peace.
Union of American Hebrew Congregations.
Union for Democratic Action.
United Council of Church Women.
Upholsterers International Union of North America (A. F. L.)
Women's Division of Christian Service, Methodist Church.
Women's Division of the American Jewish Congress.
Women's International League for Peace and Freedom.
Workers Defense League.
Young Men's Christian Association, National Board.
Young Women's Christian Association, National Board.

41. Question. What is the present status of the bill?

Answer. It has been reported out favorably by the House Labor Committee by a vote of 12 to 2. It needs a rule from the Rules Committee before the House can consider it. Without such permission, it requires a petition signed by 218 Representatives to bring it up for a vote.

APRIL 26, 1945.

Lt. Gen. Robert C. Richardson, Jr.

EXTENSION OF REMARKS

OF

HON. JOSEPH R. FARRINGTON

DELEGATE FROM HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. FARRINGTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the text of a concurrent resolution adopted by the Legislature of the Territory of Hawaii, as an expression of the appreciation generally felt by the people of Hawaii for the splendid service being rendered by Lt. Gen. Robert C. Richardson, Jr., commanding general, United States Army, Pacific Ocean Areas, with headquarters in Honolulu. I wish to include in addition the address of General Richardson to a joint session of the legislature held in commemorating Army Day on April 6, 1945, in which the general very eloquently expresses his response to this action.

The concurrent resolution is as follows:

Whereas Lt. Gen. Robert C. Richardson, Jr., commanding general, United States Army, Pacific Ocean areas, has shown himself to be imbued with the principles of democracy and has with rare good judgment administered the office of Internal Security in the Territory of Hawaii; and

Whereas the people of the Territory of Hawaii recognize the good fortune that is theirs in having, in these troublesome times, an officer and a gentleman of General Richardson's unusual qualities as commanding general of the United States Army in the Pacific Ocean areas with headquarters in the Territory of Hawaii: Now, therefore, be it

Resolved by the House of Representatives of the Twenty-third Legislature of the Territory of Hawaii (the Senate concurring), That the said legislature take this means of recording its appreciation of Lt. Gen. Robert C. Richardson, Jr., and of the manner in which he has discharged all the duties of his office and especially of the understanding manner in which he has handled matters directly affecting the civilian population of the Territory of Hawaii; and be it further

Resolved, That a duly authenticated copy of these resolutions be delivered to Lt. Gen. Robert C. Richardson, Jr., commanding general, United States Army, Pacific Ocean areas.

The address of General Richardson to the joint session of the legislature on April 6, follows:

Mr. President, Mr. Speaker, members of the Legislature of Hawaii, it is with profound gratitude that I accept the joint resolution of the Legislature of the Territory of Hawaii expressing appreciation of the manner in which I have discharged the duties of my office, with particular reference to my relationships with the civilian population of the Territory.

Probably never before in our history has our Army been so intimately associated with the civilian community for so long a period during which difficult problems affecting both Army and civilians had to be faced. One man alone could not solve them. But with the help of many able officers and enlisted men, and with the wise counsel of many citizens of the islands, solutions were found, always in an atmosphere of the most friendly cooperation.

For my part, I have always regarded the Army as a trustee of the people, to the protection of whose lives and property the Army is dedicated. It is by its very nature our most democratic institution, as it is a mosaic of our thoughts, our manners, and our customs. The aim of its leaders is to maintain this democratic outlook and to regard as sacred the civil liberties of our people, always on guard to maintain them by a faithful performance of duty, by the highest standards of integrity, and by a burning devotion to the defense of our country.

The great compliment which you have paid me I accept as symbolizing your confidence in the Army forces which I command. It makes me feel quite humble but it will ever serve as an unfailing inspiration to merit your continued esteem.

What Is the Matter With U. N. R. R. A.?

EXTENSION OF REMARKS

OF

HON. WALTER H. JUDD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. JUDD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Edgar Ansel Mowrer:

"In all this confusion it was inevitable that in some cases the critically ill among the freed laborers and (Allied) war prisoners could not be attended to; that there were some deaths; that in the first days some failed to get food and aid they needed from their liberators; that thousands should never make contact at all with the authorities and simply start down the road on their own; and that other thousands should range freely through the towns, looting and pilfering at will." (New York Herald Tribune, April 9.)

This is another confirmation of tragedy. German war prisoners—yes, Germans, meaning torturers, looters, and murderers—get food, care, and motor transportation before adequate care is given to our liberated friends and Allies.

This is the logical realization of a failure which many people, including this writer, have seen coming since November 1943 when U. N. R. R. A. was established at Atlantic City.

Ex-Governor Herbert Lehman's intentions are above reproach Perhaps it is not entirely his fault that at Atlantic City, the American, British, and French Governments ganged up to put power and responsibility in the hands of the Allied armies; or that the delegates of governments able to pay for what they require showed no enthusiasm about letting a genuine international organization administer relief in their respective countries. The fact remains, the Governor has given no outward sign of fighting for his organization.

Many feel that the Governor has been remiss about organizing his staff, about getting his people overseas, and about estimating the size of the job with which he is charged.

This writer has taken some pains to look into the situation asking explanations both of the War Department and of U. N. R. R. A. officials. This is what he learned:

Both the Department and the U. N. R. R. A. people claim to be entirely aware of the magnitude of the problem of looking after displaced Allies in Germany. The original idea was the Army would do the job while the fighting was still in progress and then turn it over to U. N. R. R. A.

This first plan was based on the supposition that the transition from war to peace would be relatively abrupt. What was not foreseen was a gradual invasion of Germany or gradual liberation of displaced persons while fighting was actually continuing, and a corresponding necessity of simultaneously fighting and looking after our friends.

When the Germans failed to surrender last fall, everything had to be changed. Accordingly, last November a treaty was signed between Army Civil Affairs (G5) and U. N. R. R. A. As this document is marked "restricted" for "security reasons" (believe it or not), only the gist can be given here. Responsibility for looking after displaced persons while the fighting was going on and for an undetermined period thereafter remained with the Army. U. N. R. R. A. agreed to cooperate in a sort of subordinate position.

Meanwhile, the increased transportation demands made upon the fighting forces by the German failure to quit prevented the stockpiling of food for the displaced. It also caused the Army demigods to decide that U. N. R. R. A. teams for dealing with these people should not be brought to Europe until required. These teams are 40-percent Americans and British, 60-percent Continental Europeans. In fact, G5 requirements loomed so small in the Army priorities book that a school for French AMG's, set up in northern France to train French officers to cooperate with American AMG's in Germany, had to be disbanded because the Army refused to allocate the necessary food.

The rest was inevitable. Our armies began liberating increasing numbers of Allied prisoners and slave workers. Army Civil Affairs lacked the sufficient personnel for looking after them all. Where was U. N. R. R. A.? Mostly back in the United States where it had been kept by the Army demigods—or still unrecruited.

Now, as fast as they can be sent over and recruited, U. N. R. R. A. teams of 13 persons are going into action. When they all arrive, our liberated allies will be adequately looked after—unless they have already moved on into other regions, or died of malnutrition.

The fault—if any? Figure it out yourself. This writer believes that U. N. R. R. A.'s performance will be unfavorably compared with the performance of Herbert Hoover and a volunteer American organization after the last war. America's prestige in Europe will fall precisely at a moment when we most need it to be high.

Black Hills Suited for World Capital

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. MUNDT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Sioux Falls (S. Dak.) Argus Leader:

BLACK HILLS SUITED FOR WORLD CAPITAL

It was recently suggested in a statement from Washington by Congressman KARL MUNDT, of South Dakota, that the Black Hills would be a suitable and attractive site for the headquarters of the post-war world organization.

Now comes Gov. M. Q. Sharpe with an emphatic endorsement of the proposal coupled with a desire to see that the proposal is adequately presented at San Francisco. In his campaign he will undertake to obtain the assistance of South Dakota's Washington delegation and others.

At first thought, the suggestion may seem presumptuous. But why? What do other places have that we don't have? And what do we have that they don't?

There is no reason why the site must be in some historical place. Certainly it need not be in Europe.

In truth, the Black Hills are as well suited as any place with some definite advantages over many. They possess a rugged beauty matched in few sections of the world. The climate is ideal with no period during the summer when it becomes uncomfortably warm. The mountains soften the winter winds. The average elevations in the hills are above the mosquito line.

Situated in the Black Hills also is the world's most remarkable memorial to the independence of man—the Rushmore memorial.

Distance isn't of particular importance any more with the airplane assuring fast transportation throughout the world.

In the Black Hills a new peace city can be erected—a city dedicated to the business of world government and the maintenance of world harmony with these objectives as its exclusive function.

Dedication of Fifth Marine Division Cemetery

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include the following which appeared in the Living Church of April 15, 1945:

IWO JIMA

One of the most impressive services I have ever seen was the dedication of the Fifth Marine Division cemetery on Iwo Jima. Here, at the edge of the airfield for which they fought and died, lie the bodies of brave young Americans—young men in their teens, for the most part—who died on this inhospitable foreign soil to keep our country free. The dedication was conducted by chaplains of the Roman Catholic, Protestant, and Jewish faiths, and was followed later in the day by separate memorial services. At the combined dedication, the following address was given by the division's Jewish chaplain, Roland B. Gittelsohn:

"This is perhaps the grimmest, and surely the holiest task we have faced since D-day. Here before us lie the bodies of comrades and friends. Men who until yesterday or last week laughed with us, joked with us, trained with us. Men who were on the same ships with us, and went over the side with us as we prepared to hit the beaches of this island. Men who fought with us and feared with us. Somewhere in this plot of ground there may lie the man who could have discovered the cure for cancer. Under one of these Christian crosses, or beneath a Jewish Star of David, there may rest now a man who was destined to be a great prophet, to find the way, perhaps, for all to live in plenty, with poverty and hardship for none. Now they lie here silently in this sacred soil, and we gather to consecrate this earth in their memory.

"It is not easy to do so. Some of us have buried our closest friends here. We saw

these men killed before our very eyes. Any one of us might have died in their places. Indeed, some of us are alive and breathing at this very moment only because men who lie here beneath us had the courage and strength to give their lives for ours. To speak in memory of such men as these is not easy. Of them too can it be said with utter truth, 'The world will little note nor long remember what we say here. It can never forget what they did here.'

"No, our poor power of speech can add nothing to what these men and the other dead of our division who are not here have already done. All that we even hope to do is follow their example. To show the same selfless courage in peace that they did in war. To swear that by the grace of God and the stubborn strength and power of human will, their sons and ours shall never suffer these pains again. These men have done their job well. They have paid the ghastly price of freedom. If that freedom be once again lost, as it was after the last war, the unforgivable blame will be ours, not theirs. So it is we, the living, who are here to be dedicated and consecrated.

"We dedicate ourselves, first, to live together in peace the way they fought and are buried in this war. Here lie men who loved America because their ancestors generations ago helped in her founding, and other men who loved her with equal passion because they themselves or their own fathers escaped from oppression to her blessed shores. Here lie officers and men, Negroes and whites, rich men and poor—together. Here are Protestants, Catholics, and Jews—together. Here no man prefers another because of his faith or despises him because of his color. Here there are no quotas of how many from each group are admitted or allowed. Among these men there is no discrimination. No prejudices. No hatred. Theirs is the highest and purest democracy.

"Any man among us, the living, who fails to understand that will thereby betray those who lie here dead. Whoever of us lifts his hand in hate against a brother, or thinks himself superior to those who happen to be in the minority, makes of this ceremony and of the bloody sacrifice it commemorates an empty, hollow mockery. To this, then, as our solemn, sacred duty, do we, the living, now dedicate ourselves; to the right of Protestants, Catholics, and Jews, of white men and Negroes alike, to enjoy the democracy for which all of them have here paid the price.

"To one thing more do we consecrate ourselves in memory of those who sleep beneath these crosses and stars. We shall not foolishly suppose, as did the last generation of America's fighting men, that victory on the battlefield will automatically guarantee the triumph of democracy at home. This war, with all its frightful heartache and suffering, is but the beginning of our generation's struggle for democracy. When the last battle has been won, there will be those at home, as there were last time, who will want us to turn our backs in selfish isolation on the rest of organized humanity, and thus to sabotage the very peace for which we fight. We promise you who lie here: We will not do that! We will join hands with Britain, China, Russia—in peace, even as we have in war, to build the kind of world for which you died.

"When the last shot has been fired, there will still be those whose eyes are turned backward, not forward, who will be satisfied with those wide extremes of poverty and wealth in which the seeds of another war can breed. We promise you, our departed comrades: this, too, we will not permit. This war has been fought by the common man; its fruits of peace must be enjoyed by the common man. We promise, by all that is sacred and holy, that your sons—the sons of miners and millers, the sons of farmers and workers, will inherit from your death the right to a living that is decent and secure.

"When the final cross has been placed in the last cemetery, once again there will be those to whom profit is more important than peace, who will insist with the voice of sweet reasonableness and appeasement that it is better to trade with the enemies of mankind than, by crushing them, to lose their profit. To you who sleep here silently, we give our promise: we will not listen. We will not forget that some of you were burnt with oil that came from American wells, that many of you were killed by shells fashioned from American steel. We promise that when once again men seek profit at your expense, we shall remember how you looked when we placed you reverently, lovingly, in the ground.

"Thus do we memorialize those who, having ceased living with us, now live within us. Thus do we consecrate ourselves, the living, to carry on the struggle they began. Too much blood has gone into this soil for us to let it lie barren. Too much pain and heartache have fertilized the earth on which we stand. We here solemnly swear: This shall not be in vain. Out of this, and from the suffering and sorrow of those who mourn this, will come—we promise—the birth of a new freedom for the sons of men everywhere. Amen."

CLIFFORD P. MOREHOUSE.

The Pacific Islands

EXTENSION OF REMARKS

OF

HON. JOSEPH R. FARRINGTON

DELEGATE FROM HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. FARRINGTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution of the board of directors of the Chamber of Commerce of Honolulu:

Whereas the islands in the Pacific Ocean north of the Equator formerly mandated to Japan by the League of Nations were declared by Japan in the year 1936, upon her withdrawal from the League of Nations, to be the sole property of Japan, and she announced that she would hold the islands against the world as an integral part of the Japanese Empire; and

Whereas these islands were thereafter so held by Japan and were incorporated into the Japanese Empire as an integral part thereof and were fortified and armed in such manner and to such an extent as to make the same a continued threat to peace and security in the Pacific Ocean area and specifically a threat to the peace and security of the United States of America; and

Whereas the League of Nations was wholly without power to prevent Japan from taking, owning, holding for itself, and fortifying said islands as an integral part of the Japanese Empire and from using said islands as so fortified and armed in connection with acts of unwarranted aggression against the United States of America and as bases from which to conduct war in the Pacific Ocean area and specifically from which to conduct war against the United States of America; and

Whereas in order to protect itself and to bring to a victorious end the war commenced by the unwarranted aggression of Japan against the United States, the United States of America has of necessity seized and captured certain of these islands and of necessity will seize and capture the rest of said islands, all necessitating great loss of the lives of and of grievous injuries to thousands of loyal citizens of the United States; and

Whereas in order to insure peace in the Pacific Ocean area and specifically in order to insure peace to the United States in the Pacific Ocean area, the United States of America is the proper nation to acquire, own, hold, and use said islands as possessions or otherwise as it in its sovereign right may hereafter determine from time to time: Now, therefore, be it

Resolved, That the board of directors of the Chamber of Commerce of Honolulu respectfully request that the United States of America declare that the Marshall Islands, the east Caroline Islands, the west Caroline Islands, the Palau (Pelew) Islands, Yap Islands, Marianas Islands, Volcano Islands, Bonin Islands, Marcus Island, and any and all other islands, reefs, or places formerly mandated to Japan north of the Equator are by right of conquest irrevocably the property of the United States of America, and that the United States of America establish its sovereignty over the Japanese mandated islands and other reefs or places in the Pacific north of the Equator originally included in said mandate; and that the strategic bases for defense in the Pacific Ocean area there existing, and the natural resources thereof may be developed, used, held, and enjoyed under civil administration for the purpose of the protection of the United States and of keeping peace in the Pacific area, for the benefit of the native inhabitants of the islands, and for the benefit of the people of the United States as a whole; and

Resolved, That copies of this resolution be sent to the President of the United States, the President of the Senate of the United States and the Speaker of the House of Representatives of the United States, and also that a copy be presented at the San Francisco Conference on April 25, 1945, and to the various chambers of commerce on the west coast of the United States.

Cripples Can Make Good When Given a Fair Break

EXTENSION OF REMARKS

OF

HON. AUGUSTINE B. KELLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. KELLEY of Pennsylvania. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert a column from PM of April 9, 1945, by Mr. Albert Deutsch entitled "Cripples Can Make Good When Given a Fair Break."

The examples of men and women who have risen above their handicaps and attained successful lives and made contributions of great value to society are an inspiration to all who are burdened with handicaps and to those of us who are more fortunate as well. I am sure they encourage all of us to strive to create and maintain in this country an opportunity for the "fair break" for our disabled veterans, our injured war workers, our handicapped children, and for

every man and woman in the Nation who suffers misfortune too great to be borne alone:

CRIPPLES CAN MAKE GOOD WHEN GIVEN A FAIR BREAK

(By Albert Deutsch)

One welcome byproduct of World War No. 2 is the break it gave to the physically handicapped. The manpower shortage brought large numbers of them into gainful jobs for the first time, and the great majority have made good. Employers are almost unanimous in their high praise of the working capacity of "cripples" who formerly were regarded as unemployable and were widely discriminated against in industry.

A recent Nation-wide survey indicated that there are some 25,000,000 handicapped people in the United States of America, about a tenth of them with handicaps serious enough to raise a job problem. The battle casualities of this war will add considerably to this army of the physically handicapped.

Will the prejudice against employing handicapped people be revived after the war? A tragic situation of large dimensions would ensue if the scores of thousands who have finally found some contentment in having their usefulness recognized should again be sentenced to enforced and unhappy idleness.

Many great men and women have come from the ranks of the handicapped. Consider this partial list:

Julius Caesar was an epileptic. Beethoven was deaf. So was Thomas A. Edison. The inventive genius of electricity, Charles P. Steinmetz, was a hunchback.

Among the great poets of the ages, John Milton was blind, Lord Byron had a clubfoot, and Heinrich Heine was misshapen with a curved spine. Helen Keller licked the twin handicaps of deaf-mutism and blindness. One-armed Admiral Nelson won the great naval victory of Trafalgar.

President Roosevelt is probably the outstanding example among contemporary cripples who made good. The screen star, Herbert Marshall, wears an artificial limb in place of the leg he lost in World War No. 1. The phenomenal Negro tap dancer, "Peg Leg" Bates, is likewise an amputee. The late Chick Webb first-rank band drummer, was a hunchback.

In the world of sports there is one-armed Pete Gray, of the St. Louis Browns. (The first one-armed major leaguer, Hugh Daily, of Chicago, struck out 10 men in a 9-inning game back in the 1880's.) Ferdinand Barkovich, captain of the Pennsylvania University wrestling team and an A. A. U. champ, has won 83 wrestling bouts and lost only 5, despite the fact that he's been almost totally blind since high-school days.

Gonzalo Romero, soccer star who lost his right arm in a cement-mixer accident 3 years ago, made a brilliant comeback and has just been re-signed up by the Brooklyn Hispanos, of the American Soccer League pro circuit. The late Harry Greb, once world's middleweight champ, was blind in one eye during the last 5 years of his boxing career. Ernest Jones became a star golf pro after losing his leg in World War No. 1. Arthur Kidder, of the National Ski Patrol, skis on his one leg with the best of them. Nancy Merki, stricken with infantile paralysis at the age of eight, became a star swimmer.

The disabled can make good, if given the chance. The Office of Vocational Rehabilitation, Federal Security Agency, operating under the terms of the Barden-La Follette Act, cooperates with State agencies in providing that chance to the physically and mentally handicapped. The Veterans' Administration conducts a rehabilitation program for disabled veterans. Both Federal activities deserve fullest public support, especially on the part of employing groups.

San Francisco

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Boston Post of April 25, 1945:

SAN FRANCISCO

When Germany was poised on the edge of the Channel, ready to strike and overwhelm the British Isles, England did not despair. Against the greatest military machine ever forged, England, through Prime Minister Churchill, applying his doctrines of blood, sweat and tears, shouting defiantly that he would fight on in the hills and in the hedgerows, never gave up.

When Germany suddenly poured her might over the Russian borders, sweeping ahead of her the vaunted armies of the Soviets, overcoming cities and towns as the hurricane mows down the forest, Russia, through Premier Stalin, retreating, yet not surrendering, applying the scorched earth policy to the ancient glories of the czars and the new monuments of the people's regime, never lost faith in the ultimate outcome.

When the red Sunday came in turn to America, as the Japs battered Pearl Harbor and sank our capital fighters in a galling, treacherous attack, Americans did not hesitate. Even as the bombs were falling, fighting ships in that famed harbor which had escaped hurt, sped out to sea and began the long hunt which finds our forces today poised on Okinawa, heading up for the greatest battle of all.

Individually and then jointly, as one fighting unit and allies, we, the Big Three, never for a moment faltered, never lost hope, never were dejected or downcast. We were sure, fighters as well as civilians, that eventually, though the way would be long and the cost would be great, we would win the final victory. Today, in proof of our confidence, Berlin burns and Tokyo burns.

But we were close to defeat. It seems a long time ago when England was contemplating moving its government to Canada. It seems a long time ago when Russia's hopes of survival hung for a week in the precarious balance at Stalingrad. It seems a long time ago when our western shore lacked protection and the Japs, if they had been bolder, might have landed in the United States itself. But we never, individually or collectively, gave up.

Today, as the Conference which marks another mighty milestone in mankind's long, bitter march to the kind of peace that will outlaw war forever begins, have we the same spirit, the spirit that this, the greatest of all the war objectives, can and will be achieved? Have we the same confidence, the same determination, the same courage, the same faith and the same unquestioning belief that out of this, the greatest parliament of man, is certain to be evolved the machinery for outmoding war and making it abhorrent for all time to come?

Or is there another spirit abroad, a spirit of hope, prayer, and brave fervor for success, which is nevertheless underlined in the minds of some who never doubted the martial victory, with foreboding, a touch of fear, a shadow of doubt and a feeling that it is asking too much for all peace-loving nations to put aside their self-interests and combine to keep the world from plunging at a later date into a third World War which will positively wreck civilization?

Whoever has such a spirit let him put it out of his mind and heart. Let us look forward to San Francisco today with confidence and surety. Let us look and listen, and withhold our judgments. Let us not, we who waited long, dark years for victory on the battlefield, expect it at the peace Conference overnight. Three big nations, working with one objective, won the war. Some 46 nations, with varying problems, are laying the groundwork for peace. Let us be patient, let us be hopeful and let us be confident that the common goal can be reached now or in time, because it must be reached and will be reached.

Veterans' Benefits

EXTENSION OF REMARKS

OF

HON. FOREST A. HARNESS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. HARNESS of Indiana. Mr. Speaker, during a recent visit to my home city of Kokomo, Ind., I had the privilege and pleasure of meeting there with representatives of the American Legion and educational and financial institutions in the interest of the veterans of this war. This group gave particular thought to the problem of effecting improvements in Public Law 346, Seventy-eighth Congress, and in the administration of this act, popularly known as the G. I. bill of rights.

These very earnest and able gentlemen who met on this occasion to study the particular educational and financial problems of returning service men and women are themselves veterans of the First World War, with a wealth of experience in veterans' affairs and a deep sincerity of interest in veterans' welfare.

The conclusions reached by this group are based upon actual experience in the brief period since the enactment of Public Law 346, and are, I believe, entirely sound and practicable. I offer the reports and recommendations of this meeting as a part of these remarks, and strongly urge my colleagues to study them carefully. I ask the Committee on World War Veterans' Legislation to make this material a part of its records, and to consider these recommendations carefully as additional legislation is formulated:

KOKOMO, IND., *April 3, 1945.*

The following is a narrative statement of the proceedings and comments made at the meeting of representatives of the American Legion, educational units, and banking and loan associations of the State of Indiana at the American Legion home, Tuesday, April 3, beginning at 10 a. m.

Present: Oscar R. Brown, State service officer, American Legion, Indianapolis; F. B. Bourland, special representative, Federal Home Loan Bank Administration, Washington, D. C. (Chicago); Ivan E. Cooprider, secretary, Savings & Loan League of Indiana, 716 Union Title Building, Indianapolis; Fred T. Green, president, Federal Home Loan Bank, Indianapolis; George E. Hayes, president, First Federal Savings & Loan Association, Marion;

Glen R. Hillis, Kokomo; John P. Hochhalter, Building & Loan Association, Logansport; H. R. Holdern, service officer, George H. Hocken Post, No. 127, Anderson; Robert M. Horn, assistant to dean of men, Purdue University; A. H. (Art) Kdlros, Anderson; Curtis McCain, secretary, Building & Loan Association, Delphi; Frank McCarty, First Federal Savings & Loan Association, Kokomo; Claude W. McCoy, adjutant, American Legion Post, No. 6, Kokomo; E. M. Matthews, Union Bank & Trust Co., Kokomo; B. D. Mitchell, president, Union Bank & Trust Co., Kokomo; W. P. Parse, Farm Loan Advisory Committee, Kokomo; Harold D. Powell, Veterans' Administration Hospital, 539 West First Street, Marion; O. L. Tharp, Peoples Bank, Portland, Ind.; Maurice Tull, Kokomo Tribune, Kokomo; William W. Workman, service officer, American Legion Post, No. 6, Kokomo.

William W. Workman, service officer, American Legion Post, No. 6, Kokomo, presided, and stated that the purpose of the meeting was to discuss the two sections of the law regarding education and loans and to reach conclusions as to recommendations which were to be sent to Hon. FOREST E. HARNESS, Congressman from the Fifth District, for such changes and amendments in the law that would make it more readable, understandable, and workable; that now is the time to correct whatever mistakes are in the bill so that our returning veterans may be able to get full benefit of its provisions.

Mr. Workman stated that Dr. Wright, of Indiana University, was unable to be present but had sent his recommendations and ideas as to what he thinks is wrong with the bill and the changes he would recommend.

Mr. Robert Horne was present from Purdue University. Mr. Workman asked him to explain the workings of the bill as far as it concerned Purdue University and the contact he had with it.

The Veterans' Administration has cooperated with Purdue in regard to the educational provisions of the bill. However, some States lack over-all unity as far as the Veterans' Administration is concerned. There should be some clarification of the provisions of the bill and interpretation by the different States. Example: one boy may have a service-connected disability but with less than 90 days' service. The G. I. bill provides that no man may receive the educational benefits unless he was in service in the armed forces at least 90 days, and, secondly, that his education must have been interrupted by his service or otherwise interfered with, and thirdly, that he not be over 25 years of age.

Another thing is the subsistence pay of $50 or $75; that is not equitable. And there is so much red tape required to be unwound that a man might starve to death while he is waiting for it to unwind. It takes too long to reach him.

Mr. Horne, as representative of Purdue University—

1. Acts as contact between the veteran and the Veterans' Administration.

2. Acts as contact between the university and the Veterans' Administration.

3. Acts as contact between the State and the university.

Mr. Horne stated that Public Law 16 requires that a man must have a service-connected disability for which pension is payable of more than 10 percent for admittance to educational benefits, that his education must have been interrupted or interfered with, and that he is vocationally handicapped.

Mr. Horne stated that the need is for better clarification of the provisions of the bill, so far as vocation is concerned. Example: A man who was a die maker may be certified for education as vocationally handicapped because he had three fingers cut off, but a school teacher who lost a leg would not be considered vocationally handicapped. The men don't always get the proper advice as to their benefits under this act.

Mr. Horne stated that there is another class of men who are coming back from service; men who never graduated from a high school and could not qualify under the university standards; also men 25–30–35 years of age. They won't want to go back to high school and finish.

Mr. Horne stated that they started a classification at Purdue called unclassified students; that nine men have gone through the whole term; that these men had an average of 2¼ years in high school and lacked many subjects—algebra, English, etc. Tests at the beginning on these men ranged from 0 to 46. (The over-all average is 50.) These men at the end of the first term had an average of 4.51, whereas men from the university proper averaged 3.69. Compare that with the average of the men who had less educational qualifications of 4.51. Purdue is the only school in the United States having this class of students and permitting them to take university training. The bill should be amended to permit the men to take apprentice training, war training, and extension work.

Mr. Powell suggested that the older men might be given the opportunity of attending high-school classes at night, using the same facilities, without feeling the difference in their ages in not attending with the regular students.

Mr. Horne stated that this system is being carried out in some high schools in the State.

QUESTION. A man who is not physically handicapped when he comes back must be under 25 years of age to get the benefit of the law?

Mr. HORNE. Yes; up to 1 year's education, plus the length of his service.

QUESTION. A man who has been in the Army is entitled to 1 year's college education, plus the time he was in the Army?

Mr. HORNE. Yes; if he is under 25 years of age.

QUESTION. How about a man who was 20 when he went in, but will be 26 when he comes out?

Mr. HORNE. He will get a year.

QUESTION. A man has been in the Army 5 years; he lacked just 12 hours of graduating; he is now 26 years of age. The bill will permit him to complete his education?

Mr. HORNE. He will get a year to complete it.

QUESTION. Is that construed to mean one calendar year or one school year.

ANSWER. One calendar year.

QUESTION. The Veterans' Administration has construed it to mean 36 weeks for a school year. The average school year is 9 months.

Mr. HORNE. In peacetime Purdue has two terms of 4½ months each; we have been running three terms of 4 months each. I don't know how we will do later on.

QUESTION. Do you think it advisable that these men be compelled to go the full 12 months at one time after the strain they have been under for such a long time. Dr. Knight of Purdue University had made the statement that 60 percent of the casualties now returning are shattered nerves and other mental disorders that will take time to overcome. This type of man should have a longer time. The Veterans' Administration should make a ruling that they may take 9 months of their schooling 1 year and 3 months the next, in order to get the benefit of the full year's education.

Mr. Brown suggested that Congress should write the regulation covering the administration of the bill and not permit the Veterans' Administration to write them.

Mr. Workman read a letter from Mr. Leo R. Dowling, assistant to Dean Wendell W. Wright, of Indiana University, stating his opinions as to changes and recommendations to be made regarding the educational provisions of the G. I. bill.

Mr. Workman stated that according to his interpretation of Mr. Dowling's letter, red tape is the stumbling block together with the low maintenance allowance.

Mr. Brown stated that he believed the administrators in the educational field should issue the regulations rather than the Veterans' Administration. That the educators know what they are doing and should administer the regulations, thus eliminating a lot of the red tape.

The question was asked how long a man had after he is discharged from the service to make up his mind to enter the university training and Mr. Horne stated that it was 2 years.

Mr. Brown again stated that he thought the university should administer the regulations rather than the Veterans' Administration.

The meeting was recessed for lunch and convened again at 12:30 o'clock, at which time the loan section of the bill was taken up for discussion.

Mr. George E. Hayes introduced Mr. F. R. Bourland, special representative of the Federal Home Loan Bank Administration of Washington, who discussed in detail the mechanics of issuing loans under the loan provisions of the bill, explaining the various steps and processes to be taken. He suggested that ways should and would probably be found to overcome some of the delays experienced in procuring the loans; that if all papers are made out corrected when sent in together with all the necessary enclosures, it should not take more than a maximum of 2 weeks to secure the authorization of the guaranty. That the delay in most cases was caused by failure to send in the proper forms, properly executed including the certified copy of the honorable discharge of the veteran making the application. That the average time is 8 or 9 days. That the time limit for making application is 2 years after discharge or after the end of the war which is the latest, not to exceed 5 years.

Mr. Workman asked if the time should not be extended so that the men now in hospitals, or who will be in hospitals for some time, might take up some kind of business or line of work when released, and could procure the benefit of this loan so as to have an assured income.

Mr. Bourland stated that the men have plenty of time now, as they have 2 years after being discharged or 2 years after war's end, whichever is the longest, but not longer than 5 years after the war's end. Mr. Bourland stated that the veteran must show an ability to repay the loan before he can qualify for the loan regardless of whether or not he ever held a job.

Mr. Hayes stated he believed the recommendation should be made that the time limit be extended, or eliminated.

Mr. B. D. Mitchell, of the Union Bank & Trust Co., Kokomo, suggested that if the time limit is eliminated it would permit the veteran to get adjusted to civilian life before jumping into any project requiring a loan; Mr. Mitchell suggested that a waiting period after discharge be required before a loan could be applied for, and gave several examples of poor judgment on the part of the veteran regarding investments; that the veterans are good prey for wolves with a selling market.

Mr. McCain, of Delphi, asked regarding farm loans where it would take about a year before any returns could be made on the investment.

Mr. Bourland stated that if he is a tenant farmer, he would have to be in the same class as all other tenant farmers; that the credit investigation would take into consideration the time element.

Mr. Parse, of Kokomo, stated that he was a member of a four-man committee called the Farm Loan Advisory Committee for this area; that it is the job of this committee when a veteran wants to buy or rent a farm, to interview him as well as the proposition he pro-

poses to take over, as to the soundness of the investment.

Mr. Green stated that he thought if the time limit is eliminated it would prevent inflationary buying of real estate and other unsound investments.

Mr. Hayes read a letter from Mr. Horace Russell, general counsel of the United States Savings and Loan League, regarding H. R. 2627, regarding property loans, etc., and making suggestions regarding the applications for loans.

The letter follows:

UNITED STATES SAVINGS AND LOAN LEAGUE,
Chicago, Ill., March 28, 1945.

Mr. GEORGE E. HAYES,
President, First Federal Savings and Loan Association,
Marion, Ind.

DEAR MR. HAYES: I have your letter of March 26 and have just returned from Washington where I have discussed the veterans' loan program very fully with representatives of the Administration.

I enclose a copy of H. R. 2627 by Congressman RANKIN, chairman of the Committee on World War Veterans' Legislation of the House of Representatives, and there is an identical bill, S. 738, by Senator JOHNSON of Colorado pending in the Senate. You will see from these bills that if enacted the effect would be to permit loans to be guaranteed up to the reasonable normal value of the property without regard to the sale price of the property, and in my opinion, this would greatly simplify the program. At present the chief difficulty arises from minor differences of opinion as to value. If this were enacted, a veteran could buy any property he wanted to but he could not get a loan guaranty for more than its properly appraised value.

The other provisions of this bill primarily relate to business loans and farm loans and would include within the purposes for which such loans can be made, livestock and supplies and merchandise and supplies. Also, with respect to non-real-estate farm and business loans for not over 5 years, the lender could get a 1½-percent service charge which would doubtless encourage more banks to participate in these supply and equipment loans. It does not appear to me that we are substantially interested in these questions because our institutions will not make such loans. The positions of the introducers of these bills indicate that the questions are going to have serious consideration.

In addition, it would be helpful if the Veterans' Administration would eliminate the inquiry as to eligibility and process this question on the application and concurrently with consideration of the loan application. This, however, could be done without any change of the law.

Personally, I feel that the Veterans' Administration is entitled to credit for its best efforts to operate under the statute and that the program has an excellent prospect for success. I do not think too many objections ought to be made at this early stage. After all, it takes considerable time to get such a program under way and sometimes more harm can result from constant changes than the good which may be accomplished by such changes in such a large program.

Very truly yours,
HORACE RUSSELL,
General Counsel.

In reply to a question by Mr. Matthews regarding the eligibility of a veteran who is a minor in executing a valid note and mortgage, he was advised that such eligibility has been established.

There was general discussion of the matters presented, and the meeting adjourned. The committee then met and arrived at the conclusions to be presented to Mr. Harness.

CONCLUSIONS REACHED BY COMMITTEE AT MEETING HELD APRIL 3, 1945, AT KOKOMO, IND.

EDUCATIONAL SECTION

1. That the administration of the program and procedure shall be left to the educational unit concerned.

2. That the age at enlistment date be considered as the basis for qualification for educational benefits rather than the age at time of discharge and that the 25-year age be eliminated.

3. That the subsistence allowance for married men with dependents be increased from $75 to $100 per month.

4. That a Nation-wide clarification of the interpretation of the time limit be made as being one complete calendar year.

5. That standard procedure be put into practice immediately relating to certification forms, letters of entitlement, and billing procedures.

LOAN SECTION

1. That the time limit should be extended to 10 years.

INDIANA UNIVERSITY,
Bloomington, Ind., March 27, 1945.

DEAR DEAN WRIGHT: In answer to the letter of Mr. William W. Workman of the American Legion at Kokomo, Ind., we could point out that, in our opinion, there are three features of the educational section of the G. I. bill of rights that could be improved.

(1) The $50 a month allowance to veterans in training is not sufficient to keep a trainee in college. Veterans will either have to have educational funds of their own or will be required to do part-time work in order to maintain themselves. The $50 allowance covers the average expenses of room and board for a student on the Bloomington campus of Indiana University.

(2) It would seem very desirable to set up a loan fund for trainees of Public Law No. 346 similar to that of trainees under Public Law No. 16. After a veteran has been approved for and enters training in an educational institution he must maintain himself for a period of time until he begins receiving his subsistence allowance of $50. Our experience at Indiana University indicates that the minimum expectancy, for example, the shortest amount of time in which a man can expect to receive his first check, is 4 to 5 weeks. The average is 6 to 8 weeks and we have had a number of cases go 3 and 4 months without payment. If a veteran could borrow $100 from Veterans' Administration upon beginning training, his situation would be considerably relieved. A stipulated amount could then be deducted from the monthly checks as issued by Veterans' Administration, until the loan has been paid back.

(3) The age rule of Public Law No. 346 doesn't make much sense. It penalizes the man who was over 25 and although the reasoning of Congress on this point is generally known, we believe it to be unfair.

(4) In issuing a letter of entitlement to a Public Law No. 346 trainee Veterans' Administration should make it clear to the veteran that if he plans to attend a school outside the area of that regional office he should request immediate transfer of his case folder to the regional office of Veterans' Administration having jurisdiction over the area in which that school is located.

Trainees have not been notified of this fact and as a result those who enter schools outside the jurisdiction of the regional office which issues the letter of entitlement must endure long delays in receiving maintenance allowance.

Respectfully yours,
LEO R. DOWLING.

INDIANA UNIVERSITY,
Bloomington, Ind., March 31, 1945.

Mr. WILLIAM W. WORKMAN,
Fifth District Service Officer,
Kokomo, Ind.

DEAR MR. WORKMAN: It is impossible for me to be in Kokomo on Tuesday, April 3, at 10 a. m., simply because I have another engagement at that hour which I made a long time ago to talk on the educational implications of the G. I. bill.

I have asked my assistant, Mr. Dowling, to indicate any thoughts that we may have here in relation to the operation of the G. I. bill of rights from the educational point of view. His letter contains those points which I would also mention, therefore, I simply send it along to you. Some of these are matters of law and some of them concern administration of the law.

If there is any other way in which I can be of help to you, feel free to call upon me. I would like very much to attend the meeting, but it is impossible.

Very truly yours,
WENDELL W. WRIGHT,
Director, Office of Veterans' Affairs.

Military Service for 18-Year-Old Soldiers

EXTENSION OF REMARKS
OF
HON. ROBERT SIKES
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. SIKES. Mr. Speaker, the proposal to forbid combat service for 18-year-old soldiers until they have had at least 6 months' training is a very good one. But it comes late and it does not go far enough.

No man, regardless of age, should be put into combat until he is adequately trained, except in periods of dire national emergency. We are not in such a period, and since the very early months of the war we have not been in one.

The step from civilian life to military combat is a long one. Many military men believe that a year of training is needed in preparation for the complex problems of modern warfare. It is little enough to ask that a man be given 6 months' preparation. Manpower in this country is ample to permit proper training before any man is asked to place his life in jeopardy.

Unfortunately there are cases—many of them—where 18-year-olds have died in combat less than 6 months from the day they were inducted. It is difficult to find justification or excuse for this. Certainly it cannot be said that we are so short of men that we have nothing but boys to use as sources of replacement for combat units.

There are still nearly 3,000,000 soldiers within the United States. I am reluctant to believe that our armed forces are so organized that none of these three millions are available for combat service. I am reluctant to believe that it is necessary to retain such a number to man the camps and supply depots here at home.

No, the answer appears to be that 18-year-olds make good soldiers. They train easily and quickly. They respond well to discipline. They are rugged and healthy. So they have been made to bear the brunt of war. So they are being sent overseas with 15 weeks' training.

This is a short-sighted policy. It is burning out many youths who have not had sufficient training, and who are not sufficiently mature for the tough job of killing. It should be corrected. It should be corrected now.

World Security

EXTENSION OF REMARKS

OF

HON. GEORGE W. GILLIE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. GILLIE. Mr. Speaker, as the World Security Conference in San Francisco begins its deliberations, it is urgently important for us all to remember that hopefully as we may look to the Conference, the results of its deliberations alone cannot guarantee a post-war world of security, prosperity, and peace. As individuals we all have heavy responsibilities to fulfill when peace comes once again if security is to become a reality. I believe the following challenging statement deserves serious consideration at this time because of its constructive thoughts on at least one of our post-war problems, the maintenance of a sound economy:

FOREWORD

INDIANAPOLIS, IND.

Today, the delegates to the World Security Conference are in session at San Francisco, in an attempt to secure peace in our time. But no matter what decisions or agreements they may make among themselves, actual world security will be determined by factors beyond their control; factors which are in the hands of the American people alone. Every American owes it to himself to read the following statement.

ROBERT M. BOWES,
President, Bowes Seal Fast Corporation.

If the delegates to the World Security Conference read America's free press this morning, they must have been handed some surprises.

The war is going well on all fronts—except the American home front, where the war's whole outcome hangs in the balance.

Management, blinded by being sought after to supply things, is day-dreaming about post-war.

Deliberate and shocking strikes, stoppages, and slow-downs have brought into sharp focus the fallacy of the manpower shortage.

The promise of 60,000,000 peacetime jobs is shaping up as the political campaign slogan it is.

American business and industry are in the nutcracker between labor and management, with Government applying the pressure.

Delegates, please realize, here and now, that world peace and security will not be won—in our time or in any other time—unless American business and industry can squirm out of the vise and go to work.

Insurgent labor versus stubborn management, with Government applying the pressure. Is that all there is to the 60,000,000 peacetime jobs the politicians are talking about?

Not by a long shot. Under the American system neither labor, nor management, nor Government itself could get anywhere, be anything, without the ingredient that makes every job in America possible—selling.

If American business and industry are allowed to go to work and sell, we'll pull the world out of the woods—into the sunshine and the clearing.

If American business and industry do not or cannot sell, a world-wide catastrophe is in the making.

WORLD SECURITY DELEGATES PLEASE COPY

Unless American national income is maintained at unprecedented peacetime levels by unprecedented peacetime selling, America will go broke—and we will drag the rest of the world down with us.

That's how important selling is in the coming post-war world.

It is fondly claimed—not only by Washington but by certain highly placed business executives who ought to know better—that post-war selling is going to be a lead-pipe cinch.

Well, look, they say: The public now needs everything. The public has soaked away one hundred billions in War bonds and other savings. Therefore, the public will rush out automatically, without any urging, and spend these billions in one grand shopping spree, as soon as post-war comes and management and labor can make the goods. Returning servicemen? Unemployment relief? Oh, sure. But only temporarily. With all those needs, and all that spending, 60,000,000 jobs will come as easily as rolling off a log.

Common sense indicates that this kind of fuzzy thinking is likely to be fatal.

In the first place, it is people's wants—not their needs—that must be met and satisfied. And wants are created only by selling.

In the second place, read this quotation from a United States Chamber of Commerce bulletin:

"We will have 19,000,000 unemployed persons by 1946, if the war is over and if we achieve a level of business activity no higher than in 1940. To provide relief at only $2 per day for this number of unemployed persons would involve a public cost of $14,000,000,000 a year—or twice our pre-war national Budget for all Federal governmental activities, including relief. To provide work relief might cost twice that figure, or twenty-five to thirty billion dollars a year. Obviously, there is no substitute for employment in private industry."

Read that last sentence again: "Obviously, there is no substitute for employment in private industry."

In others words, relief and boondoggling will only put us further in the red.

What about those 60,000,000 jobs now?

How can 60,000,000 jobs be created except by private industry?

Can they be created by the Government? The Government has not a dollar of its own.

The Government gets all its money from taxes paid by the people—who in turn get their money from jobs in business and industry.

To rebuild this war-torn world, to develop new trade routes, new markets, to turn into money the discoveries which float from our laboratories, American business and industry must go back to work—making goods and selling them.

And the selling must be given new life, new snap, new get-up-and-go, by a million or so ex-servicemen who come home looking for some of those 60,000,000 jobs that were promised them in Washington.

During the war, selling got soft and flabby in the underbelly.

Overstuffed pay envelopes, unsatisfied wants, and critical shortages have debased our pre-war selling game to an order-taking routine.

Therefore, the challenge of full employment in private industry—of creating those 60,000,000 peacetime jobs with a minimum of Government relief—demands (1) a let-up in Government pressure on business and industry; (2) a thorough overhauling of American selling methods.

This means trained men. Scientific sales engineering, instead of wasteful hit-or-miss peddling. More orders per selling man-hour.

It means hard-hitting, two-fisted salesmen, who can sell at a fair profit—to get a fair price with which to pay fair wages and salaries to labor and management, and taxes to Government—which is another way of saying that we don't sell goods because we have national income; we have national income because we sell goods.

This is the basic answer to the whole world-security riddle.

Following World War No. 1 my company devised a plan to train ex-servicemen of that war for peacetime selling jobs.

They took to it like ducks to water. No wonder. They were eager, anxious—with the burning desire to do things.

Through the years we added vast improvements to our plan. We incorporated in it the best thinking from other sources. Today we have a sales training method which works better than any other method we know of. It gives sure, practical results.

We are now devoting this method to ex-servicemen of World War No. 2, who are looking for some of this 60,000,000 jobs.

But eventually we want to place this vastly improved sales training method at the disposal of every employer, every labor or service organization, every individual in America who has the future of our country at heart.

In making such an offer now, we believe we will be giving the World Security delegates something to write home about—a better understanding of what makes America tick, and what they must help America do, so that America can help the world get back on its feet.

So, with the world security delegates looking, so to speak, over our shoulder, here is our offer to every American who reads this advertisement:

1. If you are an employer: Write us, and we will tell you about our sales-training formula, so you can put it to use in your own business.

2. If you are the mother, father, or friend of a serviceman: Write me where I can reach him, and I will send him full information on how to qualify for a sales job when he returns to civilian life.

3. If you are a leader in business or industry: Send for reprints of this advertisement and post them on your bulletin boards where everyone in your organization can see them. Mail them to your friends and business associates. Help me to give the widest possible circulation to this great truth: That peace and security in our times cannot come until and unless America goes to work and sells.

A FINAL WORD TO THE WORLD-SECURITY DELEGATES

Today, in San Francisco, you are dealing with the men who are trying to run this country. You are not dealing directly with the American public.

But never forget this: American public opinion is still the strongest force in the world today. Stronger than our Congress, stronger than our statesmen or our elected officials. No matter what you decide at your meetings—we the American people will still have a direct voice in world affairs.

We intend to see that American business and industry are allowed to build reemployment to an unprecedented peak. Only the selling of goods and services, to your people and to our own people, can possibly do the job.

The American Merchant Marine

EXTENSION OF REMARKS

OF

HON. SCHUYLER OTIS BLAND

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. BLAND. Mr. Speaker, under leave to extend my remarks in the Appendix of the CONGRESSIONAL RECORD, I include therein an article by John E. Otterson, chairman, American Maritime Council, appearing in the New York Journal of Commerce of April 23, 1945, in comment on an article which appeared in the Atlantic Monthly for April 1945 entitled "What Shall We Do With the Ships?" written by Lewis W. Douglas, former Deputy Administrator of the War Shipping Administration. This is in line with articles which appear in the Appendix of the RECORD, April 19, 1945, inserted by the gentleman from California, Hon. RICHARD J. WELCH, consisting of an article which appeared in the Army and Navy Journal and also an extension made by me on April 23, 1945, consisting of a statement of the Maritime Commission. Inadvertently my insertion refers to an article appearing in the Atlantic Weekly. This should have been Atlantic Monthly. The article by Mr. Otterson follows:

OTTERSON HITS SUBSIDY FIGURES AND HIS DATA ON FOREIGN COMMERCE

(By John E. Otterson, chairman, American Maritime Council)

In the April issue of the Atlantic Monthly Lewis W. Douglas proposes that we should limit our merchant fleet to its pre-war size in order to minimize subsidies to shipping to be paid out of the public treasury and in order to afford other martime nations an opportunity to carry a larger percentage of the foreign trade of the world, to the end that they may develop foreign exchange with which to buy American products.

Because of his wide experience in Congress, as Director of the Budget, as Deputy War Shipping Administrator and as a business executive, Mr. Douglas is in a position to exert a considerable influence on public opinion. His article is entitled to most careful consideration.

SUBSIDY FIGURES WRONG

The author states that if, for example, there is to be an American merchant fleet of 20,000,000 tons—that is, a fleet only twice the size of our pre-war fleet—the cost to the country in operating subsidies alone will range between $200,000,000 and $300,000,000 each year, depending on the way the subsidy is calculated and the form it takes.

If, as Mr. Douglas states, he is referring to operating subsidies alone, his figures are about 10 times what the actual figures will be, that is, between $20,000,000 and $30,000,000 a year. If, on the other hand, he intends to refer to total operating and construction subsidies, then his figures are about four times the actual subsidies which should be between $50,000,000 and $70,000,000 a year.

Mr. Douglas' second objection to our maintaining a large merchant fleet is that by so doing we would prevent the other maritime nations from deriving income in American dollars for carrying American goods in foreign ships.

CASE OF NORWAY

The total value of our exports to the United Kingdom in 1938 was $513,954,000 and our total imports from that region were $118,366,000. Assuming that England had carried in British ships all of this trade, this would have given her an additional revenue of $20,000,000 to apply against a total merchandise account of $395,000,000—or about 5 percent of that account. Twenty million dollars per annum is obviously not significant enough to influence Britain's broad national policy governing her purchases from the United States. The withdrawal of all competition by the American merchant marine would undoubtedly result in a rise in freight and passenger rates that would make this gesture on our part an expensive luxury.

In the case of Norway, our imports from that country exceed our imports to it so that Norway already has a favorable trade balance in her merchandising account with us, from which she can buy more from us if she is so disposed. We can have no assurance that Norway or any country will use its income derived from ship operation to buy goods in this country.

A similar situation exists as regards Holland, which is already receiving from us in trade more American dollars than she pays out, so that her purchases from us do not depend on her ability to acquire American dollar exchange.

BRITISH SUBSIDY AIDS

Mr. Douglas is also apparently impressed with British arguments against this country's granting subsidies to its merchant marine. I commend to him a study of British practices in this respect over a period of 500 years.

History shows that the British merchant marine has received the following forms of direct and indirect subsidy aid during this period; construction subsidy, operating subsidy, mail contracts, admiralty payments, or subventions to vessels suitable as naval auxiliaries, Government loans to shipping companies and shipbuilders, monopoly to British shipbuilders for building British-flag ships, Government loans for reconversion and modernization of vessels, Government protection of foreign traders against loss, foreign loans made by the British Government on condition that credit be used for purchase of British goods, gifts of vessels by the Crown in trading ventures, Government grants of lands to trading companies, routing of goods to Great Britain for export, discriminating duties in favor of British goods shipped in British bottoms, Imperial preferences granting reduced tariffs for goods shipped in British bottoms, deductions of overland freight on British railroads from dutiable value of articles imported into the Empire, establishment of rates through shipping conferences and extension of deferred rebates favorable to British shipping, use of Navy to promote, extend, and protect foreign commercial interests, and use of British economic and political position in world affairs to promote, extend, and protect foreign commercial interests.

FOREIGN TRADE SHOULD GOVERN

Shipping is merely one American industry. If we are to freeze all of our industries at their pre-war size and refuse to expand them commensurately with the expansion of our national income, because to do so might restrict the expansion of the industries of some foreign country, then I am sure that under such an economic theory we would face "depressed prices, shrinking production, and permanent unemployment."

Any analytical or economic study should be directed toward our foreign trade rather than the size of our merchant marine. Our foreign trade should bear a definite relationship to our national economy and it is generally accepted that our foreign trade should be about equal to 10 percent of our national income. When, in 1938, we had a national income of $64,000,000,000 and a foreign trade of about $5,000,000,000 we had 10,000,000 unemployed.

A national economy based on plenty contemplates national income of $140,000,000,000 a year. To support such a national income would require foreign trade of $14,000,000,000 a year and to carry on foreign trade of $14,000,000,000 a year we shall require a merchant fleet of about 20,000,000 tons, on the assumption that we shall carry 50 percent of our foreign commerce in American bottoms.

ORGANIZATION NEEDED

While ships are merely a facility and an incident in relationship to our foreign trade, yet the organization throughout the world necessary to the maintenance of a strong merchant marine is likewise the organization necessary for the creation and development of our foreign trade; the two are linked together but the objective which makes necessary the maintenance of a strong American merchant marine is the necessity of increasing our foreign trade to have this country prosper and to avoid unemployment.

Furthermore, the increase in foreign trade of this country is the means by which we shall put American dollars into world circulation and make our national credit available to other nations so sorely in need of it. If we limit and inhibit our merchant marine and our foreign trade, we shall surely deny to other nations the opportunity to progress industrially and economically and, in the words of Mr. Douglas, we shall fail to discharge our "responsibility and play our part in fashioning the world."

Mr. Douglas' article in itself does not stand up. When you correct the inaccurate statements in his article, his whole argument fails. However, if his theory is a straw that indicates a rising political breeze which contemplates a complete destruction of our nationalism and the adoption of some altruistic internationalism under which we shall abandon our birthright to other nations and seek to solve their economic problems by abandoning the means by which we shall solve our own, then I should say that we have cause for concern. Mr. Douglas has undoubtedly been exposed to propaganda or spoken of other maritime nations who would limit American foreign trade and shipping as a means to expand their own, but the astonishing thing is that a man of Mr. Douglas' business and political sagacity should have yielded to such blandishment.

Pay Increase for "White Collar" Workers

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the Senate Committee on Civil Service, April 25, 1945:

Mr. Chairman and members of the committee, I am happy to appear before you and urge favorable action on the legislation before your committee for increased pay for the white-collar workers.

Our late and beloved President, Franklin D. Roosevelt, in his annual budget message and the Civil Service Commission, I understand, are in favor of this bill.

I am sympathetic and wholeheartedly in support of the white-collar workers' demands. In order to equalize wages for Federal employees, I urge your committee to bear in mind:

First. A basic wage increase of 25 percent.

Second. Full time and one-half for overtime.

Third. Pay differential for night work.

Fourth. More frequent in-grade raises.

This legislation will alleviate the inequities in compensation affecting this class of workers, who, during this war, have suffered great hardships due to the high cost of living. I wish to give my support toward obtaining a better deal for these forgotten people.

I therefore respectfully urge that your committee take prompt and favorable action on this legislation.

Surplus Property Disposal

EXTENSION OF REMARKS

OF

HON. HENRY D. LARCADE, JR.

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. LARCADE. Mr. Speaker, it will be recalled that I have been one of those intensely interested in surplus property disposal, and when the war surplus disposal bill was under consideration offered an amendment to the bill providing that the war industries be continued in the various locations where established in the United States, and that where the Government was unable to dispose of same to be operated where established that the various governing authorities be given an opportunity to purchase same by issuing long-term, low-interest-bearing certificates or other evidence of indebtedness. The main purpose was to prevent the loss of these industries to the communities where established, as the same would not only have been an asset to the community and the country as a whole, but would have been the means of providing employment in the post-war era to our returning service men and women and others. The amendment was not agreed to, but I have been, and I am still of the opinion that my proposal was sound. These industries should not be abandoned or dismantled or moved to some other country or sacrificed to speculators, for in addition to the economic value, they would insure to our country the availability and supply of many critical materials at all times for the future. Mr. Speaker, in the third annual report of the Attorney General of the United States, I am pleased to learn that this high Government official agrees with me in the general idea, as appears from the editorial report from the Washington Post, and which I requested be included in my remarks.

The editorial referred to follows:

SURPLUS PROPERTY

The Attorney General's third report on surplus-property disposal emphasizes the importance of timing. For instance, plans should be made now to insure expeditious utilization of machine tools in connection with industrial equipment as the war program is cut back. That calls for centralized inventories of the Government's huge machine-tool holdings as well as other pertinent information. Since most of the best machine-tool equipment is owned by the Government, it is first of all essential for the Army and Navy to reach decisions as to what tools are needed for stand-by purposes.

In respect to plant disposal, the Attorney General also stresses the necessity of prompt planning. Considerable time will inevitably elapse between the release of property from war use and the time when peace production can begin. More time will be lost if the prospective purchaser has to assemble economic and engineering data before making a bid on properties offered for sale. Hence the Attorney General strongly recommends an immediate economic and engineering survey of war plants which have been or may be declared surplus. Since it is the purpose of disposal legislation to provide maximum employment and to open up new economic opportunities, especially to small businesses, sales to the highest bidder obviously will not always be considered the best policy.

Both the Government and private industry need time for experimentation and for testing novel uses of industrial equipment. To reconcile this necessity for delay in reaching final decisions with the need for haste in getting peacetime activities started, Attorney General Biddle suggests that in many cases, perhaps in most cases, the wiser policy would be to lease rather than to sell larger plants, for a period of years. Such leases might contain options for purchase at prices based on earnings or fixed by arbitration. In any event, the lessee should be required to state the uses to which the plant is to be put and the leases should contain safeguards designed to insure such utilization.

The general objectives of disposal legislation are fairly well defined and the Department of Justice recommendations are of a character to assist their attainment, provided prompt action is taken. For planning must be done now if jobs are to be ready with a minimum of delay when wartime production ceases, and if industry is to resume peacetime operations under conditions satisfactory to our lawmakers.

Wage Adjustments

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. ROWAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution of the city council, Chicago, Ill.:

DECLARATION IN FAVOR OF WAGE ADJUSTMENTS TO MEET INCREASED LIVING COSTS

Whereas wage earners engaged in the production of front-line war material have petitioned the National War Labor Board for an increase in wages in order to meet the increased cost of living in our city; and

Whereas these wage earners have, through personal sacrifice and by strict adherence to the no-strike policy, achieved unprecedented records in production for our armed forces in the interests of a United Nations victory; and

Whereas without a wage-rate adjustment, the reduced buying power of these wage earners brought about by increased commodity prices will affect their personal welfare and the welfare of their families as well; and

Whereas numerous office workers and others not directly engaged in actual war industry should also be given consideration in order that their wages may be adjusted to meet adequately the present cost of living: Now, therefore, be it

Resolved, That the Council of the City of Chicago record itself as favoring wage adjustments to meet increased living costs; and be it further

Resolved, That the aforementioned views of this council shall be transmitted to the Members of Congress representing the city of Chicago.

STATE OF ILLINOIS,
County of Cook, ss:

I, Ludwig D. Schreiber, city clerk of the city of Chicago, do hereby certify that the above and foregoing is a true and correct copy of the certain resclution adopted by the City Council of the City of Chicago on the 16th day of April A. D. 1945.

Witness my hand and the corporate seal of the said city of Chicago this 25th day of April A. D. 1945.

[SEAL] LUDWIG D. SCHREIBER,
City Clerk.

"While He Walked With Kings He Never Lost the Common Touch"

EXTENSION OF REMARKS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. RABAUT. Mr. Speaker, with a sense of pride, I place in the CONGRESSIONAL RECORD the remarks made by Mr. Justice Jackson and Attorney General Francis Biddle at the memorial service for Franklin D. Roosevelt in the great hall of the Department of Justice on April 13 last:

REMARKS OF MR. JUSTICE JACKSON

Mr. Attorney General and friends in the Department of Justice: I am touched, that in this hour you remember me as one who has shared with you the privilege of serving under President Roosevelt, and as one who would share your grief in his sudden death. No other event could bow so many human heads in a common sorrow and a sense of personal loss. Throughout the land, by countless humble firesides people feel less secure today because he is gone; for, while he walked with kings, they knew that he never lost the common touch; that he was their friend and advocate; that while he lived there would be no forgotten man. Neither sea nor land stretched far enough to get out of range of his sympathy and understanding. During these recent years I, like the rest of you, have watched with growing anxiety as he spent himself so freely in the cause in which he believed. But he brushed aside all warnings, all of his caution was bestowed upon others and he thought of no human being but himself as expendable.

This is not the time to dwell upon his place as one of the most commanding figures of world history. No Alexander, or Caesar, or Hannibal, or Napoleon, or Hitler, ever commanded such an aggregation of physical force. But power was never an end to him, it was a means, a means to a better world where men might live their chosen lives, rear their families in decency and security, safely think and speak their thoughts, and better their material conditions. His office was the symbol of the greatest of organized physical forces. But it was the moral forces and spiritual aspirations of mankind which he really typified and they never were so passionately concentrated around a single per-

son. As history will look back on our time, above the other men who made up its scenes, the figure of Roosevelt will stand "like a sharply cut rock in the midst of a shapeless sea."

President Roosevelt had an interest in this Department second only perhaps to that in the Navy, to which we often jokingly referred as "the President's branch of the service." As a lawyer he often was critical of our profession, of its backward-looking tendencies, its preoccupation at times with red tape to the injury of what he thought were more vital interests. He threw upon this Department from time to time constantly expanding responsibilities, which sometimes were more welcome as evidence of his confidence than for the duties they carried. But he was deeply interested in all of its problems. He wanted us, as attorneys for the Government, to live up to the best tradition of our profession, to shun shoddy work, and to do equal justice under the law.

Before me are many men of whose work either in general or in particular cases I had occasion to talk with the President, and many whom he knew by name—usually by the first name. We cannot avoid a somewhat personal note. Toward us in the Department he never was an exacting or critical overlord. I have had, on more than one occasion, to try to explain to him why things went the way they did, instead of the way I had told him they would go. Peals of hearty laughter would smother my embarrassment. His patience with blundering was sometimes past understanding—but it was mighty comforting when the blunder was your own. How he found time to pen in his own hand the innumerable little chits, telling, or asking, or commenting about this and that, I do not know. No father could be more solicitous of the personal and family welfare of those in his circle. No one worked harder—no one made you so feel like working hard yourself—and no one knew better the proper proportions in which relaxation and laughter must be mixed with all well-balanced work. He loved the simple things; he could make either a king or a countryman feel at ease in his presence. His personality, his serene self-confidence, his gentle firmness were gifts of the gods.

I think President Roosevelt would be pleased that we have paused today in his memory. This is not because he would have wanted a personal tribute. But he would have seen it as a sign of our dedication to the things he stood for and that would gladden him, and not the least of his great services to our times was to inspire us all with his personal courage in the presence of handicaps of life and the mysteries of death. Despair or defeatism among men or nations vanished at his touch. He would want no disheartening note now. After we have paused and renewed our courage through each other's counsel, he would expect us to pick up the burden and carry on.

All of us will agree that for the interests of all that we have and are President Roosevelt's death is untimely. How much his passing affects the destinies of mankind, we can never estimate. Certainly, when the New World meets the Old in council, this hemisphere can no longer send a personality so appealing, a mind so richly endowed and informed, a heart so warm and understanding, a spirit so unconquerable.

But we cannot say that death dealt unkindly with him. In many ways his sudden passing comes as a fitting climax to life. We are glad that he lived the high moments when he could see that his efforts have led our country to the very threshold of victory, both in Europe and in the Orient. It is as though the President had sent his best-loved friend, General Watson, to prepare the way, and now he has followed to the peace which shall have no end.

REMARKS OF ATTORNEY GENERAL FRANCIS BIDDLE

It is fitting that we should meet together this afternoon to share and to express our sense of tragic loneliness and deep sorrow over the loss of our President. The Nation, the world itself, is overwhelmed today by the news that the great leader is gone, the man who expressed in his words, but even more in his life, the mute aspirations of men and women everywhere.

Franklin Roosevelt many years ago achieved a mastery over the threat of his own affliction and had come to serenity within his own spirit before he became our President in the dark days of the depression.

And now in this long hour of our sorrow, we draw strength from what he said then—that we have nothing to fear but fear itself.

For the President's courage was unconquerable, and his strength was measured by a faith in the people which could not be shaken. Today democracy is triumphant on the battlefield and across the seas. The President's death came when our armies and navies were bringing the war against Germany and Japan to a victorious conclusion. In a true sense he gave his life to achieve this ultimate victory. In the words of the psalmist, he wrestled "against the rulers of the darkness of this world, against spiritual wickedness in high places."

His dream of the peace to come, the peace for the little people of the world who loved the President, for the oppressed, the minorities, the plain people whom Lincoln loved, must now be made a reality by all of us who followed him.

As we stand here in sorrow, mourning our tragic loss, we must look to the future if we are to achieve that reality.

Let us, therefore, the members of the Department of Justice, who have worked together under the patient and humane administration of Franklin Roosevelt, renew among ourselves the cause of true justice, and here in our particular part of the structure of our democratic government, continue to build on the ideals which he so vitally lived.

And let us, together with our men and women everywhere, our youth, and with the proud memory of our fighting men who have fallen in battle, pledge our loyalty to the achievement of peace for the world under the leadership of our new President.

May God help America, suddenly made lonely in her hour of need.

And may God bless and give His strength to Harry Truman, the new President of our people.

Italian Patriots

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following radio statement made by me yesterday:

Italian patriots operating behind the German lines north of the Po are giving valiant support to Allied forces which have now crossed the river at many points in a threat to the entire German position in Italy.

It is thanks to the help of the patriots that we are advancing so rapidly, as indicated by our victories at Bologna, at Spezia, and at Parras.

We learn that the partisans have occupied Novara and Varese, and have again captured Domodossola. According to the reports, they control the entire Italian front area from Simplon to Brissago.

This all-out collaboration of these courageous men with our armed forces at this crucial time follows 2 years of patriot fighting under the most difficult conditions. It follows weeks of strikes by Italian workers in industries of northern Italy, so essential to the German war machine.

The most outstanding feature of patriots' warfare and workers' strikes has been the complete discipline of all action. The Committee of National Liberation has led and coordinated all factions and has teamed with the Allied command. As a result, Italian patriots have functioned virtually as a behind-the-lines part of the Allied armies. To them goes credit in no small measure for our successful military operations in Italy. The Committee of National Liberation of North Italy has established an underground democratic system under the most trying circumstances. It has reduced the Fascists to a despised minority and rallied the largest part of the population to fight fascism and nazi-ism.

Italian patriots are partnered with us in the great Allied victories in Germany.

First Lady of Murfreesboro

EXTENSION OF REMARKS

OF

HON. HAROLD H. EARTHMAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. EARTHMAN. Mr. Speaker, our hearts and minds have been turned toward the liberation of Manila and the progress of General MacArthur's march toward Tokyo.

A figure no less colorful than her husband is the General's Lady, who is known and loved throughout the world as the First Lady of Murfreesboro. I should like to include the following article which so graphically portrays the Jean Marie whom my wife and I have known and loved since childhood:

FIRST LADY OF MURFREESBORO—IT'S HER TOWN AND JEAN MARIE M'ARTHUR DREAMS OF THE DAY WHEN SHE, HER GENERAL AND THEIR SON WILL MAKE THEIR HOME THERE

(By Mary Nelle Morris)

To the rest of the world she's "The General's Lady," a gallant and fearless woman who shared with her famous husband the perils of the historic and dramatic dash from Corregidor to Australia; a brave and loyal wife who has remained, insofar as possible, at her husband's side through some of his—and the Nation's—blackest hours.

But to the 9,495 citizens of a little town in Tennessee called Murfreesboro, Jean Marie MacArthur, wife of the five-star general, is "Miss Jean," a petite brown-eyed darling, who "they're positive hasn't change a bit" since she left their aristocratic little Southern town to live adventure such as few women have known. And her letters indicate that is so.

Jean Marie MacArthur, who was Jean Marie Faircloth, the belle of Murfreesboro, before her marriage writes frequently to her girlhood friends and neighbors—letters which are passed around until they're nearly worn out—and the tenor of all her latest ones is the same:

"I am so anxious for the war to be ended * * * to come back to Murfreesboro; for you all to know the general and little Arthur and for them to know and love you as I do."

Mrs. MacArthur's sentiments are shared no less enthusiastically by her townsfolk. They, too, can't wait until the war is ended—to see their "Miss Jean" again and to meet her husband and her son. For, strangely, even though the MacArthurs have been married for 8 years and little Arthur is now 7 years old, the good citizens of Murfreesboro have never met the general. Jean Marie met and was married to him in New York City while she was on an extended world tour.

Murfreesboroans chuckle, however, when their "Miss Jean" writes almost shyly, "I think you'd like the general and I know he'd like you," as she did in one of her letters. Talk about understatement! "Like him!" Why they adore him already. And what a reception there will be when the MacArthurs finally end their long journey home and come to take up residence in the old Colonial mansion that has been the Faircloth home for generations!

It will be a homecoming to remember. And not only because "Miss Jean's" husband is such a famous personage, but because Murfreesboro's "first lady" is so greatly beloved in her own right. "Kind, thoughtful, considerate" are just a few of the adjectives in the whole gamut which Murfreesboroans use to describe her. And they love to talk of her simple, wholesome interests. Her enthusiam over the bi-monthly Luncheon Club, to which she always brings fudge cake—"the best fudge cake ever made;" her love of baseball, football, and the "ham" softball games which her hometown used to stage in prewar days. They still remember that she "just loves" tuna fish sandwiches; that she practically always wears orchid or other varying shades of purple.

They'll tell you how, at Christmas time, no matter how far away, she remembers even old, retired servants with presents, and how disturbed she has been during the past couple of years because circumstances have prevented her from sending the things she would have liked. But "Miss Jean" came through, anyway—by giving magazine subscriptions through the Murfreesboro drug store and to some, like old "Cricket," a former servant, gifts of money. To "Cricket" she wrote:

"Dear Cricket: Another year has rolled by and again I am sending you some money which I hope you will enjoy. Buy something that you need.

"We are very well. My little boy is growing so fast. I hope you are all right and well. In every way, I send good wishes to you, Cricket.

"Yours sincerely,

"MISS JEAN"

All of Mrs. MacArthur's letters are newsy and Murfreesboroans have had first-hand glimpses into South Pacific goings-on which have been denied to others. She tells the neighbors all about her home life; her activities in Brisbane, Australia, which has been her home for nearly 3 years; the baby's life; his kindergarten hours; the quiet strolls in the park; little Arthur's precocious love of music; his war-consciousness; just faint indications of her husband's weighty problems, when she writes: "The general keeps very busy." And, sometimes, humanly, she writes of certain anxieties—like her anxiety over the priceless and precious family heirlooms which she had to leave in her Manila penthouse apartment at the time of the breath-taking flight to Australia. Jean had furnished this lovely place with fine old books, silver, magnificent antiques which had been in the Faircloth family for generations.

She hungers for news of her townsfolk and makes it a point to look up boys from her section of the country. A long time ago she posted a bulletin board notice at an Australian U. S. O.:

"If there is anyone here from Murfreesboro or Rutherford County or Tennessee, please get in touch with me.

"MRS. MACARTHUR."

And all the boys who've taken the "General's Lady" up on her invitation have reported that she's genuinely overjoyed to see them. No wonder Murfreesboroans love her, call her "the most loyal friend in the world," and are preparing to welcome her as no one has ever been welcomed before. They've got a big surprise for her, too. The whole town has been compiling a huge scrapbook—pictures and clippings from all over the United States—which will be handsomely bound as a gift for "Miss Jean" and her "general"—to pore over when the MacArthurs have settled down as Murfreesboro's first citizens.

Wallace and Jobs

EXTENSION OF REMARKS

OF

HON. ROY O. WOODRUFF

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 26, 1945

Mr. WOODRUFF of Michigan. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article by Ralph Hendershot from the New York World-Telegram of April 24, 1945:

WALLACE AND JOBS—POST-WAR EXPORTS OF $10,000,000,000 WOULD PROVIDE SMALL PAY FOR 5,000,000

(By Ralph Hendershot)

In testimony before the House Ways and Means Committee yesterday Henry A. Wallace is quoted in dispatches from Washington as saying that he foresees exports from the United States post-war of $10,000,000,000 or more. And, he said, if this goal is reached along with a substantial increase in imports, we can count on about 5,000,000 additional jobs in this country.

Those of us who are inclined to get the old pencil out whenever big figures are brought into play may be excused for asking whether Mr. Wallace merely picked these totals out of the air or whether they have been carefully calculated.

If the entire $10,000,000,000 received from Mr. Wallace's anticipated exports are paid directly to the 5,000,000 wage earners he mentions each would receive an annual salary of $2,000, or approximately $40 a week. Many of our current wage earners would consider that a rather low income.

RAW MATERIALS COST SOMETHING

Obviously, of course, not all of this money will be paid directly to wage earners. The raw materials which went into the manufacture of these exports cost something, and it is presumed a small part of the total, at least, would represent profit. Then, too, unless we carried the goods in our own ships, something would have to be deducted for freight.

It should be pointed out, too, that in 1938, which probably could be regarded as a normal prewar year, we exported a little more than $3,000,000,000 of goods. We would be obliged to deduct that amount from the anticipated $10,000,000,000 before we figured on the new jobs to be added. We presume Mr. Wallace was talking about new jobs.

Then, too, if we take for granted that exports make jobs, we also should take for granted that imports take jobs away. If, for instance, Americans wear shoes made outside the country, it follows that shoemakers here will not be able to make and sell as many.

SALARIES WOULD BE SMALL

We will not attempt to add up or analyze the deductions in terms of jobs which should be taken into consideration with respect to that $10,000,000,000, but we have a notion that if 5,000,000 people were to be asked by Mr. Wallace to accept the net proceeds he would be looking for the next train back to his farm. Certainly he would no longer be called a friend of the worker.

It is pretty certain that in the first few years after the war our exports will reach tremendous proportions. In fact, probably the only limit on shipments will be our ability to produce the desired goods and our willingness to give them away or extend credits for their purchase. Whether we can maintain such large exports after the world has returned to normal again is quite another matter. We doubt it very much.

Hail and Farewell

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Boston Post of April 30, 1945:

HAIL AND FAREWELL

Now he is great through all eternity.

So long as time lasts and any man lives, he will be remembered and revered.

Into the Valhalla of the heroic and the immortal, Washington and Lincoln receive him today—Franklin Delano Roosevelt—who truly died that his country might live and that the free people of earth might survive—died as he wished, leading mankind's march to a better day.

His death shocks the Nation. His death shakes the world.

He goes in the hour when his leadership and his wisdom, his courage and experience, his ideals and his dreams of a finer, freer world for men to live in, was needed.

Although he departs on the eve of the achievement of one of his greatest aims—the defeat of the Germanic foeman in his tottering European stronghold—he could be illy spared.

Although he goes as another foe, as bitter and difficult, slides down the long, sure road to eventual destruction, propelled to his doom by the forces which Franklin Delano Roosevelt raised against him, his loss is no less.

For now, as the darkness flees and the lights go on again, as the enslaved climb out of the dungeons and the free batter down the brutal bastions, as the red fields of the world turn green with the splendor of spring and the joyous songs of liberty mingle with the happy melodies of the homecoming birds, he was coming into his greatest time.

He had known great times, difficult times, times that tested him longer and more fully than any other President. From his inauguration in the time of the depression until his last breath there were no moments not beset, there was no hour when he was free of man's tribulations—domestic and foreign. Yet, this man, who understood the suffering of others because of the long years he bravely suffered himself, never flinched nor faltered.

This was to be his greatest hour. As he led in peace and war, forthright and foursquare, resolute and unswerving, in the long, uphill struggle to the mountain top, just as the dawn was breaking he was called away, leaving to others the fulfillment of his hope, our hope, and the hope of all free men, for peace, everlasting peace.

Yet, we who have lived these long years with greatness and now have lost him, cannot, must not and will not despair.

The banner that fell never touched earth. Even at the moment when God beckoned him to the reward and rest so richly deserved, eager and faithful hands caught it up, the hands of the American people, on the battle-line and the home front, to hold it aloft and carry it forward until his dream is consummated.

Into his place, to lead in the time ahead, steps a man of his own choosing, a simple, firm, able American who will gather to him the President's advisers on great affairs—one of humble beginnings, who, in the American tradition, has filled the high places with honor and outstanding distinction.

On his shoulders now falls the great burden.

Yet, he will carry it, as the President carried it, courageously and capably with the help of the American people, with the confidence of our allies.

Through him, in his actions and accomplishments, Franklin Delano Roosevelt will carry on—

Franklin Delano Roosevelt who lived and died for his country, who gave his life for mankind.

Our Daily Bread

EXTENSION OF REMARKS

OF

HON. KARL STEFAN

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. STEFAN. Mr. Speaker, by leave granted me, I include with my remarks a brief statement on the subject, Our Daily Bread, written by Clarence Woodbury in Common Sense and condensed in Reader's Digest:

When I was growing up, Saturday always seemed the best day of the week to me. Not just because there was no school, but because it was baking day.

All during the morning a tantalizing, mouth-watering fragrance crept through the house and, by midafternoon, we would all be half crazed with hunger. Then, at about 3 o'clock, all the children would rush to the kitchen to watch my mother draw six fat, shiny loaves of bread and a big pan of rolls from the oven of the coal range. No food on earth was ever any better than that fresh warm bread.

The six crusty, succulent loaves would usually last until the next Saturday; but now and then, because of unexpected guests, we would have to eke out our supply with store bread. Mother was always deeply embarrassed on these occasions. Store bread, in her opinion, wasn't fit to eat.

All this happened a good many years ago, but store bread as turned out by our big commercial bakeries is no better eating nowadays. Instead of rich, crunchy, satisfying crust, it has a thin, tasteless flabby coating. True, the stuff is now wrapped in wax paper. It comes ready sliced and "enriched" with synthetic vitamins—which costs little and makes good ballyhoo.

Millions of dollars are spent in shrieking its alleged virtues over the radio, plastering the landscape with billboard advertising. It is, undoubtedly, pure, sanitary, wholesome, nutritious, clean, white, and beautiful—but it is utterly tasteless. It's a far cry from the bread my mother used to make, or the bread of any other land under the sun.

This is not just my opinion. There is a good deal of evidence to show that the general public doesn't like the big bakers' product either. We buy it—but our national taste has not become so debased that we have grown fond of the quilt stuffing foisted upon us as the staff of life.

I travel around the United States a good deal and very seldom do I meet anyone who will eat store bread if he can get anything else. Restaurant keepers from coast to coast have told me that, if given a choice, their patrons will invariably eat biscuits, rolls, corn pone, soup crackers, bread sticks or foreign bread of any description in preference.

The sad fact is that the great majority of Americans fill their bellies with store bread, not because they like it, but because it is difficult for them to get anything else.

In many communities it is still possible to obtain real bread by taking a little trouble. On side streets there are little bakeries—French, Italian, Jewish, German, Hungarian—which consistently produce delicious hard-crust white bread, honest black pumpernickel, tangy salt-rising bread, and magnificent sour rye. Any one of these loaves is a meal which will renew a hungry man in both body and spirit.

But most housewives find it simpler to buy the advertised pap of the big bakers than to shop for really tasty bread or treat their families to ambrosial homemade loaves.

At the end of the last war 50 percent of the bread sold in this country was baked by the small independents. Today they are being squeezed out of business and produce only 10 percent of it. The rest is manufactured by about 80 wholesale producers and chain-store companies. Indeed, the 10 largest of these companies make more than 30 percent of all the bread we consume.

Why, you may wonder, don't the big companies bake real bread? Can it be that they don't know how? They employ hordes of engineers, electricians, chemists, advertising sharks, and throaty radio orators, but practically no skilled bakers who could, unaided by assembly-line gadgetry, go into a kitchen and mix and bake a loaf of bread like mother used to.

The big companies simply find it easier to persuade us by advertising that their product is delicious than to make it so. They are not primarily concerned with gratifying your palate. They are intent upon producing loaves which are precisely uniform in size, shape, and texture, and which will remain fresh—meaning soft—for an unnaturally long time. Uniformity makes it cheap to handle, slice, and wrap mechanically, of course, and the fresh-keeping quality makes it possible to distribute over large marketing areas.

To produce bread that will stay soft the bakers, first of all, rule out the type of flour which makes the best bread in the world—flour milled from soft or high-gluten wheat such as is used in making French and Italian bread. In the second place, they do not bake the bread as thoroughly as it should be baked to taste best, and thirdly, they package it in moistureproof wrappers.

From a sanitary point of view such wrappers are entirely unnecessary. Bacteriologists have assured me that we should be just as safe from germs if our bread was brought home in a paper sack. After all, pies, cakes, and cookies—surely better germ catchers than bread—aren't sealed up so elaborately, and nobody is scared to eat them. Nevertheless millions of housewives have been led to believe that bread must be thus wrapped for health protection.

The formulas which the big bakers employ to keep their bread soft account, to a large extent, for its tasteless quality and for the fact that in warm weather it may turn repulsively green and moldy in your bread box instead of drying out slowly as decent bread does. Without question, though, these practices produce an efficient article of commerce for blitzing small competitors.

One method the big baker employs to swamp markets far from his plant and to induce the retailer to handle his bread exclusively, or give it the best display, is so-called consignment selling. Through this practice, which has been temporarily prohibited by the War Food Administration, the wholesale baker overstocks the shelve of retailers to provide mass sales appeal, and takes back bread as it becomes stale at no loss to the retailer. The stale bread is sold as livestock feed or burned in the bakery furnaces. When consignment selling was suspended some grocery stores were returning as "stales" from 30 to 50 percent of the bread they received, and the practice was costing the Nation every day enough bread to feed 2,000,000 people.

There is no sound economic reason why bread should be produced in large quantities in a few big central plants and then delivered to consumers who live hundreds of miles away. Mass production has not cut the cost of the Nation's bread. The average consumer paid 9.27 cents for a 1-pound loaf in 1942, as compared to 8.55 cents in 1922, although the wheat-grower's income from that same loaf dropped from 1.14 cents to 1.03 cents during the 20-year period. It is a shocking fact that 23.56 cents out of every dollar spent in producing bread goes for distribution.

There are signs that the American people are eager to buy real bread and will pay a good price for it. A few years ago, a Connecticut housewife, Mrs. Margaret Rudkin, started baking eight loaves a day in her own kitchen and selling them to neighbors. It was good, honest bread, and its fame soon spread. Today Mrs. Rudkin sells her Pepperidge farm loaves by mail all over the United States and at a fancy price. A considerable portion of the public eagerly pays her a premium to get away from the cotton batting put out by the big companies.

I know a man who has put his two daughters through college on the earnings of his little bake shop in New York. When he calls on friends he always brings a loaf of his fresh, crusty bread. A short time ago he dropped in on an old acquaintance who was staying at a hotel with his 9-year-old son. The boy got hold of the loaf and ate it all, without butter. The youngster was not starving. He had simply never tasted real bread before.

There are, I fear, millions of other children in the United States like that. Young and old alike, we have never known or have almost forgotten how delicious bread can be. Nobody expects the average housewife to bake bread, as her grandmother did. What she can do, however, and should do in justice to herself and her household, is to insist on getting real bread for her money.

Bretton Woods Agreements

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. BIEMILLER. Mr. Speaker, some of the opponents of Bretton Woods are endeavoring to confuse the people of this country by insisting that the International Monetary Fund agreement is too complicated for them to understand. These opponents engage in a mumbo-jumbo of technical economic phraseology and hope in this manner to convince the American people that the Bretton Woods

agreements are against their best interests.

Actually there is nothing very complicated about either the International Bank or the International Monetary Fund as proposed in the Bretton Woods agreements. One of the best down-to-earth discussions I have seen is contained in a radio broadcast made for the independent voters of Illinois by "Studs" Terkel. I think anyone who reads this broadcast will have a clear understanding of the great value of Bretton Woods:

In a message to Congress on Lincoln's birthday F. D. R. referred to Bretton Woods as the twin cornerstone to Dumbarton Oaks. That is to say, collaboration between nations must be economic as well as political—it's one world from any angle. Just as our democracy depends on the spread of democracy throughout the world, so does our prosperity depend on the spread of prosperity throughout the world. Poverty in Czechoslovakia may foreshadow a bread line in Illinois. For certainly if America is to have full employment, a job for every man and woman ready and willing and able to work, our foreign trade can't be on the downbeat.

Our Treasury Department reports that under full employment our exports to foreign countries would provide 3,000,000 jobs in industry and 1,000,000 in agriculture; that a loss of foreign markets, due to lack of economic teamwork, would force American farmers to retire 16 out of every 100 acres. Shades of '32.

WHAT IS BRETTON WOODS, ANYWAY?

Back in July last year delegates of 44 United Nations got together in New Hampshire and for 3 weeks threshed things out.

Finally these top-fight bankers, economists, and figure jugglers got a plan down on paper, not a perfect plan but a workable one, a practical one, worked out by successful financiers. Here was the most convincing international agreement we've had yet, to 44 different nations, everything on paper, all open and above board.

Now, here's the pay-off: These same weeping Willies who've been hollering murder about secret agreements, about the betrayal of small nations, are now fighting Bretton Woods because it has too much representation. They say it won't work. Then, suddenly it hits you: The opponents of political teamwork are the opponents of economic teamwork. The opponents of one cornerstone wish to tear down the other cornerstone. And the man who opposes Wallace and full employment aims for a perfect cipher in opposing Bretton Woods and full employment.

Sure, the proposals of Bretton Woods are novel. They've never been tried. before. Never has the world been this small before.

The proposition is twofold: An international bank to help in the reconstruction of devastated countries and development of backward nations, and an international monetary fund to promote exchange stability and to facilitate the balanced growth of international trade.

There isn't must opposition to the bank. Even the most nearsighted of politicians knows what's happened to railway systems and factories and harbors of once-occupied countries, and that long-term loans must be granted to peoples eager to rebuild their lands, to dig in with bulldozer and derrick, to get those chimneys puffing away once again, so that they may export as well as import.

And here is the rub, here's where the backward steppers take a stand.

We know that early in the postwar period the imports of a devastated country—like Norway—will exceed its exports. In the long run, a country pays for the goods it receives with the goods it ships out. But there are times when the scales won't balance.

WHAT'S TO BE DONE? DO WE STOP TRADING WITH NORWAY?

Do we say nix, you haven't come through with enough paper, and herring, and cod-liver oil, and you can't pay in the currency of your kingdom without depreciating it, so we won't send you any cotton or automobiles?

And so a customer goes down the hatch; and men who worked the auto assembly line up in Detroit spend some days at home twiddling their thumbs because we've lost a lot of customers like Norway. This will be the case if Congress refuses to O. K. point No. 2 of the Bretton Woods plan—the Currency Stabilization Fund.

This fund is a pool, a kitty, into which each of the 44 countries contributes a lump sum of its currency equivalent to a given amount of American dollars, depending on the nation's size and commerce. You might call it an emergency fund. If Norway, for instance, needs to pay for a shipload of Diesel engines—and hasn't acquired enough American dollars by its exports of sardines and lumber—it may borrow from the fund a limited amount of American dollars.

This loan gives Norway time to get its second wind, more time in which to achieve its long-run trade balance. As a result of this new technique international trade can continue uninterrupted, every man will be at every machine in America as in other countries, and the currency of the nations will be kept stable. The people of Norway can have confidence in their kroner, the people of France will know that a franc is worth as much in 1960 as in 1948; the folks in Italy will know that a lira is worth as much on Wednesday as on Tuesday; and with confidence in the coin of the realm sustained, the peoples' governments of these countries will be more firmly established.

We know what monetary difficulties can do to a nation. The nation which cannot meet its obligations is tempted to start the presses of inflation. We know what happened to the German mark after the last war: How it sunk till a barrel of marks was the price of a can of beans, how the mark became a pretty cheap brand of wallpaper, and with this nightmarish inflation, this lack of confidence and bewilderment, the way was opened for A. Hitler's rise to power.

The International Monetary Fund will be a careful guarded, supervised institution. No country may borrow in any one year more than 25 percent of its contribution, and the United States, the No. 1 participant will have the No. 1 voice in administration of the fund.

Yet, the American Bankers' Association beats out the blues. It won't work, is the mournful chant. But, there are far more financial experts who say it will work, men like Edward Eagle Brown, president of the Chicago First National, and 16 out of 18 past presidents of the American Economic Association. Why then does the ABA say, "No soap!"?

"Too flexible," say the conservatives. "It might bring inflation in this country. We might lose the money." And we might, there's always a chance for trouble; but, we might not. If it helps to prevent another war, like this one, we might save a hundred times as much in money, besides the lives of some of our best young men. For Bretton Woods is a milestone of economic understanding amongst nations. Here is true international banking at its best, for the good and welfare of the peoples of those nations.

Memorial to Ernie Pyle

EXTENSION OF REMARKS

OF

HON. BROOKS HAYS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. HAYS. Mr. Speaker, Mr. Earl Godwin made the suggestion in his broadcast on last Saturday that the island where the famous and beloved Ernie Pyle was killed be named the Ernie Pyle Island. I believe that this suggestion will have a strong appeal for millions of people who appreciated the day-by-day account from the front by the modest but brilliant newsman who faced the dangers of battle with our men and bore all of their hardships with them. I have today introduced a resolution to embody Mr. Godwin's suggestion and I trust that the proposal will receive favorable consideration by the Committee on Interstate and Foreign Commerce. It would be a fitting memorial to a great American.

Recently I introduced a resolution to provide for a change in the name of the island known as Iwo Jima to the Marines Island in recognition of the heroism displayed by the marines in the battle for its possession, and I respectfully suggest that the committee consider these resolutions together.

I should like to point out that these changes would not affect in the slightest degree the question to be considered in peace conferences relating to the control of said islands following the war, but it would enable the Nation through its official documents and maps to adopt a forceful and appropriate way of honoring some of its heroes.

Dangers of Postwar Deflation

REMARKS

OF

HON. JOHN E. RANKIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. RANKIN. Mr. Speaker, the gentleman from New York [Mr. TABER] touched upon a question that is bound to have the attention of the American Congress for the next few years—the prospect of postwar inflation, which also includes the question of postwar deflation.

If we are going to permit the Federal Reserve System to contract the currency, as it did after the last war, we are going to be driven into a depression that, in all probability, will result in the repudiation of the national debt and bring about such

chaos and confusion that it might result in a disastrous revolution.

After the last war, at the peak of high prices, we had $5,698,214,612 in circulation. Today we have, or at least on the 28th of February, 1945, we had $25,751,-204,220 in circulation. Of that amount $22,749,848,165 is Federal Reserve notes that can be withdrawn from circulation and retired without the consent of Congress.

If we are going to maintain our form of government, preserve its integrity, and at the same time meet our national debt without repudiation, we are going to have to do something to stabilize the amount of currency in circulation, and not permit a bunch of financial high-binders to throw the country into a depression, as they did in 1920 and as they did in 1929.

Congress can protect this country from such a disaster by taking back the power to coin money and to regulate the value thereof, and stabilizing the currency as it stands the day the war closes in such a way to prevent runaway inflation, and at the same time protect the country from the disaster that would undoubtedly result from a drastic deflation.

At this point I am inserting the circulation statement of United States money of February 28, 1945, which I hope every Member will study carefully. For, as I said, this is one of the most important issues with which we are going to have to deal in the postwar period.

The matter referred to follows:

Circulation statement of United States money, Feb. 28, 1945

Kind of money	Total amount	Money held in the Treasury					Money outside of the Treasury				Population of continental United States (estimated)
		Total	Amount held as security against gold and silver certificates (and Treasury notes of 1890)	Reserve against United States notes (and Treasury notes of 1890)	Held for Federal Reserve banks and agents	All other money	Total	Held by Federal Reserve banks and agents	In circulation [1]		
									Amount	Per capita	
Gold	[2] $20,505,997,581	$20,505,997,581	$18,398,312,924	$156,039,431		[3] $1,951,645,226					
Gold certificates	[4] 18,398,312,924	[4] 15,530,230,065			[4] [5] $15,530,230,065		$2,868,082,859	$2,815,444,500	$52,638,359	$0.38	
Standard silver dollars	494,021,125	373,995,443	275,760,837			98,234,606	120,025,682	1,720,241	118,305,441	.85	
Silver bullion	1,520,133,653	1,520,133,653	1,520,133,653								
Silver certificates	[4] 1,794,742,668						1,794,742,668	211,282,870	1,583,459,798	11.38	
Treasury notes of 1890	[4] 1,151,822						1,151,822		1,151,822	.01

[1] The money in circulation includes any paper currency held outside the continental limits of the United States.

[2] Does not include gold other than that held by the Treasury.

[3] Includes $1,800,000,000 exchange stabilization fund and $143,955,464 balance of increment resulting from reduction in weight of the gold dollar.

[4] These amounts are not included in the total, since the gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and silver bullion, respectively.

[5] This total includes credits with the Treasurer of the United States payable in gold certificates in (1) the gold certificate fund, Board of Governors, Federal Reserve System, in the amount of $14,909,421,182, and (2) the redemption fund for Federal Reserve notes in the amount of $620,808,883.

[6] Includes $123,000,000 lawful money deposited as a reserve for postal-savings deposits.

[7] The amount of gold and silver certificates and Treasury notes of 1890 should be deducted from this amount before combining with total money held in the Treasury to arrive at the total amount of money in the United States.

[8] Revised figures.

NOTE.—There is maintained in the Treasury (i) as a reserve for United States notes and Treasury notes of 1890—$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or, until June 30, 1945, of direct obligations of the United States if so authorized by a majority vote of the Board of Governors of the Federal Reserve System. Federal Reserve banks must maintain a reserve in gold certificates of at least 40 percent, including the redemption fund which must be deposited with the Treasurer of the United States, against Federal Reserve notes in actual circulation. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve bank notes and national bank notes are in process of retirement.

Salary Claims of Robert Morss Lovett, Goodwin B. Watson, and William E. Dodd, Jr.

EXTENSION OF REMARKS

OF

HON. JOHN H. KERR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. KERR. Mr. Speaker, the traditional power of the purse and the right of Congress to refuse to provide salaries for persons on the Government pay roll who were deemed to have engaged in subversive activities was defended today in a brief filed in the Court of Claims.

Asserting that Congress "has the power to appropriate for or to withhold appropriations from individuals by class or name," the brief asks the court to dismiss the salary claims of three Federal employees whom Congress specifically eliminated from the public pay roll in a special section of the Urgency Deficiency Appropriation Act of 1943.

The brief was filed by John C. Gall, Washington attorney, acting as special counsel for Congress after Attorney General Biddle had advised Congress that he could not advocate its views with conviction. Both the Senate and House concurred in the court action to compel the executive branch of the Government to recognize the powers of Congress.

Denying a claim of unjust discrimination brought by Robert Morss Lovett, formerly executive assistant to the Governor of the Virgin Islands, and by Goodwin B. Watson and William E. Dodd, Jr., employees of the Federal Communications Commission, the brief filed by Mr. Gall declares that the action of Congress was "clearly an exercise of the power over appropriations and not an attempted exercise of the power of removal."

Congress and the administration came in conflict over the three Government employees on the historic constitutional issue 2 years ago, and the brief filed today is unusual in that it is submitted

under special resolution of Congress by private counsel instead of by the Attorney General.

According to the congressional brief, the brief that was filed in the case by Attorney General Biddle is devoted entirely to propositions also urged by counsel for the plaintiffs.

Replying to an allegation in Mr. Biddle's brief that the hearings before the Kerr subcommittee of the House "denied several of the fundamental rights guaranteed by the sixth amendment to the accused in all criminal prosecutions," the congressional brief comments:

> If supported by the facts agreed to in the stitpulations, such charges by the plaintiffs in aid of their suits against the United States would be understandable. Coming from the Attorney General in a brief filed in defense of a suit against the United States they are little short of amazing.

The brief for Congress stated that Attorney General Biddle is breaking a precedent in the Attorney-General's office by appearing "as counsel for the United States, and, at the same time, in aid of a claim against the United States."

Seldom have more far-reaching constitutional issues been raised over more insignificant financial claims.

Accused of subversive activities, all three were invited by Congress to "have their say" before the special congressional Kerr subcommittee.

Their statements failing to satisfy the Members of Congress, that body subsequently passed the Urgent Deficiency Appropriation Act in July, 1943, with the specific provision that after November 16, 1943, no funds be used to pay their salaries unless they received Presidential appointments confirmed by the Senate.

No such appointments being made by President Roosevelt, the Department of the Interior and the Federal Communications Commission ceased to pay their salaries after November 16.

The brief of Congress points out that—

> The problem with which Congress was dealing was that of subversive activities among Federal civil-service employees. * * *
>
> Two courses were open. The Congress could have proceeded along broad general lines and provided that no part of appropriated funds should be used to pay any part of the compensation of any executive employee who was a member of any of the organizations which the Attorney General had held to be within the scope of Public Law No. 135 (for example, American League for Peace and Democracy). But the circumstances were such that a general proscription would have been arbitrary and extremely unfair to many people who had innocently joined such Communist-front organizations. The Attorney General himself had so warned Congress. (Lovett Ex. 18, pp. 1–5.)
>
> A far less objectionable course was the one Congress adopted. It proceeded to investigate individual cases, and to withhold appropriations in those instances only where it appeared that the employee complained of was not merely a member of one such organization, but many, and where, in addition to his membership in such organizations, his speeches, writings, and general activities were such as to make it, in the opinion of Congress, inconsistent with the public welfare to continue to appropriate public funds to him.

Summarizing the constitutional issue between the executive and legislative branches of the Government, Mr. Gall's brief states:

> It is alleged that the act does not represent a true or legitimate exercise of the congressional power over appropriations, but that the exercise of the power over appropriations was a mere cloak for a more sinister purpose—that of invading the Executive prerogative and effecting a removal from executive employment. We may concede at once that many Members of Congress desired that plaintiffs should be removed from office. The fact is, however, that the statute as finally adopted did not remove the plaintiffs, or either of them, from office, nor did it require the Executive to do so. What it did was to say to the disbursing officers of the Government: "You may not draw from the Treasury any public funds to pay as salaries to the plaintiffs after November 15, 1943, unless prior to that date plaintiffs have been appointed and confirmed as herein provided." The act did not require the Executive to do any act of any kind, by November 15, or any other date, or at all. What it did was merely to make unavailable any public funds for payment of salaries for any services after that date, unless the President exercised the option of making the appointment. Whether the President made the appointment or did not do so, no compulsion was placed upon him and no invasion of his prerogatives was involved.
>
> The act was clearly an exercise of the power over appropriations and not an attempted exercise of a power of removal.

Reviewing the challenge to Congress' historic "power of the purse," the brief continues:

> The plaintiffs and the Attorney General have joined in urging that the present exercise of control over appropriations be stricken down because if the power of Congress to withhold appropriations on the conditions laid down in section 304 be sustained the power may be abused. * * *
>
> The precise question presented here has never before been adjudicated in our courts. It may well be supposed that the existence of the power of Congress in its absolute discretion to withhold funds is so clear that heretofore no one has thought to challenge the exercise of the power. * * *
>
> The framers of the Constitution were not content to grant to Congress the power to tax and to spend. They went a step further and provided that except in pursuance of an appropriation by Congress no money could be drawn from the Treasury. This provision—operating on all persons and all agencies, executive and judicial alike—clearly vests in Congress complete discretion as to whether it will authorize money to be withdrawn from the Treasury for any particular purpose; and its decision not to authorize the withdrawal is conclusive upon all. Such a refusal creates no private rights—certainly no private rights cognizable by the judiciary. * * *
>
> The importance of the present case is attested by the fact that never in the history of the United States have the courts invalidated an act of Congress directing the withholding of public funds, either absolutely or conditionally. The implications of a decision against the Government in this case are obvious, for Congress has, since the beginning of our Government, exercised the right to withhold funds, in its complete discretion. * * *
>
> We are dealing here with exceptions to lump-sum appropriations. * * *
>
> To hold that Congress may not make such exceptions to a lump-sum appropriation as it sees fit, under conditions which now prevail would produce the very practical difficulties which the lump-sum method was designed to overcome. The only alternative open to Congress would then be to resort to specific appropriations for individuals by name or to relinquish to the executive branch of the Government a part of its constitutional power over appropriations. * * *
>
> The fundamental issue here involved antedates the formation of the United States Government itself, yet today the plenary legislative power to control the expenditure of the taxpayers' money is being challenged. The very definition of an appropriation, the act of setting apart or assigning to a particular use or person in exclusion of all others, sustains the power of Congress to enact the provision challenged in these suits.

In asking the Court to dismiss the suits, the brief of Congress points out that a judgment for the plaintiffs could not be paid except by another congressional appropriation for that purpose.

> The Congress has already stated unequivocally, through section 304, that it is unwilling to make such appropriation. The control of the public purse is lodged exclusively in Congress. Congress is directed by the Constitution to make appropriations only for the general welfare. Its action in adopting section 304 is equivalent to a finding on its part that an appropriation to plaintiffs would not be for the public welfare.
>
> Even if the courts should conclude that they have jurisdiction of these claims, it still follows that the determination of the Congress not to permit the withdrawal of public funds from the Public Treasury should be respected.

In the Deficiency Appropriations Act of 1943 Congress inserted a provision that no part of the funds appropriated by that or other acts should be used to pay any part of the compensation of three named individuals—Lovett, Watson, and Dodd—after November 15, 1943, unless, prior to that date, they were nominated by the President and confirmed by the Senate. Neither of them was so nominated and confirmed.

On November 15, 1943, the executive superiors of these three men, in one instance the Federal Communications Commission, and in the other the Department of the Interior, made arrangements whereby the men were allowed to continue at their desks for a limited period in order that they might lay the basis for suits for salaries against the United States Government. These suits were duly filed, the plaintiffs claiming that the act of Congress was unconstitutional and void.

At the time the Deficiency Appropriation Act was passed, Attorney General Biddle took the position that the provision with respect to these three employees was unconstitutional. Congress therefore decided to employ its own counsel to defend these three suits. It selected John C. Gall, of Washington, D. C., to defend the suits.

Briefs have been filed in the Court of Claims on behalf of the plaintiffs and the Attorney General. The brief on behalf of Congress, filed today by Mr. Gall, is in answer to briefs previously filed.

The plaintiffs and the Attorney General attack the statute on several grounds. First, that it is an unconstitutional invasion of the prerogatives of the President with respect to removal of executive employees from office. Second, that it constitutes a bill of attainder. Third, that the procedures of the Kerr subcommittee of the House of Representatives, which investigated these employees, were highly irregular and de-

prived the employees of various constitutional rights as to procedure.

The brief filed on behalf of Congress answers all these charges. It points out that the statute did not remove any of these employees from office, but that in fact they continued in office, and one of them—Dodd—is still carried on the rolls of the Federal Communications Commission as an employee on leave of absence without pay. The brief on behalf of Congress points out that since the founding of this Government the Congress has frequently adopted appropriation acts with limitations which direct the manner of expenditure of the funds or limit the expenditure in such a way as to prevent the money so appropriated from being expended except for the objects and purposes specified by Congress. The brief points out that the courts have never set aside an act of Congress putting limitations on an appropriation measure, and that if this were done in the present case it would call into question the constitutionality of various measures which have been on the statute books for many years.

The brief also points out that the Congress, in controlling the public purse, may withhold funds whenever in its judgment it would not be for the public welfare to permit the expenditure. It emphasizes that the holding of office or employment in the executive branch of the Government, and the receipt of compensation, are two separate and distinct things; and that it is not a necessary incident of employment that the employee shall receive compensation. Whether Federal employees will be paid, and if so, the amounts they will be paid, the Constitution leaves entirely to the Congress. This is illustrated by the fact that as of January 1945 there were in the employ of the executive branch of the Government 311,000 persons who either received no compensation or received $1 per year. It also pointed out that there is no general law which requires the payment of compensation as a condition of holding Federal office or employment. The arrangement by which certain people are paid $1 per year is not one required by law.

The congressional brief also takes issue with the Attorney General in his charges that the congressional committee which examined the plaintiffs, denied them any rights which are ordinarily accorded in legislative or other proceedings. The brief lists the charges made by the Attorney General and answers them fully, also showing that they are not supported by the stipulated facts to which the Attorney General's office subscribed.

The brief also deals with the contention made by the plaintiffs and the Attorney General that the only method open to Congress under the Constitution for the removal of executive employees is the process of impeachment. The brief points out that since Congress did not undertake the removal of these employees, but merely provided that they should not receive compensation unless they were appointed in a certain way, obviously the procedure of impeachment would have been improper and inappropriate. The brief reviews all of the impeachment proceedings in the history of the United States showing that such proceedings are appropriate only in the case of high officials of the Government and not in the case of any one of the three and one-half million Federal civil-service employees.

The brief reviews legislative precedents, not only in the history of the United States, but in parliamentary history prior to the adoption of the United States Constitution.

The case is now pending in the United States Court of Claims where it is expected that it will be reached for argument in the near future.

The congressional subcommittee which later recommended legislation, was headed by Representative JOHN H. KERR, of North Carolina. The other members were Representatives ANDERSON of New Mexico; GORE, of Tennessee; KEEFE, of Wisconsin; and POWERS, of New Jersey.

Fifth Column Against United States in Mexico Revealed

EXTENSION OF REMARKS
OF
HON. ADOLPH J. SABATH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. SABATH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Stanley Johnson, from the Washington Times-Herald of April 28, 1945:

FIFTH COLUMN AGAINST UNITED STATES IN MEXICO REVEALED

(By Stanley Johnston)

The presence in Mexico of a fifth column that is inciting hostility against the United States by reviving old resentments and making subversive capital of wartime exigencies has been brought into the open by Ezequiel Padilla, Mexico's Secretary of Foreign Affairs.

In a recent address, Padilla, who is head of Mexico's delegation at the San Francisco Conference, disclosed that the anti-United States sentiment, though not representing a majority opinion in Mexico, had attained such proportions that he felt impelled to defend his country's foreign policy, particularly his close collaboration with this Nation.

DOESN'T MENTION NAMES

While Padilla did not mention names, it was believed his criticism was directed at jealous politicians, ambitious business interests, and army men with divergient views, as well as the representatives of foreign governments.

He observed that "the people must realize this is a fifth column machination when they consider that the undermining campaign is only carried out within the country," and noted that though many of the plotters are foreigners fulfilling their subversive mission, "unfortunately there are also Mexicans who, in their campaign to discredit the country, forget they are Mexicans."

In the early days of the war when Mexican ships were being sunk these persons suggested, Padilla recalled, that the ships had been attacked by United States submarines. When there was a shortage of corn, wheat, lard, or gasoline, they whispered it was "because everything is shipped to the United States." A recent subject of our Mexican detractors' efforts to arouse suspicions has been Argentina's delicate relations with the other Pan-American countries.

The imminence of a final war victory for the Allied nations having narrowed that field, the inciters are now reverting to the past. They are insidiously stirring historical resentment concerning the United States' annexation of Mexican territory and other incidents in which they accuse this country of having belittled Mexicans.

DEFENSE POLICY DEFINED

Padilla, who frankly defined the purpose of his address as a defense of Mexican foreign policy against the destructive machinations, said:

"The people must be aware of the existence of a constant and renewed onslaught against our foreign policy. That onslaught consists in designating the policy of Mexico as entreguismo, that is, turning one's country over to a foreign power."

He cynically observed that to his slanderers "our attitude would have been brave had we joined the Axis powers, had we turned Mexico over to the opprobrious dictatorships." Instead, Mevican foreign policy clearly advocated pan-Americanism.

Warning that, just as Mexico has individuals who hate their big northern neighbor, so does the United States "have a powerful sector with imperialistic tendencies," Padilla said:

Those who for spite, for their unconfessed Nazi-fascism, or for envy, stir up animosity against our friends, the people of the United States, thereby encourage that imperialistic sector and thus weaken, before the public opinion of that country, the good neighbor policy so evident on the part of the great majority of the American people."

Send German Prisoners Back to Europe

EXTENSION OF REMARKS
OF
HON. GEORGE H. BENDER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. BENDER. Mr. Speaker, no confirmation of General Eisenhower's reports of German atrocities in Europe was necessary. Nevertheless, the actual eyewitness accounts of hundreds of Americans, including Senators and Representatives, military officials, and newspaper reporters reveal vividly the depths to which Germany has sunk under Nazi leadership. It must be obvious to every American who has a boy in a German prison camp that the provisions of the Geneva Convention have been flagrantly violated. Some of these emaciated, starving prisoners may never recover their full health.

To continue the policy of maintaining German prisoners in American camps here in the United States on a level of American conceptions of decency in the face of the German record is to defeat one of the purposes for which this war is being fought. The thousands of German prisoners who are being well fed, clothed, and housed in our country will go back to Germany with contempt for our American "softness" rather than respect for our American "decency."

Our War Department must be realistic on this subject. There is plenty of work to be done in Europe. Many of the German prisoners in our own country don't like to work. I say that the time

has come when they should be sent back to Europe to rebuild under Polish and Russian and Czech and French and Belgian and Dutch and Yugoslav authority the lands they have devastated. This procedure would not violate the principles of international law and it would remove from idleness a group of dangerous, arrogant men who might otherwise one day form the nucleus of a new menace to the world. Sending these prisoners back to the soil that they have devastated would be an act of justice.

I call upon the War Department with all speed to prepare plans for the removal of all German prisoners in our territories to Europe. The same boats which transport those prisoners to Europe could bring back the American soldiers who are to be released from service as well as American prisoners freed from the hell of German prison camps. The German prisoners in our country have little to do here. There is plenty for them to do in Europe.

The GI Bill of Rights

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Monday, April 30 (legislative day of Monday, April 16), 1945

Mr. WILEY. Mr. President, it was my privilege on April 26 last to introduce Gen. Frank T. Hines to a group of the National Office Management Association, which met in this city. General Hines delivered an address on the GI bill of rights and its effect on office management. I ask that his address be printed in the Appendix of the RECORD, together with a certain paper that goes with it.

There being no objection, the address and the accompanying tabulation were ordered to be printed in the RECORD, as follows:

I am grateful for this invitation to be here and address your meeting on the subject of the GI bill of rights and its effect on office management. This subject embraces our joint responsibility in building a sound structure for the transition from war to peace for returning veterans.

During World War No. 1 plans were devised principally for those persons who suffered a war disability. When the armistice was declared, uncontrollable events took their course. The results of that unpreparedness are too well known to detail here, but they have served as a warning for the erection now of a firm foundation for a stronger democracy when peace is a reality.

The problem of the present is magnified, not only by the greater number of persons serving in the armed forces but also by reason of the fact that there has been extensive mobilization on the home front. The men in service will return from far-flung battle fronts to home communities which may seem strange by reason of the changes which have taken place during their absence. It is, therefore, necessary that a concerted effort be made to meet as many as possible of the problems of this readjustment period.

The terms of the GI bill of rights outline a plan for the readjustment of the returning veteran which has many phases and which contemplates the cooperation of business and Government.

The subject assigned to me by you recognizes your intention to join hands with the Government in assuring the success of this program.

There is no doubt but that one of the most valuable phases of the present plan is that which provides for the education and refresher or retraining courses for all persons now in service, without regard to the age of the men when they entered service, or the permanent disability which may have resulted from such service.

The educational process has been proceeding for the majority of men from the time they entered service. Many were trained in colleges and universities in accelerated courses designed to equip the men as integral parts of the mechanized forces. Others were trained in industry to make them efficient units on jobs requiring particular skills. They have had intensified training in disciplined and dangerous experience. Upon their return they will have this opportunity under the GI bill of rights for further education or training to equip them as useful citizens in the business world.

Each of you recognizes the value of specialized training and of the necessity for proper placement of personnel. The Veterans' Administration has established a vocational guidance program which is required for the program of rehabilitation for the man disabled in service and which is also available for all other veterans who wish to avail themselves of the advantages of further education or training under the GI bill of rights. The guidance process takes into consideration his education; previous vocational training; present skills; aptitudes; and his interests and personal desires, the object being adjustment in an occupation which will be suitable to his needs and interests.

The War Manpower Commission has prepared and made available to the Veterans' Administration a manual which is arranged for ready reference to the type of work assigned in the armed forces with a cross-reference to related civilian occupations calling for similar abilities. The tabulations show the additional training required, the physical activities, and working conditions.

The application of these scientific methods of vocational guidance and training will assure that these men will make profitable units in business, so it is not surprising that they are being welcomed in employment.

The outlook for the disabled veteran is heartening. It is the general opinion of management in 300 surveyed establishments employing 53,000 persons that impaired workers were just as efficient as the unimpaired doing similar work, and the 8 percent reported as more efficient outweighed the 5 percent reported as less efficient. In respect to absenteeism, injury frequency, and labor turnover, the physically impaired were rated as superior to the unimpaired. The vocational training will equip him to make the most efficient use of his capabilities. Management is considering these factors in establishing employment programs having the objective of placing disabled veterans in positions which will assure speedy and satisfactory return to civilian life.

In the armed services high morale has been sustained by the intensive training for a particular job and by having each man feel that he was an essential part of the unit of the armed forces in which he served. In the transition to business life, he will need close association with the training officer or manager so that he will quickly feel at home as part of the agency unit. He will need encouragement and direction in the work sequence of the organization, an opportunity to contribute his particular skill or training to the advancement of the organization and to his promotion in it.

You will find it advantageous to give these men your personal attention and continuing interest when possible, or in the larger organization it may be wise to assign a returned veteran, well trained in your organization, as adviser and contact man to assure their intensive training and adaptation in the organization.

You will come more and more to realize that the employment of these men is not a patriotic duty or a problem, but that the majority of cases will afford you a privilege and opportunity. They definitely have something to contribute. If there should come to your attention any cases in which you feel that the man needs vocational guidance and training, it is suggested that you tell the men of the training program of the Veterans' Administration or refer him for interview by an employee of this department. Even though he may have taken some training after discharge, it may be that he needs and is entitled to further training before satisfactory placement may be accomplished. We must join in a sincere effort to assure that a man who has advanced in the Service gets the job he feels he can best fill, if this can be accomplished.

I recently attended a meeting of the War Advertising Council whose interest is to stimulate the public interest, the interest of the employer and of everyone concerned in the employment and reemployment of the veteran. Some of the advertising that they are going to undertake, paid for by industries in their budget for advertising, will undoubtedly present this matter to the public and our people in a way that we could not present it. In other words, they are pointing out just what I have mentioned to you, the fact that these men have advanced, have been trained, and should be given an opportunity.

I recall one group of pictures and statements they had worked out, stating that this man had developed and he was capable of undertaking the building of roads, railroads, bridges, and all that, that he was a capable engineer. Others had had training in mechanics in the Air Forces. Throughout our whole effort in the field these men have been trained to the point that certainly, if we do our job right, we should capitalize upon that training to their advantage.

It is true that we can become very enthusiastic along that line and probably find some disappointments, but I am one who believes in aiming at least as high as we can. If we fall short, we have at least endeavored to help the man get what he thought he could do best.

Undoubtedly in certain lines we will have more people to be employed than industry in that particular line can absorb, and therein comes the problem of retraining. Vocational rehabilitation for these men disabled, carried on by the Veterans' Administration at this time, has already rehabilitated some men, and others are training on the job and will undoubtedly train into good positions.

Probably the most hazardous part of the GI bill falls in that section of making guaranties on loans to veterans to go into business. When we realize that 50 percent of those who do enter business generally discontinue operations within 2 or 3 years we can well understand what the casualties may be in that particular section, but we believe that we have set up machinery through the Reconstruction Finance Corporation, the Smaller War Plants Corporation, the Counseling Service of the United States Employment Service, the Department of Commerce, and the Veterans' Administration (which carries the responsibility for the result) whereby we can help those men. Undoubtedly there will be many opportunities, and the only hope I have is that the advice given to these men paints both sides of the picture before they undertake to go into business. A few failures will be disappointing. However, if we can keep that number to a minimum, it may do a great deal of good.

Many of these men will wish to purchase a home by the guaranty of a loan under the

GI bill. This will not come under your direct duties as a manager, in most instances, but your interest in the welfare and prompt readjustment of these men will lead you to give them the advantage of your advice and experience in real-estate transactions. Few of them will know how best to budget their incomes or the advantage of establishing and maintaining a healthy credit standing. The law requires that the cost of the home must bear a proper relation to the veteran's present and anticipated income and expenses, and that it does not exceed the reasonable, normal value of the property or construction involved. The Veterans' Administration has endeavored to place proper safeguards, but each of these men will need your counsel in these matters.

The good health of the returning veteran is assured by hospitalization in modern, scientific hospitals where the highest type of medical care is afforded. If a person about to be discharged from the service needs further treatment, he is transformed by the Army or Navy to a veterans' hospital for continuation of treatment. He is also entitled to hospitalization at any time during his life without regard to the service origin of his disability, should hospital care be needed.

Veterans suffering from a service disability may also receive treatment therefor in outpatient clinics. If the veteran was disabled in service by a condition that requires medical care at intervals, you will wish to have a definite leave policy so he will know the effect upon his employment status when such absences from duty are required. A knowledge of this medical program and of the veteran's rights thereto may be of advantage to you in getting prompt attention for veterans whose health may become impaired in the future and who may not have adequate means for proper attention.

There come to me each day in increasing numbers reports showing that business organizations, large and small, have faced the fact that the war will not have been won until readjustment of returning veterans to peaceful pursuits is on the high road. An armistice must not again leave them to shift for themselves. At a similar period in our past history our President, Woodrow Wilson, warned that we have no more solemn obligation than restoring these men to civil life and opportunity. In conclusion, he said: "* * * The cooperation and interest of our citizens is essential to this program of duty, justice, and humanity. It is not a charity. It is merely the payment of a draft of honor which the United States of America accepted when it selected these men, and took them in their health and strength to fight the battles of the Nation. They have fought the good fight; they have kept the faith; and they have won. Now we keep faith with them, and every citizen is endorser on the general obligation * * *." So said our President following World War No. 1. It is equally true today.

The community interest in the veteran and his interest in his home community will go far in the problem of readjustment and future happiness of the veteran and his family.

Tariffs and Prosperity

EXTENSION OF REMARKS

OF

HON. HATTON W. SUMNERS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. SUMNERS of Texas. Mr. Speaker, under leave granted, I tender to be printed in the CONGRESSIONAL RECORD the following editorial from the Dallas Morning News of March 26, 1945, concerning an address made by Mr. Farley before the Foreign Commerce Club at their annual port of New York night banquet on March 20:

TARIFFS AND PROSPERITY

Possibly as head of a big export corporation James A. Farley views tariff problems more clearly than he did when he was a member of President Roosevelt's Cabinet. At any rate, he is on firm ground in emphasizing the importance of foreign trade as a factor in postwar prosperity. Equally valid is his conclusion that if the United States is to increase its exports it must be prepared to take more imports.

The act on reciprocal trade agreements, now up for renewal, has an import bearing on this Nation's prosperity after victory. In spite of the need to satisfy pent-up domestic demands for industrial products, we must have export markets if the wheels of our factories are kept turning over a long period. And there must be foreign sales of our crop surpluses. If we expect other nations to take our exports, we will, in the long run, have to take an equal amount of their products, except for what our tourists spend in foreign travel.

Tariff reductions more drastic than those of the reciprocal trade agreements may be needed, but renewal of this process should be the first step in strengthening our hand in postwar trade. This means of negotiation assures us of getting concessions from other countries in return for those we give. Opponents of tariff reduction claim it would hurt employment here; the truth is that it is necessary, in connection with obtaining similar reductions by other countries, to assure the continuance of full employment here.

The Problem of Relief for Postwar Europe

EXTENSION OF REMARKS

OF

HON. WARREN R. AUSTIN

OF VERMONT

IN THE SENATE OF THE UNITED STATES

Monday, April 30 (legislative day of Monday, April 16), 1945

Mr. AUSTIN. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD two publications relating to postwar conditions. Both are aimed at the theory that a new world cannot be built on cold and hunger. The first one is an editorial from the New York Times of Saturday, April 28, and the second one a news item from the New York Post of April 26, 1945. The news item from the Post should be considered as based on figures up to March 31, 1945.

There being no objection, the editorial and news item were ordered to be printed in the RECORD, as follows:

[From the New York Times of April 28, 1945]

THE HARD DAYS OF PEACE

If anyone has the idea that a short time after the war is won the world will be as it was before, he should read, or read again, the joint statement issued in Washington by the three principal members of the Combined Production and Resources Board of the United States, the United Kingdom and Canada, on the staggering problems involved in restoring even a semblance of normal life to devastated Europe and Asia. And restore it we must, they point out, if we are to have any hopes at all for a secure peace. We cannot build a new world on cold and hunger.

Leaving out entirely the question of food, which is not within the province of the Board, the members point out that there are three other great shortages—clothing and heat and transportation—which must get worse before they can get better, and which can be cured only by increased production. In cloth, J. A. Krug, the United States member, says there will be a foreseeable shortage of 1,250,000,000 yards, or 4 percent of yearly prewar consumption. This shortage comes at a time when much of the world is trying to cover its nakedness with wardrobes that are at the lowest point in modern history. In coal and transportation the situation is even worse. Liberation of some of the coal-bearing regions of Europe, such as those in the Ruhr and the Saar and around Aachen, give some hope of relief, but that is months in the future. All of their initial output, unless the war in Europe is ended quickly, must go for military needs. The crisis in transportation is even worse. In the liberated areas of Europe there is left only one-third of prewar truck capacity.

The main source of the world's basic needs must for sometime be the Western Hemisphere, the only major area of the world untouched by the war, and that means largely from the United States. No one in or out of authority in this country wants to make almoners of the other peoples of the world. That would be as unpalatable to them as it would be to us. But before they can help themselves they need help. Not help in money, but food to keep them from starving, clothes to cover their backs, fuel to warm their homes in winter, and the means to take all three from where they are or where they can be landed to where they are needed.

As Mr. Krug points out, there is no quick and easy solution to these problems. They

are hard problems that will require hard work and thought and patience to solve. But if they are properly understood and wholeheartedly accepted, they can be solved. It is just as important that they be solved as it is to win the war.

[From the New York Post of April 26, 1945]

U. N. R. R. A. GOT 1 PERCENT OF FOOD UNITED STATES PLEDGED

WASHINGTON, April 26.—The United States has contributed only a third of the money it has pledged to U. N. R. R. A., and only 1½ percent of its quota of food and other relief supplies, officials of Food for Freedom, Inc., revealed today.

These figures from official sources, revealed for the first time how little the United States has gone toward meeting the burden of relief in war-ravaged countries, spokesmen for the organization said.

FORTY-FOUR NATIONS PLEDGED

When U. N. R. R. A. was organized, 44 nations pledged 1 percent of their 1943 national income to it. Great Britain and Canada have appropriated their full quotas. The United States quota was $1,350,000,000 and Congress approved this figure.

Actually, however, only a third of this amount, $450,000,000, has been appropriated. Congress authorized the transfer of $350,000,000 worth of lend-lease supplies to U. N. R. R. A. in an emergency, but this transfer has not been made.

SUPPLIES UNAVAILABLE

U. N. R. R. A. has been able to buy only $20,000,000 worth of supplies available for immediate shipment in this country, Food for Freedom said, whereas Canada with a much lower quota has provided more than $12,000,000 worth.

"Canada has given 16 percent of its quota, but we have given only 1½ percent of ours," the organization said.

While an improvement is expected because of the release of ships after VE-day, the organization said, the immediate question before Americans is whether we will eat up most of our food or share it with the starving in Europe.

Roosevelt Tribute From Birmingham

EXTENSION OF REMARKS

OF

HON. LUTHER PATRICK

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. PATRICK. Mr. Speaker, we have in Birmingham, Ala., a very capable speaker and editor, who is beloved by all who know him and admired by all who read or hear him. He is McClellan Van der Veer, of the Birmingham News, popularly known as the South's greatest newspaper.

Under leave to extend my remarks in the Appendix of the RECORD, there follows an address delivered by Mr. Van der Veer on the Blue Network April 14, 1945. It is a tribute to our late departed President:

Not many months ago a visitor from Birmingham spoke a few words of greeting to the President following a Washington press conference. The visitor, knowing well the great urgencies upon Mr. Roosevelt, would have hurried on. But the President would not have it so. He wanted to know all about Birmingham. He spoke with amazing knowledge of wartime conditions in this city. He had a genuine interest in, and feeling for Birmingham.

This city in turn has realized as much through the years, having a deep responsive feeling for the President, the great friend.

Today, in this large industrial district, the essential work goes on, but all else pauses. In everything, work or meditation, thoughts are of the departed leader who, in such a vivid sense, is still with us. Many places of business are closed. Special church services are being held. The quiet of Sunday is all about us—even in the noise of necessary work. The mood of prayer is upon all.

These lines from a Birmingham Age-Herald editorial strive to convey the feeling among our people:

"Something, at least, of the stupendous measure and meaning of Franklin D. Roosevelt is to be found in the profound sense of void.

"Something incalculably great has gone out of the life of the Nation, out of the life of all the world * * *.

"The challenge from Franklin Roosevelt never came more clearly than now.

"It is the challenge that we rise to all the great tasks that remain to the victorious and full performance of those enterprises for which he gave his life.

"All our sacrifices—crowned now by the President's giving of his own life pledge us, forever, without limit, to the fulfillment of the high destiny that summons us."

Adjournment Order in Respect for the Memory of President Roosevelt

EXTENSION OF REMARKS

OF

HON. JOE HENDRICKS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. HENDRICKS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following adjournment order of the Supreme Court of Florida:

IN THP SUPREME COURT OF FLORIDA, JANUARY TERM, A. D. 1945, FRIDAY, APRIL 13, 1945—ADJOURNMENT ORDER, IN RESPECT FOR THE MEMORY OF PRESIDENT ROOSEVELT

Late yesterday afternoon, April 12, 1945, shortly after the court had recessed for the day, the news by radio of the death, at 4:35 p. m., of President Roosevelt, at Warm Springs, Ga., shocked and saddened the people of Florida and of every other State in the Union, and, indeed, all the freedom-loving peoples of the world as well. For the name of Franklin D. Roosevelt had long since become the symbol of liberty and hope to the cruelly oppressed and suffering peoples of all the many countries that, without provocation, had been assaulted, conquered, looted, and devastated by Germany and Japan. Even before our country had entered this most momentous of all wars, Franklin Delano Roosevelt had become a great world figure, hated above all others by the diabolical leaders of the Axis Nations, and loved and respected above all others by the decent and liberty-loving peoples of the earth.

But to us here in America President Roosevelt was more than a great world leader. He was our President. He was close to us. We knew him well. He had talked to us frequently in his "fire-side chats." We had heard or read his able, eloquent, and inspiring addresses on domestic and world problems. We recognized the greatness and magnetism of his personality. Even those of us who sharply differed with him at times on domestic problems admired his ability and courage and conceded that he was doing what he considered best for the people of our country. A fine gentleman and a great and beloved President has passed from among us, but his influence and example live on. The victory which he did so much to assure and the organization of the nations to preserve the peace of the world, which he so earnestly championed, are near at hand.

Out of our deep respect for the memory of our late President, and in sympathy for the members of his bereaved family, the court will now adjourn until Monday, April 16, 1945, and that the flag on the Supreme Court Building be displayed at half-mast for a period of 30 days, and that copies hereof be forwarded to the bereaved family and to Florida's Representatives in Congress.

ROY H. CHAPMAN,
Chief Justice.
GLENN TERRELL,
ARMSTEAD BROWN,
RIVERS BUFORD,
EDWIN THOMAS,
A. H. ADAMS,
H. L. SEBRING,
Justices.

A true copy.

GUY C. MCCORD,
Clerk, Supreme Court.

Jewish Commonwealth of Palestine

EXTENSION OF REMARKS

OF

HON. SHERMAN ADAMS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. ADAMS. Mr. Speaker, I submit this morning a concurrent resolution adopted by the general court in New Hampshire, urging that appropriate action be taken to open Palestine to free immigration as intended in the Balfour Declaration. The people of New Hampshire through their representatives have by this resolution indicated their sympathy for the Jewish people, and express the hope that their ancestral homeland may again be made available for their free and peaceful occupation:

Concurrent resolution relative to a Jewish commonwealth of Palestine

Whereas the Nazi persecution and wholesale slaughter of Jews in Europe have outraged the conscience of the civilized world and have vastly aggravated the tragedy of the Jewish problem there; and

Whereas at the end of the present war large numbers of European Jews will find themselves in desperate need for a new home where they can rebuild their lives in dignity and security; and

Whereas after World War No. 1, Great Britain had accepted at the instance of the Allied and Associated Powers the Mandate for Palestine and had undertaken "to facilitate the establishment of a Jewish national home in Palestine," an undertaking subsequently approved by 52 nations including the United States; and

Whereas this policy was concurred in by a joint resolution unanimously adopted by both Houses of the Congress of the United States on June 30, 1922; and

Whereas the Democratic and the Republican Parties in their national conventions of 1944, adopted platforms in favor of the re-

establishment of Palestine as a free and democratic Jewish commonwealth; and

Whereas the President of the United States on October 15, 1944, expressed his approval of this aim which he stated to be "in accord with the traditional American policy and in keeping with the spirit of the "four freedoms": Now, therefore, be it

Resolved, That we of the State of New Hampshire express our profound sympathy with the millions of innocent victims of the enemy's ruthless extermination policy, and that we demand just punishment of all those who perpetrated these horrible crimes against humanity; and be it further

Resolved, That the United States should take appropriate measures to the end that Palestine should be opened for free immigration and unrestricted colonization as intended in the Balfour Declaration so that the Jewish people may rebuild their ancestral homeland as a free and democratic Jewish commonwealth; and be it further

Resolved, That copies of these resolutions be sent by the Secretary of State to the President of the United States, to the presiding officers of each branch of Congress and to the Members thereof from this State.

Justice to Post Office Employees Demands Increase in Pay

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. DOYLE. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to have set forth in the CONGRESSIONAL RECORD an editorial from the Press-Telegram and Long Beach Sun, dated April 10, 1945, entitled "Justice for Postal Employees."

I believe this editorial is not only significant, it is representative of the expression, hope, and expectation of the taxpayers of our Nation. I am sure on the basis of the Post Office Department being one of public service that the people of this Nation do not expect it to operate at a net profit of $47,000,000—the reported profit for last year. Certainly, it is not fundamentally sound, economically or socially, to build up operating profits of a Federal department, such as the Post Office Department, when most, if not all, of its employees have not had a respectable increase in salary since 1925.

As bill H. R. 2071 comes to the floor of this great legislative body, I emphatically bespeak unanimously favorable approval to the desirable and necessary end that the postal employees and families of our Nation shall also have just treatment at the hands of this Congress. Such just treatment merely consists in us making certain that these hundreds of thousands of post office employees shall also be enabled to live at a level and standard of life which contributes to our national income, pride and security, instead of the reverse.

This powerfully and sincerely written editorial by one of my own home-town neighbors is as follows:

JUSTICE FOR POSTAL EMPLOYEES

This Congress has a chance to rectify an unfortunate error made by the preceding Congress.

Members of the Seventy-ninth Congress, now in session, can and should act without delay on the bill granting postal employees the very modest pay increase of $1.30 a week over what they now are receiving, and they now are poorly paid by any normal standard of compensation.

But that is not the whole story: Unless this Congress acts, the men who carry the mail will actually have to take a pay cut of $6 a week—$6 subtracted from their already meager salaries. Six dollars taken from their pay are $6 taken from the postman's family budgets for necessities of decent living.

The $6 is a war bonus granted by Congress nearly 2 years ago, the first increase for postal employees since 1925, but this temporary, emergency allowance will expire next June, so that mail carriers and other post-office employees will drop back to the 1925 pay scale, with wartime prices to pay for all they buy, unless the bill for a permanent increase is passed by Congress.

Last year the House of Representatives passed the permanent pay increase for postal employees with only one dissenting vote. Near the close of the session the bill was beaten on a technicality in the Senate, and the hopes of the postmen and their families for some relief from their financial difficulties were dashed.

The mails are delivered in all seasons, in good weather and bad. The mails always go through. The American public is sure of service by the Post Office Department—a service more than ever important to the public in wartime. And last year the Post Office Department made a profit of $47,000,000. It is a good job the postmen are doing, and they are entitled to decent pay.

The postmen are looking to Congress for justice, and the public is watching Congress to make certain that this time there is no slip in this matter.

Raising of Fur-Bearing Animals

EXTENSION OF REMARKS

OF

HON. WALTER H. JUDD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. JUDD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following concurrent resolution of the Legislature of the State of Minnesota:

Concurrent resolution memorializing Congress to enact into law H. R. 5295, relating to the domestic raising of certain fur-bearing animals.

Whereas fur farming is an important and valuable industry within Minnesota; and

Whereas the raising of pen-bred fox, mink, persian lamb, karakul, and chincilla is, in reality, an agricultural pursuit and the products of such fur farms are livestock, notwithstanding the fact that the Minnesota Legislature, for purposes of expedient administration and regulation, defines such animals as wild animals and polices the industry through the personnel of the division of game and fish; and

Whereas it is the belief of this legislature that great benefits can accrue to this valuable pursuit if the Federal agency concerned with the promotion of fur farming be designated as the Department of Agriculture: Now, therefore, be it

Resolved by the Legislature of the State of Minnesota, That Congress be urged to take such steps as are necessary to enact into law H. R. 2115, which provides that the breeding, raising, producing, or marketing of the animals herein referred to shall be deemed an agricultural pursuit under the jurisdiction of the Federal Department of Agriculture; be it further

Resolved, That copies of this resolution be sent to each member of Congress from the State of Minnesota.

C. ELMER JOHNSON,
President of the Senate.
LAWRENCE W. HALL,
Speaker of the House of Representatives.

Passed the senate the 9th day of April in the year of our Lord 1945.

H. Y. TORREY,
Secretary of the Senate.

Passed the house of representatives the 13th day of April in the year of our Lord 1945.

G. H. LEAHY,
Chief Clerk, House of Representatives.

Approved April 17, 1945.

EDWARD J. THYE,
Governor of the State of Minnesota.

Hero of Nazi Prison Camp Proves War Department Test of Loyalty

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. DE LACY. Mr. Speaker, under the privilege granted me, I include in the RECORD a news story from Federated Press correspondent Herbert A. Klein who is with the Seventh Army in Germany. This story is only one among hundreds which tells of the brutal and inhuman treatment of American prisoners of war by the most brutal of all systems, National Socialism in Germany.

Yet this story tells something more. It relates how an American private who has devoted most of his adult life to fighting tyranny and preserving democracy, became a hero among all this Nazi brutality. This soldier of democracy, Pvt. (1st cl.) John H. Dunn, Jr., is credited with keeping the morale of his fellow prisoners from crumbling. Armed by the power of his own enlightened belief in democracy, he held off the full terror of the Nazi brutality.

I call attention to this story because John Dunn was the chief editor of Federated Press, the only daily labor press service in this country, and as such was one of the leaders in labor journalism in the United States before he entered the Army. Before that he was a labor organizer.

Because of his devotion to labor and his positions of leadership in the labor movement, Private Dunn fell within that great body of patriotic and intelligent Americans termed "subversive" by the former Dies committee and others of small minds who are quick to place that brand upon those who advocate progress for the American working man and woman.

Had his opinions been used as the guide rather than his loyalty; had the War Department adopted the "tests" of the Dies committee instead of its own common-sense standards, John Dunn might never have had the opportunity of doing the tremendous service he did his fellow prisoners of war.

For those reasons, Mr. Speaker, and because of the great service Private Dunn has rendered his fellow American prisoners, I include the following Federated Press news story in the RECORD:

FEDERATED PRESS NEWS EDITOR HERO AMONG YANKS LIBERATED FROM NAZI PRISON CAMP

(By Herbert A. Klein)

WITH THE SEVENTH ARMY AT BAD ORB, GERMANY.—The story of how thousands of American prisoners of war, living amid indescribable conditions of filth and starvation, were saved from plunging into complete mental apathy by the efforts of one of the prisoners—Pvt. (1st cl.) John H. Dunn, Jr., news editor of Federated Press on leave—was revealed with the liberation of Stalag 9–B, Nazi prison camp near here.

War correspondents who arrived at the camp the day of its liberation by onrushing American forces were told by his fellow prisoners that Dunn, older than most of them, was chiefly responsible for keeping up their morale and helping them through the horrible 4 months of their imprisonment.

Dunn, who has been in the Infantry for 2 years, was one of several thousand American soldiers captured by the Nazis in the Ardennes offensive in December on the Belgian and Luxemburg fronts.

GIVEN STARVATION DIET

The Bad Orb prison camp, a 400-foot-square barbed-wire enclosure, housed 6,500 Allied soldiers, including 3,200 Americans. They were billeted in 18 flimsy, rotting wooden buildings, one of which was occupied by 160 men The daily diet was less than 260 calories—below the starvation level. It consisted of watery soup, ersatz bread, indigestible cheese, and a vile coffee substitute all served in microscopic portions.

Brought to the camp after a gruelling 2-week journey in a boxcar jammed with Yank prisoners, Dunn looked over his surroundings and announced: "I'm not going to just rot here." A former American Newspaper Guild organizer, Dunn set about organizing recreational and educational activities for his colleagues.

TELLS HISTORY FROM MEMORY

First he started a weekly forum in which he delivered from memory 31 lectures on American history, attended by 50 to 100 P. O. W.'s in an ice-cold hall. In order to heat the place endurably, P. O. W.'s from each barrack contributed 2 sticks of firewood from their scanty stores.

Dunn then branched out and established a forum program attended by as many as a thousands of the prisoners. Deep in Naziland the half-starved men discussed such issues as the postwar world and the GI bill of rights. A quiz program was arranged with the winner getting two cigarets, worth 200 francs or $4 each at Bad Orb rates. The winner was Pvt. Kachedar Aredizian, of Pawtucket, R. I., who exchanged both cigarets for one slice of sawdusty black bread.

Dunn also set up an English reading corner in which the only 13 English books in the entire camp were carefully guarded and rationed out so that all the Yanks could get a chance at them.

ISSUES OWN NEWSPAPER

Together with two others newspapermen, Ed Uzmak of the Chicago Times and Dennis Murray of the Chicago Tribune, Dunn got out a wall newspaper written in pencil with hand-drawn maps. They got their news from a radio smuggled into the camp by British prisoners piece by piece and successfully concealed from the Nazi guards.

Howard Byrne, Stars and Stripes reporter and a member of the Newspaper Guild of New York, devoted a big part of his report on the Bad Orb camp to praising Dunn, who he said had lost a good deal of weight and looked like Lincoln. Other correspondents who inspected the camp agreed that it was one of the worst hell holes the Nazis devised for Allied prisoners.

FOUR HUNDRED DIE

Four hundred of the Bad Orb inmates died before the camp was liberated. Among them were 36 Americans. Those who survived were virtually skin and bones, clad in rags, many of them too weak to walk. There were only 2 American doctors to care for them with hopelessly inadequate medical facilities. Sanitation facilities in the building which housed 160 prisoners consisted of 1 rusty water tap. The toilet was a hole in the floor. There were no soap and towels.

Dunn, a charter member of the Guild, worked on every important daily paper in northern Ohio and was responsible for organizing many of the papers there. He became an international representative of the A. N. G. in 1938 and in the early part of 1939 became assistant editor of the Guild Reporter. He joined the Federated Press staff in April 1942.

Father Pleads for Lasting Peace To Justify Soldier Son's Death

EXTENSION OF REMARKS

OF

HON. JOHN M. COFFEE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 18, 1945

Mr. COFFEE. Mr. Speaker, I have received a copy of a message written by Mr. and Mrs. H. McKenna, of Kirkland, Wash., following the recent death of their son, Jack, in Germany. It is a thought-provoking message, and I request that it be inserted in the CONGRESSIONAL RECORD as a part of my remarks.

The article is as follows:

We sincerely thank the many friends whose thoughtful kindness has been of so much help since the telegram came telling of Jack's death in action.

We have been comforted by many letters of sympathy and almost everyone expressed the wish that the writer could do something tangible to help us.

We are taking this means of thanking you and of telling you that you can help us.

You can help not only us, but also the families of the five other boys from Kirkland who gave up their precious lives in action the same week.

Not only those, but also the families of the 100,000 American men struck down by the hand of war in the same month and the thousands who died or were mutilated before that month and those who will be in the months ahead.

We want more than anything else to feel that their young lives were expended not only in defense of our great land but that they were part of the necessary price for a better world, a world in which the sons of other parents can live out their normal lives constructively, free from the toll of war.

Jack believed with firm conviction in the possibility of such a world, a world under universal law.

Millions of the men of our generation died to win such a world, but we who lived on, by our apathy failed to secure it.

So we watch our sons go out to die.

Once again the ransom has been paid, in blood.

Once again history, with more tolerance than we deserve, holds out to us the opportunity to so organize universal cooperation that men everywhere may live in peace and friendship.

Let us not again by indifference and complacency, let the opportunity pass by.

We common people must insist, in season and out, that our leaders truly lead.

We must insist that the first priority on their gifts and talents shall be the abolition of war as a means of settling issues between nations.

The living men of Lincoln's day did indeed proceed, though with many a faltering step, with the task which "those who died so nobly advanced" and they gave us national unity under law:.

We must do no less, else once again we be traitors to our loved ones who die, and to the little children, the men and women of tomorrow.

Let us start by writing the members of the American delegation to San Francisco, strengthening them with our support and insisting that they give their all to the solemn task before them. They are: Dean Virginia Crocheron Gildersleeve, Barnard College, New York City; Senator Vandenberg, Washington, D. C.; Secretary of State Stettinius, Washington, D. C.; Senator Tom Connally, Washington, D. C.; Congressman Sol Bloom, Washington, D. C.; Congressman Charles Eaton, Washington, D. C.; and Mr. Cordell Hull, Washington, D. C.

A Soldier's View

EXTENSION OF REMARKS

OF

HON. J. PERCY PRIEST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. PRIEST. Mr. Speaker, under leave granted to extend my remarks, I desire to include here the text of an essay written by Pvt. Martin A. Watkins, of Nashville, Tenn. This essay on the subject, What to Do With Japan, recently was awarded first place in a theater-wide contest, and Private Watkins was awarded a $500 War bond.

The essay follows:

Our actions toward Japan must be founded upon a determination to insure to the peoples of the Pacific, and consequently to the peoples of the world, freedom from war. To that end, a three-point program shall be instituted as our forces occupy Japan.

First, in order to destroy the roots of the Japanese disease of conquest, the war guilty shall be quickly tried and punished. The Japanese Fleet, Air Force, and Army shall be denuded of all power. Militaristic, nationalistic, and Fascist organizations shall be suppressed and their assets turned over to democratic forces within Japan. By granting as rapidly as possible full freedom to the Filipinos, the Koreans, and to the other subjected peoples of the Pacific, and by dealing with them on a plane of equality, we shall give the lie to the Japanese pan-Asiatic propaganda that this is a war between the yellow race and the white race.

Second, to prevent the development of her war power, Japan shall be deprived of her colonies, from which she obtains the raw

materials necessary to wage war. In addition, a system of control shall be established over strategic industries within Japan. Adequate measures of force to remedy violations will be made available.

Third, we will institute a system of education designed to teach the Japanese to think and act independently, unemotionally, and judiciously. They shall be taught to live and let live; to settle differences democratically, around a conference table, or in courts of justice, and not in the field of battle. By intercourse with the peace-loving nations which surround her—China, Korea, the Philippines, Russia, Canada, the United States, and Latin America—the education of the Japanese people will be continuous.

When they have realized that the treachery of Pearl Harbor, the attack upon China, the enslavement of the peoples of the Pacific, and the alliance with the Nazi-Fascist Axis were acts of national disgrace, then—and not until then—will the Japanese people be considered eligible for self-government and for membership in the world council of peace-loving nations.

American Legion Resolutions

EXTENSION OF REMARKS

OF

HON. ERRETT P. SCRIVNER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. SCRIVNER. Mr. Speaker, on the 8th day of April 1945, at Iola, Kans., the Second Kansas District, American Legion assembled in convention.

One of the resolutions adopted at that convention was in protest against the War Department's policy of commissioning Communists in the United States Army. That resolution is as follows:

Whereas it is the firm belief and conviction of the Second District American Legion, Department of Kansas, that the Communist Party and similar groups believe in and teach principles contrary to the Constitution of the United States and in the preamble to the constitution of the American Legion; and

Whereas the Second District American Legion, Department of Kansas, is further convinced that only those who can without reservation take an oath of allegiance to the Constitution of the United States should be commissioned officers in the armed forces of the United States; and

Whereas the Second District American Legion, Department of Kansas, is further convinced that those who believe in the principles of the Communist Party and similar groups cannot without reservation take an oath of allegiance to the Constitution of the United States: Now, therefore, be it

Resolved by the Second District American Legions, Department of Kansas, That it is contrary to our form of government that those who are known to belong to the Communist Party or similar groups be commissioned as officers in the armed forces of the United States of America; be it further

Resolved, That the American Legion, Department of Kansas, be earnestly urged to adopt a similar resolution to be sent to the national convention at its 1945 convention, containing a request to the proper authorities prohibiting the commissioning of those known to be members of the Communist Party or similar groups as commissioned officers in the armed forces of the United States of America; be it further

Resolved, That a copy of this resolution be sent to Senator ARTHUR CAPPER, Senator CLYDE M. REED, and Representative ERRETT P. SCRIVNER.

Among other resolutions which so well express the thoughts of these Kansas Legionnaires are the following:

Defeat of Germany and Japan will no more secure the peace than did defeat of the Kaiser 25 years ago, unless we are willing to pay the price of a sound and continuing peace set in a framework of world order in which other races, other systems of government, and other philosophies of life must have their part. In order to attain this purpose, we believe our interests can be best served by the establishment and maintenance of an association of free and sovereign nations, implemented by whatever force may be necessary to preserve world peace.

We believe that the security and peace of this Nation, after victory, depends upon the maintenance of a strong Army, Navy, and Air Force, with an adequate Reserve force.

We again endorse the principle of universal military training and urge the Congress to enact suitable legislation in furtherance of same.

We again demand that the Nazi, Fascist, and Japanese leaders responsible for this terrible war be brought to justice and punished for their terrible deeds, just as would be any other criminal.

We well realize that this country has become and remained great due to our system of free enterprise and the rights of the individual under law. We must remain a government of laws and not of men. We, therefore, reaffirm our faith in the American system of government and the American way of life.

We again urge upon the people of the United States that strikes be reduced to a minimum in order that our war efforts be not impeded in any way whatsoever.

That all aliens now residing in or hereinafter entering the United States be required to take out citizenship papers in a period of years subsequently to be determined by the Congress and on failure so to do to be deported.

Mr. Speaker, these resolutions for the most part are not new or strange, but embody the thoughts of the American Legion for a quarter of a century, and are parts of a program that, had the American Legion suggestion been followed, might have avoided our entrance into this war and eliminated many of the un-American conditions which have sprung up in our midst.

At Last—For Billy Mitchell

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial which appeared in the Milwaukee Journal on April 27, 1945, entitled "At Last—For Billy Mitchell":

AT LAST—FOR BILLY MITCHELL

Twenty years too late, Billy Mitchell, who lies buried in Milwaukee's Forest Home Cemetery, is apparently going to get the honor and promotion he deserved in 1925.

It is plain enough to everyone now, including those high officers of the Army who fought Billy Mitchell at every turn—that air power is an absolute essential of any adequate national defense. So it is well enough to do the only thing that can be done at this late date—try to erase the injustice that was done to a most courageous and patriotic American.

Congress ought to admit publicly by bestowing on Mitchell the Congressional Medal of Honor and the rank of major general, that a costly mistake was made in turning a deaf ear to this air leader's warnings. The honors are due, even though Mitchell did, in his frustration and deep conviction, overstep the bounds of military propriety.

There is more here than simply vindicating General Mitchell. At the end of the last war, most Americans, including military men who had helped to win it, went to sleep on questions of defense development. Mitchell, awake and alert, irritated them no end. We paid an awful price, barely escaping defeat this time, and in the end we had to do what Billy Mitchell said must be done.

As we correct our error and right a wrong, let's not forget the lesson.

Springfield, Mass., Republican Discusses Criticisms of Bretton Woods Agreements by Bankers

EXTENSION OF REMARKS

OF

HON. WILLIAM R. THOM

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. THOM. Mr. Speaker, editorially the Springfield (Mass.) Republican has discussed some of the criticisms of the Bretton Woods agreement, and with unanimous consent, I am reproducing herewith two of these very informative editorials:

ONLY A START

The St. Louis banker who attacked the Bretton Woods proposals for an international stabilization fund, at a congressional committee hearing * * * saw a managed currency and, therefore, totalitarianism in it. Britain, the United States, and France maintained a currency stabilization fund for some years before the war began, in a period when the British were off the gold standard and operating on a managed currency basis. If the British do not desire to return to a rigid gold standard, they are acting at least on the basis of an experience which does not suggest to them anything resembling totalitarianism.

But at Bretton Woods the British delegation did yield much ground to the United States on the issue of the gold standard, while insisting successfully on retaining for themselves a degree of flexibility in currency valuation. Even so, what is there so terrible about that? The British can be depended upon, if any people can be, to be dead against international currency warfare and chaos.

Moreover, control of the value of a currency has been regarded in the past as an attribute of sovereignty. The American dollar was devalued in terms of gold, some 10 years ago, in accordance with the constitutional provision empowering Congress "to coin money, regulate the value thereof." It would have been hopeless at Bretton Woods to try to induce the 44 sovereign governments represented there to surrender wholly the control and regulation of the value of their own currencies.

The Bretton Woods program "only partially attacks the job of ending economic warfare," as was charged in his testimony at Washington by the critical W. Randolph Burgess, the New York banker. But the Bretton Woods proposals cannot be expected reasonably to do more than make a start. That is about all anyone expects the coming San Francisco Conference to accomplish toward the establishment of a world security organization in the political field.

Banker Burgess assumes the role of a perfectionist, therefore, in the following criticism:

"The Bretton Woods program only partially attacks the job of ending economic warfare between nations. It deals with currency depreciation and exchange controls, but no other powerful weapons of economic warfare are forbidden. Tariffs can be raised or lowered, quotas, embargoes, subsidies on production, export bounties, preferences, and bilateral agreements (outside the fund) can all be used. The fund provides only a start in dealing with economic warfare which could be made more effectively through the bank."

This criticism might be perfectly valid if the 44 sovereign nations would agree to let the proposed central international bank dictate to them, as borrowers, what their domestic economic policies and legislation should be.

It is impractical, however, to attempt any such dictation. There are numerous powerful countries like the United States and Britain that would not surrender control of their tariff legislation to an international credit institution, or the making of their own budgets of expenditures, or the payment of subsidies, or the imposition of embargoes.

The bankers whom Mr. Burgess represents would like to be able to tell a government asking for credit for any purpose to go balance its budget and cut its expenditures, first of all. But the times are not ripe, evidently, for such banker control of the domestic policies of the greater powers even if it were feasible—as it has been sometimes in the past—to force small impoverished and improvident governments to accept it for the sake of a loan.

The design lurking in the background of the banker criticism of Bretton Woods reveals, it appears, the extravagance of their real demands. These sovereign nations cannot be treated like hard-up individuals asking for a loan at the bank. That is a reason for the virtual compromise in the Bretton Woods proposals on the old gold standard and the freedom allowed within a certain range, for managed currencies such as the British demand. It is also a reason for not attempting to establish a system ranging far beyond currency depreciation and exchange controls and invading sovereign jurisdiction in domestic economies.

The best point yet suggested in favor of the Bretton Woods proposals may well be that they are "only a start in dealing with economic warfare."

BRETTON WOODS AND CONGRESS

The Bretton Woods financial agreements have withstood criticism better than might have been expected. * * *

The preparations for the Bretton Woods Conference last summer were most carefully made. For several months previously British monetary experts led by Lord Keynes had conferred at Washington with United States Treasury experts in order to find common ground for an agreement. At Bretton Woods delegates from over 40 nations assembled and threshed out the international currency problem from every point of view. Our own delegation included both Republicans and Democrats representing the Senate and House. After weeks of discussion and adjustment of contrary views, the nations at Bretton Woods compromised their differences and signed up. To reject or much modify the Bretton Woods agreement by structural amendments might imperil the whole undertaking, inasmuch as the changes would now have to be submitted to the other nations, 40 or more, for their acquiescence.

It is a structural amendment which a committee of the American Bankers Association has pressed with much insistence; and this, it may be added, embodies the most serious criticism of the Bretton Woods plan for financial reconstruction. While the bankers' committee has approved the proposed international bank with a capital of $9,100,000,000 to make loans for economic reconstruction, it has condemned as unnecessary the proposed international monetary fund of $8,800,000,000, designed especially to stabilize national currencies in relation to each other in world commerce. The bankers' committee would have the proposed bank take over the currency stabilization functions of the proposed fund.

On the merits of this highly technical issue we may observe that an impressive body of opinion among professional economists and qualified financiers is at variance with the opinion of the bankers' committee. Sixteeen out of eighteen former presidents of the American Economic Association have endorsed the Bretton Woods agreements unchanged. Of 250 American economists of recognized standing, who answered a questionnaire, 224 have taken the same position in a statement climaxed by the assertion: "It is very doubtful whether another agreement could be reached."

The highly reputable Committee on Economic Development, including both bankers and businessmen, has taken middle ground in its recent proposal to Congress. It would not abolish the international fund, preserving it for ordinary operations in currency stabilization. But it would permit the international bank also to make long-term currency stabilization loans, leaving the fund for strictly currency transactions to cover temporary shortages and tide over temporary emegencies. This proposal of the Committee on Economic Development accepts the currency stabilization fund in principle, certainly, while allowing the bank greater scope in its credit transactions.

The weight of expert American opinion obviously favors the Bretton Woods agreements unchanged, now that the bankers' committee has failed to command the unqualified support of the Committee on Economic Development. On this basis alone Congress may well approve the Bretton Woods bills as now drafted. In view of the opposition expressed in certain circles in Britain, which dislike the concession to the gold standard embodied in the agreements, Congress can hardly afford not to.

The disfavor for flexible managed currencies felt by monetary conservatives in this country explains much of the American criticism of the Bretton Woods proposals. Yet at Bretton Woods the British and other foreign delegations, which now favor managed currencies, agreed to recognize gold as a standard and to define their currencies in terms of it. That was important to the United States, which has a stock of gold valued at $22,000,000,000. The Bretton Woods plan, consequently, has a gold basis, even if it does not revive the old automatic gold standard with its rigid currency valuations in terms of gold.

What Is a Liberal?

EXTENSION OF REMARKS

OF

HON. WALTER H. JUDD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. JUDD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Minneapolis Star-Journal of April 25, 1945:

SOCIALIST ASKS: WHAT IS A LIBERAL ANYHOW?

(By Charles Yale Harrison)

All jokes aside, what is a liberal?

You come away from Beard and Parrington with a pretty clear idea of liberalism and the kind of people who used to call themselves liberals. But maybe that was before your time. Well, William Lloyd Garrison was a liberal; the lynching mob that ran him through the streets of Boston with a rope around his neck were ignorant reactionaries. Lincoln was a liberal; Daniel Webster and John C. Calhoun weren't. Clarence Darrow was a liberal, one of the best, and so was his friend, Governor Altgeld, of Illinois. You get the idea.

But when you case the current liberal lineup, things aren't so clear. You ask yourself, after putting down PM with a feeling of disgust, how liberals in the Government can bring themselves to ballyhoo for the May-Bailey labor-conscription bill. Or how a liberal like Archibald MacLeish can take to the air to justify the partition of Poland. Or how liberal editors can find it in their hearts to play footy with east-of-the-Vistula totalitarianism.

So back you go to the source books for a refresher course. And you come up with something simple like this: A liberal is one who stands for human freedom as opposed to tyranny. (Whenever you go back to first principles you always run into simple things like that.) A liberal is not bound by stuffed-shirt political, economic, or social tenets.

He is for greater, not less, personal and political freedom. He's agin' all forms of authoritarian government, no matter how adroitly its burgeoning power is masked with "progressive" smokescreens.

He is opposed to the concentration of power. He favors—and fights for—social and industrial democracy for Negroes; he is opposed to racial segregation, especially in the armed services of his country.

He is for labor, and together with Lincoln he believes that "the strongest bond of human sympathy, outside of the family relation, should be one uniting all working people, of all nations and tongues and kindreds."

By this definition, in this year of grace, you will agree that there are few liberals in America. Traditional American liberalism is a sad, emasculated thing these days, done in by totalitarian hatchmen during the past 15 years.

American Legion Protests War Department Directive

EXTENSION OF REMARKS

OF

HON. CLIFFORD R. HOPE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. HOPE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include herewith a resolution recently adopted by a unanimous vote by Tom Schwinn Post, No. 90, the American Legion, Wellington, Kans.:

Whereas there has been issued a certain directive, identified as being verbal orders transmitted over the telephone from some spot in Government higher than the Secretary of War, creating a new policy in our armed forces, which permits a person who is loyal 49 percent to an alien power and 51 percent loyal to the United States, to become a commissioned officer; and

Whereas these so-called 51-percent loyal American officers would be entrusted with the lives of our American boys while in battle on the land, on the sea, and in the air; and

Whereas the American Legion is diligently endeavoring to foster and perpetuate a 100-percent Americanism in the United States of America: Be it

Resolved, That Tom Schwinn Post, No. 90, the American Legion, Wellington, Kans., bitterly protests this un-American directive and demands that it be rescinded at once; be it further

Resolved, That a copy of this resolution be sent to the Secretary of War, the Secretary of the Navy, and to each of our Senators and Representatives from Kansas to the Congress of the United States.

Pay of Postal Employees

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks, I include in the RECORD a news item appearing in the Belleville (Ill.) Daily Advocate on April 25, 1945, dealing with the postal reclassification bill now before the Committee on the Post Office and Post Roads:

MAIL PATRONS REQUEST BOOST IN POSTAL EMPLOYEES' SALARIES

Mail patrons of Belleville are joining others throughout the Nation in requesting their Congressmen and Senators to act favorably upon a bill which would increase the salaries of postal employees.

Postal employees who have not had an increase in salary in 20 years and who during the depression years suffered a 27-percent decrease are being paid a temporary bonus of $5.76 a week during the present emergency, but the bonus arrangement expires June 30.

Their request, which is contained in the bill before both branches of the National Legislature, is for a pay increase of $7.69 a week to replace the bonus, an actual boost of only $1.93 a week over the present bonus.

Postal employees in the past decade have given faithful and efficient cooperation toward the success of the N. R. A., the soldiers' bonus bonds distribution, the unemployment census, alien registration, War bond drivers, and other projects, all without extra pay.

Despite inadequate earning power and with hundreds of fellow employees in the armed services, they still cheerfully strive to serve the public satisfactorily by bringing prompt delivery of V-mail, business and personal mail.

Many patrons of the post office are unaware that there are men working in the Postal Service whose annual base pay is only $1,200, that 5 percent of their salary is deducted to pay toward their retirement, that postal receipts have increased $200,000,000 since 1941, but that the huge boost did not mean a raise in pay for them; that they are paid entirely from receipts and not from general taxes; that they are not exempt from Federal income taxes, contrary to belief of many people; and that they receive less per hour for overtime than for regular work.

People of Belleville and the local area can help their postal employees obtain a better standard of salaries by writing to their Congressmen and Senators, urging them to vote favorably upon the bill.

A Detroiter Who Made Good

EXTENSION OF REMARKS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. RABAUT. Mr. Speaker, under leave to extend my remarks, I place in the RECORD with devotion to an old friend, Alvin R. Meissner, an interesting news article from the Washington Sunday Star of April 29 by James Waldo Fawcett:

Alvin R. Meissner, head designer in the Bureau of Engraving and Printing, will retire tomorrow.

This announcement, released for publication last night, signifies the end of a professional career of great importance to philately.

Mr. Meissner was the artist responsible for a long list of stamps.

Born on April 3, 1875, he received his education and training in the public schools. Melchor's Drawing School, and Paulis and Giles' Art School in Detroit. The practical experience he required was gained in the plants of the Detroit Lithographic Co. and the Calvert Lithographing Co., both famous establishments.

Mr. Meissner came to Washington to serve as a designer and engraver in the Geological Survey in 1905. He went to the Bureau of Engraving and Printing as assistant to C. A. Huston, head designer, in 1925, and succeeded his chief in 1933.

The first postage stamp on which Mr. Meissner worked was the 10-cent Lindbergh air mail of 1927. His drawing was perfected under Mr. Huston's watchful eye, but it was distinctively his own achievement and should be listed as one of his productions.

Next in order and the first of Mr. Meissner's independent compositions was the 5-cent Sherman Hill beacon air mail of 1928. He then assisted Mr. Huston in designing the beautiful 2-cent and 5-cent International Aeronautic Conference labels of 1928 and the scarce 65-cent, $1.30, and $2.60 *Graf Zeppelin* adhesives of 1930.

Meanwhile, Mr. Meissner alone produced the design for the 2-cent Edison lamp stamp, 1929, and, although it not commonly is credited to him, the 2-cent Ohio Canal commemorative, 1929.

All the postage-due stamps of 1930, from one-half cent to $5, likewise were Mr. Meissner's exclusively. So were the 5-cent winged globe air mail of 1930, the 8-cent edition of the same design in 1932, the 6-cent edition in 1934, and the 30-cent edition in 1939.

The commemoratives for which Mr. Meissner was responsible include: 2-cent Braddock's Field and 2-cent Von Steuben, 1930; 2-cent Pulaski and 2-cent Red Cross, 1931; 1-, 4-, 5-, and 10-cent Washington Bicentennial, 2-cent ski jumper, Olympic Games, and 2-cent Arbor Day, 1932; 3-cent Newburgh, 1933; 3-cent Maryland, 1934; 3-cent San Diego, 3-cent Michigan, and 25-cent China Clipper, 1935; 3-cent Alamo, 3-cent Arkansas, 3-cent Oregon Territory, and 3-cent Rhode Island, 1936; 1-, 2-, 3-, 4-, and 5-cent Navy, 1936–37; 3-cent Constitution Sesquicentenary, and 3-cent Hawaii, 1937; 3-cent Delaware and 3-cent Iowa, 1938; 3-cent Washington's Inaugural Sesquicentenary, and 3-cent Northwest States, 1939; 3-cent Wyoming, 1940, and 3-cent Vermont, 1941.

Other productions, for which Mr. Meissner is recorded in the annals of the Bureau were many internal-revenue issues, including the green, red, and blue liquor stamps and the District of Columbia liquor stamps—all denominations. He was associated with Mr. Houston in designing the 1928 series of bank notes from $1 to $10,000. It also is understood that he worked on the United States Savings bonds, series E and F, from $10 to $10,000; many Philippine bonds and stamps, and many other Government securities, commissions, citations, and diplomas.

Mr. Meissner is a member of the Washington Philatelic Society, the Collectors Club of Washington, the Washington Numismatic Society, and the Masonic Trowel Club of Washington. He has been treasurer of the Michigan State Society for a long time. In retirement, he says he intends to play, draw, do some oil painting, and in other ways keep consistently busy. His home is at 3507 Center Street NW.

Junction of Governments in San Francisco for World Security and Happiness

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. DOYLE. Mr. Speaker, under leave to extend my remarks in the RECORD, again I have pride in including as part of my remarks an editorial written by a neighbor of mine in my home city of Long Beach, which appeared in the Press-Telegram and Long Beach Sun under date of April 24, 1945.

The other day when the news of the junction of the American and Russian Armies in Germany was announced on the floor of this House, there was very appropriately expressed pride and satisfaction. In the presence of that great significant event there was no middle isle in this great legislative body separating the majority and the minority political parties. With one accord we burst forth in unanimous encore and approval. But that junction in Germany of the might of our armies with that of Russia's was not only significant in a military sense, it was also symbolic in signifying a purpose and cooperation between great peoples of the world, in terms of world solidarity for the purpose of peace. Wars must cease! The purpose of mankind is not blunder but peace. America has planted her feet firmly on the pathway to peace for many years. Other nations have likewise placed their national footsteps on the same pathway to enduring peace.

The San Francisco Conference is the essence of the determination of mankind for the purpose of getting together and living together, instead of staying apart and destroying one another. The nations of the world have no choice in this regard. It is either learn to live together as neighbors, or live separately and selfishly and to eventually leap at one another's throats again with the might of armies and for the purpose of destruction.

This editorial is a sincere expression of the same thought which I have here extemporaneously enunciated and represents the high thinking of the people of my city.

JUNCTION ALSO IN SAN FRANCISCO

Junction of American and Russian Armies in Germany has been eagerly awaited as an event of high drama symbolical of the defeat of Hitler's Third Reich.

As Soviet troops moving from the east meet United States troops moving from the west, their juncture means completion of Germany's conquest, except for Berlin, the so-called Nazi redoubt in the Bavarian Alps and other isolated centers of German resistance.

Junction of the allies from the west and the Russians from the east has a much greater meaning than its strictly military significance. It is the sign nd dramatization of the unity of the Big Three of the United Nations which has produced victory over the Axis—victory that is nearly accomplished in Europe and well on its way in Asia.

There is no answer to the question as to whether Russia, Britain, or the United States was the decisive force in breaking Nazi Germany, except that no one of them is to be so credited. The combination did it. Victory could not have been won if the British people, standing alone as Winston Churchill says, had not carried on after Dunkerque and through the aerial blitz; it could not have been won if the Russians had not withstood the wehrmacht at Moscow and Stalingrad; it could not have been won if the United States had not thrown its matchless resources of manpower and materials into the scales on the side of freedom.

The junction means even more than all of this. It signifies the unity of purpose and the will to cooperate, in spite of some unavoidable differences, which are essential to establishing the peace. It is a happy augury that the soldiers of the United Nations are coming together as comrades on the field of victory as the architects and artisans of a world peace structure assemble at San Francisco for their fateful sessions. The assignment at the Golden Gate is to effect a junction of constructive purposes.

Surpluses: Rubber's Approaching Problem

EXTENSION OF REMARKS

OF

HON. WALTER B. HUBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. HUBER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by P. W. Litchfield, chairman of the board, the Goodyear Tire & Rubber Co.:

SURPLUSES: RUBBER'S APPROACHING PROBLEM

After years of close association with the business, I am constantly impressed by two outstanding attributes of rubber:

1. It is one of America's greatest necessities and most comforting boons.

2. It is a continuous and unfailing source of highly perplexing problems.

The greatest problem it has ever brought to us arose out of the seizure of areas producing 90 percent of our supply. Through outstanding effort America solved that problem by creating the existing synthetic-rubber industry, thereby averting the threat of a military and economic collapse.

Having solved the problem of no rubber, we thereby created a future problem of too much rubber. The latter is not to become acute until after the rubber growing areas of Malaya and the East Indies are liberated but, sooner or later, inevitably it will be upon us.

Already the British and Dutch, who will regain control of these rubber-growing areas, are giving this impending problem of surplus very earnest consideration. Certainly it is not too early for America, dominant in its control of synthetic supply, to do some thinking in that direction; vital American interests are involved.

It appears that this approaching post-war problem will naturally divide itself into two distinct phases:

1. The situation during the first year or two after liberation of the rubber growing areas;

2. The situation thereafter when supply and demand approach a more normal balance in their relationship.

The following world figures, based upon informed estimates, illuminate both of these phases:

After liberation of rubber-growing areas

[Long tons]

	First year	Second year	Third year
Natural rubber available	350,000	900,000	1,400,000
Capacity of synthetic plants	1,300,000	1,300,000	1,300,000
Total potential supply	1,650,000	2,200,000	2,700,000
World capacity of manufacturing facilities for the processing of this supply	1,400,000	1,500,000	1,500,000

Thus, whereas our synthetic industry now gives us the high hand in the matter of supply, the balance will change to the point where the supply of natural rubber will be equal to or in excess of our capacity for the production of synthetic.

Based upon the present knowledge, the natural rubber tire is superior to an all-synthetic tire. It appears, however, that when natural and synthetic rubber are used 50–50 the resultant average tire compares favorably with the best we have ever produced.

It is highly important to America, therefore, that we be allotted a fair share of the available natural rubber in those first 2 years. (If the British should elect to keep that available supply for their own uses, or if we should elect to restrict the use of natural rubber through a desire to protect our synthetic industry, we would be at a distinct disadvantage in the quality of some of the tires and other rubber products offered by the American rubber industry. No one seriously believes either Nation would be so short-sighted.)

We can see from the above figures, however, that there will not be sufficient natural rubber for a 50–50 use until the end of the second year. Meanwhile, the pent-up demand for rubber products will require capacity production on the part of our rubber products manufacturing facilities and a large percentage of the output of our synthetic plants.

International agreements, based upon fairness to all concerned, are certainly going to be in order during this first phase of the post-war rubber problem.

* * * * *

Discussions preliminary to such agreements inevitably will introduce the second phase problems, that is, the relationship between synthetic and natural rubber after the potential supply of natural becomes fully available.

At this point, the two most important considerations for America to keep in mind are these:

1. The need to preserve sufficient facilities for the production of synthetic rubber so that we will never again be at the complete mercy of other nations in the matter of rubber supply.

2. The need to provide maximum service and value to the American consumer of rubber goods.

The first of these main considerations is fixed. It means that a high percentage of our synthetic plants must be kept in condition, operating to the extent that their output can be economically utilized but always ready to produce in great quantity should the need arise.

The second point must wait for its final basis until the big question as between synthetic and natural rubber is answered by proven price and performance of post-war tires and other rubber products.

Other considerations of less gravity than the first two, but still of high importance in the American viewpoint might be listed as follows:

Price stability for the American rubber industry. (In the past, with the market price of our basic commodity fluctuating between $1.25 per pound and 3 cents per pound in a matter of 7 years, a highly unstable and hazardous condition was created.)

Avoidance, so far as possible, of a serious impairment of the foundations of the economy of the rubber-growing areas of the east.

Protection for the principles of free competitive enterprise in world trade, with Government controls and cartel restrictions held to a minimum.

Encouragement for the nations of tropical America now interested in developing sources of natural rubber as a part of their own expanding economy.

* * * * *

Obviously there is some fundamental conflict among these considerations, so let us explore some of the possibilities for adjusting them. And please bear in mind that what follows is primarily for the purpose of suggestion rather than the expression of fixed convictions.

In certain respects the problems within the separate fields of synthetic and natural rubber are somewhat similar.

Each competes with the other.

In the field of natural rubber, high cost and low-yield plantations compete with high yield and low-cost plantations.

In the field of synthetic rubber, high-cost plants which utilize the grain-alcohol base, compete with lower-cost plants using the petroleum base.

Small privately operated native farms compete with large corporate plantations.

In the interest of the greatest value for the ultimate consumer of tires and other rubber products, the possibility of eliminating both the high-cost plantations and the high-cost synthetic plants, with an attendant reduction of the surplus of supply, naturally suggests itself.

It has been estimated that as much as 25 percent of our excess capacity for the production of synthetic rubber can be converted over ultimately to the production of materials which will be required in the expanding field of plastics. Thus, it would be removed from competition with natural rubber and with synthetic rubber.

It is certain that some part of the existing synthetic industry will be required for products in the field of oil and acid-resistance—a field in which natural rubber cannot compete with synthetic.

With an expanding world economy, with a pronounced trend toward new uses for rubber, we may confidently look forward to a steadily increasing world demand for rubber in the first decade after the war. (It is well to remember that in the quarter century from 1914 to 1939, world consumption of rubber increased from 119,643 tons to 1,107,818 tons.)

As I have pointed out in previous notes on America's rubber industry, the presence of large supplies of rubber at stable prices will, in and of itself, stimulate our natural inventiveness to find more uses for that supply.

Belief in the advisability of continuing the development of natural rubber in tropical America may seem inconsistent with the facts of a great world surplus of supply. It is not likely that natural rubber produced in the Western Hemisphere can compete pricewise with that grown most economically in the Far East. However, the comparatively higher wage levels in this hemisphere may be partially off-set by the development of high yielding stocks—more rubber per tree with less labor involved in its production. Furthermore, its production should be encouraged as a part of private farming operations affording the farmer supplementary cash for his part-time effort. In this way, the farmers need not be bound so closely by cost-accounting practices found necessary in large commercial operations. Success of such a program would expand trade between the United States and the nations of tropical America with a consequent benefit to their economy.

In this connection it is well to remember that synthetic rubber in many rubber products requires blending with natural rubber to obtain best results. The natural rubber we have been able to obtain from Ceylon and other uncaptured sources, has tided us over the emergency this time, but even Ceylon could be closed to us in some future war in the Far East.

In the foregoing I have undertaken to outline as simply as possible some of the salient facts of the international rubber situation. There are many ramifications of a technical, economic, and political nature which have not been touched upon here but will call for consideration in the international conferences to come.

Some of the most important factors involved can be treated only in principle since their settlement in detail must await the processes of time and experience.

But be that as it may, the rubber problem is rapidly approaching and we should prepare. It is heavily vested with conflicting international interests. It needs to be approached in a spirit of good will and sympathetic understanding by all parties concerned. There should be a wholesome willingness to strive for improvement of the quality and value of both natural and synthetic to the end that the products and services of rubber may be made available to more people and that the consuming public be given consistently higher standards of living. On that basis, the broadest and most enduring interests will be served in the end.

We are in a strong bargaining position with our control of the synthetic industry. But much of our hope for permanent world peace will depend upon the economic health and cooperation of all non-aggressive nations. We should shape our course in the matter of rubber to that end.

Resolution of St. Louis Archdiocesan Union of Holy Name Societies

EXTENSION OF REMARKS

OF

HON. JOHN B. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. SULLIVAN. Mr. Speaker, under leave to extend my remarks, I include a resolution which was unanimously adopted by the St. Louis Archdiocesan Union of Holy Name Societies:

This is to certify that the St. Louis Archdiocesan Union of Holy Name Societies, representing 87 parish branches with a membership of over 20,000, at its regular quarterly meeting on March 20, 1945, held at St. Matthew's Parish Hall, did unanimously adopt the following resolution:

"Whereas without the recognition and guidance of Almighty God there can be no just and lasting peace; and

"Whereas the sacrifices of our Nation shall have been in vain unless the moral law govern human relationship, the rights of the individual be assured, oppressed people be protected, the rights of minorities be secured, an international organization be created to maintain peace with justice, international economic cooperation be fostered, and a just social order based on these principles be organized within each state: Now, therefore, be it

"*Resolved*, That we, the representatives of the Holy Name Societies of the St. Louis Archdiocesan Union, urge the representatives of our country to advocate the recognition and adherence to these principles at all conferences for the establishment of peace and a just world order; be it further

"*Resolved*, That this resolution be spread upon the minutes of this organization and a copy be transmitted to the President of the United States, the representatives of this Nation to the San Francisco Conference, to the Members of the United States Senate and House of Representatives from Missouri, and to the national office of the National Conference of Catholic Men."

ST. LOUIS ARCHDIOCESAN
UNION HOLY NAME SOCIETIES,
By E. M. RUDDY, *President*.

Attest:

JOSEPH H. SIEVERS, *Secretary*.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. WALTER B. HUBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. HUBER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following memorial to the late President Roosevelt:

The Akron Industrial Union Council, C. I. O., in regular session assembled on April 13, 1945, passed the following memorial in memory of our late President, Franklin Delano Roosevelt:

"The Akron Industrial Union Council, C. I. O., on behalf of all the local unions represented on the council, publicly expresses its profound grief over the death of our friend and President, Franklin Delano Roosevelt.

"The untimely death of Franklin Roosevelt constitutes an irreparable loss not only to the people of the United States but to the people of the world.

"Franklin Roosevelt was a man of destiny. His ideals, vision, and principles pointed toward a better world. Although all of the people of the United States are indebted to him for what he has done, labor owes a particular debt of gratitude to his memory. Through the leadership of Franklin Roosevelt, legislation was enacted for the first time in history guaranteeing labor's right to organize and bargain collectively, prescribing maximum hours of work and minimum rates of pay, providing for unemployment compensation, social security, and many other beneficial principles of law.

"The leadership, the charity, the vision, and the personality of Franklin Roosevelt have been enshrined upon the hearts of men. He demonstrated his interest in the betterment of the common man.

"In the midst of world conflict, Franklin Roosevelt had drawn the blueprint for a world organization to prevent aggression and to preserve world peace. An obligation rests upon organized labor to perpetuate the ideals for which President Roosevelt struggled and died. An obligation likewise rests upon organized labor to carry out the plans which he had made to insure a lasting and just peace in the world."

TO PRESIDENT FRANKLIN D. ROOSEVELT

Sleep, soldier, sleep! A selfish world,
That oft its cruel venom hurled,
Shall hurt no more. A gentler voice,
A warmer hand, bids you rejoice.
The Master to his faithful son,
Welcomes with "Enter!" and "Well done!"
E'en as to you, did they to me,
We suffered for humanity!"
Sleep, soldier, sleep!

Rest, comrade, rest! The muffled bells,
The furrowed brow our anguish tells.
On anxious face a void is shown,
In upward glance and stifled moan;
While eager eyes the future scans,
To seek the Destiny that's Man's,
Far from you comes that challenge clear,
"You've naught but Fear itself to fear!"
Rest, comrade, rest!

Pause, dreamer, pause! The fight you fought,
The battles won, the goals you sought,
Fresh courage brings to those who seek
And succor gives to faint and weak;
The Light you shed down untrod ways
Undaunted faith to all displays;
More freely breathes your native land,
Because you tried to understand.
Pause, dreamer, pause!

Crusader, rise! The veil is drawn!
Before you lies the visioned dawn!
The Night of hate and fear and wrong,
Has vanished with the victors song!
For Right has triumphed over Might!
The spirit freed in joy's delight!
And Love, that bled and ceaseless gave,
Rolls back the stone, from futile grave!
"Crusader! Rise!"

—*Nicholas J. Richards.*

Continuance of Reciprocal Trade Agreements Necessary

EXTENSION OF REMARKS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, the House Committee on Ways and Means is now having extensive hearings on legislation authorizing the continuance of our reciprocal trade agreements.

This is one of the most important measures pending in Congress, and it would be tragic if it should be defeated.

A very thoughtful and enlightening editorial appeared in the Dallas News on April 20 upon this subject, and under leave granted, it is submitted herewith:

TARIFF ISSUE AGAIN

Most of the muddled thinking of the world comes from our practice of calling things by their concrete manifestations and overlooking the real objects. This was a weakness of the medical profession through many ages. They doctored the symptoms instead of the disease; and they made little progress until scientific research got them past this technique. Because our political and economic

problems are less tangible than human disease we are going to have more difficulty in getting past the symptoms in our thinking about cures.

The issue of isolation is a good example. Fortunately a large majority is now opposed to isolation, but unfortunately there are evidences that a large part of this majority does not know what isolation means. In their minds the sheep are separated from the goats on the issue of whether we should join in armed conflict to save democracy for the world. That is good as far as it goes, but it is skin-deep thinking.

The beginning of isolation is the erection of obstructions to international trade. The ending is war. There is no consistency in being a cooperationist in war and an isolationist in peace. Yet leaders of the Republican Party met with President Truman a few days ago to express their willingness to go along with him in the great task of guiding this country through the international efforts to obtain permanent peace, and at the same time other members of the party were letting the House Ways and Means Committee know that they were unalterably opposed to tariff reductions. They do not even want a continuation of the reciprocal trade treaties that were partly effective in lowering tariff duties during Secretary of State Hull's tenure of office.

It is difficult to understand why the Republican Party continues to stand by this policy. There was a time when it was good shortsighted policy, even if bad in the long run. But it is not ever good shortsighted policy any more. Whatever national profit is derived from a high tariff policy must come while our own tariffs are high and the other nations' are low. It builds up what used to be called a favorable trade balance. But before the outbreak of the war we were no longer exceptional in our tariff policy. Even traditionally free-trade Britain had been forced to adopt it in part, and the dictator countries were running riot with their tariffs, embargoes, export subsidies, and other forms of trade interference. Now we learn that even the Latin-American countries are adopting tariff policies. If the pre-war trend continues in the post-war period, it will be a completely tariffized world, which will mean that it will be a world of completely isolationist national policies.

The nation with the greatest opportunity to reverse this trend is the United States. Both the material and psychological effects would be impressive if the United States should in the future stand consistently by a free trade policy. It is true that our present tariffs cannot be eliminated abruptly. But the renewal of the reciprocal trade treaties would permit a continuation of a reform that has already made some progress. Any other action will have world-wide disastrous effects.

Humanity Mourns

EXTENSION OF REMARKS

OF

HON. J. PERCY PRIEST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. PRIEST. Mr. Speaker, under leave granted to extend my remarks, I desire to include here an editorial under the caption "Humanity mourns." This editorial was published in the Nashville Tennesseean on April 13, following the death of President Roosevelt.

Written by Mr. Jennings Perry in the first few hours after the death flash went over the wires, this editorial has been reprinted and widely distributed in answer to many requests.

The editorial follows:

HUMANITY MOURNS

As to all it must death has come to Franklin D. Roosevelt, beloved President of the United State, one of humanity's great leaders, the first spirit of the world of his times.

His own countrymen were fortunate in him. The peoples looked to him from the ends of the earth. He is wept wherever there are firesides. He is honored wherever men have aspired to lift the common lot. He was to the lowly a pillar, to the mighty a peer. He saw with the vision of all who have loved and respected their fellowmen, his purpose was to turn human genius to the broadest realization of human hopes; his courage and strength—God send—abide in the hearts of the generation with whom he shared them to the end.

The shock of this great man's death is upon all circumstances and men and numbs the processes of thought. It does not lessen the actual impact that indications as well as probabilities have prepared the event. The increasing labors, of increasing scope, to which the President had given himself as our Nation, and all the world, struggled to the climax of its war against war wrote in the lines of his familiar face for all to see. His last appearance in the well of Congress, to account to the people for his acts as their spokesman and servant in the councils of the United Nations and to bespeak the understanding and support of the representatives, revealed the extent time and care had worn, not indeed upon his mind or spirit, but upon his crippled body.

The President may or may not have slipped away to rest with some surmise that it might be his last at his favorite retreat in the South. So well furnished a mind would have faced long ago the fact of mortality. Yet to a man so habitually virile, of so philosophical a cheerfulness, so resilient and eager, the prospect of a termination would have had to stand on its proof.

He came to Warm Springs keenly conscious of the march of the liberating armies of which he was Commander in Chief upon the ultimate goal of their arms; of the near approach of that convocation in his own cherished land of the peace-loving peoples of the earth to agree upon the means of keeping the peace hereafter; of the confidence of the peoples in the plan for security in whose formulation he himself had had so guiding a part.

Thus, as he came to the river, his own bright satisfactions were companioned by the hopes and the will of mankind. He could see after the long and arduous journey the Promised Land. More was not vouchsafed to Moses.

Those who will may debate whether it was the virtue of our form of government or the divinity that shapes all ends that brought Franklin Roosevelt to the presidency of the United States in the epoch when the idea and the ideals of democracy were buffeted by the storms of totalitarian revolution. In our own Nation a crisis had come about. Stark want stalked suddenly among a people whose faith in their social system never before had been so shaken. Angry voices preaching the failure of popular government in far countries had begun to find echoes in our own cities and on our own farms, where amazement had given way to confusion and rising resentment.

In those days, it is well remembered, one personality emerged with the self-assurance that always before had been typical of the American people, one voice spoke in accents of untrammeled courage, called to all faint-hearts to repair their faith, to a great Nation to be mindful of its greatness—and to fight.

The resurgence of this country from its darkest depression is history. Roosevelt's call to action, to self-salvation, stirred the wheels of a people's government to cope with the urgent, immediate needs of the people. Few of us who sustained the fears of that period could or would care to forget the spiritual metamorphosis that occurred. A heavy load was pushed from the imagination of the man in the street. An anticipation of security, of well-being spread everywhere. Thin streams of smoke began to emerge from the paralyzed factories and soon merged in a comforting cloud. The dispirited artisan took stock of his tools, the countryman went again into his fields with prideful eyes.

Here was a man, chosen to lead, who frankly declared his capacity to err—but his determination to try. Here was a man who, in this emergency given the leadership of the Republic, unhesitatingly threw all the powers of government to the rescue of a tottering economy, made work and provided bread and meat, created cheer with his cheer, faith with his faith, courage with his courage. He would experiment—the public welfare was the aim. He would dare—when had America prospered by burying its talents in a sterile field?

Out of it came a regeneration of the people, a return to the first principles of their social compact. The people were sovereign; government was theirs, to be used for their succor and security. It was, at the hearty instance of the new President, so used.

And because, with the unerring appreciation of a people knowing its weal from its woe, the Nation judged Franklin Roosevelt to be on the right track they preferred him again and again and again.

The champion of dynamic democracy in the most productive nation of the world, a defender of the democratic thesis against the presumptions of all other social forms, it was as natural as it was fated that Franklin Roosevelt should symbolize liberty and freedom to wistful peoples beyond our shores already suffering the imprecations and intimidations of dictatorial regimes. His comprehension of the impasse into which the world was drifting, his efforts to avert the debacle and, that failing, to prepare his countrymen and his country against it, are matters of record and grateful memory. He could not quarantine aggressors; he did uncover their names and the ambition of their schemes.

In the alliances to have been effected, in the military determinations that have been made, in the equipment and disposition of our own forces to wage war in both hemispheres, the President demonstrated a diplomatic virtuosity and a generalship whose merits are best attested by the nearness of victory in Europe and the dire straits of the enemy in Asia.

In the reversal of our relations with the nations of Hispano-America over the years of his administration, from cold and suspicious acquaintance to genuine friendship; in his unflagging efforts, from the Atlantic Charter to the San Francisco Conference now at hand, to promote international amity and base a lasting peace on mutual and collective undertakings for peace; in his constant insistence upon the community of the world, he led his own country out of the fool's paradise of isolationism (in the air age) and laid the foundation of the reciprocal trust among all countries which can be the only life insurance of the population of our shriveled planet.

How to explain Franklin Roosevelt, the now historic figure?

It is not enough to say of him that he was the product of chance and the times. The circumstances of his life are known to all. Born to the manor, he became the advocate and the leader of the masses. As able as any of his contemporaries to pass his days in ease, he devoted his fully mature years to pro-

digious work, spared himself no responsibility, entered vigorously into every popular interest and effort of one of the most stirring decades of the century.

Perhaps the loss of his own physical freedom in early manhood accounted for his inclination to—and relish of—the strenuous contests of the political arena and the strenuous services of his public career. Certainly his sympathy for all unfortunates, his concern that others should enjoy a better standard of living, his insistence upon human rights were deeply sincere, and it is noteworthy that these traits he manifested before his own affliction. By some he was called an "intellectual democrat." If this were true, his convictions were indistinguishable from congenital dispositions in this direction. In the White House and out of it he moved with an easy informality and eschewed pomp and circumstance to a degree that scandalized the doctors of protocol.

He was cordially hated in his time—in the good company of Jefferson, Lincoln, Jackson, and every other popular leader who trampled on the toes of privilege. And he was loved as no other occupant of the Presidential office has been since, perhaps, Jackson. The tilt of his head and the inverted half moon of his sometimes mischievous, sometimes malicious smile—especially of the campaign days—is indelibly imprinted in the recollection of millions of his fellow citizens.

He was always popular with youth, and because youth makes up so much of the armed forces his death will be specially mourned wherever the Army camps or the Navy flag is lowered to the half of the mast.

The President was called hard names. His own political placement was "a little left of center." He brought America a little left of center—or centered America again on its cardinal concept of the general welfare, from which it seemed to have strayed. This it true: That at his death, after more than a dozen years of his administration, every essential freedom of which Americans ever were possessed visibly is unimpaired; private property still is private property; the elective power is as secure as ever before in the hands of the people who, in 1932, chose Roosevelt when they could have chosen another.

Actually democracy is more firmly at home in the United States than at any time since the present political parties were formed; and the American example is more widely respected throughout the world.

There have been those who sincerely felt that Franklin Roosevelt's long tenure of office would depreciate the system and discourage the aspiration of other candidates for the high position. The discouragement has not been palpable. Other candidates regularly have been forthcoming and no doubt will continue to do so. On more than one occasion as President and candidate, Mr. Roosevelt felt it desirable to point out that as long as the suffrage was free the Presidential office never could be seized. The fact that a majority of his countrymen willed Mr. Roosevelt into the White House in four successive national elections could not reasonably be taken to indicate either a hypnotic persuasion in the man himself or a faulty perception on the part of the people. There was no indication save that, with the right of choice, the people believed Mr. Roosevelt best able to serve them.

For this reason, this newspaper gave its support to Mr. Roosevelt in all his candidacies. The people of Tennessee were of the same mind. In the last election beyond question—and in 1940 to every appearance—the parlous world situation greatly influenced an anxious people to place the reins of government in the hands of the man whose grasp of the meaning of the conflict had been so early and clear and whose path in the conduct of the war, once Pearl Harbor precipitated us into it, had been masterful.

We declare freely that other considerations—the personal warmth of the man, his consistent humanitarianism, the great and and good works of his administration, and the character of the opposition to him—drew us to his side.

In the last election, Mr. Roosevelt accepted the nomination as a duty—in the sense that a true soldier accepts the order of authority. His conscience bound him to a heavy task that, as an American, as a statesman aware of his own capacities and of the trust imposed in him, he could not refuse to carry on, though even then the chances had far lengthened that he would not survive the trials.

This is not a one-man Nation, nor has Mr. Roosevelt borne its burden of government alone. Though we mourn him today, we would do him no honor to be appalled, at his passing. He would be amused, cheerily, and remind us that a nation is as strong, not as its leaders, but as its people.

And its purposes. He would notice, undoubtedly, that the American people have not flinched in war; that their national unity has been recemented by a common danger; and that their deep-rooted desire for peace has been reflected, up to now, in their expressed pledges to unite with other peoples in preventing a recurrence of those aggressions, economic and military, that have brought calamity twice in a quarter of a century.

Given an adamant rsolution behind those purposes, the leadership to their achievement will be found. Indeed the leadership exists in the election of the people themselves to enter the type of world union, long sought and long appreciated as the only workable system, which postulates peace on law and law on the police power of the world community.

Evidently the death of the American President whose personal friendship with the foremost men of the nations allied with us in the war and in the peace undertaking has been a weighty factor in creating the conditions for accord at the coming world meeting is a sore loss at this culminative hour. Evidently a personal prestige that counted so much with many smaller nations that have looked hopefully to this meeting will no longer exert its suasion.

But that prestige long ago merged with the standing of the Nation itself: Roosevelt the good neighbor and Uncle Sam the good neighbor are not two different persons. And the interpretations of American thought made by Mr. Roosevelt to our allies, rather than the President's own preferences, are the substance upon which the entente must depend.

It is vain and fruitness to measure preeminence, for the verdict of history is rendered in far retrospect.

This much, however, is certain: No American leader in the exercise of his leadership has so exerted an immediate influence upon the course of human history as did Franklin Roosevelt.

The faded hope of a military conquest of mankind, the spent momentum of the pagan worship of force, all these are ruins instead of monuments because of the clarity of his foresight, the strength of his soul, and the courage of his conviction.

However much the interest of humanity transcends the sentimental, it is not amiss to be gratified that the individual to whom the present triumph of free government owes most was permitted to see with his mortal eyes the victorious conclusion of the epic struggle.

Franklin Roosevelt, if he recognized approaching death, must have praised a beneficent Providence that he had been allowed to witness the destruction of his country's foes and the assured success of the forces of freedom.

For this he lived; in this good knowledge he ceased his earthly turn. Humanity mourns him; his countrymen will set up stones for him.

On these Franklin Roosevelt, the modern apostle of democracy, might like it better that after his name be inscribed, rather than "first citizen," the heartfelt tribute "friend of the people."

And his countrymen of this America, if troubles rise suddenly upon them again, might always to their profit and comfort hear a voice, clear and friendly as of old, saying, calmly:

"There is nothing to fear but fear."

Reciprocal Trade Agreements

EXTENSION OF REMARKS

OF

HON. HUBERT S. ELLIS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. ELLIS. Mr. Speaker, as we will have the Reciprocal Trade Agreements Act—with authority to cut tariffs—before the House for consideration in the near future, I believe it desirable that the Members have the benefit of the opinions of responsible persons in all walks of life and from all sections of the country.

Today, I am pleased to submit an editorial from the Parkersburg News, one of the great dailies of West Virginia, published in Parkersburg and edited by Mr. Herman E. Gieske. His editorial is timely and interesting:

MR. HULL'S TARIFF POLICY FAILED WHEN IT WAS PUT INTO EFFECT

Elsewhere on this page appears a letter, dealing with the Reciprocal Trade Agreements Act, written by Hon. Cordell Hull, former Secretary of State of the United States, which is reproduced in order that our readers may have both sides of the question, even though this newspaper is in utter disagreement with Mr. Hull's tariff theories.

It is difficult to understand why the venerable Mr. Hull clings to this exploded tariff theory, for such it is, demolished by the harsh facts of history. It was all very well for him to proclaim in 1932, as he and others of the New Dealers did, that high tariffs contributed to the depression; but what he and others of that persuasion failed to say was that within Europe was the place to begin the reduction, for even the tiniest of the succession states devised by the Versailles settlement had built sky-high tariffs, higher proportionately than those of the United States. But the fundamental error of the Versailles settlements was that they destroyed the hitherto integrated economic set-up of the European Continent. Of course, Mr. Hull and his associates were then looking for a political scapegoat, and they accordingly fastened upon the Smoot-Hawley tariff and blamed it for the depression that began in 1929. This misapprehension was surely one of the greatest political hoaxes ever perpetrated in the history of the Nation.

If Mr. Hull's tariff theory was correct, why, then, didn't prosperity begin to zoom to the predicted heights when Mr. Hull and his associates began hewing and hacking away at the tariff which hitherto had protected American jobs?

Mr. Hull had also forecast that his tariff theories would tend to prevent wars, and as will be noted from the estimable gentleman's letter, he still clings to that theory. But here is the record:

1934: Mr. Hull's tariff-reduction-by-treaty program was put into effect.

1935: Mr. Hull's tariff policies still in effect.

1936: Mr. Hull's tariff policies continued to reduce the American tariff wall.

1937: Mr. Hull's tariff policies still in effect.

1938: Mr. Hull's tariff policies still reduced the American protective tariff.

1939: Mr. Hull's tariff policies, instead of preventing war are crowned by the greatest war of all time. Instead of promoting American prosperity, when the war broke out in 1939, there were still over 10,000,000 of unemployed in the United States, and only the shadows of war hovering over the entire world served to quicken the economic structure of the United States into action. Except for the prodigious spending of billions of dollars by Mr. Hull and his associates, the level of temporary activity might have been even lower.

Such is the sorry record of Mr. Hull's exploded theory. Though it was tried for 6 years it failed either to produce prosperity in the United States or to prevent war.

Why, then should not people who have jobs, and others who will be in quest of jobs, turn away from this theory as one which has been tried and found wanting? And Henry Wallace goes so far as to say that if we do not still further reduce the tariffs we shall be inviting World War No. 3. They must think the American workers mighty gullible if they expect them to swallow this one. It was different in 1932. The people were in desperate straits, looking for messiahs. Nearly 20 years had gone by since the fiasco of the tariff slashes put into effect by Woodrow Wilson's administration.

As it is now, under Mr. Hull's policies more than 1,200 reductions have been made in the American tariff. And now it is proposed to grant the power to cut them another 50 percent.

Persons who have jobs and expect to retain them will be wise if they look into this matter. All that the average worker has to do is to ask his employer how the latter stands on the subject. His reply usually will be, "If you want someone in Europe or Asia to take your job, then vote against the protective tariff."

We have every respect for a great many of Mr. Hull's achievements, but are convinced that if the American domestic market is permitted to be further hewed and hacked to pieces, we shall have a depression that will make the former one seem like a picnic.

Rededication

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. DE LACY. Mr. Speaker, under leave granted me, I include the following excellent editorial from the April 19, 1945, edition of the New World, which through the years in Seattle, Wash., has continually been a voice of democracy in that community:

"IT IS RATHER FOR US TO BE DEDICATED TO THE GREAT TASK REMAINING BEFORE US"

—Abraham Lincoln in his Gettysburg Address, November 19, 1863.

These words from another immortal wartime President of our beloved country carries a message which is even more vital to Americans today than to those who first heard them during the closing years of the bloody Civil War.

Their resounding call to action must cut through the grief of a world deprived of a "heroic champion of justice and freedom" as Franklin Delano Roosevelt was so aptly described by President Harry S. Truman in his stirring message to Congress and to all of us last Monday.

Only determined action by a united people to carry out the program of our fallen Commander in Chief—only the realization of those burning ideals which President Truman declared he will support and defend "with all my strength and with all my heart"—only by dedicating ourselves to this great task can we fill the void created by the tragic death of our fallen leader.

Tears of grief must not blind us—the hypocritical wailing of the pro-Axis press and the bitter-end isolationists must not beguile us—from following the course to victory, lasting peace, and a prosperous world which Franklin D. Roosevelt so clearly charted.

What is the program which President Truman vows to support and defend "with all my strength and with all my heart"?

Clearly it is to prosecute the war to a sweeping victory and at the same time to finish the structure of the world organization of the United Nations so ably designed by President Roosevelt's leadership at the Conference of Cairo, Moscow, Casablanca, Tehran, Dumbarton Oaks, Bretton Woods, and Yalta.

In a few short days, on April 25, representatives of the United Nations will meet at San Francisco to draw up a charter—a plan of world organization—which was projected at Dumbarton Oaks and upon which President Roosevelt was laboring when death struck him down.

This Conference must succeed. We must answer the call of President Truman, who said that "I appeal to every American, regardless of party, race, creed, or color, to support our efforts to build a strong and lasting United Nations Organization."

On March 1 President Roosevelt submitted to Congress his proposals for a World Monetary Fund and a World Bank as projected at Bretton Woods. Congress has not yet voted on these vital measures.

The finest tribute Congress can pay to the memory of Franklin D. Roosevelt is to act promptly and favorably on the Bretton Woods proposals. Their defeat would be a repudiation of the program of F. D. R. We must insist that Congress enact these measures (H. R. 2211 and S. 540).

It is clear that the death of Mr. Roosevelt places an even greater responsibility on the broad, patriotic, nonpartisan coalition which resulted in victory at the polls November 7. This coalition can and must be strengthened. The issues before the people are not the property of the Democratic or the Republican Party. They are the heritage of all people of good will from a man whose memory is enshrined in the hearts of millions in all parts of the world.

Certainly labor's responsibility has increased. It must push forward to complete the formation of a new world labor organization along the lines laid down at the London Conference. The great and powerful A. F. L. must take its rightful place in the leadership of an international labor movement so that the workers of all lands can do their full duty in building a better world of tomorrow.

It is the equal responsibility of both management and labor to bring into reality the high principles of the "prosperity charter" recently signed by Philip Murray, Eric Johnston, and William Green and endorsed only last week by the C. I. O. international executive board.

Above all, the people must be alert to smoke out and smash those individuals and groups who will attempt to sabotage the program of Franklin D. Roosevelt under the hypocritical pretext of honoring his memory.

We know what that program is. In President Truman we have a great and devoted American who has accepted the standard from our fallen Commander in Chief.

We must strengthen his hand and his heart. We must make democracy live and flourish by a more vigorous participation of all of us toward the realization of the Roosevelt program under under the leadership of his chosen successor—Harry S. Truman, President of the United States of America.

Only in this way can we erect a monument to that great and heroic spirit whom we mourn—Franklin Delano Roosevelt, friend of mankind, architect of a lasting peace, and symbol of that upward reach that is in the hearts of freedom-loving people everywhere.

Address of Hon. James A. Farley

EXTENSION OF REMARKS

OF

HON. EDWARD A. KELLY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. KELLY of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address of Hon. James A. Farley and two editorial comments:

ADDRESS OF HON. JAMES A. FARLEY, CHAIRMAN OF THE BOARD, THE COCA-COLA EXPORT CORPORATION, AT THE ANNUAL DISTINGUISHED SERVICE AWARD DINNER OF THE MILWAUKEE JUNIOR CHAMBER OF COMMERCE, SCHROEDER HOTEL, THURSDAY EVENING, APRIL 19, 1945

I am grateful for this opportunity to discuss Americanism. In time of great stress we need a constant restatement of values—a reiteration of principles which we, as Americans, hold dear. Americanism is an impelling subject, doubly so today because we are fighting the greatest war in history.

War is a devastating experience. Not only does it cost us our youth and our loved ones, but it tends to shake the faith of the people in our institutions. Fear of today breeds fear of tomorrow. War eats at the very soul of a nation. It is the most dreaded of all diseases.

This Nation has known six great wars, including a revolution and a war between the States, and out of the latter we grew into a stronger and more united nation. That we have never experienced defeat is a statement of fact now possible to no other major Nation. To account for this it is easy to point to our vast resources—our great ports, our enormous industrial plants, our mines, our water power, our unsurpassed farm lands. But surely there must be a deeper reason for this unequaled record, some underlying cause for our triumphs, some all-encompassing factor that transcends these material wonders which we possess.

I have traveled the length and breadth of this country scores of times. I have been in every State in the Union, not once, but often. I know hundreds of people in every State. My correspondence down through the years has been enormous. And I think that out of that vast accumulation of contacts with fellow Americans I can qualify as a witness on Americanism. I believe it has been my privilege to have sensed the spirit which makes this land great.

There are more than 130,000,000 Americans, and I would guess that there were approximately 130,000,000 definitions of Americanism. But if we could summon every one of those definitions before us now we would find one word common to them all. That word is "freedom."

Freedom is the very breath of America, its very life. It is the underlying force, the

inner power, the spirit which is singular to our Nation. To me freedom and Americanism are synonymous. I want to talk today about freedom in terms of what the future holds for us and what we can do about the future. But first let us examine this remarkable force called freedom, this singular American spirit.

I think all of us cherish freedom far more than we realize; we cherish it instinctively, we cherish it by tradition. It is a common error of the rest of the world to regard us as a young people. The, say we are only a century and a half old. Frankly, I think they have made a substantial miscalculation. We are older than they think.

Our freedom, under which five generations of our people have leaped through stages of progress to achieve standards that have astonished the world, does not owe its orgin to decaying governments of the old world. Our form of government, which has given us our freedom, was a new light enkindled in a world dark with monarchy. Not since the cave man found fire has mankind received anything more warming than the protection of a government dedicated to his development with a minimum of hampering laws and a maximum of individual spiritual strength.

Under this freedom, which I insist was not patterned on any in history, we paced the world materially and spiritually. From the earth, out of the depths of the seas and into the skies we have plucked resources. Our men of science have led their world brethren in transmitting these to new uses. Our manufacturers have produced for the uses at amazing rates. Our men of religion, teachers, philosophers, authors, and poets have breathed upon our better natures to inspire us to even greater efforts. Truly, ours has been a fruitful and even happy blend of labor, management, and genius for are we not supplying the whole world with money, food, and manufactured materials.

There are those who will tell you our progress is due to our natural resources. These forget South America, Russia, India, and Africa have as great if not greater shares of the world's goods. There are others who will tell you that our progress is due to our national characteristics. These forget that we have come comparatively recently from all the nations in the world, which are the reservoirs of these characteristics. I say to you as solemnly and sincerely as I know how that the roots of our phenomenal growth is due to the freedom upon which our forefathers built this Government—our freedom, which, under God, all Americans must cherish jealously if we are to continue the growth that has been ours through the years and if we are to enjoy the blessings of peace.

Freedom or Americanism, whichever we choose to call it, is a dynamic liberating force. One need walk no farther than the nearest playground or college athletic field to discover why we are winning this war. Beyond question we are the greatest competitors in the world. I do not advance that as American boast, but rather as a manifestation of the liberating force of freedom.

The American knows no limit of achievement because no limit exists in America. Our children sense it at an early age because freedom is inborn in them. Our youth think only in terms of winning whatever they attempt. Victory is the image before them; defeat is almost impossible for them to conjure. Considered alone we call it the competitive spirit; actually it is a chief product of freedom. It, more than anything else, accounts for American ingenuity in the field of production, and victory on the field of battle No American is ever too old to win. His age may be that of a Marshall, a King, an Eisenhower, or a MacArthur, or his youth may be that of a Bulkley, a Kelly, a Levin, a Bong, or a Basilone, but his competitive spirit is unquenchable.

Countless manifestations of freedom surround us. There is tolerance for each others thoughts, for each others religion, for each others race. There is the demand for justice, for equal treatment under law. There is the conviction that opportunity is unlimited for everyone.

The list is endless, but there is one manifestation of freedom that is often overlooked. Despite our highly developed will to win, Americans love to see the underdog triumph. Paradoxical as that may seem it is one of the deepest roots of Americanism.

What American has not experienced the thrill of seeing some highly touted competitor overcome by some little fellow who was not given a chance to win? It sets American crowds on fire with enthusiasm and it explains a great deal more than we think. It explains why we have never conceived might to be right; why we have never worshipped might as an end in itself; why the superman has never appealed to American instincts.

Imagine if you can an America in which there was only one political party—and it won all the time. Imagine if you can an America with all enterprise owned by the State. Imagine if you can an America with only one press—the Government's. To Americans those things are might, but to Americans these things will never represent right.

It is little wonder that Hitler underestimated America, that he was contemptuous of our democratic ways. To the totalitarian mind the benefits of the free spirit are incomprehensible. The totalitarian thinks only in materialistic terms. He cannot grasp the fundamental fact that human beings cannot be turned into robots. A robot will fight an orderly and relentless battle, but a free man will inevitably triumph. If two great wars have not taught the world that, then nothing will.

As we near total victory in the present conflict, straight thinking on the home front is needed more than ever. For almost 4 years now we have been living under a wartime Government, a Government which has deliberately—and with our approval—made temporary encroachments upon our democratic way of life. That is something we all know and we have accepted it for the single purpose of achieving victory. It is not an invention of this administration. It is a necessity born out of military requirements and employed by every wartime administration since the Nation was founded.

In borrowing totalitarian ways for the prosecution of the war it was our aim to rid ourselves of them at the earliest possible moment. I am certain that the Government had no other end in mind, and I am convinced that the Congress, once this war is over, will take the lead in the speediest restoration of all the democratic processes.

In every war there are those who say that since the authoritarian hand of government worked so well in waging war it should be employed to promote prosperity in peace. During the last World War there were those who counseled President Wilson to take such a course. For the record, I would like to read you what he said in reply. It was contained in his 1918 message on the state of the Union delivered just a few weeks after the end of the last war:

"So far as our domestic affairs are concerned the problem of our return to peace is a problem of economic and industrial readjustment. That problem is less serious for us than it may turn out to be for the nations which have suffered the disarrangements and the losses of war longer than we. Our people, moreover, do not wait to be coached and led. They know their own business, are quick and resourceful at every readjustment, definite in purpose, and self-reliant in action. Any leading strings we might seek to put them in would speedily become hopelessly tangled because they would pay no attention to them and go their own way. All that we can do as their legislative and executive servants is to mediate the process of change here, there, and elsewhere as we may. I have heard much counsel as to the plans that should be formed and personally conducted to a happy consummation, but from no quarter have I seen any general scheme of reconstruction emerge which I thought it likely we could force our spirited businessmen and self-reliant laborers to accept with due pliancy and obedience."

We could demonstrate no greater attachment to Americanism than to lend our support to that Wilsonian doctrine at the conclusion of this war. That does not mean that every wartime control should be dropped when the final gun is fired. Our economic system has been too greatly dislocated for that. But it does mean that relaxation of controls should be rapid and clean-cut, and labor, agriculture, and management should join, as they are now doing, in preparing for the peacetime readjustment ahead.

As for those who wish for a continuance of authoritarian government in time of peace because it worked so well in war, they are only putting the cart before the horse; in fact they are urging that we do without the horse altogether. Let them remember that it has been our freedom in peace that has been our strength in war. Let them recall that we have fought wars and are fighting this one only to preserve freedom. We have all given up great measures of freedom to achieve victory. We should let no one forget for a minute that we want those freedoms back and that we intend to have them.

Next week at San Francisco the United Nations meet to draft a charter of peace. There is not a person in this room today who does not fervently hope for its success. And I know that many of us wish we could contribute more to that goal.

Personally I think that all of us have a contribution to make and we should unhesitatingly make it. The San Francisco charter when completed will be only as strong as the public respect which it commands. The delegates may arrive at a perfect peace structure, but I doubt it. There will be flaws and weaknesses. That is where we come in, we the public. We should not expect perfection.

I am a firm believer in public opinion. Examined over any reasonable period of time public opinion is wise opinion. But its wisdom is in direct ratio to the wisdom of the people who contribute to it.

The most hopeful sign on the horizon is the increasing interest that Americans from coast to coast are taking in foreign affairs. We have truly come of age. We have taken our place in the family of nations. There is scarcely an American left who does not fully comprehend that the wonders of modern transportation and communication have shrunk the oceans to mere rivers in terms of distance. We lunch in Milwaukee today and eat breakfast in London tomorrow. We pick up a phone and talk to Melbourne in a few minutes. The word "neighbor" has taken on vast new meanings.

Let no one mistake me; I do not hold that we are losing our national identity, that we are giving up this very Americanism which we are discussing today. Far from it. But we have assumed a new role and we must fully recognize that fact. We must learn to weigh our duties as citizens of the world much as we weigh our allegiance to political parties. I am a Democrat, but first I am an American. We must be citizens of the world—that is imperative. But first we must be Americans.

It will likely become clear at San Francisco that the peace for years to come may depend on American decision. What can we as plain citizens do?

First, we must realize that old divisions of opinion among us have all but disappeared. I say it is time to eliminate the words "isolationist," "interventionist," "nationalists," and "internationalist" from our vocabularies. I am not sure that anybody knows what they mean. And if anyone does know what they mean, I am not sure that anyone is sufficiently wise to place you, or to place me, in such categories.

It is easy to unite in war. When survival is the common thought of all of us, we are one, whether we speak of nations or of individuals. But the making of peace is far more difficult. The fear of tomorrow drives men and nations to unwise decisions. The history of their shortsightedness at the peace table is the history of succeeding wars.

What we need today, and will need in the months to come, is wisdom, not extravagance of thought. Extremists—those who would sacrifice America to some global superstate, or those who would sacrifice the future peace of the world on the altar of blind patriotism—should be ignored. They are not wise counselors; they are special pleaders who have lost sight of the common good. They shout the loudest but they do not always say the most.

There is an uncommon amount of common sense in America and we should not hesitate to tap it. Wisdom is the product of straight thinking applied to knowledge. Our job is to keep informed and clear-headed. While the extremists wring their hands because they are not getting what they want, and I can assure you they won't get it, the American people could perform no greater service than to maintain a reasoned judgment. Out of such thinking will come the curatives necessary to make the San Francisco charter a workable document.

The test of our Americanism in the interim is going to be twofold. First, we must realize that until the last Jap is driven from his cave of fanaticism, we on the home front cannot relax for a single minute. Second, we must simultaneously prepare ourselves for a return to a peacetime economy. Nor can we relax on that job for a minute.

You and I know that when our servicemen return they will be in no mood to accept excuses. They will have seen totalitarianism at its worst; they will want to find Americanism at its best. Yes, they are going to want jobs and we shall provide them, but there is something dearer to the American serviceman. That is America itself, as he knew it and as he left it. In securing the first we must, therefore, not compromise the second. We must stay within the framework of democracy and its basic principles of liberty, justice and equality for all. They are the cornerstones of America, and we can choose no better cornerstones for the peace, both at home and abroad.

[From the Boston Sunday Post of April 22, 1945]

A TIMELY WARNING

The speech of former Postmaster General James A. Farley in Milwaukee declaring that wartime controls over civilian life must be relaxed fully and quickly at the war's end gives a warning that should reach every true American. He points to the great measure of freedom willingly given up to carry on a successful war, but also declares we want that freedom back and intend to have them. Totalitarian methods, he admits, have been necessary to reach full victory, but declares Congress must see that the old-time democratic processes are restored at the earliest possible moment.

[From the Hartford Courant of April 21, 1945]

WHAT AMERICANISM IS

In these days of much loose thinking, political, economic, sociological, and otherwise, it is refreshing to read the down-to-earth address that James A. Farley delivered before the Milwaukee Junior Chamber of Commerce last Thursday evening. His theme was Americanism, and he ventered to assert that having traveled the length and breadth of this country scores of times and having made the acquaintance of hundreds of people in all walks of life in every State, he felt himself fully qualified to speak with some authority on the subject.

Many have undertaken to define Americanism; in fact, Mr. Farley said it would be his guess that since there are approximately 130,000,000 Americans there would be about 130,000,000 definitions of the term. But even so, he thought that one word would be common to all these definitions, namely, "freedom." That word he described as the "underlying force, the inner power, the very life of America—something that we cherish far more than most of us realize."

And this freedom, whence does it spring? Mr. Farley had no hesitation in saying that it springs from our form of government, which is dedicated to the development of freedom "with a maximum of hampering laws and a maximum of individual spritual strength."

We may be a young people in point of time, but actually our Government, established under the Federal Constitution 158 years ago, has existed longer, unshaken in its foundations than has any government of any other modern people. We may think of the Government of Great Britain as being very much older, but we are prone to forget that it was virtually reconstituted by the Reform Bill of 1832. All the governments of Europe have suffered violent change since that date, and today not a few of them are practically nonexistent. It is the spirit of freedom upon which our forefathers built the American structure of government that has given it the strength to meet every situation.

As we near total victory in the world-wide conflict that now engages us, Mr. Farley warned that straight thinking on the home front is needed more than ever. He did not have to remind us that for nearly 4 years we have been living under a wartime government almost totalitarian in its pattern, a government that has necesarily made encroachments on our democratic way of life. We have accepted these encroachments for the single purpose of achieving victory. But since the authoritarian hand of Government has worked so well in waging war, there are those among us, and not an inconsiderable number, who think it should be employed to promote prosperity and peace.

Noting this, Mr. Farley recalled what President Wilson said in his message to the Congress just a few weeks after the end of the last war, at which time a similar argument was made on behalf of the Government's exercising a continued control over the economic life of the country.

"Our people do not want to be coached and led," said Woodrow Wilson. "They know their own busines, are quick and resourceful at every readjustment, definite in purpose and self-reliant in action. Any leading strings we might seek to put them in would speedily become hopelessly entangled because they would pay no attention to them and go their own way. All that we can do as their legislative and executive servants is to mediate the process of change here, there, and everywhere as we may. * * * But from no quarter have I seen any general scheme of 'reconstruction' emerge which I thought if likely we could force our spirited businessmen and self-reliant laborers to accept with due pliance and obedience."

Subscribing fully as he does to that philosophy based on an understanding of the principles of American freedom, Mr. Farley said that those who desire a continuance of authoritarian government in time of peace because it worked so well in war "are only putting the cart before the horse; in fact, they are urging that we do without the horse altogether." Let all such remember, he added, that it has been "our freedom in peace that has been our strength in war." Let them recall that we are fighting this war only to preserve freedom, and "We should let no one forget for a minute that we want those freedoms back and intend to have them."

Mr. Farley did not mean to imply that every wartime control should be instantly dropped when the last gun is fired; our economic system has been too greatly dislocated for that. He only meant that "relaxation of controls should be rapid and clean cut in order that we may stay within the framework of democracy and the basic principles of liberty."

International Office for Education

EXTENSION OF REMARKS

OF

HON. AUGUSTUS W. BENNET

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. BENNET of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letters:

NOVEMBER 18, 1944.

The Honorable CORDELL HULL,
Secretary of State, Washington, D. C.

MY DEAR MR. SECRETARY: I want to take this means of conveying to the State Department our support of official efforts to bring about the establishment of an International Office for Education.

We have long been impressed with the need for the advancement of world-wide education. We believe that to be an important, even a basic, element of a sound program for the maintenance of peace. Because we are pledged to support of the development of a satisfactory international machinery for the peaceful settlement of differences and for resistance to aggression, we are concerned that forces—such as education—basic to the maintenance of international harmony and understanding be given official responsibility for the advancement of education on all levels and for the cultivation of an understanding among peoples as indispensable to the world security in which our Nation has so vital an interest.

We have been supporting the efforts of the State Department in its encouragement of a policy of international cooperation for educational reconstruction. We welcomed the statement of policy issued by the Department on March 31, and were gratified at the naming of a commission headed by Congressman J. W. FULBRIGHT to participate with others of the United Nations in a conference on the subject of educational reconstruction. At the same time, we wish to record our concern that such action towards international cooperation for education be not limited to the tasks of reconstruction and rehabilitation only. Those efforts have their proper place; but they can at best lead to a return to a condition which was not adequate to develop the educational forces and relationships which can contribute to a basic desire for world peace.

We, therefore, wish to inform you of our earnest interest that the State Department assume leadership in extending the range of consultations by the United Nations in the field of education beyond problems of reconstruction and into the establishment of a permanent international office for education.

As an organized group of American farmers we have been deeply impressed with the constant correlation throughout the world between higher economic standards and a more highly developed level of educational opportunity. The American farmer is per-

suaded that as educational development extends in all parts of the world, standards of living, the purchase of goods, the consumption of the products of farm and factory increase. The interest of the American farmers is therefore closely linked with the development of higher educational levels throughout the world. Moreover, our national interest is sustained by any and every action which tends to increase understanding among peoples and further their harmonious and peaceful relationships.

We, therefore, submit this to you, Mr. Secretary, as an expression of the views of this organization representative of a large section of the farm element of our country. We record our support of the proposal for the early establishment of an international office for education.

We shall appreciate hearing from you, and will especially appreciate being kept informed as to any actions undertaken by our Government.

Respectfully yours,

JAMES G. PATTON,
President, National Farmers Union.

DEPARTMENT OF STATE,
Washington, December 18, 1944.

MY DEAR MR. PATTON: I am happy to acknowledge your letter of November 18, 1944, to Mr. Hull presenting the reaction of the National Farmers Union concerning participation by this Government in international activities in the educational and cultural field.

It is reassuring to have this expression of approval and support of the Department's actions to date. I am particularly interested in the emphasis you placed in your communication on the great significance of education in the development of the understandings and attitudes requisite for peaceful cooperation among nations. You are doubtless already familiar with the plan of international organization developed at the Dumbarton Oaks Conference and the provision made for dealing with economic, social, and other humanitarian problems, under the Economic and Social Council. In addition, provision has been made for the establishment of cooperative relationships with the various specialized organizations. You will note on the enclosed chart, recently issued by the Department, that an educational and cultural organization has been suggested.

The Department is already working in cooperation with other governments in its consideration of the desirable nature of international organization in the educational and cultural field. Hence, your communication is very timely and I appreciate having this expression of the thinking of your organization.

Sincerely yours,

For the Secretary of State:

BRYN J. HOVDE,
Chief, Division of Cultural Cooperation.

Proposal To End Wars

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. KOPPLEMANN. Mr. Speaker, under unanimous consent to insert in the RECORD my address at the Dumbarton Oaks rally, Bushnell Memorial, Hartford, Conn., on April 29, 1945, I offer the following in which I state my reasons for the inclusion of specific powers to our representatives at the World Security Organization, and authority to jointly use our armed forces or any part of them to stop a threat of war or an aggressor without the necessity of waiting for a vote of the Congress. This authority shall be given as contained in my bill, House Joint Resolution 131:

Between August 14 and October 7, 1944, an historic event occurred at the Dumbarton Oaks mansion in Washington. The experts of the United States, Britain, Russia, and China, were there The failure of the old League to provide peace was on their minds. They resolved to form an international organization, ready to use force. A plan was drawn up which is now before the San Francisco Conference.

Briefly, the structure of this organization would provide: A general assembly of all nations; a security council of 11 which would have the primary responsibility to keep the peace, by imposing economic and military sanctions; an international court of justice to settle disputes; a military staff committee consisting of the Chiefs of Staff of the Big Five; international armed force contingents to be held on call for each member for joint action against an aggressor and an international air force.

It requires no great amount of analysis to realize that the future success of such an organization lies in its ability to prevent an aggressor nation from resorting to war, either by use of economic sanctions or of armed force. It is in the latter vital aspect that the new organization will differ so radically from the League of Nations. That League had neither an armed force nor a military staff committee, and it was therefore powerless to enforce its decisions completely. The new organization provides means of supplying certain types and quantities of armed forces to back up the decisions of the security council with a military staff to utilize these resources.

However, the success of the use of the military will depend entirely upon the speed with which it may be put into action against an aggressor nation, or one which threatens peace. In this technological age, speed is the vital factor at a time when aggressor nations have learned to strike swiftly, treacherously, and without warning to their victims. France, Holland, Belgium, and Norway were taken with a swiftness that left us stunned. Unless the armed might of an international organization can be instantly mobilized against an aggressor, preventing war would be completely nullified. Unless this is provided for, I say to you that the difference between the old League of Nations and Dumbarton Oaks is the difference between tweedle-dee and tweedle-dum.

It is with this basic though in mind that on March 19, 1945, I introduced into the Congress of the United States a bill known as House Joint Resolution 131. It provides in substance:

That the representatives of the United States on the council of whatever international security organization is established during or after this war, shall have authority, after such consultation with the President, the Secretary of State, the chairman of the Committee on Foreign Relations of the Senate and of the House of Representatives, as may be practicable under the circumstances, to pledge the use of the armed forces of the United States, or any part of such forces as shall be required, to enforce jointly the decisions of the international security organization, relative to the prevention or suppression of threats to the peace or breaches of the peace between nations. This shall be implemented immediately by the proper authorities. This resolution shall not be regarded as in any way abrogating or altering the constitutional right of the Congress of the United States to declare war.

Note that under this bill, the United States acts only in conjunction with the armed forces of other nations, and not by itself. Of course this implies that all other representatives on the security council shall have powers similar to those of our representatives.

I have the statements of such students of world affairs as Sumner Welles, Francis Sayre, Raymond Swing, Max Lerner, Richard Eaton, and many other outstanding men and women as well as organizations, enthusiastically endorsing the principles of this bill.

You will note that this bill provides for consultation. But it does eliminate the interminable delays and endless debates which would result from reference to the Congress of the United States for approval. While Rome burns, the aggressor nation could be devastating its victim before the Congress would vote.

The failure of the League of Nations because of its inability to act quickly and effectively to put down any threat to peace stands clearly before us and is recognized by every thinking person. The failure of economic sanctions to prevent war is only too tragically illustrated by the events of the past 15 years. These failures of the past strongly emphasize the need for prompt use of force to prevent war. When we stop the aggressor, we stop the threat of war; and if the aggressor knows that there exists an effective mechanism for dealing with him, he will be deterred. In other words, a well-organized international police force will act as a preventative of war, just as the existence of a strong police force is the best method of preventing crime.

I am firmly convinced that the mere existence of such a police force with the power to act immediately would discourage war. We all know and have been repeatedly informed by officials for law enforcement that compulsion is necessary to support all types of legislation. This is not due to the fact that people in general break the law but rather because there is always a certain percentage of the population which will disobey regulations if it can. There are also nations who will always be aggressive and will try to oppress other peoples until an effective method of dealing with them is evolved.

The overwhelming majority of the American people recognize the fact that agreements and laws between nations must be backed up by force. You must unite in throwing your weight and support behind these proposals lest world security organization be sabotaged.

If we do not have this provision for using force quickly, then the entire world organization becomes impotent and the world security council without this provision would be a delusion to those who expect an end of wars. And so I say to you, it would be better to abandon all consideration of any type of international organization, if this proposal is not accepted.

Already there are forces working in opposition to an international organization. I hold here a copy of Gerald L. K. Smith's publication of April 1945, in which he devotes the most important part of that issue to an attack on Dumbarton Oaks. He quotes Senator BUSHFIELD, of South Dakota, in opposition to the principles of my bill, who threatens to introduce a measure in the United States Senate specifically prohibiting such authority to our representative. Over his statement, Gerald Smith waxes enthusiastic. As is to be expected, the opposition consists of the crackpots and isolationists who constitute such a vociferous minority.

If the world organization fails to include a provision for the quick use of force, then the United States will be compelled to do it on its own for our security. But if we do, then the other nations of the world will start

such preparations for war as have never been dreamed of. There will be one unified control at a nominal cost or a multitude of individual nation controls at a staggering cost to us and to the world.

I bring you what may have been one of the last messages ever delivered by our late beloved President Roosevelt on this subject. Shortly after introducing this bill, I contacted the White House to discuss the bill with President Roosevelt. The next day Mr. Hassett, secretary to the President, informed me that the President was leaving for Warm Springs, but asked me to keep this in confidence. Then he said: "Go ahead with your bill. Interest the people in it—the more discussion, the better."

The grave importance of such a provision was vividly and realistically understood by our late President. In a speech before the Foreign Policy Association in New York City on October 21, 1944, he voiced his concept of the procedure by which the United States should share in the decisions of the International Security Council as follows:

"Peace, like war, can succeed only where there is a will to enforce it, and when there is available power to enforce it.

"The Council of the United Nations must have the power to act quickly and decisively to keep the peace, by force, if necessary. A policeman would not be a very effective policeman if, when he saw a felon break into a house, he had to go to the town hall and call a town meeting to issue a warrant before the felon could be arrested.

"If we do not catch the international felon when we have our hands on him, if we let him get away with his loot because the town council has not passed an ordinance authorizing his arrest, then we are not doing our share to prevent another world war. The people of the Nation want their Government to act, and not merely to talk, whenever and wherever there is a threat to world peace."

What Do We Learn From the Pictures of Nazi Camps?

EXTENSION OF REMARKS

OF

HON. HELEN GAHAGAN DOUGLAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mrs. DOUGLAS of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Washington Daily News of April 30, 1945:

WHAT DO WE LEARN FROM THE PICTURES OF NAZI CAMPS?

(By Eleanor Roosevelt)

NEW YORK, Sunday.—Representative MARY NORTON, of New Jersey, is making a magnificent fight for the passage of the fair employment practices bill. This bill would give us a permanent group in the Government whose function it would be to see that, as far as employment goes throughout this country, there is complete equality of opportunity and treatment for all.

Many people have come to think of this bill as being of value only to certain minority groups. I think it is important for the public in general to understand clearly that the bill, while it may be of value to these groups, is equally vital to each and every one of us who are citizens of the United States. If we do not see that equal opportunity, equal justice, and equal treatment are meted out to every citizen, the very basis on which this country can hope to survive with liberty and justice for all will be wiped away.

Are we learning nothing from the horrible pictures of the concentration camps which have been appearing in our papers day after day? Are our memories so short that we do not recall how in Germany this unparalleled barbarism started by discrimination directed against the Jewish people? It has ended in brutality and cruelty meted out to all people, even to our boys who have been taken prisoners. This bestiality could not exist if the Germans had not allowed themselves to believe in a master race which could do anything it wished to all other human beings not of their particular racial strain.

There is nothing, given certain kinds of leadership, which could prevent our falling a prey to this same kind of insanity, much as it shocks us now. The idea of superiority of one race over another must not continue within our own country, nor must it grow up in our dealings with the rest of the world. It is self-evident that there are people in certain parts of the world who, because of different opportunities and environment, have not progressed as far as other people in what we call civilization. That does not mean, however, that they will forever be inferior in our type of civilization. Given the same kind of opportunities, they may do better than we have done.

Looking at the war-torn world of today, we cannot say that our civilization has been perfect. We can only say that we have created greater material comfort for human beings and that we are struggling to find a way of living together peacefully and cooperatively in the future.

That is a great step forward, and we are taking it internationally; but we must also take it within our own borders. We cannot complain that the Germans starved and maltreated our boys if we at home do not take every step—both through our Government and as individuals—to see not only that fairness exists in all employment practices, but that throughout our Nation all people are equal citizens. Where the theory of a master race is accepted, there is danger to all progress in civilization.

Help Them Now

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. LANE. Mr. Speaker, under leave to include my remarks in the CONGRESSIONAL RECORD, I wish to insert the following editorial from the April 30, 1945, edition of the Boston (Mass.) Daily Record:

HELP THEM NOW!

The Jewish people of Europe, or such of them as have survived the long ordeal of persecution, torture, and slaughter conducted by Nazi Germany in Central Europe, are now in the last act of their tragic experience, as the challenging letter printed in this column asserts.

The challenge now confronting the civilized world, writes Mr. Johan J. Smertenko, executive vice chairman of the Emergency Committee to Save the Jewish People of Europe, is "to save the surviving Hebrews in Europe from the last mad act of the Germans."

There has been a program of alleviative action, drawn up by the committee and representing the definite and practical things which can still be done in behalf of these unhappy people, before the Congress in Washington for many weeks.

There have been many expressions of sympathy for their cause, and of approval of the proposed program.

But there has not been any action.

And the precious little time remaining is running out.

Something should surely be done, as Mr. Smertenko writes in obvious desperation, to "stimulate sufficient sentiment to produce action in Washington."

Plainly, the American people must provide that stimulation.

The American people have recently become acutely conscious of the bestial practices indulged in the concentration camps of Central Europe.

The Jews of Europe have been the principal victims of this bestiality.

Millions of them have died, and the pitiful few of them remaining are dying.

Why are the things left undone which might save these few?

Every minute of delay spells the doom of more of them.

They expect no mercy from their Nazi tormentors, and will receive none.

But they do expect the civilized peoples of the world, particularly the sympathetic and tolerant and humane American people, to follow their merciful instincts in their behalf down to the last fatal minute of this tragic time.

The lateness of the time must not stay the hands of mercy in this challenging cause.

The grave difficulty of the task, or even its seeming futility, must not prevent the making of a supreme effort to salvage the little that remains of oppressed European Jewry.

Let us not abandon these people to their doom.

Whatever we can do, even the little that seems to remain in our power to do, should be done now in order that the Jewish people of Europe who have suffered so much and so far survived so much will not be utterly destroyed in "the last mad act" which now confronts them.

If Congress needs stimulation for this, let the American people provide it—and be urged on by the solemn warning of Mr. Smertenko that "the greatest danger at this time lies in delay."

WASHINGTON, D. C.

Mr. WILLIAM RANDOLPH HEARST,
McCloud, Calif.

MY DEAR MR. HEARST: I am enclosing copies of letters sent by the Hebrew Committee of National Liberation and the Emergency Committee to Save the Jewish People of Europe to the President and to Secretary Stettinius, respectively. These constitute part of our effort to save the surviving Hebrews in Europe from the last mad act of the Germans.

Every effort has also been extended to Congress. Senator CLAUDE PEPPER, of Florida, has just informed me that within the next few days he will introduce a resolution recommending an official statement on the part of our Government in accordance with the statement outlined to the President by Mr. Bergson. A similar resolution will be introduced in the House.

You have been so sympathetic and helpful in the past that I take the liberty of communicating these facts to you now in the hope that you will support these moves by an expression of editorial opinion. My colleagues and I are certain that in calling this situation to the attention of the American public you will stimulate sufficient sentiment to produce action in Washington. We trust that you will be able to do so as soon as possible for the greatest danger at this time lies in delay.

Sincerely yours,

JOHAN J. SMERTENKO,
Executive Vice Chairman, Emergency Committee to Save the Jewish People of Europe.

Missouri Valley Authority

EXTENSION OF REMARKS

OF

HON. H. CARL ANDERSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. H. CARL ANDERSEN. Mr. Speaker, the Minnesota Farm Bureau Federation, through a resolution adopted by its board of directors on April 24, after due and deliberate consideration, express their opposition to the proposal for a Missouri Valley Authority.

In asking for the defeat of this proposal, the Minnesota Farm Bureau Federation advances four reasons for such defeat. The resolution is as follows:

Whereas the Congress of the United States has passed the Flood Control Act of 1944 (Public Law 534, 78th Cong.) which authorizes improvements for the control of flood waters, for the benefit of navigation, irrigation, and for other purposes, within the Missouri River Basin in accordance with the joint recommendations of the United States Army Engineer Corps and the Bureau of Reclamation; and

Whereas the provisions of this law, unquestionably, are adequate for the proper development of flood control, irrigation, and other matters of public welfare; and

Whereas there have been introduced in the United States Congress two bills (S. 555 and H. R. 1824) that would create a Federal authority having the power to control the social and economic welfare of the people within the Missouri River Basin, and to provide for water control, development of resources and other purposes, under what is known as the proposal for a Missouri Valley Authority: Now, therefore, be it

Resolved, That the Minnesota Farm Bureau Federation oppose the proposal for a Missouri Valley Authority now being considered in Congress, and other similar proposals, because such proposal would:

(a) Create a Federal corporation clothed with unprecedented powers freed of all the legal restraints which experience has demonstrated are necessary and desirable;

(b) Make the States within the Missouri River Basin subservient to a superstate so far as the control and development of the water resources of the Missouri River Basin are concerned;

(c) Stifle agricultural development, industrial growth, and individual enterprise as the proposed Federal corporation would control basic economic resources;

(d) Establish a precedent for the creation of a similar authority in the Mississippi River Basin, which would be detrimental to the best interests of the State of Minnesota and the Nation at large; be it further

Resolved, That the Minnesota Farm Bureau Federation respectfully and sincerely urge the Congress of the United States to defeat said Missouri Valley Authority proposal, and similar proposals; and be it further

Resolved, That a copy of this resolution be transmitted to the President of the United States Senate, to the Speaker of the House of Representatives and to each of the Members of Congress from Minnesota.

What Is Your Answer?

REMARKS

OF

HON. REID F. MURRAY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. MURRAY of Wisconsin. Mr. Speaker, in an effort to obtain the facts and not desiring to be influenced by so much fiction I asked for the information as to the relationship between the 90 percent parity floor, price of agricultural products and the price of imported agricultural products plus the duties as provided in H. R. 2652. I ask unanimous consent to include this table at this time.

The table referred to by the gentleman from Wisconsin is as follows:

Agricultural prices: Actual and parity for January 1945 for selected commodities and indicated parities under pending bills compared with foreign prices and United States import duties

Commodity	Unit	Parity prices			Actual prices			Import duty rate	
					United States		Foreign [1]		
		Present formula	Pace bill, H. R. 754	Thomas bill, S. 507	Farm	Market [2]	Market	Present [3]	H. R. 2652 [4]
*Wheat	Bushel	$1.52	$1.99	$1.84	$1.46	$1.63	$1.02	[5] $0.42	$0.21
*Corn	Bushel	1.10	1.44	1.24	1.07	1.15	.63	.25	.12½
*Oats	Bushel	.69	.90	.66	.72	.73	.30	.08	.04
*Barley	Bushel	1.06	1.39	.96	1.02	1.11	.40	.15	.07½
*Rye	Bushel	1.24	1.62	1.32	1.09	1.23	.60	.12	.05
*Flaxseed	Bushel	2.91	3.80	3.25	2.91	3.12	1.57	.32½	.16¼
Rice (rough)	Bushel	1.40	1.83	1.75	1.75		1.60	.56	.28
Soybeans	Bushel	[6] 1.65	[6] 2.16	3.03	2.03	2.19		1.20	.60
Beans	Hundredweight	5.80	7.58	8.02	6.23	6.85	4.25	3.00	1.50
*Cotton	Pound	.21	.28	.30	.20	.22	.14	[7] .03½	.01¼
Cottonseed	Ton	38.80	50.70	50.30	52.88			6.67	3.33⅓
*Peanuts	Pound	.08	.11	.08	.08	.14	.04	.04¼	.02⅛
*Hay	Ton	20.40	26.70	18.80	17.10	45.00	16.36	2.50	1.25
*Potatoes	Bushel	1.25	1.56	1.56	1.58	1.80	1.25	[8] .37½	.18¼
Sweetpotatoes	Bushel	1.51	1.98	1.86	1.90	2.50		[9] 50%	[9] 25%
*Apples	Bushel	1.65	2.16	2.03	2.46	3.32	2.25	.15	.07½
*Oranges, on tree	Box	[6] 2.03	3.18	3.18	1.98	4.74	.90	.70	.35
*Grapefruit, on tree	Box	[6] .91	1.74	1.74	1.35	3.75	3.20	.48	.24
*Hogs	Hundredweight	12.50	16.40	13.60	13.80	14.66	11.90	1.00	.50
*Beef cattle	Hundredweight	9.32	12.20	9.98	11.70	14.71	11.00	[5] 1.50	.75
*Veal calves	Hundredweight	11.60	15.20	12.30	13.20	15.00	13.00	1.50	.75
*Lambs	Hundredweight	10.10	13.20	15.50	13.00	15.18	12.60	[10] 1.50	.75
Butterfat	Pound	[11] .47	[11] .57	[11] .59	.51	.42	.35	.14	.07
*Milk, wholesale	Hundredweight	[11] 2.91	[11] 3.40	[11] 3.32	3.25	3.70	2.25	[5] .38	.19
*Chickens (live)	Pound	.20	.26	.29	.24	.28	.24	.04	.02
*Eggs	Dozen	[11] .48	[11] .48	[11] .46	.41	.44	.35	.05	.02½
*Wool	Pound	.32	.41	.47	.40	.47	.19	[12] .13	.06½
Tobacco:									
Flue-cured	Pound	.33	.45	.33	.45		.30	.30	.15
Burley	Pound	.32	.44	.31	.45		.23	.30	.15
Fire-cured	Pound	.15	.19	.19	.24		.16	.30	.15

* Commodities on an import price basis, i. e., United States price exceeds foreign price plus duty.

[1] Prices in country of origin—mostly Canada, Argentina, or Brazil.

[2] Representative commercial markets.

[3] Specific rates adjusted to unit shown when not expressed in the same unit, unless otherwise indicated.

NOTE.—Cuba has preferential rate of 20 percent. This is not shown except for grapefruit.

[4] Possible rate is 50 percent of current rate.

[5] Quantitative import quotas are in effect for part or all of the import classification.

[6] Comparable price.

[7] Basic rate is 7 cents. The reduced trade agreement rate applies to cotton 1⅛-inch staple and longer from Egypt and Peru.

[8] White or Irish potatoes entered during the period Mar. 1 to Nov. 30—full duty 75 cents.

[9] Ad valorem rate.

[10] Per head.

[11] Adjusted for seasonal variation.

[12] In the grease, 16 cents scoured.

EXPLANATORY NOTE

This table combines 3 sets of data: (1) The farm parity price position for selected agricultural products as computed under the present formula and as indicated under H. R. 754 and S. 507; (2) actual prices as reported on farms and in specified markets in the United States compared with market prices (converted to United States money) in foreign countries of surplus and (3) the United States import duty rate currently in force and the possible rate under H. R. 2652.

It will be noted that practically all of the prices, either current or under the proposed parity legislation, exceed the prices of similar products in foreign countries by more than the amount of the prevailing import duty. Commodities on such an indicated import price basis are marked with an asterisk.

After studying the table, will you not agree that it will be possible to scuttle the whole domestic agricultural program if H. R. 2652 is passed?

If 90 percent parity guaranteed price for wool during the war and 2 years after the war is 90 percent of 32 cents, or 28.8 cents per pound, and the world price is 19 cents per pound, and the duty is 6½ cents per pound, or a total of 25.5 cents per pound, just how many warehouses will be needed to store the imports of wool?

If 90 percent of parity for rye is 90 percent of $1.24, or $1.11 per bushel, for 2 years after the war, how many elevators will it take to store the imported rye that has a foreign price of 60 cents per bushel and pays a duty of 6 cents per bushel?

If, as in 1939, over 6,000,000 pounds of Cheddar cheese were imported when the United States price of Cheddar cheese was only 12 cents per pound and the duty was 4 cents per pound, just exactly how many millions of pounds of Cheddar cheese do you think would be imported if there was a 20-cent-per-pound guaranteed floor price and the duty was reduced to 2 cents per pound? If, as in 1939 when the United States produced 42,000,000 pounds of Swiss cheese that brought 17 cents per pound, over 10,000,000 pounds of the Swiss cheese was imported and paid a duty of 5 cents per pound, just exactly how many millions of pounds of this Swiss cheese would be imported if he had a 90-percent parity guaranteed floor price of at least 22 cents per pound and a duty of only 2½ cents per pound?

If, as in 1939, we imported $526,000,000 worth of competitive agricultural products, when many of our farm prices were 45 to 60 percent of parity, how many millions or billions of dollars' worth will be imported if we have a 90-percent parity floor price supposed to be the low during the war and 2 years after the war?

I have still to meet anyone anywhere that can use facts to show where the foreign agricultural program of the present administration has been beneficial to the agriculture of the Nation.

The administration in seeking the passage of H. R. 2652 wishes to allow a doubling of the inequalities of the present tariff ratio, and, I might add, to also double the gross injustices and inequities of the present tariff set-up.

O. D. T. Travel Order Restricting Religious Gatherings

EXTENSION OF REMARKS

OF

HON. EDWIN ARTHUR HALL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. EDWIN ARTHUR HALL. Mr. Speaker, not long ago I received a letter from a Johnson City clergyman. Now this is nothing unusual because ministers, priests, and rabbis are continually writing me seeking help for families in their parishes and congregations and especially for servicemen they attended before they went away to fight. Then, too, they often write me to express themselves about current affairs.

So it is quite ordinary for the good churchmen from my district to write me. Let me say further that I am glad to have their confidence and to hear from them as often as they see fit to write me.

But the particular letter I had in mind was one the contents of which shocked me as much as the clergyman who wrote it.

He pointed out that he and several of his colleagues had appealed to the Office of Defense Transportation in Washington recently and asked the Director of O. D. T. not to place a ban on religious gatherings and not to force persons who wish to attend such gatherings to obtain permission to travel from O. D. T.

The clergyman continued and I quote from his letter:

We are doing our bit to promote the war effort, and we are willing to do whatever we believe it necessary. However, we know it is unconstitutional and contrary to the spirit of America, for the state to attempt to arbitrarily regulate the religious life of our country. I am joining the hosts of others across this country who will shortly arise to protest this attempt to break down the separation between the church and state.

I continue reading his letter:

I am in receipt of a letter from the recording secretary of the American Council of Christian Churches. In this letter he writes: "We called on the Director of O. D. T. and pleaded with him not to attempt to restrict religion, and to exempt the church from such restrictions. We had quite a stormy session because we stood our ground. We finally told him that if he insisted or attempted to curb the church, we would resist and hold our meetings anyway. You can imagine how he reacted. He hit the ceiling."

Further on in the secretary's letter he writes this word: "The O. D. T. does not want its orders discussed in Congress. They realize that once Congressmen are aware as to what is involved that Congress will compel them to rescind such un-American orders."

The Johnson City churchman concludes his letter to me with the following:

Now because I know of your fearlessness (and I thank him for that) I should like to request that you take this matter up with your congressional colleagues and that something be done about it. I feel certain that if the democratic process of requesting the churches to hold their meetings to a minimum, in the light of the present emergency be followed, there will not be a religious group in this country but will be happy to respond as best they can.

However, when a bureaucrat seeks to pronounce what the church shall do in this country, where the separation of church and state has always been safeguarded by the Constitution, it will be an unnecessary promotion of strife and division, should this order be allowed to stand.

In response to this most reasonable plea of the clergyman, I have introduced in the House the resolution which I now read:

Concurrent resolution to protect churches and religious groups against the encroachment of the state through bureaucratic decrees

Whereas it is recognized that during wartime there should be little if any curtailment of the gracious influence of our churches and religious institutions; and

Whereas it is recognized that conventions and gatherings of churches and religious groups extend their benevolent work and greatly increase morale of all our people in these dark hours; and

Whereas this Nation cannot afford any cessation or lessening of the glorious work by the spiritual sources which instill religion and strong faith in God in the hearts of our people; and

Whereas the Office of Defense Transportation has recently refused to spare any church, synagogue, or religious body from its drastic order banning travel to public gatherings and conventions of more than 50 people; and

Whereas such an attempt to restrict religion on the part of a Government agency is utterly unconstitutional and positively contrary to the spirit of free America: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That it is the desire and the will of the Congress of the United States that conventions and gatherings of a religious nature should not be included in the order of the Director of the Office of Defense Transportation which prohibits travel to conventions of more than 50 persons; and be it further

Resolved, That the House of Representatives and the Senate condemn the action of the Director of the Office of Defense Transportation in including churches and religious groups in this order.

Quantitative Import Quotas of Agricultural Products

EXTENSION OF REMARKS

OF

HON. JOHN W. FLANNAGAN, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. FLANNAGAN. Mr. Speaker, I intended to insert the same table in the RECORD that has just been inserted by the gentleman from Wisconsin [Mr. MURRAY]. I also intended to insert a statement showing the present quantitative quotas in effect. These quotas are as follows:

Quantitative import quotas now in force are as follows:

Wheat: Eight hundred thousand bushels plus 4,000,000 pounds of flour, which is equivalent to 94,000 bushels, or 20,408 barrels.

Cotton: Three-fourths- to 1⅛-inch staple length, 14,516,882 pounds, which is equivalent to 30,370 bales; 1⅛ but less than 1 11/16 inches, 45,656,420 pounds, which is equivalent to 95,516 bales—478 pounds to bale.

Cattle: Less than 200 pounds, 100,000 head; over 700 pounds, not more than 60,000 head during any one quarter, or 225,000 head during year.

Potatoes: One million bushels per year beginning September 1, except when do-

mestic production falls under 350,000,000 bushels per year, quota increased.

Milk: Three million gallons of whole milk annually.

Distribution of Dental Students

EXTENSION OF REMARKS

OF

HON. ALEXANDER J. RESA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. RESA. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I desire to call attention to a discussion by a leader of the dental profession of one of the many problems involved in the task we must accomplish in order to strengthen and preserve our democracy so that future generations, which will have to pay the cost of saving it, may enjoy its blessings:

DISTRIBUTION OF DENTAL STUDENTS[1]

(By Willard C. Fleming, D.D.S., dean, College of Dentistry, University of California)

"Secretary Horner sat in a corner
Asking wherefore and why.
This subject's a tangle;
It's too hot to handle,
So he will let someone else try."

The Council on Dental Education considers the racial and geographic distribution of dental students of sufficient importance to call it to the attention of the profession. The reason given for considering it important may be found in a statement appearing toward the end of the report: "If the dental profession is to be truly representative of our citizenry as a whole, then it would seem that serious consideration should be given to the growing geographical and racial imbalance already marked in the enrollment in the dental schools."

Before accepting this statement, let us first give serious consideration to these two items in relation to the distribution of dental students:

1. To what extent is it necessary that the dental profession be "representative of the citizenry as a whole"?

2. Is it necessary to the welfare of the dental profession that a strict geographical and racial balance be maintained?

GEOGRAPHIC DISTRIBUTION

Statistically, we have two facts before us. First, that for some reason the residents of certain States have been stimulated and found qualified to study dentistry in greater numbers per population than of other States. In New York, for example, 1 out of every 7,000 citizens is studying dentistry; in California 1 out of 14,000; in Ohio, 1 out of 18,000, etc. Other States show a ratio as low as 1 to 22,000, thus indicating an imbalance between States. The second fact that comes to light in our analysis is that for some reason, 4 out of every 5 students come from metropolitan areas, with only 1 out of 5 from rural districts. It will be agreed that these 2 facts do require consideration.

If an unusual number of residents of New York State have been stimulated and found qualified to study dentistry, we might well ask, "What does New York have that other States have not?" Applying this same thought to the matter of 4 out of 5 dental students coming from metropolitan areas, one wonders what there is about city life that stimulates the young people to think of dentistry as a career. This leads us into a land of speculation with one person's guess as good as another's.

The answer to these two questions might be found in a study of the backgrounds and environment of the majority of dental students. One does not have to sit in on an admissions committee in a dental school very long to realize that the majority of applicants come from much the same social and economic environment. Rarely do we interview students from impoverished families, and even more rarely from families of wealth and social position. The fathers of our students are mechanics, teachers, salesmen, clerks, etc. One can visualize the family discussions revolving around problems of meeting payments on the car, life insurance, savings, and the difficulty in general of keeping up with the Joneses.

The professions offer both economic and social betterment to the children of these families. In dentistry the recent graduate is in a better position than graduates in other professions immediately to pay dividends on the cost of education. This is an important item in the case of families who have had to pinch and save, and even borrow, to launch their son or daughter on the road to attain the things denied the parents.

The differences between the various social and economic levels are more sharply defined in the cities than in the country. This may be the most important point in explaining a preponderance of applicants from the metropolitan areas.

Another item relating to the problem is the appeal of the professions to young people seeking a life free from regimentation, a boss, and the time clock. The desire to be the "captain of my ship" is great in many of us. The young man in a rural environment sees a number of such careers; the farm itself, the small store, the garage offer opportunity. However, in the complicated social structure of the city, professions are about the last stand for the rugged individualist.

Regardless of the reasons why the majority of students come from metropolitan areas, the fact still remains that they do. This, coupled with the results of other surveys showing a serious shortage of dentists in rural districts, leads one to believe that the dental profession should be "representative (geographically) of the citizenry as a whole" in order—

1. To assure sufficient numbers of applicants from which to select students; and

2. To supply adequate dental service to all areas of the country.

It is the responsibility of the dental profession and dental educators to encourage young dentists to practice in these areas, and to stimulate interest in dentistry as a career among young people in the rural districts where the need for increased dental service is apparent.

RACIAL DISTRIBUTION

It is stated in the report that "a large percentage of the students resident in New York and Chicago and their environs are of foreign-born or near foreign-born parentage and are largely restricted to two racial[2] groups."

What has been mentioned before about the professions offering an opportunity to better one's social and economic status would certainly hold true with our foreign-born and children of foreign-born population. However, the matter of the unusual concentration of certain racial groups in the profession is not entirely accounted for with this explanation. One wonders if the groups mentioned are groups who have not been assimilated and find the doors closed, or at least difficult to open, to careers in other fields. In other words, their choice of fields is so limited that they concentrate on the few which are open to them.

The writer will always remember a conversation with a Japanese student who had been notified of his dismissal because of scholastic deficiency. He said, "Denied this opportunity, the only thing left for me to do is to become a gardener."

No evidence has been revealed in this report, and the writer knows of none, which would allow one to assume that a direct ratio should be maintained between the racial groups within the citizenry and the profession, and it is not demonstrable that such a ratio would contribute to the welfare of either.

Regardless of our American tradition, racial discrimination is practiced, but it would seem that the very last place it should occur is in the field of science and the health profession. The only discrimination that can be allowed in the selection of students is that of their qualifications to study and practice dentistry, and this selection must be applied regardless of race or color.

If this racial imbalance in dentistry has resulted from a press of applications and the admission of students incapable of practicing the profession merely because of the need for dental students, then our educational system is in need of a vigorous overhauling. Furthermore, if dentistry is practiced by these groups more as a business than as a profession, and is attracting the business-minded student rather than the professionally inclined student, then the profession is to be indicted.

In brief, the point is made to place the admission of students not on the basis of race or color but on the possession of intelligence, integrity, honesty, willingness to work, interest and digital skill—the qualities and abilities we need in our young students, if they are to be capable of developing as members of our profession. There is no evidence to lead one to believe these qualities are the sole property of one race or group. Lacking these qualities, Dr. Smith on Main Street is just as poor a dentist as Dr. Cohen on Broadway, or Dr. Milovsky, wherever he may be.

[1] Portion of a forum conducted by Harlan H. Horner, Pd. D., LL. D., in the Journal American College of Dentists, December 1944, vol. 11, No. 4. Dr. Horner presented facts and trends relative to the growing geographical and so-called racial imbalance in dental-school enrollments, and asked Deans Willard C. Fleming, William H. Crawford, of Indiana University, and Gerald D. Timmons, of Temple University to join the forum in a discussion of the implications of the facts and trends. Herewith is presented Dean Fleming's discussion. The report mentioned by Dr. Fleming refers to Dr. Horner's statements presented for discussion in this forum, and is not the report submitted to the Committee on Education of the U. S. House of Representatives on September 21, 1944, which received Nationwide publicity last month.

[2] If one of the groups referred to is the Jewish, the word "racial" is inaccurate. It would have been helpful if the "racial" groups had been identified.

International Office of Education

EXTENSION OF REMARKS

OF

HON. JAMES W. TRIMBLE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. TRIMBLE. Mr. Speaker, if a people know the truth, they usually make a

wise decision when called upon. To know the truth they must be able to assimilate facts; to be able to comprehend facts. To be able to comprehend facts they must understand the background, education or lack of education, and emotional reflexes of those producing the facts.

We are either entering into a period of world-wide cooperation with other nations to keep the peace with all our hearts, or we are not going into it. To merely stick our feet into the door of the organization is worse than making no effort at all. If we go in, and I think we must, then I favor going in with a will to make the organization work. To do that we must understand each other, and to understand each other we must have a basis for education. I commend my colleague the gentleman from South Dakota [Mr. MUNDT] for making this wholesome start, and I hope H. R. 215 passes without a dissenting vote.

Whittier Narrows Dam

EXTENSION OF REMARKS

OF

HON. JERRY VOORHIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. VOORHIS of California. Mr. Speaker, one of the outstanding achievements of both the Congress and the Government generally in recent years has been the flood-control program. This program has had my consistent support and I had the honor to serve on the Flood Control Committee for a period of years.

There are, however, various ways in which effective flood control can be achieved and it should be carried out with a view not only of controlling floods, but also of accomplishing this purpose in such a way as to disrupt to the least possible extent the normal functioning of the various communities of our country.

This speech has to do with a feature of the flood-control program in Los Angeles County which, if carried out in accordance with present plans, would do great damage to thriving communities and as to which, therefore, it is my most earnest conviction that there should be an alteration in the plans now projected.

I refer to the proposed construction of the Whittier Narrows Dam on the San Gabriel River in Los Angeles County.

The Whittier Narrows Dam is being vigorously opposed by the citizens of a very wide area centering in the city of El Monte, which is one of the major communities in the congressional district which I represent.

The Whittier Narrows Dam would be a structure approximately 2 miles long, running between two ranges of hills in an approximately east and west direction. It is planned at present to constitute a retarding basin to take care of flood waters of the San Gabriel River after they have passed down from the Santa Fe Dam already virtually complete, about 6 to 8 miles upstream. The Santa Fe Dam is an extremely large structure many miles in length, and constitutes a semicircular arc around the entire discharge cone of the San Gabriel River as it discharges from San Gabriel Canyon in the Sierra Madre Mountains.

It has been vigorously proposed by those in opposition to the Whittier Narrows Dam that with the Santa Fe Dam in operation entirely adequate flood protection from possible floods on the San Gabriel could be afforded by channel improvements—thus eliminating the necessity of constructing Whittier Narrows Dam.

A very considerable area, approximately 3½ miles long and more than 2 miles wide would have to be abandoned if Whittier Narrows Dam is constructed. This area consists of rich farm lands and residential areas and hardly any of it, in contrast to the basin enclosed by the Santa Fe Dam, consists of unproductive or waste lands. On the contrary, the area which would have to be abandoned if Whittier Narrows Dam is constructed is very highly developed, including the homes of thousands of people, improved roads, schools, industrial plants, valuable farm establishments and everything else that goes to make a thriving community. The expense of condemning all this property will be very great indeed. And since it is a dam and reservoir that is involved, that expense will have to be borne by the Federal Government under the law. Furthermore, the development of this area has continued at a very rapid rate since the Corps of Engineers first proposed the construction of Whittier Narrows Dam. At the time it was first proposed the problem of clearing the area was a comparatively simple one to what it would be today, or what it will be after the war when there is any practical possibility of proceeding with this structure.

Within this area there has taken place a tremendous increase in population. Between 1930 and 1940 this general area increased in population by 397 percent, according to official figures. Since 1940 this increase has continued at an accelerated rate. Extensive brand new groups of homes have been built which are presently occupied in large part by persons working in industrial plants in some portion of Los Angeles County.

The plan for Whittier Narrows Dam, which was originally advanced by the Corps of Engineers, would have required the abandonment of approximately 4,700 acres. However, in recent months a revised plan has been advanced which moves the dam farther downstream and will require the abandonment of a smaller area. This change in plan seems to me to be indicative of the fact that the Corps of Engineers itself recognizes the serious problems involved. Under the new plan the area to be abandoned will require the abandonment of some 2,700 acres.

To give some idea of the very rapid increase in population in this general area, I would point out that a somewhat larger section composing the southern portion of the unincorporated section of El Monte increased from 2,298 population in 1930 to 11,443 in 1940. This development has continued at an accelerated rate since 1940 and there is no telling what the population will be by the time it would be possible after the war to actually begin construction.

The major north-south highway in all the eastern portion of Los Angeles County, namely, Rosemead Boulevard, runs almost through the middle of the area to be periodically flooded if the dam is constructed.

Durfee Avenue, another extremely important trunk highway, traverses the section which would have to be abandoned if the dam is constructed for more than a mile.

A plant of the Bodger Seed Co., a large number of highly important dairy plants, and a number of other facilities of similar sort are included in this area. In addition, of course, there are thousands of homes, dozens of miles of improved road and highways—most of it paved—and much other valuable property, all of which will have to be abandoned and presumably compensated for if the Whittier Narrows Dam is built.

In addition to this, there are three school districts which will be seriously affected. All three of these school districts now have so many children attending school that they are compelled to have half the children come one half day and the other half come the other half day in order to accommodate all their enrollment. In the case of one of these schools, namely the Temple School, the school building itself lies in the area to be abandoned and the bulk of the child population now served by that school also lies within that area. In the case of the Potrero School, the dam would cut off about half of the population now served by the school. The Mountain View School and the El Monte Union High School district would be most seriously affected, also.

In all three instances the question arises as to what would be done about the outstanding bonded indebtedness of these school districts. Presumably, the bondholders would still expect to get paid their money, but there would be no possible means of accomplishing this purpose unless the Federal Government were to assume the indebtedness itself, or some similar plan worked out.

EFFECT ON SURROUNDING AREAS

This problem cannot be comprehended if we limit our consideration to the area which will have to be abandoned if the dam is built That area is an integral part of a larger area which centers around the town of El Monte. This area is generally occupied by people in the medium income and low income group. There are comparatively few wealthy people in this area, which is an additional reason why I am deeply concerned about its welfare.

The construction of the dam would have a very serious, if not a devastating effect upon the business life of this whole section, affecting thereby the future prosperity of surrounding communities as well. To mention only one feature of this, the El Monte Union High School plant was completed only a few years ago. It is an excellent plant, serving not only the city of El Monte but all of the area which would be abandoned if the dam is built, as well as other surrounding regions. This whole high-school district

would be up against an insurmountable financial problem if all of the lands to be abandoned under the proposed plan were taken out of its taxing district.

Another problem already serious, but which would be no doubt made worse by the construction of Whittier Narrows Dam is the problem of ground water. In this whole area during the rainy season, the water table sometimes rises so as to fill with water the basements of many of the buildings in this region. Obviously that situation would be aggravated by the construction of Whittier Narrows Dam, whereas it would be relieved by channel improvements in the river.

I shall not attempt to analyze in detail the alternative proposal to the Whittier Narrows Dam. Very briefly, it is to construct channel improvements on the San Gabriel River below the Santa Fe Dam which would be adequate to take care of any flood problem which would reasonably be expected to affect the area.

It has been contended in the past that the cost of such a general improvement program would be $15,000,000 more than the Whittier Narrows Dam program. I have two comments to make upon this contention. The first is that the cost of channel improvements depends in large part upon whether or not care is exercised in making such improvements to leave out of the channel properties of substantial value. I am informed, for example, that there are certain oil properties which either might or might not be included within the confines of an improved San Gabriel River channel. If they were to be included, of course, the cost would be much higher than would be the case otherwise. But I am personally convinced that there is no necessity of including them.

In the second place, whatever the estimates may have been in the past about the cost of the Whittier Narrows Dam program, it would obviously be necessary to revise those estimates sharply upward under present circumstances, due to the increasing value of the property which would have to be abandoned and the continuous increase in the development of the area. Competent engineers very close to the whole flood-control program of Los Angeles County have informed me in recent months that in their judgment there were many new factors involved in the situation which ought to receive a new and detailed study before Whittier Narrows Dam is constructed, if indeed it ever is.

J. G. White Engineering Corporation Report on St. Lawrence Seaway and Power Project

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. PITTENGER. Mr. Speaker, some time ago a report was submitted by the J. G. White Engineering Corporation dealing with the physical resources of the State of Minnesota. This report no doubt has some very excellent ideas, but it entirely overlooked the possibilities of economic, agricultural, and industrial development of Minnesota, as well as the Midwest, which would come about with the construction of the St. Lawrence seaway and power project.

We had hoped that more publicity would be given to the J. G. White report. Of course, the Minnesota Resources Commission has a pamphlet on that subject, but nothing to say about the St. Lawrence seaway and power project.

It is therefore fortunate that we have a publication, the Duluth Publicity, of which Frieda J. Monger is editor and publisher. The editor considered the problem of sufficient importance to report at some length a discussion which took place recently at a club meeting in Duluth, Minn., and should be commended by every person interested in the St. Lawrence project for giving publicity to this J. G. White report.

At that meeting, according to the editor of the Duluth Publicity, Thomas W. Wahl, Duluth member of the Minnesota Tidewater Commission, took exception to the J. G. White report. Mr. Wahl's devotion to the St. Lawrence seaway and power project is too well known among his friends and neighbors to require any comment. He rendered a fine public service in discussing the J. G. White report. The editorial which appeared in Duluth Publicity under date of Saturday, April 28, 1945, and which tells its own story, reads as follows:

MINNESOTA'S BIGGEST PROJECT SLIGHTED

At an open forum meeting sponsored by the Republican Women's Club of Duluth last Thursday evening in the chamber of commerce, the J. G. White Engineering Corporation's report on the physical resources of Minnesota was the subject for discussion. After a talk by James W. Clark, executive secretary of the Minnesota Resources Commission, which sponsored the White survey, the meeting was thrown open for discussion.

Thomas W. Wahl, Duluth member of the Minnesota Tidewater Commission, and for 30 years a staunch advocate of the Duluth-St. Lawrence seaway, took the floor. Mr. Wahl called attention to the fact that exactly 100 years ago 1 man, 1 horse, and a wagon handled all the freight around the Sault Ste. Marie Falls, and that in 1944 the tonnage handled on the Great Lakes amounted to 159,000,000 tons.

Mr. Wahl had with him a copy of the original White report, which consists of four large volumes. He voiced objection to the fact that the Great Lakes-St. Lawrence seaway was not mentioned except to say that if the lake channels were deepened there "might" be more tonnage.

Mr. Clark called attention to the fact that Minnesota farmers were at a disadvantage because of cost of hauling their products to market. Mr. Wahl pointed out that the only way this can be overcome is through the seaway, as it costs nine times as much to haul freight by rail as it does by deep-water transportation. He stated that Henry Tarring, Jr., and Joseph J. Kuchar, representatives of the White Engineering Co., called upon him in June 1944 and that he spent over 2 hours with them, going over his private St. Lawrence seaway library which he has accumulated during the past 30 years. Mr. Wahl stated further that he had introduced Tarring and Kuchar to Julius H. Barnes, whom he considers the best-posted man in the Nation on Great Lakes transportation, and that Mr. Barnes, Mr. Kuchar, and Mr. Wahl then spent over 2 hours going over the project. Later on Mr. Barnes and Rollo F. Hunt, Duluth attorney and chairman of the Minnesota Tidewater Association, went to St. Paul by appointment with the J. G. White officials for a third conference on the seaway.

Mr. Wahl insisted that after he, Mr. Barnes, and Mr. Hunt gave the White officials all of this information on a subject so vital to the State of Minnesota, they should have said something more than: "The development of the St. Lawrence waterway to sufficient depth might have a far-reaching effect on bulk lake traffic by bringing ocean ships to the Great Lakes and to Duluth-Superior. The lake carriage of goods has offered lower rail-lake and rail-lake-rail rates than all-rail rates for like shipments. This factor has been beneficial to Minnesota."

After casually examining the original White report we would say it is not as optimistic about Minnesota's future as conditions warrant. Instead of hiring someone from a long distance, officials who sent a couple of men here for a few months, it might have been better to have engaged someone who knows the Midwest or those who have lived in our State for many years and know its advantages and disadvantages. One thing is certain: a report costing some $175,000, of which Duluthians contributed $25,000, should have devoted more space to the biggest project in Minnesota's future—the St. Lawrence seaway.

Mr. Speaker, evidently the J. G. White Engineering Corporation was so busy looking at the forest that it failed to see any of the trees. This must be true because people interested in developing Minnesota and the Northwest have consistently pointed out the advantage of water transportation rates in the Great Lakes area. The Midwest is a landlocked empire and the 27-foot channel in the St. Lawrence River would make the various cities on the Great Lakes virtually ocean ports. Commerce has never done any damage to New York, Boston, and other eastern seaboard cities. Measured by their standards of commercial activity, the Great Lakes ports would become beehives of activity upon completion of the seaway project.

Money must be plentiful and people must like to waste it, if the State spent $175,000 for a report which entirely overlooked the unlimited possibilities of the St. Lawrence development, so far as progress in Minnesota and other adjacent States is concerned.

Of course, there is always a reason, like grapenuts, for some things that happen. I am under the impression that one of the suburbs of Duluth, about 178 miles away, had some industrialists who "engineered" this engineering report. They evidently saw to it that the report was tailor-made and must have felt that Duluth was an orphan or a stepchild, and did not "fit in" with the purposes they had in mind in getting this report.

The Sovietizing of Finland

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. O'KONSKI. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article on the sovietizing of Finland:

Since September 20, 1944, when Finland was forced to submit to Russia's crushing armistice terms, there has begun the liquidation of Finland's independence, once held up as a model for the democracies of the world. News from Finland has been scarce, but what little has trickled through the present tight censorship raises grave questions as to Finland's hope for continuance as a free and independent people.

Reporting as a representative of the Federal Council of Churches, Dr. A. L. Warnshuis, who recently visited Europe, stated, "I have brought a special appeal from Finland where the harsh armistice and internal conditions mean the sovietizing of that country." (The Church Situation in Europe, News Bulletin of the National Lutheran Council, January 26, 1945.)

Oscar Jacobi, who visited Finland recently, obviously made an understatement when he said in Collier's (January 20, 1945) that some of the text in the next chapters of Finland's history "is going to be contributed by Moscow." In Finland's recent parliamentary elections, the truly significant factor was not that the elections were outwardly "free" but that there was present fear and psychological intimidation. The Russian newspaper Pravda made clear to the Finnish people that parliamentary elections in Finland were "not to be considered an internal affair of the Finns." To this she added the righteous-sounding assertion that Allied Nations' public opinion was closely watching Finland's election to see whether there would be a "complete victor for the principles adopted at the Crimean Conference." Taken together with her claim that the Young Communist Party is the second largest among the Finnish parties today, this statement clearly implied that only a decisive vote for the Communists would be considered in accord with the principles adopted at Yalta. Contrast this with the observation of Newsweek, on March 19, 1945, that the "Finnish electoral campaign is being watched closely in Washington and London for indications of Russia's attitude toward popular elections in countries under its control."
